REQUIREMENTS

- School Improvement Leadership, Post-Baccalaureate Certificate (P.B.C.) (p. 464)

School Improvement Leadership, Post-Baccalaureate Certificate (P.B.C.)

Total Credits: 12 credits required

Students who wish to receive MSDE certification will have the opportunity to complete an additional 6 credits that include an internship, on top of the 12 required credits. The optional additional courses include:

• EDUC671: Education Law, Finance and Policy (3 credits)
• EDUC689: Practicum In Educational Administration and Supervision (3 credits)

Course	Title	Credits
Required courses:		
EDUC640	Introduction to Educational Leadership	3
EDUC645	Leading Instructional Improvement	3
EDUC646	Leading Instructional Excellence	3
EDUC670	Learning Communities	3
Total Credits		**12**

School Librarianship (Z114)

Graduate Certificate Program
College: Information Studies

Abstract

The Certificate of Professional Studies in School Librarianship will provide individuals with the coursework required to qualify for certification as a school librarian (library media specialist) in Maryland and in other states with similar certification requirements. The eight required courses, all offered online, may be completed within an 18 month period.

In order to enroll in the certificate program, individuals must have a Master's of Library and Information Science degree or a Master's degree in another field of study and a degree in Education or substantial K-12 teaching experience.

[1] Students with Education degrees and/or teaching experience are required to take LBSC671. Students who do not have Education degrees or teaching experience are required to complete an internship in School Libraries course.

School Psychology (COSP)

Graduate Degree Program
College: Education

Abstract

The graduate programs in Counseling Psychology, School Psychology, and Counselor Education (CoPE) include several distinct areas of specialization that are designed to provide the knowledge and skills needed for practice and scholarship in counseling and related human service professions. These fields are concerned with assisting people individually, in groups, and in organizations to attain their optimal level of personal, social, educational, and career functioning. Graduates are employed in a variety of settings including schools, colleges and universities, mental health agencies, business and industry, government agencies, and other community service and practice facilities. Depending on the specific area of specialization and level of training, program graduates may serve as researchers, educators, supervisors, psychologists, counselors, or program administrators.

Master's level professional entry-level training is offered in the School Counseling program, which prepares students to become school counselors in elementary, middle, and high school settings. School counselors are leaders, advocates, and systemic change agents who provide individual and group counseling to school-aged children, develop and implement comprehensive developmental school counseling programs, and collaborate with all key stakeholders, including classroom teachers, school administrators, parents, and community members, to ensure the academic, personal-social, and college-career development of students.

The Ph.D. degree is offered in two areas of specialization: Counseling Psychology (in collaboration with the Psychology Department) and School Psychology. Doctoral studies prepare students to achieve exceptional competence in the theory and practice of their field; to develop a high level of skills as researchers, educators and administrators; and to assume positions of leadership in relevant settings. Students in the specialization of Counseling Psychology

are prepared to work as researchers, educators, psychologists, and supervisors in such settings as academic departments, college and university counseling centers, and community mental health agencies. Doctoral-level school psychologists serve as researchers, university faculty, supervisors, administrators, and advanced level practitioners. Program accreditation within CoPE includes: The School Psychology and Counseling Psychology doctoral programs are accredited by the American Psychological Association (APA). The School Psychology doctoral program is approved by the National Association of School Psychologists (NASP), and is also approved for certification by the Maryland State Department of Education. The School Counseling masters program is approved by the Maryland State Department of Education.

Note that, since 2012, the CoPE graduate programs have been part of a new department, the Department of Counseling, Higher Education, and Special Education. The CoPE programs were previously housed in the Department of Counseling and Personnel Services.

The School Psychology **(**http://www.education.umd.edu/CHSE/academics/specialization/SchoolPsychology.html**)** Program is an APA-accredited, research-intensive Ph.D. program in professional psychology that embodies the scientist-practitioner model. Program graduates pursue academic/research- and practice-oriented careers. Graduates of the Program are eligible for licensure as professional psychologists in Maryland and other states, and are also eligible for the Nationally Certified School Psychologist credential awarded by NASP. Graduates are automatically eligible for Maryland State Dept. of Education certification as a School Psychologist.

Financial Assistance

The Department of Counseling, Higher Education, and Special Education offers graduate research, teaching, and administrative assistantships on a selective basis to doctoral students. The Department also assists its students in finding assistantship placements with a variety of on-campus and off-campus units. In addition, a small number of new Ph.D. students are offered highly selective fellowships funded jointly by the Department and the University.

Application Deadlines

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	December 1, 2023
International Applicants:	
F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants	December 1, 2023

Other Deadlines: Please visit the program website at http://www.education.umd.edu

REQUIREMENTS

- School Psychology, Advanced Graduate Specialist (A.G.S.) (p. 467)
- School Psychology, Doctor of Philosophy (Ph.D.) (p. 467)
- School Psychology, Master of Arts (M.A.) (p. 467)

FACILITIES AND SPECIAL RESOURCES

All master's, A.G.S., and doctoral students are required to include supervised fieldwork experiences in their degree programs. The CoPE programs have excellent cooperative relationships with on-campus facilities, such as the Counseling Center and Health Center. Fieldwork may also be done at a wide variety of school systems, colleges and universities, and counseling services and mental health agencies in the Baltimore/Washington metropolitan area, or nationally.

In addition to campus and program resources, students utilize the many major research and professional institutions that are easily accessible to the campus. These include the Library of Congress, the National Library of Medicine, the National Institutes of Health, the Institute of Education Sciences, professional associations such as the American Counseling Association, the American Psychological Association, and the National Association of School Psychologists.

School Psychology, Master of Arts (M.A.)

Students pursing doctoral degrees may earn the M.A. with thesis within the doctoral program while progressing to the Ph.D. Please contact your advisor for more information.

School Psychology, Doctor of Philosophy (Ph.D.)

The Doctoral program in School Psychology requires the completion of 102 credits, including 12 credits of EDCP899.

Advance to Candidacy: In addition to the course requirements below, students must pass all Comprehensive Exam requirements. Comprehensive Exam requirements include the following:

- Research Review
- Conference Paper/Presentation
- Dissemination of Psychological Science to Practitioner or Lay Audience
- Praxis II School Psychology Exam
- Case Conceptualization Report

Post-Candidacy: Complete a first or co-authored chapter or manuscript submitted for publication with advisor approval. Complete at least 12 credits of EDCP899 Doctoral Dissertation Research in addition to defending and submitting an original dissertation.

School System Leadership (EDUC)

Graduate Degree Program
College: Education

Abstract

The Doctorate of Education (Ed.D.) in School System Leadership is a “Practice Based” doctoral program designed to develop leaders who can develop and lead collaborative and inclusive system improvement initiatives.

The program enrolls cohorts of students who work together over 36 months to identify, investigate and solve real school system problems. The Ed.D. in School System Leadership is approved by the Maryland State Department of Education for Superintendent II certification.

Science, Technology, and Innovation Policy (online) (Z156)

Graduate Certificate Program
College: Public Policy

ABSTRACT

The Graduate Certificate in Science, Technology and Innovation Policy is a four-course (twelve credit) program of study designed for mid-career professionals from public agencies, multinational organizations and relevant private and civil society organizations; as well as graduate students at UMD. The curriculum provides the knowledge and skills necessary to understand, analyze and implement policies related to science, technology and innovation, including regulatory aspects related to new technologies and approaches for creating and commercializing new technologies and innovations. This program works in and across a range of science and technology domains such as information & communication technology and energy & environmental technology.

Second Language Acquisition (SLMA)

Graduate Degree Program
College: Arts and Humanities

Abstract

The M.A. is intended primarily as a two-year program for full-time students. A very limited number of part-time students would also be admitted. It will provide students with rigorous, comprehensive training in the theory and research of second (including foreign) language learning, teaching and testing, and related areas. A major program focus includes preparation for those working, or intending to work, in programs for tertiary students and adults studying less commonly taught languages (LCTLs), e.g., East-Asian and Middle-Eastern languages, and such modern European languages as Spanish, French, Italian and German. Areas of particular faculty expertise include cognitive processes in SLA; language teaching methodology and pedagogy; psycholinguistics; language processing; individual differences in such factors as age, aptitude, and working memory; second language analysis; interlanguage studies; heritage learners; needs analysis; syllabus design; materials writing; learner training; language assessment; program evaluation; second language research methods; task-based language teaching; and uses of technology in language learning and testing.

Financial Assistance

Masters Degree and Certificate students in the College of Arts and Humanities are rarely offered funding. It is expected that students admitted to the SLA M.A. or Certificate Program will come with outside sponsorship.

REQUIREMENTS

- Second Language Acquisition, Master of Arts (M.A.) (p. 471)

FACILITIES AND SPECIAL RESOURCES

In addition to the University graduate library, the SLA program offers research facilities and resources to facilitate research and materials development, including a multimedia SLA Lab, the Language House (http://www.languages.umd.edu/lh/), The Center for Innovative Teaching and Learning (http://sllc.umd.edu/citl/), the Office of Information Technology (http://www.oit.umd.edu/), and the Center for Teaching Excellence (http://www.cte.umd.edu/).

Students completing coursework with affiliate faculty in the Departments of Psychology, Communication (http://www.comm.umd.edu/), Linguistics (http://www.ling.umd.edu/), and Education (http://www.education.umd.edu/) as well as the Center for Advanced Study of Languages (http://www.casl.umd.edu/) may have access to their respective resources.

Second Language Acquisition, Master of Arts (M.A.)

Thesis option: 30 credits
Non-thesis option: 30 credits

The M.A. in SLA is a 30-credit program, with two tracks: Plan A, by coursework and thesis, and Plan B, by coursework only. These two tracks are meant to accommodate two slightly different populations, those planning on going on for the Ph.D. at Maryland or elsewhere (Plan A) and those who will be consumers and interpreters rather than producers of research and for whom the M.A. will be a terminal degree (Plan B). A Certificate in SLA will also be offered. The Certificate requires 18 credit hours of course work from the Plan B curriculum.

Second Language Acquisition (SLPH)

Graduate Degree Program
College: Arts and Humanities

Abstract

The Ph.D. program in SLA at the University of Maryland aims to train students to conduct research on second language acquisition processes. It has a strong cognitive focus. The program draws upon the expertise of a distinguished cadre of faculty in the School of Languages, Literatures and Cultures (http://www.languages.umd.edu/), and in affiliate departments such as Human Development, Linguistics (http://ling.umd.edu//); Measurement, Statistics, and Evaluation (http://www.education.umd.edu/EDMS/); Hearing and Speech (http://www.bsos.umd.edu/hesp/); Philosophy (http://www.philosophy.umd.edu/); Psychology (http://www.bsos.umd.edu/psyc/); and Curriculum and Instruction (http://www.education.umd.edu/EDCI/)

Financial Assistance

Most students admitted to the Ph.D. program will be funded, either via graduate or teaching assistantships or via research assistantship on grants and contracts, all providing tuition waiver plus stipend. Some students may receive a Graduate Assistantship from the UMCP-affiliated Center for the Advanced Study of Language (CASL) (http://www.casl.umd.edu/) or the National Foreign Language Center (NFLC (http://www.nflc.org), a unit within the College of Arts and Humanities (ARHU).

REQUIREMENTS

- Second Language Acquisition, Doctor of Philosophy (Ph.D.) (p. 472)

FACILITIES AND SPECIAL RESOURCES

In addition to the University graduate library, the SLA program offers research facilities and resources to facilitate research and materials development, including a multimedia SLA Lab, the Language House (http://www.languages.umd.edu/lh/), The Center for Innovative Teaching and Learning (http://sllc.umd.edu/citl/), the Office of Information Technology (http://www.oit.umd.edu/), and the Center for Teaching Excellence (http://www.cte.umd.edu/).

Students completing coursework with affiliate faculty in the Departments of Psychology, Communication (http://www.comm.umd.edu/), Linguistics (http://www.ling.umd.edu/), and Education (http://www.education.umd.edu/) as well as the Center for Advanced Study of Languages (http://www.casl.umd.edu/) may have access to their respective resources.

Second Language Acquisition, Doctor of Philosophy (Ph.D.)

Doctoral students are required to take 3 credits of SLAA649 (SLAA649R - Research Critique) within their first year. In addition, students choose two courses from two different specializations for a total of 4 courses. Specializations available include Second Language Learning, Second Language Instruction, Second Language Measurement and Assessment, and Second Language Use. Students are also required to complete 2 courses in quantitative and/or qualitative research methods, as well as 12 credits of SLAA899.

The Ph.D. has 4 areas of specialization: **Second Language Learning, Second Language Instruction, Second Language Measurement and Assessment,** and **Second Language Use**. Students select 2 courses each from 2 of these areas (for a total of 4 courses) and are expected to take 2 additional electives in the area of their proposed dissertation work. In addition, all students are expected to take 2 courses in quantitative and/or qualitative research methods. The 8 courses (total) represent the minimum coursework requirement. Some students may need remedial coursework prior to undertaking their 8 courses, and many will

wish to take courses beyond the minimum 8 based on their interests. Additionally, all students are strongly encouraged to take a course in the philosophy of science. Before graduation, all students completing the PhD in Second Language Acquisition must demonstrate three types of experience with non-native language: learning a non-native language, using a non-native language, and teaching a language to non-native speakers of that language. All three types of experience will be verified through official documentation and/or assessment as follows:

1. Language Learning. Students must have spent at least two semesters as a student of a non-native language in a post-secondary classroom environment (6 total credits minimum). Verified through transcript. SLLC will provide this experience for any student who needs it.
2. Language Teaching. Students must have taught a language to non-native speakers of that language for at least 1 semester, or the equivalent of 45 hours. Verified through contract, letter, etc. SLLC will provide this experience for any student who needs it.
3. Language use. Students must show that they are able to communicate in a non-native language at the intermediate-low level on the ACTFL scale through an Oral Proficiency Interview (OPI). Students whose native language is not English will be able to satisfy this requirement through their competency in English. These three requirements do not necessarily have to be met in the same language. Before the PhD dissertation, two qualifying papers are required. Please see the program website (http://www.languages.umd.edu/slaa/) for more details.

Security and Terrorism Studies (online) (MPTS)

Graduate Degree Program
College: Behavioral and Social Sciences

ABSTRACT

The National Consortium for the Study of Terrorism and Responses to Terrorism's (START) MPS in Security and Terrorism Studies provides students with advanced education on the causes, dynamics, and impacts of terrorism and wider issues related to human security in a complex world. The program is dedicated to training and mentoring a new generation of scholars and analysts to holistically examine questions related broadly to terrorism and security. The program uses a "whole of social sciences" approach to prepare students to examine the complex social, political, economic, and psychological underpinnings of terrorist and security threats. Students are exposed to the theoretical and methodological skills necessary to pursue advanced research and/or be successful in an analytic career. The program consists of twelve courses. Courses are offered in an online learning environment. The program can be completed in as little as four semesters.

The program is appropriate for individuals interested in (and/or currently) working in fields related to intelligence analysis, homeland security analysis, or analysis of other relevant topic areas; and individuals interested in (and/or currently) conducting scholarly research on terrorism and security.

REQUIREMENTS

- Security and Terrorism Studies, Master of Professional Studies (M.P.S.) (p. 474)

Security and Terrorism Studies, Master of Professional Studies (M.P.S.)

Non-thesis only (capstone required): 36 credits

Capstone description:

Students will be expected to complete literature reviews and quantitative or qualitative research. These will form the basis for the capstone project. The capstone is expected to result in a research report that details an aspect of their research and/or career interests. For example, a student working for a non-profit or non-governmental organization focused on countering violent extremism (CVE) may wish to focus their capstone on developing an innovative CVE program evaluation survey or method. A

student interested in becoming, or who is, an intelligence analyst may instead want to focus their capstone project on a specific threat actor and attempt to understand new linkages between that threat actor and others. Students will be expected to work with the program director and a faculty advisor to approve their capstone proposal.

Sociology (SOCY)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The Graduate Program in Sociology is designed for students seeking a Ph.D. degree. However, the M.A. option is available to students who either wish to obtain a master's degree while continuing in the Ph.D. program, or who leave the program before finishing the PhD. The graduate program is organized into four specialty areas: Demography, Political Sociology, Social Psychology, and Social Inequality & Mobility.

Typically, about half the students finishing Ph.D. degrees in the Sociology Department work as faculty members at colleges and universities, and about half are working in research, administration, and consulting in federal, state, or private organizations. Our location in the Washington, D.C., area offers an unusual number of full-time research opportunities for our graduates.

Financial Assistance

Financial assistance for graduate students is available through teaching and research assistantships, and for advanced students through part-time instructorships. We also have several special fellowships for outstanding applicants that provide additional support tailored to the applicants needs. All carry a stipend plus tuition remission, and most include health benefits.

- Graduate Record Examination (GRE) (optional)
- CV/Resume
- Supplemental Application (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdsupplementaryapplicationsocy.pdf)
- Writing Sample: Limited to 35 pages with references, tables, and figures.
- Description of Research/Work Experience (optional)

Please note, the Master's program is for current University of Maryland undergraduates only. Any UMD applicant needs to have SAT scores of verbal plus math scores totaling at least 1270. In addition he/she subject to an academic audit by the Academic/Departmental Advisor.

Admission to the graduate program is based upon the student's academic record, GRE scores, letters of recommendation, and other information relevant to the applicant's chances of being successful in the program. Although a previous major in Sociology is not required, students entering the graduate program should have had the following in undergraduate courses: mathematics through college algebra, elementary statistics, sociological theory, and sociological research methods. Students who have completed prior graduate coursework in Sociology may petition to waive one or more courses in Social Theory, Statistics, or Research Methods. New graduate students are assigned temporary advisors upon arrival, and are then expected to select a permanent advisor who will direct their dissertation research.

For consideration for departmental fellowships or assistantships, applications should be received by the preferred deadlines.

For more admissions information or to apply to the program, please visit our Graduate School website (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/).

REQUIREMENTS

- Sociology, Doctor of Philosophy (Ph.D.) (p. 476)
- Sociology, Master of Arts (M.A.) (p. 476)

FACILITIES AND SPECIAL RESOURCES

In addition to these programs, the department is closely involved with the following research centers: the Center for Research on Military Organization, the Maryland Population Research Center (MPRC), the Center for Innovation, and the Program for Society and the Environment. Collectively, these centers account for over five million dollars in annual research funding. The Department is also affiliated with an interdisciplinary Joint Program on Survey Methods (JPSM). The campus has excellent computer facilities and computer resources are available to faculty and graduate students.

Sociology, Master of Arts (M.A.)

The graduate program in the Department of Sociology is designed for Ph.D. students. We do not offer a terminal Masters program and we will not accept or enroll students for the single purpose of acquiring a Masters degree. However, doctoral students may obtain a Master of Arts degree during their course of doctoral study by completing 30 credit hours.

Course	Title	Credits
Required courses:		
SOCY620	Development of European and American Sociological Theory	3
SOCY601	Statistics For Sociological Research I	3
SOCY602	Statistics For Sociological Research II	3
SOCY699	Special Social Problems (SOCY699D - Special Social Problems)	3

Software Engineering (online) (MESW)

Graduate Program
A. James Clark School of Engineering

ABSTRACT

The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Our Software Engineering program is concerned with developing and maintaining software systems that behave reliably and efficiently, are affordable to develop and maintain, and satisfy all the requirements that customers have defined for them. Our faculty consists of world class researchers and practitioners who apply the latest Software Engineering principles at large projects at NASA, DARPA, Raytheon, and Lockheed Martin. Courses focus on three technical areas—cybersecurity, computer

engineering, and systems engineering—preparing students to help solve pressing real-world problems.

FINANCIAL ASSISTANCE

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) (optional)
- CV/Resume (optional)

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland. For anyone needing these documents, consider applying for a full-time master's program offered on campus (https://gradschool.umd.edu/engineering/meng-campus/).

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.

Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.

REQUIREMENTS

- Software Engineering, Master of Engineering (M.Eng.) (p. 477)

FACILITIES AND SPECIAL RESOURCES

This program is currently offered 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening, in some instances, or at a time convenient for their schedule each week. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

Software Engineering, Master of Engineering (M.Eng.)

Non-thesis only: 30 credits required

All Professional Master of Engineering Programs consist of 10 courses/30 credits. All students are expected to complete a preliminary course plan for their intended degree program. Degree planning worksheets can be found here: https://mage.umd.edu/degree-planning-sheets (https://mage.umd.edu/degree-planning-sheets/)

Software Engineering (Z065)

Graduate Certificate Program
College: Engineering

Abstract

The Graduate Certificate in Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Our programs in Software Engineering program is concerned with developing and maintaining software systems that behave reliably and efficiently, are affordable to develop and maintain, and satisfy all the requirements that customers have defined for them. Our faculty consists of world class researchers and practitioners who apply the latest Software Engineering principles at large projects at NASA, DARPA, Raytheon, and Lockheed Martin. Courses focus on three technical areas—cybersecurity, computer engineering, and systems engineering—preparing students to help solve pressing real-world problems.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

Spanish Language and Literature (SPAP)

Graduate Degree Program
College: Arts and Humanities

Abstract

The Faculty of the Department of Spanish and Portuguese is committed to excellence in teaching and mentoring, along with the production of new knowledge that is the hallmark of a strong department. We are known for our focus on intersections between language, literature, culture, and politics, our community engagement, and our MA track in Hispanic Applied Linguistics. We bridge several intellectual fields across Spain and Spanish America and between North, Central and South America, the Caribbean, and Brazil, as we rethink the specificity of our cultures. The Department has been the home of major Latin American and Spanish literary figures, to include Juan Ramon Jimenez, who taught at the University between 1943 and 1951 and who, after being nominated by the Department, received the Nobel Prize for Literature in 1956. His legacy, as well as that of cultural critic Angel Rama, award-winning poet Jose Emilio Pacheco, award winning writer and Professor Emeritus, Jorge Aguilar Mora, and Professor Emerita, Graciela Palau de Nemes, among others, continues to shape our thought, vision, and mission.

The Department is renowned for its multidisciplinary strengths in Latin American and Lusophone literatures and cultures as well as its faculty research in the areas of the history of ideas, Southern Cone literature, Judeo-Latin American literature, Mexican literature, theater, and performance, Latin American modernismo, colonial and transatlantic discourses, Central American transnational cultures, U.S. Latinidades, Quechua language and indigenous literatures, Caribbean-Archipelagic poetics/politics, salsa and sabor, Brazilian cinema, Lusophone Africa and African diaspora studies, deconstruction of the Cuban Revolution, and contemporary reinscriptions of the nineteenth century.

Faculty members in the area of Spanish literature are recognized for their work in the history of the Spanish language and philology from the Middle Ages to the present, Medieval historiography and women narratives, Golden Age poetics, Cervantes and Quevedo traditions, revisions of the Enlightenment, romanticism (journalism and costumbrismo) and realism (philosophical traditions), modern and postmodern narrative and poetics, as well as representations of the Spanish Civil War and exile, particularly in Latin America.

The Department is also at the forefront of Spanish Applied Linguistics, language teaching pedagogy, language teacher education, language use and identity, social and political issues in foreign language teaching and learning, instructional technology, learner variables and learning disabilities, language for specific purposes, cross-cultural communication, and heritage language learning.

Mission

The Department of Spanish and Portuguese seeks to forge a strong dialogue between, and within, our areas of specialization pertaining to Latin America, Spain, and Portugal. To that end, we offer thorough instruction in the diverse, complex, and globalized literatures, cultures, and linguistics of the Spanish and Portuguese-speaking world. Our students not only develop the critical language skills to communicate in the target language but also gain an understanding of the cultures, politics, histories, and literatures of the communities and national spaces of the Americas, Spain, and Portugal.

Our goal is to foster learning and thought, develop critical perspectives, and promote intellectual growth in our students. We teach across interdisciplinary fields such as literature, film, popular and visual culture, theatre, history, philosophy, critical theory, gender and queer studies, philology, and linguistics in different cultural and geographic contexts. We strive for the creation and discussion of new forms of knowledge and the effective engagement of our students and faculty with the world. We prepare students to become promising professionals in their chosen careers.

Our M.A. and Ph.D. graduates are mentored by our faculty, engage in substantive research projects, and benefit from rigorous training in the teaching skills required by the profession. They are prepared to meet the professional demands of highly competitive academic positions in the United States and Latin America.

Financial Assistance

Financial assistance in the form of fellowships and assistantships is available for qualified applicants.

ADMISSIONS

General Requirements

- Statement of Purpose
- Transcript(s): Minimum 12 credits upper level literature/culture courses.
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- 3 Letters of Recommendation: The letters of recommendation must be in English or notarized translation.
- Writing Sample: A research paper written in Spanish, uploaded to the Upload Requirements section of the application.
- CV/Resume
- Description of Research/Work Experience (optional)

In addition to Graduate School requirements, candidates must have a bachelor's degree with a major in Spanish Language and Literature, or the equivalent in a related field with near native fluency in the written and spoken language.

For more admissions information or to apply to the program, please visit our Graduate School website (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/).

Application Deadlines

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	January 17, 2024
International Applicants	
F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants	January 17, 2024

Other Deadlines: Please visit the program website at http://sllc.umd.edu/spanish (http://sllc.umd.edu/spanish/)

REQUIREMENTS

- Spanish Language and Literature, Doctor of Philosophy (Ph.D.) (p. 483)
- Spanish Language and Literature, Master of Arts (M.A.) (p. 482)

FACILITIES AND SPECIAL RESOURCES

In addition to the resources of the University libraries, students have easy access to the Library of Congress, the Smithsonian Institution and other Washington-based libraries and archives. National Archives-II, located on University grounds, is readily accessible to the Campus community. Dr. Sosnowski is the founder and editor of the literary journal *Hispamérica*. The graduate students publish *Animal de fondo*.

In association with the Latin American Studies Center, the Department promotes original initiatives on Latin American topics. Postdoctoral Fellows and Visiting Professors are an integral part of our academic program. Also the Department hosts the Juan Ramón Jiménez Distinguished Lectures, the José Emilio Pacheco Distinguished Series, the interdisciplinary seminar "Hoy: Interdisciplinary Approaches to the Present", and a series of lectures. In recent years, our faculty has been the recipient of major grants and fellowships from The Rockefeller Foundation, the National Endowment for the Humanities and the John Simon Guggenheim Foundation.

Spanish Language and Literature, Master of Arts (M.A.)

Thesis or Non-thesis option: 30 credits

Students can specialize in either Spanish Literature, Latin American Literature, or Hispanic Applied Linguistics. For either option, students must also pass three comprehensive exams and pass a language exam. All students must submit a scholarly paper in their final semester of the program.

The Department offers three areas of specialization within the 30-credit MA: Spanish literature, Latin American literature, and Hispanic applied linguistics. All areas offer a non-thesis option and a thesis option, and all include a comprehensive examination. A one-credit course in methodology is required of all teaching assistants.

See the website of the Department of Spanish and Portuguese for more details: http://sllc.umd.edu/spanish/graduate (http://sllc.umd.edu/spanish/graduate/).

Spanish Language and Literature, Doctor of Philosophy (Ph.D.)

The doctoral degree is a research and specialized degree and the Graduate School does not require a fixed number of credit hours. However, the Department of Spanish and Portuguese requires a total of 36 credits. Before admission to candidacy, the student must demonstrate:

1. a thorough knowledge of the literary production in the chosen area (Spanish or Spanish-American Literature);
2. an in-depth knowledge of the field of specialization;
3. proficiency in at least one field of the others Hispanic literatures;
4. a reading knowledge of a language other than Spanish and English, to be used as a research tool in the field of specialization;
5. one course in linguistics, such as 'History of the Spanish Language';
6. a minimum of one course in Literary Theory and/or Criticism;
7. acquaintance with a third literature (e.g. Luso-Brazilian, French, or English); and
8. a background in supporting fields to be used as research tools (e.g. history, philosophy, political science, sociology, or art). Students must pass a comprehensive examination, a translation exam (in a language other than English and Spanish), have their dissertation proposal approved for admission to candidacy, and defend a dissertation.

Doctoral students are required to complete 36 credits of coursework in addition to 12 credits of SPAN899. Students must also pass the comprehensive exam, a language reading exam, and the dissertation proposal and defense.

Course	Title	Credits
Core Requirements		
Select 36 credits of coursework including:		36
Two courses in a secondary area		
A graduate course in the History of the Spanish Language		
A minimum of one course in literary theory and/or criticism		
Dissertation Research Requirements		
SPAN899	Doctoral Dissertation Research	12
Total Credits		**48**

Special Education (EDSP)

Graduate Degree Program
College: Education

Abstract

Graduate programs in special education are designed to prepare highly qualified teachers, to provide graduate level content, and to prepare researchers, teacher educators, and leaders in the field of special education. We offer the following graduate program options:

- M.Ed. in Special Education with Generic Elementary/Middle age based certification
- M.Ed. in Special Education with Generic Elementary/Middle age based and severe disabilities certification
- M.Ed. in Special Education with severe disabilities certification only
- M.Ed. in Specialty Program (30 credits)
- M.A. in Special Education (36 credits)
- Advanced Graduate Specialist Certificate (30 credits beyond the master's degree) (p. 487)
- Ph.D. program

Note that, as of 2012, the EDSP graduate programs are part of a new department, the Department of Counseling, Higher Education, and Special

Education. The EDSP degree programs were previously housed in the Department of Special Education.

Financial Assistance

A limited number of fellowships, assistantships and/or grants are available to qualified applicants.

Website: http://www.education.umd.edu/CHSE/SE_overview.html

Courses: EDSP (https://academiccatalog.umd.edu/graduate/courses/edsp/)

ADMISSIONS

GENERAL REQUIREMENTS

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- M.A. and Ph.D. admissions requirements (https://gradschool.umd.edu/education/edsp-ma-phd/)
- M.Ed. admissions requirements (https://gradschool.umd.edu/education/edsp-med/)

For the M.Ed. programs, students must submit scores on the Praxis Core Academic Skills for Educators test (meeting the State of Maryland passing scores) prior to admission into the program and have an undergraduate 3.0 GPA. The Master's of Arts program requires a 3.0 undergraduate GPA and the submission of the Miller Analogies Test or the Graduate Record Examination test scores at or above the 40th percentile rank. The AGS program requires a 3.0 undergraduate GPA, a master's GPA of 3.5, and submission of scores on the MAT, GRE, or Praxis Core Academic Skills for Educators test. Admission to the Ph.D. program requires:

1. Master's degree or equivalent in Special Education or a related field from an accredited institution with a GPA of 3.5 or better;
2. An undergraduate GPA of 3.0 or better;
3. A score on the Graduate Record Exam placing the student at or above the 50th percentile on verbal, quantitative, and analytic subtests;
4. Two years of research or work experience with exceptional populations;
5. Three letters of recommendation from individuals who have direct knowledge of the applicant's academic capabilities, work experience, and professional characteristics;
6. A statement of academic and research goals including intended area of study, research interests, and plans for future employment;
7. Evidence of writing skills shown in the statement of academic and research goals;
8. EDMS Research Methods I or equivalent.

Students pursuing teacher certification in special education are required to take courses required by the Maryland State Department of Education which lead to certification in the State of Maryland. Programs for the Master's specialty program, the AGS, and the Ph.D. are planned individually by the students and advisor to reflect each student's background and goals.

A TOEFL score of 100 is required for international students who are not native speakers of English.

1. GRE for Ph.D., Miller Analogies or GRE for M.A., Praxis Core Academic Skills for Educators for M.Ed., MAT, GRE or Praxis Core Academic Skills for Educators for A.G.S. (at State of Maryland cut scores)
2. Three Letters of Recommendation
3. Statement of Goals
4. Transcripts from all previously attended colleges and universities
5. Interview required for Ph.D. and M.Ed. with teacher certification

	M.Ed. (without Certification): March 15, 2024
	M.A.: Dec 1, 2023
	Ph.D.: Feb 1, 2024

RESOURCES AND LINKS:

Program Website: http://www.education.umd.edu/CHSE/SE_overview.html
Application Process: gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

REQUIREMENTS

- Special Education, Certificate of Advanced Study (C.A.S.) (p. 487)
- Special Education, Doctor of Philosophy (Ph.D.) (p. 486)
- Special Education, Master of Arts (M.A.) (p. 485)
- Special Education, Master of Education (M.Ed.) (p. 485)

FACILITIES AND SPECIAL RESOURCES

The Special Education program provides an unparalleled setting for graduate study. The program's proximity to outstanding public schools in Maryland provides students who wish to pursue teacher certification the chance to gain experience with a culturally and linguistically diverse student population in urban, suburban, and rural settings.

Additionally, students pursuing a doctoral degree can have experiences in advocacy and professional organizations, government agencies, including the US Department of Education in addition to the coursework they take at the University.

Special Education, Master of Arts (M.A.)

Thesis option only: 36 credits required

Students enrolled in the master's program in special education may earn the Master of Arts degree which requires a thesis or the Master of Education degree which may or may not include teacher certification.

Students complete the following courses:

Course	Title	Credits
Core Requirements		
EDSP600	Issues and Trends in Educating Individuals with Disabilities	3
EDSP799	Master's Thesis Research	6
Select two of the following:		6
EDMS645	Quantitative Research Methods I	
EDSP670	Single Case Research Designs in Education	
EDSP671	Qualitative Methodologies in Special Education	
EDSP673	Evaluating Evidence-Based Practices in Special Education	3
or EDSP625	Evidence Based Practices for Individuals with Significant Disabilities	
Remainder of coursework approved by advisor		18
Total Credits		**36**

Special Education, Master of Education (M.Ed.)

All tracks within the Special Education M.Ed. require that students successfully complete a master's seminar paper.

Special Education (Non-Certification)

The following courses are completed on the College Park campus:

Course	Title	Credits
Core Requirements		
EDSP600	Issues and Trends in Educating Individuals with Disabilities	3
Select two of the following:		6
EDMS645	Quantitative Research Methods I	
EDSP670	Single Case Research Designs in Education	
EDSP671	Qualitative Methodologies in Special Education	
EDSP673	Evaluating Evidence-Based Practices in Special Education	3
or EDSP625	Evidence Based Practices for Individuals with Significant Disabilities	
Remainder of coursework approved by advisor		18
Total Credits		**30**

Elementary/Middle School Special Education (certification)

The following courses are completed on the College Park campus:

Course	Title	Credits
EDSP470	Introduction to Special Education	3
EDSP443	Language and Literacy Acquisition in Children with Disabilities	3
EDSP615	Reading Assessment for Intervention	3
EDSP616	Reading and Writing Instruction in Special Education I	3
EDSP692	Graduate Internship I: Elementary/Middle Special Education	2
EDSP684	Reading and Writing Instruction in Special Education II	3
EDSP613	Principles and Practices in Positive Behavior interventions and Classroom Supports	3
EDSP652	Curriculum and Instruction: Elementary Special Education	3
EDSP687	Collaborative Partnerships in Special Education	3
EDSP695	Graduate Internship II: Elementary/Middle Special Education	6
EDSP690	Teacher Candidate Research Seminar in Special Education	3
EDSP683	Assessment and Instruction in Mathematics in Special Education	3
Total Credits		**38**

Elementary/Middle School and Severe Disabilities (Certification)

The following courses are completed on the College Park campus:

Course	Title	Credits
EDSP470	Introduction to Special Education	3
or EDSP411	Foundations of Technology Integration for Curriculum Access	
EDSP613	Principles and Practices in Positive Behavior interventions and Classroom Supports	3
EDSP602	Instruction of Students with Severe Disabilities I	3
EDSP443	Language and Literacy Acquisition in Children with Disabilities	3
EDSP652	Curriculum and Instruction: Elementary Special Education	3
EDSP615	Reading Assessment for Intervention	3
EDSP616	Reading and Writing Instruction in Special Education I	3

EDSP603	Supporting Access for Students with Multiple Disabilities Across Settings	3
EDSP614	Instruction of Students with Severe Disabilities II	3
EDSP683	Assessment and Instruction in Mathematics in Special Education	3
EDSP692	Graduate Internship I: Elementary/Middle Special Education	2
EDSP684	Reading and Writing Instruction in Special Education II	3
EDSP604	Methods of Teaching Autistic Students	3
EDSP687	Collaborative Partnerships in Special Education	3
EDSP695	Graduate Internship II: Elementary/Middle Special Education	6
EDSP690	Teacher Candidate Research Seminar in Special Education	3
Total Credits		**50**

Severe Disabilities (certification)

The following courses are completed on the College Park campus:

Course	Title	Credits
EDSP602	Instruction of Students with Severe Disabilities I	3
EDSP604	Methods of Teaching Autistic Students	3
EDSP625	Evidence Based Practices for Individuals with Significant Disabilities	3
EDSP687	Collaborative Partnerships in Special Education	3
EDSP411	Foundations of Technology Integration for Curriculum Access	3
EDSP603	Supporting Access for Students with Multiple Disabilities Across Settings	3
EDSP606	Advanced Study in Inclusive Practices in The Schools	3
EDSP614	Instruction of Students with Severe Disabilities II	3
EDSP670	Single Case Research Designs in Education	3
Electives		6
Total Credits		**33**

Severe Disabilities with Focus Autism Spectrum Disorder (Certification)

The following courses are completed off-campus:

Course	Title	Credits
EDSP602	Instruction of Students with Severe Disabilities I	3
EDSP603	Supporting Access for Students with Multiple Disabilities Across Settings	3
EDSP604	Methods of Teaching Autistic Students	3
EDSP606	Advanced Study in Inclusive Practices in The Schools	3
EDSP614	Instruction of Students with Severe Disabilities II	3
EDSP687	Collaborative Partnerships in Special Education	3
EDSP690	Teacher Candidate Research Seminar in Special Education	3
EDSP612	Transition Methods and Disability Systems	3
EDSP613	Principles and Practices in Positive Behavior interventions and Classroom Supports	3
EDSP670	Single Case Research Designs in Education	3
or HESP627	Augmentative and Alternative Communication	
EDSP678	Seminar in Special Education ((Technology with ASD))	3
EDSP625	Evidence Based Practices for Individuals with Significant Disabilities	3
Total Credits		**36**

Special Education, Doctor of Philosophy (Ph.D.)

The Doctor of Philosophy (PhD) degree in Special Education prepares researchers, teacher educators, and leaders who will advance the education of children and adults with disabilities. The program is intended for full-time students and requires a minimum of 60 post-Master's credits in courses that address special education issues and trends, policies, current research and practice as well as research methods and design. Doctoral students will, with their advisor, identify a sequence of courses and experiences to advance their knowledge in an area of specialization. Students pursuing the doctoral program in special education must have completed a Master of Arts degree or the Master of Education degree in special education or a related area. Students should consult the Department website on Graduate Programs for more information. https://education.umd.edu/academics/programs/graduate/special-education-phd (https://education.umd.edu/academics/programs/graduate/special-education-phd/)

Advance to Candidacy: Doctoral students are required to complete 60 credits of coursework as well as a Comprehensive Portfolio. The portfolio should include the following:

- CV
- Synthesis Paper
- Evaluation of Research and Scholarship
- Evaluation of Leadership and Professional Knowledge
- At least 3 credits of EDSP898.

Post-Candidacy: Students must complete a minimum of 12 credits of EDSP899 Doctoral Dissertation Research and successfully defend and submit an original dissertation.

Course	Title	Credits
Core Requirements		
Select 5 of the following courses (or other courses with advisor approval):		15
EDSP600	Issues and Trends in Educating Individuals with Disabilities	
EDSP675	Legal and Policy Foundations for Individuals with Disabilities	
EDSP798	Special Problems in Special Education (EDSP798x Special Problems in Special Education)	
EDSP872	Theory and Empirical Design in Educational Research	
EDSP888	Apprenticeship in Special Education	
EDSP670	Single Case Research Designs in Education	
Research Methodology and Design Courses:		
EDMS646	General Linear Models I	3
EDMS651	General Linear Models II	3

Select three additional courses approved with advisor		9
Remaining Coursework:		
EDSP898	Pre-Candidacy Research	3
Electives		15
Dissertation Research Requirements		
EDSP899	Doctoral Dissertation Research	12
Total Credits		**60**

Special Education, Certificate of Advanced Study (C.A.S.)

The Certificate of Advanced Study (https://academiccatalog.umd.edu/graduate/programs/special-education-z905/) in Special Education is available to students who wish to take graduate courses beyond the master's degree. The minimum number of graduate hours is 60 (of which no more than 30 credits can be applied from another institution). The core of the program consists of special education courses in addition to other coursework within the university as approved by the student's adviser and the special education graduate faculty. The College of Education awards the certificate. http://www.education.umd.edu/CHSE/academics/degree_programs/agsEDSP.html

Special Education for General Education Teachers in Inclusive Classrooms (Z123)

Graduate Certificate Program
College: Education

ABSTRACT

This online Professional Studies Certificate: Special Education for the General Educator is designed to equip general educators with knowledge and skills to meet the needs of students with disabilities in inclusive classroom settings. General education teachers and staff will gain evidence-based instructional strategies, effective behavioral interventions, as well as knowledge regarding the requirements of the Individuals with Disabilities Education Act (IDEA) in order to meet the needs of students with disabilities in inclusive classrooms.

Speech Language Pathology (SPLA)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The M.A. program in Speech-Language Pathology is offered by the Department of Hearing and Speech Sciences. This program is available to post-baccalaureate students who have completed undergraduate pre-requisites in hearing and speech sciences/communication sciences and disorders. The SPLA program is an academically based, clinically oriented program designed primarily to prepare professional Speech-Language Pathologists. While information pertaining to communication disorders

comprises the central focus of the degree, education about the normal processes of communication, as well as about research methods, is considered an integral part of the program.

Students completing the program are eligible to obtain the Certificate of Clinical Competence in Audiology (CCC-A) of the American-Speech-Language-Hearing Association, and licensure in the State of Maryland and other states. The program typically takes 2 years of study (5 semesters, including the intervening summer and winter semesters). Students have the option of pursuing a Cultural and Linguistic Diversity Emphasis track as part of their M.A. degree. Additionally, students can concurrently pursue a post-baccalaureate Bilingual Certificate Program in Speech-Language Pathology.

The department also offers two additional graduate degree programs. At the doctoral level, the Ph.D. in Hearing and Speech Sciences (p. 301) is offered, with concentrations in Hearing, Speech or Language (see HESP (p. 301) program code). Students applying to the Ph.D. program can opt to receive an MA in Speech-Language Pathology en route to the final degree. For this M.A-Ph.D. dual degree route, applicants should use the program code HESP when applying. Students who wish to pursue the MA degree and Ph.D. successively should apply to the MA program using the degree code SPLA. Second, a clinical doctorate in Audiology (p. 143) is offered, leading either to an Au.D. degree or a combined Au.D./Ph.D (see CAUD (p. 143)).

Financial Assistance

A limited number of graduate assistantships and fellowships are available through the Department. Assistantships that carry teaching, research or clinical responsibilities are awarded on a competitive basis. Students may also seek assistantships elsewhere on campus (such as through the Dean's office or through other departments) or fellowships sponsored by private foundations (e.g., American Speech-Language-Hearing Foundation). During most years, a limited number of scholarships are offered by Montgomery County Public Schools, which involve a post-graduation commitment to work for the school system.

ADMISSIONS

General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/education/z069/))

Program-Specific Requirements

- Letters of Recommendation (3)
- CV/Resume
- Supplemental Application (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/umdsupplementaryapplicationcaudsplahespcert.pdf)
- Completion of at least 60% of undergraduate pre-requisite courses prior to application. For a list of pre-requisite courses, please visit here (https://hesp.umd.edu/content/application-faqs/).

Admission to the M.A. program is on a very competitive basis. Each year, the Department receives approximately 250-300 applications for 25 anticipated spaces in the M.A. program in Speech-Language Pathology. Successful M.A. applicants typically have earned at least a 3.5 undergraduate GPA (with 3.7-3.8 being the average), and have strong GRE scores and letters of recommendation and a Resume. In addition to the Graduate School requirements, the Department requires applicants to furnish scores on the Graduate Record Examination. Admission to the M.A. and CAUD programs is solely confined to fall matriculation. All students must finish their undergraduate program-specific prerequisite classes before matriculating in the fall. Prospective applicants should note that decisions on admissions are made in early March. Only full-time students are admitted.

For more admissions information or to apply to the program, please visit our Graduate School website (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/).

REQUIREMENTS

- Speech Language Pathology, Master of Arts (M.A.) (p. 490)

FACILITIES AND SPECIAL RESOURCES

The Department's facilities include

1) Numerous modern research laboratories equipped to support research in the areas of: acoustic phonetics, psychoacoustics, cochlear

implants, infant and adult speech perception, neuropsychology, language disorders, bilingualism, and language development, voice, fluency and electrophysiology.

2) The Hearing and Speech Clinic at UMCP. this clinic serves as the initial practicum site for all students pursuing clinical training. The Clinic includes multiple audiological test suites equipped for diagnostic testing, a complete hearing aid dispensary, a group rehabilitation room, and state-of-the-art equipment for behavioral and electrophysiological diagnostic testing, as well as hearing aid selection and fitting. Ten speech and language diagnostic and therapy rooms are integrated with observation areas; and an on-site language pre-school (LEAP, the Language-Learning Early Advantage Program), also equipped for observation.

All of the clinical and research facilities are potentially available for the conduct of student-directed research projects, or for student participation in faculty-initiated research projects. Additional research and clinical facilities are available in the Washington and Baltimore metropolitan areas. The Library of Congress, the National Library of Medicine and the libraries of various medical schools in the Washington-Baltimore area supplement the University's extensive libraries at College Park.

The Department of Hearing and Speech Sciences participates in the Neuroscience and Cognitive Sciences graduate program (see NACS; https://nacs.umd.edu/), the Comparative and Evolutionary Biology of Hearing Training Grant, and the Maryland Language Science Center (http://languagescience.umd.edu), and has ties to the Center for Advanced Study of Language (CASL); these connections afford students the opportunity to work with faculty in other departments at the University of Maryland, College Park, or at UMB.

Speech Language Pathology, Master of Arts (M.A.)

Thesis or Non-thesis option: 35 credits in addition to Practical Experience

The Department of Hearing and Speech Sciences offers the Master of Arts degree with major emphasis in Speech-Language Pathology with either the thesis or the non-thesis option. The Master's degree is required by national credentialing standards for individuals intending to practice as speech pathologists in schools, hospitals, rehabilitation facilities, hearing and speech centers or in other clinical settings. Academic course work, which includes a minimum of 35 credits, is supplemented by additional credit registrations in supervised clinical practica in the University Speech and Hearing Clinic and in selected outside clinical facilities so that the graduate will meet the academic and practicum requirements for the Certificate of Clinical Competence (C.C.C.) issued by the American Speech-Language-Hearing Association, and be eligible for licensure in the State of Maryland and other jurisdictions. The Master's degree program is accredited by the Council on Academic Accreditation, the national accrediting agency which oversees graduate programs in Speech-Language Pathology and Audiology. A full description of the Master's degree program is available at our web site, listed below. Students have the option of pursuing a Cultural and Linguistic Diversity Emphasis track as part of their M.A. degree.

Additionally, students can concurrently pursue a post-baccalaureate Bilingual Certificate Program in Speech-Language Pathology.

Student Affairs (HISA)

Graduate Degree Program
College: Education

Abstract

The Student Affairs Concentration is committed to the professional preparation of student affairs educators in higher education environments. The concentration is modeled and directed by the core values of student development, multiculturalism/social justice, leadership, scholarship and research, and ethical practices. We maintain a strong relationship with the Division of Student Affairs at the University of Maryland, College Park, which has a historic commitment to supporting scholar-practitioners. Master's graduates commonly work in settings such as student activities centers, academic advising offices, career services offices, offices of resident life, orientation, leadership programs, and multicultural centers. Doctoral graduates often become graduate faculty and/or senior administrators, directing such offices as academic advising centers, student activities, offices of student life, multicultural centers, assessment and research, learning support services, and career centers. Our location near Washington DC provides students with an abundance of opportunities to work in various higher education institutions, policy organizations, and associations in the area.

Student Affairs is a an area of concentration within The Higher Education, Student Affairs, and International Education (HESI) graduate program.
In addition to Student Affairs, HESI programs offers concentrations in Higher Education and International Education Policy. Please only include one area of concentration on your application. Before applying students should familiarize themselves with each concentration area and choose the one that most closely fits their own particular needs and aspirations. The College of Education website (http://www.education.umd.edu/)

offers descriptions of all the concentrations, faculty profiles and contact information, and is an essential resource for all applicants.

HESI graduate programs are part of a new department, the Department of Counseling, Higher Education, and Special Education. Previously, Student Affairs was part of the Department of Counseling and Personnel Services and Higher Education and International Education Policy were part of the Department of Education Leadership, Higher Education and International Education. HESI is committed to advancing the positive role education can have in society. Our faculty and students study core facets of the education system; this includes the functioning and impact of colleges and universities, student learning and development in higher education, and the enactment and implementation of K-18 and nonformal education policies in an international context. HESI offerings are characterized by a particular emphasis on social justice, diversity, policy, and system change. Our students and faculty are scholars, practitioners, change agents, and innovative leaders active in universities, as well as in national and international organizations and policy-making bodies. The program is a collaborative community that develops theory, conducts research and translates these to practice, and engages students, educators, and professionals in the advancement of education.

Graduate Degrees Offered: M.A., M.Ed., Ph.D

The Master's program is designed to meet the Council for the Advancement of Standards in Higher Education criteria for Master's programs with emphasis on the college student population and multicultural issues. The Council for the Advancement of Standards (CAS) is a cooperative effort of over 40 professional associations in Student Affairs Administration who have designed standards of preparation and practice for the profession.

Financial Assistance

The Department has a very limited number of merit-based fellowships and graduate assistantships available to students. Fellowships are awarded to doctoral students in March only for the following fall semester. A large number of assistantships are also available throughout campus, and many students regularly find assistantships in other departments and offices on campus. Assistantships are most often awarded in the spring for the following fall semester, but occasionally an assistantship may become available at another time of year.

Both fellowships and assistantships are awarded on a competitive basis. It is to the student's advantage to apply well before the published application deadlines and to submit a complete application package if they intend to be considered for a fellowship, assistantship, or other form of financial aid. It is a requirement that a student be admitted as a condition of eligibility.

International students' applications are not considered complete and are not reviewed by the Department until they have received clearance from the Office of International Student and Scholar Services (ISSS), which can take additional time. If you need information about ISSS clearance visit the ISSS website at http://www.umd.edu/ies. For more information on financial assistance, see the department web site: http://www.education.umd.edu/chse/admissions/finance (http://www.education.umd.edu/chse/admissions/finance/).

Supply Chain Management (BMSC)

ABSTRACT

Maryland Smith's Master of Science in Supply Chain Management program gives you the skills needed to efficiently manage the flow of goods from the beginning to end phases of a supply chain.

- Refine your problem-solving, analytical and communication skills as you simulate real supply chain scenarios.
- Use cutting-edge tools, including blockchain technology and SAS, to identify trends, forecast consumer behavior and improve operations.
- Position yourself to earn valuable credentials that will help you stand out in the job market, such as the Lean Six Sigma Yellow Belt and APICS certifications.

Financial aid is available to qualified students in the form of fellowships, graduate assistantships, and scholarships.

FACILITIES AND SPECIAL RESOURCES

The Office of Career Services (OCS) provides dedicated, professional support to help students launch their careers. The center links students directly to recruiters through a variety of services, including on- and off-campus recruitment and the online resume database. The OCS also participates in regional and national career forums and job fairs.

The Smith School is located in the Baltimore/Washington, D.C./Northern Virginia corridor. This region offers one of the highest concentrations of culture, diversity, and career opportunities in the country.

Supply Chain Management, Master of Science (M.S.)

Non-thesis only: 30 credits

The MS in Supply Chain Management program will prepare you to discover emerging opportunities and lead innovation on a global scale. Whether you're a recent graduate with an interest in how goods move around the world or a manager who would like to broaden your understanding of the global supply chain, our curriculum will prepare you for new and growing career options in this dynamic industry.

Graduate Degree Program
College: Business

ABSTRACT

The Robert H. Smith School of Business offers graduate programs leading to the degrees of Master of Business Administration (MBA), Executive MBA (EMBA), Online MBA, Master of Finance, Master of Science in Accounting, Master of Science in Information Systems, Master of Science in Marketing Analytics, Master of Science in Supply Chain Management, Master of Science in Business and Management, Master of Quantitative Finance, Master of Science in Business Analytics both in person and online, and Doctor of Philosophy (PhD). The school's MBA program is accredited nationally by the Association to Advance Collegiate Schools of Business (AACSB International). Only about 607 programs in the world are accredited by the AACSB, a reflection of the quality of the faculty, students, curriculum, and career management.

The Smith School of Business faculty has been recruited from the graduate programs of leading universities nationwide. They are world-renowned scholars whose teaching and research equips students with the wisdom of business scholarship rooted in the experiential lessons of the marketplace. In addition to mastering core functional business knowledge, Smith students develop sophisticated analytical skills and an "integrative" systems understanding of the way the functional aspects of organizations interact. Students learn how to leverage big data for better decision-making, and explore their career options in a tight-knit community that encourages intelligent risk-taking, not cutthroat competition. Class sizes are small and the faculty are supportive, challenging and invested in student success.

FINANCIAL ASSISTANCE

Financial aid is available to qualified students in the form of fellowships, graduate assistantships, and scholarships.

Non-thesis only: 30 credits

The MS in Supply Chain Management program will prepare you to discover emerging opportunities and lead innovation on a global scale. Whether you're a recent graduate with an interest in how goods move around the world or a manager who would like to broaden your understanding of the global supply chain, our curriculum will prepare you for new and growing career options in this dynamic industry.

Course	Title	Credits
Required Courses:		
BULM734	Assessing and Managing Supply Chain Risks	2
BULM710	Data Driven Decision Making I	2
BULM711	Data Driven Decision Making II	2
BULM750	Lean Sigma for Supply Chain I	2
BULM751	Lean Sigma for the Supply Chain II	2
BULM731	Technology Applications in Supply Chain Management	2
BULM742	Global Supply Chain Resources Planning	2
BULM735	Project Management in Dynamic Environments	2
BULM754	Global Transportation Management	2
BULM756	Supply Chain Strategy	2

BULM721	Global Supply Chain Management	2
BULM700	Business Fundamentals for Supply Chain Managers I	2
BULM701	Business Fundamentals for Supply Chain Managers II	2
BULM732	Networks and Influence	2
BULM724	Negotiations in Supply Chain Management	2
Total Credits		**30**

Supporting Children with Intensive Behavior Needs (Z137)

Graduate Certificate Program
College: Education

ABSTRACT

The Department of Counseling, Higher Education, and Special Education, in collaboration with the Kennedy Krieger Center for Innovation and Leadership in Special Education has designed this program to strengthen practicing educators' ability to work with students who have intensive behavior needs as a result of an identified disability. Candidates enrolled in the program engage in a series of courses and field experiences designed to strengthen their understanding and application of topics such as the neuroscience of learning, principles of behavior change, school leadership, educational law, and team management so they may help build the capacity within their school system to support the learning of students who have intensive behavior needs.

Survey and Data Science (online) (MPDS)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The Joint Program in Survey Methodology (JPSM) blends together faculty with diverse disciplinary backgrounds all devoted to teaching state-of-the-art practices in the statistical and methodological aspects of surveys and data. The program's faculty primarily come from the University of Maryland, University of Michigan and Westat, supplemented by instructors from a number of federal statistical agencies. Many of these faculty are leading researchers and statisticians in the field of survey methodology, thereby providing an unparalleled educational experience to the students. JPSM's offerings include onsite PhD and Master's degrees as well as online Certificates and a Professional Master's degree.

ADMISSIONS

General Requirements

- Statement of Purpose: Complete a one-page essay describing relevant work experience, interest in survey and/or data science, and expected benefits of enrolling in this degree program. (Uploaded to the Statement of Purpose in the application.)
- Transcript(s): Should show previous coursework or knowledge in mathematical/applied statistics demonstrated by completion of 6 credits of applied statistical methods courses covering content from probability theory through basic regression techniques (including both OLS and logistic regression)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- CV/Resume
- Supplementary Application (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdsupplementaryapplicationmpds.pdf)
- Supplementary Application Two: Prerequisites
- Description of Research/Work Experience (optional)

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland.

Applicants must have earned a four-year baccalaureate degree from a regionally accredited U.S. institution, or an equivalent degree from a non-U.S. institution. Applicants must have earned a 3.0 GPA (on a 4.0 scale) in all prior undergraduate and graduate coursework.

Application Deadlines

Application Process: www.gradschool.umd.edu/admissions (http://www.gradschool.umd.edu/admissions/)

REQUIREMENTS

- Survey and Data Science, Master of Professional Studies (M.P.S.) (p. 496)

FACILITIES AND SPECIAL RESOURCES

Training will be provided by permanent and adjunct faculty in the University of Maryland's Joint Program in Survey Methodology. Online lectures will be conducted via accessible video conference systems and Webinar tools.

Students will be instructed that to fully participate, they will need to purchase a webcam and headset with a microphone, and have a reliable computer and Internet access. Recorded lectures will be posted online at announced times and will be available online at any time thereafter during the course. Weekly discussions or help sessions will be held at scheduled, fixed times once per week.

As officially admitted students to the University of Maryland, students in this program will have access to all University resources that are accessible in the online environment. Students in online programs are assessed an online student services mandatory fee which supports access to these University resources.

Survey and Data Science, Master of Professional Studies (M.P.S.)

Non-thesis only: 30 credits required

The online *International Master of Professional Studies in Survey and Data Science* will provide post-baccalaureate training for individuals interested in broadening their knowledge and understanding of the emerging field of data science, the conduct of sample surveys, practical applications of data analysis and survey methodology, and data management, along with the skills needed to communicate results.

Survey methodology, which is already an interdisciplinary field drawing upon statistics, sociology, economics, political science, informatics,

public health (e.g., physical measures taken on respondents), and the geographic sciences (e.g., geographic information systems), is now intersecting with the big data world. As public and private organizations are increasingly combining various data sources, including survey data, for the purpose of decision making, the need for professional development in data generation, quality and analysis is on the rise. The online environment is convenient for working professionals who cannot easily travel to a traditional campus. In addition, courses will be shared with our international partners, providing a rich perspective to class discussions.

Survey and Data Science (SUDS)

Graduate Degree Program
College: Behavioral and Social Sciences

ABSTRACT

The Survey and Data Science Program blends together faculty with diverse disciplinary backgrounds, all devoted to teaching state-of-the-art practices in the statistical and methodological aspects of surveys. The program's faculty come primarily from the University of Maryland, University of Michigan, and Westat, supplemented by instructors from a number of federal statistical agencies.

SURV offers a Master of Science in Survey and Data Science and a Ph. D. in Survey Methodology. Both degree programs have three areas of concentration: Statistical Science , Social and Psychological Science and Data Science.

The **statistical science** area of concentration is designed for students who wish to specialize in areas such as sample design, estimation in complex samples, variance estimation, statistical measurement error models, and statistical adjustments for missing data.

The **social science** area of concentration is designed for students who wish to specialize in areas such as questionnaire design, design of interviewing systems, computer assistance in data collection, effects of mode of data collection, cognitive psychological insights into survey measurement, and efforts to reduce various nonsampling errors in data collection.

The **data science** area of concentration is designed for students who wish to specialize in the more computational aspects of survey methodology and research involving "big data," including data visualization, management and analysis of large and messy data sets, human-computer interaction in survey research, and machine learning algorithms.

The three areas of specialization share a set of courses in the core curriculum (https://jpsm.umd.edu/graduate/masters-sample-curricula/), including a two term survey practicum, a course in data collection methods, two terms of statistical methods, a two term course in total survey quality, and a survey design seminar.

FINANCIAL ASSISTANCE

Financial assistance is available in the form of competitive fellowships and graduate assistantships for teaching or research.

Fellowships in Support of Diversity and Inclusion (https://jpsm.umd.edu/graduate/phd-admissions/): Financial support option for Ph.D. students only. If you're interested in applying for the Fellowships in Support of Diversity and Inclusion in the Behavioral and Social Sciences (2017-18), please be sure to upload your materials under "4. Supplementary Application Two" when submitting your online admissions application.

ADMISSIONS

GENERAL REQUIREMENTS

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/education/z069/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- CV/Resume

- Supplemental Application (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdsupplementaryapplicationsurv.pdf)
- Description of Research/Work Experience (optional)

Applicants to the M.S. program are expected to hold a baccalaureate degree from a regionally accredited institution with a minimum of a 'B' average. Post-baccalaureate coursework and relevant work experience will also be used in the application evaluation. Entry to the statistical science concentration requires three undergraduate courses in calculus, one in linear algebra, and one in statistics. Entry to the social science concentration requires two undergraduate quantitative courses, at least one of which is in statistics, and at least two undergraduate courses in the social sciences. Entry to the data science concentration requires some background in computer science, with a minimum of two semesters of programming coursework, and also at least one semester of statistics.

Applicants to the Ph.D. program are expected to have a graduate degree in some field (such as statistics or psychology) that is related to survey methodology. Applicants must also demonstrate an appropriate quantitative background.

For more admissions information or to apply to the program, please visit our Graduate School website (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/).

APPLICATION DEADLINES

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	January 12, 2024
International Applicants

REQUIREMENTS

- Survey and Data Science, Master of Science (M.S.) (p. 498)

FACILITIES AND SPECIAL RESOURCES

The Survey and Data Science program has the goal of offering training to all qualified students, regardless of the employment sector of interest to them. Several features of the program are designed with the working student in mind. Many class times are tailored to be compatible with the work day; a 12-month curriculum offers core courses throughout the year; and research experience requirements are integrated with work activities.

Courses have been offered at a Federal agency facility located in Washington, D.C. and interactive 2-way audio/video transmission equipment is used to transmit some courses between the College Park campus and the Ann Arbor campus of the University of Michigan,also - between College Park and the Census headquarters in Suitland, MD.

Survey and Data Science, Master of Science (M.S.)

Non-thesis option only: 46 credits required

SURV offers a non-thesis program, however students in all three tracks the statistical science, social and psychological science and data science concentrations must fulfill a research experience requirement, yielding a scholarly paper. This paper must be the result of either original research conducted by the student, critical analysis, or evaluation of existing surveys.

Students choose from one of the following concentrations:

Statistical Science

Course	Title	Credits
Required courses:		
SURV615	Statistical Modeling and Machine Learning I	3
SURV616	Statistical Modeling and Machine Learning II	3
SURV720	Total Survey Error and Data Quality I	2

Survey and Data Science (SURV)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The Survey and Data Science PhD Program blends together faculty with diverse disciplinary backgrounds, all devoted to teaching state-of-the-art practices in the statistical and methodological aspects of surveys. The program's faculty come primarily from the University of Maryland, University of Michigan, and Westat, supplemented by instructors from a number of federal statistical agencies.

Both the Master of Science (program code: SUDS (p. 497)) and PhD in Survey and Data Science degree programs have three areas of concentration: Statistical Science , Social and Psychological Science and Data Science.

The **statistical science** area of concentration is designed for students who wish to specialize in areas such as sample design, estimation in complex samples, variance estimation, statistical measurement error models, and statistical adjustments for missing data.

The **social science** area of concentration is designed for students who wish to specialize in areas such as questionnaire design, design of interviewing systems, computer assistance in data collection, effects of mode of data collection, cognitive psychological insights into survey measurement, and efforts to reduce various nonsampling errors in data collection.

The **data science** area of concentration is designed for students who wish to specialize in the more computational aspects of survey methodology and research involving "big data," including data visualization, management and analysis of large and messy data sets, human-computer interaction in survey research, and machine learning algorithms.

The three areas of specialization share a set of courses in the core curriculum (https://jpsm.umd.edu/graduate/masters-sample-curricula/), including a two term survey practicum, a course in data collection methods, two terms of statistical methods, a two term course in total survey quality, and a survey design seminar.

Financial Assistance

Financial assistance is available in the form of competitive fellowships and graduate assistantships for teaching or research.

Fellowships in Support of Diversity and Inclusion (https://jpsm.umd.edu/graduate/phd-admissions/): Financial support option for Ph.D. students only. If you're interested in applying for the Fellowships in Support of Diversity and Inclusion in the Behavioral and Social Sciences (2017-18), please be sure to upload your materials under "4. Supplementary Application Two" when submitting your online admissions application.

REQUIREMENTS

- Survey and Data Science, Doctor of Philosophy (Ph.D.) (p. 500)

FACILITIES AND SPECIAL RESOURCES

SURV has the goal of offering training to all qualified students, regardless of the employment sector of interest to them. Several features of the program are designed with the working student in mind. Many class times are tailored to be compatible with the work day; a 12-month curriculum offers core courses throughout the year; and research experience requirements are integrated with work activities.

Courses have been offered at a Federal agency facility located in Washington, D.C. and interactive 2-way audio/video transmission equipment is used to transmit some courses between the College Park campus and the Ann Arbor campus of the University of Michigan,also - between College Park and the Census headquarters in Suitland, MD.

Survey and Data Science, Doctor of Philosophy (Ph.D.)

Students must participate in the Ph.D. seminar for four semesters by enrolling in SURV829 for a total of 12 credits. Students must also complete 12 credits of SURV899.

There are five major requirements for the Ph.D. Students must pass a qualifying examination (normally at the end of their first year) and a comprehensive examination (normally at the end of their second year). They must participate in the Ph.D. seminar for four semesters. They must meet a residency requirement which consists of spending at least two days per week at JPSM for a period of three semesters. Finally, they must complete a dissertation.

Course	Title	Credits

Sustainable Development and Conservation Biology (CONS)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

This program is not currently accepting applications. Please visit our graduate program listing (p. 24) for information on other programs.

Abstract

The principal objective of the CONS Program is to provide graduate training in Sustainable Development and Conservation Biology. CONS is an interdisciplinary and experiential approach to the problems of biological conservation in relation to economic development necessary to meet human needs.

The primary goals of the CONS program are:

1. to provide students with the knowledge and problem-solving skills necessary to research and communicate solutions to global environmental issues;
2. to expand the reach of biodiversity conservation and increasing sustainability;

3. to produce leaders and decision-makers in conservation science that are employed by academia, in government, or non-governmental agencies (NGOs); and
4. to provide a service role to the state of Maryland, the nation, local communities, and national and international NGOs and government agencies.

Specifically the program's objectives are to: provide broad, multidisciplinary training in the core areas of biological conservation, resource economics, and policy analysis; and explicitly link the conflicting topics of sound conservation of natural resources with sustainable development to meet human needs.

CONS graduates are well-prepared to address conservation issues for employers in the private sector and in local, state and national government posts; and to enter Ph.D. programs for further, specialized training.

CONS offers a dual-degree program (PPCN) with the School of Public Policy, wherein students receive both Master of Science and Master of Public Policy degrees. For more information on our degree programs and academic requirements, please see our website at http://cons.umd.edu/cons (http://cons.umd.edu/cons/)

Financial Assistance

Students applying to the Program may be nominated for graduate fellowships or may be supported by teaching or graduate assistantships. Fellowship and assistantship offers are made on the basis of past academic performance, financial need, and potential to contribute to the program.

Keywords: Inter-disciplinary Training in Ecology, Resource Economics, Public Policy issues and Problem Solving related to Conservation of Biodiversity and the Continued Functioning of Natural Systems.

Relationships: Biological Sciences (BISI) (p. 96) Marine, Estuarine, and Environmental Sciences (MEES) (p. 366)

ADMISSIONS

This program is not currently accepting applications.

REQUIREMENTS

- Sustainable Development and Conservation Biology, Master of Science (M.S.) (p. 501)

FACILITIES AND SPECIAL RESOURCES

The program is housed within the Department of Biology but is campus-wide in scope. We have strong connections with the School of Public Policy because ~30% of CONS students are enrolled in the dual degree PPCN program. We have strong connections with AREC because CONS students take a required course in natural resource economics. All CONS students complete an internship - either in a research lab, with an NGO, or with an agency - either in the DC area or further abroad. All CONS students select a faculty advisor relevant to the topic of their scholarly paper, which results in many interactions with environmental faculty in Anthropology, Entomology, Environmental Science & Technology, Latin American Studies, MEES, Public Policy, Plant Sciences and Landscape Architecture, and other departments.

Sustainable Development and Conservation Biology, Master of Science (M.S.)

This Master of Science Program was initiated in 1991 to provide new training and educational emphasis in the areas of sustainable development and conservation biology. The program applies an interdisciplinary and experiential approach to the challenges of biological conservation in relation to the economic development necessary to meet human needs. It includes four components:

1. core courses in the areas of ecology and conservation biology, resource economics, public policy, and multi-disciplinary problem solving;
2. elective courses from a wide array of disciplines;
3. an internship experience relevant to the student's career interests;
4. a Scholarly Paper - a rigorous, quantitative analysis of an Environmental Problem that synthesizes the student's coursework, internship experience, and career interests.

Course requirements for the program total 39 credits. This is intended to be a two-year program. Please contact the department for more information.

Systems Engineering (ENSE)

Graduate Degree Program
College: Engineering

Abstract

Students in the broadly-based, cross-disciplinary Master of Science in Systems Engineering (ENSE) program at ISR benefit both academically and professionally by:

- Being exposed to a wide range of systems engineering principles and software tools tailored toward support for visual modeling of systems, requirements engineering, system-level modeling, optimization and trade-off analysis, and human factors engineering.
- Becoming familiar with the financial and management issues associated with complex engineering systems.
- Acquiring a deep understanding of one particular application area.
- Becoming familiar for opportunities for leadership within the systems engineering profession.

- Designed with substantial industry input, the ENSE curriculum represents the University of Maryland's first multi-college graduate degree program involving the A. James Clark School of Engineering.

In addition to the technical management of systems projects, the ENSE program covers a wide range of topics, from systems definition, requirements and specifications, to systems design, implementation, and operation. Students specialize in one technical area, selected from computer and software systems, communication and networking systems, signal processing systems, control systems, manufacturing systems, operations research, transportation systems, and robotics. The ENSE program draws upon the extensive engineering, computer science and management experience of the of University of Maryland faculty. The program makes optimum use of the university's advanced facilities, including extensive libraries of numerical, symbolic, and visualization software, engineering workstations, and wireless communication networks.

Financial Assistance

Prospective and current students may seek support for their studies through graduate research assistantships with ISR faculty or graduate fellowships. Students currently working in industry, the military, or the government, who plan to pursue their graduate studies part-time, might ask their employers about tuition assistance. All applicants are encouraged to explore sources of external funding; a number of comprehensive Internet sites, such as fastweb.com, offer detailed information and application instructions.

REQUIREMENTS

- Systems Engineering, Master of Science (M.S.) (p. 502)

FACILITIES AND SPECIAL RESOURCES

Modern laboratory, computation, and networking environments play an indispensable role in both the development and day-to-day operation of the research and education programs at the Institute for Systems Research. In all of the ISR laboratories, real-life experiments and associated research studies are enabled through the integrated design of automation and information engineering systems. Computational environments support advanced numerical simulation, sensing and control, and automated design of complex heterogeneous engineering systems. Networking environments play an indispensible role in enabling of interdisciplinary teams of faculty and students to work together. Prototype designs in both hardware and software have led to technological discoveries and patentable inventions.

ISR was established in 1985 as one of the first six National Science Foundation Engineering Research Centers (ERCs). Now a self-sustaining ERC, it is a permanent state-supported institute of the University of Maryland, within the A. James Clark School of Engineering. ISR faculty and graduate students perform basic and applied research with an emphasis on six major research directions: systems engineering methodologies and tools, global communications systems, sensor-actuated networks, next generation product-realization systems, societal infrastructure systems, and cross-disciplinary systems engineering education. ISR seeks a cohesive and balanced approach to the modeling, design, and control of large heterogeneous systems, bringing together a diversified team of outstanding engineers, scientists, and students to research, develop, and implement advances in systems engineering.

Systems Engineering, Master of Science (M.S.)

Thesis option: 30 credits

Non-thesis option (scholarly paper): 30 credits

Course	Title	Credits
Required courses:		
ENSE621	Systems Engineering Concepts and Processes: A Model-Based Approach	3
ENSE622	System Trade-off Analysis, Modeling, and Simulation	3
ENSE623	System Development, Verification, and Validation	3
ENSE624	Human Factors in Systems Engineering	3
ENSE626	System Life Cycle Analysis and Risk Management	3
Thesis or Non-Thesis Requirements		
Select one of the following options:		15
Thesis:		
Select three additional electives from one specialization area		
ENSE799	Systems Engineering Thesis	
Non-Thesis:		
Select five additional electives from no more than two specialization areas		
Complete a scholarly paper		
Specialization Options		
Select from the following specialization areas:		
Communication and Networking Systems		
Computer and Software Systems		
Control Systems		
Manufacturing Systems		
Operations Research		
Process Systems		
Robotics		
Signal Processing Systems		
Cybersecurity		
Transportation Systems		
Total Credits		**30**

General requirements for the master's thesis and non-thesis options are those of the University of Maryland Graduate School. All requirements must be completed within 5 years. The thesis option requires each student to obtain a total of 30 credit hours: 24 hours of coursework and six (6) hours for the thesis project to complete the program. The coursework includes 15 credits for the five core courses (three courses from the systems engineering core and two courses from the management core), and three (3) elective courses. The elective courses must be taken from one specialization area. The master's thesis project demonstrates the practical implications of systems engineering principles. The thesis project may be related to a practical industrial system, and must be supervised by the academic advisor.

The non-thesis option requires each student to obtain a total of 30 credit hours of coursework to complete the program (three courses from the systems engineering core, two courses from the management core, and five elective courses). The elective courses must be taken from not more than two specialization areas. In addition, students must complete a scholarly paper. Expectations of the scholarly paper: While less detailed and complex than the thesis, the scholarly paper also contributes to systems engineering research. For example, a student might chose to write a literature review, identify and propose a solution to a systems problem encountered on the job, or prepare a systems case study.

The scholarly paper is prepared under the supervision of the student's academic advisor. It also must be read by at least one additional ISR faculty member, and approved by the ENSE graduate director. No specific format is required by the Graduate School.

Systems Engineering (online) (MESE)

Graduate Program
A. James Clark School of Engineering

ABSTRACT

The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Our Systems Engineering program prepares professional engineers to coordinate the planning, development, and creation of systems in fields like aerospace, telecommunications, neuroscience, robotics, and more. Students pursuing this option may choose to use their electives to obtain a certificate in one of the many other programs offered by the Office of Advanced Engineering Education.

FINANCIAL ASSISTANCE

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

GENERAL REQUIREMENTS

- Statement of Purpose (https://advancedengineering.umd.edu/application-process/)
- Transcript(s)

- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) (optional)
- CV/Resume (optional)

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland. For anyone needing these documents, consider applying for a full-time master's program offered on campus (https://gradschool.umd.edu/engineering/meng-campus/).

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.

Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.

REQUIREMENTS

- Systems Engineering, Master of Engineering (M.Eng.) (p. 504)

FACILITIES AND SPECIAL RESOURCES

This program is currently offered 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening, in some instances, or at a time convenient for their schedule each week. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

Systems Engineering, Master of Engineering (M.Eng.)

Non-thesis only: 30 credits required

All Professional Master of Engineering Programs consist of 10 courses/30 credits. All students are expected to complete a preliminary course plan for their intended degree program. Degree planning worksheets can be found here: https://mage.umd.edu/degree-planning-sheets (https://mage.umd.edu/degree-planning-sheets/)

Teaching and Learning, Policy and Leadership (EDTL)

Graduate Degree Program
College: Education

Abstract

The TLPL **M.A.** program, an on-campus master's of arts program, offers six specializations:

1. Education Policy and Leadership,
2. Language, Literacy and Social Inquiry,
3. Mathematics and Science Education,
4. Urban Education,
5. Teacher Education and Professional Development, and
6. Technology, Learning and Leadership.

(Note: If you're looking for our Ph.D. program, its acronym is TLPL, not EDTL.) These specializations provide students with opportunities for interdisciplinary study that emphasize scholarship in critical areas of education research, including teacher preparation, STEM fields of education, literacy and language acquisition, education policy and leadership. For more details about this program please visit http://www.education.umd.edu/TLPL/academics/programs.html.

Graduates pursue professional roles in university teaching and research, fill policy and leadership positions in public and private educational institutions, and work as specialists and advocates in governmental and non-governmental agencies.

Faculty bring the disciplines of ecomomics, political science, history, philosophy, sociology, cultural studies, curriculum theory, and organizational leadership to the study of education. They are committed to the preparation of professionals who are able to apply a range of theories and disciplinary perspectives to the enterprise of education.

Our department also offers Master of Education Programs (M.Ed.) program aimed primarily at current and future K-12 teaches. These are listed under Curriculum and Instruction (EDCI).

Financial Assistance

A variety of sources are available for seeking financial assistance in the way of graduate assistantships, scholarships, fellowships and financial aid loans. For more information visit https://education.umd.edu/admissions/funding-scholarships (https://education.umd.edu/admissions/funding-scholarships/).

Program-Specific Requirements

- Letters of Recommendation (3)
- CV/Resume
- Writing Sample

To be recommended for full admission to a master's program, a minimum undergraduate grade point average of 3.0 is usually required. However, students who do not meet this requirements but show other evidence of outstanding potential will be considered for admission. Note that the GRE is not required, and the admissions committee will not look at GRE scores included in an application. Admission of qualified applicants is based on their competitive ranking to limit enrollments to available faculty resources. See the description of the TLPL programs on the TLPL website (http://www.education.umd.edu/TLPL/) for more detailed information.

- Teaching and Learning, Policy and Leadership, Master of Arts (M.A.) (p. 509)

FACILITIES AND SPECIAL RESOURCES

Faculty and students in the department work closely with area schools, colleges, universities, associations and other education-related organizations. Extensive resources in the Washington, D.C., area, including embassies and other international organizations, provide exceptional opportunities for internships and field experiences, research, and materials to enhance formal course experiences. Facilities that support graduate study include the Center for Mathematics Education, the Center for Science and Technology in Education, the Multilingual Research Center, and the Maryland Equity Project. Additional facilities in the College of Education include the Educational Technology Services Center.

Teaching and Learning, Policy and Leadership, Master of Arts (M.A.)

Thesis option: 30 credits
Non-thesis option: 30 credits

Students can choose from the following specializations:

- Education, Policy and Leadership
- Mathematics and Science Education
- Technology Learning and Leadership
- Language, Literacy, and Social Inquiry
- Urban Education
- Teacher Education and Professional Development

Teaching and Learning, Policy and Leadership (TLPL)

Graduate Degree Program
College: Education

Abstract

The TLPL **Ph.D.** program gives students a choice of six related specializations:

1. Education Policy and Leadership,
2. Language, Literacy and Social Inquiry,
3. Mathematics and Science Education,
4. Urban Education,
5. Teacher Education and Professional Development, and
6. Technology, Learning and Leadership.

These specializations prepare doctoral students to assume a variety of roles, including scholars, researchers, policy analysts, teacher educators, instructional specialists, curriculum developers, teachers, education leaders and advocates. They also provide students with new opportunities for interdisciplinary study that emphasize scholarship in critical areas of education research, including teacher preparation, STEM fields of education, literacy and language acquisition, education policy and leadership. For more details please visit http://www.education.umd.edu/TLPL/academics/programs.html.

This section includes information about the Ph.D. program sponsored by the Department of Teaching and Learning, Policy and Leadership (TLPL). For information about our master's programs please see Teaching and Learning, Policy and Leadership (EDTL), and also Education: Curriculum and Instruction (EDCI).

Financial Assistance

The Department offers graduate assistantships to all newly admitted, full-time Ph.D. students. In addition, TLPL is able to award a limited number of Graduate School fellowships each year. These fellowships are awarded only to full-time graduate students. All Ph.D. applicants seeking to become full-time students will be considered for a fellowship—no additional application is needed.

Applications for the Ph.D. program are accepted for the Fall only.

To be recommended for full admission to the TLPL Ph.D. program, a minimum undergraduate grade point average of 3.0 is required. A minimum graduate grade point average of 3.5 is required for applicants who have completed a graduate program. Students who do not meet one of these requirements, but show other evidence of outstanding potential, will be considered for provisional admission. Admission offers are limited to match available financial and faculty resources. Note that the GRE is not required. See the description of the TLPL programs and admissions overview on the TLPL website for more detailed information: http://www.education.umd.edu/TLPL/.

Program Website: https://education.umd.edu/academics/departments/tlpl (https://education.umd.edu/academics/departments/tlpl/)
Application Process: gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

REQUIREMENTS

- Teaching and Learning, Policy and Leadership, Doctor of Philosophy (Ph.D.) (p. 510)

FACILITIES AND SPECIAL RESOURCES

Faculty and students in the department work closely with area schools, colleges, universities, associations and other education-related organizations. Extensive resources in the Washington, D.C., area, including embassies and other international organizations, provide exceptional opportunities for internships and field experiences, research, and materials to enhance formal course experiences. Facilities that support graduate study include the Center for Mathematics Education, the Center for Science and Technology in Education, the Multilingual Research Center, and the Maryland Equity Project. Additional facilities in the College of Education include the Educational Technology Services Center.

Teaching and Learning, Policy and Leadership, Doctor of Philosophy (Ph.D.)

The Ph.D. degree requires a planned sequence of 60 credits beyond a master's degree OR 70 credits beyond a bachelor's degree. In addition to major and elective courses, this includes 6 credits of integrative departmental core, a minimum of 12 credits in intermediate and advanced research methods, 30 credits within the student's specialization and 12 credits of dissertation research. After students have completed most of their course work, the equivalent of 12 hours of comprehensive examination is required prior to advancing to candidacy and approval of the doctoral dissertation committee. The comprehensive exam may take a variety of forms, such as take-home conceptual essays, literature reviews, or research papers. The Doctoral program integrates theory, research, and practice, and students are expected to demonstrate high standards of scholarship and the ability to engage in independent research. Your faculty advisor will help you develop a program of study that will help you fulfill your degree requirements, both coursework and examinations, that is consistent with Departmental and University guidelines. An oral examination in defense of the dissertation is required. It is strongly recommended that prospective doctoral applicants speak with program coordinators and faculty, and visit the Department and classes, to help determine if the Department's programs are appropriate to their academic interests and professional goals.

Students must complete a minimum of 60 credits beyond the master's degree. Coursework is outlined as follows:

Course	Title	Credits
Core Requirements		
TLPL794	Foundations of Educational Research I	3
TLPL795	Foundations of Educational Research II	3
Complete 12 credits in Intermediate & Advanced Methods [1]		12
Specialization Requirements		
Complete coursework in one of the following specializations:		30
Education Policy & Leadership		
Language, Literacy & Social Inquiry		
Mathematics & Science Education		
Urban Education		
Teacher Education & Professional Development		
Technology, Learning & Leadership		
Dissertation Research Requirements		
TLPL899	Doctoral Dissertation Research	12
Total Credits		**60**

[1] Must include one qualitative methods course and one quantitative methods course

Teaching English to Speakers of Other Languages (online) (Z128)

Graduate Certificate Program
College: Education

ABSTRACT

The TESOL (Teachers of English to Speakers of Other Languages) post-baccalaureate certificate program includes four courses and is designed for in-service educators, students studying language, and others. Transform your career, and improve education for English learners. Fulfill your district's continuing education credits requirements!

Each condensed course is delivered entirely online—no commuting or parking required. Take courses in the comfort of your home, school, or office!

Website: http://www.education.umd.edu (http://www.education.umd.edu/)

Courses: EDCI (https://academiccatalog.umd.edu/graduate/courses/edci/)

Technology Entrepreneurship and Corporate Innovation (M.P.S.)

Graduate Degree Program
College: A. James Clark School of Engineering

Abstract

The Master of Professional Studies in Technology Entrepreneurship and Corporate Innovation unites academic insights with startup incubator skills and resources to empower students to launch and grow technology ventures. Developed by the A. James Clark School of Engineering's Maryland Technology Enterprise Institute (Mtech), University of Maryland, the MPS in Technology Entrepreneurship is a fully online program designed to equip students with a conceptual understanding of the principles and action steps of effective new venture creation and launch.

The MPS in Technology Entrepreneurship and Corporate Innovation prepares students to apply newly gained insights and acquired competencies to real-world innovation management challenges across five major stages of the innovation value chain from strategy development and idea generation to commercial concept and product development and successful market establishment, as well as sustainable growth in various contexts.

The MPS in Technology Entrepreneurship and Corporate Innovation is committed to teaching the disciplines of entrepreneurial thinking that produce not just entrepreneurial inspirations but an entrepreneurial frame of mind. Courses are offered during 12-week terms. The 30-credit, 9-

course graduate program may be completed in as little as 15 months by enrolling in two 3-credit courses in the first four 12-week terms and a 6 credit capstone course in the final term.

Offered through the convenience and flexibility of the online learning environment, the program enables student to:

- Think beyond current paradigms in order to discover innovation needs and to envision impact through strategic idea and concept development .
- Leverage ideas to create sustainable business models aligned with customer needs and wants in competitive marketplaces.
- Manage commercialization challenges and market launch efficiently and effectively.
- Navigate the legal aspects of product development and company launch and build sound financial and accounting strategies and practices.
- Know how to accelerate growth and create sustainable value through appropriate business development, risk management, financing, and value extraction strategies.

Technology Management (Z145)

Graduate Certificate Program
R.H. Smith School of Business

ABSTRACT

The Post-Baccalaureate Certificate in Technology Management prepares public or private sector managers of technology-dependent enterprises to effectively identify, transition, and leverage emergent technology across their organizations or markets. Courses are delivered in partnership with the A. James Clark School Engineering to facilitate cross-disciplinary instruction on research and development strategy, science and technology project valuation, technology entrepreneurship and commercialization, technical systems design, marketing emergent technology, and planning for technology resilience

Telecommunications (ENTS)

Graduate Degree Program
College: Engineering

Abstract

The Master's in Telecommunications Program offers students a unique opportunity to engage in cross-disciplinary coursework from both the Electrical and Computer Engineering Department of the A. James Clark School of Engineering and the Robert H. Smith School of Business at the University of Maryland. This extraordinary combination culminates in a degree that prepares students for the broad range of rigors and issues that encompass the dynamic telecommunications industry.

The program covers several different areas including Information System Security, Wireless Communications, Networking, and Business and Management for the telecommunications industry. The program may be pursued either full-time or part-time. All courses are scheduled in the evening to suit working professionals, while some courses additionally offer daytime sections.

The program is designed around a core curriculum that provides a solid technical foundation and management background. The Master's in Telecommunications degree requires successful completion of 30 credits and a scholarly paper. Please visit our Degree Requirements (http://www.telecom.umd.edu/degree-requirements/) page for detailed information.

Students may choose from a wide range of electives to develop their interests and complement their career goals. Please visit our Course Descriptions (http://telecom.umd.edu/courses/) page for a detailed listing of our courses. In addition to the courses listed there, special topics electives are regularly offered. As our program keeps up with industrial trends, these courses focus on emerging, cutting-edge topics.

Please see our website, www.telecom.umd.edu (http://www.telecom.umd.edu), for the most current information.

Financial Assistance

Since the Master's in Telecommunications Program does not normally offer financial support in the form of graduate assistantships, many of our students find assistantships in other units, especially non-academic units, which do not have graduate students.

The ENTS program has a number of state-of-the art laboratory facilities where students enhance their hands-on skills and gain practical experience using, configuring and operating telecom lab equipment. (link: https://telecom.umd.edu/lab-facilities (https://telecom.umd.edu/lab-facilities/)). These labs include the Communications Laboratory, the Networking Laboratory, and the Telecommunications PC Lab,

Telecommunications, Master of Science (M.S.)

Non-thesis only (scholarly paper required): 30 credits

Requirements to earn the Master's in Telecommunications degree include completing 30 credit hours of course work, achieving a cumulative grade point average (GPA) of at least 3.0, and submitting a satisfactory scholarly paper. The 30 credits include eight required courses and two elective courses. All graduate students at the University of Maryland are required to maintain a 3.0 GPA each semester to remain in good standing.

Additional courses beyond the required courses must be approved by the Program Office and should not impede the student's progress towards degree completion. ALL courses taken at the University of Maryland count towards the student's cumulative GPA.

Terrorism Analysis (Z039)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The National Consortium for the Study of Terrorism and Responses to Terrorism (START) is dedicated to training and mentoring a new generation of scholars and analysts capable of examining questions related to the behavior of terrorists and terrorist groups and to the issue of how societies can best prepare for dealing with a terrorist threat or responding to a terrorist attack. START's Graduate Certificate in Terrorism Analysis provides participants with advanced education on the causes, dynamics and impacts of international and domestic terrorism. Participants also develop the methodological skills necessary to pursue advanced research on and analysis of terrorism. The program consists of four required courses. Each course is offered once per calendar year, in an online, synchronous learning environment. The program can be completed in as little as 12 months to 24 months.

The program is appropriate for individuals interested in (and/or currently) working in fields related to intelligence analysis, homeland security analysis, or analysis of other relevant topic areas; and individuals interested in (and/or currently) conducting scholarly research on terrorism and responses to terrorism. To request a virtual information packet, set up a virtual information appointment, or receive information about an upcoming information session: please contact the Education team at education-start@umd.edu.

Financial Assistance

START does not currently provide financial assistance to Graduate Certificate students.

Theatre Design (MFAT)

Graduate Degree Program
College: Arts and Humanities

Abstract

The School of Theatre, Dance, and Performance Studies offers a three-year Master of Fine Arts degree in Theatre Design, with concentrations in costume, scenic, lighting and multimedia. The degree offers superior students advanced training in design with on-campus and off-campus opportunities for creative activity. The program prepares the student to enter the professional theatre or to teach in the creative areas at colleges or universities. The School also offers MA and PhD degrees in theatre history and performance studies, and MFA degree in Dance, For more information visit the School website at http://tdps.umd.edu.

Financial Assistance

The School nominates outstanding applicants for competitive University fellowships. Teaching assistantships are available to a limited number of students. The Graduate program head will discuss these with accepted students at the time of acceptance.

FACILITIES AND SPECIAL RESOURCES

The School of Theatre, Dance, and Performance Studies is housed in the Clarice Smith Performing Arts Center at Maryland. This state-of-the-art facility includes the 650-seat Ina and Jack Kay Theatre, the 200-seat Robert and Arlene Kogod Theatre and the 100-seat Cafritz Theatre.

The campus is within a few miles of the John F. Kennedy Center for the Performing Arts, Arena Stage, the National Theatre, Ford's Theatre, The Shakespeare Theatre at the Lansburgh, and the Olney Theatre Center,

which are among more than 80 professional area theatres. Two of the greatest libraries in the world, the Library of Congress and the Folger Shakespeare Library, are in close proximity to campus. Students also make regular use of the Smithsonian Institution, the Federal Theatre Project Archives, the National Archives, and more than 50 specialized libraries and institutions in the Washington metropolitan area.

THET678	Collaborative Design & Production for Performance	
Design Practicum, 6-9 credits: [3]		**6**
THET789	Theatre Design Process and Production	
Thesis, 6 credits:		**6**
THET799	MFA Theatre Design Thesis	
Electives: 18 credits as approved by advisor. Choices may include classes above and the following: [3]		**18**
THET633	Figure Drawing for Theatre Design (Figure Drawing for Theatre Design)	
THET636	Photoshop for Theatrical Rendering (Photoshop for Theatre Design)	
THET643	Puppetry and Performance	
THET645	Graduate Rendering for Costume Design (Graduate Rendering for Costume Design)	
THET659	Graduate Design Studio - Lighting (Graduate Lighting Studio 2)	
THET669	Independent Study	
THET677	Production Practices	
Other courses as approved by advisor.		
Total Credits		**60**

1. Graduate Seminar must be selected from approved list.
2. Must take one studio outside of specialization.
3. Beyond six credits, an additional 3 credits of the Design Praticum may count toward the elective total.

Total Credits: Minimum of 60 credits required

Student designers must present and pass three formal design portfolio reviews, at the conclusion of their second, fourth, and sixth semesters in the program. In addition, portfolio interviews take place at the end of the first, third, and fifth semesters. Design portfolios include studio projects as well as fully realized academic and professional scenic, costume, or lighting designs. The fourth semester portfolio review will include an evaluation of a pre-thesis design project (usually a fully realized design, but may include independent study design projects). The pre-thesis design project, in preparation for the thesis, will include a written component. Successful completion of the portfolio reviews will result in the assignment of the thesis project.

Portfolio requirements

Successful completion of the portfolio review will result in the assignment of pre-thesis (after the first year) and thesis (after the second year) projects. Upon completion of each portfolio review, the candidate will receive a formal letter indicating a grade of pass, conditional pass, or fail. In the event of a conditional pass or fail, the faculty may require the candidate to complete additional projects or coursework.

First year portfolio should include:

- A current resume
- Projects from primary and secondary design emphasis courses
- Craft projects from foundation component courses
- Production photographs illustrating realized craft or design work for projects produced by the School or by professional theatres
- Supporting materials, drawings, and photographs that demonstrate effective and productive work as a design assistant (academic or professional projects)

Second year portfolio should include:

- A current resume
- Projects from primary and secondary design emphasis courses
- Production photographs illustrating realized craft or design work for projects produced by the School or professional theaters
- Supporting materials, drawings, and photographs that demonstrate effective and productive work as a design assistant (academic or professional projects)
- A written design analysis and supporting research material for the pre-thesis project that should follow the form of the first chapter of the written component of the thesis project

For their thesis, M.F.A. design students create and realize a costume, lighting, multimedia, or scenic design for a major production. Each student must meet all deadlines for that production and the design and execution must be acceptable to all members of her/his thesis committee. The written component of the thesis includes all relevant visual material, including research images, drawings, renderings, and production photographs.

M.F.A students typically design three or four productions in our main season during their three years in residence. The first year of study includes several assistant design assignments. We plan our productions at least one semester in advance; therefore, there is a good possibility that students will be designing their first main season production in the spring semester of the first year. We produce five main season shows and approximately five student produced productions per academic year. M.F.A. students also have the opportunity to work with our award-winning faculty on professional projects within the Washington metropolitan

theatre community, as well as work in regional theatres, off-Broadway and Broadway.

An exciting feature of the MFA in Design program in the School of Theatre, Dance, and Performance Studies is the annual public portfolio exhibit and review. Each year the Cafritz Theatre is transformed into a gallery where all MFA Design students display their set, costume, and lighting designs.

A multi-day affair, the first day is open to the general public when professional designers and directors from the Washington, DC theatre community have an opportunity to respond to student work and where students often make important professional contacts. The second day involves longer one-on-one critique sessions with the nation's leading designers and directors.

In the past few years our respondents have included designers and directors such as **Paloma Young, Donyale Werle, Jeff Croiter, Ming Cho Lee, John Lee Beatty, David Korins, Ken Posner, Linda Roethke, Serge Seiden, Joy Zinnoman, John Iacovelli, Aaron Posner, James Kronzer, Mary Zimmerman, Jim Ingalls, and Anna Kuzmanic.**

Theatre and Performance Studies (THPF)

Graduate Degree Program
College: Arts and Humanities

Abstract

The School of Theatre, Dance, and Performance Studies offers a Master of Arts in Theatre and Performance Studies and Doctor of Philosophy in Theatre and Performance Studies (THPF). For more information visit the School website at http://tdps.umd.edu/programs/phd-theatre-and-performance-studies (http://tdps.umd.edu/programs/phd-theatre-and-performance-studies/). The School also offers graduate degrees in MFA in Theatre Design and MFA in Dance.

The M.A. program is designed to enhance and develop students' practical, historical, and critical knowledge of theatre so that they may go on to graduate work in Ph.D. or M.F.A programs, or upgrade their skills for high-school teaching. The School's application deadline for best consideration for the MA program and the PhD program is January 15. Applications fully submitted by February 1 may also receive consideration on a space available basis.

The doctoral program in Theatre and Performance Studies is an interdisciplinary course of study that prepares students for multiple career paths in educational institutions and professional arts organizations. The program offers a rigorous exploration of both Theatre History and Performance Studies through the critical and theoretical analyses of historical archives, dramatic and performance texts, cultural behavior as performance, and theatre practice. It is dedicated to developing scholar/artists. Applicants who do not hold an undergraduate or graduate degree in theatre (or an equivalent field), may be required to take preparatory coursework prior to admission into the Ph.D. program.

Financial Assistance

The School nominates outstanding applicants for competitive University fellowships. Teaching assistantships are available to a limited number of students. The Graduate program head will discuss these with accepted students at the time of acceptance.

REQUIREMENTS

- Theatre and Performance Studies, Doctor of Philosophy (Ph.D.) (p. 520)
- Theatre and Performance Studies, Master of Arts (M.A.) (p. 520)

FACILITIES AND SPECIAL RESOURCES

The School of Theatre, Dance, and Performance Studies is housed in the Clarice Smith Performing Arts Center at Maryland. This state-of-the-art facility includes the 650-seat Ina and Jack Kay Theatre, the 200-seat Robert and Arlene Kogod Theatre and the 100-seat Cafritz Theatre.

The campus is within a few miles of the John F. Kennedy Center for the Performing Arts, Arena Stage, the National Theatre, Ford's Theatre, The Shakespeare Theatre at the Lansburgh, and the Olney Theatre Center, which are among more than 80 professional area theatres. Two of the greatest libraries in the world, the Library of Congress and the Folger Shakespeare Library, are in close proximity to campus. Students also make regular use of the Smithsonian Institution, the Federal Theatre Project Archives, the National Archives, and more than 50 specialized libraries and institutions in the Washington metropolitan area.

Theatre and Performance Studies, Master of Arts (M.A.)

Thesis option: minimum of 36 credits
Non-thesis option: minimum of 36 credits

The Department offers both the thesis and non- thesis options. All students undertaking the M.A. degree must pass a six-hour comprehensive examination on theatre history and criticism, performance and directing, and design and technical theatre. Please contact the Head of History/Theory to get more details.

Course	Title	Credits
Required courses:		
THET600	Introduction to Graduate Research Methods	3
THET606	Teaching Theatre [1]	1
Thesis or Non-Thesis Requirements		
Select one of the following options:		32
Thesis:		
THET799	MFA Theatre Design Thesis	
Non-Thesis:		
Students are required to submit two article-length essays to the Non-thesis Examining Committee		
Total Credits		**36**

[1] All Teaching Assistants must take THET606.

Students should consult with their advisor to determine the remainder of their coursework.

Theatre and Performance Studies, Doctor of Philosophy (Ph.D.)

Students are required to complete a set of core courses, electives, and dissertation research. In addition, students must fulfill the production/performance requirement.

Members of the student's comprehensive examination committee write the questions. Area questions are designed to interrogate both literary and performance issues. Selected by the student and her/his advisor, the examination committee consists of the advisor and at least two members of the core and/or affiliate faculty. Exams may be taken one of two ways: in-house or take home with an oral defense. The examinations are based on course work and reading lists. All students are responsible for a core reading list of approximately 15-20 books and articles. In addition to the core reading lists, each student will be responsible for developing a reading list of no less than 50 books and articles reflective of the student's dissertation topic and tailored to his/her interests as they relate to the examination areas. Students devise these lists in consultation with the members of her/his committee. Students have two opportunities to pass the comprehensive examinations. Please note that the examinations are only offered at specific times each semester and that students must plan to take the comprehensive exams during these times.

All doctoral students will engage in original research (in some cases, complemented by appropriate non-print documentation), the result of which is a book-length manuscript. In consultation with her/his advisor, the student selects a five-member dissertation committee. At least three committee members must be permanent members of the University of Maryland Graduate Faculty and each committee must have a chairperson who is a permanent member of the graduate faculty. Please note that the Dean's Representative on the committee may not be a member of the History/Theory Area, but must be from another department at the University of Maryland. In rare cases, students will need an expert in an area not represented by the History/Theory Faculty. Students are reminded that these members must be present at the defense and that the Department cannot guarantee to fund the travel of committee members from other universities.

Each doctoral student must defend her/his dissertation orally as a requirement in partial fulfillment of the doctoral degree. Dissertations must follow the guidelines established by the University. Please see the Graduate Student Handbook (available online through the Graduate School) for guidelines on committee selection and defense procedures.

Course	Title	Credits
Required courses:		
THET606	Teaching Theatre [1]	1
THET700	Introduction to Graduate Research Methods	3
THET711	Critical Theory	3
THET712	Historical Research Methods and Historiography in Theatre	3
THET713	Performance Studies	3

Comprehensive Exams:		

History of Drama and Performance		
Theory of Drama and Performance		
Dissertation Prospectus		
Dissertation Research Requirements		
THET899	Doctoral Dissertation Research	12
Total Credits		**43**

[1] All teaching assistants should complete one credit of THET606.

Toxicology, Master of Science (M.S.)

The M.S. program in Toxicology does not directly admit students.

Toxicology, Doctor of Philosophy (Ph.D.)

The PhD in Toxicology requires a minimum of 46 credits, in addition to 12 credits of TOXI899. Students are also required to complete a minimum of 12 credits in two areas of specialization (six credits in each), included in the 46 credit total.

The PhD program consists of a minimum of 46 credit hours of graduate courses, in addition to 12 credits of Doctoral Dissertation Research. The two areas of specialized focus could be in areas like Advanced Epidemiology/Biostatistics, Analytical Chemistry, Pharmacology, Pathology/Immunology/Microbiology, or Environmental Science/Ecology/Climate. Program requirements for a PhD degree in toxicology also include successful completion of a written and oral comprehensive exam in the format of an NIH research proposal, oral defense of a written dissertation research proposal, and a minimum of 12 credits of PhD dissertation research, written dissertation, and a final dissertation defense. The program can be completed on either a full- or part time basis. It is anticipated that students will complete more than the minimum number of credits.

Translation (MPTR)

Graduate Degree Program
College: Arts and Humanities

This certificate is not currently accepting applications. Please visit the department website for information on other certificates.

Abstract

The Master of Professional Studies in Translation (MPS in Translation) is designed to equip students with the required competencies to compete successfully for work as specialized translators, project managers, or administrators of language services.Example skills include the translation of specialized texts in health, legal and political settings, including the translation of documents and websites for major corporations, international organizations, and government ministries.

The MPS in Translation is a two-year, 41 credit program. In the first year, you begin to develop high-level skills in translation in specific domains (specialized written texts). In the program's second year, you build on these fundamental skills, specializing in written communication for governmental and international organizations.

- Translation, Post-Baccalaureate Certificate (P.B.C.) (p. 523)

Translation, Post-Baccalaureate Certificate (P.B.C.)

The Graduate Certificate of Professional Studies in Translation (GCPS in Translation) is designed to equip you with the knowledge and skills required for entry-level work in the translation profession. Examples include serving as translators of general texts for information purposes and specialized texts in subject areas wherein you hold advanced qualifications (e.g., Master of Arts degree, and/or significant professional expertise). You will be grounded in the tenets of the profession, including professional conduct and ethics and guided through the steps needed to advance your professional skill set.

The GCPS in Translation is a 21-credit one year program, offering instruction in the fundamental skills of translation and includes the theoretical fields of translation studies, the translation professions, intercultural communication, and background knowledge in at least one of the following communication contexts: political communication, legal communication, or health communication.

Urban Agriculture (Z091)

Graduate Certificate Program
College: Computer, Mathematical, and Natural Sciences

ABSTRACT

The Graduate Certificate in Urban Agriculture (GC-UA) is a 12-credit graduate program that can be completed in twelve months of continuous study. The GC-OSA focuses on the growing of plants and the raising of animals within and around cities. Students acquire the necessary skills to maintain plants and beneficial insects in and around these settings. The program also focuses on the urban ecosystem and urban policies and plans.

Urban and Regional Planning and Design (URPD)

Graduate Degree Program
School of Architecture, Planning and Preservation

Abstract

The School of Architecture, Planning and Preservation offers a Doctoral Program, the Ph.D. in Urban and Regional Planning and Design. Participating programs include Urban Studies and Planning, Architecture, Historic Preservation, Landscape Architecture, and The National Center for Smart Growth Research and Education. The program prepares students to teach at the university level in departments of Urban Planning, Architecture, Historic Preservation, Real Estate Development, or Landscape Architecture, as well as qualifies graduates to conduct research and participate in high-level decision-making in the public, private, and nonprofit sectors. Intimate and highly competitive, the Ph.D. program offers students a tailored Ph.D. experience and the flexibility to bridge a number of disciplines related to the built environment, including urban planning, design, historic preservation, and real-estate development. Our nationally renowned faculty, the affiliated National Center for Smart Growth Research and Education, and proximity to the architecturally rich, historically significant, and diverse urban fabric of the Mid-Atlantic region make the University of Maryland an exciting place to study urban planning, design, and historic preservation.

Financial Assistance

The School of Architecture, Planning, and Preservation, and The National Center for Smart Growth Research and Education together anticipate three research assistantships available to Doctoral students. Compensation for assistantships includes tuition remission for up to 10 credit hours per semester, plus a stipend. For more information contact the Doctoral Program. Students may also find financial support on faculty research projects and teaching possibilities in the undergraduate and master's programs.

- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- CV/Resume

- Portfolio PDF Upload (optional)
- Writing Samples (two required, up to one more optional)
- Description of Research/Work Experience (optional)
- Graduate Record Examination (GRE) (optional)
- Master's degree in a related field.

The program is highly selective and individualized. Approximately five students will be admitted each year. Students admitted to the Ph.D. program will be expected to have completed a Master's degree in a related field, including but not exclusively urban planning, architecture, historic preservation, or landscape architecture. Students are expected to enter the Ph.D. program with two semesters of graduate-level quantitative research methods. These courses can be taken after the entrance to the program and prior to their advanced methods course.

Application Deadlines

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	January 9, 2024
International Applicants	
F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants	January 9, 2024

REQUIREMENTS

- Urban and Regional Planning and Design, Doctor of Philosophy (Ph.D.) (p. 526)

Urban and Regional Planning and Design, Doctor of Philosophy (Ph.D.)

Doctoral students are required to complete 39 credits, including 12 credits of URSP899.

The Ph.D. in Urban and Regional Planning and Design is a 39-credit program. The program is highly selective and individualized. Approximately five students will be admitted each year. Adequately prepared students will generally need four semesters of formal course work leading to comprehensive exams and all students are required to spend a minimum of two years in residence. The program is designed as a full-time program to be completed in four years.

Students admitted to the doctoral program will be expected to have completed a master's degree in a related field including, but not exclusively, urban planning, architecture, historic preservation, real estate development, or landscape architecture. Students are expected to enter the Ph.D. program with two semesters of graduate level quantitative research methods. These courses can be taken after entrance to the program and prior to their advanced methods course.

Comparative Biomedical Sciences (VMSC)

Graduate Degree Program
College: Agriculture and Natural Resources

Abstract

The Department of Veterinary Medicine is under the **College of Agriculture and Natural Resources (AGNR)** at the **University of Maryland** and is home to the Comparative Biomedical Sciences (CBSC) Graduate Program (code: VMSC). The Department of Veterinary Medicine is the Maryland Campus of the **Virginia-Maryland College of Veterinary Medicine**.

The program offers both **Master of Science (M.S.)** and **Doctor of Philosophy (Ph.D.)** degrees. Members of the Comparative Biomedical Sciences Graduate Program faculty specialize in a wide range of research interests in infectious diseases and zoonoses, including cell and molecular biology, microbiology, immunology, virology, and poultry health management and disease prevention.

Financial Assistance

A number of graduate assistantships are available and awarded to candidates with strong academic records.
Teaching Assistantships, Research Assistantships, Scholarships, and Fellowships are available on a competitive basis. Research Assistantships (RAs) are 12-month appointments and Teaching Assistantships (TAs) are 10-month appointments. Benefits for each assistantship include stipends, ten credits of tuition remission per semester, and health benefits. Generally, student assistantships are offered for two years for an M.S. degree and four years for a Ph.D. degree.

Sources of funding include the department; Maryland Agricultural Experiment Station; Maryland Cooperative Extension; College of Agriculture and Natural Resources; Graduate School open-nomination and block grant fellowships (for recruitment of new students only); University diversity fellowships; endowed fellowships; and funds from faculty research contracts and grants. Inquiry about the stipends can be made to the VMSC Graduate Program.

REQUIREMENTS

- Comparative Biomedical Sciences, Doctor of Philosophy (Ph.D.) (p. 528)
- Comparative Biomedical Sciences, Master of Science (M.S.) (p. 527)

FACILITIES AND SPECIAL RESOURCES

The Avrum Gudelsky Veterinary Center, the University of Maryland home of the VMRCVM, lies in the heart of Maryland's thriving biotechnology community and is near Maryland's major university research campuses and government laboratories, including the USDA Beltsville Agriculture Research Center, the National Institutes of Health, and Walter Reed National Military Medical Center. The Center contains 32,000 square feet of research and support laboratories, including animal care facilities. Over 10,000 square-foot research laboratories are fully equipped with state-of-the-art facilities for research on cell biology, molecular biology, microbiology, virology and immunology, including cell culture facilities, ZEISS LSM 800 confocal microscope, fluorescence activated cell sorter, flow cytometer, the Illumina MiSeq System for next-generation sequencing, fluorescence microscopes, Elispot/Fluorospot Reader, and a sophisticated electron microscope suite. Approximately 18,000 square feet of space comprises Biological Safety Level (BSL) 2 and BSL-3+ facilities and ABSL2 and ABSL3 suites for laboratory animals. The poultry unit has 15 rooms, each equipped with 20 poultry isolators to contain any infectious pathogens. The animal facility has a fully equipped necropsy room designed for postmortem analysis.

The Laboratory for Biological Ultrastructure in the Department of Biology is equipped with a transmission and scanning electron microscope, a confocal microscope, ultramicrotomes, and equipment for freeze-fracture studies. The Department of Cell Biology and Molecular Genetics maintains imaging core, genomics core, flow cytometry, and proteomics core. The Fischell Department of Bioengineering maintains the BioWorkshop in A. James Clark Hall at the University of Maryland, which offers access to an array of cutting-edge scientific instruments spanning from biological imaging, cellular and biochemical analysis to biomaterial characterization, and histology. The University of Maryland has the Department of Laboratory Animal Resources (DLAR), a support unit for animal-based research and teaching. Extensive library facilities are available on campus. In addition, the College Park campus is close to the National Agricultural Library (NAL) and the National Library of Medicine (NLM). The Library of Congress and the National Archives, along with several other libraries of biomedical research and academic institutes, are located within a short driving distance.

Computer facilities at the University of Maryland are outstanding. The department provides computer access to all faculty and graduate students. Students are provided with e-mail accounts and free Internet access. The campus maintains both Unix and mainframe systems, and access to supercomputers for specific research projects. Software for graphics, modeling, statistics, and the analysis of molecular data is readily available.

The College Park campus is also ideally situated near a number of federal agencies involved in veterinary medical sciences. Collaborative initiatives are underway with the U.S. Food and Drug Administration's Centers for Veterinary Medicine (CVM) and Food Safety and Applied Nutrition (CFSAN); U.S. Department of Agriculture's Animal and Plant Health Inspection Services (APHIS), Food Safety and Inspection Service (FSIS), Agricultural Research Service (ARS), and Beltsville Agriculture Research Service (BARC); National Institutes of Health (NIH); Walter Reed National Military Medical Center; World Bank; and Pan American Health Organization (PAHO). Scientists from some of these agencies have adjunct appointments with the College of Veterinary Medicine and participate on students' graduate committees.

Comparative Biomedical Sciences, Master of Science (M.S.)

Applicants with a minimum of B.S. or equivalent degree in biological sciences may be admitted to the Master of Science (M.S.) program. The CBSC M.S. program requires a minimum of 30 credits of coursework

beyond the B.S. degree, including 6 credits of Master's Thesis Research (VMSC799; credits greater than 6 of this course will not be counted for degree requirement). A minimum of 12 credits must be earned in coursework at the 600 level or higher. Students must maintain an overall GPA of 3.0 or better in courses taken for graduate credit.

Master program requirements

The plan of study must be approved by the Advisor and the Graduate Admissions and Examination Review Committee before the end of the first semester of enrollment. By the end of the second semester, the student should have an Advisory Committee formed. A thesis based on independent and original research must be submitted to the CBSC Program and the Graduate School. The student must present the thesis in a public seminar and pass a final oral examination given by the Advisory Committee.

The non-thesis Master of Science degree option is available only for doctoral students who wish to leave the graduate program without completing the Ph.D., but have finished all course work required. External applications for the non-thesis master's option are not accepted. One scholarly paper must be written and approved by the student's Advisor.

Course	Title	Credits
BISI712	Responsible Conduct of Research for Biologists	1
VMSC698	One Health Seminar	4
VMSC758	Journal Club in Comparative Biomedical Sciences (Journal Club in Comparative Biomedical Sciences)	4
VMSC799	Thesis Research	6
Restricted Electives (Choose at least 10 credits from courses below):		10
VMSC610	Recombinant Viral Vectors	
VMSC660	Emerging and Re-emerging Infectious Diseases	
VMSC670	Molecular Epidemiology of Infectious Diseases (Molecular Epidemiology of Infectious Diseases)	
VMSC689	Use of Genomics and Proteomics in Infectious Disease	
VMSC720	Viral Pathogenesis	
VMSC760	Immunology of Infectious Diseases	
Additional Credits (from restricted electives or other courses with advisor's approval)		5
Total Credits		**30**

Comparative Biomedical Sciences, Doctor of Philosophy (Ph.D.)

Applicants with a minimum of B.S. or equivalent or a higher degree in biological or medical sciences may be admitted to the Doctor of Philosophy (Ph.D.) program. Students must complete the course requirements of 24 credits (for candidates with B.S. or equivalent degrees) or 12 credits (for candidates with MPH, M.S. or a D.V.M., M.D. or equivalent degrees) in addition to a minimum of 12 dissertation research credits (VMSC899). Students must maintain an overall GPA of 3.0 or better in courses taken for graduate credit per Graduate School policy.

Doctoral program requirements

The plan of study must be approved by the Advisor and Chair of the Graduate Admissions and Examination Review Committee by the end of the first semester of enrollment. By the end of the fourth semester, a student should have completed their core course requirement and present a dissertation research proposal to the Advisory Committee. For entering Ph.D. candidacy, a student must pass a qualifying examination (written and oral) satisfactorily by the end of the sixth semester. A dissertation based on independent and original research must be submitted to the CBSC Program and the Graduate School. The student must present the dissertation in a public seminar and pass a final oral examination given by the Advisory Committee.

For Students with B.S. or Equivalent:

Course	Title	Credits
BISI712	Responsible Conduct of Research for Biologists	1
VMSC698	One Health Seminar	4
VMSC758	Journal Club in Comparative Biomedical Sciences (Journal Club in Comparative Biomedical Sciences)	4
Restricted Electives (Choose at least 10 credits from the following courses):		10
VMSC610	Recombinant Viral Vectors	
VMSC660	Emerging and Re-emerging Infectious Diseases	
VMSC670	Molecular Epidemiology of Infectious Diseases (Molecular Epidemiology of Infectious Diseases)	
VMSC689	Use of Genomics and Proteomics in Infectious Disease	
VMSC720	Viral Pathogenesis	
VMSC760	Immunology of Infectious Diseases

VMSC760	Immunology of Infectious Diseases	
VMSC899	Dissertation Research	12
Total Credits		**24**

Veterinary Medicine (VMED)

Graduate Degree Program
College: Agriculture and Natural Resources

Abstract

The Virginia-Maryland Regional College of Veterinary Medicine offers a four-year full-time program (curriculum) leading to the Doctor of Veterinary Medicine (D.V.M.) degree. The first three years are taught at Virginia Tech University in Blacksburg, VA in a case-based and traditional lecture/laboratory format. At the end of the first year, students choose a track - small animal, food animal, equine, mixed species and public/corporate veterinary medicine. Considerable flexibility exists for a student to tailor their curriculum to meet individual needs and interests. The senior year (clinical) is 12 months in length. For detailed information on the Doctor of Veterinary Medicine (DVM) program, please visit the Virginia-Maryland Regional College of Veterinary Medicine at: http://www.vetmed.vt.edu/

REQUIREMENTS

- Veterinary Medicine, Doctor of Veterinary Medicine (D.V.M.) (p. 529)

Veterinary Medicine, Doctor of Veterinary Medicine (D.V.M.)

VA-MD Vet Med's DVM professional curriculum will provide a balanced educational foundation for the varied career opportunities available to veterinary graduates. Our program is designed to develop competent and confident graduates capable of entering the profession with day-one knowledge, skills, and abilities.

- The first two years focus on developing core knowledge, skills, and attributes across the species through integration of the basic and clinical sciences.
- Professional development is fostered through weekly problem-solving sessions focused on clinical reasoning skills.
- At the end of the second year, students enter clinics for the first time and complete five clinical rotations over the summer. This immersion in a workplace-based environment allows students to apply their gained knowledge and skills with real-world experiences.
- In the third year, students return to the classroom to reinforce and build on their acquired knowledge and skills and to focus on an area of interest by way of five tracking options: Small Animal, Equine, Food Animal, Mixed Animal, and Public/Corporate.
- Students finish the last nine months of the DVM program with 12 clinical rotations.

The DVM curriculum is constantly monitored and reviewed by the college's Curriculum Committee and updated as trends in veterinary education emerge.

For more information, please visit: https://dvm.vetmed.vt.edu/about-dvm-program/dvm-curriculum.html (https://dvm.vetmed.vt.edu/about-dvm-program/dvm-curriculum.html)

Wireless Communications (Z120)

Graduate Certificate Program
College: Engineering

ABSTRACT

The aim of the Graduate Certificate in Wireless Communications is to encourage the students to acquire specialized knowledge and skills in the technical area of wireless communications. We have positioned this Certificate to allow the students to further deepen their understanding of wireless communication technologies, and become specialists in this sub-field of telecommunications. While going through the certificate program, students will also acquire/develop additional practical problem-solving and analytical skills and become proficient in using one or more industry-standard RF and wireless network design and testing tools. Typical industry positons our students take after graduation that would benefit from this Certificate include: RF engineer, wireless test engineer, RF analyst, and specialist RAN engineer. (RF stands for radio frequency, and RAN stands for Radio Access Network.)

Website: http://www.telecom.umd.edu (http://www.telecom.umd.edu/)

Courses: ENTS (https://academiccatalog.umd.edu/graduate/courses/ents/)

ADMISSIONS

The Certificate in Computing Systems is only available to current Telecommunications (p. 514) students.

REQUIREMENTS

- Wireless Communications, Post-Baccalaureate Certificate (P.B.C.) (p. 530)

Wireless Communications, Post-Baccalaureate Certificate (P.B.C.)

12 credits required

Course	Title	Credits
Complete four of the following courses, with at least two at the 700-level		12
ENTS657	Satellite Communication Systems	
ENTS689	Special Topics in Telecommunications (ENTS689F - Fundamentals of Wireless LANs)	
ENTS689	Special Topics in Telecommunications (ENTS689L - Cellular Network Infrastructure- Cell Site Design and Components)	
ENTS689	Special Topics in Telecommunications (ENTS689W - Short-range Wireless Systems)	
ENTS659	Special Topics in Communications	
ENTS759	Advanced Topics in Communications	
Total Credits		**12**

Women, Gender, and Sexuality Studies (WMST)

Graduate Degree Program
College: Arts and Humanities

Abstract

Women, Gender, and Sexuality Studies offers an interdisciplinary and integrative program of study leading to the Master of Arts and Doctor of Philosophy degrees. Students will be expected to: develop a thorough grounding in women, gender, and sexuality studies scholarship; acquire an understanding of gender, race, and sexuality as categories of analysis; analyze and assess theories about the role of gender in systems of hierarchy and its intersection with other categories of difference, such as race, ethnicity, religion, class, sexuality, disability, location, and age; develop competence in feminist, queer, and critical race theories, research methods, and pedagogy, including transnational and global issues; and achieve competence in a selected area of specialization.

Financial Assistance

An initial funding offer is provided at the time of admission. Students who enter without a Master's degree are typically guaranteed funding for five years, while students who enter with a Master's degree are typically guaranteed four years. Funding offers typically combine one year of Departmental Fellowship with Graduate Teaching Assistantships for the remaining time. Funding is contingent on satisfactory progress towards the degree and completion of benchmarks.

REQUIREMENTS

- Women, Gender, and Sexuality Studies, Doctor of Philosophy (Ph.D.) (p. 531)

- Women, Gender, and Sexuality Studies, Master of Arts (M.A.) (p. 531)

FACILITIES AND SPECIAL RESOURCES

Resources for research in the College Park and Washington D.C. area are unsurpassed. The University's libraries hold around 2,500,000 volumes. In addition to the outstanding holdings of the Library of Congress, the area also offers the specialized resources of the National Archives and Archives II (located on the grounds of the University of Maryland); the Smithsonian Institution; the National Museum of Women in the Arts; and a broad array of public policy organizations and "think-tanks" plus the many research and policy institutes that include gender, race, and sexuality issues as part of their agenda. We are also member institution of the Consortium of Universities of the Washington Metropolitan Area, a unique collaboration of D.C. area colleges and universities that promotes cross-institutional learning.

One of the leading scholarly journals in our field, *Feminist Studies*, is located on our campus. Some graduate students may be able to broaden their experience and enhance the applicability and marketability of their coursework by undertaking internships with the journal.

The University of Maryland Consortium on Race, Gender and Ethnicity offers grant-getting potential and otherwise supports the research endeavors of faculty and graduate students in these fields. Grants funded through the Consortium will provide additional funding for Women's Studies graduate students and invaluable research experience. High enrollment demand in Women's Studies introductory core courses provides yet another opportunity for funding graduate students' programs of study with teaching assistantships.

Women, Gender, and Sexuality Studies, Master of Arts (M.A.)

Thesis option: 31 credits
Non-thesis option: 31 credits

Women, Gender and Sexuality Studies does not have a stand-alone M.A. program. However, on the way to a Ph.D., students who have completed the appropriate coursework may request conferral of a master's degree. Students will begin the graduate program with a sequence of courses that include the required core interdisciplinary courses for a total of 31 credits and finish with either the completion of a thesis or the 'general' examination. This portion of the program stresses interdisciplinary Master's courses offered in the Harriet Tubman Department of Women, Gender and Sexuality Studies.

Course	Title	Credits
Required courses:		
WMST601	Approaches to Women's Studies I	3
WMST602	Approaches to Women's Studies II	3
WMST618	Feminist Pedagogy	3
WMST621	Feminist Theories and Women's Movements: Genealogies	3
WMST628	Women's Studies Colloquium	3
Select 16 additional credits		16
Thesis or Non-Thesis Requirements		
Select one of the following:		
Thesis Option:		
Students must pass the General Exam and pass the 2-year paper with an oral defense		
Non-Thesis Option:		
Students must pass the General Exam		
Total Credits		**31**

Women, Gender, and Sexuality Studies, Doctor of Philosophy (Ph.D.)

Students entering with a bachelor's degree are required to complete 27 credits of required courses and 27 credits of electives for a total of 54 credits. Students entering with a master's degree are required to complete 27 credits of required courses and 7 credits of electives.

Students in the program explore feminist and queer theories, methodologies, and genealogies through coursework within the department, then draw upon resources across UMD and the DC area to build an individualized course of study as they ready themselves for dissertation research. With the guidance of faculty, students work through our series of benchmarks in order to gain a strong grounding in our field and then develop their specific trajectory, pursuing the classes, networks, and training necessary for the projects they are building.

Advance to Candidacy: In addition to the course requirements below, students must pass all of the following: the General Examination, Interdisciplinary Paper, Portfolio Review, Major Field Exam, and Dissertation Prospectus. Students must also demonstrate reading competency in a language other than English, relevant to their course of study.

Post-Candidacy: Complete at least 12 credits of WMST899 Doctoral Dissertation Research and successfully defend and submit an original dissertation.

Course	Title	Credits

Youth Experience (Z113)

Graduate Certificate Program
College: Information Studies

Abstract

The Post-Baccalaureate Certificate of Professional Studies in Youth Experience will build the capacity to better adapt to the changing landscape of youth learning and technology. The Post-Baccalaureate Certificate of Professional Studies in Youth Experience prepares librarians to promote 21st century skills among youth ages 0-18 through incorporating participatory design principles, design thinking approaches, and dynamic community partnerships in their offerings of programs and services. At the completion of the online certificate, librarians will be able to:

- Facilitate learning with technology in any physical, virtual or hybrid learning environment using tested skills and practices for different types of youth.
- Methods for engaging youth as co-designers using the design thinking process.
- Demonstrate an understanding of the issues, concepts, and policies related to youth-led learning and programming through libraries.
- Implement best practices to be inclusive of all youth's needs, in particular youth from disadvantaged populations;

- Apply core theories and models from information science and learning sciences to address needs of youth; and
- Partner with other cultural institutions and community organizations to help with youth programming, education, and other projects related to youth development.

- Current librarian: Must be currently a school or public librarian working with children and teens; or A recent MLIS graduate or librarian who would like additional experience working with children and teens.

All applicants must have:

- Received a four-year baccalaureate degree;
- Received a master's degree in library or information science;
- Earned a minimum GPA of 3.0 (on a 4.0 scale) in all prior undergraduate and graduate course work;
- Must be currently a school or public librarian working with children and teens; or
- A recent MLIS graduate or librarian who would like additional experience working with children and teens
- GRE Scores are NOT required.

Summer Admissions Only

February 16 application deadline (domestic/international students)
Please email yxischool@umd.edu for admissions information.

Application Deadlines

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	Please visit the department website
International Applicants	
F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants.New Row	Please visit the department website

Other Deadlines: Please visit the program website at http://ischool.umd.edu

REQUIREMENTS

- Youth Experience, Post-Baccalaureate Certificate (P.B.C.) (p. 533)

Youth Experience, Post-Baccalaureate Certificate (P.B.C.)

12 credits required

Course	Title	Credits
INST650	Facilitating Youth Learning in Formal and Informal Environments	3
INST651	Promoting Rich Learning with Technology	3
INST652	Design Thinking and Youth	3
INST794	Capstone in Youth Experience	3
Total Credits		**12**

FACULTY LISTING

Last Name	First/Middle Name	Graduate Faculty Status	Academic Credentials	Positions
		Adjunct Member		n/a, Theatre and Performance Studies
Abadi	Daniel J.	Full Member	B.S., Brandeis University, 2002; M.Ph., University of Cambridge, 2003; Ph.D., Massachusetts Institute of Technology, 2008	Professor, Computer Science
Abbasi	Hossein	Graduate Teaching	Ph.D., University of Illinois at Urbana-Champaign, 2009	Senior Lecturer, Applied Economics
Abed	Eyad	Full Member	B.S., Massachusetts Institute of Technology, 1979; M.S., University of California-Berkeley, 1981; Ph.D., 1982. GCEN Academic Advisor for Systems Engineering	Professor, Electrical and Computer Engineering Professor, Systems Engineering
Abera	Nicole Taylor	Graduate Teaching	B.S., Bowling Green State University, 2002; M.A., American University, 2007; Ph.D., University of Maryland-College Park, 2014	Lecturer, Special Education
Abraham	Katharine	Full Member	B.S., Iowa State, 1976; Ph.D., Harvard University, 1982.	Professor, Survey and Data Science (online) Professor, Survey Methodology Professor, Survey Statistics
Abshire	Pamela	Full Member	B.S., California Institute of Technology, 1992; M.S., The Johns Hopkins University, 1997; Ph.D., The Johns Hopkins University, 2001.	Professor, Electrical and Computer Engineering Associate Professor, Neurosciences and Cognitive Science Associate Professor, Systems Engineering
Ad-Marbach	Gili	Adjunct Member	Ph.D., Tel-Aviv University, Israel, 1997M.Sc., Tel-Aviv University, Israel, 1988B.Sc., Tel-Aviv University, Israel, 1986	Research Professor
Adams	Jeffrey D.	Full Member	B.A., Johns Hopkins University, 1977; Ph.D., Yale University, 1981.	Associate Chair, Mathematics Professor, Mathematics
Adams	Lowell W.	Associate	B.S., Virginia Polytechnic Institute & State University, 1968; M.S., Ohio State University, 1973; Ph.D., Ohio State University, 1976	University Affiliate, Environmental Science and Technology
Adams	Christopher P	Graduate Teaching	Ph.D., University of Wisconsin-Madison, 2001	Lecturer, Applied Economics
Ades	Ibrahim Z.	Full Member	B.A.,University of California-Los Angeles, 1971; Ph.D., 1976.	Associate Professor, Biological Sciences
Adler	Eric	Full Member	B.A., Connecticut College, 1995; M.A.,SUNY Buffalo,1998; Ph.D., Duke University, 2005.	Chair, Classics Associate Professor, Classics

Adomaitis	Raymond A.	Full Member	B.S., Illinois Institute of Technology, 1984;Ph.D., 1988.	Professor, Systems Engineering Professor, Chemical Engineering
Afflerbach	Peter P.	Full Member	B.A., State University of New York-Albany, 1978; M.S., 1979; Ph.D., 1985.	Professor, Curriculum and Instruction Professor Emeritus, Teaching and Learning, Policy and Leadership
Agarwal	Ritu	Full Member	B.A., University of Delhi, 1982; M.B.A., Indian Institute of Management, Calcutta,1984; M.S., Syracuse University, 1988; Ph.D., Syracuse University, 1988.	Acting Dean
Agashe	Kaustubh	Full Member	B.Tech., Indian Institute of Technology, 1993; Ph.D., University of California, Berkeley, 1998.	Associate Professor, Physics
Aggour	Mohamed S.	Full Member	B.S., Cairo University, 1964;M.S., 1966; Ph.D., University of Washington, 1972.	Professor, Civil and Environmental Engineering
Agrawala	Ashok K.	Full Member	B.S., Agra University, 1960; B.E., Indian Institute of Science-Bangalore, 1963; M.Eng., 1965; Ph.D.,Harvard University, 1970.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Computer Science
Agrawala	Ashok	Full Member	B.S., Agra University, 1960; B.E., Indian Institute of Science-Bangalore, 1963; M.E., Indian Institute of Science-Bangalore, 1965; Ph.D., Harvard University, 1970	Affiliate Professor, Electrical and Computer Engineering
Aguilar Mora	Jorge	Full Member	B.A., Universidad Nacionel de Mexico, 1966; Ph.D., El Colegio de Mexico, 1976	Professor Emeritus, Spanish Language and Literature
Akin	David L.	Full Member	S.B., Massachusetts Institute of Technology, 1974; S.M., 1975; Sc.D., 1981.	Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Associate Professor, Aerospace Engineering
Al-Sheikhly	Mohamad I.	Full Member	B.Sc., University of Baghdad, 1974; Ph.D., University of Newcastle, 1981.	Professor, Materials Science and Engineering Affiliate Professor, Chemical Engineering
Aladangady	Aditya	Graduate Teaching	Ph.D., University of Michigan, 2014	Lecturer, Applied Economics
Alberini	Anna	Full Member	B.A., Italy, 1987; M.A., 1989; Ph.D., University of California-San Diego, 1992.	Professor, Agricultural and Resource Economics
Albertus	Paul	Full Member		Assistant Professor, Chemical Engineering

Alcaniz	Isabella	Full Member	Licenciada in IR, Universidad de Belgrano, 1994; MA, Northwestern University, 1999; Ph.D. Northwestern University, 2004	Assistant Professor, Government and Politics
Aldoory	Linda	Full Member	B.A., George Washington University, 1988; M.A., University of Texas-Austin, 1991; Ph.D., Syracuse University, 1998.	Professor, Communication
Alexander	Millard H.	Full Member	B.A., Harvard University, 1964; Ph.D.,University of Paris, 1967.	Distinguished University Professor, Applied Mathematics & Statistics, and Scientific Computation Distinguished University Professor, Chemical Physics Distinguished University Professor, Chemistry
Alexander	Patricia A.	Full Member	B.A., Bethel College-McKenzie, 1970; M.Ed., James Madison University, 1979; Ph.D., University of Maryland-College Park, 1981.	Professor, Human Development
Alford	Charles F.	Full Member	B.A., Austin College, 1969; M.A., University of Texas-Austin, 1971; Ph.D., 1979.	Professor, Government and Politics
Allee	Todd	Full Member	B.A., University of Missouri, 1994; M.S., London School of Economics and Political Science, 1996; Ph.D., University of Michigan, 2003.	Assistant Professor, Government and Politics
Allen	Dale	Adjunct Member	B. S., Iowa State University, 1984; M. S., Florida State University, 1987; Ph. D., University of Maryland, 1996.	Associate Research Scientist, Atmospheric and Oceanic Science
Allewell	Norma M.	Full Member	B.Sc., Biochemistry, McMaster Univ., Hamilton, Ontario, 1965 Ph.D., Molecular Biophysics, Yale University, 1969	Professor Emerita, Biological Sciences
Aloimonos	John	Full Member	B.S., University of Athens-Greece,1981; M.S., University of Rochester, 1984; Ph.D., 1987.	Professor, Neurosciences and Cognitive Science Professor, Computer Science
Aloimonos	Yiannis	Full Member	B.S., University of Athens, 1981; M.S., University of Rochester, 1984; Ph.D., University of Rochester, 1987	Affiliate Professor, Electrical and Computer Engineering
Alt	Francis B.	Full Member	B.S.E., Johns Hopkins University, 1967; M.S., Georgia Institute of Technology, 1973; Ph.D., 1977.	Associate Professor, Applied Mathematics & Statistics, and Scientific Computation
Alva	Maria	Graduate Teaching	D.Phil., University of Oxford, 2014	Lecturer, Applied Economics
Alvizu	Josh	Full Member	B.A. University of Colorado, Boulder, 2005; M.A. Johns Hopkins University, 2008; Ph.D., Yale University, 2017	Assistant Professor, German Literature and Language

Ambs	Stefan	Special	Ph.D., University of London, 1997	n/a, Biological Sciences
Amde	Amde M.	Full Member	B.E.S.,Johns Hopkins University, 1970; M.S., University of California-Berkeley, 1971; Ph.D., State University of New York-Buffalo, 1976.	Professor, Civil and Environmental Engineering
Amilivia	Jennifer Marie	Graduate Teaching	B.A., University of Michigan-Ann Arbor, 2009; B.G.S., University of Michigan-Ann Arbor, 2012; M.A., University of Michigan-Ann Arbor, 2014; Ph.D., University of Kansas, 2020	Assistant Clinical Professor, Special Education
Amoruso	Cristina	Graduate Teaching	B.A., Political Science, University of Houston, 1991; M.A., Columbia University, 1999; M.S., University of Miami, 2002	Lecturer, Historic Preservation
Anand	Davinder K.	Full Member	B.S., George Washington University, 1959; M.S., 1961; Ph.D., 1965. GCEN Academic Advisor for Energetic Concepts Development	Professor Emeritus, Mechanical Engineering
Anandalingam	Gnanalingam	Full Member	B.A., University of Cambridge, 1975; M.S., Harvard University, 1977; Ph.D., Harvard Univerity, 1991.	Professor
Anderson	John D.	Full Member	B.S. University of Florida, 1959; Ph.D., Ohio State University-Columbus, 1966.	Professor Emeritus, Aerospace Engineering
Anderson	Samira	Full Member	B.A., Indiana University, 1979; M.A., Indiana University, 1981; Au.D, University of Florida, 2000; Ph.D. Northwestern University, 2012	Associate Professor, Clinical Audiology Assistant Professor, Hearing and Speech Sciences Assistant Professor, Neurosciences and Cognitive Science
Anderson	Lindsey	Full Member	B.A., Purdue University, 2004; M.A., Indiana University, 2010; Ph.D., Purdue University, 2014	Associate Chair, Communication Associate Professor, Communication
Andrews	David L.	Full Member	B.Ed. Exeter University, 1985; M.S. University of Illinois at Urbana-Champaign, 1991; Ph.D., University of Illinois at Urbana-Champagne, 1993.	Professor, Kinesiology Professor, Physical Activity Affiliate Associate Professor, Sociology
Andrews	Norma	Full Member	Ph.D. University of Sao Paulo, Brazil 1983.	Professor, Biological Sciences
Andrist	Lester H.	Associate	B.A., University of Minnesota-Twin Cities, 2001; M.A., University of Maryland, College Park, 2008; Ph.D., University of Maryland, College Park, 2016	Director, Sociology Associate Professor, Sociology

Andrusik	Katryna Natalya	Graduate Teaching	B.A., John Hopkins University, 2000; M.S., John Hopkins University, 2003; Ph.D., University of Maryland-College Park, 2011	Lecturer, Special Education
Angel	C. Roselina	Full Member	B.S., Iowa State University, 1984;M.S., 1987; Ph.D., 1990.	Professor, Animal Sciences
Anischenkova	Valerie	Full Member	B.A./M.A. St. Petersburg State University, 1997; M.A. University of Michigan, 2001; Ph.D. University of Michigan, 2007	Affiliate Associate Professor, Comparative Literature
Anisimov	Mikhail A.	Full Member	Ph.D., Moscow State University, 1968.	Professor, Chemical Engineering Professor, Chemical Physics
Ankem	Sreeramamurthy	Full Member	B.Eng.,K.R. Engineering College-University of Mysore, 1972; M.Eng., Indian Institute of Science-Bangalore, 1974; Ph.D.,Polytechnic Institute of New York, 1980.	Professor, Materials Science and Engineering
Anlage	Steven	Full Member	B.S., Rensselaer Polytechnic Institute, 1982; M.S., California Institute of Technology, 1984; Ph.D., California Institute of Technology, 1988	Professor, Materials Science and Engineering Professor, Physics Affiliate Professor, Electrical and Computer Engineering
Antman	Stuart S.	Full Member	B.S., Rensselaer Polytechnic Institute, 1961; M.S.,University of Minnesota-Twin Cities, 1963; Ph.D., 1965.	Distinguished University Professor Emeritus, Applied Mathematics & Statistics, and Scientific Computation Distinguished University Professor Emeritus, Mathematics
Antonisse	Margaret	Non-Member	B.A., Lafayette College, PA, 1973; M.O., University of Michigan-Ann Arbor, 1976; PhD, University of Maryland-College Park, 2000	Senior Lecturer, Linguistics
Antonsen	Thomas M., Jr.	Full Member	B.S., Cornell University, 1973; M.S., 1976; Ph.D., 1977.	Professor, Electrical and Computer Engineering Professor, Physics
Aparicio	Elizabeth	Full Member	M.S.W., Catholic University of America, 2005; Ph.D., University of Maryland Baltimore, 2014	Assistant Professor, Behavioral and Community Health
Appelbaum	Ian	Full Member	B.S., Rensselaer Polytechnic Institute, 1997; Ph.D., Massachusetts Institute of Technology, 2003	Affiliate Professor, Electrical and Computer Engineering
Applebaum	Ian	Full Member	B.S., Rensselaer Polytechnic Institute, 1997, Ph.D., Massachusetts Institute of Technology, 2003	Associate Professor, Physics

Aranda-Espinoza	Jose Helim	Full Member	B.S., University of Zacatecas, Mexico 1990; M.S., University of San Luis Potosi, Mexico 1993; Ph.D., University of San Luis Potosi, Mexico 1998.	Associate Chair, Bioengineering Professor, Civil and Environmental Engineering Associate Professor, Bioengineering Associate Professor, Biophysics Affiliate Associate Professor, Materials Science and Engineering
Araneda	Ricardo	Full Member	B.S., University of Concepcion, 1986; M.S., Albert Einstein College of Medicine, 1992; Ph.D., Albert Einstein College of Medicine, 1997.	Professor, Biological Sciences Assistant Professor, Neurosciences and Cognitive Science
Archsmith	James	Full Member	B.S., University of Michigan, 1992; M.A., University of Michigan, 2011; Ph.D., University of California, 2018	Assistant Professor, Agricultural and Resource Economics
Arevalo JR	Ricardo David	Full Member	B.S., University of Florida, 2005; Ph.D., University of Maryland, College Park, 2010	Associate Professor, Geology
Armbruster	Peter	Special Member	B.A. Univ. of California at San Diego 1989; Ph.D. Univ. of Oregon, 1997.	University Affiliate, Environmental Science and Technology
Armstrong	Ronald W.	Full Member	B.E.S., Johns Hopkins University, 1955; M.Sc., Carnegie-Mellon University, 1957; Ph.D., 1958.	Professor Emeritus, Mechanical Engineering
Armstrong	Earlene	Non-Member	BS, North Carolina Central University, 1969; MS, North Carolina Central University, 1970; PhD, Cornell University, 1975	Professor Emerita, Entomology
Arnold	Conrad N.	Full Member	B.S., West Virginia University, 1971; M.S., 1986.	Specialist
Arnold	Elizabeth	Full Member	B.A. Oberlin College, 1981; M.A. University of Chicago, 1984; Ph.D. 1991; M.F.A. Warren Wilson MFA Program for Writers.	Professor, English Language and Literature Professor, Creative Writing
Arria	Amelia	Full Member	B.S., Cornell University, 1986; Ph.D., University of Pittsburgh, 1993.	Associate Professor, Behavioral and Community Health
Aruoba	Sadik	Full Member	Ph.D., University of Pennsylvania, 2004A.M. (Master of Arts), University of Pennsylvania, 2002B.A., Bogazici University, 1999	Professor, Economics
Asa-Awuku	Akua	Full Member	B.S., M.I.T., 2003; M.S., Georgia Institute of Technology, 2006; Ph.D., Georgia Institute of Technology, 2008	Associate Professor, Chemical Engineering

Ash	Richard	Associate	B.S., Queen Mary College, University of London, 1986; Ph.D., Open University, United Kingdom, 1990.	Assistant Research Scientist, Geology
Ater	Renee	Full Member	B.A., Oberlin College, 1987; M.A., University of Maryland, College Park, 1993; Ph.D.,University of Maryland, College Park, 2000.	Associate Professor Emerita, Art History and Archaeology
Auchard	John	Full Member	B.A. New York University, 1970; M.A. University of Michigan-Ann Arbor, 1971; Ph.D. University of North Carolina-Chapel Hill, 1980.	Professor Emeritus, English Language and Literature
Auerbach	Jonathan D.	Full Member	B.A. University of California-Santa Cruz, 1976 M.A. Johns Hopkins University, 1978; Ph.D. 1984.	President Emeritus, English Language and Literature
Auslander	Joseph	Full Member	B.S., Massachusetts Institute of Technology, 1952; M.S., University of Pennsylvania, 1953; Ph.D., 1957.	Professor Emeritus, Mathematics
Austin	Mark A.	Full Member	B.E., University of Canterbury, 1980; M.S. University of California-Berkeley, 1982; Ph.D., 1985.	Director, Systems Engineering Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Associate Professor, Systems Engineering Associate Professor, Civil and Environmental Engineering
Ausubel	Lawrence M.	Full Member	A.B., Princeton University, 1980; M.S.,Stanford University, 1982; M.L.S., 1984; Ph.D., 1984.	Professor, Economics
Aute	Vikrant C.	Associate	B.S., 1997, University of Pune; M.S., 2001, University of Maryland; Ph.D., 2010, University of Maryland	Research Scientist, Mechanical Engineering
Avilez	GerShun	Full Member	B.A. Hendrix College 2002, M.A. Temple University 2004, Ph.D. University of Pennsylvania 2009	Professor, English Language and Literature Graduate Director, English Language and Literature
Aydilek	Ahmet H.	Full Member	B.S., Istanbul Technical University, 1993; M.S. University of Wisconsin-Madison, 1996; Ph.D., University of Wisconsin-Madison, 2000.	Professor, Civil and Environmental Engineering
Ayyub	Bilal M.	Full Member	B.S., Kuwait University, 1980; M.S., Georgia Institute of Technology, 1981; Ph.D., 1983.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Reliability Engineering Professor, Civil and Environmental Engineering

Azar	Masoud	Full Member	B.S., Azad University Iran 2002; M.S. University of Tehran Iran 2007; Ph.D. Colorado State University, 2012.	Assistant Professor, Environmental Science and Technology
Azarian	Michael	Adjunct Member	B.S., Princeton University, 1982; M.S. Carnegie Mellon University 1988; Ph.D. Carnegie Mellon University, 1994	Associate Research Scientist, Mechanical Engineering
Azarian	Michael	Adjunct Member	B.S., Princeton University, 1982; M.S. Carnegie Mellon University 1988; Ph.D. Carnegie Mellon University, 1994	Associate Research Scientist, Reliability Engineering
Azarm	Shapour	Full Member	B.S., University of Tehran, 1977; M.S., George Washington University, 1979; Ph.D., University of Michigan-Ann Arbor, 1984.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mechanical Engineering
Babadi	Behtash	Full Member	B.Sc. Sharif University of Technology, 2006;M.Sc. Harvard, 2008; Ph.D. Harvard, 2011	Associate Professor, Electrical and Computer Engineering Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Assistant Professor, Neurosciences and Cognitive Science
Baccus	Ayanna	Associate	B.S., Wake Forest University, 1997; M.Ed., University of Maryland, 1998; Ph.D., University of Maryland, 2004	Associate Clinical Professor, Teaching and Learning, Policy and Leadership Associate Clinical Professor, Curriculum and Instruction
Bachrach	Christine	Full Member	B.A., Harvard University M.A., Georgetown University Ph.D., Johns Hopkins University	Research Professor, Sociology
Baden	Andrew R.	Full Member	B.A.,University of Wisconsin-Madison, 1975; B.A., San Francisco State University, 1981; Ph.D., University of California-Berkeley, 1986.	Chair, Physics Professor, Physics
Baecher	Gregory B.	Full Member	B.S.,University of California-Berkeley, 1968; M.S., Massachusetts Institute of Technology, 1970; Ph.D., 1972.	Professor, Civil and Environmental Engineering
Baeder	James D.	Full Member	B.S., Rice University, 1983; M.S., Stanford University, 1984; Ph.D., 1989.	Professor, Aerospace Engineering Associate Professor, Applied Mathematics & Statistics, and Scientific Computation
Baer	Hester	Full Member	B.A. Bard College, 1992; M.A. University of Minnesota-Twin Cities, 1994; Ph.D. Washington University, 2000	Associate Professor, German Literature and Language Associate Professor, Comparative Literature Affiliate Associate Professor, Women's Studies

Bailey	Joseph P.	Full Member	B.S., Carnegie-Mellon University, 1992; M.S., Stanford University, 1993; Ph.D., Massachusetts Institute of Technology, 1998.	Associate Research Professor
Bailey	Amanda	Full Member	B.A., Oberlin College, 1988; M.A. Univ. of Michigan, 1992; Ph.D. 1998.	Chair, English Language and Literature Professor, English Language and Literature
Baillargeon	Mercedes	Full Member	PhD, University of North Carolina-Chapel Hill, 2014	Affiliate Associate Professor, Women's Studies
Baiocchi	Giovanni	Full Member	Lurea, University of Trieste, Italy, 1991; M.A., Virginia Polytechnic Institute, 1993; Ph.D. University of York, York, UK, 2008.	Associate Professor, Geographical Sciences
Bakshi	Gurdip S.	Full Member	B.Elect.E., Punjab University, 1985; M.S., University of Wisconsin-Madison, 1989; Ph.D., 1992.	Visiting Professor
Balachandran	Arun	Special	B.A., University of Kerala, 2011; MSc., Madras School of Economics, 2013; Ph.D., University of Groningen, 2020	Affiliate Professor, American Studies Postdoctoral Fellow, Sociology
Balachandran	Balakumar	Full Member	B.Tech.,Indian Institute of Technology-Madras, 1985; M.S., Virginia Polytechnic Institute & State University, 1986; Ph.D., 1990.	Chair, Mechanical Engineering Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mechanical Engineering
Balachandran Orihuela	Sharada	Full Member	B.A. Mills College; Ph.D. Univ. of California, Davis.	Associate Professor, English Language and Literature Associate Professor, Comparative Literature
Balan	Radu	Full Member	B.S., Polytechnic Institute of Bucharest, Romania 1992; B.S., University of Bucharest, Romania 1994; Ph.D., Princeton University, 1998	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematics
Baldwin	Andrew H.	Full Member	B.S., Tufts University, 1983; Ph.D., Louisiana State University-Baton Rouge, 1996.	Professor, Environmental Science and Technology
Baldwin	Tom	Adjunct Member	B.M. Ithaca College	Lecturer, Music Lecturer, Music Education
Baldwin	Melinda	Full Member	B.A., Davidson College, 2004; M.A., Princeton University, 2007; Ph.D., Princeton University, 2010	Associate Professor, History
Ball	Gregory	Full Member	B.A., Columbia University, 1977; Ph.D., Rutgers University, 1983	Professor, Neurosciences and Cognitive Science Professor, Psychology
Ball	Michael O.	Full Member	B.E.S., Johns Hopkins University, 1972; M.S.E., 1972; Ph.D., Cornell University, 1977.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Systems Engineering

Balthrop	Carmen A.	Full Member	B.Mus., University of Maryland-College Park, 1971; M.Mus., Catholic University of America, 1972.	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Banavar	Jayanth	Full Member	B.Sc,Bangalore University,1972 M.Sc., Physics, Bangalore University; 1974; Ph.D., University of Pittsburgh, 1978	Dean, Physics Professor, Physics
Banisky	Sandra A	Full Member	B.A., Boston University; J.D., University of Baltimore	Visiting Professor, Journalism
Banks	Antoine J.	Full Member	B.A., Hunter College, 2001; Ph.D., University of Michigan, 2009.	Associate Professor, Government and Politics
Baras	John S.	Full Member	B.S.,National Technical University of Athens, 1970; S.M., Harvard University, 1971; Ph.D., Harvard University, 1973.	Professor, Electrical and Computer Engineering Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Systems Engineering Affiliate Professor, Mechanical Engineering Affiliate Professor, Bioengineering
Barbarin	Oscar	Full Member	B.A., St. Joseph Seminary College, 1968; M.A., New York University, 1971; M.S., Rutgers University, 1973; Ph.D., Rutgers University. 1975	Professor, Psychology
Barber	Richard	Adjunct Member	B.M., Peabody Conservatory	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Barbosa	Pedro	Non-Member	BS, City University of New York - City College, 1966; MS, University of Massachusetts - Amherst, 1969; PhD, University of Massachusetts - Amherst, 1971	Professor Emeritus, Entomology
Barg	Alexander	Full Member	Ph.D.,Moscow Russia,1983-1987;M.Sc, Moscow Russia,1976-1981	Professor, Electrical and Computer Engineering Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Systems Engineering Affiliate Professor, Computer Science
Barker	Shelia	Special Member	B.A. Amherst College, 1993, Spanish Literature and Art History; M.A. Columbia University, 1996, Art History, M.Phil. Columbia University 1997, Art History, Ph.D. Columbia University, 2002, Art History	n/a, Art History and Archaeology

Barkley Brown	Elsa	Full Member	B.A.,DePauw University, 1972; Ph.D., Kent State University, 1994.	Associate Professor, History Associate Professor, Women's Studies Affiliate Associate Professor, American Studies
Barlow	Jewel B.	Full Member	B.Sc., Auburn University, 1963;M.S., 1964; Ph.D., University of Toronto, 1970.	Associate Professor, Aerospace Engineering
Baron	Sabrina	Adjunct Member	B.A., Hanover College, 1981; M.A., University of Chicago, 1982; Ph.D., University of Chicago, 1995	Assistant Research Professor, History
Baron	Jason	Associate	B.A., Wesleyan University; J.D., Boston University School of Law	Professor of Practice, History and Library & Information Science
Barrenechea	Francisco	Full Member	B.A., Universidad Nacional Autonoma de Mexico, 1996; M.A., Columbia University, 1999; Ph.D., Columbia University, 2005	Associate Professor, Classics Affiliate Associate Professor, Comparative Literature Graduate Director, Classics
Barros	Patricia B.	Full Member	B.S. Universidade Catolica de Pernambuco, Psychology, 2005; M.S. Kansas State University, Psychology, 2010; M.S. Kansas State University, Marriage and Family Therapy, 2012; Ph.D. Kansas State Uniersity, Marriage and Family Therapy, 2015	Assistant Clinical Professor, Maternal and Child Health
Bartol	Kathryn M.	Full Member	B.A., Marygrove College, 1963; M.A.,University of Michigan-Ann Arbor, 1966; Ph.D., Michigan State University, 1972	Area Chair Professor
Barua	Rajeev K.	Full Member	B.S., Indian Institute of Technology-Delhi,1992; M.S., Massachusetts Institute of Technology, 1994; Ph.D., 2000.	Professor, Electrical and Computer Engineering Associate Professor, Systems Engineering Affiliate Associate Professor, Computer Science
Bastin	Fabian	Special Member	B.S., University of Namur, 1997; M.S., University of Namur, 1999; Ph.D., University of Namur, 2004	n/a, Civil and Environmental Engineering
Basu	Progyan	Graduate Teaching	M.B.A., University of Missouri, 1986; Ph.D., University of Nebraska, 1992	Clinical Professor, Accounting
Battistin	Erich	Full Member	B.S., Italy, 1997; Ph.D., University of Padua, Italy	Professor, Agricultural and Resource Economics
Battle	Ann Arlene	Adjunct Member	B.S.N., University of Maryland at Baltimore, 1975; M.S., University of Maryland-College Park, 1992; Ph.D., 1998.	Director, Human Development

Battle	Leilani	Full Member	B.S., University of Washington, 2011; M.S., Massachusetts Institute of Technology, 2013; Ph.D., Massachusetts Institute of Technology, 2017	Assistant Professor, Computer Science
Bauchau	Olivier A	Adjunct Member	Ing´enieur Civil Physicien degree, Universit´e de l'´Etat `a Li`ege, 1977; M.S., Massachusetts Institute of Technology, 1978; Ph.D., Massachusetts Institute of Technology,1981.	Professor, Aerospace Engineering
Bauer	Ralph R.	Full Member	B.A., University of Erlangen-Nurnberg, 1991; M.A., Michigan State University, 1993; Ph.D., 1997.	Associate Professor, English Language and Literature Associate Professor, Comparative Literature
Baur	Cynthia	Full Member	M.A., University of California - San Diego, 1992; Ph.D., University of California - San Diego, 1995	Professor, Behavioral and Community Health
Baz	Amr M.	Full Member	B.S., University of Cairo, 1966; M.S.,University of Wisconsin-Madison, 1970; Ph.D., 1973.	Professor, Mechanical Engineering
Beasley	Maurine	Full Member	B.A.,University of Missouri-Columbia, 1958; B.J., 1958; M.S., Columbia University,1963; Ph.D., George Washington University, 1974.	Professor Emerita, Journalism
Beckett	Dorothy	Full Member	B.A., Barnard College, 1980;Ph.D., University of Illinois-Urbana/Champaign, 1986. Ph.,D, something	Professor, Biochemistry Professor, Chemistry
Beckman	Paula J.	Full Member	B.A., Hastings College, 1974; M.A.,University of Nebraska at Omaha, 1977; Ph.D.,University of North Carolina-Chapel Hill, 1980.	Professor Emerita, Special Education
Bedaque	Paulo	Full Member	B.S., Universidade de Sao Paulo, 1985; M.S., Universidade de Sao Paulo, 1989; Ph.D., University of Rochester, 1994;	Professor, Physics
Bederson	Benjamin B.	Full Member	B.S., Rensselaer Polytechnic Institute, 1986; M.S., New York University, 1989; Ph.D., 1992.	Professor, Computer Science Affiliate Professor, Human-Computer Interaction
Bedrossian	Jacob	Full Member	B.S., Case Western Reserve University, 2007; M.S., Case Western Reserve University, 2007; Ph.D., University of California, Los Angeles, 2011.	Professor, Applied Mathematics & Statistics, and Scientific Computation Assistant Professor, Mathematics
Behn	Mark	Special Member	B.S, Bates College, 1996; Ph.D., Massachusetts Institute of Technology, 2002	University Affiliate, Geology

Beicken	Peter U.	Full Member	M.A., University of Munich, 1968; Ph.D.,Stanford University, 1971.	Professor Emeritus, German Literature and Language
Beier	Jonathan	Full Member	B.S., Stanford University, 2001; Ph.D.,Harvard University, 2008.	Assistant Professor, Neurosciences and Cognitive Science
Beise	Elizabeth J.	Full Member	B.A., Carleton College, 1981; Ph.D., Massachusetts Institute of Technology, 1988.	Associate Provost, Physics Distinguished Scholar-Teacher, Physics Professor, Physics
Belenkiy	Maksim	Graduate Teaching	Ph.D., University of California-Santa Cruz, 2010	Lecturer, Applied Economics
Bell	Matthew J.	Full Member	B.Arch., University of Notre Dame, 1983; M.Arch., Cornell University, 1987.	Professor, Architecture Professor, Urban and Regional Planning and Design
Bell	Richard J.	Full Member	Ph.D., Harvard University, 2006	Professor, History
Belloni	Alberto	Full Member	B.S., University of Pisa and Scuola Normale Superiore, 2002; Ph.D., Massachusetts Institute of Technology, 2007	Assistant Professor, Physics
Belov	Georgiy	Full Member	Ph.D., Moscow State University, 2001	Associate Professor, Veterinary Medical Sciences Associate Professor, Biological Sciences
Belt	Kenneth T.	Special	B.S., Towson University, 1973; M.S. Towson University, 1983; Ph.D. University of Maryland, Baltimore County, 2012.	University Affiliate, Geology
Bely	Alexandra E.	Full Member	Ph.D., SUNY Stony Brook, 1999	n/a, Biological Sciences
Benedetto	John J.	Full Member	B.A., Boston College, 1960; M.A., Harvard University, 1962; Ph.D., University of Toronto, 1964.	Distinguished Scholar-Teacher, Applied Mathematics & Statistics, and Scientific Computation Distinguished Scholar-Teacher, Mathematics Professor, Mathematics Director of NWC, Mathematics
Benharrech	Sarah	Full Member	Ph.D., Princeton University, 2002	Associate Professor, French Modern Studies Associate Professor, French Studies
Benito-Vessels	Carmen	Full Member	B.A., University of Salamanca-Spain, 1977; M.A., 1977; Ph.D.,University of California-Santa Barbara, 1988.	Professor, Spanish Language and Literature
Bennett	Ralph D., Jr.	Full Member	B.A., Princeton University, 1961; M.F.A., 1966.	Professor Emeritus, Architecture
Benson	Spencer A.	Full Member	B.A.,University of Vermont, 1973; Ph.D., University of Chicago, 1978.	Affiliate Associate Professor, Teaching and Learning, Policy and Leadership

Bentley	William E.	Full Member	B.S., Cornell University, 1982; M.Eng., 1983; Ph.D.,University of Colorado-Boulder, 1989.	Distinguished University Professor, Applied Mathematics & Statistics, and Scientific Computation Distinguished University Professor, Bioengineering Affiliate Professor, Biological Sciences Affiliate Professor, Chemical Engineering
Berbery	Ernesto H	Adjunct Member	M.S., University of Buenos Aires, 1976; S.C.D., 1987.	Research Professor, Atmospheric and Oceanic Science
Berg	Kenneth R.	Full Member	B.S., University of Minnesota-Twin Cities, 1960; Ph.D., 1967.	Associate Professor Emeritus, Mathematics
Bergbreiter	Sarah E.	Full Member	B.E., Princeton University, 1999; M.S., University of California-Berkeley, 2004; Ph.D., University of California, 2007	Assistant Professor, Systems Engineering
Berger Jacobson	Jill	Adjunct Member	B.A., Psychology, University of Virginia, 2005; M.A., School Psychology, University of Maryland-College Park, 2010; A.G.S., School Psychology, University of Maryland-College Park, 2012; Ph.D., School Psychology, University of Maryland-College Park, 2013.	Assistant Clinical Professor, School Psychology
Berkowitz	Jacob	Special Member	B.S., University of North Carolina, 2003; M.S., University of California, 2005; Ph.D., Louisiana State University, 2013	University Affiliate, Environmental Science and Technology
Berlin	Adele	Full Member	B.A. University of Pennsylvania, 1964; Ph.D. 1976.	Professor Emerita, English Language and Literature Professor Emerita, Jewish Studies
Bernard	Peter S.	Full Member	B.E., City University of New York-City College, 1972; M.S.,University of California-Berkeley, 1973; Ph.D., 1977.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mechanical Engineering
Bernat	Edward	Full Member	B.A., University of Arizona, 1989; M.A., University of Michigan, 1993; Ph.D., University of Michigan, 1997.	Associate Professor, Psychology Assistant Professor, Neurosciences and Cognitive Science
Bersani	Bianca E.	Full Member	B.A., University of Nebraska-Lincoln, 2002; M.A., University of Nebraska-Lincoln, 2004; Ph.D., University of Maryland-College Park, 2010.	Associate Professor, Criminology and Criminal Justice

Bertot	John	Full Member	Ph.D., Syracuse University.	Professor, History and Library & Information Science Professor, Human-Computer Interaction Professor, Information Management Professor, Information Studies Professor, Library and Information Science
Besharov	Douglas	Full Member	B.A., City University of New York-Queens College, 1965; J.D., New York University, 1968; L.L.M., 1971.	Professor, Policy Studies
Bettag	Thomas	Non-Member		Lecturer, Journalism
Bhatele	Abhinav	Full Member	Ph. D., University of Illinois at Urbana-Champaign, 2010; M. S., University of Illinois at Urbana-Champaign, 2007; B. Tech., Indian Institute of Technology, Kanpur, 2005	Assistant Professor, Applied Mathematics & Statistics, and Scientific Computation
Bhattacharjee	Samrat	Full Member	B.S., Georgia College, 1994; Ph.D.,Georgia Institute of Technology, 1999.	Professor, Computer Science
Bhattacharyya	Shuvra S.	Full Member	B.S., University of Wisconsin-Madison, 1987; Ph.D.,University of California-Berkeley, 1994.	Professor, Electrical and Computer Engineering
Bhogal	Harjit	Full Member	B.A. (Hons), Merton College, University of Oxford, 2008; B.Phil, Somerville College, University of Oxford, 2010; Ph.D, New York University, 2017	Assistant Professor, Philosophy
Bi	Hongsheng	Full Member	Ph.D., Louisiana State University, 2005	Assistant Professor, Marine, Estuarine, and Environmental Sciences
Bianchini	Janna	Full Member	B.A., Wellesley College, 1999; M.A. Harvard University, 2003; Ph.D. Harvard University, 2007	Associate Professor, History Affiliate Associate Professor, Women's Studies
Bierbaum	Ariel	Full Member	BA, University of Pennsylvania, 2000; MCP, 2005; Massachusetts Institute of Technology, PhD, University of California-Berkeley 2016	Assistant Professor, Urban and Regional Planning and Design Assistant Professor, Community Planning
Bigio	David I.	Full Member	B.S., Case Western Reserve University, 1971; M.S., Massachusetts Institute of Technology, 1976; Eng.D., 1978; Ph.D., 1986. Director of Undergraduate Studies	Professor, Mechanical Engineering
Birnir	Johanna	Full Member	Ph.D., UCLA, 2001	Associate Professor, Government and Politics

Biswas	Debabrata	Full Member	B.S., University of Dhaka, 1994: M.S., University of Tokyo, 1998; Ph.D., University of Tokyo, 2001	n/a, Biological Sciences Professor, Animal Sciences
Blackistone	Kevin	Full Member	B.S., Northwestern University; M.A. Boston University	Visiting Professor, Journalism
Blanchard	Jack J.	Full Member	B.S., Arizona State University, 1984; Ph.D.,SUNY-Stony Brook, 1991.	Assistant Provost, Psychology Co-Director, Clinical Psychological Science Professor, Psychology
Blankenship	Gilmer L.	Full Member	B.S., Massachusetts Institute of Technology, 1967; M.S., 1969; Ph.D., 1971.	Associate Chair, Electrical and Computer Engineering Professor, Electrical and Computer Engineering Professor, Applied Mathematics & Statistics, and Scientific Computation
Blaustein	Ryan Andrew	Full Member	Ph.D., Microbial Ecology. University of Florida (2017) M.S., Environmental Microbiology. University of Maryland, College Park (2014) B.S., Biology. University of Maryland, College Park (2011)	Assistant Professor, Nutrition and Food Science
Blazar	David	Full Member	Ed.D. Harvard University	Associate Professor, Teaching and Learning, Policy and Leadership
Bleacher	Jacob E.	Special Member	B.A., Franklin & Marshall College, 2000; Ph.D., Arizona State University, 2006	University Affiliate, Geology
Bleam	Tonia	Full Member	B.A., Central College, Iowa, 1991; M.A., University of Delaware, 1994; Ph.D., University of Delaware, 1999.	Senior Lecturer, Linguistics
Blejer	Perla	Associate	Ph.D. George Washington University	Associate Clinical Professor, Teaching and Learning, Policy and Leadership
Blough	Neil V.	Full Member	B.S., University of Pittsburgh, 1977; Ph.D., Northwestern University, 1983.	Professor, Chemistry
Boekeloo	Bradley O.	Full Member	B.A., Kalamazoo College, 1981; S.C.M.,Johns Hopkins University, 1985; Ph.D., 1989.	Professor, Behavioral and Community Health
Boicourt	William C.	Full Member	B.A., Amherst College, 1966 M.A., The Johns Hopkins University, 1969; Ph.D., The Johns Hopkins University, 1973	Professor, Marine, Estuarine, and Environmental Sciences
Bolatto	Alberto D.	Full Member	M.A., Boston University, 1996: Ph.D., Boston University, 2000.	Professor
Bolger	Donald J.	Full Member	B.A., University of Massachusetts, 1998; M.S., University of Pittsburgh, 2002; Ph.D., 2006.	Associate Professor, Human Development Assistant Professor, Neurosciences and Cognitive Science

Bolles	Augusta Lynn	Full Member	A.B., Syracuse University, 1971; M.A., Rutgers University-New Brunswick, 1978; Ph.D., 1981.	Professor Emerita, Women's Studies Affiliate Professor, American Studies
Bond	Kanisha	Full Member	Bucknell University, B.A. 2002; Georgetown University, MPP, 2004; Pennsylvania State University, Ph.D. 2010	Assistant Professor, Government and Politics
Bonner	Christopher	Full Member	B.A. Howard University, 2008; M.A., Yale University, 2011; Ph.D., 2014.	Associate Professor, History
Bonsignore	Elizabeth	Full Member	PhD Information Studies, 2011; MS Computer Science, Naval Postgraduate School, 1991; EdM Education/Human Resources, 1989; BS English Language and Literature/ Letters, United States Naval Academy, 1985.	Lecturer, Human-Computer Interaction Lecturer, Information Management Lecturer, Information Studies Lecturer, Library and Information Science
Borrut	Antoine	Full Member	PhD, La Sorbonne, 2007	Associate Professor, History Affiliate Associate Professor, Jewish Studies
Borzekowski	Dina	Full Member	B.S., 1998, Cornell University; M.S., 1989, Columbia University; Ed.M., 1990, Harvard University; Ed.D., 1994, Harvard University	Research Professor, Behavioral and Community Health
Boté	Lisa A	Associate	Ph.D. Arizona State University, 2000	Associate Clinical Professor, Teaching and Learning, Policy and Leadership
Boudreaux	Michel	Full Member	B.A., Augsburg College, 2003; M.S., University of Minnesota-Twin Cities, 2009; Ph.D., University of Minnesota-Twin Cities, 2014	Assistant Professor, Health Administration Assistant Professor, Health Equity Assistant Professor, Health Policy Analysis and Evaluation Assistant Professor, Health Services
Bovill	Carl H.	Full Member	B.S., University of California-Santa Barbara, 1969; M.S.,University of California-Berkeley, 1970; M.Arch.,University of Hawaii at Manoa, 1976.	Professor, Architecture
Bowden	Mary L.	Adjunct Member	B.A., Cornell University, 1978; M.S., Massachusetts Institute of Technology, 1981; Sc.D., 1988.	Visiting Assistant Professor, Aerospace Engineering
Bowerman	William W.	Full Member	B.A. Western Michigan University, 1985 M.A. Northern Michigan University, 1991 Ph.D. Michigan State University, 1993	Chair, Environmental Science and Technology
Boyd	Derek A.	Full Member	B.Sc., University of Capetown, 1964; B.Sc., 1965; M.Sc., 1967; Ph.D., Stevens Institute of Technology, 1973.	Professor Emeritus, Physics

Boyd	Vivian S.	Full Member	B.A., Antioch College, 1961; M.A.,University of Colorado-Boulder, 1968; M.Ed., University of Maryland, 1971; Ph.D., University of Maryland-College Park, 1975.	Professor Emeritus
Boyd	Marcus	Full Member		Graduate Director, Terrorism Analysis
Boyd-Graber Ying	Jordan Lee	Full Member	B.S., California Institute of Technology, 2004; M.A., Princeton University, 2006; Ph.D., Princeton University, 2010	Associate Professor, Computer Science
Boyson	Sandor L.	Associate	B.A., Antioch College, 1981; M.Phil., University of Sussex-Falmer, 1985; Ph.D.,1990.	Research Professor, Business and Management
Bradley	Joseph	Special	B.E., The Cooper Union, 1979; M.S./M.E, Naval Postgraduate School, 1994; Ph.D., Old Dominion University, 2014	n/a, Civil and Environmental Engineering
Brame	Robert	Full Member	B.A., University of North Carolina at Charlotte, 1988; M.S., University of North Carolina at Charlotte, 1991; Ph.D., University of Maryland, 1997.	Professor, Criminology and Criminal Justice
Brami	Joseph	Full Member	B.A., University of Sorbonne-Nouvelle, Paris, 1974; M.A., 1976; Ph.D., New York University, 1984.	Professor Emeritus, French Modern Studies Professor Emeritus, French Studies
Branigan	Amelia	Full Member	Ph.D., Ohio State University	Associate Professor, Sociology
Brantlinger	Andrew	Full Member	B.A., Macalester College, 1991; M.Ed., University of Illinois-Chicago, 1997; Ph.D., Northwestern University, 2007.	Associate Professor, Teaching and Learning, Policy and Leadership Associate Professor, Curriculum and Instruction
Braun	Michael	Associate	B.A., Cornell University, 1977; Ph.D., Louisiana State University - Baton Rouge, 1983	Adjunct Professor, Biological Sciences
Bravo III	Jorge J.	Full Member	A.B., Princeton University, 1990; M.A., University of California, Berkeley, 1996; Ph.D., University of California, Berkeley, 2006	Associate Professor, Classics
Brewer	Carmen	Associate	B.A., Rutgers University-New Brunswick, 1972; M.A.,University of Maryland-College Park, 1974; Ph.D., 1981.	Lecturer
Brewer	Holly	Full Member	B.A., Harvard University, 1986; M.A., University of California, Los Angeles, 1989; Ph.D., 1994	Associate Professor, History
Brewer	Carmen	Adjunct Member	B.A., Douglass College, M.A., University of Maryland, Ph.D., University of Maryland, 1981	Lecturer, Clinical Audiology

Briber	Robert M.	Full Member	B.S.,Cornell University, 1979; M.S., University of Massachusetts-Amherst, 1981; Ph.D., 1984.	Professor, Materials Science and Engineering Professor, Biophysics Professor, Chemical Physics
Brick	Michael	Full Member	B.S. Mathematics, University of Dayton 1973); M.A. Statistics, American University 1976); Ph.D. Statistics, American University 1984)	Research Professor, Survey Methodology
Brighton	Stephen	Full Member	Ph.D., Boston University, 2005; B.A., Montclair State, 1992	Associate Chair, Anthropology Associate Professor, Anthropology
Briken	Volker	Full Member	Ph.D., University of Paris France 1998	n/a, Biological Sciences
Brill	Dieter	Full Member		Professor, Applied Mathematics & Statistics, and Scientific Computation
Brin	Michael I.	Full Member	B.A., Moscow State University, 1970; Ph.D., Kharkov State University, 1975.	Professor Emeritus, Mathematics
Broadbent	Andrew J.	Full Member	M.A., University of Cambridge, UK, 2002; Vet.M.B., University of Cambridge, UK, 2005; M.Sc., London School of Hygiene and Tropical Medicine, UK, 2006; Ph.D., Imperial College London, UK, 2010	Assistant Professor, Animal Sciences
Brooks	Laure Weber	Full Member	B.A., University of Maryland-College Park, 1980; M.A., 1982; Ph.D., 1986.	Instructor, Criminology and Criminal Justice
Brosnan	Patrick	Full Member	Ph.D. University of Chicago, 1998	Professor, Mathematics
Brower	Sidney	Full Member	B.Arch., University of Capetown, 1953;M.C.P., Massachusetts Institute of Technology, 1964.	Affiliate Professor, American Studies
brower	william S.	Special Member	B.S., University College, 2004; M.S., University of Cambridge, 2008	University Affiliate, Environmental Science and Technology
Brown	Amy	Non-Member	BS, University of Florida, 1975; MS, Michigan State University, 1980; PhD, University of Maryland, 1993	Professor Emerita, Entomology
Brown	Manami J.	Full Member	B.S., Morgan State University, 1975; M.S., Johns Hopkins University, 1993.	Director Senior Agent
Brown	Michael	Full Member	B.A., University of Keele, 1969; Ph.D., 1975.	Professor, Geology
Brown	Elizabeth Y.	Adjunct Member	B.S., Kent State University, 1965; M.Ed., 1967; Ed.D., University of Houston, 1973.	Instructor, Kinesiology

Brown	Tara	Full Member	Ed.D, Harvard University	Associate Professor, Teaching and Learning, Policy and Leadership Assistant Professor, Curriculum and Instruction
Brown	Madeline	Full Member	Ph.D., Stanford University, 2017; M.A., Stanford University, 2013	Assistant Professor, Anthropology
Brubaker	Kaye L.	Full Member	B.A.,Eastern Mennonite College, 1979; B.S., University of Maryland-College Park,1989; M.S., Massachusetts Institute of Technology, 1991; Ph.D., 1995.	Associate Professor, Civil and Environmental Engineering
Bruce	La Marr Jurelle	Full Member	B.A., Columbia University; Ph.D., Yale University	Assistant Professor, American Studies
Bruck	Hugh Alan	Full Member	B.S., University of South Carolina-Columbia, 1988; M.S., 1989; Ph.D.,California Institute of Technology, 1995. GCEN Academic Advisor for Mechanical Engineering Director of Graduate Studies	Associate Chair, Mechanical Engineering Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mechanical Engineering
Brunson	Rod K.	Full Member	B.S., Criminology and Criminal Justice, University of Missouri at St. Louis, 1996; M.A., Criminology and Criminal Justice, University of Missouri at St. Louis,1998; Ph.D., Criminal Justice, University of Illinois at Chicago, 2003.	Professor, Criminology and Criminal Justice
Brush	Stephen G.	Full Member	A.B., Harvard University, 1955 D.Phil., Oxford University, 1958.	Distinguished University Professor Emeritus, History
Brust	Gerald E.	Full Member	B.S., Ohio State University, 1980; M.S., Ohio State University, 1985; Ph.D., North Carolina State University, 1989.	Senior Agent
Bryan	Philip	Adjunct Member	Sc.B., Brown University., 1992; Ph.D., University of California-Berkeley, 1997	n/a, Biological Sciences
Bryant	Ray B.	Special Member	B.S. Texas Tech Univ. 1973;, M.S. 1977; Ph.D. Purdue Univ. 1981.	University Affiliate, Environmental Science and Technology
Bryer	Jackson R.	Full Member	B.A. Amherst College, 1959; M.A. Columbia University,1960; Ph.D. University of Wisconsin-Madison, 1965.	Professor Emeritus, English Language and Literature
Bub	Jeffrey	Full Member	B.Sc., University of Capetown, 1961; B.Sc., 1962; Ph.D., University of London, 1966.	Distinguished University Professor Emeritus, Philosophy

Buchanan	Robert L.	Full Member	B.S., Rutgers University, 1969; M.S., Rutgers University, 1971; Ph.D., Rutgers University, 1974	Professor Emeritus, Nutrition and Food Science
Bucher	Gregory	Full Member	B.A., University of California, San Diego, 1987; Ph.D., Brown University, 1997	Senior Lecturer, Classics
Buchtel	John	Adjunct Member	PhD, University of Virginia	Lecturer, Library and Information Science
Buonanno	Alessandra	Full Member	B.S., University of Pisa, Italy, 1993; Ph.D., University of Pisa, Italy, 1996;	Professor, Physics
Burghardt	Karin	Full Member	BS, University of Delaware, 2007; MS, Yale University, 2012; PhD, Yale University, 2016	Assistant Professor, Entomology
Burk	Amy O.	Full Member	B.S., James Madison University, 1995; M.S., Virginia Polytechnic Institute and State University, 1998; Ph.D., Virginia Polytechnic Institute and State University, 2001.	Professor, Animal Sciences
Burk	David	Graduate Teaching	Ph.D., University of Chicago, 2014	Lecturer, Applied Economics
Burke	Philip J.	Full Member	B.S., University of Scranton, 1963;M.S., 1965; Ph.D., Syracuse University, 1970.	Professor, Special Education
Burke	Juan	Full Member	MA, McGill University; PhD, McGill University	Assistant Professor, Architecture Assistant Professor, Urban and Regional Planning and Design
Butch	Nicholas	Full Member	B.S., Rutgers University-New Brunswick, 2001; M.S., University of California-San Diego, 2003; Ph.D., 2008.	Adjunct Assistant Professor, Physics
Butler	Lucas	Full Member	A.B., Harvard University, 2005; M.A., Stanford University, 2009; Ph.D., Stanford University, 2012	Assistant Professor, Human Development Assistant Professor, Neurosciences and Cognitive Science
Butler	Brian	Full Member	M.S., Carnegie-Mellon University, 1995; Ph.D., Carnegie-Mellon University, 1999	Associate Dean, Library and Information Science Professor, Library and Information Science
Butler	Mary Odell	Adjunct Member	Ph.D., Temple University, 1978; M.A., Temple University, 1974; B.S., Ohio. University, 1964	Adjunct Assistant Professor, Anthropology
Butler	James	Full	M.Ed., Temple University, 1994; D.P.H., University of Pittsburgh, 1999	n/a, Behavioral and Community Health
Butler Wingfield	Kim	Special Member	B.A. Harvard University, 1992, M.A. Johns Hopkins University, 1995, Ph.D. Johns Hopkins University, 2003	n/a, Art History and Archaeology

Butts	Daniel	Full Member	B.A., Oberlin College, 1994; Ph.D., University of California Berkeley, 2000.	Professor, Biophysics Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Associate Professor, Neurosciences and Cognitive Science Associate Professor, Biological Sciences
Cable	John Hart	Adjunct Member	B.Arch.,Clemson University, 1967; M.Arch., Catholic University of America, 1970.	Senior Research Engineer, Civil and Environmental Engineering
Cabrera	Natasha J.	Full Member	B.Sc. University of Toronto, 1985; M.A., 1989; Ph.D, University of Denver, 1995.	Professor, Human Development
Cabrera	Alberto	Full Member	B.S., National University of Mexico, 1979; M.S., University of Wisconsin-Madison, 1982; Ph.D., University of Wisconsin-Madison, 1987.	Professor Professor Emeritus, Higher Education
Caddick	Mark	Special Member	B.S., University of Bristol, 2000; Ph.D., University of Cambridge, 2004	University Affiliate, Geology
Cadou	Christopher	Full Member	B.S., Cornell University, 1989; M.S., University of California - Los Angeles, 1991; Ph.D., California State University - Los Angeles, 1996	Associate Professor, Aerospace Engineering
Cai	Jing	Full Member	Ph.D., University of California, Berkeley, Agricultural and Resource Economics, 2012M.A. University of California, Berkeley, Statistics, 2009M.S., Peking University, Finance, 2006B.S., Beijing Normal University, Computer Science, 2004	Associate Professor, Agricultural and Resource Economics
Caines	Colin	Graduate Teaching	Ph.D., University of British Columbia, 2016	Lecturer, Applied Economics
Calabrese	Richard V.	Full Member	B.S., University of Rochester, 1969; M.S.,University of Massachusetts-Amherst, 1971; Ph.D., 1976.	Professor, Applied Mathematics & Statistics, and Scientific Computation
Calvo	Ernesto	Full	Licenciado en Ciencia Politica, University of Buenos Aires, 1990; Ph.D. Political Science, Northwestern University, 2001	Professor, Government and Politics
Cameron	Maria	Full Member	Ph.D., University of California, Berkeley, 2007.	Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Associate Professor, Mathematics
Cameron	Sarah	Full Member	B.A., Stanford University, 1999; M.A., 2002; M.A., Yale University, 2006; Ph.D., 2010.	Associate Professor, History

Campangne	Herve Thomas	Full Member	B.A., Universite Francois Rabelais, Tours, France, 1984; M.A.,Rutgers University-New Brunswick, 1989; Ph.D., 1992.	Professor, French Modern Studies Professor, French Studies
Campbell	Patricia F.	Full Member	B.S., College of Saint Francis, 1970; M.S., Michigan State University, 1972; Ph.D.,Florida State University, 1976.	Professor Emerita, Teaching and Learning, Policy and Leadership Associate Professor, Curriculum and Instruction
Campbell	Gretchen	Full Member	B.A., Wellesley College, 2001; Ph.D., Massachusetts Institute of Technology, 2006.	Adjunct Assistant Professor, Physics
Candela	Philip A.	Full Member	B.S., City University of New York-Brooklyn College, 1977; Ph.D., Harvard University, 1982.	Professor Emeritus, Geology
Canty	Timothy	Full Member	BA, Physics, Hartwick College, 1994 MS, Physics, New Mexico Institute of Mining and Technology, 2000 PhD, Physics, New Mexico Institute of Mining and Technology, 2002	Director, Atmospheric and Oceanic Science Associate Professor, Atmospheric and Oceanic Science
Cao	Kan	Adjunct Member	B.S., Nanjing University/ Nanking University, 1997; Ph.D., Johns Hopkins University, 2005	Associate Professor, Biological Sciences
Caramello	Charles A.	Full Member	B.A. Wesleyan University, 1970; M.A. University of Wisconsin-Milwaukee, 1973; Ph.D. 1978.	Professor, English Language and Literature Affiliate Professor, American Studies
Caras	Melissa	Full Member	B.S., Brandeis University, 2007; Ph.D., University of Washington, 2013	n/a, Neurosciences and Cognitive Science
Carcelli	Shannon	Full Member	B.A., Carleton College, 2008; Ph.D., University of California, San Diego, 2018	Assistant Professor, Government and Politics
Cardoso	Fabiana De Freitas	Full Member	B.S., Federal University of Lavras, Brazil 2015l; M.S., Federal University of Lavras, Brazil 2018; Ph.D. University of Illinois at Urbana-Champaign 2022.	Assistant Professor, Animal Sciences
Cariani	Fabrizio	Full Member	Laurea (B.A.) University of Bologna 2003; Ph.D., University of California, Berkeley (2009)	Professor, Philosophy
Carignan	Craig	Adjunct Member	B.S., Massachusetts Institute of Technology, 1981; M.S., 1982; Sc.D., 1987.	Research Associate, Aerospace Engineering
Carleton	Karen	Full Member	B.S., Yale University, 1980; Ph.D., University of Colorado, 1987	Professor, Neurosciences and Cognitive Science Professor, Biological Sciences

Carlson	Richard Walter	Special Member	B.A., University of California-San Diego, 1976; Ph.D., University of California-San Diego, Scripps Institution of Oceanology, 1980	University Affiliate, Geology
Carpenter	Faedra	Full Member	B.A., Spelman College, 1992; M.A. Washington University, 1994; Ph.D., Stanford University, 2005.	Affiliate Associate Professor, Comparative Literature
Carpuat	Marine	Full Member		Associate Professor, Computer Science
Carr	Catherine E.	Full Member	B.Sc, University of Capetown, 1976; M.A.,State University of New York-Buffalo, 1977; Ph.D., University of California-San Diego, 1984.	Distinguished University Professor, Biological Sciences Professor, Neurosciences and Cognitive Science Professor, Biological Sciences
Carr	Meredith	Special Member	B.E., The Cooper Union, 2000; M.S., University of Illinois, 2002; Ph.D., University of Illinois, 2007	n/a, Civil and Environmental Engineering
Carretta	Vincent	Full Member	B.A. State University of New York-Binghamton, 1968; M.A. 1971; Ph.D. University of Iowa, 1977.	Professor Emeritus, English Language and Literature
Carroll	Mark J.	Full Member	B.S., California Polytechnic State University, 1979; M.S., Michigan State University, 1982; Ph.D., Cornell University, 1989.	Director, Plant Science Associate Professor, Plant Science
Carroll	James	Non-Member		Lecturer, Journalism
Carruthers	Peter	Full Member	B.A., University of Leeds, 1975; M.Phil., University of Leeds, 1977; D.Phil., University of Oxford, 1979	Professor, Neurosciences and Cognitive Science Professor, Philosophy Affiliate Professor, Second Language Acquisition
Carter-Pokras	Olivia	Full	B.S., Tulane University; M.H.S., Johns Hopkins University Bloomberg School of Public Health; Ph.D., Johns Hopkins University Bloomberg School of Public Health	Professor Emeritus, Epidemiology Professor Emeritus, Biostatistics
Carton	James A.	Full Member	B.S.E., Princeton University, 1976; M.S.,University of Washington, 1979; M.A., Princeton University, 1980; Ph.D., 1983.	Chair, Atmospheric and Oceanic Science Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Chemical Physics
Cartwright	Kent	Full Member	B.A., University of Michigan-Ann Arbor, 1965; M.A., Case Western Reserve 1968; PhD., 1979.	Professor Emeritus, English Language and Literature
Casey	Maud	Full Member	B.A., Wesleyan University, 1991; M.F.A., University of Arizona, 1995.	Professor, Creative Writing

Cassidy	Jude Anne	Full Member	B.A., Duke University, 1973; M.A.,University of Virginia, 1983; Ph.D., 1986.	Professor, Neurosciences and Cognitive Science Professor, Psychology
Castro	Mark S.	Full Member	B.A., Lawrence University, 1979; M.S., Florida Inst of Technology-Melbourne, 1984; Ph.D., University of Virginia, 1991.	Associate Professor, Marine, Estuarine, and Environmental Sciences
Caughey	John L.	Full Member	B.A.,Harvard University, 1963; M.A., University of Pennsylvania, 1967; Ph.D., 1970.	President Emeritus, American Studies
Cavigelli	Michel	Special Member	B.A., Oberlin College, 1984; M.S., Kansas State University, 1990; Ph.D., Michigan State University, 1998	University Affiliate, Environmental Science and Technology
Cañeque	Alejandro	Full Member	PhD, New York University, 1999	Professor, History
Celi	Roberto	Full Member	Laurea,Politecnico Di Torino-Italy, 1980; M.S., University of California-Los Angeles, 1982; Ph.D., 1987.	Professor, Aerospace Engineering
Cerrai	Sandra	Full Member	M.Sc. University of Pisa, 1992 Ph.D.; Scuola Normale Superiore of Pisa, 1998.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematical Statistics Professor, Mathematics
Chacko	Zackaria	Full Member	B.S., Indian Institute of Technology-Kharagpur, 1992; M.S., 1994; Ph.D., University of Maryland-College Park, 1999.	Associate Professor, Physics
Chadha	Kalyani	Full Member	B.A., Delhi University, 1988; M.A., Jawaharal Nehru University, 1990; Ph.D., University of Maryland, 1999.	Assistant Professor, Journalism
Chakraborty	Mita	Graduate Teaching	Ph.D., Cornell University, 1996	Lecturer, Applied Economics
Chambers	Robert G.	Full Member	B.S.F.S.,Georgetown University, 1972; M.S., University of Maryland-College Park, 1975;Ph.D., University of California-Berkeley, 1979.	Professor, Agricultural and Resource Economics
Chambers	Erve	Full Member	B.A., Western Washington University, 1969; M.A.,University of Oregon, 1972; Ph.D., 1973.	Affiliate Professor, American Studies
Chambliss	Marilyn J.	Full Member	B.A., University of California-Berkeley, 1964; B.A., San Jose State University, 1982 Ph.D., Stanford University, 1990.	Associate Professor Emerita, Teaching and Learning, Policy and Leadership

Chang	Peter C.	Full Member	B.S.,Texas A&M University-College Station, 1975; M.S.,University of Illinois-Urbana/Champaign, 1979; Ph.D., 1982.	Associate Professor, Civil and Environmental Engineering
Chang	Gang-Len	Full Member	B.E.,National Cheng Kung University-Taiwan, 1975; M.S., National Chiao Tung University-Hsinchu, 1979; Ph.D., University of Texas-Austin, 1985.	Professor, Civil and Environmental Engineering
Chang	Caren	Full Member	B.A.,University of California-Berkeley, 1982; Ph.D.,California Institute of Technology, 1988.	Professor, Biological Sciences Affiliate Professor, Plant Science
Chang	Wonjun	Graduate Teaching	Ph.D., University of Wisconsin-Madison, 2017	Lecturer, Applied Economics
Chao	John C.	Full Member	B.S., University of Pennsylvania, 1987; Ph.D., Yale University, 1994.	Professor, Economics
Chao	Shenn-Yu	Full Member	B.S., Tsinghua University Taiwan 1971; M.S., University of Utah, 1975;Ph.D., North Carolina State University, 1979.	Professor, Marine, Estuarine, and Environmental Sciences
Chaverri	Priscila	Full Member	B.S., Instituto Tecnologica de Costa Rica, 1993; Ph.D. Pennsylvania State University, 2005.	Adjunct Associate Professor, Biological Sciences Affiliate Professor, Biological Sciences
Chazan	Daniel	Full Member	A.B., M.A., Brandeis University, 1981; M.A., Harvard Graduate School, 1982; M.A., Worcester Polytechnic, 1984; M.A., Ed.D., Harvard Graduate School of Education, 1989;	Professor, Teaching and Learning, Policy and Leadership Professor, Curriculum and Instruction
Chellappa	Ramalingam	Full Member	B.E., University of Madras,1975; M.S., Indian Institute of Science-Bangalore, 1977; M.S.E.E., Purdue University, 1978; Ph.D., 1981.	Professor, Electrical and Computer Engineering Professor Emeritus, Electrical and Computer Engineering Affiliate Professor, Computer Science
Chembo	Yanne	Full Member	B.S., University of Yaounde, 1997; B.S., National Advanced School of Posts and Telecommunications, 2001; M.S., University of Yaounde, 2001; Ph.D., University of Yaounde, 2005	Associate Professor, Electrical and Computer Engineering
Chen	Gilad	Full Member	BA, Pennsylvania State University; Doctoral degree from George Mason University in 2001	Professor
Chen	Feng	Full Member	B.S., The Ocean University of Qingdao, 1985; M.S., The First Institute of Oceanography, 1988; Ph.D., The University of Texas at Austin, 1995	Associate Professor, Marine, Estuarine, and Environmental Sciences

Chen	Zhi-Long	Full Member	B.S., Fudan University, 1988; M.S., Fudan University, 1991; M.A., Princeton University, 1995; Ph.D., Princeton University, 1997.	Professor
Chen	Yu	Full Member	B.S., Peking University, 1997; M.S., University of Pennsylvania, 2001; Ph.D., 2003	Associate Professor, Bioengineering
Chen	Jie	Full Member	B.S., Shanghai University, 2001; M.A., SUNY-Stony Brook, 2006; Ph.D., SUNY-Stony Brook, 2008	Associate Professor, Health Administration Associate Professor, Health Equity Associate Professor, Health Policy Analysis and Evaluation Associate Professor, Health Services
Chen	Shuo	Special Member	Ph.D, Biostatistics Emory University, 2012; M.S., Public Health, Emory University; M.S., Mathematics and Statistics, East Tennessee State University; B.S., Electrical Engineering, Harbin Institute of Technology, Harbin, China	Associate Professor, Applied Mathematics & Statistics, and Scientific Computation
Chen	Briella Baer	Graduate Teaching	B.S., Denison University, 2015; M.H.S., John Hopkins University, 2016	n/a, Special Education
Chengri	Ding	Full Member	B.S., Beijing Normal University, 1986; M.S., Sinica Academy of Sciences, 1989; Ph.D., University of Illinois at Urbana-Champaign, 1996.	Professor, Community Planning
Chernela	Janet	Full Member	B.A., University of Wisconsin-Madison, 1965; M.A. Columbia University, 1978; Ph.D. Columbia University, 1983	Professor, Anthropology Affiliate Professor, Women's Studies
Chico	Tita	Full Member	A.B., Vassar College, 1991; M.A., New York University, 1994; Ph.D., 1998.	Professor, English Language and Literature Affiliate Professor, Women's Studies
Childs	Andrew	Full Member	B.S., California Institute of Technology, 2000; Ph.D., Massachusetts Institute of Technology, 2004	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Computer Science Affiliate Professor, Physics
Ching	Edith	Adjunct Member		Adjunct Professor, School Librarianship
Chinoy	Ira	Full Member	A.B., Harvard College; Ph.D., University of Maryland, 2010	Associate Professor, Journalism

Choe	Eun Kyoung	Adjunct Member	Ph.D., University of Washington, 2014	Assistant Professor, Human-Computer Interaction Assistant Professor, Information Management Assistant Professor, Information Studies Assistant Professor, Library and Information Science
Choi	Kyu Yong	Full Member	B.S., Seoul National University, 1976; M.S.,1978; Ph.D., University of Wisconsin-Madison, 1984.	Professor, Chemical Engineering
Choi	Young Tai	Full Member		Assistant Research Scientist, Aerospace Engineering
Choi	Joonkyu	Graduate Teaching	Ph.D., University of Maryland at College Park, 2018	Lecturer, Applied Economics
Chopra	Inderjit	Full Member	B.Sc.,Punjab Engineering College-Chandigarh, India, 1965; M.Eng.,Indian Institute of Science-Bangalore, 1968; Sc.D., Massachusetts Institute of Technology, 1977.	Distinguished University Professor, Aerospace Engineering
Chopra	Nikhil	Full Member	Bachelor of Technology Honors Mechanical Engineering, Indian Institute of Technology, Kharagpur, India, 2001; Ph.D., Systems and Entrepreneurial Engineering, University of Illinois at Urbana-Champaign, 2006.	Associate Professor, Mechanical Engineering Assistant Professor, Systems Engineering
Christou	Aristos	Full Member	B.A., Columbia University, 1967; Ph.D., University of Pennsylvania, 1971.	Professor, Materials Science and Engineering Professor, Mechanical Engineering Professor, Reliability Engineering
Chronis-Tuscano	Andrea M.	Full Member	B.A., Loyola University Chicago, 1993; M.A., State University of New York at Buffalo, 1998; Ph.D., State University of New York at Buffalo, 2002.	Professor, Psychology
Chuang	Julia	Full Member	Ph.D., Ohio State University	Associate Professor, Sociology
Chung	Wilbur C.	Full Member	B.S., Carnegie Mellon University, 1996; M.B.A., Carnegie Mellon University, 1990; Ph.D., University of Michigan, 1999.	Associate Professor
Chung	Peter	Full Member	B.S., 1994, University of Virginia; M.S., 1996, University of Minnesota; Ph.D., 1999, University of Minnesota	Associate Professor, Mechanical Engineering
Chung	Patrick	Full Member	B.A., Pennsylvania State University, 2009; M.A., Brown University, 2011; Ph.D., Brown University, 2017	Assistant Professor, History

Cirillo	Cinzia	Full Member	M.S., University of Naples-Italy, 1994. Ph.D., University of Torino, 1998.	Assistant Professor, Civil and Environmental Engineering
Clark	Jane E.	Full Member	B.S., State University of New York-College at Brockport, 1968; M.Ed.,University of Washington, 1970; Ph.D., University of Wisconsin-Madison, 1976.	Professor, Physical Activity Professor Emerita, Kinesiology
Clark	Charles	Adjunct Member	B.A., Western Washington University, 1974; Ph.D., University of Chicago, 1979.	Adjunct Professor, Physics Adjunct Professor, Chemical Physics
Clark	Lawrence	Full Member	B.A., Emory University, 1989; M.Ed., Emory University, 1998; Ph.D., Emory University, 2004.	Associate Professor, Curriculum and Instruction
Clayton	Cassandra	Non-Member	B.A., Spelman College	Lecturer, Journalism
Cleaveland	Walter Rance	Full Member	B.S., Duke University, 1982; M.S., Cornell University, 1985; Ph.D., Cornell University, 1987.	Professor, Systems Engineering Professor, Computer Science
Clegg	Tamara	Full Member	B.S., North Carolina State University, 2002; Ph.D. Georgie Institute of Technology, 2009	Associate Professor, Teaching and Learning, Policy and Leadership Assistant Professor, History and Library & Information Science Assistant Professor, Human-Computer Interaction Assistant Professor, Information Management Assistant Professor, Information Studies Assistant Professor, Library and Information Science Assistant Professor, School Librarianship Assistant Professor, Youth Experience Assistant Professor, Curriculum and Instruction
Clement	David L.	Full Member	B.A., Wittenberg University, 1978; M.S., Rutgers University-New Brunswick, 1980; Ph.D., Purdue University, 1984.	Principal Agent
Clough	Lauretta	Adjunct Member	B.A., Williams College; M.A., Ph.D., University of Maryland.	University Affiliate, French Modern Studies
Clyne	Alisa M.	Full Member	B.S., Stanford University, 1996; Ph.D., Massachusetts Institute of Technology, 2006.	Professor, Bioengineering
Coale	Frank J.	Full Member	B.S., University of Maryland-College Park, 1981; M.S., University of Kentucky-Lexington, 1983; Ph.D., 1986.	Professor, Environmental Science and Technology
Cochran	Diana	Associate	B.S., Auburn University, 2005; M.S., Auburn University, 2007; Ph.D., Missippissi State University, 2012.	Director, Plant Science Assistant Clinical Professor, Plant Science Associate Clinical Professor, Extension Education

Codispoti	Louis A.	Full Member	B.S. Fordham University, 1962; M.S. University of Washington, 1966; Ph.D., University of Washington, 1973	Research Professor, Marine, Estuarine, and Environmental Sciences
Cohen	Joel M.	Full Member	Sc.B., Brown University, 1963; Ph.D.,Massachusetts Institute of Technology, 1966.	Professor, Mathematics
Cohen	Philip	Full Member	B.A., University of Michigan,Ann Arbor,1992; M.A., University of Massachusetts, Amherst, 1995; Ph.D., University of Maryland, College Park, 1999	Professor, Sociology Graduate Director, Sociology
Cohen	Thomas D.	Full Member	A.B., Harvard University, 1980; Ph.D., University of Pennsylvania, 1985.	Associate Chair, Physics Distinguished Scholar-Teacher, Physics Professor, Physics
Cohen	Avis H.	Full Member	B.S., University of Michigan-Ann Arbor, 1964; Ph.D., Cornell University, 1977.	Professor Emerita, Biological Sciences
Cohen	William A.	Full Member	B.A., Swarthmore College, 1985; Ph.D., University of California-Berkeley, 1993.	Professor, English Language and Literature Affiliate Professor, Comparative Literature
Cohen	Helene Kalson	Adjunct Member	B.A. University of Michigan,1975; M.Ed. Lesley University,1978; Ed.D., Harvard University, 1990	University Affiliate
Cohen	Jeffrey	Special Member	B.A., University of Pennsylvania, 1976; M.D., Johns Hopkins University, 1981	n/a, Biological Sciences
Colantuono	Anthony	Full Member	B.A.,Rutgers University-New Brunswick, 1980; M.A., Johns Hopkins University, 1982; Ph.D., Johns Hopkins University, 1987.	Professor, Art History and Archaeology
Coleman	Linda K.	Full Member	A.B., University of Michigan-Ann Arbor, 1973; M.A., 1973; Ph.D., University of California-Berkeley, 1982.	Associate Professor, English Language and Literature Associate Professor, Neurosciences and Cognitive Science
Coleman	Gary D.	Full Member	B.S., Colorado State University, 1978; M.S., 1986; Ph.D., University of Nebraska-Lincoln, 1989.	Associate Professor, Plant Science
Coles	Victoria J.	Special Member	B.S., University of California at San Diego, 1991; Ph.D., University of Miami, 1998	Research Assistant Professor, Marine, Estuarine, and Environmental Sciences
Coles	Kimberly	Full Member	B.A., Columbia, University, 1994; M.A.,1996; M.Phil., Oxford University, 1998; D.Phil., 2003.	Associate Professor, English Language and Literature

Coles	Kim	Full Member	B.A. Columbia University, 1994; M.A. Columbia University, 1996; M.Phil, University of Oxford, 1998; D.Phil, St. Catherine's College, Oxford, 2003	Affiliate Associate Professor, Women's Studies
Coletti	Theresa M.	Full Member	B.A.,University of Pittsburgh, 1971; M.A., University of Rochester, 1973; Ph.D.,University of Rochester, 1975.	Professor, English Language and Literature Affiliate Professor, Women's Studies
Collier	Michael R.	Full Member	B.A., Connecticut College, 1976; M.F.A.,University of Arizona, 1979.	Director, Creative Writing Professor, English Language and Literature Professor, Creative Writing
Collins	Merle	Full Member	B.A., University of the West Indies-Mona, Jamaica, 1972;M.A., Georgetown University, 1980; Ph.D.,London School of Economics & Political Science, 1990.	Professor, English Language and Literature Professor, Comparative Literature Affiliate Professor, Women's Studies
Collins	Patricia Hill	Full Member	B.A., Brandeis University, 1969; M.A.T. Harvard University, 1970; Ph.D. Brandeis University, 1984.	Distinguished University Professor Emeritus, Sociology
Collins	Allen	Adjunct Member	B.A., Amherst College, 1987; Ph.D. University of California Berkeley, 1999.	Adjunct Professor, Biological Sciences
Collis	Shannon	Full Member	Bachelor of Visual Communication Design from University of Alberta, Edmonton 2001; M.F.A. in Printmaking, University of Alberta, 2005; Certificate in Digital Technologies, Concordia University, 2009	Assistant Professor, Art Studio Graduate Director, Art Studio
Colombini	Marco	Full Member	B.S., McGill University-Montreal, 1970; Ph.D., 1974.	Professor Emerita, Biological Sciences
Colwell	Rita R.	Full Member	B.S., Purdue University, 1956; M.S., 1958; Ph.D., University of Washington, 1961.	Distinguished University Professor, Biological Sciences
Conrad	Frederick G.	Full Member	B.A., Hampshire College, 1978; Ph.D., University of Chicago, 1986	Research Professor, Survey and Data Science (online) Research Professor, Survey Methodology
Conway	Daniel	Full Member	B.S., State University of New York-Brockport, 1978; M.F.A., George Washington University, 1982.	Professor
Cook	Steven	Special Member	BS, University of Utah, 2000; PhD, University of Utah, 2007	Research Scientist, Entomology
Cooke	Todd J.	Full Member	B.S.,Antioch College, 1974; Ph.D., Cornell University, 1979.	Professor, Biological Sciences Affiliate Professor, Plant Science

Cooper	Lee	Full Member	B.A., University of California Santa Cruz, 1978; M.S., University of Washington, 1980; Ph.D., University of Alaska, 1987.	Research Professor, Marine, Estuarine, and Environmental Sciences
Cooper	Thomas	Special Member	B.S., Bloomsburg University of Pennsylvania, 1993; M.S., South Dakota State University, 1996; Ph.D., South Dakota State University, 2005	University Affiliate, Environmental Science and Technology
Cooperman	Bernard Dov	Full Member	B.A., University of Toronto, 1968; M.A., Brandeis University, 1969; M.A., Harvard University, 1972; Ph.D., 1976.	Associate Professor, History Associate Professor, Jewish Studies
Coplan	Michael A.	Full Member	B.A., Williams College, 1960; Ph.D., Yale University, 1963.	Professor, Chemical Physics
Corbin	Christy T.	Adjunct Member	B.A., Connecticut College, 1980; M.S., East Carolina University-Greenville, 1984; Ph.D., University of Maryland-College Park, 1996.	Assistant Clinical Professor, Human Development
Cornwell	Jeffrey C.	Full Member	B.S., Hobart and William Smith Colleges, 1976; Ph.D.,University of Alaska-Fairbanks, 1983. MEES	Research Associate Professor, Marine, Estuarine, and Environmental Sciences
Corrada Bravo	Hector	Full Member	B.M. Peabody Institute, 1997;Ph.D. University of Wisconsin, 2008	Associate Professor, Computer Science Affiliate Associate Professor, Biological Sciences
Corridon	Cassandra S.	Full Member	B.S., University of Maryland-College Park, 1972 M.S., Hood College, 1982.	Specialist
Corrigan	Catherine M.	Special Member	B.S., Michigan State University, 1995; M.S., Michigan State University, 1998; Ph.D., Case Western Reserve University, 2004.	University Affiliate, Geology
Corsi	Thomas M.	Full Member	B.A., Case Western Reserve University, 1971; M.A., Kent State University, 1974;Ph.D., University of Wisconsin, 1976.	Professor
Coughlin	Peter J.	Full Member	B.A., State University of New York-Albany, 1973; M.A., 1974; Ph.D., 1976.	Associate Professor, Economics Associate Professor, Applied Mathematics & Statistics, and Scientific Computation
Couper	Mick P.	Full Member	B.Soc.Sc., Univerity of Cape Town, 1978; M.A., University of Michigan, 1989; Ph.D., Rhodes University, 1990.	Research Professor, Survey and Data Science (online) Research Professor, Survey Methodology
Craig	Patrick M.	Full Member	B.F.A., Western Michigan University, 1974; M.F.A., University of Cincinnati, 1976.	Associate Professor, Art Studio
Croco	Sarah E.	Full Member	B.A., University of Illinois; Ph.D., University of Michigan, 2008	Assistant Professor, Government and Politics

Croninger	Robert G.	Full Member	B.A., Valparaiso University, 1973; M.A., College of William & Mary, 1976;Ph.D., University of Michigan-Ann Arbor, 1997.	Associate Chair, Curriculum and Instruction Associate Professor, Policy Studies Associate Professor Emeritus, Teaching and Learning, Policy and Leadership
Cronrath	David	Full Member	B.Arch., Pennsylvania State University, 1971; M.Arch., University of California-Berkeley, 1976.	Professor, Architecture
Cropper	Maureen L.	Full Member	B.A., Bryn Mawr College, 1969; M.A., Cornell University, 1972; Ph.D., 1973.	Distinguished University Professor, Economics Affiliate Professor, Agricultural and Resource Economics
Cruz-Cano	Raul	Associate	B.S., Autonomous University of Chihuahua, 1999; M.S., University of Texas at El Paso, 2002; Ph.D., University of Texas at El Paso, 2005	Associate Research Professor, Epidemiology Associate Research Professor, Biostatistics
Cui	Qingbin	Full Member	BE in Construction Engineering Management, Tianjin University, 1993; MS in Technology Economics, Tianjin University, 2000; PhD in Civil Engineering, Purdue University, 2005	Associate Professor, Civil and Environmental Engineering
Cukier	Michel	Full Member	Ph.D., National Polytechnic Institute of Toulouse, France, 1996	n/a, Electrical and Computer Engineering Associate Professor, Mechanical Engineering Associate Professor, Reliability Engineering Associate Professor, Systems Engineering Affiliate Associate Professor, Computer Science
Culver	James N.	Full Member	B.S.,Oklahoma State University-Stillwater, 1985; M.S., Oklahoma State University, 1987; Ph.D., University of California-Riverside, 1991.	Professor, Plant Science Affiliate Professor, Biological Sciences
Culver	James	Full Member	B.S., Oklahoma State University, 1985; M.S., Oklahoma State University, 1987; Ph.D., University of California-Riverside, 1991	Affiliate Professor, Bioengineering
Cumings	John	Full Member	Ph.D. University of California, Berkeley 2002	Associate Professor, Materials Science and Engineering Assistant Professor, Chemical Physics

Cummings	Michael P.	Full Member	Ph.D., Harvard, 1992.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Biological Sciences Professor, Computer Science
Cummings	Kelli Dawn	Full Member	B.A., Oregon State University, 1999; M.S., University of Oregon, 2003; Ph.D., University of Oregon, 2004.	Assistant Professor, Special Education
Cunniff	Patrick F.	Full Member	B.C.E., Manhattan College, 1955; M.S., Virginia Polytechnic Institute & State University, 1956; Ph.D., 1962.	Professor Emeritus, Mechanical Engineering
Cunningham	Kathleen	Full Member	B.A., University of California, San Diego, 1999; M.A., University of California, San Diego, 2002; Ph.D., University of California, San Diego, 2007.	Associate Professor, Government and Politics
Cunningham	David	Full Member	B.A., Wake Forest University, 1998; M.S., George Mason University, 2001; Ph.D., University of California, San Diego, 2006.	Associate Professor, Government and Politics
Currie	Douglas	Full Member	B.E.P., Cornell University, 1958; Ph.D.,University of Rochester, 1962.	Professor Emeritus, Physics Senior Research Scientist, Physics
Curry	Larissa Morgan	Non-Member	B.A., 2003; Rutgers University, B.A., 2011; Towson University, Au.D. 2015, James Madison University	Assistant Clinical Professor, Clinical Audiology
Cypess	Sandra M.	Full Member	B.A., Brooklyn College, 1963; M.A., Cornell University, 1965; Ph.D., University of Illinois-Urbana/Champaign, 1968.	Professor Emerita, Spanish Language and Literature
Czaja	Wojciech	Full Member	M.Sc., University of Wroclaw, 1995; M.A., Washington University, 1997; Ph.D., Washington University, 2000.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematics
Dachman-Soled	Dana	Full Member	B.A., Yeshiva University, 2006; M.S., Columbia University, 2008; Ph.D., 2011	Associate Professor, Electrical and Computer Engineering
Dagenais	Mario	Full Member	B.Sc., Universite de Montreal,1974; M.S., University of Rochester, 1976; Ph.D., 1978.	Professor, Electrical and Computer Engineering Professor, Chemical Physics
Dalglish	Lucy A.	Full Member	B.A., University of North Dakota, 1980; J.D., Vanderbilt University, 2005	Dean, Journalism

Dallal	Cher	Full	B.A., University of California at Berkeley, 1998; M.P.H., Yale University School of Public Health, 2002; M.S., University of Southern California, 2005; Ph.D., University of Pittsburgh Graduate School of Public Health, 2009	Associate Professor, Epidemiology Associate Professor, Biostatistics
Dally	James W.	Full Member	B.S.,Carnegie Institute of Technology, 1951; M.S., 1953; Ph.D., Illinois Institute of Technology, 1958.	Professor Emeritus, Mechanical Engineering
Danesh	Erfan	Graduate Teaching	Ph.D., University of Toronto, 2016	Lecturer, Applied Economics
Daniels	Kevin M.	Full Member	B.S., University of South Carolina-Columbia, 2009; M.Eng., University of South Carolina-Columbia, 2012; Ph.D., University of South Carolina-Columbia, 2014	Assistant Professor, Electrical and Computer Engineering
Danko	Christina	Associate	M.A., University of Colorado, 2008; Ph.D., DePaul University, 2014	Director, Clinical Psychological Science Assistant Clinical Professor, Clinical Psychological Science
Darden	Lindley	Full Member	B.A., Rhodes College, 1968; A.M., University of Chicago, 1969; S.M., 1972; Ph.D., 1974.	Distinguished Scholar-Teacher, Philosophy Professor Emerita, Philosophy Research Professor, Philosophy Affiliate Professor, Biological Sciences
Das	Siddhartha	Full Member	B.S., Indian Institute of Technology-Kharagpur, 2005; Ph.D. Indian Institute of Technology-Kharagpur, 2010	Associate Professor, Mechanical Engineering
Das	Diganta	Adjunct Member	B.S., Indian Institute of Technology-Kharagpur, 1987; M.S. Missouri University of Science and Technology, 1992; Ph.D. University of Maryland College Park, 1999	Associate Research Scientist, Mechanical Engineering Associate Research Scientist, Reliability Engineering
Das Gupta	Monica	Full Member	B.Sc., 1973, London School of Economics; M.Sc., 1974, London School of Economics; Ph.D., 1982, University of Sussex	Research Professor, Sociology
Das Sarma	Sankar	Full Member	B.S., Presidency College-Calcutta, 1973 Sc.M., Brown University, 1976; Ph.D., 1979.	Distinguished University Professor, Physics
Dasgupta	Abhijit	Full Member	B.S., Indian Institute of Technology-Madras, 1976; M.S., Villanova University, 1981; Ph.D., University of Illinois-Urbana/Champaign, 1988.	Professor, Mechanical Engineering Professor, Reliability Engineering

Datta	Anubhav	Full Member	B.Tech (Aerospace Engineering), Indian Institute of Technology, Kharagpur, 1998; Ph.D (Aerospace Engineering), University of Maryland, 2004.	Associate Professor, Aerospace Engineering
Daume	Hal	Full Member	B.S., Carnegie Mellon University, 2001; M.S., University of Southern California, 2003; PhD, University of Southern California, 2006.	Professor, Computer Science
Davidsburg	Joshua	Non-Member	B.A., University of Maryland	Lecturer, Journalism
Davidson	Neil A.	Full Member	B.S., Case Western Reserve University, 1961; M.S., University of Wisconsin-Madison, 1963; Ph.D., 1970; M.Ed., University of Maryland-College Park, 1982.	Professor Emeritus, Teaching and Learning, Policy and Leadership
Davidson	Eric	Non-Member	BA, Oberlin College, 1978; PhD, North Carolina State University, 1986	Affiliate Professor, Entomology
Davis	Jeffery T.	Full Member	B.A., Colby College, 1981;Ph.D., Massachusetts Institute of Technology, 1987.	Professor, Chemistry
Davis	Christopher C.	Associate	B.A., Cambridge University, 1965; M.A., 1970; Ph.D., Manchester University, 1970.	Professor, Chemical Physics
Davis	Larry S.	Full Member	B.A., Colgate University, 1970; M.S., University of Maryland-College Park, 1972; Ph.D., 1976.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Computer Science
Davis	Allen P.	Full Member	B.S.,University of Delaware, 1984; M.S., 1986; Ph.D., 1989.	Professor, Civil and Environmental Engineering
Davis	Crystal U.	Full Member	B.A., Emory University, 2000; M.F.A, Texas Woman's University, 2003; M.A., New York University, 2004.	n/a, Dance
Davoudi	Zohreh	Full Member	B.Sc., Sharif University of Technology, 2007; M.Sc., Sharif University of Technology, 2009; Ph.D., University of Washington, 2014	Assistant Professor, Physics
Dawkins	Casey	Full Member	BS, Georgia Institute of Technology, 1995; MCP, Georgia Institute of Technology, 1999; PhD, Georgia Institute of Technology, 2003	Director, Urban and Regional Planning and Design Professor, Urban and Regional Planning and Design Professor, Community Planning
Dayie	Kwaku	Full Member	B.A. Physics,1990, Hamilton College; PhD., Biophysics, 1996, Harvard University	Associate Professor, Biochemistry Associate Professor, Biophysics Associate Professor, Chemistry

De Floriani	Leila	Full Member	Ph.D., Universita Delgi Studie de Peruguia, 1977	Professor, Geographical Sciences Adjunct Professor, Computer Science
De La Paz	Susan C.	Full Member	B.S., Northwestern University, 1984; M.S., University of Michigan, 1986; Ph.D., University of Maryland, 1995.	Professor, Special Education
De Leo	Pierre	Full Member	B.A., University of Milan-Bicocca, 2011; M.A., University of Milan-Bicocca, 2013; M.A., Boston College, 2014; Ph.D., Boston College, 2019.	Assistant Professor, Economics
De León	Jason	Special Member	PhD, Pennsylvania State University, 2008; MA, Pennsylvania State University, 2004, BA, University of California, Los Angeles, 2001.	Research Professor, Anthropology
De Lorenzo	William E.	Full Member	B.A.,Montclair State University, 1959; M.A., 1964; Ph.D., Ohio State University-Columbus, 1971.	Associate Professor Emeritus, Teaching and Learning, Policy and Leadership
De Los Reyes	Andres	Full Member	B.S. Criminal Justice B.A. Political Science B.A. Psychology) Florida International University, 2001; Ph.D., University of Illinois, Chicago, 2008	Professor, Psychology
Deane	Anil E.	Full Member	B. Tech., Indian Inst. of Tech, 1979, M.S.; Virginia Polytech Inst and State University, 1981, Ph.D.;University of Colorado, 1987	Associate Research Professor, Applied Mathematics & Statistics, and Scientific Computation
Dearstyne	Bruce W.	Adjunct Member	B.A., Hartwick College, 1966; Ph.D., Syracuse University, 1974.	Lecturer, History and Library & Information Science Lecturer, Human-Computer Interaction Lecturer, Information Management Lecturer, Information Studies Lecturer, Library and Information Science
Debonis	Rocco	Adjunct Member	MLS, University of Maryland; MFA, University of Virginia.	Lecturer, Library and Information Science
Dedova	Larissa	Full Member	M.Mus., Moscow State Conservatory, 1974; Ph.D., 1977.	Professor, Ethnomusicology Professor, Music Professor, Music Education
DeLio	Thomas J.	Full Member	B.Mus., New England Conservatory of Music, 1972; Ph.D., Brown University, 1979.	Professor, Ethnomusicology Professor, Music Professor, Music Education
Dellomo	Michael	Full Member	B.S., Rensselaer Polytechnic Institute, 1979; M.A., Johns Hopkins University, 1980; Ph.D., Johns Hopkins University, 1984.	Associate Director, Telecommunications Advisor, Telecommunications

Delwiche	Charles Francis	Full Member	B.A.,University of California-Berkeley, 1984; Ph.D.,University of Wisconsin-Madison, 1990.	Professor, Biological Sciences
Demaria	Laura	Full Member	B.A. Universidad Nacional de Cordoba, Argentina, 1988; M.A. Washington University, St. Louis, Missouri, 1990; Ph.D. Washington University, St. Louis, Missouri, 1997.	Professor, Spanish Language and Literature Graduate Director, Spanish Language and Literature
Denny	Karen	Non-Member		Lecturer, Journalism
Desai	Sonalde B.	Full Member	B.A., University of Bombay, 1978; M.A., Case Western Reserve University, 1980; Ph.D., Stanford University, 1987.	Distinguished University Professor, Sociology Affiliate Professor, Women's Studies
DeShong	Philip R.	Full Member	B.S., University of Texas-Austin, 1971; Ph.D., Massachusetts Institute of Technology, 1976.	Professor, Chemistry
Deshpande	Amol	Full Member	Ph.D., University of California at Berkeley, 2004	Professor, Computer Science
Desmond	Sharon M.	Full Member	B.A., University of Toledo, 1982; M.S., 1984; Ph.D., 1988.	Associate Professor, Behavioral and Community Health
DeStefano	Jeffrey J.	Full Member	B.S.,University of Connecticut-Storrs, 1983; Ph.D., 1990.	Professor, Biological Sciences
Destler	I. M. Mac	Full Member	B.A., Harvard University, 1961; M.Public Affairs, Princeton University, 1965; Ph.D., 1971.	Professor Emeritus
DeVoe	Donald Lad	Full Member	B.S., University of Maryland-College Park, 1991; M.S., 1993; Ph.D., University of California-Berkeley, 1997.	Associate Chair, Mechanical Engineering Professor, Mechanical Engineering Affiliate Professor, Bioengineering
Diakopoulos	Nicolas	Full Member	Sc.B., Brown University; M.S., Georgia Institute of Technology; Ph.D., Georgia Institute of Technology	Assistant Professor, Journalism
Dickerson	Russell R.	Full Member	B.A., University of Chicago, 1975; M.S.,University of Michigan-Ann Arbor, 1978; Ph.D., 1980.	Professor, Chemistry
Dickerson	John	Full Member	BSc Mathematics, UMD 2008; BSc Computer Science, UMD 2008; MSc Computer Science, Carnegie Mellon 2014; PhD Computer Science, Carnegie Mellon 2016	Assistant Professor, Applied Mathematics & Statistics, and Scientific Computation
Dickey	Seth Wayne	Full Member	B.S., Michigan State University. Ph.D., Johns Hopkins University School of Medicine	n/a, Veterinary Medical Sciences

Diemer	Benedikt	Full Member	M.S., University of Manchester, 2008; Ph.D., University of Chicago, 2015.	Assistant Professor, Astronomy
Diker	Vedat	Adjunct Member	PhD, SUNY - Albany	Director, Library and Information Science Senior Lecturer, Information Management Senior Lecturer, Information Studies
Dill	Bonnie T.	Full Member	B.A.,University of Rochester, 1965; M.A., New York University, 1970; Ph.D., New York University, 1979.	Professor, Women's Studies Affiliate Professor, American Studies Affiliate Professor, Sociology
DiLutis	Robert	Full Member	Julliard School	Associate Professor, Ethnomusicology Associate Professor, Music Associate Professor, Music Education
diMarzo	Marino	Full Member	Dr.Ing., University of Naples-Italy, 1976; Ph.D., Catholic University of America, 1982. GCEN Academic Advisor for Fire Protection Engineering	Professor, Mechanical Engineering
Dimitrakopoulos	Panagiotis	Full Member	Diploma, National Technical University of Athens, 1991; M.S., University of Illinois, Urbana-Champaign, 1996; Ph.D., University of Illinois, Urbana-Champaign, 1998.	Associate Professor, Chemical Engineering Associate Professor, Chemical Physics
Ding	Chengri	Full Member	B.S., Beijing Normal University, 1986; M.S., Sinica Academy of Sciences, 1989; Ph.D., University of Illinois at Urbana-Champaign, 1996.	Professor, Urban and Regional Planning and Design
Dinman	Jonathan D.	Full Member	A.B., Oberlin College, 1980; Ph.D., Johns Hopkins University, M.D.-Ph.D., 1989	Professor, Biological Sciences
Dively	Galen	Full Member	BS, Juniata College, 1966; MS, Rutgers University, 1968; PhD, Rutgers University, 1974	Professor Emeritus, Entomology
Doan	Long	Full Member	Ph.D., Ohio State University	Associate Professor, Sociology Affiliate Assistant Professor, Women's Studies
Dockins	Paul Christen	Graduate Teaching	Ph.D., Duke University, 1996	Lecturer, Applied Economics
Dodge	Georgina	Associate	B.S., University of California Irvine, 1991; M.S., University of California Los Angeles, 1993; Ph.D., University of California Los Angeles, 1995	n/a, Civil and Environmental Engineering
Doermann	David Scott	Associate	B.S., Bloomsburg University of Pennsylvania, 1986; M.S., University of Maryland-College Park, 1989; Ph.D., 1993.	Research Scientist
Doherty	Lillian E.	Full Member	B.A., St. Mary's College, 1974; M.A., University of Chicago, 1977; Ph.D., University of Chicago 1982.	Affiliate Professor, Women's Studies Affiliate Professor, Comparative Literature

Dolbilov	Mikhail	Full Member	M.A., Voronezh University Russia 1993; Ph.D., 1996	Associate Professor, History
Dolgopyat	Dmitry	Full Member	Diploma, Moscow State University, 1994; Ph.D., Moscow State University, 1997.	Professor, Mathematical Statistics Professor, Mathematics
Donawerth	Jane L.	Full Member	B.A., Miami University-Oxford, 1969; M.A.,University of Wisconsin-Madison, 1970; Ph.D., 1975.	Professor, Comparative Literature Professor Emerita, English Language and Literature Affiliate Professor, American Studies
Doniger	Cynthia	Graduate Teaching	Ph.D., University of Michigan-Ann Arbor, 2014	Lecturer, Applied Economics
Dooling	Robert J.	Full Member	B.S.,Creighton University, 1967; M.S., St. Louis University, 1969; Ph.D., 1975.	Professor Emeritus, Biological Sciences Affiliate Professor, Biological Sciences
Dorfman	Jay Robert	Full Member	B.A., Johns Hopkins University, 1957; Ph.D.,1961.	Professor Emeritus, Physics
Dorland	William D.	Full Member	B.S.,University of Texas, 1988 M.A., Princeton University, 1990 Ph.D., Princeton University, 1993	Distinguished Scholar-Teacher, Physics Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Physics
Dorr	Bonnie J.	Full Member	B.A., Boston University, 1984; M.S.,Massachusetts Institute of Technology, 1987; Ph.D., 1990.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor Emerita, Computer Science
Dotson	Charles O.	Full Member	B.A., Morehead State University, 1963; M.S., Purdue University, 1964; Ph.D., 1968.	Professor Emeritus, Kinesiology
Douek	Daniel	Special	B.A., University of Oxford, 1987; M.B.B.S., University of London, 1990; M.R.C.P., Royal College of Physicians, 1993; M.A., University of Oxford, 1996., Ph.D., University of London, 1997	n/a, Biological Sciences
Dougherty	Michael	Full Member	B.S., Kansas State University, 1993; M.S., University of Oklahoma, 1996; Ph.D., 1999	Chair, Psychology Professor, Psychology Associate Professor, Neurosciences and Cognitive Science
Dougherty	Lea	Full Member	B.A., University of Delaware, 2001; Ph.D., Stony Brook University, 2008	Associate Professor, Psychology Assistant Professor, Neurosciences and Cognitive Science
Doughty	Catherine J.	Associate	B.A., Ursinus College, 1978; M.S., University of Pennsylvania, 1982; Ph.D., University of Pennsylvania, 1988.	Professor, Second Language Acquisition Research Scientist, Second Language Acquisition

Dow-Burger	Kathryn	Non-Member	B.A. University of MD – College Park, 1986;M.A., University of MD – College Park, 1992	Associate Clinical Professor, Speech Language Pathology
Downey	Sean	Special Member	Ph.D., University of Arizona, 2009; M.A., Northern Arizona University, 2003; B.A., Boston University, 1994	Associate Research Professor, Anthropology
Doyle	Michael	Special Member	B.S., College of St. Thomas, 1964; Ph.D., Iowa State University, 1968.	Adjunct Professor
Dragovic	Besim	Special	B.A., Boston University, 1999; M.S., University of Connecticut, 2003; Ph.D., Boston University, 2013.	University Affiliate, Geology
Drake	James F.	Full Member	B.S.,University of California-Los Angeles, 1969; M.S., 1972; Ph.D., 1975.	Distinguished University Professor, Physics
Drazen	Allan	Full Member	S.B., Massachusetts Institute of Technology, 1972; Ph.D., 1976.	Professor, Economics
Drechsel	Thomas	Full Member	BSc, Goethe University-Frankfurt, 2010; MSc, University College London, 2011; MRes, London School of Economics, 2014.	Assistant Professor, Economics
Dreher	Mariam Jean	Full Member	B.A., University of California-Riverside, 1970; M.A., 1976; Ph.D., 1980.	Professor, Curriculum and Instruction Professor Emerita, Teaching and Learning, Policy and Leadership
Dresner	Martin E.	Full Member	B.Comm., University of Toronto, 1979; M.B.A., York University, 1980; Ph.D., University of British Columbia, 1989.	Associate Chair Professor
Drew	H. Dennis	Full Member	B.S., University of Pittsburgh, 1962; Ph.D., Cornell University, 1968.	Professor Emeritus, Physics Research Professor, Physics
Druin	Allison J.	Full Member	B.F.A., Rhode Island School of Design, 1985; M.S., Massachusetts Institute of Technology, 1987; Ph.D.,University of New Mexico-Albuquerque, 1997.	Associate Dean, Information Studies Professor, Human-Computer Interaction Professor, Library and Information Science Assistant Professor, Civil and Environmental Engineering
Du	Shao Jun	Full Member	B.S., Shangdong University/ Shantung University, 1983; M.S.,Academia Sinica-Beijing, 1986; Ph.D., University of Toronto, 1993.	Associate Professor, Marine, Estuarine, and Environmental Sciences
Du Puy	Karl F.G.	Full Member	A.B., Dartmouth College, 1964; M.Arch., University of Pennsylvania, 1967; M.Arch.,Delft University of Technology-Netherlands, 1969.	Professor Emeritus, Architecture

Duan	Shuiwang	Associate	B.S., Chengdu University of Science & Technology, 1994; M.S., The Chinese Academy of Sciences, 1997; Ph.D., Tulane University, 2005.	Assistant Research Scientist, Geology
Duan	Jian	Non-Member	PhD, University of Massachusetts - Amherst, 1994	Research Scientist, Entomology
Dubayah	Ralph O.	Full Member	A.B., University of California-Berkeley, 1982; M.A., University of California-Santa Barbara, 1985; Ph.D., 1991.	Associate Chair, Geographical Sciences Professor, Geographical Sciences Professor, Applied Mathematics & Statistics, and Scientific Computation
Ducca	Frederick	Special Member	B.S., St. Peter's College, 1967; M.S., University of Pennsylvania, 1972; Ph.D., University of Pennsylvania, 1978	n/a, Civil and Environmental Engineering
DuGoff	Eva Hisako	Full Member	B.A., Georgetown University, 2002; M.P.P., George Washington University, 2008; Ph.D., Johns Hopkins University, 2014	Assistant Professor, Health Administration Assistant Professor, Health Equity Assistant Professor, Health Policy Analysis and Evaluation Assistant Professor, Health Services
Dumitras	Tudor	Full Member	B.S., Politehnica University, 2001; M.S., Carnegie Mellon University, 2003; Ph.D., 2010	Associate Professor, Electrical and Computer Engineering
Dunbar	Kevin	Full Member	B.A., University College Dublin, Ireland, 1977; M.A., University College Dublin, Ireland, 1979; Ph.D., University of Toronto, 1985	Professor, Human Development Professor, Neurosciences and Cognitive Science
Duncan	James H.	Full Member	B.S., Brown University, 1971; M.A., Johns Hopkins University, 1973; Ph.D., 1979.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mechanical Engineering
Duncan	Gregg	Full Member		Assistant Professor, Bioengineering Assistant Professor, Biophysics
Duncanson	Laura	Full Member	M.S., Master of Science, University of Maryland - College Park, 2009; Ph.D., University of Maryland - College Park, 2015	Assistant Professor, Geographical Sciences
Dunn	Timothy	Special Member	Ph.D., University of Texas at Austin, 1999; M.A., University of Texas at Austin, 1990; B.A., Hamline University, 1984	Research Professor, Anthropology

Duraiswami	Ramani	Full Member	B.S., Indian Institute of Technology-Mumbai, 1985; Ph.D., Johns Hopkins University, 1991	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Computer Science Affiliate Professor, Electrical and Computer Engineering
Duthinh	Dat	Special Member	B.S., Princeton University; M.S., University of Delaware; Ph.D., Cornell University	n/a, Civil and Environmental Engineering
Dutta	Sanghamitra	Full Member	Ph.D., Electrical and Computer Engineering, Carnegie Mellon University. M.S., Electrical and Computer Engineering, Carnegie Mellon University. B. Tech., Electronics and Electrical Communication Engineering, Indian Institute of Technology, Kharagpur	Assistant Professor, Electrical and Computer Engineering
Dwyer	Susan	Full Member	B.A., University of Adelaide, 1985; B.A. Hons) University of Adelaide, 1986; Ph.D Massachusetts Institute of Technology, 1991.	Associate Professor, Philosophy
Dwyer	Daniel	Full Member	B.S., Boston College, 1999; Ph.D., Boston College, 2007	Assistant Professor, Biological Sciences
Dyer	Typhanye	Full	B.A., University of California, Los Angeles, 1995; M.P.H., California State University, Long Beach, 2002; Ph.D., University of California, Los Angeles, 2009	Associate Professor, Epidemiology Associate Professor, Biostatistics
Dynia	Jaclyn M	Graduate Teaching	B.S., University of Maryland-College Park, 2004; M.Ed., University of Maryland-College Park, 2007	Lecturer, Special Education
Eades	Caroline M.	Full Member	Agregation Lettres classiques, 1979; Doctorate, University of Paris III, 1987.	Professor, French Modern Studies Professor, French Studies Associate Professor, Comparative Literature Affiliate Associate Professor, Women's Studies
Eaker	Lisa	Full Member	Ph.D. Virginia Tech	Assistant Clinical Professor, Teaching and Learning, Policy and Leadership
Easley	Glenn R.	Adjunct Member	PhD, Computational Science and Infomatics, George Mason University 2000 Research Scientist, System Planning Corporation	University Affiliate, Mathematics of Advanced Industrial Technology
Eckstein	Arthur M.	Full Member	B.A., University of California-Los Angeles, 1968; M.A.,1970; Ph.D., University of California-Berkeley, 1978.	Distinguished University Professor Emeritus, History

Edwards	Jan	Full Member	B.A., Barnard College, 1980;M.A., Massachusetts Institute of Technology, 1981;Ph.D., CUNY-Graduate Center, 1985	Professor, Hearing and Speech Sciences Professor, Neurosciences and Cognitive Science Professor, Speech Language Pathology
Egan	Emily	Full Member	B.A., Brown University, 2002; M.Phil., University of Cambridge, 2005; M.A., University of Cincinnati, 2008; Ph.D., University of Cincinnati, 2015	Assistant Professor, Art History and Archaeology
Egel	Andrew L.	Full Member	B.A., University of California-Santa Barbara,1976; M.A., 1977; Ph.D., 1979.	Associate Professor Emeritus, Special Education
Ehrman	Sheryl H.	Full Member	B.S., University of California-Santa Barbara, 1991; Ph.D., University of California-Los Angeles, 1997.	Professor, Chemical Physics
Eichhorn	Bryan W.	Full Member	B.A., Rollins College, 1983;Ph.D., Indiana University-Bloomington, 1987.	Professor, Chemical Physics Professor, Chemistry Affiliate Professor, Materials Science and Engineering
Einstein	Theodore L.	Full Member	B.A., Harvard University, 1969; M.A., 1969; Ph.D., University of Pennsylvania, 1973.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Physics
Eisenbach	Ronit	Full Member	B.F.A., B. Arch., Rhode Island School of Design 1985, 1986; M. Arch., Cranbrook Academy of Art, 1993.	Professor, Architecture Associate Professor, Urban and Regional Planning and Design
Eisenstein	Edward	Full Member	B.S., St. Joseph's University, 1979; Ph.D., Georgetown University, 1985.	Associate Professor, Bioengineering
El-Sayed	Najib	Full Member	M.S., Tulane University, 1987; Ph.D., Yale University, 1993	Professor, Biological Sciences
Elby	Andy	Full Member	B.A., Harvard University, 1988; M.Phil., Cambridge University, 1989; Ph.D, University of California, Berkeley, 1995.	Associate Chair, Teaching and Learning, Policy and Leadership Associate Chair, Curriculum and Instruction Professor, Teaching and Learning, Policy and Leadership Professor, Curriculum and Instruction
Eley	George, Jr.	Full Member	B.S.,Ohio State University-Columbus, 1952; M.Ed., Ohio State University, 1957;Ph.D., 1966.	Associate Professor Emeritus, Teaching and Learning, Policy and Leadership
Elkin	Stephen L.	Full Member	B.A., Alfred University, 1961; M.A., Harvard University, 1963; Ph.D., 1969.	Professor Emeritus

Elliott	Michael	Full Member	B.S., Mathematics, University of Chicago 1985); M.S., Biostatistics, University of Michigan 1997); Ph.D., Biostatistics, University of Michigan 1999	Associate Research Professor, Survey and Data Science (online) Associate Research Professor, Survey Methodology Associate Research Professor, Survey Statistics
Ellis	Christopher D	Full Member	B.S., University of Massachusetts, 1988; M.L.A., Cornell University, 1993; Ph.D., University of Illinois Urbana/Champaign, 1998	Director, Plant Science Professor, Landscape Architecture Professor, Plant Science
Ellis	Rachel	Full Member	B.A., Georgetown University, 2010; M.A., Sociology, University of Pennsylvania, 2012; Ph.D., University of Pennsylvania, 2017.	Assistant Professor, Criminology and Criminal Justice
Elmaghraby	Wedad	Full Member	B.A., B.S., Cornell University, 1992; M.S., University of California-Berkeley, 1995; Ph.D., 1998.	Professor
Elman	Howard C.	Full Member	B.A., Columbia University, 1975;M.A., 1977; M.S., Yale University, 1979; Ph.D., 1982.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Computer Science Affiliate Professor, Mathematics
Elmore	Andrew	Full Member	B.S., Purdue University, 1997; M.S.; Brown University, 1999; Ph.D., Brown University, 2003.	Assistant Professor, Marine, Estuarine, and Environmental Sciences
Elmqvist	Niklas	Full Member	PhD., Chalmers University of Technology, Gothenburg, Sweden, 2006	Director, Human-Computer Interaction Associate Professor, History and Library & Information Science Associate Professor, Human-Computer Interaction Associate Professor, Information Management Associate Professor, Information Studies Associate Professor, Library and Information Science
Elpus	Kenneth	Full Member	B.M., The College of New Jersey; M.M., Northwestern University; Ph.D., Northwestern University	Associate Professor, Ethnomusicology Associate Professor, Music Associate Professor, Music Education
Elsing	Evelyn L.	Full Member	B.Mus., University of Michigan-Ann Arbor, 1970;M.Mus., 1971.	Professor Emerita, Music Professor Emerita, Music Education
Engelhardt	Katharina	Full Member	B.S. Oregon State University, 1993; M.S. Utah State University, 1997; Ph.D., Utah State University, 2000	Research Associate Professor, Marine, Estuarine, and Environmental Sciences
Eno	Sarah C.	Full Member	B.A., Gettysburg College, 1984; M.A.,University of Rochester, 1986; Ph.D., 1990.	Distinguished Scholar-Teacher, Physics Professor, Physics

Enoch	Jessica	Full Member	B.A., University of Iowa, 1996; M.A., Pennsylvania State university, 1999; Ph.D., 2003.	Professor, English Language and Literature
Epanchin-Niell	Rebecca Suzanne	Full Member	B.S., Stanford University, 1997;M.S., University of Nevada, Reno, 2003;Ph.D., University of California, Davis, 2009	Assistant Professor, Agricultural and Resource Economics
Ephremides	Anthony	Full Member	B.S., National Technical University of Athens, 1967; M.A., 1969; Ph.D.,Princeton University, 1971.	Distinguished University Professor, Electrical and Computer Engineering Distinguished University Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Systems Engineering Professor Emeritus, Electrical and Computer Engineering
Erwin	John E.	Full Member	B.S., Delaware Valley College of Science & Agriculture, 1983; M.S., Michigan State University, 1986; Ph.D., 1989.	Chair, Plant Science Professor, Plant Science
Eshleman	Keith Neal	Full Member	B.A., University of Virginia, 1978; M.S.,Massachusetts Institute of Technology, 1982; Ph.D., 1985. MEES	Professor, Marine, Estuarine, and Environmental Sciences
Espindola	Anahi	Full Member	BS, University Neuchatel, Switzerland, 2006; MS, University Neuchatel, Switzerland, 2006; PhD, University of Neuchatel, Switzerland, 2010	Assistant Professor, Entomology
Espino	Michelle	Full Member	BA., St. Mary's University, 1996; MA., Bowling Green State University, 1998; Ph.D., University of Arizona, 2008	Associate Professor, Student Affairs Assistant Professor
Espy-Wilson	Carol Y.	Full Member	B.S., Stanford University, 1979; M.S., Massachusetts Institute of Technology, 1981; M. Elect. Eng., 1984; Ph.D., 1987	Professor, Electrical and Computer Engineering Professor, Systems Engineering
Eubanks	Segun	Associate	B.A., University of Massachusetts, 1989; M.S., Springfield College, 1990; Ed.D., University of Maryland, 2012	Professor of Practice, School System Leadership
Evans	William C.	Adjunct Member	B.S., Clarion University; M.M. Peabody Conservatory of Music	University Affiliate, Ethnomusicology University Affiliate, Music University Affiliate, Music Education
Evans	Jay	Adjunct Member	B.A., Princeton University, 1988; Ph.D., University of Utah, 1995.	Adjunct Professor, Biological Sciences
Evans	Michael N.	Full Member	B.A., Harvard University, 1992; Ph.D., Columbia University, 1999.	Associate Professor, Geology Associate Professor, Applied Mathematics & Statistics, and Scientific Computation

Evans	Jay	Special Member	AB, Princeton University, 1988; PhD, University of Utah, 1995	Research Scientist, Entomology
Evans	T. Matthew	Special	B.S., University of New Mexico, 1997; M.S., Georgia Institute of Technology, 2002; Ph.D., Georgia Institute of Technology, 2005	n/a, Civil and Environmental Engineering
Evers	Philip T.	Full Member	B.S., Tri-State University, 1987; M.B.A., University of Notre Dame, 1988; Ph.D., University of Minnesota-Twin Cities, 1993.	Associate Professor
Everts	Kathryne L.	Full Member	B.S., Colorado State University, 1981; M.S., 1984; Ph.D., Michigan State University, 1989.	Director, Plant Science Professor, Plant Science
Fabian	Ellen S.	Full Member	B.A.,University of Wisconsin-Madison, 1973; M.A., 1980; Ph.D.,University of Maryland-College Park, 1988.	Professor Professor Emerita, School Counseling
Fagan	Drew	Associate	Ed.D. Teachers College, Columbia University	Associate Clinical Professor, Teaching and Learning, Policy and Leadership
Fagan	William F.	Full Member	Ph.D., Zoology, University of Washington, Seattle, Washington, 1996; Honors B.A., Biology, University of Delaware, Newark, Delaware, 1992	Distinguished University Professor, Applied Mathematics & Statistics, and Scientific Computation
Fahnestock	Jeanne D.	Full Member	B.A., University of Illinois-Urbana/Champaign, 1966; M.A., Indiana University-Bloomington, 1967; Ph.D., University of London, 1970.	Professor Emerita, English Language and Literature
Falconier	Mariana K	Full Member	Licenciate in Psychology (equivalent to MA in Psychology), School of Psychology, University of Buenos Aires, Argentina, 1992; M.S., Marriage and Family Therapy, Department of Family Studies, University of Maryland, College Park, 2002; Ph.D., Family Studies, Department of Family Studies, University of Maryland, College Park , 2005	Associate Professor, Family Science
Falconier	Mariana	Full Member	M.S., University of Maryland-College Park, 2002; Ph.D., University of Maryland-College Park, 2005	Director, Couple and Family Therapy Associate Professor, Couple and Family Therapy
Falk	William W.	Full Member	B.A., North Texas State University, 1969; M.A.,1970; Ph.D., Texas A&M University-College Station, 1975.	Professor Emeritus, Sociology Affiliate Professor, American Studies
Falk	David	Full Member	B.A., Harvard University, 1958; L.L.B., 1961.	Lecturer

Falvey	Daniel E.	Full Member	B.S., North Dakota State University-Fargo, 1983; Ph.D.,University of Illinois-Urbana/Champaign, 1988.	Professor, Chemical Physics Professor, Chemistry
Falvo	Joseph D.	Full Member	B.A., Loyola University, New Orleans, 1974; M.A., Catholic University of America, 1977; M.A., 1979; M.A.,Johns Hopkins University, 1984; Ph.D., 1986.	Associate Professor, French Modern Studies Associate Professor, French Studies
Fang	Adriane	Full Member	M.F.A. Dance, George Mason University, 2009; B.A. Dance/ Psychology, University of Wisconsin Stevens Point, 1996.NYC: Wally Cardona, Gwen Welliver, Ronald K. Brown, Christian Canciani, Kevin Wynn, Jackie Villamil, Jan Miller, Cherylyn Lavagnino	Assistant Professor, Dance
Fang	Weiguo	Special Member	BSc, Southwest Agricultural University, Chongqing, China, 1997; PhD, Southwest Agricultural University, Chongqing, China, 2003	Affiliate Professor, Entomology
Farcuh	Macarena	Full Member	B.S., Universidad de Chile, 2005; M.S., 2007; Ph.D, University of California-Davis, 2017.	Assistant Professor, Plant Science
Farman	Jason	Full Member	B.A., Westmont College, 2000; M.A., Claremont Graduate University, 2002; Ph.D., University of California-Los Angeles, 2006.	Assistant Professor, American Studies Affiliate Professor, Women's Studies
Farquhar	James	Full Member	B.S., Washington and Lee University, 1987; M.S., University of Chicago, 1990; Ph.D., University of Alberta, 1995.	Professor, Geology
Farrell	Sinead	Adjunct Member		Assistant Research Scientist, Atmospheric and Oceanic Science
Fay	Robert E.	Full Member	Ph.D. Statistics 1974 University of Chicago	Research Professor, Survey Methodology
Fedderly	David	Adjunct Member	M.E., Northwestern University	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Feijo	Jose	Full Member	Ph.D., University of Lisbon	Professor, Biological Sciences Professor, Biophysics
Feizi	Soheil	Full Member	M.S., Massachusetts Institute of Technology, 2010; Ph.D., Massachusetts Institute of Technology, 2016	Affiliate Assistant Professor, Electrical and Computer Engineering
Felbain	Leslie	Full Member	B.S., University of Wisconsin-Madison, 1975.	Affiliate Associate Professor, Jewish Studies Affiliate Associate Professor, Women's Studies

Feldman	Naomi	Full Member	B.A., University of Chicago, 2003; Ph.D., Brown University, 2011	Associate Professor, Linguistics Associate Professor, Neurosciences and Cognitive Science Affiliate Associate Professor, Computer Science
Feldstein	Mark	Full Member	B.A., Harvard, 1979; Ph.D., University of North Carolina at Chapel Hill, 2002	Professor, Journalism
Feller	Ilka	Special Member	BA, University of North Carolina - Greensboro, 1969; BA, Ohio University, 1971; PhD, Georgetown University, 1993	Research Scientist, Entomology
Felton	Gary Kent	Full Member	B.S., University of Maryland-College Park, 1976; M.S., 1981; Ph.D.,Texas A&M University-College Station, 1987.	Associate Professor, Environmental Science and Technology
Fenelon	Andrew	Full Member	B.A., University of California-Santa Barbara, 2007; M.A., University of Pennsylvania, 2008; Ph.D., University of Pennsylvania, 2012	Assistant Professor, Health Administration Assistant Professor, Health Equity Assistant Professor, Health Policy Analysis and Evaluation Assistant Professor, Health Services
Feng	Kuishuang	Associate	B.S., Heilongjiang University, 2003; Ph.D., University of Leeds, 2011	Research Professor, Geographical Sciences
Fenselau	Catherine C.	Full Member	A.B., Bryn Mawr College, 1961; Ph.D., Stanford University, 1965.	Professor, Biochemistry Professor, Chemistry
Fernandez	Eduardo	Adjunct Member	Ph.D., Catholic University, Lima, Peru, 2016; B.S., J.F. Kennedy University, Buenos Aires, Argentina, 1987	Postdoctoral Research Associate, Anthropology
Ferraro	Rosellina	Full Member	B.A., Cornell University, 1994; M.S., Cornell University, 1998.	Associate Chair Associate Professor
Ferreira	Thiago	Graduate Teaching	Ph.D., Northwestern University, 2014	Lecturer, Applied Economics
Fey	James T.	Full Member	B.S., University of Wisconsin-Madison, 1962; M.S., 1963; Ph.D., Columbia University, 1968.	Professor Emeritus, Mathematics Professor Emeritus, Teaching and Learning, Policy and Leadership Professor Emeritus, Curriculum and Instruction
Filiz-Ozbay	Emel	Full Member	B.S., Bogazici University, 1998; M.A., Bogazici Univerity, 2000; M.Phil., Columbia University, 2004; Ph.D., Columbia University, 2007.	Associate Professor, Economics

Finch	Michael L.	Full Member	B.A., Lehigh University, 1973; M.B.A., Baylor University, 1988; Ph.D., University of Tennessee-Knoxville, 1994.	Lecturer
Findlater	Leah	Full Member	B.Sc., Computer Science, 2001; M.Sc., Computer Science, 2004; Ph.D., Computer Science, 2009.	Assistant Professor, History and Library & Information Science Assistant Professor, Human-Computer Interaction Assistant Professor, Information Management Assistant Professor, Library and Information Science
Fink	Edward L.	Full Member	B.A., Columbia University, 1966; M.S., University of Wisconsin-Madison, 1969; Ph.D., 1975.	Professor Emeritus, Communication
Finkelstein	Barbara J.	Full Member	B.A., Barnard College, 1959;M.A., Columbia University-Teachers College, 1960; Ed.D., 1970.	Professor Emerita, Policy Studies Professor Emerita, Teaching and Learning, Policy and Leadership Affiliate Professor, American Studies Affiliate Professor, Teaching and Learning, Policy and Leadership
Finkle	Aaron	Graduate Teaching	Ph.D., University of Washington, 2004	Lecturer, Applied Economics
Finlayson	Valerie A.	Special Member	B.A., Michigan State University, 2009; M.S., University of Illinois at Urbana-Champaign, 2011; Ph.D., University of Hawai#i at Mānoa, 2017.	Postdoctoral Research Associate, Geology
Finsterbusch	Kurt	Full Member	B.A., Princeton University, 1957; B.D.,Grace Theological Seminary, 1960; Ph.D., Columbia University, 1969.	Professor Emeritus, Sociology
Fiorellino	Nicole	Full Member	B.S., Rutgers University, 2008; M.S., University of MD College Park, 2010; Ph.D., 2015.	Assistant Professor, Plant Science Assistant Professor, Extension Education
Firebaugh	Millard S.	Non-Member	SB, MIT, 1961; SM, MIT, 1966; ScD, MIT 1972.	Professor of Practice, Mechanical Engineering
Fischbach	Gerald F.	Full Member	B.F.A., University of Wisconsin-Milwaukee, 1964; M.Mus., University of Illinois-Urbana/Champaign, 1965; D.M.A., University of Iowa, 1972.	Professor Emeritus, Music Professor Emeritus, Music Education
Fischell	Robert E.	Non-Member	BS, Duke University, 1951; MS, University of Maryland, 1953	Professor of Practice, Mechanical Engineering
Fish	Jessica N.	Full	B.S. Central Michigan University, 2008; M.S. Purdue University Calumet, 2010; Ph.D. Florida State University, 2014	Assistant Professor, Family Science Assistant Professor, Maternal and Child Health

Fisher	Michael E.	Full Member	B.S., King's College-London, 1951; Ph.D., 1957; S.C.D., Yale University, 1987; Ph.D. Honoris Causa, Tel Aviv University, 1992.	Distinguished University Professor Emeritus, Physics
Fisher	John P.	Full Member	B.S., The Johns Hopkins University, 1995; M.S., University of Cincinnati, 1998; Ph.D., Rice University, 2002	Chair, Bioengineering Professor, Bioengineering Affiliate Professor, Chemical Engineering
Fisher	Dana	Full Member	Ph.D., University of Wisconsin-Madison 2001; M.A., University of Wisconsin-Madison, 1999; A.B., Princeton University, 1993	Professor, Sociology
Fisher	Heidi	Full Member	M.S., University of California - San Diego, 2001; Ph.D., Boston University, 2006	Assistant Professor, Neurosciences and Cognitive Science Assistant Professor, Biological Sciences
Fisher	Thomas	Full, Intercampus	B.A., University of Pennsylvania, 1968; Ph.D., Duke University, 1975	Professor, Marine, Estuarine, and Environmental Sciences
Fisher	Steven	Special Member	B.S., University of Texas at El Paso, 2007; Ph.D., University of Maryland, Baltimore, 2013	Director, Biological Sciences
Fiske	Shirley	Adjunct Member	Ph.D., Stanford University, 1975; B.A. University of California, Davis, 1967	Research Professor, Anthropology
Fitzpatrick	Patrick M.	Full Member	B.A., Rutgers University-New Brunswick, 1966;Ph.D., 1971.	Associate Chair, Mathematics Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematics
Fitzpatrick	Matthew	Full Member	Ph.D. University of Tennessee, 2008	Assistant Professor, Marine, Estuarine, and Environmental Sciences
Fitzpatrick	Matthew	Non-Member	BS, Penn State University, 1997; MS, University of Montana, 2003; PhD, University of Tennessee, 2008	Affiliate Professor, Entomology
Flatau	Alison	Full Member	B.S., University of Connecticut, 1978; M.S., University of Utah, 1985, Ph.D., 1990	Professor, Aerospace Engineering Affiliate Professor, Materials Science and Engineering Graduate Director, Aerospace Engineering
Fleischer	Robert	Non-Member	Ph.D., University of Kansas, 1983.	Adjunct Professor, Biological Sciences
Fleming	Julius	Full Member	B.A. Tougaloo College, 2009; A.M. Univ. of Pennsylvania, 2011; PhD. 2014.	Assistant Professor, English Language and Literature
Flynn	Adrianne	Adjunct Member	B.A., Arizona State University,	Lecturer, Journalism

Foreman	Christopher H.	Full Member	B.A., Harvard College,1974; M.A., Harvard University, 1977;Ph.D., Harvard University, 1980	Professor
Forman	Barton	Full Member	B.S., University of Virginia, 1998; M.S., University of California at Berkeley, 1999; Ph.D., University of California at Los Angeles, 2010	Assistant Professor, Civil and Environmental Engineering
Forni	Giovanni	Full Member	B.A. Universita di Bologna, Italy, 1988; Ph.D. Princeton University, 1993.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematics
Foster	Daniel	Adjunct Member	B.M., Oberlin Conservatory; Artist Diploma, The Curtis Institute of Music	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Foster	Jeffrey S.	Full Member	Ph.D., University of California at Berkeley, 2002	Professor, Computer Science
Fourkas	John T.	Full Member	Ph.D. Stanford University 1991)	Professor, Chemical Physics Professor, Chemistry
Fourney	William L.	Full Member	B.S.A.E., West Virginia University, 1962; M.S., 1963; Ph.D., University of Illinois-Urbana/Champaign, 1966.	Associate Dean, Aerospace Engineering Professor Emeritus, Mechanical Engineering Advisor, Aerospace Engineering
Fox	Nathan A.	Full Member	A.B., Williams College, 1970; Ph.D., Harvard University, 1975.	Distinguished University Professor, Human Development Professor, Neurosciences and Cognitive Science Affiliate Professor, Jewish Studies
Fraistat	Neil R.	Full Member	B.A., University of Connecticut-Storrs, 1974; M.A.,University of Pennsylvania, 1976; Ph.D., 1979.	Professor, English Language and Literature
Franco Sevilla	Manuel	Full Member	B.S., Universidad Pontificia de Comillas, 2004; Ph.D., Stanford University, 2012	Assistant Professor, Physics
Frankel	Tyler Edward	Special Member	B.A., University of Maryland-Baltimore County, 2011; M.S., University of Maryland-College Park, 2013; Ph.D., University of Maryland-College Park, 2016	University Affiliate, Environmental Science and Technology
Franklin	Manoj	Full Member	B.S., University of Kerala, 1984; M.S.,University of Wisconsin-Madison, 1990; Ph.D., 1993.	Associate Professor, Electrical and Computer Engineering
Franzini	Luisa	Full Member	3310D School of Public Health (Bldg #255)4200 Valley DriveCollege Park, MD 20742-2611franzini@umd.eduPhone: 301 405 2470;	Chair Professor
Frauwirth	Kenneth	Associate	B.S., Brown University, 1992; Ph.D., University of California-Berkeley, 1997.	Senior Lecturer

Frauwirth	Ken	Adjunct Member	Sc.B., Brown University., 1992; Ph.D., University of California-Berkeley, 1997	Lecturer, Biological Sciences
Frederiksen	Elke P.	Full Member	B.A., University of Kiel, 1962; M.A., 1962; M.A., University of Wisconsin-Madison, 1965; Ph.D.,University of Colorado-Boulder, 1973.	Professor Emerita, German Literature and Language
Freed	Eric	Adjunct Member	Ph.D. University of Wisconsin-Madison, 1990	Adjunct Professor, Biological Sciences
Freeny	Maralita	Adjunct Member		Adjunct Professor, School Librarianship Lecturer, School Librarianship
Freidenberg	Judith N.	Full Member	Ph.D., City University of New York, 1978 ; M.A. University of Buenos Aires, 1969	Professor Emerita, Anthropology Affiliate Associate Professor, American Studies Affiliate Associate Professor, Jewish Studies
Freidlin	Mark I.	Full Member	M.S., Moscow State University, 1959; Ph.D.,Steklov Mathematical Institute, 1962; Doctor, Moscow State University, 1970.	Distinguished University Professor, Applied Mathematics & Statistics, and Scientific Computation Distinguished University Professor, Mathematical Statistics Distinguished University Professor, Mathematics Professor, Mathematics
French	Melodie	Special Member	B.A., Oberlin College, 2006; M.S., University of Wisconsin-Madison, 2009; Ph.D., Texas A&M University-College Station, 2014	University Affiliate, Geology
Freund	David	Full Member	PhD, University of Michigan, 1999	Associate Professor, History
Frias-Martinez	Vanessa	Full Member	M.S., Columbia University, 2003; Ph.D., Columbia University, 2008	Associate Professor, Library and Information Science Assistant Professor, History and Library & Information Science Assistant Professor, Human-Computer Interaction Assistant Professor, Information Management Assistant Professor, Information Studies
Fried	Daniel	Graduate Teaching	Ph.D., University of Virginia, 2013	Lecturer, Applied Economics
Friedel	Robert D.	Full Member	B.A., Brown University, 1971; M.S., University of London,1972; Ph.D., Johns Hopkins University, 1977.	Professor Emeritus, History
Friedman	Michael	Adjunct Member	B.A., Tufts University, 1992; M.A., University of Maryland, College Park, 2000; Ph.D., 2008.	Research Assistant Professor, Kinesiology

Fries-Britt	Sharon LaVonne	Full Member	B.S., University of Maryland-College Park, 1981; M.A., Ohio State University-Columbus, 1983; Ph.D., University of Maryland-College Park, 1994.	Professor, Higher Education Professor
Frisch	Andrea	Full Member	B.A. University of Wisconsin-Madison, 1988; Ph.D., University of California-Berkeley, 1996	Professor, French Modern Studies Professor, French Studies Affiliate Professor, Comparative Literature Graduate Director, French Modern Studies Graduate Director, French Studies
Frisof	Sarah	Full Member		Associate Professor, Ethnomusicology Associate Professor, Music Associate Professor, Music Education
Fritz	Megan	Full Member	BS, Michigan State University, 2005; PhD, Michigan State University, 2011	Assistant Professor, Entomology Assistant Professor, Biological Sciences
Froehlich	Jon	Full Member	Ph.D., University of Washington, 2011	Assistant Professor, Computer Science
Froom	David	Adjunct Member	B.M. University of California, Berkeley; M.M. University of Southern California; D.M.A. Columbia University	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Fry	James H.	Full Member	B.Mus., Southern Methodist University, 1971; M.Mus., 1974; Ph.D.,University of Rochester, 1977.	Associate Professor, Ethnomusicology Associate Professor, Music Associate Professor, Music Education
Fryer	Craig S.	Full Member	B.S., Case Western University; MPH, University of Pittsburgh; DrPH, Columbia University	
Fryer	Craig	Full	M.P.H., University of Pittsburgh, 1997; D.P.H., Columbia University, 2006	n/a, Behavioral and Community Health
Fu	Chung C.	Full Member	B.S.,National Taiwan University, 1972; M.S., University of Maryland-College Park, 1975; Ph.D., 1982.	Research Professor, Civil and Environmental Engineering
Fu	Michael C.	Full Member	S.B., Massachusetts Institute of Technology, 1985; S.M., 1985; S.M., Harvard University, 1986; Ph.D., 1989.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Systems Engineering Affiliate Professor, Electrical and Computer Engineering
Fuentes	Gabrielle	Full Member	B.A., Brown University 2008, M.F.A. University of Colorado, Boulder, 2013, Ph.D. University of Georgia, 2017	Assistant Professor, English Language and Literature

Fuge	Mark	Full Member	B.S., Carnegie-Mellon University, 2009; M.S., Carnegie-Mellon University, 2009; Ph.D., University of California-Berkeley, 2014	Associate Professor, Mechanical Engineering
Fuhrer	Michael	Full Member	Currently at Monash University, Australia) Ph.D., Univ. of CA - Berkeley, 1998	Research Professor, Physics
Fuller	Sarah	Adjunct Member	B.M., Royal Conservatory of Music, M.M., Indiana University	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Fushman	David	Full Member	M.S., University of Kazan, 1978; Ph.D., University of Kazan, 1985.	Associate Director, Biophysics Professor, Biochemistry Professor, Chemical Physics Professor, Chemistry
Gabriel	Steven A.	Full Member	B.A., Middlebury College, 1981; M.S., Stanford University, 1984; M.A., Johns Hopkins University, 1989; Ph.D., 1992. Adjunct Professor, Dept. of Industrial Economics and Technology Management, Norwegian University of Science and Technology.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mechanical Engineering
Gabriel	Steven A	Full Member	B.A., Middlebury College, 1981; M.S., Stanford University, 1984; M.A., Johns Hopkins University, 1989; Ph.D., 1992	Professor, Reliability Engineering
Gabrielli	Julie	Full Member	B.S., University of Virginia, 1984; M.Arch, University of Virginia, 1987	Associate Clinical Professor, Architecture
Gaines	Robert N.	Full Member	B.A., University of California-Davis, 1972; M.A., 1975; Ph.D., University of Iowa, 1982.	Professor Emeritus, Communication
Galiani	Sebastian	Full Member	Licentiate in Economics, Universidad Nacional de Buenos Aires,1990; M.A., Instituto Torcuato Di Tella, 1992; Ph.D., University of Oxford, 2000.	Professor, Economics
Galindo	Claudia	Full Member	PhD, Pennsylvania State University, 2005; BA, Pontificia Universidad Católica del Perú. Lima, Perú, 1996	Professor, Teaching and Learning, Policy and Leadership
Galloway	Gerald	Adjunct Member	B.S., U.S. Military Academy; M.S., Princeton University; M.P.A., Pennsylvania State University; M.A., U.S. Army Command and General Staff College; Ph.D., University of North Carolina.	Research Professor, Civil and Environmental Engineering

Gantt	Elisabeth	Full Member	B.A., Blackburn College, 1958; M.S., Northwestern University, 1960; Ph.D., 1963.	Distinguished University Professor, Biological Sciences Professor Emerita, Biological Sciences
Gao	James Z.	Full Member	B.A., Beijing Foreign Studies University, 1978;M.A., Beijing University/Peking University, 1983; M.A., Yale University, 1989; Ph.D., 1994.	Associate Professor, History
Gard	Arianna	Full Member	B.A., University of California-Los Angeles, 2010; Ph.D., University of Michigan- Ann Arbor, 2019.	Assistant Professor, Psychology
Gardner	Amy E.	Full Member	B.Sc., University of Virginia,1981; M.Arch., 1985.	Associate Professor, Architecture
Gasarch	William	Full Member	B.S., State University of New York-Stony Brook, 1980; M.S., Harvard University, 1982 Ph.D., 1985.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Computer Science Affiliate Professor, Mathematics
Gates	John Edward	Full Member	B.S., Old Dominion University, 1969; M.A., Bowling Green State University, 1972; Ph.D., Michigan State University, 1976.	Associate Professor, Marine, Estuarine, and Environmental Sciences
Gates	Sylvester James, Jr.	Full Member	B.S., Massachusetts Institute of Technology, 1973; Ph.D.,1977.	Distinguished Scholar-Teacher, Physics Distinguished University Professor, Physics Regents Professor, Physics Affiliate Professor, Mathematics
Gates	Michael	Special Member	BA, Hendrix College; MS, Oklahoma State University; PhD, University of California - Riverside	Research Scientist, Entomology
Gatlin	Jessica	Full Member	B.A., Florida State University, 2009; M.F.A., University of Tennessee, 2017	Assistant Professor, Art Studio
Gaudry	Quentin	Full Member	B.S., Emory University, 2002; Ph.D., University of California San Diego, 2008	Associate Professor, Biological Sciences Assistant Professor, Neurosciences and Cognitive Science
Gaycken	Oliver	Full Member	B.A., Princeton University, 1994; M.A., University of Chicago, 1996; Ph.D., University of Chicago, 2005.	Associate Professor, English Language and Literature Associate Professor, Comparative Literature Graduate Director, Comparative Literature
Geary	Jason	Full Member	B.A., San Francisco Conservatory of Music, 1996; M.A., University of Michigan, 1998; Ph.D., Yale University, 2004	Director, Ethnomusicology Director, Music Director, Music Education

Gekker	Paul C.	Full Member	B.Mus., University of Rochester, 1976; M.Mus., University of Maryland-College Park, 1981.	Professor, Ethnomusicology Professor, Music Professor, Music Education
Gelfand	Michele Joy	Full Member	B.A., Colgate University, 1989; M.A., University of Illinois 1992; Ph.D., 1996.	Distinguished Scholar-Teacher, Psychology Professor, Psychology
Gensheimer	Maryl	Full Member	B.A., Williams College, 2005; M.A., New York University, 2008; Ph.D., New York University, 2013	Associate Professor, Art History and Archaeology
Gentili	Rodolphe	Full Member		Assistant Professor, Neurosciences and Cognitive Science
Gerst	Michael	Special Member	B.S., Virginia Institute of Technology, 2004; M.S., Yale University, 2005; Ph.D., Yale University, 2008	n/a, Civil and Environmental Engineering
Getoor	Lise	Full Member	Ph.D., Stanford, 2001	Adjunct Professor, Computer Science
Getrich	Christina	Full Member	B.A. College of Wooster, 1997; M.A., Northern Arizona University, 2001; Ph.D. University of New Mexico, 2008	Associate Professor, Anthropology Affiliate Associate Professor, Women's Studies
Ghanem	Mostafa	Full Member	B.S., Alexandria University, 2007; M.V.Sc., Alexandria University, 2010, Ph.D., Ohio State University, 2017	Assistant Professor, Veterinary Medical Sciences
Ghodssi	Reza	Full Member	B.S., University of Wisconsin-Madison, 1990; M.S., 1992; Ph.D., 1996.	Professor, Electrical and Computer Engineering Professor, Systems Engineering Affiliate Professor, Materials Science and Engineering Affiliate Professor, Bioengineering
Gholampour	Amin	Full Member	Ph.D., University of British Columbia, 2007	Assistant Professor, Mathematics
Gholizadeh	Mahsa	Graduate Teaching	Ph.D., American University, 2015	Lecturer, Applied Economics
Gibson	Robert L.	Full Member	B.M., University of Miami, 1972; M.M., Catholic University of America, 1975; D.M.A.,University of Maryland-College Park, 1980.	Professor, Ethnomusicology Professor, Music Professor, Music Education
Gilbert	James B.	Full Member	B.A., Carleton College, 1961; M.A., University of Wisconsin-Madison, 1963; Ph.D., 1966.	Distinguished University Professor Emeritus, History Affiliate Professor, American Studies
Gill	Meredith J.	Full Member	B.A., University of Melbourne, 1980; M.A., Princeton University, 1985; Ph.D., Princeton University, 1992.	Professor Emerita, Art History and Archaeology
Gill	Douglas E.	Full Member	B.S., Marietta College, 1965; M.A.,University of Michigan-Ann Arbor, 1967; Ph.D., 1971.	Professor Emeritus, Biological Sciences

Gilliam	Jauvon	Adjunct Member	B.S., Butler University	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Gimpel	James G.	Full Member	B.A., Drake University, 1984;M.A., University of Toronto, 1985; Ph.D., University of Chicago, 1990.	Professor, Government and Politics
Ginsburg	Mark B	Special Member	B.A., Darmouth College, 1972; M.A., University of California, Los Angeles, 1974; Ph.D., Univesity of California, Los Angles, 1976	Visiting Senior Research Scientist, International Education Policy
Giovacchini	Saverio	Full Member	Ph.D., New York University, 1998.	Associate Professor, History
Gironzetti	Elisa	Full Member	Spanish Language Teaching (University of Alicante, 2013) and a Ph. D. in English Applied Linguistics (Texas A&M University-Commerce, 2017)	Assistant Professor, Spanish Language and Literature
Girvan	Michelle	Full Member	B.S., Massachusetts Institute of Technology, 1999; Ph.D., Cornell University, 2003; Ph.D., 2004.	Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Associate Professor, Physics Associate Professor, Biophysics
Glancy	Sarah	Full Member	B.S., Rutgers University, 2008; Ph.D., Arizona State University, 2012	Assistant Professor, Kinesiology
Glasper	Erica	Full Member	B.A. Psychology/Biology, Randolph-Macon College M.A., Psychology, Ohio State University Ph.D., Psychology and Behavioral Neuroscience, Ohio State University	Assistant Professor, Neurosciences and Cognitive Science
Glass	James M.	Full Member	B.A., University of California-Berkeley, 1961; M.A., 1964; Ph.D., 1970.	Distinguished Scholar-Teacher, Government and Politics Professor, Government and Politics Affiliate Professor, Jewish Studies
Glaz	Harland M.	Full Member	B.A., University of Pennsylvania, 1971; M.A.,University of California-Berkeley, 1975; Ph.D., 1977.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor Emeritus, Mathematics
Glibert	Patricia M.	Full Member	B.A., Skidmore College, 1974; M.S., University of New Hampshire, 1976; Ph.D.,Harvard University, 1982.	Professor, Marine, Estuarine, and Environmental Sciences
Goffney	Imani	Full Member	PhD, University of Michigan	Assistant Professor, Teaching and Learning, Policy and Leadership

Golbeck	Jennifer	Full Member	PhD., Computer Science, University of Maryland	Associate Professor, History and Library & Information Science Associate Professor, Human-Computer Interaction Associate Professor, Information Management Associate Professor, Information Studies Associate Professor, Library and Information Science
Gold	Paul	Full Member	B.A., Wesleyan University Middletown, CT, 1981; M.A., University of Texas, Austin, 1984; Ph.D., University of Missouri-Columbia, MO, 1994.	Associate Professor, School Counseling
Goldberg	Jessica	Full Member	B.A., Stanford University, 2001; M.P.A., Princeton University, 2005; M.A., University of Michigan, 2008, Ph.D., University of Michigan, 2011.	Associate Professor, Economics
Golden	Bruce L.	Full Member	B.A.,University of Pennsylvania, 1972; S.M., Massachusetts Institute of Technology, 1974; Ph.D., 1976.	Professor, Applied Mathematics & Statistics, and Scientific Computation Affiliate Professor, Civil and Environmental Engineering
Goldhar	Julius	Full Member	B.S., Massachusetts Institute of Technology,1971; Ph.D., 1976.	Professor, Electrical and Computer Engineering
Goldman	William M.	Full Member	A.B., Princeton University, 1977; Ph.D., University of California-Berkeley, 1980.	Distinguished Scholar-Teacher, Mathematics Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematics
Goldsman	Neil	Full Member	B.A., Cornell University, 1981; M.Elect.E., 1983; Ph.D., 1988.	Professor, Electrical and Computer Engineering
Goldstein	Thomas	Full Member	B.A., Washington University in St. Louis, 2006; M.S., University of California-Los Angeles, 2007; Ph.D., University of California-Los Angeles, 2010	Assistant Professor, Computer Science Affiliate Associate Professor, Electrical and Computer Engineering
Goldstein	Rachel Elizabeth	Full Member	B.A., University of North Carolina, 2005; M.P.H., University of Maryland, 2010; Ph.D., University of Maryland, 2013	Assistant Professor, Environmental Health Sciences
Gollner	Michael J.	Associate	B.S., 2008, University of California-San Diego; M.S., 2010, University of California-San Diego; Ph.D., 2012, University of California-San Diego	Affiliate Assistant Professor, Mechanical Engineering
Golub	Evan	Full Member	PhD., Computer Science, University of Maryland, College Park, 2009.	Senior Lecturer, Information Studies

Gomez	Romel Del Rosario	Full Member	B.S., University of the Philippines-Quezon, 1980; M.S., Wayne State University, 1984 M.S., University of Maryland-College Park, 1987; Ph.D., 1990.	Associate Chair, Electrical and Computer Engineering Professor, Electrical and Computer Engineering
Gong	Cheng	Full Member	B.S., Huazhong University of Science and Technology, 2008; Ph.D., The University of Texas at Dallas, 2013	Assistant Professor, Electrical and Computer Engineering
Goodman	Jordan A.	Full Member	B.S., University of Maryland-College Park, 1973 M.S., 1975; Ph.D., 1978.	Distinguished Scholar-Teacher, Physics Professor, Physics
Goodman	Lucas	Graduate Teaching	Ph.D., University of Maryland at College Park, 2018	Lecturer, Applied Economics
Goodwin	Andrea J	Associate	B.S., Syracuse University, 1990; M.S., Syracuse University, 1993; Ph.D., University of Maryland-College Park, 2007	n/a, Higher Education
Gor	Kira	Full Member	M.A., Leningrad State University, 1977; Ph.D., 1983; Ph.D., Bryn Mawr College, 1993.	Associate Professor, Second Language Acquisition Associate Professor, Second Language Acquisition
Gordon-Salant	Sandra	Full Member	B.A.,State University of New York-Albany, 1974; M.S., Northwestern University, 1976; Ph.D., Northwestern University, 1981.	Professor, Hearing and Speech Sciences Professor, Neurosciences and Cognitive Science Graduate Director, Clinical Audiology
Gore	Meredith	Full	M.A., George Washington University, 2001; Ph.D., Cornell University, 2006	Associate Professor, Geographical Sciences
Gorham-Oscilowski	Ursula	Full Member	PhD., Information Studies, JD, University of Maryland School of Law; University of Maryland; MLS, University of Maryland; MPM, Master of Public Management.	Lecturer, History and Library & Information Science Lecturer, Human-Computer Interaction Lecturer, Information Management Lecturer, Library and Information Science
Gorshkov	Alexey	Full Member	A.B., Harvard University, 2004; A.M., Harvard University, 2006, Ph.D., Harvard University, 2010.	Adjunct Assistant Professor, Physics
Gould	Peter	Special Member	Ph.D., University College London, 2014; M.L.A., University of Pennsylvania, 2010; B.A., Swarthmore College, 1973	Research Professor, Anthropology
Goulias	Dimitrios	Full Member	Laurea,Universita Degli Studi, 1987; M.S., University of Michigan-Ann Arbor, 1988;Ph.D., University of Texas-Austin, 1992.	Associate Professor, Civil and Environmental Engineering

Goupell	Matthew	Full Member	B.S., Hope College, 2001; M.S., Michigan State University, 2003; Ph.D., Michigan State University, 2005.	Professor, Clinical Audiology Associate Professor, Hearing and Speech Sciences Assistant Professor, Neurosciences and Cognitive Science
Gournay	Isabelle J.	Full Member	M.A., Yale University, 1981;M.Ph., 1982; Ph.D., 1989.	Associate Professor Emeritus, Architecture Affiliate Associate Professor, American Studies
Gowen	Bradford P.	Full Member	B.Mus., Eastman School of Music, 1968; M.Mus., 1969.	Associate Professor, Ethnomusicology Associate Professor, Music Associate Professor, Music Education
Graeber	Anna O.	Full Member	B.S.,State University of New York-Buffalo, 1964; M.S.,Indiana State University-Terre Haute, 1965; Ed.D., Columbia University-Teachers College, 1974.	Associate Professor Emerita, Teaching and Learning, Policy and Leadership
Graf	Chiara	Full Member	B.A., University of Chicago, 2013; Ph.D., University of Toronto, 2020	Assistant Professor, Classics
Grana	Justin	Graduate Teaching	Ph.D., American University, 2016	Lecturer, Applied Economics
Granatstein	Victor L.	Full Member	B.S., Columbia University, 1960;M.S., 1961; Ph.D., 1963.	Professor Emeritus, Electrical and Computer Engineering
Grand	James	Full Member	B.A., Auburn University, 2006; M.A. 2008, Ph.D. Michigan State University, 2012	Assistant Professor, Psychology
Grebmeier	Jacqueline	Full Member	B.S., University of California Davis, 1977; M.S., Stanford University, 1979; M.S., University of Washington, 1983; Ph.D., University of Alaska, 1987.	Research Professor, Marine, Estuarine, and Environmental Sciences
Green	Kerry	Full Member	B.S., College of William and Mary; M.A., University of Maryland; Ph.D., Johns Hopkins University	Assistant Professor, Behavioral and Community Health
Green	Kim Y.	Special Member	B.S., David Lipscomb College, 1976; Ph.D., University of Tennessee, 1986	n/a, Biological Sciences
Greenberg	Oscar Wallace	Full Member	B.S., Rutgers University-New Brunswick, 1952; M.A.,Princeton University, 1954; Ph.D., 1957.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Physics
Greenberg	Stephen	Adjunct Member	PhD, History, Fordham University.	Lecturer, Library and Information Science
Greene	Richard L.	Full Member	B.S., Massachusetts Institute of Technology, 1960; Ph.D., Stanford University, 1967.	Professor, Physics
Greene	Julie	Full Member	PhD, Yale University, 1990	Professor, History
Greenspan	Patricia S.	Full Member	B.A., Columbia University, 1966; M.A.,Harvard University, 1968; Ph.D., 1972.	Professor Emerita, Philosophy

Greer	Sandra C.	Full Member	B.S., Furman University, 1966; M.S.,University of Chicago, 1968; Ph.D., 1969.	Professor Emeritus, Chemistry
Griffin	Kimberly	Full Member	B.A., Stanford University, 1999; M.A., University of Maryland-College Park, 2001; M.A., University of California-Los Angeles, 2005; Ph.D., University of California-Los Angeles, 2008	Professor, Student Affairs Associate Professor
Griffiths	Charles	Graduate Teaching	Ph.D., University of Maryland at College Park, 1997	Lecturer, Applied Economics
Grillakis	Manoussos	Full Member	B.A., National Technical University of Athens, 1981; M.A., Brown University, 1983; Ph.D., 1986.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematics
Grimsted	David A.	Full Member	A.B., Harvard University, 1957; M.A.,University of California-Berkeley, 1958; Ph.D., 1963.	Associate Professor Emeritus, History
Gromov	Andrey	Adjunct Member	BSc, Saint-Petersburg State University, 2009; Ph.D., Stony Brook University, 2015	Assistant Professor, Physics
Groot	Astrid	Special Member	MSc, University of Amsterdam, Netherlands, 1994; PhD, Wageningern University, Netherlands, 2000	Affiliate Associate Professor, Entomology
Grossman	Maxine	Full Member	A.B., Duke University, 1990; M.A., Ph.D., University of Pennsylvania, 2000.	Associate Professor, Jewish Studies Affiliate Associate Professor, Women's Studies
Groth	Katrina	Full Member	B.S., University of Maryland-College Park, 2004; M.S., University of Maryland-College Park, 2008; Ph.D., University of Maryland-College Park, 2009	Associate Professor, Reliability Engineering
Gruner	Daniel	Full Member	AB, Hamilton College, 1993; PhD, University of Hawai'i, 2004	Associate Professor, Entomology Assistant Professor, Biological Sciences
Gudipati	Murthy S.	Non-Member	Ph.D. Indian Institute of Science, Bagalore, India 1987	Associate Research Scientist, Chemical Physics
Guenzler-Stevens	Marsha A	Associate	B.A., Illinois Wesleyan University, 1978; M.S., Miami University, 1982; Ph.D., University of Maryland-College Park, 1993	Director, Student Affairs
Guerrero	Perla	Full Member	B.A., University of Central Arkansas, 2003; M.A., University of Southern California, 2007; Ph.D., University of Southern California, 2010.	Assistant Professor, American Studies
Guilford	Matthew	Adjunct Member	B.M., M.M., New England Conservatory	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education

Gulick	Denny	Full Member	B.A., Oberlin College, 1958; M.A., Yale University,1960; Ph.D., 1963.	Professor, Mathematics
Gullickson	Gay L.	Full Member	B.A.,Pomona College, 1965; B.D., Yale University, 1968; Ph.D.,University of North Carolina-Chapel Hill, 1978.	Professor Emerita, History
Gumerov	Nail A.	Adjunct Member	M.S., Moscow State University, 1981, Ph.D., Moscow State University, 1987 Sc.D., Tyumen State University, 1992	Senior Research Scientist, Applied Mathematics & Statistics, and Scientific Computation
Gupta	Ashwani K.	Full Member	B.Sc., Punjab University, 1966; M.Sc.,University of Southampton, 1970; Ph.D., University of Sheffield, 1973; D.Sc.,1986.	Distinguished University Professor, Mechanical Engineering Distinguished University Professor, Chemical Physics
Gupta	Satyandra K.	Full Member	B.E., University of Roorkee, 1988; M. Technology, Indian Institute of Technology-Delhi, 1989; Ph.D.,University of Maryland-College Park, 1994.	Professor, Mechanical Engineering Professor, Systems Engineering
Gutierrez	Osvaldo	Full Member	Ph.D., UC Davis, 2009; B.S. and M.S. UCLA, 2012	Assistant Professor, Mathematics Assistant Professor, Chemistry Affiliate Professor, Chemical Physics
Guy	Madeline	Graduate Teaching		n/a, Geospatial Intelligence
Haag	Eric S.	Full Member	B.A., Oberlin College, 1990; Ph.D., Indiana University, Bloomington, 1997	Professor, Biological Sciences
Hacquard	Valentine	Full Member	B.A., University of California, Los Angeles, 2000; Ph.D. Massachusetts Institute of Technology, 2006	Professor, Linguistics
Hadden	Jennifer	Full Member	B.A., Smith College, 2005; M.A., Cornell University, 2008; Ph.D., Cornell University, 2011.	Assistant Professor, Government and Politics
Hadley	Nicholas John	Full Member	Ph.D.,University of California, 1983 M.A., University of California, 1978 B.S., Yale University, 1976	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Physics
Hafezi	Mohammad	Full Member	B.S., Ecole Polytechnique; Ph.D., Harvard, 2009.	Associate Professor, Electrical and Computer Engineering
Hagberg	James M.	Full Member	B.A.,Carthage College, 1972; M.S., University of Wisconsin-Madison, 1974; Ph.D.,1976.	Professor, Kinesiology Professor, Physical Activity
Hage	Jerald	Full Member	B.B.A., University of Wisconsin-Madison, 1955; Ph.D., Columbia University, 1963.	Professor Emeritus, Sociology
Haggh-Huglo	Barbara H.	Full Member	B.Mus., University of Illinois-Urbana/Champaign, 1978; M.Mus., 1980; Ph.D., 1988.	Professor, Ethnomusicology Professor, Music Professor, Music Education

Haghani	Ali	Full Member	B.S.,Shiraz University, 1976; M.S., Northwestern University, 1982; Ph.D., 1986. GCEN Academic Advisor for Civil and Environmental Engineering	Professor, Civil and Environmental Engineering
Hahn	Jin-Oh	Full Member	B.S., Seoul National University, 1997; M.S., Seoul National University, 1999; Ph.D., Massachusetts Institute of Technology, 2008.	Assistant Professor, Applied Mathematics & Statistics, and Scientific Computation Assistant Professor, Mechanical Engineering
Haider	M.	Associate	Ph.D., University of Michigan, 1980	Clinical Professor, Global Health
Haines	Thomas J.	Full Member	B.S., University of Michigan, 1990; S.M., University of Chicago, 1991; Ph.D., University of Chicago, 1997.	Associate Chair, Mathematics Professor, Mathematics
Hajiaghayi	Mohammad	Full Member		Professor, Computer Science
Haldey	Olga	Full Member	B.M. in Musicology, Moscow Conservatory College, Russia; M.M in Music Education, University of Sydney, Australia; Ph.D. in Musicology, Ohio State University	Associate Professor, Ethnomusicology Associate Professor, Music Associate Professor, Music Education
Hale	Robert C.	Special Member	B.A., Wayne State University, 1979; M.S., Wayne State University, 1979; Ph.D., College of William & Mary, 1983	University Affiliate, Environmental Science and Technology
Hall	Carter R.	Full Member	B.S., Virginia Tech, 1996; Ph.D. Harvard University, 2002;	Associate Professor, Physics
Hallett	Judith P.	Full Member	A.B., Wellesley College, 1966; A.M.,Harvard University, 1967; Ph.D., 1971.	Affiliate Professor, American Studies Affiliate Professor, Comparative Literature
Halperin	Stephen	Full Member	B.Sc., University of Toronto, 1965; M.Sc., 1966; Ph.D., Cornell University, 1970.	Professor, Mathematics
Haltiwanger	John C.	Full Member	Sc.B., Brown University, 1977; Ph.D.,Johns Hopkins University, 1981.	Distinguished University Professor, Economics
Hambrecht	George	Full Member	Ph.D. 2011 and M.A. 2009 Graduate Center of the City University of New York; B.A. 1995 Bard College	Associate Professor, Anthropology
Hamby	Kelly	Full Member	BS, University of California - Davis, 2009; PhD, University of California - Davis, 2014	Associate Professor, Entomology Assistant Professor, Biological Sciences
Hamiel	Michelle	Adjunct Member		Adjunct Professor, Library and Information Science
Hamilton	Donna B.	Full Member	B.A., Saint Olaf College, 1963; Ph.D.,University of Wisconsin-Madison, 1968.	Professor Emerita, English Language and Literature
Hamilton	Douglas C.	Full Member	A.B., University of Kansas, 1969; S.M.,University of Chicago, 1971; Ph.D., 1977.	Professor, Physics

Hamilton	Douglas P.	Full Member	B.S., Stanford University, 1988; M.S., Cornell University, 1990; Ph.D., 1994.	Professor, Astronomy
Hammond	John	Adjunct Member	Sc.B., Brown University., 1992; Ph.D., University of California-Berkeley, 1997	n/a, Biological Sciences
Hample	Dale J.	Full Member	B.S., Ohio State University, 1971; A.M., University of Illinois, 1972; Ph.D., University of Illinois Urbana-Champaign, 1975.	Associate Professor, Communication
Hamza	Iqbal	Full Member	B.S., Bombay University, 1989; M.S., 1991; PhD, SUNY, Buffalo, 1998	n/a, Biological Sciences
Han	Bongtae	Full Member	B.S., Seoul National University,1981; M.S., 1983; Ph.D., Virginia Polytechnic Institute & State University,1991.	Professor, Mechanical Engineering Professor, Reliability Engineering
Han	Ruibo	Full Member	B.S., China University of Mining & Technology,Beijing, 2004; M.S., Beijiing Normal University, 2006; Ph.D., University of Ottawa, 2012	Director, Geospatial Intelligence
Hancock	Gregory R.	Full Member	B.S., University of Washington, 1986; B.S., 1986; Secondary Teaching Certificate, 1987; M.Ed., 1989; Ph.D., 1991.	Professor, Measurement, Statistics and Evaluation
Hanges	Paul J.	Full Member	B.A., New York University, 1980; M.A.,University of Akron, 1984; Ph.D., 1987.	Professor, Psychology
Hanhardt	Christina Benes	Full Member	B.A., Brown University, 1994; M.A., San Francisco State University, 1998; Ph.D., New York University, 2007.	Associate Professor, American Studies Affiliate Associate Professor, Women's Studies
Hankerson	Shenika	Full Member	Ph.D. Michigan State University	Assistant Professor, Teaching and Learning, Policy and Leadership
Hankins	Laura Diane	Graduate Teaching	B.S., University of Maryland-College Park, 2004; M.Ed., University of Maryland-College Park, 2007	Lecturer, Special Education
Hanmer	Michael J.	Full Member	B.A., SUNY-Geneseo, 1995; M.S., University of Wisconsin, 1996; M.A., University of Michigan, 2000; Ph.D., University of Michigan, 2004	Associate Professor, Government and Politics
Hannenhalli	Sridhar	Adjunct Member	PhD., Pennsylvania State University	Professor, Biological Sciences
Hannenhalli	Sridhar	Special	Ph.D., University of London, 1997	n/a, Biological Sciences
Hanninen	Dora A.	Full Member	B.A., University of Virginia, 1983;M.A., University of Rochester, 1988; Ph.D., 1996.	Associate Professor, Ethnomusicology Associate Professor, Music Associate Professor, Music Education

Hansen	Matthew	Full Member	B.E.E., Auburn University, 1988; M.A., University of North Carolina, 1993; M.S.E., University of North Carolina, 1995; Ph.D., University of Maryland, 2002l	Professor, Geographical Sciences
Hansen	J. Norman	Full Member	B.A., Drake University, 1964; Ph.D.,University of California-Los Angeles, 1968.	Professor Emeritus, Chemistry
Hanson	James C.	Full Member	B.S.,University of Maryland-College Park, 1972; M.Sc.,University of Minnesota-St. Paul, 1974; M.Sc., University of Maryland-College Park, 1978; Ph.D., 1983.	Professor, Agricultural and Resource Economics
Hanson	Christopher T.	Full Member	B.A., Reed College, 1975; J.D.,New York University, 1976; Ph.D., University of North Carolina-Chapel Hill,1999.	Associate Professor, Journalism
Hao	John	Graduate Teaching	Ph.D., Indiana University, 2018	Lecturer, Applied Economics
Hapeman	Cathleen	Special Member	B.S., University of Maryland College Park, 1981; Ph.D., University of Maryland College Park, 1986	n/a, Civil and Environmental Engineering
Harding	James	Full Member	B.A, University of Texas, San Antonio, 1982; M.A. San Diego State University, 1987; Ph.D, University of Maryland College Park, 1991.	n/a, Theatre and Performance Studies
Hargrove	June E.	Full Member	B.A.,University of California-Berkeley, 1968; M.A., New York University-Institute of Fine Arts, 1971; Ph.D., New York University-Institute of Fine Arts, 1976.	Professor Emerita, Art History and Archaeology
Harley	Sharon	Full Member	B.A., Saint Mary of the Woods College, 1970; M.A.,Antioch College, 1971; Ph.D., Howard University, 1981.	Affiliate Associate Professor, American Studies Affiliate Associate Professor, Women's Studies
Harrell	Reginal M.	Full Member	B.S., Clemson University, 1975; M.S., Clemson University, 1977; M.B.A., Salisbury University, 2005; M.Div., Ethics Southeastern Baptist Theological Seminary, 2011; Ph.D., University of South Carolina, 1984.	Professor, Environmental Science and Technology
Harring	Jeffrey R.	Full Member	B.A., Macalester College, 1986; M.S., University of Minnesota-Twin Cities, 2004; Ph.D., University of Minnesota-Twin Cities, 2005.	Professor, Measurement, Statistics and Evaluation

Harrington	J. Patrick	Full Member	B.S., University of Chicago, 1961; M.S., Ohio State University-Columbus, 1964; Ph.D., 1967.	Professor Emeritus, Astronomy
Harris	Curtis C., Jr.	Full Member	B.S., University of Florida, 1956; M.A., Harvard University, 1959; Ph.D., Harvard University, 1960.	Professor Emeritus, Economics
Harris	James F.	Full Member	B.S., Loyola University of Chicago, 1962; M.S., University of Wisconsin-Madison, 1964; Ph.D., 1968.	Professor Emeritus, History
Harris	Andrew I.	Full Member	B.S., University of California-Davis, 1979; M.A., University of California-Berkeley, 1982; Ph.D., 1986.	Chair, Astronomy Professor, Astronomy
Harris	Lora	Full Member	B.A., Smith College, 1998; Ph.D., University of Rhode Island, 2006.	Assistant Professor, Marine, Estuarine, and Environmental Sciences
Harris	Andrew	Full Member	B.S., University of California-Davis, 1979; M.A., University of California-Berkeley, 1982; Ph.D., University of California-Berkeley, 1986	Affiliate Professor, Electrical and Computer Engineering
Harrison	Regina	Full Member	B.S., University of Massachusetts-Amherst, 1965; M.A., University of Illinois-Urbana/Champaign, 1973; Ph.D., 1979.	Professor Emerita, Spanish Language and Literature Affiliate Professor, American Studies
Hartzell	Christine	Full Member	Ph.D. Aerospace Engineering Sciences, University of Colorado at Boulder, 2012; B.S. Aerospace Engineering, Georgia Institute of Technology, 2008	Assistant Professor, Aerospace Engineering
Haslem	John A.	Full Member	A.B.,Duke University, 1956; M.B.A., University of North Carolina, 1961; Ph.D.,1967.	Professor Emeritus of Finance, Robert H. Smith School of Business, Finance
Hassam	Adil B.	Full Member	M.A.,Princeton University, 1976; Ph.D., 1978.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Physics
Hatfield	Bradley D.	Full Member	B.P.E., University of New Brunswick-Fredericton, 1974; B.A.,1975; M.S., Pennsylvania State University, 1976; M.S.A., Ohio University, 1982; Ph.D., Pennsylvania State University, 1982.	Chair, Kinesiology Professor, Kinesiology Professor, Neurosciences and Cognitive Science Professor, Physical Activity
Hathaway	Jonathon	Graduate Teaching	B.A., George Mason University, 2006; MPP, George Mason University, 2009; MBA, Shenandoah University, 2013; PhD (ABD), George Mason Univeristy	Lecturer, Geospatial Intelligence
Haufler	Virginia Ann	Full Member	B.A.,Pennsylvania State University-University Park, 1979; M.A., Cornell University, 1985; Ph.D., 1991.	Associate Professor, Government and Politics

Hawthorne	David	Full Member	BS & BA, Kent State University, 1983; MS, North Carolina State University, 1986; PhD, Cornell University,1993	Associate Professor, Entomology Associate Professor, Biological Sciences
Hazkani	Shay	Full Member		Assistant Professor, Jewish Studies
He	Xin	Full Member	B.S., Peking University, 2003; B.A., Peking Univeristy, 2003; Ph.D., University of Missouri, 2007	Associate Professor, Applied Mathematics & Statistics, and Scientific Computation
He	Xiaoming	Adjunct Member	B.S., Xi'an Jiaotong University, 1995; M.S., Xi'an Jiaotong University, 1998; Ph.D., University of Minnesota, 2004	Professor, Bioengineering
He	Xin	Full	B.S., Peking University, 2003; B.A., Peking University, 2003; Ph.D., University of Missouri, 2007	Associate Professor, Epidemiology Associate Professor, Biostatistics Graduate Director, Epidemiology Graduate Director, Biostatistics
Healy	Dennis M.	Full Member	B.A. University of California-San Diego, 1980; Ph.D., 1986	Professor, Mathematics of Advanced Industrial Technology
Healy	Liam	Adjunct Member	Ph.D. Physics, University of Maryland , 1986; M.S. Physics, University of Maryland, 1981; A.B. Physics, Harvard College, 1979	Senior Lecturer, Aerospace Engineering
Heckscher	Erich	Adjunct Member	B.M., Eastman School of Music, 1994; M.M., Southern Methodist University, 1997	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Heger	Kenneth	Full Member	PhD, University of Maryland	Lecturer, Information Management Lecturer, Information Studies Lecturer, Library and Information Science Lecturer, Curation and Management of Digital Assets (online)
Hellerstein	Judith K.	Full Member	B.S., Brown University, 1987; M.A.,Harvard University, 1992; Ph.D., 1994.	Co-Director, Population Studies Professor, Economics
Helz	George R.	Full Member	B.A., Princeton University, 1964; Ph.D., Pennsylvania State University-University Park, 1970.	Professor Emeritus, Chemistry Affiliate Professor, Geology
Henderson	Ethan	Adjunct Member	MS., Library & Information Science, University of Illinois at Urbana-Champaign	Lecturer, Library and Information Science
Hendricks	Marccus	Full Member	BA, University of North Texas, 2010, MPH, Texas A&M University, 2013; PhD, Texas A&M University, 2017	Assistant Professor, Urban and Regional Planning and Design Assistant Professor, Community Planning

Herberholz	Jens	Full Member	B.S., Albert-Ludwigs-University, Freiburg, Germany; M.S., Albert-Ludwigs-University, Freiburg, Germany; Ph.D., Tehnical University, Munich, Germany	Associate Professor, Neurosciences and Cognitive Science Associate Professor, Psychology
Herf	Jeffrey	Full Member	B.A., University of Wisconsin-Madison, 1969; M.A., State University of New York at Buffalo, 1971; Ph.D., Brandeis University, 1980.	Distinguished University Professor, History
Herold	Keith E.	Full Member	B.S., University of Akron,1977; M.S., Ohio State University-Columbus, 1979; Ph.D., 1985.	Associate Professor Emeritus, Bioengineering
Herovic	Emina	Special Member	B.S., Western Kentucky University, 2010; M.S., University of Kentucky, 2012; Ph.D., University of Kentucky, 2016	n/a, Civil and Environmental Engineering
Herrmann	Jeffrey W.	Full Member	B.S., Georgia Institute of Technology, 1990; Ph.D., University of Florida, 1993.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mechanical Engineering Professor, Systems Engineering
Herschbach	Dennis R.	Full Member	B.A., San Jose State University, 1960; M.S., University of Illinois-Urbana/Champaign, 1968; Ph.D., 1973.	Associate Professor Emeritus, Policy Studies Associate Professor Emeritus, Teaching and Learning, Policy and Leadership
Herskowitz	Sylvan	Graduate Teaching	Ph.D., University of California-Berkeley, 2017	Lecturer, Applied Economics
Herzberg	Osnat	Full Member	B.S., Technion-Israel Institute of Tech-Haifa, 1971; M.S., Weizmann Institute of Science-Rehovoth, 1976; Ph.D., 1982.	Professor, Biochemistry Professor, Chemistry Affiliate Professor, Biological Sciences
Hewitt	Michael P.	Full Member	B. Mus., State University of New York, Potsdam, 1988; M.Mus., Michigan State University, 1992; Ph.D., University of Arizona, 2000.	Associate Professor, Ethnomusicology Associate Professor, Music Associate Professor, Music Education
Heyes	Andrew	Full Member		Research Associate Professor, Marine, Estuarine, and Environmental Sciences
Hicks	Michael	Full Member	Ph.D. University of Pennyslvania, 2001	Professor, Computer Science
Highton	Richard	Full Member	B.A., New York University,1950; M.S., University of Florida, 1953; Ph.D., 1956.	Professor Emeritus, Biological Sciences

Hilderbrand	Robert H.	Full Member	B.S. Frostburg State University, 1992; M.S. Virginia Polytechnic Institute and State University, 1994; Ph.D., Utah State University, 1998	Associate Professor, Marine, Estuarine, and Environmental Sciences
Hildy	Franklin	Full Member	B.A., Shimer College, 1974; M.A. Northwestern University, 1976; Ph.D, Northwestern University, 1980.	n/a, Theatre and Performance Studies
Hill	Robert Lee	Full Member	B.S., North Carolina State University, 1974; M.S., 1981; Ph.D., Iowa State University, 1984.	Professor, Environmental Science and Technology
Hill	Russell T.	Full Member	B.S., University of Natal, South Africa, 1978; Ph.D., University of Cape Town, South Africa, 1988	Professor, Marine, Estuarine, and Environmental Sciences
Hill	Clara E.	Full Member	B.A., Southern Illinois University-Carbondale, 1970;M.A., 1972; Ph.D., 1974.	Professor, Psychology
Hill	Mark D.	Full Member	B.Mus.,North Carolina School of the Arts, 1974; M.Mus., State University of New York-Stony Brook, 1976.	Professor, Ethnomusicology Professor, Music Professor, Music Education
Hill	Wendell T., III	Full Member	B.A.,University of California-Irvine, 1974; M.S., Stanford University, 1976; Ph.D., 1980.	Affiliate Professor, Physics
Hill	Renee	Full Member	PhD., University of Florida.	Senior Lecturer, History and Library & Information Science Senior Lecturer, Library and Information Science Senior Lecturer, School Librarianship Senior Lecturer, Youth Experience
Hill	Wendell	Full Member	B.A., University of California-Irvine, 1974; M.S., Stanford University, 1976; Ph.D., Stanford University, 1980	Professor, Chemical Physics
Hines	Anson H.	Adjunct Member	B.A., Pomona College, 1969; Ph.D., University of California-Berkeley, 1976.	Adjunct Professor, Biological Sciences
Hinkle	Lee	Adjunct Member	B.M. University of South Florida, summa cum laude, M.M., D.M.A. University of Maryland	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Hisnanick	John	Graduate Teaching	Ph.D., West Virginia University, 1986	Lecturer, Applied Economics
Hitchens	Brooklynn	Full Member	B.A., University of Delaware, 2013; M.A., Rutgers, The State University of New Jersey, 2015; Ph.D., Rutgers, The State University of New Jersey, 2020.	Assistant Professor, Criminology and Criminal Justice

Hoffman	Mary Ann	Full Member	B.A., Macalester College, 1971;Ph.D., University of Minnesota-Twin Cities, 1975.	Professor Emerita, Counseling Psychology
Hoffman	Kara D.	Full Member	B.S., University of Kentucky, 1992; M.S., Purdue University, 1994; Ph.D., Purdue University, 1998;	Director, Physics Associate Professor, Physics
Holland	Steve	Special Member	B.A., Saint John's College, 1979; M.D., Johns Hopkins University, 1983	n/a, Biological Sciences
Hollingsworth	Jeffrey K.	Full Member	B.S., University of California-Berkeley, 1988; M.S., University of Wisconsin-Madison, 1990; Ph.D., 1994.	Professor, Computer Science
Hollingsworth	Jeffrey	Full Member	B.S., University of California-Berkeley, 1988; M.S., University of Wisconsin-Madison, 1990; Ph.D., University of Wisconsin-Madison, 1994	Affiliate Professor, Electrical and Computer Engineering
Holzer	Jorge Bilbao	Full Member	M.S., Pontificia Universidad Cat61ica de Chile, 1996; M.B.A, University of Oxford, 2000; M.S., University of Maryland, 2009; Ph.D., University of Maryland, 2010.	Associate Professor, Agricultural and Resource Economics
Honig	Elizabeth A.	Full Member	B.A., Bryn Mawr, 1982; M.A., Yale University, 1984; Ph.D., Yale University, 1992	Professor, Art History and Archaeology Graduate Director, Art History and Archaeology
Hood	Raleigh R.	Full Member	B.S., University of Washington, 1983; Ph.D., University of California-San Diego, 1990.	Professor, Marine, Estuarine, and Environmental Sciences
Hook	Anson	Full Member	B.A., Princeton University, 2008; Ph.D., Stanford University, 2012	Assistant Professor, Physics
Hooks	Cerruti	Full Member	BS, North Carolina Central University, 1987; MS, North Carolina State University, 1994; PhD, University of Hawaii - Manoa, 2000	Professor, Entomology
Hoover	Eric C.	Full Member	B.A., University of California, San Diego, 2002; Ph.D., Northwestern University, 2015	Assistant Professor, Clinical Audiology
Horiuchi	Timothy	Full Member	B.S., California Institute of Technology, 1989 Ph.D., 1997.	Associate Professor, Electrical and Computer Engineering Associate Professor, Neurosciences and Cognitive Science Associate Professor, Systems Engineering
Hornstein	Norbert R.	Full Member	B.A., McGill University-Montreal, 1975; Ph.D., Harvard University, 1979.	Professor, Neurosciences and Cognitive Science Professor Emeritus, Linguistics

Horowitz	Alice Munkhoff	Associate	B.A., University of Iowa, 1964; M.A., University of Iowa, 1965; Ph.D., University of Maryland, 1992	Associate Research Professor, Behavioral and Community Health
Horty	John	Full Member	B.A., Oberlin College, 1977; Ph.D., University of Pittsburgh, 1986.	Professor, Philosophy
Houde	Edward D.	Full Member	B.A., University of Massachusetts, 1963; M.S., Cornell University, 1965; Ph.D., 1968.	Professor, Marine, Estuarine, and Environmental Sciences
Howard	Donna E.	Full Member	B.S., University of Massachusetts-Amherst, 1978; M.P.H., University of Hawaii at Manoa, 1980; D.Pub.Hlth., Johns Hopkins University,1994.	Associate Professor, Behavioral and Community Health
Hsieh	Adam H.	Full Member	B.S., Cornell University, 1994; M.S., University of California, San Diego, 1996; Ph.D., 2000.	Affiliate Associate Professor, Biological Sciences
Hsu	Joanne	Graduate Teaching	Ph.D., University of Michigan, 2011	Lecturer, Applied Economics
Hu	Bei-Lok	Full Member	A.B., University of California-Berkeley, 1967; M.A., Princeton University, 1969; Ph.D., 1972.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Physics
Hu	Liangbing	Full Member	B.S. University of Science and Technology of China, 2002; Ph.D.,University of California, Los Angeles, 2007.	Professor, Materials Science and Engineering Affiliate Assistant Professor, Mechanical Engineering
Hu	Ming	Full	BArch, Southeast University, 1998; MArch, Tsinghua University, 200; MArch, University of Notre Dame, 2003	Assistant Professor, Architecture
Hu	Mengjun	Full Member	B.S., China Agricultural University, 2008; Ph.D., Huazhong Agricultural University, 2013.	Assistant Professor, Plant Science Assistant Professor, Extension Education
Huang	Chengquan	Adjunct Member	B.S., Peking University; M.S., Peking University; Ph.D., University of Maryland.	Associate Research Professor, Geographical Sciences
Huang	Yi Ting	Full Member	B.A., Northwestern University, 2003; M.A., Harvard University, 2005; Ph.D., Harvard University, 2009	Assistant Professor, Hearing and Speech Sciences
Huang	Yi-Ting	Full Member	B.A., Northwestern University, 2003; M.A., Harvard University, 2005; Ph.D., Harvard University, 2009	Assistant Professor, Hearing and Speech Sciences Assistant Professor, Neurosciences and Cognitive Science Assistant Professor, Speech Language Pathology
Huang	Mong-Han	Full Member	B.S., National Taiwan University, 2005; M.S., National Taiwan University, 2006; Ph.D., University of California-Berkeley, 2014	Assistant Professor, Geology

Huang	Huang Chiao	Full Member		Assistant Professor, Bioengineering Assistant Professor, Biophysics
Hubbard	James	Full Member	B.S., Massachusetts Institute of Technology, 1977; M.S., Massachusetts Institute of Technology, 1979; Ph.D., Massachusetts Institute of Technology, 1982	Professor, Aerospace Engineering Professor, Aerospace Engineering
Huh	Yesol	Graduate Teaching	Ph.D., Stanford University, 2013	Lecturer, Applied Economics
Hulten	Charles R.	Full Member	A.B., University of California-Berkeley, 1965; Ph.D.,1973.	Professor Emeritus, Economics
Hultgren	Francine H.	Full Member	B.S., University of Minnesota-St. Paul, 1968; M.S.,North Dakota State University-Fargo, 1977; Ph.D.,Pennsylvania State University-University Park, 1982.	Chair, Policy Studies Chair, Curriculum and Instruction Professor, Policy Studies Professor, Teaching and Learning, Policy and Leadership
Humber	Michael	Graduate Teaching	B.S., University of Maryland, 2011; M.P.S., University of Maryland, 2013; PhD, University of Maryland, 2019	Assistant Research Professor, Geospatial Information Sciences
Humbert	J. Sean	Full Member	B.S., University of California, Davis; M.S., California Institute of Technology, ;Ph.D., California Institute of Technology,	Affiliate Associate Professor, Aerospace Engineering
Hunt	Brian R.	Full Member	M.A., University of Maryland-College Park, 1983; Ph.D., Stanford University, 1989.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor Emeritus, Mathematics
Huntley	Sylvia S	Graduate Teaching	B.Th, Theology & Seminary, 1996; BSW/B.A., University of Maryland Baltimore, 2007; M.S., Coppin State University, 2010; Ed.D., Argosy University, 2018	Lecturer, School Counseling
Huq	Anwar	Full Member	B.S., University of Karachi, Pakistan, 1973; M.S., University of Karachi, Pakistan, 1973, Ph.D. University of Maryland College Park, 1984	Professor, Marine, Estuarine, and Environmental Sciences
Hurford JR	Terry	Special Member	B.S., University of Arizona, 1998; Ph.D., University of Arizona, 2005	University Affiliate, Geology
Hurley	Megan M.	Adjunct Member	B.S., Ithaca College, 1991; M.A. The Pennsylvania State University, 1993; Ph.D. The Pennsylvania State University, 1998	University Affiliate, Human Development
Hurley	Bernard F.	Full Member	B.A., University of South Florida, 1972; M.A., 1975; Ph.D., Florida State University, 1981.	Professor, Physical Activity Professor Emeritus, Kinesiology

Hurtt	Steven W.	Full Member	A.B., Princeton University, 1963;M.F.A., 1965; M.Arch., Cornell University, 1967.	Professor, Architecture Affiliate Professor, American Studies
Hurtt	George	Full Member	B.A., Middlebury College, 1990; M.S., Univ. of Connecticut, 1992; PhD, Princeton, 1997.	Professor, Geographical Sciences
Hutcheson	Steven W.	Full Member	A.B.,University of California-Santa Cruz, 1975; Ph.D.,University of California-Berkeley, 1982.	Professor, Biological Sciences
Huth	Paul K.	Full Member	B.A., University of Wisconsin-Milwaukee, 1981; M.A., M.Phil., Yale University, 1984; Ph.D., Yale University, 1986	Professor, Government and Politics
Hwang	Yunho	Full Member	B.S., 1983, Korea University-Seoul; M.S., 1995, University of Maryland; Ph.D., 1997, University of Maryland	Associate Research Professor, Mechanical Engineering
Ide	Kayo	Full Member	B.S., Nagoya University, Japan; M.S., Ph.D. California Institute of Technology	Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Assistant Professor, Atmospheric and Oceanic Science
Idsardi	William	Full Member	B.A., University of Toronto, 1988; Ph.D., Massachusetts Institute of Technology, 1992	Chair, Linguistics Professor, Linguistics Professor, Neurosciences and Cognitive Science Affiliate Professor, Second Language Acquisition
Igel	Regina	Full Member	M.A., State University of Iowa, 1969; Ph.D., University of New Mexico, 1973.	Professor, Spanish Language and Literature Professor Emerita, Spanish Language and Literature Affiliate Professor, Jewish Studies
Iliadis	Agisilaos	Full Member	B.S., Aristotelian University of Thessaloniki, 1975; M.S., University of Manchester, 1976; Ph.D., 1980.	Professor, Electrical and Computer Engineering
Imig	David	Full Member	B.A., University of Illinois, Urbana-Champaign, 1961; M.A., University of Illinois, Urbana-Champaign, 1964; Ph.D., University of Illinois, Urbana-Champaign, 1969	Professor of Practice, Teaching and Learning, Policy and Leadership Professor of Practice, Curriculum and Instruction
Infante	Chad	Full Member	B.A. CUNY 2011, MA Northwestern 2013, PhD Northwestern 2018	Assistant Professor, English Language and Literature
Intepe Tingir	Seyma	Graduate Teaching	B.S., University of Maryland-College Park, 2004; M.Ed., University of Maryland-College Park, 2007	Lecturer, Special Education
Irazabal Zurita	Clara	Full Member	BArch, Central University of Venezuala, 1987; MArch, University of California at Berkeley; PhD, University of California at Berkeley, 2002	Director, Community Planning Professor, Community Planning

Irazábal Zurita	Clara	Full Member	BArch, Central University of Venezuala, 1987; MArch, University of California at Berkeley; PhD, University of California at Berkeley, 2002	Professor, Urban and Regional Planning and Design
Isaacs	Lyle D.	Full Member	B.S., University of Chicago,1991; M.S., University of California-Los Angeles, 1992; Ph.D., Swiss Federal Institute of Tech-Zurich, 1995.	Professor, Chemistry
Iseki	Hiroyuki	Full Member	Ph.D. University of California, Los Angeles	Associate Professor, Urban and Regional Planning and Design Associate Professor, Community Planning
Isman	Kenneth	Full Member	B.S., Fire Protection Engineering, University of Maryland, 1986; M.S., Management, University of Maryland University College, 2003	Clinical Professor, Fire Protection Engineering
Iso-Ahola	Seppo E.	Full Member	B.S., University of Jyvaskyla-Finland, 1971; M.S., University of Illinois-Urbana/Champaign, 1972; M.S., University of Jyvaskyla-Finland, 1973; Ph.D.,University of Illinois-Urbana/Champaign, 1976.	Professor, Kinesiology Professor, Physical Activity
Israel	Michael	Full Member	B.A., U.C. Berkeley, 1989 Ph.D., U.C. San Diego, 1998	Associate Professor, English Language and Literature Associate Professor, Neurosciences and Cognitive Science
Iwamoto	Derek	Full Member	B.A.,University of California-Irvine 2001,; M.A.,University of Nebraska-Lincoln, 2003; Ph.D. University of Nebraska-Lincoln, 2007.	Associate Professor, Psychology
Jabin	Pierre-Emmanuel	Full Member	Ph.D., University Paris VI, 2000	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematics
Jackson	Matthew	Special	B.S., Yale University, 2001; Ph.D., Massachusetts Institute of Technology, 2008.	University Affiliate, Geology
Jacobs	David	Full Member	B.A., Yale University, 1982; M.S., Massachusetts Institute of Technology, 1988; Ph.D., Massachusetts Institute of Technology, 1992	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Computer Science Associate Professor, Neurosciences and Cognitive Science Affiliate Professor, Electrical and Computer Engineering

Jacobsen	Wade	Full Member	B.S., Brigham Young University, 2009; M.S., Brigham Young University, 2011; Ph.D., Pennsylvania State University, 2017.	Assistant Professor, Criminology and Criminal Justice
Jacobson	Theodore A.	Full Member	B.A., Reed College, 1977; Ph.D., University of Texas-Austin, 1983.	Distinguished Scholar-Teacher, Physics Professor, Physics
Jaeger	Paul T.	Full Member	B.A., New College, 1996; M.Ed., University of North Florida, 1998; J.D., Florida State University, 2001; MSLIS, Florida State University, 2003; Ph.D., Florida State University, 2006.	Professor, History and Library & Information Science Professor, Human-Computer Interaction Professor, Information Management Professor, Information Studies
JaJa	Joseph F.	Full Member	B.S., American University-Beirut, 1974; M.S., Harvard University, 1976; Ph.D., 1977.	Chair, Electrical and Computer Engineering Professor, Electrical and Computer Engineering Affiliate Professor, Computer Science
Jakobson	Michael	Full Member	M.A., Moscow State University, 1967; Ph.D., 1970.	Professor, Mathematics
James	Bruce R.	Full Member	B.A., Williams College, 1973; M.S., University of Vermont, 1979; Ph.D., 1981.	Professor Emeritus, Environmental Science and Technology Affiliate Professor, Geology
Jarboe	Darren	Full Member	B.S., Iowa State University, 1985; M.S., Iowa State University, 1991; Ph.D., Iowa State University, 2012.	Assistant Director, Extension Education Principal Agent, Extension Education
Jarzynski	Christopher	Full Member		Professor, Physics Professor, Biophysics Professor, Chemical Physics Professor, Chemistry
Jawahery	Abolhassan	Full Member	B.S., Tehran University, 1976; M.S., Tufts University, 1977; Ph.D., 1981.	Distinguished University Professor, Physics Professor, Physics
Jay	Steven M.	Full Member	B.S., University of Georgia, 2004; Ph.D., Yale University, 2009.	Associate Professor, Bioengineering Affiliate Assistant Professor, Biological Sciences
Jeffery	William Richard	Full Member	B.S., University of Illinois-Chicago, 1967; Ph.D., University of Iowa, 1971.	Distinguished University Professor, Biological Sciences Professor, Biological Sciences
Jelen	Sheila	Full Member	B.A. University of Michigan-Ann Arbor, 1993; Ph.D., University of California-Berkeley, 2001.	Associate Professor, Jewish Studies
Jelveh	Zubin	Full Member	B.A., University of Chicago, 1999; M.S., Columbia University, 2003; M.A., Columbia University, 2011; Ph.D., New York University, 2017.	Assistant Professor, Criminology and Criminal Justice

Jette	Shannon	Full Member	B.SC., Simon Fraser University, 1998; M.A. University of British Columbia, 2004; Ph.D., University of British Columbia, 2009.	Assistant Professor, Kinesiology Assistant Professor, Physical Activity
Jewell	Christopher M.	Full Member	B.S., Lehigh University, 2003; M.S., University of Wisconsin-Madison, 2005; Ph.D., 2008.	Professor, Bioengineering Affiliate Assistant Professor, Biological Sciences
Ji	Xiangdong	Full Member	B.S., Tongji University/ Tungchai University, 1982; M.S., Drexel University, 1985; Ph.D., 1987.	Professor, Physics
Jiang	Nan	Full Member	B.A., Nanjiang Normal University, China, 1984; M.A. East China Normal University, 1987; Ph.D. University of Arizona, 1998.	Associate Professor, Neurosciences and Cognitive Science Associate Professor, Second Language Acquisition Associate Professor, Second Language Acquisition
Jiao	Hong	Full Member	B.S., Shanghai Jiaotong University, 1989; M.A., Shanghai Jiaotong University, 1992; Ph.D., Florida State University, 2003.	Professor, Measurement, Statistics and Evaluation
Jin	Ginger Zhe	Full Member	B.A., University of Science and Technology of China, 1992; M.A., Graduate School of People's Bank of China, 1995; Ph.D., UCLA 2000.	Professor, Economics
Jin	Younggeon	Full Member	D.V.M., Jeju National University, 2009; Ph.D. North Carolina State University, 2014	Assistant Professor, Animal Sciences
Johnson	Arthur T.	Full Member	B.S.A.E., Cornell University, 1964; M.S., 1967; Ph.D., 1969.	Professor Emeritus, Bioengineering
Johnson	Martin L.	Full Member	B.S., Morris College, 1962; M.Ed., University of Georgia, 1968; Ed.D., 1971.	Professor Emeritus, Teaching and Learning, Policy and Leadership
Johnson	Brian D.	Full Member	B.A., Lawrence University, 1997; M.A., Pennsylvania State University, 2000; Ph.D., Pennsylvania State University, 2003.	Professor, Criminology and Criminal Justice Graduate Director, Criminology and Criminal Justice
Johnson	Philip	Adjunct Member	Ph.D., University of California Berkeley, 2009	Assistant Professor, Biological Sciences
Johnston	Jesse	Adjunct Member	PhD, Musicology, University of Michigan.	Lecturer, History and Library & Information Science Lecturer, Library and Information Science
Jones	Marian Moser	Full Member	A.B., Harvard, 1992; M.P.H., Columbia University, 2005; Ph.D. Columbia University, 2008.	Assistant Professor, Family Science Assistant Professor, Maternal and Child Health

Jones	Anya R.	Full Member	B.S., Rensselaer Polytechnic Institute, 2004; S.M., Massachusetts Institute of Technology, 2006; Ph.D., University of Cambridge, 2010	Assistant Professor, Aerospace Engineering
Jones	Calvert	Full Member	Ph.D., Yale University, 2013	Assistant Professor, Government and Politics
Jones	Loren	Associate	Ph.D. University of Miami	Associate Clinical Professor, Teaching and Learning, Policy and Leadership
Jones	Christine	Associate	B.A., Villanova University, 1991; M.A., Princeton University, 1995; Ph.D., Princeton University, 2002.	Adjunct Associate Professor, French Studies Affiliate Associate Professor, French Modern Studies
Jones Harden	Brenda P.	Full Member	B.A., Fordham University, 1979;M.S.W., New York University, 1980; M.S., Yale University, 1991; Ph.D., 1996.	Professor, Human Development
Jose	Antony	Full Member	B.S., Anna University, 1999; Ph.D., Yale University, 2005	Associate Professor, Biological Sciences
Jourdan	Dawn	Full	BS, BA, Bradley University, 1996; JD, University of Kansas, 2000; Ph.D., Florida State University, 2004	Dean, Urban and Regional Planning and Design
Joyce	Nicholas	Full Member	M.S., University of Massachusetts-Amherst; Ph.D., University of Arizona, 2014	Assistant Professor, Communication
Julienne	Paul S.	Full Member	B.S., Wofford College, 1965; Ph.D., University of North Carolina-Chapel Hill, 1969.	Adjunct Professor, Physics
Julin	Douglas A.	Full Member	B.A., Haverford College, 1978 Ph.D., University of California-Berkeley, 1984.	Associate Professor, Biochemistry Associate Professor, Chemistry Graduate Director, Biochemistry
Juntti	Scott	Full Member	Ph.D., University of California San Francisco	Assistant Professor, Biological Sciences
Just	Richard E.	Full Member	B.S., Oklahoma State University-Stillwater, 1969; M.A.,University of California-Berkeley, 1971; Ph.D., 1972.	Distinguished University Professor Emeritus, Agricultural and Resource Economics
Justice	Christopher O.	Full Member	B.A., University of Reading, 1973; Ph.D., University of Reading, 1977.	Professor, Geographical Sciences
Kacorri	Hernisa	Full Member	PhD Computer Science, City University of New York, 2016; MS Computer Science, City University of New York, 2014; MS Advanced Computer Systems, National and Kapodistrian University of Athens, 2011; BS Computer Science, National and Kapodistrian University of Athens, 2007.	Assistant Professor, Human-Computer Interaction Assistant Professor, Information Management Assistant Professor, Information Studies Assistant Professor, Library and Information Science

Kagan	Abram	Full Member	M.A., University of Tashkent, 1958; Ph.D., University of Leningrad, 1963; D.Sc., 1967.	Professor, Mathematical Statistics Professor, Mathematics
Kahn	Joan R.	Full Member	B.A., Stanford University, 1978; M.A.,University of Michigan-Ann Arbor, 1982; Ph.D., 1985.	Co-Director, Population Studies Professor, Sociology
Kahn	Jason D.	Full Member	B.A., Harvard University, 1983; Ph.D., University of California-Berkeley, 1990.	Associate Professor, Biochemistry Associate Professor, Biological Sciences Associate Professor, Chemistry Affiliate Associate Professor, Bioengineering
Kalantari Khandani	Mehdi	Adjunct Member	B.Sc. and M.Sc., Sharif University of Technology, Iran, 1996 and 1998; Ph.D., University of Maryland, 2005.	Assistant Research Scientist, Electrical and Computer Engineering
Kalemli-Ozcan	Sebnem	Full Member	B.S., Middle East Technical University, 1995; M.A., Brown University, 1997; Ph.D., Brown University, 2000.	Professor, Economics
Kalnay	Eugenia E	Full Member	B.A., Lenguas vas Buenos Aires, 1970; M.A.,Licenciatura en Ciencias Meteorologicas, 1972; Ph.D.,Massachusetts Institute of Technology, 1978.	Distinguished University Professor, Applied Mathematics & Statistics, and Scientific Computation Distinguished University Professor, Atmospheric and Oceanic Science Affiliate Professor, Civil and Environmental Engineering
Kaloshin	Vadim	Full Member	B.A. Moscow State University, 1994 M.A. Princeton University, 1997 Ph.D. Princeton University, 2001	Professor, Mathematics
Kanal	Laveen N.	Full Member	B.S., University of Washington, 1951;M.S., 1953; Ph.D., University of Pennsylvania, 1960.	Professor Emeritus, Computer Science
Kane	Shannon	Associate	Ed.D., University of Pennsylvania	Assistant Clinical Professor, Teaching and Learning, Policy and Leadership
Kangas	Patrick C.	Full Member	B.S., Kent State University, 1974; M.S., University of Oklahoma, 1978; Ph.D.,University of Florida, 1983.	Associate Professor, Environmental Science and Technology
Kaplan	Ethan	Full Member	B.A., U.C. Berkeley, 1992; M.A., Stanford University, 1999; Ph.D., U.C. Berkeley, 2005.	Associate Professor, Economics
Karamustafa	Ahmet	Full Member	B.A., Hamilton College, 1978; M.A., McGill University, 1981; Ph.D., 1987.	Professor, History

Karlsson	Amy	Full Member	BS Iowa State University Ames, IA 2003 Ph.D., University of Wisconsin Madison, WI 2009	Associate Professor, Chemical Engineering Affiliate Associate Professor, Bioengineering
Karol	David	Full Member	B.A., Grinnell College, 1992; M.A., Iowa State University, 1994; Ph.D., University of California, Los Angeles, 2005.	Associate Professor, Government and Politics
Kastner	Scott	Full Member	B.A., Cornell University, 1995; M.A., University of California-San Diego, 1998; Ph.D., University of California-San Diego, 2003	n/a, Government and Politics
Katz	Jonathan	Full Member	B.S. Chemistry, MIT, 1996; B.S. Mathematics, MIT, 1996; M.A., Columbia University, 1998; Ph.D., Columbia University, 2002.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Computer Science
Kaufer	Mollie	Adjunct Member		Assistant Director, Professional Communication for Enhanced English Fluency Assistant Director, Professional Communication for Enhanced English Fluency (online)
Kauffman	Linda	Full Member	B.A., University of California-Santa Barbara, 1971; Ph.D., 1978.	Professor Emerita, English Language and Literature Professor Emeritus, Comparative Literature
Kaufman	Alan Jay	Full Member	B.A., Louisiana State University-Baton Rouge, 1982; B.S., 1982; M.S., Indiana University-Bloomington, 1986; Ph.D., 1990.	Professor, Geology
Kaushal	Sujay S.	Full Member	B.A., Cornell University, 1997; Ph.D., University of Colorado, 2003.	Associate Professor, Geology
Kawano	Laura	Graduate Teaching	Ph.D., University of Michigan, 2010	Lecturer, Applied Economics
Kearney	Michael	Full Member	B.A., Univ. of Illinois, 1973; M.A., Western Illinois Univ., 1976; Ph.D., Univ. Western Ontario, 1981.	Professor, Environmental Science and Technology Affiliate Professor, Geology
Kearney	Melissa	Full Member	A.B., Princeton University, 1996; Ph.D., Massachusetts Institute of Technology, 2002.	Professor, Economics
Kedem	Benjamin	Full Member	B.S., Roosevelt University, 1968; M.S.,Carnegie-Mellon University, 1970; Ph.D., 1973.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematical Statistics Professor, Mathematics

Keefe	Maura	Full Member	University of California, RiversidePhD, Dance history and theory 2002Dissertation:Talking Dancing: The Choreography of Space and Character in Contemporary U.S. Dance.Smith College, Northampton, MA MFA in choreography and performance, Dance 1992William Smith College, Geneva, NY BA with Honors in Dance and English 1985	Associate Professor, Dance
Keefer	Carol L.	Full Member	B.S., University of South Carolina, 1974; PhD, University of Delaware, 1981	Professor, Animal Sciences Graduate Director, Animal Sciences
Keener	CY E.	Full Member	B.A., Colorado College, 1998; M.Arch., University of California, Berkeley, 2005; M.F.A., Stanford University, 2016	Assistant Professor, Art Studio
Keitt	Janae	Graduate Teaching	B.A., College of William & Mary, 2000; M.A., College of William & Mary 2004; Ph.D., University of Maryland, 2014	Lecturer, Special Education
Keleher	Peter J.	Full Member	B.S., Rice University, 1986; M.S.,1992; Ph.D., 1994.	Associate Professor, Computer Science
Kelejian	Harry H.	Full Member	B.A., Hofstra University, 1962; M.A.,University of Wisconsin-Madison, 1964; Ph.D., 1968.	Professor Emeritus, Economics
Kellner	Paul Steve	Adjunct Member	B.M.,University of Maryland; M.M., D.M.A, Catholic University	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Kelly	Brian Paul	Full Member	B.Arch., University of Notre Dame, 1981; M.Arch., Cornell University, 1987.	Area Chair, Architecture
Kelly	Franklin W.	Full Member	B.A., University of North Carolina, 1974; M.A., Williams College, 1979; Ph.D., University of Delaware, 1985.	Affiliate Associate Professor, American Studies
Kelly	R. Gordon	Full Member	B.A., DePauw University, 1961; M.A.,Claremont Graduate School, 1962; Ph.D., University of Iowa, 1970.	Professor, American Studies
Kelly	Brian	Full Member	B.Arch., University of Notre Dame, 1981; M.Arch., Cornell University, 1987.	Professor, Urban and Regional Planning and Design
Kelman	Zvi	Full Member	B.S., Hebrew University of Jerusalem, 1987 M.Sc., Weizmann Institute of Science, 1989 Ph.D., Cornell University Medical School, 1996	Affiliate Professor, Biological Sciences
Kempton	Eliza	Full Member	B.A. Middlebury College, 2003; Ph.D. Harvard University, 2009.	Associate Professor, Astronomy

Kendall	Kathleen	Full Member	B.A., Oberlin College, 1958; M.A., University of Southern Mississippi, 1960; Ph.D., Indiana University, 1966.	Research Professor, Communication
Kent	Bretton	Non-Member	BS, Oregon State University, 1973; MS, Oregon State University, 1976; PhD, University of Maryland, 1981	Senior Lecturer, Entomology
Kerner	Hannah	Graduate Teaching	B.S., University of North Carolina at Chapel Hill, 2014; PhD, Arizona State University, 2019	Assistant Research Professor, Geospatial Information Sciences
Kerstein	Samuel J.	Full Member	B.A., Wesleyan University, 1987; M.A.,Columbia University, 1990; M.Ph., 1991; Ph.D., 1995.	Chair, Philosophy Professor, Philosophy
Keshavarz	Fatemeh	Full Member		Affiliate Professor, Comparative Literature
Keshavarz-Karamustafa	Fatemeh	Full Member	B.A. Shiraz University; M.A., Ph.D., University of London	Affiliate Professor, Women's Studies
Kestnbaum	Meyer	Full Member	B.A., Harvard University, 1986; M.A., 1989;Ph.D., 1997.	Associate Professor, Sociology
Ketelhut	Diane Jass	Full Member	M.Ed., University of Virginia, 1988; Ed.D., Harvard Graduate School, 2006	Professor, Teaching and Learning, Policy and Leadership Associate Professor, Curriculum and Instruction
Khaligh	Alireza	Full Member	B.S., Sharif University of Technology, 1999; M.S., 2001; Ph.D., Illinois Institute of Technology, 2006	Professor, Electrical and Computer Engineering
Khamis	Sahar Mohamed	Full Member	B.A., American University in Cairo, 1986; M.A., American University in Cairo, 1989; Ph.D., University of Manchester, 2000.	Associate Professor, Communication Affiliate Associate Professor, Women's Studies
Khuller	Samir	Full Member	B.Tech.,Indian Institute of Technology, 1986; M.S., Cornell University, 1989; Ph.D., 1990.	Professor, Computer Science
Kiemel	Tim	Associate	B.S. Math, University of Minnesota, 1984; M.S., Cornell University, 1987; Ph.D., Cornell University, 1990.	Assistant Research Professor, Applied Mathematics & Statistics, and Scientific Computation
Kier	Craig	Full Member	B.M.E., State University of New York College at Fredonia; M.M. Accompanying, U. of Cincinnati College-Conservatory of Music	Assistant Professor, Ethnomusicology Assistant Professor, Music Assistant Professor, Music Education
Kiger	Kenneth T.	Full Member	B.S., University of Southern California-Los Angeles, 1991; M.S., University of California-San Diego, 1993; Ph.D., 1995.	Professor, Mechanical Engineering
Kilbourne	Kelly H.	Full Member	Ph.D. University of South Florida, 2004	Research Assistant Professor, Marine, Estuarine, and Environmental Sciences

Kill	Melanie	Full Member	B.A., The Evergreen State College, 1999; M.A., University of Washington, 2003; Ph.D., 2008.	Assistant Professor, English Language and Literature
Killam	Howard William	Adjunct Member	MA, Marymount University	Lecturer, Information Management Lecturer, Information Studies Lecturer, Library and Information Science
Killen	Melanie A.	Full Member	B.A., Clark University, 1978; M.A., University of California-Berkeley, 1981; Ph.D.,1985.	Professor, Human Development Professor, Neurosciences and Cognitive Science
Kim	Byung-Eun	Full Member	B.S., Kangwon National University, Microbiology, 1993; M.S., Kangwon National University, Microbiology, 1996; Ph.D., University of Missouri-Columbia, Genetics, 2004	Associate Professor, Animal Sciences Affiliate Assistant Professor, Biological Sciences
Kim	Jungho	Full Member	B.S., University of California-Berkeley, 1982; M.S., University of Minnesota-Twin Cities, 1986; Ph.D., 1990.	Professor, Mechanical Engineering
Kim	Jeong H.	Non-Member	B.S., Johns Hopkins University, 1982; M.S., 1989; Ph.D., University of Maryland--College Park, 1991	Professor of Practice, Electrical and Computer Engineering Professor of Practice, Mechanical Engineering
Kim	Seung-Kyung	Full Member	B.A., Yonsei University-Seoul, 1977; M.A., City University of New York-Graduate School & Univ. Center, 1987; Ph.D., 1990.	Professor Emerita, Women's Studies Affiliate Professor, American Studies
Kim	Jinhee	Full Member	B.S., Seoul National University, 1993; M.S., 1995; Ph.D., Virginia Polytechnic Institute and State University, 2000.	Associate Professor, Family Science Associate Professor, Maternal and Child Health
Kim	Myungseob (Edward)	Special Member	B.Eng., Incheon National University, 2006; M.Eng., Incheon National University, 2008; M.S., University of Maryland, 2012; Ph.D., University of Maryland, 2013	Assistant Professor, Civil and Environmental Engineering
Kim	Jiyoun	Full Member	B.A., Korea University, 2003; M.A., Korea University, 2006; Ph.D., University of Wisconsin-Madison, 2014	Assistant Professor, Communication
Kim	Hong	Graduate Teaching	Ph.D., University of California-Davis, 1994	Lecturer, Applied Economics
Kim	Yeh Jun	Graduate Teaching	A.S., Rochester Institute of Technology, 2016; B.S., Rochester Institute of Technology, 2017; M.S., Rochester Institute of Technology, 2018; M.A., Gallaudet University, 2020	Lecturer, Special Education

King	Richard G.	Full Member	B.Mus., University of Alberta-Edmonton,1981; M.Mus., 1984; Ph.D., Stanford University, 1992.	Associate Professor, Ethnomusicology Associate Professor, Music Associate Professor, Music Education
King	Julia	Special Member	Ph.D. 1990, M.A. 1982 University of Pennsylvania; M.A. 1981 Florida State University; B.A. 1978 The College of William and Mary	Research Professor, Anthropology
King-Marshall	Evelyn Claire	Associate	B.S., University of Florida, 2005; M.P.H., University of Florida, 2007, Ph.D., University of Florida, 2013	n/a, Behavioral and Community Health
Kirk	James A.	Full Member	B.S., Ohio University-Athens, 1967 M.S., Massachusetts Institute of Technology, 1969; Sc.D., 1972.	Professor Emeritus, Mechanical Engineering
Kirkland-Gordon	Sharon	Adjunct Member	B.S., Spelman College in Psychology, 1979; M.S., University of Buffalo in Rehabilitation Counseling, 1979; D.O., University of Buffalo in Counseling Psychology, 1991.	Director Affiliate Assistant Professor
Kirkpatrick	Theodore R.	Full Member	B.S., University of California-Los Angeles, 1977; Ph.D., Rockefeller University, 1981.	Professor, Physics
Kirschenbaum	Matthew G.	Full Member	B.A., SUNY Albany, 1992; M.A., University of Virginia, 1994; Ph.D., 1999.	Professor, English Language and Literature Affiliate Associate Professor, American Studies Affiliate Associate Professor, Human-Computer Interaction Affiliate Associate Professor, Information Management Affiliate Associate Professor, Information Studies Affiliate Associate Professor, Library and Information Science
Kirwan	William E.	Full Member	A.B., University of Kentucky, 1960; M.S., Rutgers Unviersity, 1962; Ph.D., Rutgers University, 1964.	Professor Emeritus, Mathematics
Kishek	Rami Alfred	Full Member	Ph.d., University of Michigan, 1997; M.S.E., University of Michigan, 1995; B.S.E., University of Michigan, 1993.	Research Professor, Applied Mathematics & Statistics, and Scientific Computation
Kivlighan	Dennis	Full Member	B.S., College of William and Mary Psychology, 1975; M.S., Virginia Commonwealth University Counseling Psychology, 1980; Ph.D., Virginia Commonwealth University Counseling Psychology APA Accredited) Specialty Area: Group Counseling and Psychotherapy, 1982.	Professor Professor, Counseling Psychology

Kjellerup	Birthe	Full Member	M. Sc. Environmental Engineering, Aalborg University, 1997; Ph.D., Environmental Microbiology, Aalborg University, 2004	Assistant Professor, Civil and Environmental Engineering Affiliate Associate Professor, Bioengineering
Klank	Richard E.	Full Member	B.Arch., Catholic University of America, 1962; M.F.A., 1964.	Associate Professor, Art Studio
Klauda	Jeffery	Full Member	Ph.D. University of Delaware	Associate Professor, Biophysics Associate Professor, Chemical Engineering Graduate Director, Chemical Engineering
Klees	Steven J.	Full Member	B.A., CUNY-Queens College, 1968;M.A., Stanford University, 1971; M.B.A., 1971; Ph.D., 1975.	Professor, International Education Policy Professor Affiliate Professor, Women's Studies
Klein	Elisa L.	Full Member	B.A., Kalamazoo College, 1975; M.S., Pennsylvania State University-University Park, 1977; Ph.D., 1980.	Associate Professor, Human Development
Kleinman	Dushanka	Full	B.S., University of Wisconsin; D.D.S., University of Illinois-Chicago College of Dentistry; M.Sc.D., Boston University Henry M. Goldman School of Dental Medicine	Professor, Epidemiology Professor, Biostatistics
Kleykamp	Meredith	Full Member	B.A., University of Texas as Austin, 1998; M.A., Princeton University, 2001; Ph.D., Princeton University, 2007.	Associate Chair, Sociology Associate Professor, Sociology Affiliate Associate Professor, Women's Studies
Klose	Kevin	Full Member	B.A., Harvard	Professor, Journalism
Klumpp	James F.	Full Member	B.A., University of Kansas, 1968; M.A., University of Minnesota, 1971; Ph.D., 1973.	Professor Emeritus, Communication
Knaap	Gerrit	Full Member	B.S., Willamette University-Salem, 1978; M.S., University of Oregon, 1982; Ph.D., 1982.	Professor, Urban and Regional Planning and Design Professor, Community Planning
Knott	Cheryl L	Full Member	B.S.,SUNY-Brockport; M.S.,East Tennessee University; Ph.D.,St. Louis University	Associate Professor, Behavioral and Community Health
Kocher	Thomas D.	Full Member	B.A., Yale University, 1981; Ph.D., University of Colorado, 1986.	Professor, Biological Sciences
Koeth	Timothy	Non-Member	Ph.D., Rutgers University, 2009	Research Assistant Professor, Chemical Physics
Koeth	Tim	Full Member	B.S., Rutgers University , 1997; Ph.D., Rutgers University , 2009.	Assistant Professor, Materials Science and Engineering

Kofinas	Peter	Full Member	B.S., Massachusetts Institute of Technology, 1989; M.S., 1989; Ph.D., 1994.	Professor, Chemical Physics Affiliate Professor, Materials Science and Engineering Affiliate Professor, Bioengineering Affiliate Professor, Chemical Engineering
Kohl	Frances L.	Full Member	B.S., University of Wisconsin-Madison, 1973; M.Ed., Temple University, 1975; Ph.D., University of Illinois-Urbana/Champaign, 1979.	Associate Professor Emerita, Special Education
Kohn	Richard A.	Full Member	B.S., Cornell University, 1985;M.S., University of New Hampshire-Durham, 1987; Ph.D., Michigan State University, 1993.	Professor, Animal Sciences
Kohn	Matthew J.	Special Member	B.S., Massachusetts Institute of Technology, 1986; M.S., Rensselaer Polytechnic Institute, 1989; Ph.D., Rensselaer Polytechnic Institute 1981	University Affiliate, Geology
Koliji	Hooman	Full Member	B.Arch., Shahid Beheshti University, 1997; M.Arch., Shahid Beheshti University, 2000; MLA, Virginia Tech, 2009.	Associate Clinical Professor, Architecture
Kollar	Alicia	Full Member	B.A., Princeton University, 2010; Ph.D., Stanford University, 2016	Affiliate Assistant Professor, Electrical and Computer Engineering
Kolodziej	Edward	Special Member	B.S., Johns Hopkins University, 1998; M.S., University of California Berkeley, 1999; Ph.D., University of California Berkeley, 2004	n/a, Civil and Environmental Engineering
Kolowitz	Brian	Adjunct Member	PhD., Robert Morris University	Lecturer, Human-Computer Interaction Lecturer, Information Management Lecturer, Library and Information Science
Konstantinou	Lee	Full Member	B.A., Cornell Univ., 2000; M.A., Stanford Univ., 2008; Ph.D., 2009.	Associate Professor, English Language and Literature
Koralov	Leonid	Full Member	B.S., Moscow State University, 1991; Ph.D., State University of New York at Stony Brook, 1998.	Professor, Mathematical Statistics Professor, Mathematics
Korobkin	R. Tess	Full Member	B.A., Yale University, 2006; M.A., Yale University, 2014; M.Phil., Yale University, 2014; Ph.D., Yale University, 2018	Assistant Professor, Art History and Archaeology
Korzeniewicz	Roberto P.	Full Member	B.A., University of California-Santa Cruz, 1980; M.A., State University of New York-Binghamton, 1985; Ph.D., 1989.	Associate Dean, Sociology Professor, Sociology

Koser	Julie	Full Member	B.A. Trinity University, 1999; M.A. University of California, Berkeley, 2003; Ph.D. University of California, Berkeley, 2007	Associate Professor, German Literature and Language Affiliate Associate Professor, Women's Studies
Kosicki	Piotr	Full Member	B.A., Stanford University, 2005; M.A., Princeton University, 2008; Ph.D., Princeton University, 2011	Associate Professor, History
Kovanen	Arto	Graduate Teaching	Ph.D., Purdue University, 1988	Lecturer, Applied Economics
Koziol	Stephen	Full Member	A.B.,University of Rochester, 1965; M.A., University of Rochester, 1967; Ph.D., Stanford University, 1971.	Professor Emeritus, Teaching and Learning, Policy and Leadership
Kraus	Kari Michaele	Full Member	B.A., Texas A&M University, 1991; M.A., Texas A&M University, 1995; Ph.D., University of Rochester, 2006.	Associate Professor, History and Library & Information Science Associate Professor, Information Management Associate Professor, Library and Information Science Assistant Professor, English Language and Literature Assistant Professor, Information Studies
Kreuter	Frauke	Full Member	Ph.D. University of Konstanz 2001)	Professor, Survey and Data Science (online) Professor, Survey Methodology
Krishnaprasad	Perinkulam	Full Member	B.Tech., Indian Institute of Technology-Mumbai, 1972; M.S., Syracuse University, 1973; Ph.D., Harvard University, 1977	Professor, Electrical and Computer Engineering Professor, Applied Mathematics & Statistics, and Scientific Computation
Kroll	Kim S.	Special Member	B.A., Indiana University-South Bend, 1976; Ph.D., Purdue University, 1983	University Affiliate, Environmental Science and Technology
Kruglanski	Arie	Full Member	B.A., University of Toronto, 1966; Ph.D. University of California-Los Angeles, 1968	Distinguished University Professor, Psychology
Kruskal	Clyde P.	Full Member	B.A., Brandeis University, 1976; M.S.,Courant Institute of Mathematical Sciences-NYU, 1978; Ph.D., 1981.	Associate Professor, Computer Science
Kuchinsky	Stefanie	Associate	Ph.D., 2009, University of Illinois	Research Assistant Professor, Clinical Audiology
Kuchinsky	Stefanie E.	Associate	B.A., Brandeis University, 2003; M.A., University of Illinois, 2006; Ph.D., University of Illinois, 2009.	Associate Research Scientist, Second Language Acquisition Research Scientist, Second Language Acquisition
Kueker	David W.	Full Member	A.B., University of California Los Angeles 1964; M.A., University of California Los Angeles 1966; Ph. D., University of California Los Angeles 1967.	Professor Emeritus, Mathematics

Kuersteiner	Guido Markus	Full Member	CV: licentiatus rerum politicarum, University of Bern, 2001; M.Sc., London School of Economics & Political Science, 1993; M.A., Yale University, 1995; MPhil, Yale University, 1996; Ph.D., Yale University, 1997.	Professor, Economics
Kugler	Daniel E.	Special Member	B.S., Michigan State University, 1969; M.S., Michigan State University, 1977; Ph.D., Michigan State University, 1984	University Affiliate, Environmental Science and Technology
Kukla	Maija M.	Non-Member	M.Sc., University of Latvia, 1993; Doctor of Science, University of Latvia, 1996.	Adjunct Professor, Materials Science and Engineering
Kules	Bill	Full Member	PhD., Computer Science, University of Maryland, 2006.	Visiting Associate Professor, Human-Computer Interaction Visiting Associate Professor, Information Management Visiting Associate Professor, Information Studies Visiting Associate Professor, Library and Information Science
Kunkel	Gerard	Associate	B.A., Shepherd University, 1975	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Kuo	Jason C.	Full Member	B.A., National Taiwan University, 1971; M.A., 1973; Ph.D., University of Michigan-Ann Arbor, 1980.	Professor, Art History and Archaeology
Kuo	Catherine	Full Member	B.S., University of Michigan-Ann Arbor; Ph.D., University of Michigan-Ann Arbor	Associate Professor, Bioengineering
Kurtz	Michael	Adjunct Member	Ph.D. Georgetown University.	Visiting Professor, Information Studies Visiting Professor, Library and Information Science Visiting Professor, Curation and Management of Digital Assets (online) Visiting Associate Professor, Information Management
Kweon	Byoung-Suk	Full Member	B.S., University of Seoul, Korea, 1985; B.L.A., The City University of New York, 1989; M.L.A., Cornell University, 1992; Ph.D., University of Illinois Urbana/Champaign, 1999	Associate Professor, Landscape Architecture Associate Professor, Plant Science
Kwok	Young	Special Member	B.S., Yonsei University, 1991; M.S., University of California Berkeley, 1992; Ph.D., University of California Berkeley, 1997	n/a, Civil and Environmental Engineering

La	Richard	Full Member	B.S., University of Maryland-College Park, 1994; M.S., University of California-Berkeley, 1997; Ph.D., 2000	Professor, Electrical and Computer Engineering Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Associate Professor, Systems Engineering
Labandeira	Conrad	Special Member	BA, California State University - Fresno; MS, University of Wisconsin - Milwaukee; PhD, University of Chicago	Research Scientist, Entomology Adjunct Professor, Biological Sciences
Labidi	Jabrane	Special	M.S., University Paris Diderot/ Institut de Physique du Globe de Paris, France, 2009; Ph.D., University Paris Diderot/ Institut de Physique du Globe de Paris, France, 2013.	University Affiliate, Geology
Lacorte	Manel	Full Member	B.A., University of Barcelona; M.A., University of Illinois at Chicago; Ph.D., University of Edinburgh, Scotland	Head, Spanish Language and Literature Professor, Spanish Language and Literature
Ladeau	Shannon	Special Member	B.A., Mount Holyoke College, 1997; Ph.D., Duke University, 2005	University Affiliate, Environmental Science and Technology
LaFree	Gary D.	Full Member	B.A., Indiana Wesleyan University, 1973; M.A., 1975; Ph.D., 1979.	Distinguished University Professor, Criminology and Criminal Justice Affiliate Professor, Sociology
Lafrenz Samuels	Kathryn	Full Member	Ph.D. 2010 Stanford University; M.A. 2004 University of South Florida; B.A. 2001 Bryn Mawr College	Associate Professor, Anthropology
Lahiri	Partha	Full Member	Ph.D, University of Florida, 1986.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematical Statistics Professor, Survey and Data Science (online) Professor, Survey Methodology Professor, Survey Statistics
Lamp	William	Full Member	BS, University of Nebraska - Lincoln, 1972; MS, Ohio State University - Columbus, 1976; PhD, University of Nebraska - Lincoln, 1980	Professor, Entomology Associate Professor, Biological Sciences
Lampe	John R.	Full Member	B.A., Harvard University, 1957; M.A.,University of Minnesota-Twin Cities, 1964; Ph.D.,University of Wisconsin-Madison, 1971.	Professor Emeritus, History

Lamprakos	Michele	Full Member	B.A., Near Eastern Studies, Princeton University, 1983; MArch, University of California-Berkeley, 1992; PhD., History, Theory & Criticism of Architecture, MIT, 2006	Associate Professor, Architecture
Lampropoulos	Leonidas K	Full Member	B.A., University of Chicago, 2011; Ph.D., University of Illinois at Urbana-Champaign, 2020	Assistant Professor, Computer Science
Landa	Edward	Special Member	B.S. City College of New York, 1970; M.S. Univ. of Minnesota, 1972; M.P.H. 1974; Ph.D. 1975.	Adjunct Professor, Environmental Science and Technology
Landau	Paul	Full Member	B.A., Wesleyan University, 1984; M.A., University of Wisconsin-Madison, 1986; Ph.D., 1992.	Professor, History
Lang	Megan W.	Special Member	B.S. College of Charleston, 1997; M.S. Univ. of Maryland, 2000; Ph.D. 2005.	University Affiliate, Environmental Science and Technology
Lansing	Stephanie	Full Member	B.S., Univ. Oklahoma, 2000; M.S., Ohio State Univ., 2005; Ph.D., 2008.	Associate Professor, Environmental Science and Technology
Lapin	Hayim	Full Member	B.A., Columbia University, 1986; B.A., Jewish Theological Seminary, 1987; M.A.,1987; Ph.D., Columbia University, 1994.	Professor, History Professor, Jewish Studies
LaRonde	Nicole	Full Member		Associate Professor, Biochemistry Associate Professor, Chemistry
LaRonde-LeBlanc	Nicole	Full Member	B.S., Chemistry, 1995, Rivier College; Ph.D., Biophysics and Biophysical Chemistry, 2002, Johns Hopkins University, School of Medicine	
Larsson	Johan	Full Member	B.S., Lund Institute of Technology, 1999; M.S., University of Lund, 1999; Ph.D., University of Waterloo, 2006	Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Associate Professor, Mechanical Engineering
Laskowski	Michael C.	Full Member	B.A., University of Wisconsin-Madison, 1978; Ph.D.,University of California-Berkeley, 1987.	Professor, Mathematics
Laskowski	N.G.	Full Member	B.A. Rutgers University 2008; Ph.D. USC 2017	Assistant Professor, Philosophy
Lasnik	Howard	Full Member	B.S., Carnegie Institute of Technology, 1967; M.A., Harvard University, 1969; Ph.D., Massachusetts Institute of Technology, 1972.	Distinguished Scholar-Teacher, Linguistics Distinguished University Professor, Linguistics Distinguished University Professor, Neurosciences and Cognitive Science

Lathrop	Daniel P.	Full Member	B.A., University of California-Berkeley, 1987; Ph.D., University of Texas-Austin, 1991.	Professor, Geology Professor, Physics Professor, Chemical Physics
Lau	Ellen	Full Member	B.S., Michigan State University, 2003; Ph.D., University of Maryland, 2009	Associate Professor, Linguistics Assistant Professor, Neurosciences and Cognitive Science
Lau	Andrew	Adjunct Member		Lecturer, Curation and Management of Digital Assets (online)
Laub	John H.	Full Member	B.A., University of Illinois at Chicago Circle, 1975; M.A., SUNY-Albany, 1976; Ph.D., 1980.	Distinguished University Professor Emeritus, Criminology and Criminal Justice
Laurence	Stuart	Full Member	B.Sc./B.A. Conjoint, Physics and Philosophy, 2001, University of Auckland; B,Sc. Applied Mathematics,2001, University of Auckland; M.S. Aeronautics, 2002, California Institute of Technology; Ph.D. Aeronautics,2006, California Institute of Technology.	Assistant Professor, Aerospace Engineering
Lavine	Roberta Z.	Full Member	B.A., City University of New York-Queens College, 1974; M.A.,Catholic University of America, 1976; Ph.D., 1983.	Associate Professor Emerita, Spanish Language and Literature
Lawley	Katy Newton	Full Member	Ph.D. University of Maryland.	Lecturer, Human-Computer Interaction Lecturer, Information Management Lecturer, Information Studies Lecturer, Library and Information Science
Lawson	Wesley G.	Full Member	B.S.E.E., University of Maryland-College Park,1980; M.S., 1981; Ph.D., 1985.	Professor, Electrical and Computer Engineering
Layton	Richard D.	Adjunct Member	B.S., West Chester University of Pennsylvania; M.M., Ph.D., University of Maryland	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Lazar	Amanda	Full Member	PhD, University of Washington, 2015; BS University of California, San Diego, 2011.	Assistant Professor, Human-Computer Interaction Assistant Professor, Information Management Assistant Professor, Information Studies Assistant Professor, Library and Information Science
Lazur	Andrew M.	Full Member	B.S., University of South Carolina, 1979; M.S., Auburn University, 1981; Ph.D., Auburn University, 1990	Associate Professor, Marine, Estuarine, and Environmental Sciences
Le Bivic	Rejanne	Full Member	B.S., UniLaSalle Engineering school, 2010, M.S. UniLaSalle Engineering school 2013, M.S. Univ. of Western Brittany, 2013, Ph.D Univ. of Western Brittany, 2017	Lecturer, Geospatial Information Sciences

Lea-Cox	John D.	Full Member	B.S., University of Natal-Pietermaritzburg South Africa 1983; M.S., 1989; Ph.D., University of Florida, 1993.	Professor, Plant Science
Lea-Cox	John D.	Full Member	B.S., University of Natal-Pietermaritzburg South Africa 1983; M.S., 1989; Ph.D., University of Florida, 1993.	Professor, Extension Education
Leal Lima	Thayse	Full Member		Assistant Professor, Spanish Language and Literature
Leathers	Howard D.	Full Member	A.B.,Princeton University, 1974; M.S., University of Minnesota-Twin Cities, 1978; Ph.D., University of Wisconsin-Madison, 1986.	Associate Professor Emeritus, Agricultural and Resource Economics
Lee	Sung W.	Full Member	B.S., Seoul National University, 1966; M.S., Massachusetts Institute of Technology, 1974; Ph.D., 1978.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Aerospace Engineering
Lee	Cheng S.	Full Member	B.S., National Cheng Kung University-Taiwan, 1981; Ph.D.,Rensselaer Polytechnic Institute, 1988.	Associate Professor, Chemistry
Lee	Vincent	Full Member	Ph.D. University of California - Los Angeles, 2000	Assistant Professor, Biological Sciences
Lee	Sang Bok	Full Member	B.S., Seoul National University, 1990; M.S. 1992; Ph.D. 1997	Professor, Chemical Physics Professor, Chemistry Affiliate Professor, Materials Science and Engineering
Lee	Frances E.	Full Member	B.A., University of Southern Mississippi, 1991; Ph.D., Vanderbilt University, 1997.	Associate Professor, Government and Politics
Lee	Justina	Adjunct Member	M.M., University of California, Los Angeles; M.M., Manhattan School of Music	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Lee	Mei-Ling	Full	B.S., National Taiwan University, 1975; M.S., National Tsing Hua University, 1977; M.A., University of Pittsburgh, 1978; Ph.D., University of Pittsburgh, 1980	Professor, Epidemiology Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Biostatistics
Lee	Seong-Ho	Full Member	B. S., Korea University, 1991; M. S., Korea University, 1993; Ph.D., Korea University, 1999.	Assistant Professor, Nutrition and Food Science
Lee	Jinwoo	Full Member	B.S., Hanyang University, 2006; M.S., Lehigh University, 2008; Ph.D., Lehigh University, 2013	Assistant Professor, Biochemistry
Lee	Sun Young	Full Member	B.A., Ewha Womans University, 2005; M.A., University of Georgia, 2007; Ph.D., University of North Carolina-Chapel Hill, 2012	Assistant Professor, Communication

Lei	David K. Y.	Full Member	B.S., University of London, 1968; M.S., University of Guelph-Ontario, 1970; Ph.D., Michigan State University, 1973.	Professor, Nutrition and Food Science
Leibtag	Ephraim	Graduate Teaching	Ph.D., University of Maryland at College Park, 2002	Lecturer, Applied Economics
Leimgruber	Peter	Non-Member	Ph.D., University of Oklahoma	Adjunct Professor, Biological Sciences
Leinwand	Theodore B.	Full Member	B.A., Hamilton College, 1973; M.A.,Johns Hopkins University, 1978; Ph.D., 1980.	Professor Emeritus, English Language and Literature
Leiserson	Max	Full Member	B.S., Tufts University, 2011; M.S., Brown University, 2013; Ph.D., Brown University, 2016	Assistant Professor, Applied Mathematics & Statistics, and Scientific Computation
Leisnham	Paul	Full Member	B.S., Univ. Otago, New Zealand, 1999; M.S., 2001; Ph.D., 2005.	Associate Professor, Environmental Science and Technology
Leite	Marina Soares	Special Member	B.S., Universidade Federal de Pernambuco, Recife, 2000; M.S., Universidade Estadual de Campinas, 2003; Ph.D., University of Brasilia, 2007.	Associate Professor, Materials Science and Engineering
Lekic	Vedran	Full Member	A.B., Harvard University, 2004; Ph.D. University of California, Berkeley, 2009.	Associate Professor, Geology Assistant Professor, Applied Mathematics & Statistics, and Scientific Computation
Lele	Shreevardhan	Full Member	Bachelor of Technology, Indian Institute of Technology-Madras, 1987; M.A., University of Michigan-Ann Arbor, 1991; Ph.D., 1996.	Lecturer, Applied Mathematics & Statistics, and Scientific Computation
Lemay	Edward P.	Full Member	B.S., Worcester State College, 1999; M.S., Yale University, 2007; Ph.D., Yale University, 2008.	Associate Professor, Psychology
Lembo JR	Arthur J.	Special Member	B.S., State University of New York, 1987; M.A., State University of New York, 1989; Ph.D., Syracuse University, 1997	University Affiliate, Environmental Science and Technology
Lennon	Kenneth	Adjunct Member		Lecturer, Information Management
Lent	Robert W.	Full Member	B.A.,State University of New York-Albany, 1975; M.A., Ohio State University-Columbus, 1977; Ph.D., Ohio State University-Columbus, 1979.	Professor Professor, Counseling Psychology Graduate Director
Leonard	Kenneth	Full Member	B.A. Swarthmore, 1989; Ph.D. University of California-Berkeley, 1997.	Professor, Agricultural and Resource Economics
Leonardi	Susan	Full Member	B.A.,Immaculata College, 1968; M.A., University of California-Davis, 1982; Ph.D., 1986.	Professor Emerita, English Language and Literature
Leone	Mark P.	Full Member	Ph.D. 1968 and M.A. 1965 University of Arizona; B.A. 1963 Tufts University	Professor, Anthropology Affiliate Professor, American Studies

Leone	Peter E.	Full Member	B.A., University of Iowa, 1972; M.A., 1974;Ph.D., University of Washington, 1981.	Professor Emeritus, Special Education
Lepkowski	James M.	Full Member	B.A., Illinois State University, 1970; M.P.H., University of Michigan, 1976; Ph.D., University of Michigan, 1980	Research Professor, Survey and Data Science (online)
Lett	Paul	Adjunct Member	Ph.D. University of Rochester; 1986 - NIST	Adjunct Professor, Physics University Affiliate, Chemical Physics
Levermore	Charles D.	Full Member	B.S. Math, 1974, B.S.Physics, 1974, M.S. Math, 1974, Clarkson University; Ph.D., Math New York University, 1982.	Distinguished Scholar-Teacher, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematics
Levin	David Michael	Full Member	B.S., University of Maryland-College Park, 2002; Ph.D., University of Maryland-College Park, 2010	Assistant Professor, Computer Science
Levin	Daniel	Associate	Ph.D. University of Maryland 2008	Associate Clinical Professor, Teaching and Learning, Policy and Leadership
Levin	Dave	Full Member	B.S., University of Maryland, 2002; Ph.D., University of Maryland, 2012	Affiliate Assistant Professor, Electrical and Computer Engineering
Levine	Robert S.	Full Member	B.A., Columbia University, 1975; M.A.,Stanford University, 1977; Ph.D., 1981.	Distinguished University Professor, English Language and Literature Affiliate Professor, American Studies
Levine	William S.	Full Member	B.S., Massachusetts Institute of Technology, 1962; M.S., 1965; Ph.D., 1969.	Professor, Neurosciences and Cognitive Science Research Professor, Electrical and Computer Engineering
Levinson	Jerrold	Full Member	B.S., Massachusetts Institute of Technology, 1969; Ph.D., University of Michigan, Ann Arbor, 1974.	Distinguished University Professor Emeritus, Philosophy Affiliate Professor, Comparative Literature
Levy	Doron	Full Member	B.Sc., Tel-Aviv University,Israel 1991 M.Sc., Tel-Aviv University,1994 Ph.D., Tel-Aviv University,1997	Distinguished Scholar-Teacher, Applied Mathematics & Statistics, and Scientific Computation Distinguished Scholar-Teacher, Mathematics Professor, Mathematics Professor, Biophysics
Lewin	Amy	Full Member	B.A., Duke University, 1989; Psy.D., Rutgers University, 1995.	Associate Professor, Family Science Associate Professor, Maternal and Child Health
Lewis	Mark J.	Full Member	B.S., Massachusetts Institute of Technology, 1983; B.S., 1983; M.S., 1985; Ph.D., 1988.	Professor, Aerospace Engineering

Lewis	Jioni Agene	Full Member	B.S., University of California-Davis, 2002; M.A., California State University-Sacramento, 2006; Ph.D., University of Illinois-Urbana/Champaign, 2013	Associate Professor, Counseling Psychology
Li	Zhanqing	Full Member	B.S., Nanjing Institute of Meteorology-China, 1983; M.Sc., Nanjing Institute of Meteorology-China., 1986; Ph.D., McGill University-Canada, 1991.	Professor, Atmospheric and Oceanic Science
Li	Ming	Full Member	B.E., Hohai University, 1983; Ph.D., University of Oxford, 1991	Associate Professor, Marine, Estuarine, and Environmental Sciences
Li	Yan	Full Member	B.S. Computer Science, Beijing Institute of Technology, 1997; M.S. Statistics, University of Nebraska at Lincoln, 2002; Ph.D. Survey Statistics, University of Maryland College Park, 2006.	Professor, Applied Mathematics & Statistics, and Scientific Computation Associate Professor, Survey and Data Science (online) Associate Professor, Survey Methodology Associate Professor, Survey Statistics
Li	Teng	Full Member	Ph.D. from Division of Engineering and Applied Sciences, Harvard University, and joined the faculty of Department of Mechanical Engineering, University of Maryland in 2006, after earlier studies at Princeton University and Tsinghua University in China.	Professor, Mechanical Engineering
Li	Anna Xuan	Full Member	B.S., Ocean University of China, 2005; Ph.D., Rosalind Franklin University of Medicine and Science, 2012	Assistant Professor, Neurosciences and Cognitive Science Assistant Professor, Psychology
Li	Yuxing	Special	B.S., Sichuan University, 1989; M.S., Sichuan Industrial Institute of Antibiotics, 1992; Ph.D., Iowa State University, 1996	n/a, Biological Sciences
Li	Yuanyuan	Full Member	M.D. Shanxi Medical College, China (Clinical Medicine); M.S. Dalian Medical College, China (Pathology); Ph.D. Peking Union Medical College, China (Oncology)	Assistant Professor, Nutrition and Food Science
Liang	Shunlin	Full Member	B.S., Nanjing University; M.S., Nanjing University; Ph.D., Boston University	Professor, Geographical Sciences
Liang	Xin-Zhong	Full Member	B.S., Zhejiang University, 1983; Ph. D., Institute of Atmospheric Physics, Chinese Academy, 1987.	Professor, Atmospheric and Oceanic Science
Liao	Yuan	Full Member	B.S., Tsinghua University, 2005; Ph.D., Northwestern University, 2010.	Assistant Professor, Applied Mathematics & Statistics, and Scientific Computation

Libby	Alexandra	Special Member	B.A. Colby College, 2003, M.A. Boston University, 2007, Ph.D. University of Maryland, 2014	n/a, Art History and Archaeology
Liberto	Hallie	Full Member	B.A. Columbia University 2004; Ph.D. University of Wisconsin, Madison 2011	Professor, Philosophy
Lichbach	Mark	Full Member	B.A., Brooklyn Ciollege, 1973; M.A., Brown University, 1975; Ph.D., Northwestern University, 1978	Professor Emeritus, Government and Politics
Lichtenberg	Erik	Full Member	B.A., University of Chicago, 1973; Ph.D., University of California-Berkeley, 1985.	Professor, Agricultural and Resource Economics
Lidz	Jeffrey	Full Member	B.S., Northwestern University, 1990; M.A., University of Delaware, 1992; Ph.D., University of Delaware, 1996.	Distinguished Scholar-Teacher, Linguistics Professor, Linguistics Professor, Neurosciences and Cognitive Science Affiliate Professor, Second Language Acquisition
Lie	Siv	Adjunct Member	B.A., Boston University, 2008; M.A., New York University, 2012; Ph.D., New York University, 2017	Assistant Professor, Ethnomusicology Assistant Professor, Music Assistant Professor, Music Education
Lieber	Joan	Full Member	B.A., Rutgers State University-Douglass College, 1969; M.S., University of Pennsylvania, 1970; Ph.D., University of California-Santa Barbara, 1986.	Professor Emerita, Special Education
Liesener	James	Full Member	PhD., University of Michigan.	Professor Emeritus, Library and Information Science
Lim	Eunjung	Full Member	Ph.D., University of Buffalo, 2009.	Acting Associate Dean, Geospatial Information Sciences Lecturer, Geospatial Information Science (with Nanjing Normal University) Lecturer, Geospatial Information Sciences
Lin	Jing	Full Member	B.A., Guangxi University, 1983; M.A., Michigan State University, 1987; Ed.D.,University of Michigan-Ann Arbor, 1990	Professor, International Education Policy Professor Affiliate Professor, Women's Studies
Lin	Jimmy	Full Member	B.S., Massachusetts Institute of Technology MIT); M.Eng., MIT; Ph.D., MIT, 2004.	Affiliate Associate Professor, Computer Science
Lin	Ming C	Full Member	B.S., University of California-Berkeley, 1988; M.S., University of California-Berkeley, 1991; Ph.D., University of California-Berkeley, 1993	Chair, Computer Science Professor, Computer Science

Lin	Ming	Full Member	B.S., University of California-Berkeley, 1988; M.S., University of California-Berkeley, 1991; Ph.D., University of California-Berkeley, 1993	Affiliate Professor, Electrical and Computer Engineering
Lincoln	Matthew D	Special Member	B.A. William College, 2009, Art History, M.A. University of Maryland 2012, Art History, Ph.D. University of Maryland 2016, Art History	n/a, Art History and Archaeology
Lindemann	Marilee	Full Member	B.A., Indiana University, 1981; M.A., Rutgers State University, 1983; Ph.D., 1991.	Associate Professor, English Language and Literature Affiliate Associate Professor, American Studies Affiliate Associate Professor, Women's Studies
Linduska	James	Non-Member	BS, University of Maryland, 1965; MS, University of Maryland, 1968; PhD, University of Maryland, 1973	Professor Emeritus, Entomology
Linebaugh	Donald	Full Member	B.S., Grand Valley State University, 1979; M.A., Ph.D., College of William and Mary, 1982, 1996.	Acting Director, Historic Preservation Professor, Historic Preservation
Linebaugh	Donald W.	Full	B.S., Grand Valley State University, 1979; M.A., Ph.D., College of William and Mary, 1982, 1996.	Professor, Urban and Regional Planning and Design
Linke	Norbert	Full Member	D.Phil., Oxford University, 2013	Assistant Professor, Physics
Linn	Joshua	Full Member	B.A., Yale University, 2000; Ph.D., Massachusetts Institute of Technology, 2005	Associate Professor, Agricultural and Resource Economics
Lionakis	Michail	Special Member	M.D., University oF Crete, 2000; Sc.D., University of Crete, 2008	n/a, Biological Sciences
Lips	Karen	Full Member	Ph.D., University of Miami, 1995	Professor, Biological Sciences
Lipsman	Ronald L.	Full Member	B.S.,City University of New York-City College, 1964; Ph.D., Massachusetts Institute of Technology, 1967.	Professor Emeritus, Mathematics
Lipton	Douglas W.	Full Member	B.S.,State University of New York-Stony Brook, 1976; M.A.,Virginia Inst. of Marine Science-College of William & Mary, 1979; Ph.D., University of Maryland-College Park, 1989.	Associate Professor Emeritus, Agricultural and Resource Economics
Lissitz	Robert W.	Full Member	B.A., Northwestern University,1963; Ph.D., Syracuse University, 1969.	Professor Emeritus, Measurement, Statistics and Evaluation Affiliate Professor, Second Language Acquisition
Little	Barbara	Adjunct Member	Ph.D. and M.A. State University of New York at Buffalo; B.A. Pennsylvania State University	Adjunct Professor, Anthropology

Liu	Zhongchi	Full Member	B.S.,Wuhan University, 1982; M.A., Harvard University, 1985; Ph.D., 1990.	Associate Professor, Biological Sciences Affiliate Professor, Plant Science
Liu	Brooke Fisher	Full Member	B.A., Washington University in St. Louis, 2001; M.A., University of Missouri-Columbia, 2003; Ph.D., University of North Carolina-Chapel Hill, 2006.	Professor, Communication
Liu	Hongjie	Full	B.M., Shanghai Medical University, 1993; M.S., UCLA School of Public Health, 1998; Ph.D., UCLA School of Public Health, 2002	Chair, Epidemiology Chair, Biostatistics Professor, Epidemiology Professor, Biostatistics
Liu	KJ Ray	Full Member	B.S., National Taiwan University, 1983; M.S.E., University of Michigan-Ann Arbor, 1987; Ph.D., University of California-Los Angeles, 1990	Professor, Electrical and Computer Engineering
Liu	Xinan	Adjunct Member	Ph.D., University of Maryland - College Park, 2002	Associate Research Professor, Mechanical Engineering
Liu	Rossina Zamora	Associate	Ph.D. University of Iowa	Assistant Clinical Professor, Teaching and Learning, Policy and Leadership
Liu	Yang	Full Member	B.S. Psychology, Peking University; M.A. Psychology, University of North Carolina, Chapel Hill; M.S. Statistics, University of North Carolina, Chapel Hill; Ph.D. Psychology, University of North Carolina, Chapel Hill	Assistant Professor, Measurement, Statistics and Evaluation
Liu	Jing	Full Member	M.A. Peking University, 2013; M.A. Stanford University, 2016; Ph.D. Stanford University, 2018	Assistant Professor, Teaching and Learning, Policy and Leadership
Liu	William Ming	Full Member	B.A., University of California-Irvine, 1990; M.A., University of Maryland-College Park, 1995; Ph.D., University of Maryland-College Park, 2000	Professor, Counseling Psychology
Livingston	Richard A .	Special Member	A.B. Dartmouth College, 1968; B.E. Dartmouth College, 1969; M.S. M.E., Stanford University, 1970; Ph.D. University of Maryland, 1990.	Adjunct Professor, Materials Science and Engineering
Lloyd	Isabel K.	Full Member	B.S.,Pennsylvania State University-University Park, 1975; Ph.D.,Massachusetts Institute of Technology, 1980.	Associate Professor, Materials Science and Engineering
Lobb	Christopher J.	Full Member	B.A., Rutgers University-New Brunswick, 1974; S.M., Harvard University, 1976; Ph.D., 1980.	Distinguished Scholar-Teacher, Physics Professor, Physics

Loboda	Tatiana	Full Member	B.A., Moscow State Pedagogical Univ., 1995; M.A., University of Maryland, 2004; PhD, University of Maryland, 2008.	Chair, Geographical Sciences
Locascio	Laurie	Non-Member	B.S., James Madison University; M.S., University of Utah; Ph.D., University of Maryland at Baltimore	Vice President, Bioengineering
Logan	Shirley W.	Full Member	B.A., Johnson C. Smith University, 1964; M.A.,University of North Carolina-Chapel Hill, 1966; Ph.D., University of Maryland-College Park, 1988.	Professor Emerita, English Language and Literature
Logan	Tom	Special	B.E., University of Canterbury, 2013; B.S., University of Canterbury, 2014; M.S., Johns Hopkins University, 2015; Ph.D., University of Michigan, 2019	n/a, Civil and Environmental Engineering
Long	Ryan F.	Full Member	B.A. Macalester College, 1994; PhD, Duke University, 2002	Professor, Spanish Language and Literature Associate Professor, Comparative Literature
Lopez	Andrea M	Full Member	B.A. San Francisco State University, 2003; M.A. University of New Mexico, 2007; Ph.D. University of New Mexico, 2014	Affiliate Assistant Professor, Women's Studies
Lorente	Rafael	Adjunct Member	B.A., University of Miami, 1990; M.A., University of Maryland, 1998.	Associate Dean, Journalism
Lorimer	George H.	Full Member	B.S., University of St. Andrews, 1965;M.S., University of Illinois-Chicago, 1968; Ph.D., Michigan State University,1972.	Distinguished University Professor, Biochemistry Distinguished University Professor, Chemistry
Losert	Wolfgang	Full Member	M.S., University of Munich, 1995; Ph.D., City College of New York, 1998	Professor, Physics Professor, Biophysics Associate Professor, Chemical Physics Affiliate Professor, Bioengineering
Lothian	Alexis	Full Member	M.A. University of Edinburgh, 2003; M.A. University of Sussex-Falmer, 2005; Ph.D. University of Southern California, 2012	Associate Professor, Women's Studies
Loughlin	Sandra M.	Adjunct Member	B.A., Washington Adventist University, 2002; M.Ed., Harvard University, 2005; Ph.D., University of Maryland, 2013.	Associate Research Scholar, Human Development
Lounder	Andrew Donald	Special Member	B.A., Wheaton College, 2005; M.Ed., University of Pennsylvania, 2008; Ph.D., University of Maryland-College Park, 2015	n/a, Higher Education

Loungani	Prakash	Graduate Teaching	Ph.D., University of Rochester, 1986	Lecturer, Applied Economics
Lovell	David J.	Full Member	B.A.,Portland State University, 1990; M.S., University of California-Berkeley, 1993 Ph.D., 1997.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Systems Engineering Professor, Civil and Environmental Engineering
Lowe	Tao	Full Member	B.S., Nanjing University of Science & Technology; M.S., Tianjin University; Ph.D., University of Helsinki	Professor, Bioengineering
Lowry	Charles B.	Full Member	B.S., Spring Hill College, 1964; M.S.L.S., University of Alabama-Tuscaloosa, 1965; M.A.,University of North Carolina-Chapel Hill, 1974; Ph.D., University of Florida,1979.	Professor Emeritus, Library and Information Science
Loza	Mireya	Special Member	Ph.D. 2011, M.A. 2006 Brown University; M.A. 2003 University of Texas at Austin; B.A. 2001 University of Illinois at Urbana-Champaign	Assistant Research Professor, Anthropology
Lucas	Jeffrey	Full Member	B.A.,1992, M.A.,1996; Ph.D.,2000, University of Iowa	Chair, Sociology Professor, Sociology
Lung-Amam	Willow	Full Member	BS Stanford, 2000; MCP University of Maryland, 2007; PhD University of California, Berkeley, 2012	Associate Professor, Urban and Regional Planning and Design
Lung-Amam	WIllow	Full Member	BS Stanford, 2000; MCP University of Maryland, 2007; PhD University of California, Berkeley, 2012	Associate Professor, Community Planning
Lushniak	Boris	Full	B.S., Northwestern University, 1981; M.D., Northwestern University, 1983; M.P.H., Harvard University, 1984	Professor, Epidemiology Professor, Biostatistics
Lynch	Loretta M.	Full Member	B.A., University of California-Davis, 1984; M.S., 1989; Ph.D., University of California-Berkeley, 1996.	Chair, Agricultural and Resource Economics Professor, Agricultural and Resource Economics
Lynch	James P.	Full Member	B.A., 1971; M.A., Wesleyan University, 1975; Ph.D., University of Chicago, 1983.	Research Professor, Criminology and Criminal Justice
Lynn	Scott	Special Member	B.S., Pennsylvania State University, 1993; M.S., Drexel University, 1998; Ph.D., University of Kentucky, 2006	University Affiliate, Environmental Science and Technology
Lyons	Clare A.	Full Member	B.S., Lewis & Clark College, 1980; M.A., University of California-Santa Barbara, 1989; Ph.D., Yale University, 1996.	Associate Professor, History Affiliate Associate Professor, Women's Studies

Lyubchich	Viacheslav	Full Member	MSc, 2008, Orenburg State University of Agriculture, Statistics and Economics; PhD, 2011, Orenburg State University, Statistics	Assistant Research Professor, Applied Mathematics & Statistics, and Scientific Computation
Lyzinski	Vincent	Full	Ph.D., Johns Hopkins University, 2013; M.S.E. Johns Hopkins University, 2011; M.S. Johns Hopkins University, 2007, B.S. University of Notre Dame, 2006	Assistant Professor, Applied Mathematics & Statistics, and Scientific Computation
López	Andrea	Full Member	PhD, University of New Mexico, 2014; MA, University of New Mexico, 2007; BA, San Francisco State University, 2003.	Assistant Professor, Anthropology
Ma	Michael	Non-Member	BS, University of Wisconsin - Madison, 1973; MS, University of Wisconsin - Madison, 1975; PhD, University of Wisconsin - Madison, 1978	Professor Emeritus, Entomology
Ma	Jianguo	Full Member	Ph.D., Cornell University, 2006	Director, Geospatial Information Science (with Nanjing Normal University) Director, Geospatial Information Sciences
Ma	Li	Full Member	B.S., Fudan University, China, 2002; M.S., University of Minnesota, 2010; Ph.D., University of Minnesota, 2010	Associate Professor, Animal Sciences
Ma	Tianzhou	Full	B.S., University of Toronto, 2010; M.S., Yale University, 2013; Ph.D., University of Pittsburgh, 2018	Assistant Professor, Epidemiology Assistant Professor, Biostatistics
Mabbs	Linda	Full Member	B.Mus., Northwestern University-Evanston, 1968; M.Mus., 1970.	Professor, Ethnomusicology Professor, Music Professor, Music Education
Macaulay	Luke	Associate	B.S., University of Notre Dame, 2002; M.S., University of California-Berkeley, 2010; Ph.D., 2015.	Agent, Extension Education
MacDonald	James M.	Associate	Ph.D., State University of New York at Buffalo, 1983; B.S., Siena College, 1975	Research Professor, Agricultural and Resource Economics
Machado	Carlos	Full Member	Ph.D., University of California, Irvine, 1998	Professor, Biological Sciences
Machedon	Matei	Full Member	B.A., University of Chicago, 1982; Ph.D.,Princeton University, 1986.	Professor, Mathematics

Maclary	Edward	Full Member	B.Mus., University of Delaware, 1974; M.Mus., Boston University, 1980; D.M.A., Indiana University-Bloomington, 1985.	Associate Director, Ethnomusicology Associate Director, Music Associate Director, Music Education Professor, Ethnomusicology Professor, Music Professor, Music Education
MacSwan	Jeff	Full Member	B.A., California State University-Long Beach, 1985; M.A., California State University-Long Beach, 1987; Ph.D., University of California-Los Angeles, 1997	Professor, Neurosciences and Cognitive Science Professor, Teaching and Learning, Policy and Leadership Professor, Curriculum and Instruction
Madan	Dilip B.	Full Member	B.Comm.,University of Bombay, 1967; Ph.D., University of Maryland-College Park, 1971;Ph.D., 1975.	Professor Emeritus, Applied Mathematics & Statistics, and Scientific Computation
Maddux	Kristjana L.	Full Member	B.A., University of Georgia, 2001; M.A., University of Georgia, 2003; Ph.D., University of Georgia, 2007.	Associate Professor, Communication
Madhavan	Sangeetha	Full Member	B.A. Barnard College, 1988; M.A. University of Pennsylvania, 1994; Ph.D. University of Pennsylvania, 1999	Professor, Sociology Affiliate Professor, Women's Studies
Magalong	Michelle	Full Member	B.A., University of California, San Diego, 2001; M.A., Ph.D., University of California, Los Angeles, 2003, 2017	Associate Professor, Historic Preservation
Magidson	Jessica	Full Member	B.A., Dartmouth College, 2006; M.S., University of Maryland-College Park, 2010; Ph.D., University of Maryland-College Park, 2013	Assistant Professor, Psychology
Magrab	Edward B.	Full Member	B.M.E., City College Of New York, 1960; M.A.E., New York University, 1961; Ph.D., Catholic University of America, 1966	Professor Emeritus, Mechanical Engineering
Mahalel	Adi	Adjunct Member	M.A., Columbia University, 2010; M.Phil., Columbia University, 2011. B.A., University of Haifa, 2007.	Visiting Assistant Professor, Jewish Studies
Mahalingappa	Laura	Full Member	Ph.D., University of Texas at Austin, 2009	Associate Professor, Teaching and Learning, Policy and Leadership
Maimon	David	Full Member	Ph.D., The Ohio State University, 2009M.A., University of Haifa, 2005B.A., University of Haifa, 2003	Assistant Professor, Risk, Compliance, and the Law
Maisel	Katharina	Full Member	B.S., University of Michigan, 2010; Ph.D., Johns Hopkins University, 2014.	Assistant Professor, Bioengineering

Makowski	Armand M.	Full Member	B.S., Universite Libre de Bruxelles-Belgium, 1975; M.S., University of California-Los Angeles, 1976; Ph.D., University of Kentucky, 1981.	Professor, Electrical and Computer Engineering Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Systems Engineering
Malen	Betty L.	Full Member	B.A., Concordia College-Moorhead, 1968; M.A., University of North Dakota-Grand Forks, 1973; Ph.D., University of Minnesota-Minneapolis, 1983.	Professor, Policy Studies
Mallios	Peter	Full Member	A.B., University of California-Berkeley; M.A., University of Chicago, 1992; Ph.D., Stanford University, 2000.	Associate Professor, English Language and Literature
Manekin	Charles H.	Full Member	B.A., Yale University, 1975; M.A.,Columbia University, 1979; Ph.D., 1984.	Chair, Jewish Studies Professor, Jewish Studies Professor Emeritus, Philosophy
Manekin	Rachel	Full Member	B.A., Hebrew University of Jerusalem - Israel, 1982; M.A., University of Maryland - College Park, 1992; Ph.D., Hebrew University of Jerusalem - Israel, 2001.	Assistant Professor, Jewish Studies
Mankad	Shawn	Full Member	B.S., Carnegie Mellon University 2008; M.A., University of Michigan 2012; Ph.D., University of Michigan 2013	n/a
Manocha	Dinesh	Full Member	B.Tech, Indian Institute of Technology-Delhi, 1987; M.S., University of California-Berkeley, 1990; Ph.D., University of California-Berkeley, 1992	Distinguished University Professor, Computer Science Professor, Electrical and Computer Engineering
Mansbach	Steven	Full Member	B.A., Cornell University, 1972; M.A., Cornell University, 1976; Ph.D., Cornell University, 1978.	Acting Chair, Art History and Archaeology
Mantovani	Fabio	Special Member	M.S., Universita degli Studi di Ferrara, 2001; Ph.D., University of Siena, 2006	University Affiliate, Geology
Manucharyan	Vladimir	Full Member	B.S., Moscow Institute of Physics and Technology, 2003; Ph.D., Yale University, 2012.	Assistant Professor, Physics
Manzo	Anthony	Adjunct Member	B.A., Boston University	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education

Marciano	Richard	Full Member	PhD, University of Iowa.	Professor, History and Library & Information Science Professor, Human-Computer Interaction Professor, Information Management Professor, Information Studies Professor, Library and Information Science Professor, Curation and Management of Digital Assets (online)
Marcus	Steven I.	Full Member	B.A., Rice University, 1971; S.M.,Massachusetts Institute of Technology, 1972; Ph.D., 1975.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Systems Engineering Professor Emeritus, Electrical and Computer Engineering
Margetis	Dionisios	Full Member	Diploma, National Technical University of Athens, 1992; S.M., Harvard University, 1994; Ph.D., Harvard University, 1999.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematics
Maria	Molina	Full Member	Atmospheric Sciences, Central Michigan University, Mount Pleasant, MI. 2015 M.A. Climate and Society, Columbia University, New York, NY. 2008 B.S. Meteorology, Minors in Mathematics and Communications, Florida State University, Tallahassee, FL.	Assistant Professor, Atmospheric and Oceanic Science
Maring	Elisabeth F.	Full Member	B.A., Emory University, 1993; Ed.M., Harvard University, 1996; Ph.D., University of Maryland, 2006.	Research Assistant Professor, Family Science Research Assistant Professor, Maternal and Child Health
Mariuzza	Roy	Full Member	Ph.D., Yale University, 1978	Professor, Biological Sciences
Marquez	Bayley	Full Member		n/a, American Studies
Marra	Peter	Adjunct Member	B.S., Southern Connecticut State University, 1985; M.S., Louisiana State University, 1989; Ph.D., Dartmouth College, 1998	Adjunct Professor, Biological Sciences
Marsh	Kris	Full Member	B.A., San Diego State University, 1996; M.A., California state University, Dominguez Hills, 2000; Ph.D., University of Southern California, 2005.	Associate Professor, Sociology Affiliate Associate Professor, Women's Studies
Marsh	Diana E	Full Member	BFA, Rutgers University; MPhil, University of Cambridge; PhD, University of British Columbia	Assistant Professor, History and Library & Information Science

Marshall	Andre W.	Full Member	B.S., Georgia Institute of Technology, 1991; M.S. Georgia Institute of Technology, 1992; Ph.D., University of Maryland, 1996.	Affiliate Associate Professor, Mechanical Engineering
Marshall	Caitlin	Full Member	B.A., Brown University, 2005;Ph.D, University of California Berkeley; 2016.	n/a, Theatre and Performance Studies
Martin	Pino	Full Member	B. Eng., Boston University, 1994; M.S., University of Minnesota, 1995; Ph.D., University of Minnesota, 1999;	Associate Professor, Aerospace Engineering
Martin	Emily S.	Special Member	B.A., Wheaton College, 2006; M.S. Northwestern University, 2009; Ph.D., University of Idaho, 2015.	University Affiliate, Geology
Martin-Beltran	Melinda	Full Member	B.A., University of Michigan, 1997; M.Ed., University of Texas, Pan American, 1999; Ph.D., Standford University, 2006	Associate Professor, Curriculum and Instruction Assistant Professor, Teaching and Learning, Policy and Leadership
Martinez-Miranda	Luz	Full Member	B.S.,University of Puerto Rico-Rio Piedras/San Juan, 1977; B.Mus., 1979; M.S.,1979; Ph.D., Massachusetts Institute of Technology, 1985.	Associate Professor, Materials Science and Engineering Associate Professor, Chemical Physics
Martins	Nuno M. L. C.	Full Member	B.S./M.S. - Combined Bachelor's/Master's Program, Electrical Engr. & Computer Science, University of Lisbon, 5/97; Ph.D., Electrical & Computer Science, Massachusetts Institute of Technology, 9/04	Professor, Electrical and Computer Engineering Associate Professor, Systems Engineering
Masatlioglu	Yusuf	Full Member	Ph.D., New York University, 2005;Master's, New York University, 2001;Master's, Bogazici University, 1990;B.A., Bosphorus University, 1995.	Professor, Economics
Mason	Michele	Full Member	B.A. University of Oregon, Eugene (1989), M.A. University of California, Los Angeles (1995), Ph.D. University of California, Irvine (2005)	Affiliate Associate Professor, Comparative Literature
Mason	Lilliana	Full Member	Ph.D., Stony Book University, 2013	Assistant Professor, Government and Politics
Mather	John C.	Full Member	B.A., Swarthmore College, 1968; Ph.D. UC Berkeley, 1974;	Adjunct Professor, Physics
Mathiason	Jessica Lee	Graduate Teaching	B.A. Northwestern University, June 2007; Ph.D. University of Minnesota-Twin Cities, 2017	Lecturer, Women's Studies

Matysiak	Silvina	Full Member	Ph.D., Rice University, 2007	Associate Professor, Bioengineering Assistant Professor, Biophysics
Mayergoyz	Isaak	Full Member	E.E.Dipl., Polytechnical Institute-Novocherkask, 1963; Kandidat, 1968; Doctor, Institute for Cybernetics-Ukranian Academy of Science, 1975.	Professor, Electrical and Computer Engineering Professor, Applied Mathematics & Statistics, and Scientific Computation
Mayes	Alvin	Adjunct Member	BS in Mathematics, University of Michigan 1969, Teaching certification 1970. Modern dance Elizabeth Bergmann and Gloria Newman. Choreography with Gloria Newman and Phyllis Lamhut.Partnering and support with Antony Tudor and Gloria Newman.	Lecturer, Dance
Mazarico	Erwan	Special Member	B.S., Ecole National Superieure de L'aeronauti, 2004; M.S., Massachusetts Institute of Technology, 2004; Ph.D., Massachusetts Institute of Technology, 2008	University Affiliate, Geology
Mazurek	Michelle	Full Member	M.S., Carnegie-Mellon University, 2013; Ph.D., Carnegie-Mellon University, 2014	Associate Professor, Computer Science Affiliate Assistant Professor, Electrical and Computer Engineering
McBride	Alison	Special	B.Sc., Glasgow University, 1981; Ph.D., Imperial Cancer Research Fund and Imperial College, 1986	n/a, Biological Sciences
McCarty	Gregory	Special Member	M.S., Iowa State University, 1985; Ph.D., Iowa State University, 1989	University Affiliate, Environmental Science and Technology
McCatharn	Jennifer Marie	Graduate Teaching	B.S., University of Maryland-College Park, 2004; M.Ed., University of Maryland-College Park, 2007	Lecturer, Special Education
McCauley	John	Full Member	B.A., College of William & Mary; M.A., Yale University; Ph.D., University of California, Los Angeles, 2010	Associate Professor, Government and Politics
McCluskey	Patrick	Full Member	B.S., Lafayette College, 1984; M.S., Lehigh University, 1986; Ph.D., Lehigh University, 1991	Professor, Mechanical Engineering Professor, Reliability Engineering
McConnell	Kenneth E.	Full Member	B.A., University of Florida, 1964; M.A., 1966; Ph.D., University of Maryland-College Park, 1973.	Professor Emeritus, Agricultural and Resource Economics
McCoy	Timothy	Special Member	B.S., Eastern Illinois University, 1986; M.S., University of New Mexico-Albuquerque, 1990; Ph.D., University of Hawaii at Manoa, 1994	University Affiliate, Geology

McCuen	Richard H.	Full Member	B.S.,Carnegie-Mellon University, 1967; M.S., Georgia Institute of Technology, 1969; Ph.D., 1970.	Professor, Civil and Environmental Engineering
McDaniel	Stephen R.	Full Member	B.S., Moorhead State University, 1985; M.A., University of South Florida, 1991; Ph.D., Florida State University, 1995.	Associate Professor, Kinesiology Associate Professor, Physical Activity
McDonough	William F.	Full Member	B.A., University of Massachusetts-Boston, 1979; M.S., Sul Ross State University, 1983; Ph.D., Australian National University-Canberra, 1988.	Professor, Geology
McElrath	Douglas	Graduate Teaching	B.A., Earlham College; M.L.S., University of Maryland; M.A., University of Maryland	Lecturer, Historic Preservation
McEnery	Julie	Full Member	B.S., University of Manchester, 1993; Ph.D., University College Dublin, 1997.	Adjunct Associate Professor, Physics
McEwen	Marylu K.	Full Member	B.S.,Purdue University, 1968; M.S., Indiana University-Bloomington, 1970; Ph.D.,Purdue University, 1973.	Professor Emerita
McEwen	Abigail	Full Member	B.A., Brown University, 2002; M.A., New York University, 2005; Ph.D., New York University, 2010	Associate Professor, Art History and Archaeology
McGinnis	James R.	Full Member	B.S., University of Georgia,1980; M.A., Teachers College, Columbia University, 1987; M.Ed., 1988; Ph.D., University of Georgia, 1992.	Professor, Curriculum and Instruction
McGloin	Jean M.	Full Member	B.A., Bryn Mawr College, 1999; M.A., Rutgers University, 2001; Ph.D., Rutgers University, 2004.	Professor, Criminology and Criminal Justice
McGrew	Sarah	Full Member	Ph.D. Stanford University	Assistant Professor, Teaching and Learning, Policy and Leadership
McIntosh	Wayne V.	Full Member	B.A.,University of South Carolina-Columbia, 1973; M.A., Wichita State University, 1974; Ph.D., Washington University, 1981.	Professor Emeritus, Government and Politics
McIver	Kevin	Full Member	Ph.D. University of Tennessee Health Sciences Center	Associate Professor, Biological Sciences
McJunkin	Katherine	Special Member	B.A., Princeton University, 2005; Ph.D., Cold Spring Harbor School of Biological Sciences, 2010	n/a, Biological Sciences

McKechnie	Jessica Mariel	Non-Member	B.A., University of Maryland, College Park; M.A., University of Maryland, College Park; Ph.D., University of Maryland, College Park	Assistant Clinical Professor, School Counseling
McKinney	Jonathan	Full Member	1997 B.Sc., Texas A&M Univ.,1997; B.S., University of Illinois-Urbana/Champaign, 1999; Ph.D., 2004.	Assistant Professor, Physics
McLaughlin	Margaret J.	Full Member	B.A., University of Denver, 1968; M.A., University of Northern Colorado, 1971; Ph.D., University of Virginia, 1977.	Professor, Curriculum and Instruction Professor Emerita, Special Education
McMahon	Sean	Adjunct Member	Sc.B., Brown University., 1992; Ph.D., University of California-Berkeley, 1997	n/a, Biological Sciences
McRae	Angela	Adjunct Member	B.A. Boston College, 1995; M.A., Johns Hopkins University, 2002; Ph.D., University of Maryland, 2012	Assistant Research Scientist, Human Development
McReynolds	R. Timothy	Adjunct Member	B.M. Indiana University, M.M. University of Michigan, D.M.A. University of Maryland	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Megonigal	Patrick J.	Special Member	B.S., Old Dominion University, 1982; M.S., Old Dominion University, 1986; Ph.D., Duke University, 1996	University Affiliate, Environmental Science and Technology
Mellet	Antoine	Full Member	B.A. Ecole Normale Superieur de Lyon, 1999 Universite Toulouse III, 2003	Professor, Mathematics Associate Professor, Applied Mathematics & Statistics, and Scientific Computation
Melnick	Karin	Full Member	B.A. Reed College 1999, M.S. University of Chicago 2000, Ph.D. University of Chicago 2006	Associate Professor, Mathematics
Memon	Atif M.	Full Member	Ph.D., University of Pittsburgh, 2001	Professor, Computer Science
Meng	Jianghong	Full Member	D.V.M., Sichuan University, 1983; M.S., University of California-Davis, 1989; Ph.D., 1992.	Professor, Nutrition and Food Science
Mercado	Alejandra	Full Member	B.S.E.E., University of Maryland, 1990; B.S., University of Maryland, 1991; M.S.E.E., University of Maryland, 1996; Ph.D., University of Maryland, 2001.	Associate Director, Telecommunications
Merediz	Eyda	Full Member	B.A., University of Southern California-Los Angeles, 1989; M.A., Princeton University, 1991; Princeton University, Ph.D., 1998.	Associate Professor, Spanish Language and Literature
Meritt	Donald W.	Full Member	B.S., St. Mary's College of Maryland, 1972; Ph.D., University of Maryland, College Park, 1993	Senior Agent, Marine, Estuarine, and Environmental Sciences

Messersmith	Donald	Non-Member	BS, University of Toledo, 1951; MS, University of Michigan, 1953; PhD, Virginia Polytechnic Institute, 1962	Professor Emeritus, Entomology
Metzler	Christopher	Full Member	B.S., Rice University, 2013; M.S., Rice University, 2014; Ph.D., Rice University, 2019	Assistant Professor, Computer Science Affiliate Assistant Professor, Electrical and Computer Engineering
Micallef	Shirley	Full Member	B.S., University of Malta, 1991; M.S., University of Malta, 1996; Ph.D., University of Massachusetts Boston, 2008	Associate Professor, Plant Science Affiliate Associate Professor, Plant Science Affiliate Assistant Professor, Biological Sciences
Michel	Sonya A.	Special	B.A., Barnard College, 1964; M.A., San Francisco State University, 1975; Ph.D., Brown University, 1986.	Professor Emerita, History
Midgette	Greg	Full Member	B.S., University of Connecticut, 2004; M.P.P., University of California-Los Angeles, 2009; Ph.D., Rand Graduate School of Policy Studies, 2014.	Assistant Professor, Criminology and Criminal Justice
Migdall	Alan	Full Member	B.S. University of Maryland, 1978; Ph.D. Massachusetts Institute of Technology, 1984	Adjunct Professor, Physics
Mignerey	Alice C.	Full Member	B.S.,University of Rochester, 1971; M.S., 1973; Ph.D., 1975.	Professor, Chemical Physics Professor, Chemistry
Milchberg	Howard M.	Full Member	B.S., McMaster University-Hamilton, 1979; Ph.D., Princeton University, 1985.	Distinguished Scholar-Teacher, Physics Professor, Electrical and Computer Engineering Professor, Physics Professor, Chemical Physics
Miler	Kris	Full Member	B.A., College of William & Mary; Ph.D., University of Michigan	Associate Professor, Government and Politics
Milke	James A.	Full Member	B.S., University of Maryland-College Park, 1976; M.S., 1981; Ph.D., 1991.	Professor, Fire Protection Engineering
Milkie	Melissa A.	Full Member	B.A., Indiana University-Bloomington, 1987;M.A., 1990; Ph.D., 1995.	Professor Emerita, Sociology
Miller	Thomas J.	Full Member	B.Sc., University of York, 1981; M.Sc., North Carolina State University, 1984; Ph.D., 1990.	Professor, Marine, Estuarine, and Environmental Sciences
Miller	Gregory	Full Member	B.Mus., Oberlin College, 1990.	Associate Professor, Ethnomusicology Associate Professor, Music Associate Professor, Music Education
Miller	Matthew J	Special Member	B.A., Judson College, IL, 1999; M.A., Loyola University Chicago, 2001; Ph.D., Loyola University Chicago, 2005.	n/a, Counseling Psychology Associate Professor

Miller	Ross H.	Full Member	B.S., Iowa State University, 2003; M.S., Iowa State University, 2005; M.S., Iowa State University, 2006; Ph.D., University of Massachusetts Amherst, 2010.	Assistant Professor, Kinesiology Assistant Professor, Neurosciences and Cognitive Science Assistant Professor, Physical Activity
Miller	M. Coleman	Full Member	B.S. Hillsdale College, 1984; M.S. California Institute of Technology, 1986; Ph.D. California Institute of Technology, 1990	Professor, Astronomy
Miller	Carl A.	Associate	B.S., Duke University, 2001; Ph.D. University of California, Berkeley, 2007.	Adjunct Associate Professor, Applied Mathematics & Statistics, and Scientific Computation
Miller	Ian	Special Member	BA, Colorado College, 1999; MS, Yale University, 2003; PhD, Yale University, 2007	Research Scientist, Entomology
Miller	Theresa	Special Member	Ph.D. 2015, MPhil 2010 University of Oxford; B.A. 2007 American University	Postdoctoral Research Associate, Anthropology
Mills	Quincy	Full Member	B.A., University of Illinois-Urnaba/Champaign, 1997; M.A., University of Chicago, 1999; MBA, DePaul University, 2004: Ph.D., University of Chicago, 2006	Associate Professor, History
Millson	John J.	Full Member	B.S., Massachusetts Institute of Technology, 1968; Ph.D., University of California-Berkeley, 1973.	Professor, Mathematics
Milner	Stuart D.	Adjunct Member		Research Professor, Civil and Environmental Engineering
Milton	Donald	Full Member	B.A., University of Maryland Baltimore County, 1976; MD, Johns Hopkins University, 1980; MOccH, Harvard University, 1985; DrPH, Harvard University, 1989.	Professor, Environmental Health Sciences
Minarik	William	Special Member	B.S., St. Olaf College, 1984; M.S., University of Washington, 1989; Ph.D., Rensselaer Polytechnic Institute,, 1983.	University Affiliate, Geology
Mirabal	Nancy	Full Member	B.A. University of California-Berkeley; Ph.D. University of Michigan, Ann Arbor	Associate Professor, American Studies Affiliate Associate Professor, Women's Studies
Mirsky	Steven Brian	Special Member	B.A., Prescott College, 2000; M.S., Pennsylvania State University, 2003; Ph.D., Pennsylvania State University, 2008	University Affiliate, Environmental Science and Technology
Mislevy	Robert J.	Full Member	B.S., M.S., Northern Illinois University, 1972, 1974; Ph.D., University of Chicago, 1981;	Professor Emeritus, Measurement, Statistics and Evaluation

Mitchell	Natasha Ann	Associate	B.S., Cornell University, 1993; M.S., Syracuse University, 1997; Ph.D., University of North Carolina-Greensboro, 2001.	University Affiliate Associate Clinical Professor, School Counseling
Mitchell	Alice	Adjunct Member		Affiliate Assistant Professor
Mitchell	Erik	Full Member	Ph.D. University of North Carolina, Chapel Hill.	Lecturer, Information Management Lecturer, Library and Information Science
Mitchell	Emily	Full Member	B.A. Middlebury College, 1997; M.F.A., Brooklyn College, 2005.	Associate Professor, Creative Writing
Mitchelmore	Carys L.	Full Member	B.S., University of Portsmouth, U.K., 1992; M.S., University of Portsmouth, U.K., 1993; Ph.D., University of Birmingham, U.K., 1997	Associate Professor, Marine, Estuarine, and Environmental Sciences
Mitnik	Oscar	Graduate Teaching	Ph.D., University of California-Los Angeles, 2004	Lecturer, Applied Economics
Mittal	Mona	Full Member	B.S., Lady Irwin College, 1996; M.A., Tata Institute of Social Sciences, 1998; Ph.D., Texas Tech University, 2002; M.A., University of Rochester, 2014.	Associate Professor, Couple and Family Therapy Assistant Professor, Maternal and Child Health
Mitter	Charles	Full Member	BS, Stanford University, 1970; PhD, State University of New York - Stony Brook, 1977	Professor, Biological Sciences Professor Emeritus, Entomology
Miyoshi	Takemasa	Full Member	Ph.D., University of Maryland, 2005	Assistant Professor, Applied Mathematics & Statistics, and Scientific Computation
Mo	Yifei	Full Member	B.S., Peking University, 2005; Ph.D., University of Wisconsin, 2010.	Associate Professor, Materials Science and Engineering
Modarres	Mohammad	Full Member	B.S., Tehran Polytechnic Institute, 1974; M.S.,Massachusetts Institute of Technology, 1976; Ph.D., 1979. GCEN Academic Advisor for Nuclear Engineering GCEN Academic Advisor for Reliability Engineering	Co-Director, Reliability Engineering Professor, Mechanical Engineering Professor, Reliability Engineering
Moeller	Susan	Full Member	B.A., Yale University, 1979; A.M., Harvard University, 1985; Ph.D., 1987.	Professor, Journalism
Moghadam	Linda L.	Adjunct Member	B.A., University of Maryland-College Park, 1976; M.A.,1981; Ph.D., 1989.	Professor Emerita, Sociology
Mohapatra	Rabindra N.	Full Member	B.Sc.,Utkal University, 1964; M.Sc., University of Delhi, 1966; Ph.D., University of Rochester, 1969.	Distinguished Scholar-Teacher, Physics Professor, Physics

Mohr	Jonathan	Full Member	B.A., University of California-Santa Cruz, 1988; M.S., California State University-Hayward, 1995; Ph.D., University of Maryland-College Park, 2001.	Associate Professor, Psychology
Mokhtari	Manouchehr	Full Member	B.S., University of Tehran, 1977; M.A., University of Houston, 1984; Ph.D., 1986.	Associate Professor, Family Science Associate Professor, Maternal and Child Health
Moller	Dan	Full Member	B.A., Vassar College, 1998; B.Phil., Oxford University, 2000; Ph.D., Princeton University, 2005.	Associate Professor, Philosophy
Molloy	Erin	Full Member	B.A., University of Chicago, 2011; Ph.D., University of Illinois at Urbana-Champaign, 2020	Assistant Professor, Computer Science
Monarrez	Tomas	Graduate Teaching	Ph.D., University of California-Berkeley, 2018	Lecturer, Applied Economics
Monroe	Christopher	Full Member	B.S., Massachusetts Institute of Technology, 1987; Ph.D., University of Colorado-Denver, 1992	Professor, Electrical and Computer Engineering Professor, Physics
Mont	Eusabia	Non-Member	B.A., Hampton University, 2000;M.A., California State University-Northridge, 2004	Assistant Clinical Professor, Speech Language Pathology
Montaquila	Jill	Full Member	B.A. Mathematics and Economics, Ashland College 1989); M.S. Statistics, Miami University 1991); Ph.D. Statistics, American University 1998)	Research Assistant Professor, Survey Methodology
Montas	Hubert J.	Full Member	B.S., McGill University-Montreal, 1988; M.S., 1990; Ph.D., Purdue University, 1996.	Associate Professor, Bioengineering
Montesi	Laurent G. J.	Full Member	B.S., Pierre et Marie Curie University, 1994; M.S., Paris-Sud University, 1996; Ph.D., Massachusetts Institute of Technology, 2002.	Professor, Geology Associate Professor, Applied Mathematics & Statistics, and Scientific Computation
Moon	Sherril M.	Full Member	B.A., Randolph-Macon Woman's College, 1974; M.Ed., James Madison University, 1976; Ed.D., University of Virginia, 1983.	Professor Emerita, Special Education
Moore	Candace Maddox	Full Member	B.A., University of Georgia, 2002; M.Ed., University of Georgia, 2004; Ph.D., University of Georgia, 2011	Assistant Clinical Professor Associate Clinical Professor, Student Affairs
Moore	Sarah C.K.	Associate	Ph.D. Arizona University	Assistant Clinical Professor, Teaching and Learning, Policy and Leadership

Morgan	Amy	Full Member	B.A., Psychology, 2010, University of New Hampshire; M.S., Human Development and Family Science: Marriage and Family Therapy, 2012, University of New Hampshire; Ph.D., Human Development and Family Science: Marriage and Family Therapy, 2020, Virginia Tech	Assistant Professor, Couple and Family Therapy Assistant Clinical Professor, Family Science
Morin	Bode	Adjunct Member	Ph.D. 2009, M.S. 1995 Michigan Technological University; B.S. 1989 University of Michigan	Assistant Research Professor, Anthropology
Morris	Irwin L.	Full Member	B.A., Furman University, 1989; M.A., University of North Carolina-Chapel Hill, 1991; Ph.D., 1994.	Professor, Government and Politics
Morris	Christopher	Full Member	A.B., Vassar College, 1971; M.A., University of Toronto, 1974; Ph.D., University of Toronto, 1977.	Professor Emeritus, Philosophy
Morse	Brandon	Full Member	B.F.A., University of Wisconsin Stevens Point, 1997; M.F.A., Ohio State University ,2000	Chair, Art Studio Associate Professor, Art Studio
Mosely	Erin	Full Member	B.A., Northwestern University, 2003; MS, London School of Economics & Political Science, 2006; M.A., Harvard University, 2012; Ph.D., Harvard University, 2016	Assistant Professor, History
Moser	Thomas Colborn, Jr.	Full Member	B.A., Harvard University, 1973 M.A., Yale University, 1979; Ph.D., Stanford University, 1987.	Associate Professor, English Language and Literature
Moses	Claire G.	Full Member	A.B., Smith College, 1963; M.Phil.,George Washington University, 1972; Ph.D., 1978.	Professor Emeritus, Women's Studies Affiliate Professor, History
Mosleh	Ali	Full Member	B.S.,University of Technology-Tehran, 1975; M.S., University of California-Los Angeles, 1978; Ph.D., 1981.	Director, Reliability Engineering Professor, Reliability Engineering
Moss	Alfred A., Jr.	Full Member	B.A., Lake Forest College, 1965; M.Div., Episcopal Divinity School-Cambridge, 1968; M.A., University of Chicago, 1972;Ph.D., 1977.	Associate Professor Emeritus, History
Moss	Lawrence K.	Full Member	B.A., University of California-Los Angeles, 1949; M.A., University of Rochester, 1950; Ph.D., University of Southern California-Los Angeles, 1957.	Professor Emeritus, Music Professor Emeritus, Music Education
Moss	Bernard	Adjunct Member	B.A., New York University, 1957; Ph.D., Massachusetts Institute of Technology, 1966.	Adjunct Professor, Biological Sciences

Mosser	David M.	Full Member	B.S., University of Bridgeport, 1974 M.S., Univeristy of Bridgeport, 1975 Ph.D., North Carolina State, 1983	Professor, Biological Sciences
Mossman	Carol A.	Full Member	B.A., University of New Mexico-Albuquerque, 1975; M.A., Rice University, 1979; Ph.D., 1982.	Professor Emerita, French Modern Studies Professor Emerita, French Studies
Mote	Clayton D., Jr.	Full Member	B.S.,University of California-Berkeley, 1959; M.S., 1960; Ph.D., 1963.	Regents Professor, Mechanical Engineering
Moult	John	Full Member	B.S., University of London, 1965; D.Phil., University of Oxford, 1970.	Adjunct Professor, Biological Sciences
Mount	David M.	Full Member	B.S., Purdue University, 1977; Ph.D., 1983.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Computer Science
Mount	Stephen M.	Full Member	B.A., Rice University, 1978; Ph.D., Yale University, 1983.	Associate Professor, Biological Sciences
Moyer	Alene	Full Member	B.S.-PT, University of Texas-Austin,1983; M.A., 1989; Ph.D., 1995.	Professor Emerita, German Literature and Language
Mueller	Jenna	Full Member	B.S., Rice University; M.S., Duke University; Ph.D., Duke University	Assistant Professor, Bioengineering
Mueller	Collin	Full Member	Ph.D., Ohio State University	Associate Professor, Sociology
Mulbry	Walter	Special Member	B.S., Duke University, 1979; Ph.D., University of Maryland-College Park, 1987	University Affiliate, Environmental Science and Technology
Mullin	Amy	Full Member	B.A. University of California, Santa Cruz, 1985 Ph.D. University of Colorado, Boulder, 1991	Professor, Chemical Physics Professor, Chemistry
Muncy	Robyn L.	Full Member	B.A., Lindenwood College, 1977; M.A., University of Idaho, 1980; Ph.D.,Northwestern University, 1987	Professor, History Affiliate Professor, Women's Studies Affiliate Associate Professor, American Studies
Munday	Jeremy	Full Member	B.S., Middle Tennessee State University, 2003; Ph.D., Harvard, 2008	Assistant Professor, Chemical Physics
Munds	Phil	Adjunct Member	B.A., San Francisco Conservatory	Lecturer, Ethnomusicology Lecturer, Music Education
Mundy	Lee G.	Full Member	B.S., California Institute of Technology, 1977; Ph.D., University of Texas-Austin, 1984.	Professor, Astronomy
Murdock	Katherine	Full Member	B.M., Boston University; graduate studies, Yale School of Music	Associate Professor, Ethnomusicology Associate Professor, Music Associate Professor, Music Education
Muro	Silvia	Associate	B.S., Universidad de Granada, 1995; Ph.D., Universidad Autonoma de Madrid, 1999	Associate Research Professor, Bioengineering

Murphy	Thomas E.	Full Member	B.A., Rice University, 1994; B.S., 1994; M.S., Massachusetts Institute of Technology, 1997; Ph.D., 2001	Professor, Electrical and Computer Engineering Professor, Chemical Physics
Murphy	Angus S.	Full Member	B.A., University of California, Santa Cruz, 1993; Ph.D., 1996.	Professor, Plant Science Affiliate Professor, Biological Sciences
Murrell	Peter	Full Member	B.Sc., London School of Economics, 1971; M.Sc., 1972; Ph.D., University of Pennsylvania, 1977.	Professor, Economics
Mushotzky	Richard	Full Member	B.S. Massachusetts Institute of Technology, 1968; M.S. University of California San Diego, 1971; Ph.D. University of California San Diego, 1976	Professor, Astronomy
Mussenden	Sean	Full Member	B.A., St. Mary's College of Maryland; M.A., University of Maryland.	Lecturer, Journalism
Myers	David N.	Full Member	B.S., Clemson University, 1978; M.L.A., University of Georgia, 1984; Ph.D., 1994.	Director, Landscape Architecture Associate Professor, Landscape Architecture
Myers	David	Full Member	B.S., Clemson University, 1978; M.L.A., University of Georgia, 1984; Ph.D., 1994.	Director, Plant Science Associate Professor, Plant Science
Nagaraj	V.T.	Full Member	B.E., University of Mysore; M.E., Indian Institute of Science; Ph.D., Loughborough University of Technology	Research Scientist, Aerospace Engineering
Naharro-Calderon	Jose M.	Full Member	B.A., Allegheny College, 1974; M.A.,University of Pennsylvania, 1977; Ph.D., 1985.	Professor, Spanish Language and Literature
Namkoong	Kang	Full Member	B.A., Korea University, 1999; M.A., Korea University, 2005; Ph.D., University of Wisconsin-Madison, 2011	Associate Professor, Communication
Nan	Xiaoli	Full Member	B.A., Beijing University, China, 2000; M.A., University of Minnesota-Twin Cities, 2003; Ph.D., University of Minnesota-Twin Cities, 2005.	Professor, Communication
Napp Aveli	Carolina	Associate	Ph.D. University of Maryland 2014	Assistant Clinical Professor, Teaching and Learning, Policy and Leadership
Narayan	Prakash	Full Member	B.Tech., Indian Institute of Technology-Madras, 1976; M.S., Washington University, 1978; Ph.D., 1981.	Professor, Electrical and Computer Engineering Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Systems Engineering
Narvaez	Alfonso A.	Graduate Teaching	B.S., Cornell University; M.S., Columbia University	Lecturer, Historic Preservation

Nau	Dana S.	Full Member	B.S., University of Missouri-Rolla, 1974; A.M., Duke University, 1976; Ph.D., 1979.	Professor, Systems Engineering Professor, Computer Science
Nava-Tudela	Alfredo	Adjunct Member		Director, Scientific Computation Adjunct Professor, Applied Mathematics & Statistics, and Scientific Computation
Needelman	Brian A.	Full Member	B.I.S., School for International Training, 1993; M.S., University of Illinois, 1997; Ph.D., Pennsylvania State University, 2001.	Associate Professor, Environmental Science and Technology
Neel	Maile	Full Member	B.A., Humboldt State University, 1985; M.S., University of California, Santa Barbara, 1994; Ph.D. University of California, Riverside, 2000	Professor, Entomology Professor, Plant Science Associate Professor, Biological Sciences
Nelson	Daniel	Full Member	B.S. University of California, Irvine, 1993; Ph.D. University of Georgia, Athens, 1999.	Professor, Veterinary Medical Sciences Affiliate Professor, Biological Sciences
Nelson	David M.	Full Member	Ph.D. University of Illinois, 2005	Assistant Professor, Marine, Estuarine, and Environmental Sciences
Nelson	Judd	Non-Member	BS, University of Wisconsin - Madison, 1969; M.S, University of Wisconsin - Madison, 1972; PhD, University of Wisconsin - Madison, 1974	Professor Emeritus, Entomology
Nemes	Peter	Full Member	M.Sc., Eotvos Lorand University (Budapest, Hungary), 2004; PhD, The George Washington University (Washington, DC), 2009	Associate Professor, Biochemistry Associate Professor, Chemistry
Nerlove	Marc L.	Full Member	B.A., University of Chicago, 1952; M.A., Johns Hopkins University, 1955; Ph.D., 1956.	Distinguished University Professor Emeritus, Agricultural and Resource Economics
Neubert	Debra Ann	Full Member	B.S., University of Wisconsin-Madison, 1976; M.Ed., University of Maryland-College Park, 1981; Ph.D., 1985.	Professor Emerita, Special Education
Neustadtl	Alan	Full Member	B.A., Bates College, 1979; M.A., University of Massachusetts-Amherst, 1982; Ph.D., 1987.	Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Associate Professor, Sociology
Newburn	David	Full Member	B.S., University of Maryland, College Park, 1991; Ph.D., University of California, Berkeley, 2002	Associate Professor, Agricultural and Resource Economics

Newcomb	Robert W.	Full Member	B.S., Purdue University, 1955;M.S., Stanford University, 1957; Ph.D., University of California-Berkeley, 1960.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Neurosciences and Cognitive Science Professor Emeritus, Electrical and Computer Engineering
Newcombe	Megan	Full Member	B.A., M.S., University of Cambridge, 2009; Ph.D., California Institute of Technology, 2016.	Assistant Professor, Geology
Newman	Rochelle	Full Member	B.S., Northwestern University, 1991; M.A., State University of New York at Buffalo, 1995; Ph.D., State University of New York at Buffalo, 1997.	Chair, Hearing and Speech Sciences Professor, Speech Language Pathology Associate Professor, Neurosciences and Cognitive Science Affiliate Associate Professor, Second Language Acquisition
Nguyen	Nicole	Non-Member	B.A., University of Maryland, 2005;Au.D., University of Maryland, 2009	Associate Clinical Professor, Clinical Audiology
Nguyen	Quynh	Full	B.A., Stanford University, 2005; M.S.P.H., UNC Gillings School of Global Public Health, 2009; Ph.D., UNC Gillings School of Global Public Health, 2011	Associate Professor, Epidemiology Associate Professor, Biostatistics
Nguyen	Van Tran	Associate	B.F.A & B.S., State University of New York at Buffalo, 2015; M.F.A, State University of New York at Buffalo; 2017; Ph.D, Rensselaer Polytechnic Institute, 2021	n/a, Theatre and Performance Studies
Ni	Shuna	Full Member	M.S., Tongji University, 2013; Ph.D., Texas A&M University, 2018	Assistant Professor, Fire Protection Engineering
Nie	Zhihong	Non-Member	Ph.D., University of Toronto, Canada, 2008	Assistant Professor, Chemical Physics Assistant Professor, Chemistry
Nigam	Sumant	Full Member	M.S.,Indian Institute of Technology-Kanpur, 1978; Ph.D., Princeton University, 1983	Professor, Atmospheric and Oceanic Science Professor, Chemical Physics
Nishimura	Raphael	Adjunct Member		
Nochetto	Ricardo H.	Full Member	Licenciado, University of Rosario-Argentina, 1976; Ingeniero Electricista, 1979; Ph.D., University of Buenos Aires, 1983.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematics
Noh	Sungho	Graduate Teaching	Ph.D., University of Maryland at College Park, 2018	Lecturer, Applied Economics
Noonan	Peter	Full Member	B.S., University of Maryland 1988; M.Arch, University of Maryland 1992	Professor of Practice, Architecture

Norman	Howard	Full Member	B.A., Western Michigan University, 1972; M.A., Indiana University-Bloomington, 1976.	Professor, English Language and Literature Professor, Creative Writing
North	Elizabeth W.	Full Member	B.A., Swarthmore College, 1991; M.A., Johns Hopkins University, 1996; Ph.D. University of Maryland College Park, 2001	Assistant Professor, Marine, Estuarine, and Environmental Sciences
Novick	Jared	Full Member	B.A., University of Rochester, 1998; A.M., University of Pennsylvania, 2001; Ph.D., University of Pennsylvania, 2005	Assistant Professor, Hearing and Speech Sciences Assistant Professor, Neurosciences and Cognitive Science Assistant Professor, Speech Language Pathology
Nunes	Zita	Full Member	B.A., Brown University, 1983; M.A.,University of California-Berkeley, 1986; Ph.D., University of California-Berkeley 1994.	Associate Professor, English Language and Literature Associate Professor, Comparative Literature Affiliate Associate Professor, American Studies Affiliate Associate Professor, Women's Studies
Nunn	Ryan	Graduate Teaching	Ph.D., University of Michigan-Ann Arbor, 2012	Lecturer, Applied Economics
Nyamekye-Frazier	Farhaana	Full	Ph.D., University of Maryland, College Park, 2010	Assistant Clinical Professor, Teaching and Learning, Policy and Leadership
O'Brien	Karen Mary	Full Member	B.S., Loyola University of Chicago, 1983; M.A., University of Missouri-Kansas City, 1988; Ph.D., Loyola University of Chicago, 1993	Associate Chair, Psychology Professor, Psychology Affiliate Professor, Women's Studies
O'Brien	Tammatha	Associate	BS, University of Maryland, 1996; MS, University of Maryland, 1998; PhD, University of Maryland, 2008	Senior Lecturer, Entomology
O'Brochta	David	Full Member	BS, University of Kansas, 1977; PhD, University of California - Irvine, 1985	Professor Emeritus, Entomology
O'Flahavan	John F.	Full Member	CV: B.A., University of Colorado-Boulder, 1981; M.A., University of Colorado-Boulder, 1982; Ph.D., University of Illinois, 1989.	Associate Chair, Teaching and Learning, Policy and Leadership Associate Chair, Curriculum and Instruction Associate Professor, Teaching and Learning, Policy and Leadership Associate Professor, Curriculum and Instruction
O'Grady	Ryan	Graduate Teaching	M.S., Towson University; MLIS, University of Maryland	Lecturer, History and Library & Information Science
O'Haver	Thomas C.	Full Member	B.S., Spring Hill College, 1963; D.Engin., University of Florida, 1968.	Professor Emeritus, Chemistry

O'Leary	Dianne P.	Full Member	B.S., Purdue University, 1972; Ph.D., Stanford University, 1976.	Professor Emerita, Computer Science
O'Meara	Kerry Ann	Full Member	B.A., Loyola College Baltimore, 1993; M. Ed., The Ohio State University, 1995; Ph.D., University of Maryland, 2000	Professor, Higher Education Associate Professor Affiliate Professor, Women's Studies
O'Neal	Colleen R.	Full Member	B.A., Cornell University, 1990; M.S., Auburn University, 1995; M.A., Long Island University, 1997; Ph.D., Long Island University, 2000.	Assistant Professor, School Psychology Assistant Professor
O'Neil	Judith M.	Full Member	B.S., Boston College, 1983; M.S., State University of New York at Stony Brook, 1987; Ph.D., University of Maryland, College Park, 1995	Research Assistant Professor, Marine, Estuarine, and Environmental Sciences
O'Shea	Patrick G.	Full Member	BSc degree in Experimental Physics from the National University of Ireland, University College Cork, and an M.S. and Ph.D. in Physics from the University of Maryland	Professor, Electrical and Computer Engineering
Oard	Douglas William	Full Member	M.Elect.E., Rice University, 1979;B.A., 1979; Ph.D., University of Maryland-College Park, 1996.	Professor, Human-Computer Interaction Professor, Information Management Professor, Information Studies Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Library and Information Science Affiliate Professor, Computer Science
Oates	Sarah	Full Member	B.A., Yale University, 1985; M.A., Emory University 1996; Ph.D., Emory University 1998.	Professor, Journalism
Ocampo	Carlos Rios	Full Member	B.S., Universidad de Antioquia, 2010; M.S., Karlsruher Institut fur Technologie, 2013; Ph.D., University of Oxford, 2017	Affiliate Assistant Professor, Electrical and Computer Engineering
Ochoa	Ronald	Special Member	BS, University of Costa Rica; 1983; BS, University of Costa Rica, 1985; MS, CATIE, Turrialba, Costa Rica, 1989; PhD, Bringham Young University, 1996	Research Scientist, Entomology
Oehrlein	Gottlieb	Full Member	B.S., Wurzburg University, 1976; Ph.D., SUNY-Albany, 1981.	Professor, Materials Science and Engineering

Ohadi	Michael M.	Full Member	B.S., Tehran University-Iran, 1977; M.S., Southern Illinois University-Carbondale, 1980; M.Ed., Northeastern University, 1982; Ph.D., University of Minnesota-Twin Cities, 1986.	Professor, Mechanical Engineering
Ohlmacher	Scott	Graduate Teaching	Ph.D., University of Maryland at College Park, 2017	Lecturer, Applied Economics
Okamoto	Kyoko	Adjunct Member	Bachelor in Languages, Kyoto University of Foreign Studies, Toho Kinshu Kai Koto School, Ashiya, Japan	University Affiliate, Ethnomusicology University Affiliate, Music University Affiliate, Music Education
Okoudjou	Kasso A.	Full Member	Maîtrise, Université Nationale du Bénin, 1996; M.S., Georgia Institute of Technology, 2003; Ph.D., Georgia Institute of Technology, 2003.	Associate Chair, Mathematics Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematics
Olson	Lars J.	Full Member	B.A., Eckerd College, 1981;M.A., Cornell University, 1985; Ph.D., 1988.	Professor, Agricultural and Resource Economics
Ondov	John M.	Full Member	B.S., Muhlenberg College, 1970; Ph.D.,University of Maryland-College Park, 1974.	Professor, Chemistry
Ontiveros	Randy	Full Member	B.A., Biola University, 1997; M.A. University of California, Irvine, 2001; PhD., 2006.	Associate Professor, English Language and Literature Associate Professor, Comparative Literature Affiliate Associate Professor, Women's Studies
Oppelt	Robert J.	Adjunct Member	B.M., North Carolina School of the Arts	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Oppenheimer	Joe A.	Full Member	B.A., Cornell University, 1963; M.A., University of Michigan-Ann Arbor, 1964; Ph.D., Princeton University, 1971.	Professor Emeritus, Government and Politics
Oran	Elaine S.	Full Member	Ph.D., Yale University, Department of Engineering and Applied Sciences 1972); M.Ph., Yale University, Department of Physics Yale University 1968); A.B., Bryn Mawr College, Physics and Chemistry 1966)	Professor, Aerospace Engineering
Orban	John P.	Full Member	B.S., University of Adelaide, 1980; Ph.D.,Australian National University-Canberra, 1985; Ph.D., 1985.	Professor, Biochemistry Professor, Chemistry
Orlando	Valerie	Full Member	Ph.D., Brown University, 1996	Chair, French Modern Studies Chair, French Studies Professor, French Modern Studies Professor, French Studies Affiliate Professor, Women's Studies

Orozco	Luis A.	Non-Member	B.S., Instituto Tecnologico y de Estudios Superiores de Occidente, 1980; Ph.D., University of Texas-Austin, 1987.	Professor, Physics
Orr	Yancey	Full Member	Ph.D., 2012, University of Arizona	Assistant Professor, Anthropology
Orr	Robert C.	Full Member	B.A., University of California, 1987; M.P.A., Princeton University, 1992; Ph.D., Princeton University, 1996	Dean, Public Policy Professor, Public Policy
Orser	Charles	Special Member	Ph.D. 1980 Southern Illinois University; M.A. 1975 Wayne State University; B.S. 1972 Eastern Michigan University	Research Professor, Anthropology
Ortiz	Jose	Non-Member	B.A., University of Connecticut - 2004;M.A., University of Massachusetts-Amherst - 2007	Assistant Clinical Professor, Speech Language Pathology
Oruc	Yavuz A.	Full Member	B.S., Middle East Technology University-Ankara, Turkey, 1976; M.S.,University of Wales-Cardiff, 1978; Ph.D., Syracuse University, 1983.	Professor, Electrical and Computer Engineering
Osborn	Kevin	Full Member	B.S., University of Mary Washington, 1992; M.S., University of Tennessee-Knoxville, 1995; Ph.D., University of Illinois-Urbana/Champaign, 2001.	Adjunct Professor, Physics
Oshan	Taylor	Full Member	M.A., CUNY-Hunter College, 2013; Ph.D., Arizona State University, 2017	Assistant Professor, Geographical Sciences
Osorio	Peter	Full Member	B.A., Dartmouth College, 2012; Ph.D., Cornell University, 2020	Assistant Professor, Classics
Osterman	Michael	Adjunct Member	Ph.D., University of Maryland - College Park, 1991	Senior Research Scientist, Mechanical Engineering Senior Research Scientist, Reliability Engineering
Ott	Edward	Full Member	B.S., The Cooper Union, 1963; M.S., Polytechnic Institute of Brooklyn, 1965; Ph.D., 1967.	Distinguished University Professor, Electrical and Computer Engineering Distinguished University Professor, Applied Mathematics & Statistics, and Scientific Computation Distinguished University Professor, Physics Distinguished University Professor, Chemical Physics
Otte	Michael W.	Full Member	B.S. Clarkson University, 2005; M.S. University of Colorado at Boulder, 2007; Ph.D. University of Colorado at Boulder, 2011; Postdoc, Massachusetts Institute of Technology, 2014	n/a, Aerospace Engineering

Ouyang	Min	Full Member	B.S., Peking University, 1995; M.S., Peking University, 1996; A.M., Harvard University, 1999; Ph.D., Harvard University, 2001;	Associate Professor, Physics Associate Professor, Chemical Physics Affiliate Associate Professor, Materials Science and Engineering
Ovadia	David	Graduate Teaching	Ph.D., Northwestern University, 2015	Lecturer, Applied Economics
Owens	Trevor	Adjunct Member	PhD., George Mason University.	Lecturer, History and Library & Information Science Lecturer, Information Management Lecturer, Information Studies Lecturer, Library and Information Science
Ozbay	Erkut Y.	Full Member	B.A., Bogazici University, 1998; M.A., Bogazici University, 2000; Ph.D., New York University, 2007.	Professor, Economics
Ozment	Jon	Adjunct Member	B.M., University of Maryland, 1979; M.M., University of Maryland, 2004	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Pachepsky	Yakov	Special Member		University Affiliate, Environmental Science and Technology
Pacuit	Eric	Full Member	BS Ohio University, 1998; MS Case Western Reserve University, 2000; PhD Graduate Center of the City University of New York, 2005.	Assistant Professor, Philosophy
Padios	Jan	Full Member	B.A., Columbia University, 2001; M.A., New York University, 2005; Ph.D., New York University, 2012	Assistant Professor, American Studies
Page-Voth	Leslie V.	Adjunct Member	B.S., Lewis & Clark College, 1982;M.S., Portland State University, 1986; Ph.D.,University of Maryland-College Park, 1992.	Research Associate, Special Education
Paglione	Johnpierre	Full Member	B.S., Queen's University at Kingston, 1999; M.S., University of Toronto, 2000; Ph.D., 2004.	Associate Professor, Physics Associate Professor, Chemical Physics
Pal	Utpal	Full Member	B.S./M.S., University of Calcutta, India; Ph.D., University of Calcutta, India.	Professor, Veterinary Medical Sciences Affiliate Professor, Biological Sciences
Paley	Derek	Full Member	B.S., Yale University, 1997; M.A., Princeton University, 2004; Ph.D., Princeton University, 2007	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Neurosciences and Cognitive Science Professor, Aerospace Engineering Affiliate Professor, Electrical and Computer Engineering
Palloni	Giordano	Graduate Teaching	Ph.D., University of Maryland at College Park, 2015	Lecturer, Applied Economics

Palmer	Margaret	Full Member	BS, Emory University, 1977; MS, University of South Carolina, 1979; PhD, University of South Carolina, 1983	Distinguished University Professor, Entomology Professor, Marine, Estuarine, and Environmental Sciences Professor, Biological Sciences Affiliate Professor, Women's Studies
Palus	Matthew	Adjunct Member	Ph.D. 2010 Columbia University; M.A.A. 2000 University of Maryland; B.A. 1994, B.A. 1993 University of Maine	Adjunct Assistant Professor, Anthropology
Paoletti	Jo B.	Full Member	B.S., Syracuse University, 1971; M.S.,University of Rhode Island, 1976; Ph.D., University of Maryland-College Park,1980.	Associate Professor, American Studies
Paolisso	Michael J.	Full Member	Ph.D. 1985 M.A. 1978 and B.A. 1976 University of California - Los Angeles	Professor Emeritus, Anthropology Affiliate Professor, Women's Studies
Papadopoulos	Konstantinos Dennis	Full Member	B.Sc, University of Athens-Greece, 1960; M.Sc, Massachusetts Institute of Technology, 1965; Ph.D.,University of Maryland-College Park, 1968.	Professor, Physics Professor Emeritus, Astronomy
Papamanthou	Charalampos	Full Member	B.S., University of Macedonia, 2003; M.S., University of Crete, 2007; M.S. Brown University, 2007; Ph.D., 2011	Associate Professor, Electrical and Computer Engineering
Papamarcou	Adrianos	Full Member	B.A., University of Cambridge, 1981; M.S., Cornell University, 1983; Ph.D., 1987.	Associate Professor, Electrical and Computer Engineering
Papazian	Elizabeth	Full Member		Associate Professor, Comparative Literature
Papoian	Garegin	Full Member	B.S.,1994,Russian Academy of Science; Ph.D., 1999, Cornell University	Director, Chemical Physics Associate Professor, Biophysics Associate Professor, Chemistry
Park	Julie J	Full Member	B.A., Vanderbilt University, 2004; M.A., University of California-Los Angeles, 2005; Ph.D., University of California-Los Angeles, 2009	Associate Professor, Student Affairs Assistant Professor
Park	Julie	Full Member	B.A., University of California, Davis, 1994; M.PL., University of Southern California, 1998; M.A., University of Southern California, 2001; Ph.D., University of Southern California, 2003.	Associate Professor, Sociology
Park	Jaekeun	Full Member	D.V.M., Konkuk University - Seoul, South Korea; Ph.D. Konkuk University - Seoul, South Korea	n/a, Veterinary Medical Sciences

Parker	John	Non-Member	BA, University of Virginia, 1993; MS, College of William & Mary, 1998; PhD, Georgia Institute of Technology, 2005	Research Scientist, Entomology
Parks	Sheri L.	Full Member	B.A., University of North Carolina-Chapel Hill, 1978; M.A., University of Massachusetts-Amherst, 1983; Ph.D., 1985.	Associate Professor, American Studies
Parry-Giles	Shawn J.	Full Member	B.F.A., Emporia State University, 1984; M.A., University of New Mexico, 1987; Ph.D., Indiana University, 1992.	Chair, Communication Director, Professional Communication for Enhanced English Fluency Director, Professional Communication for Enhanced English Fluency (online) Professor, Communication Affiliate Professor, Women's Studies
Parry-Giles	Trevor S.	Full Member	B.A., Ripon College, 1985; M.A., University of New Mexico, 1987; Ph.D., Indiana University, 1992.	Professor, Communication
Passannante	Gerard	Full Member	B.A., Yale University, 2000; PhD Princeton Univ. 2006.	Professor, English Language and Literature Professor, Comparative Literature
Pate	Amy	Full Member		Professor, Terrorism Analysis
Patro	Rob	Full Member	B.S., University of Maryland, 2006; Ph.D., University of Maryland, 2012.	Associate Professor, Computer Science
Patterson	Brittany Renee	Graduate Teaching	B.A., St. Lawrence University, 2010; Ph.D., University at Buffalo, State University of New York, 2015	Lecturer, School Counseling
Paukstelis	Paul	Full Member	B.S., Biology, 1997, University of Kansas; Ph.D. Molecular Biology, University of Texas at Austin	Associate Professor, Biochemistry Associate Professor, Chemistry
Pavao-Zuckerman	Mitchell	Full Member	B.A. Binghamton University, 1995; M.S. University of Tennessee, 1998; Ph.D. University of Georgia, 2003.	Assistant Professor, Environmental Science and Technology
Pavão-Zuckerman	Barnet	Full Member	Ph.D. 2001 University of Georgia; B.A. 1996 Binghamton University	Chair, Anthropology Professor, Anthropology
Payne	Gregory F.	Associate	B.S., Cornell University, 1979; M.S., 1981; Ph.D., University of Michigan-Ann Arbor, 1984.	Research Professor, Bioengineering
Payne-Sturges	Devon	Full Member	B.S., University of Virginia, 1989; M.Engr., University of Virginia, 1990; M.P.H., Johns Hopkins University, 1997; Dr.P.H., Johns Hopkins University, 2002.	Associate Professor, Environmental Health Sciences

Paynter	Kennedy T.	Full Member	B.S.,College of William & Mary-Williamsburg, 1980; Ph.D., Iowa State University,1985.	Director, Marine, Estuarine, and Environmental Sciences
Payson	Steven	Graduate Teaching	Ph.D., Columbia University, 1991	Lecturer, Applied Economics
Pearson	Margaret M.	Full Member	A.B., Smith College, 1980; M.A., Yale University, 1982; M.Phil., 1983; Ph.D., 1986.	Professor, Government and Politics
Pearson	Barry L.	Full Member	B.A., University of Michigan-Ann Arbor, 1968; M.A.,Indiana University-Bloomington, 1970; Ph.D., Indiana University, 1977.	Professor, English Language and Literature Affiliate Professor, American Studies
Pearson	Sara	Full Member	BA, Music/Dance, University of Minnesota, 1971; Nikolais Louis Dance Lab 1973-74 Alexander Technique/ Somatic Training, Regina Wray, Ann Rodiger, Judith Blackstone 1976-96)	Associate Professor, Dance
Pease	John	Full Member	B.S., Western Michigan University, 1960; M.A., Michigan State University, 1963; Ph.D., 1968.	Associate Professor Emeritus, Sociology
Pecht	Michael G.	Full Member	B.S. Physics, University of Wisconsin-Madison, 1976; M.S. Electrical Eng., University of Wisconsin-Madison, 1978; MS Eng. Mechanics, University of Wisconsin-Madison, 1979; Ph.D. Eng. Mechanics, University of Wisconsin-Madison, 1982	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mechanical Engineering Professor, Reliability Engineering
Peckerar	Martin C.	Full Member	B.S., State University of New York-Stony Brook, 1968; M.S.,University of Maryland-College Park, 1971; Ph.D., 1976.	Professor Emeritus, Electrical and Computer Engineering
Peer	Wendy A.	Full Member	B.S., California State University, Bakersfield, 1989; Ph.D. University of California, Santa Cruz, 1996.	Associate Professor, Environmental Science and Technology Affiliate Associate Professor, Plant Science
Peercy	Megan	Full Member	B.A., Trinity University, 1995; M.A.T., University of Utah, 2000; Ph.D., University of Utah, 2004	Professor, Teaching and Learning, Policy and Leadership Assistant Professor, Curriculum and Instruction
Peng	Huaishu	Full Member	B.S., Yale University, 2013; M.S.E., Johns Hopkins University, 2016; Ph.D., Johns Hopkins University, 2019.	Assistant Professor, Computer Science
Penniston-Dorland	Sarah	Full Member	B.A., Harvard University, 1986; M.Ed., Harvard University, 1990; M.S., University of Texas-Austin, 1997; M.A., Johns Hopkins University, 1999; Ph.D., 2005.	Associate Professor, Geology

Penny	Stephen	Full Member	B.S., James Madison University, 2002; M.S., University of Maryland-College Park, 2008; Ph.D., University of Maryland-College Park, 2011.	Assistant Research Professor, Applied Mathematics & Statistics, and Scientific Computation
Penrose	Mehl	Full Member	B.A., University of Missouri-Columbia, 1990; M.A., Kansas University, 1993; Ph.D., UCLA, 2000.	Associate Professor, Spanish Language and Literature Affiliate Associate Professor, Women's Studies
Perillo	Patty A	Graduate Teaching	B.A., University of Delaware, 1986; M.Ed., University of Delaware, 1988; Ph.D., University of Maryland, 2002	n/a, Special Education
Perlis	Donald R.	Full Member	B.S., Purdue University, 1966; Ph.D., New York University, 1972; Ph.D., University of Rochester, 1981.	Professor, Neurosciences and Cognitive Science Professor, Computer Science
Pertmer	Gary A.	Full Member	B.S.,Iowa State University, 1971; M.S., University of Missouri-Columbia, 1973;Ph.D., 1978.	Associate Professor, Mechanical Engineering Associate Professor, Reliability Engineering
Pessoa	Luiz	Full Member	Position: Professor CV: B.S., Federal University of Rio de Janeiro, 1989; M.S., Federal University of Rio de Janeiro, 1990; Ph.D., Boston University, 1995	Professor, Neurosciences and Cognitive Science Professor, Psychology
Pessoa	Luis	Full Member	B.S., Federal University of Rio, 1989; M.S., Federal University of Rio, 1990; Ph.D., Boston University, 1996	Affiliate Professor, Electrical and Computer Engineering
Petek	Nathan	Graduate Teaching	Ph.D., University of Chicago, 2016	Lecturer, Applied Economics
Peterson	Carla L.	Full Member	B.A., Radcliffe College, 1965; Ph.D., Yale University, 1976.	Professor Emerita, English Language and Literature Professor Emerita, Comparative Literature
Peterson	Margaret	Associate	Ph.D. University of Maryland, 2014	Associate Clinical Professor, Teaching and Learning, Policy and Leadership
Petrasek	Lubomir	Graduate Teaching	Ph.D., Penn State University, 2011	Lecturer, Applied Economics
Pfister	Damien	Full Member	B.A., University of Alabama, 2000; M.A., University of Pittsburgh, 2004; Ph.D., University of Pittsburgh, 2009	Associate Professor, Communication
Phaneuf	Raymond J.	Full Member	A.B., College of the Holy Cross, 1978; Ph.D., University of Wisconsin-Madison, 1985.	Professor, Materials Science and Engineering
Phaneuf	Ray	Full Member	B.A., Colelge of the Holy Cross, 1978; M.S., College of the Holy Cross, 1981; Ph.D., University of Wisconsin-Madison, 1985	Affiliate Professor, Electrical and Computer Engineering

Phillips	William D.	Adjunct Member	B.S., Juniata College, 1970; Ph.D., Massachusetts Institute of Technology, 1976.	Distinguished University Professor, Physics Distinguished University Professor, Chemical Physics
Phillips	William Henry	Associate	B.S., University of Maryland, 1992; M.S., University of Maryland, 1996; Ph.D., University of Maryland, 2005	Assistant Clinical Professor, Plant Science Assistant Clinical Professor, Extension Education
Phillips	Pepper E.	Full Member	B.A., Hanover College, 1982; M.A., Indiana State University, 1984; Ph.D., 1990.	Assistant Professor Assistant Professor, Counseling Psychology
Phillips	Colin	Full Member	B.A., Oxford University, 1990; Ph.D., Massachusetts Institute of Technology, 1996	Distinguished Scholar-Teacher, Linguistics Professor, Linguistics Professor, Neurosciences and Cognitive Science Affiliate Professor, Second Language Acquisition
Phillips	Brian	Full Member	B.S., University of Pittsburgh, 2006; M.S., University of Illinois at Urbana-Champaign, 2008; Ph.D., University of Illinois at Urbana-Champaign, 2012	Assistant Professor, Civil and Environmental Engineering
Phillips	Kerk	Graduate Teaching	Ph.D., University of Rochester, 1991	Lecturer, Applied Economics
Piantedosi	Kelly Worland	Graduate Teaching	B.A., College of William & Mary, 2000; M.A., College of William & Mary 2004; Ph.D., University of Maryland, 2014	Lecturer, Special Education
Piccoli	Philip Michael	Associate	B.A., University of Montana, 1984; M.S., University of Pittsburgh, 1987; Ph.D., University of Maryland-College Park, 1992.	Research Scientist, Geology
Pichardo	Jazmin	Graduate Teaching	B.A., Vassar College, 2011; M.Ed., University of Maryland-College Park, 2016	Assistant Director, Higher Education
Pick	Leslie	Full Member	BS, Wesleyan University, 1977; PhD, Albert Einstein College of Medicine, NY, 1986	Chair, Entomology Distinguished Scholar-Teacher, Entomology Professor, Entomology Associate Professor, Biological Sciences
Pickering	Kenneth E.	Adjunct Member	B.S.,Rutgers University-New Brunswick, 1973; M.S.,State University of New York-Albany, 1975; Ph.D.,University of Maryland-University College, 1987.	Adjunct Professor, Atmospheric and Oceanic Science
Pierson	James J.	Full Member	Ph.D. University of Washington, 2006	Research Assistant Professor, Marine, Estuarine, and Environmental Sciences
Pietroski	Paul M.	Full Member	B.A., Rutgers University-New Brunswick, 1986; Ph.D., Massachusetts Institute of Technology, 1990.	Distinguished Scholar-Teacher, Linguistics Professor Emeritus, Linguistics

Pietroski	Paul	Full Member	B.A. Rutgers 1986; PhD MIT 1990	Distinguished University Professor Emeritus, Philosophy
Piety	Philip	Adjunct Member	M.A., Georgetown University, 2003; Ph.D., University of Michigan-Ann Arbor, 2008	Lecturer, Human-Computer Interaction Lecturer, Information Management Lecturer, Information Studies Lecturer, Library and Information Science
Pines	Darryll J.	Full Member	B.S.,University of California-Berkeley, 1986; M.S., Massachusetts Institute of Technology, 1988; Ph.D., 1992.	Professor, Aerospace Engineering
Pinker	Rachel	Full Member	M.Sc., Hebrew University of Jerusalem, 1965; Ph.D.,University of Maryland-College Park, 1976.	Professor, Atmospheric and Oceanic Science
Piomelli	Ugo	Full Member	B.S., Universita Degli Studi di Napoli-Italy, 1979; M.S., University of Notre Dame,1984; Ph.D., Stanford University, 1988.	Professor Emeritus, Mechanical Engineering
Pittman	Henry Tyler	Associate	B.S., Clemson University, 2010; M.S., Clemson University, 2010; Ph.D., University of Arkansas, 2014	University Affiliate, Environmental Science and Technology
Place	Allen R.	Full Member	B.A., Johns Hopkins University, 1973; Ph.D., 1979.	Professor, Marine, Estuarine, and Environmental Sciences
Plaisant-Schwenn	C.	Adjunct Member	Ph.D.,Pierre & Marie Curie University, 1982.	Senior Research Scientist, Human-Computer Interaction
Plumly	Stanley	Full Member	B.A.,Wilmington College, 1962; M.A., Ohio University, 1968; Ph.D., 1970.	Distinguished University Professor, Creative Writing
Pogue	Dennis	Associate	B.A., University of Iowa; M.A., George Washington University; Ph.D., American University	Associate Research Professor, Historic Preservation
Polat	Nihat	Full	Ph.D., University of Texas at Austin, 2007	Chair, Teaching and Learning, Policy and Leadership Professor, Teaching and Learning, Policy and Leadership
Polinsky	Maria	Full Member	B.A. Moscow University, 1979. M.A. Institute for Linguistics of the Russian Academy of Sciences, 1983. Ph.D. Institute for Linguistics of the Russian Academy of Sciences, 1986.	Professor, Linguistics Professor, Neurosciences and Cognitive Science
Pop	Mihai	Full Member	B.S., Politehnica University Bucharest, 1994; M.S.E., Johns Hopkins University, 1998; Ph.D., Johns Hopkins University, 2000	Professor, Computer Science Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Affiliate Professor, Biological Sciences

Pope	Nolan	Full Member	B.A., Brigham Young University, 2011; Ph.D., University of Chicago, 2017	Assistant Professor, Economics
Popper	Arthur N.	Full Member	B.A., New York University-Bronx, 1964; Ph.D.,City University of New York-Graduate School & Univ. Center, 1969.	Professor Emeritus, Biological Sciences
Porter	Tom E.	Full Member	B.S.,University of Minnesota-Duluth, 1983; Ph.D., University of Minnesota-Twin Cities, 1988.	Professor, Animal Sciences Professor, Biological Sciences
Porter	Adam A.	Full Member	B.A., California State University-Dominguez Hills, 1986; M.S., University of California-Irvine, 1988; Ph.D., 1991.	Professor, Computer Science
Porter	Lauren	Full Member	B.A., Dickinson College,2006; M.A., SUNY-Albany, 2010; Ph.D., 2012.	Associate Professor, Criminology and Criminal Justice
Portier	Kendra	Full Member	B.F.A, The Ohio State University, 2003; M.F.A., the University of Illinois, Urbana-Champaign	n/a, Dance
Porto	Trey	Full Member	B.S., University of North Carolina-Chapel Hill, 1990; Ph.D., Cornell University, 1996.	Adjunct Professor, Physics
Poterjoy	Jonathan	Full Member	Ph.D. in Meteorology, 2014, Pennsylvania State University, University Park, PA, B.S. in Meteorology and Applied Mathematics, May 2009 (Magna Cum Laude) Millersville University of Pennsylvania, Millersville, PA	Assistant Professor, Atmospheric and Oceanic Science
Poulin	Myles	Full Member		Assistant Professor, Biochemistry Assistant Professor, Chemistry
Powell	Tim	Adjunct Member	B.S. and Performance Certificate, Pennsylvania State University, M.M. University of Maryland, College Park	Lecturer, Music Lecturer, Music Education
Pradhan	Abani K.	Full Member	B.T., Orissa University of Agriculture and Technology, 1998; M.T., Indian Institute of Technology, 2001; Ph.D., University of Arkansas, 2006	Professor, Nutrition and Food Science Graduate Director, Nutrition and Food Science
Prather	Richard	Full Member	S.B., Massachusetts Institute of Technology, 2002; Ph.D., University of Wisconsin-Madison, 2009	Assistant Professor, Human Development Assistant Professor, Neurosciences and Cognitive Science

Preece	Jennifer J.	Full Member	B.Sc., University of Ulster, 1971; Ph.D., Open University, 1985.	Professor, Human-Computer Interaction Professor, Information Management Professor, Information Studies Professor, Library and Information Science
Prell	Christina	Full Member	Ph.D., Rensselaer Polytechnic Institute, 2003; M.S. Rensselaer Polytechnic Institute, 1997; B.A., University of Massachusetts, 1993.	Assistant Professor, Sociology
Preminger	Omer	Full Member	B.Sc.,Tel-Aviv University, 2004; M.A., Tel-Aviv University, 2006; Ph.D., Massachusetts Institute of Technology, 2011.	Associate Professor, Linguistics
Prentice	Ann	Full Member	PhD., Columbia University.	Professor Emerita, Information Management Professor Emerita, Library and Information Science
Presser	Stanley	Full Member	A.B., Brown University, 1971; Ph.D., University of Michigan-Ann Arbor, 1977.	Assistant Director, Survey Methodology Distinguished University Professor, Sociology Distinguished University Professor, Survey and Data Science (online)
Pressly	William L.	Full Member	B.A., Princeton University, 1966; Ph.D., New York University-Institute of Fine Arts, 1974.	Professor Emeritus, Art History and Archaeology
Prestegaard	Karen L.	Full Member	B.A., University of Wisconsin-Madison, 1976; M.S., University of California-Berkeley, 1979; Ph.D., 1982.	Associate Professor, Geology
Price	Richard N.	Full Member	B.A., University of Sussex, 1965; D.Phil., 1968.	Professor Emeritus, History
Prichard	Stephanie	Full Member	B.M.E., University of Maryland College Park, M.M., Northwestern University, Ph.D., University of Colorado, Boulder	Assistant Professor, Ethnomusicology Assistant Professor, Music Assistant Professor, Music Education
Priest	Dana	Full Member	B.A., University of California, Santa Cruz	Professor, Journalism
Prior	Steven J.	Full Member	B.S., University of Pittsburgh-Bradford, 1999; M.A., Ohio State University, 2001; Ph.D., University of Maryland-College Park, 2005	Assistant Professor, Kinesiology
Prochno	Paulo	Full Member	M.S., Ph.D., INSEAD., 2002.	Liaison, Telecommunications

Proferes	Nicholas	Full Member	PhD., University of Wisconsin - Milwaukee, 2015	Lecturer, Information Management Lecturer, Library and Information Science Lecturer, Curation and Management of Digital Assets (online)
Prucha	Ingmar R.	Full Member	M.A., University of Technology Vienna, 1973; Ph.D., 1977.	Distinguished University Professor, Economics Professor, Applied Mathematics & Statistics, and Scientific Computation
Puchtel	Igor S.	Associate	M.S., Moscow Geological Prospecting Academy; Ph.D., Russian Academy of Sciences-Moscow, 1992.	Research Scientist, Geology
Puett	Robin	Full Member	B.A., Emory University, 1991; M.P.H., Emory University, 1997; Ph.D. (Epidemiology), University of South Carolina, 2004; Ph.D. (Environmental Health Sciences), University of South Carolina, 2004.	Associate Professor, Environmental Health Sciences
Punzalan	Ricardo L.	Full Member	PhD. University of Michigan.	Assistant Professor, Information Management Assistant Professor, Information Studies Assistant Professor, Library and Information Science Assistant Professor, Curation and Management of Digital Assets (online)
Purtilo	James M.	Full Member	B.A., Hiram College, 1978; M.A.,Kent State University, 1980; Ph.D., University of Illinois-Urbana/Champaign, 1986.	Associate Professor, Computer Science
Pérez Belda	Antonio Alejandro	Associate	Ph.D., University of Iowa, 2021	Assistant Clinical Professor, Teaching and Learning, Policy and Leadership
Qi	Yiping	Full Member	B.S., Nankai University-Tienstsin, 2000; M.S., Shanghai Jiaotong University, 2003; Ph.D., University of Minnesota 2009.	Associate Professor, Plant Science
Qu	Gang	Full Member	B.S., Hefei University of Technology/China University of Science and Technology, 1992; M.S., 1994; M.A., University of Oklahoma, 1996; M.S., University of California--Los Angeles, 1998; Ph.D., 2000	Professor, Electrical and Computer Engineering Associate Professor, Systems Engineering
Quinlan	Elizabeth	Full Member	Ph.D., University of Illinois at Chicago, 1993.	Professor, Neurosciences and Cognitive Science Professor, Biological Sciences

Quinn	Sandra Crouse	Full Member	B.S., Virginia Commonwealth University, 1973; M.E., The American University, 1977; Ph.D., University of Maryland, 1993.	Professor, Family Science Professor, Maternal and Child Health
Quintero-Herencia	Juan Carlos	Full Member	B.A. Universidad de Puerto Rico, Rio Piedras 1986; M.A. Princeton University, 1988; Ph.D. Princeton University, 1995	Professor, Spanish Language and Literature
Quintero-Herencia	Juan Carlos	Full Member	B.A. Universidad de Puerto Rico, Rio Piedras 1986; M.A. Princeton University, 1988; Ph.D. Princeton University, 1995	Affiliate Professor, Comparative Literature
Quintiere	James G.	Full Member	B.S.,New Jersey Institute of Technology, 1962; M.S., New York University, 1966; Ph.D., 1970.	Affiliate Professor, Mechanical Engineering
Quintos	Beatriz	Associate	Ph.D. University of Arizona	Associate Clinical Professor, Teaching and Learning, Policy and Leadership
Quiros Alcala	Lesliam	Full Member		Assistant Professor, Environmental Health Sciences
Rabenhorst	Martin C.	Full Member	B.S., Univ. of Maryland, 1975; M.S., 1978; Ph.D., Texas A&M Univ., 1983.	Professor, Environmental Science and Technology
Rabin	Oded	Full Member	B.A., The Technion - Israel Institute of Technology 1996; M.Sc., Weizmann Institute of Science, 1998; Ph.D., Massachusetts Institute of Technology, 2004	Associate Professor, Materials Science and Engineering Associate Professor, Chemical Physics
Raffan Montoya	Fernando	Full Member	B.S. in Aerospace Engineering (Summa Cum Laude), Florida Institute of Technology, 2005; M.S. in Aerospace Engineering, UMD, 2008; Ph.D. in Aerospace Engineering, UMD, 2016	Assistant Professor, Fire Protection Engineering
Raghavan	Subramanian	Full Member	B.E., Indian Institute of Technology, 1987; M.S., Rensselaer Polytechnic Institute,1988; Ph.D., Massachusetts Institute of Technology, 1995.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Systems Engineering
Raghavan	Srinivasa R.	Full Member	B.Tech., IIT Madras, 1992; Ph.D., North Carolina State University, 1998.	Professor, Chemical Engineering Professor, Chemical Physics
Rahaman	Shaik O	Full Member		Associate Professor, Nutrition and Food Science
Raianu	Mircea	Full Member	B.A., University of California-Berkeley, 2009; M.A., Harvard University, 2013; Ph.D., Harvard University, 2017	Assistant Professor, History

Ramachandran	Niranjan	Full Member	B.S., Massachusetts Institute of Technology, 1991; M.A., Brown University, 1995; Ph.D., 1996.	Associate Professor, Mathematics
Ramani	Geetha	Full Member	B.A., Bryn Mawr College, 1998; M.S., University of Pittsburgh, 2002; Ph.D., 2005.	Associate Professor, Human Development
Ranadive	Sushant	Full Member	Ph.D., Exercise Physiology, University of Illinois at Champaign Urbana, Urbana, Illinois, May 2012	Assistant Professor, Kinesiology
Randall	Martha Lee	Adjunct Member	B.Mus., University of Kansas, 1964; M.Mus., 1966.	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Rane	Karen	Associate	B.S., Delaware Valley College of Science & Agriculture, 1978; M.S., Cornell University, 1983; Ph.D., University of Massachusetts-Amherst, 1985.	Director, Plant Science
Raschid	Louiqa	Full Member	B.T., Indian Institute of Technology-Madras, 1980; M.Eng., Univerisity of Florida, 1982; Ph.D., University of Florida, 1987.	Affiliate Professor, Computer Science
Ratner	Nan Bernstein	Full Member	B.A.,Jackson College-Tufts University, 1974; M.A., Temple University, 1976; Ed.D.,Boston University, 1982.	Professor, Hearing and Speech Sciences Professor, Neurosciences and Cognitive Science Professor, Speech Language Pathology Affiliate Professor, Second Language Acquisition
Raupp	Michael	Full Member	BS, Cook College, Rutgers University, 1975; MS, Rutgers University, 1977; PhD, University of Maryland, 1981	Professor Emeritus, Entomology
Ravel	Jacques	Adjunct Member	Sc.B., Brown University., 1992; Ph.D., University of California-Berkeley, 1997	n/a, Biological Sciences
Rawat	Nidhi	Full Member	B.S., Hemvati Nandan Bahuguna Garhwal University 2002; M.S., 2004; Ph.D., Indian Institute of Technology, 2009.	Associate Professor, Plant Science
Ray	Sangeeta	Full Member	B.A., University of Calcutta,1980; M.A., 1983; M.A., Miami University, 1987; Ph.D., University of Washington, 1990.	Professor, English Language and Literature Professor, Comparative Literature Affiliate Professor, American Studies Affiliate Professor, Women's Studies
Ray	Rashawn	Full Member	Ph.D., Ohio State University	Associate Professor, Sociology Affiliate Professor, Women's Studies

Reck	Daniel	Full Member	B.A., Univ. of Oklahoma, 2010; M.A., Univ. of Michigan, 2013; Ph.D., Univ. of Michigan, 2016	Assistant Professor, Economics
Redcay	Elizabeth	Full Member	B.A., Duke University, 2001; M.A., University of California-San Diego, 2003; Ph.D., University of California-San Diego, 2008.	Associate Professor, Psychology Assistant Professor, Neurosciences and Cognitive Science
Redd	Charles	Adjunct Member		Lecturer, Music Lecturer, Music Education
Redish	Edward F.	Full Member	B.S., Princeton University, 1963; Ph.D., Massachusetts Institute of Technology, 1968.	Distinguished Scholar-Teacher, Physics Distinguished Scholar-Teacher, Teaching and Learning, Policy and Leadership Professor, Physics Professor, Teaching and Learning, Policy and Leadership Affiliate Professor, Teaching and Learning, Policy and Leadership Affiliate Professor, Curriculum and Instruction
Reed	William	Full Member	B.A., Emory University, 1992; M.A., Florida State University, 1996; Ph.D., 1998	Chair, Government and Politics Professor, Government and Politics
Reeves	Matthew	Special Member	Ph.D. 1997, M.A. 1993 Syracuse University; B.A. 1990 George Mason University	Research Professor, Anthropology
Reggia	James A.	Full Member	B.S.,University of Maryland-College Park, 1971; M.D., University of Maryland at Baltimore, 1975; Ph.D.,University of Maryland-College Park, 1981.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Neurosciences and Cognitive Science Professor, Computer Science
Regli	William	Full Member	B.S., St. Joseph's University, 1989; M.S., University of Maryland-College Park, 1994; Ph.D., University of Maryland-Colelge Park, 1995	Affiliate Professor, Electrical and Computer Engineering
Reilly	Allison	Full Member		Assistant Professor, Civil and Environmental Engineering
Ren	Jian-Jian	Full Member	B. S., Peking Univ.,1982; M. S. Univ. of North Carolina-Chapel Hill, 1989; Ph.D., Univ. of North Carolina-Chapel Hill, 1990	Professor, Mathematical Statistics
Rendall	Michael	Full Member	Ph.D., Brown University, 1993; A.M., Brown University, 1990; M.A., University of California, Santa Barbara, 1987; B.B.S., Massey University, New Zealand, 1981.	Professor, Sociology
Resmini	Mauro	Full Member		Assistant Professor, Comparative Literature

Resnik	Philip S.	Full Member	A.B., Harvard University, 1987; M.S.E., University of Pennsylvania, 1990; Ph.D., 1993.	Professor, Linguistics Professor, Neurosciences and Cognitive Science Affiliate Professor, Computer Science
Resop	Jonathan	Full Member	B.S., University of Maryland, 2004; B.S., University of Maryland, 2004; M.S., University of Maryland, 2006; Ph.D. Virginia Tech, 2010	Lecturer, Geospatial Information Science (with Nanjing Normal University) Lecturer, Geospatial Information Sciences University Affiliate, Geospatial Information Sciences Senior Lecturer, Geospatial Information Sciences
Reuter	Peter H.	Full Member	B.A., University of New South Wales-Kensington, 1966; M.Phil., Yale University, 1971 Ph.D., 1980.	Professor, Criminology and Criminal Justice
Reutt-Robey	Janice	Full Member	B.A., Haverford College, 1980 Ph.D., University of California-Berkeley, 1986.	Professor, Chemical Physics Professor, Chemistry
Rey	Georges	Full Member	B.A., University of California-Berkeley, 1970; M.A.,Harvard University, 1975; Ph.D., 1978.	Professor, Philosophy
Reynolds	Christopher	Full Member	B.A., Trinity College, Cambridge, UK, 1992; Ph.D., University of Cambridge, Inst of Astronomy, Cambridge, UK, 1996.	Professor, Applied Mathematics & Statistics, and Scientific Computation
Rhoads	Vera	Adjunct Member		Lecturer, Information Studies
Riaz	Amir	Full Member	B.S., U. Eng. & Tech Lahore, 1994; M.S. U. Southern California, 2001; Ph.D., U. California Santa Barbara, 2003.	Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Associate Professor, Mechanical Engineering
Rice	Jennifer K.	Full Member	B.S., Marquette University, 1990; M.S., Cornell University, 1993; Ph.D., 1995.	Professor, Policy Studies Professor, Teaching and Learning, Policy and Leadership
Richardson	Patricia	Adjunct Member	B.S., University of Maryland, 1972; M.Ed., University of Maryland, 1977; Ph.D. , University of Maryland, 1981	Professor of Practice
Richardson	Brian	Full Member	B.A., University of Washington, 1982; M.A.,1984; Ph.D., 1988.	Professor, English Language and Literature Professor, Comparative Literature
Richardson	Derek C.	Full Member	B.S., University of British Columbia, 1990; Ph.D., University of Cambridge, 1993.	Professor, Astronomy
Richardson	Joseph	Full Member	Ph.D. 2003 Rutgers University - School of Criminal Justice; M.A. 1992 Rutgers University - School of Criminal Justice; B.A. 1990 The University of Virginia	Professor, Anthropology

Rickard	Lisa	Non-Member	B.S., Pennsylvania State University, 1981;M.A., Hahnemann University, 1986;Au.D., University of Florida, 2010	Assistant Clinical Professor, Clinical Audiology
Rico	J. Eduardo	Full Member	B.Sc., Universidad Nacional de Colombia, 2006; M.Sc., Michigan State University, 2013; Ph.D., West Virginia University, 2016.	Assistant Professor, Animal Sciences
Ricotti	Massimo	Full Member	B.S./M.S., University of Florence, 1996; M.S., University of Colorado-Boulder, 1999; Ph.D., University of Colorado-Boulder, 2001.	Professor, Astronomy
Ridgway	Whitman H.	Full Member	A.B., Kenyon College, 1963; M.A., San Francisco State University, 1967; Ph.D., University of Pennsylvania, 1973; J.D., University of Maryland at Baltimore, 1985	Associate Professor Emeritus, History
Riggins	Tracy	Full Member	B.S. University of California - San Diego, 2000 Ph.D. University of Minnesota, 2005	Associate Professor, Psychology Assistant Professor, Neurosciences and Cognitive Science
Riley	Donald R.	Full Member	B.S., Purdue University, 1969; M.S., 1970; Ph.D.,1976.	Affiliate Professor, Mechanical Engineering
Riley	Sean	Full Member	B.S. University of Illinois, Champaign-Urbana, 2002; Ph.D. University of Kentucky, 2008.	Assistant Professor, Veterinary Medical Sciences
Rios	Fernando	Full Member	B.A., MacMurray College; M.M. Southern Illinois University-Carbondale; Ph.D., University of Illinois at Urbana-Champaign	Assistant Professor, Ethnomusicology Assistant Professor, Music Assistant Professor, Music Education
Rios Ocampo	Carlos	Full Member	B.S., University of Antioquia, 2010; M.S., Karlsruhe Institute of Technology, 2013; DPHIL, University of Oxford, 2017.	Assistant Professor, Materials Science and Engineering
Ristvey	Andrew	Full Member	Ph.D. University of Maryland, 2004	Agent, Plant Science
Ritzer	George	Full Member	B.A., City College of New York, 1962; M.B.A., University of Michigan Ann Arbor, 1964; Ph.D., Cornell University, 1968	Distinguished University Professor, Sociology Associate Professor, Sociology
Roberts	Douglas A.	Full Member	B.S., California Institute of Technology, 1988;M.S., University of California-Los Angeles, 1992; Ph.D., 1994.	Associate Professor, Physics
Roberts	Jennifer	Full Member	B.A., Brown University, 1996; M.P.H., Emory University, 2000; Ph.D., Johns Hopkins University, 2004	Assistant Professor, Kinesiology

Robertson	Carol E.	Full Member	B.A., Indiana University-Bloomington, 1970; M.A., 1972; Ph.D., 1975.	Affiliate Professor, American Studies
Robertson	Kellie	Full Member	B.A., Univ. of Virginia, 1990; M.A./M.Phil., Yale University, 1993; Ph.D., 1998.	Associate Chair, English Language and Literature Professor, English Language and Literature Professor, Comparative Literature
Robin	William	Full Member	B.M., Northwestern University, 2010; M.A., University of North Carolina, 2013; Ph.D., University of North Carolina, 2016	Assistant Professor, Ethnomusicology Assistant Professor, Music Assistant Professor, Music Education
Robinson	Eugene S.	Adjunct Member	B.A., University of Maryland-College Park, 1973; M.A., 1975; Ph.D., 1984.	Instructor, Comparative Literature
Robinson	Michael	Special Member	Ph.D., Applied Math, Cornell University, 2008.	Assistant Professor, Applied Mathematics & Statistics, and Scientific Computation
Roby	Dylan	Full Member	B.A., University of California-Los Angeles; D.P.H., George Washington University; Ph.D., George Washington University	Associate Chair, Health Administration Associate Chair, Health Equity Associate Chair, Health Policy Analysis and Evaluation Associate Chair, Health Services Director, Health Administration Director, Health Equity Director, Health Policy Analysis and Evaluation Director, Health Services Associate Professor, Health Administration Associate Professor, Health Equity Associate Professor, Health Policy Analysis and Evaluation Associate Professor, Health Services
Rocco	Melissa L	Graduate Teaching	B.S.B.A., Ohio State University, 2005; M.A., Ohio State University, 2011; Ph.D., University of Maryland-College Park, 2017	n/a, Student Affairs
Rockcastle	Garth C.	Full Member	B.Arch., Pennsylvania State University, 1974; M.Arch., Cornell University, 1978.	Professor, Architecture
Roderick	Jessie A.	Full Member	B.S., Wilkes College, 1956; M.A., Columbia University, 1957; Ed.D., Temple University, 1967.	Professor Emerita, Teaching and Learning, Policy and Leadership
Rodriguez	Ana Patricia	Full Member	B.A., University of California-Berkeley, 1987; M.A., University of California-Santa Cruz, 1994; Ph.D., 1998.	Associate Professor, Spanish Language and Literature Affiliate Associate Professor, Women's Studies

Rodriguez	Efrain	Full Member	Ph.D., University of California, 2009	Associate Professor, Chemical Physics Associate Professor, Chemistry
Rodriguez	Chantel	Full Member	B.S., Trinity University, 2007; Ph.D., University of Minnesota-Twin Cities, 2013	Assistant Professor, History
Roesch	Matthew	Full Member	B.S., University of Pittsburgh, 1997; Ph.D., University of Pittsburgh and Carnegie Mellon University, 2004.	Professor, Psychology Assistant Professor, Neurosciences and Cognitive Science
Rogers	Marc A.	Full Member	B.S., State University of New York-College at Cortland, 1976; M.Ed., University of Nevada-Las Vegas, 1979; Ph.D., University of Minnesota, 1984.	Associate Professor, Kinesiology Associate Professor, Physical Activity
Roller	Michael	Special Member	Ph.D. 2015, M.A.A. 2010 University of Maryland; B.A. 1998 University. of Delaware	Postdoctoral Research Associate, Anthropology
Rollins	Domonic Antonio	Graduate Teaching	B.A., Ohio State University, 2006; M.Ed., University of Vermont, 2009; Ph.D., University of Maryland-College Park, 2017	n/a, Higher Education
Rolstad	Kellie	Full Member	B.A., University of California-Los Angeles, 1986; M.A., University of California-Los Angeles, 1993; Ph.D., University of California-Los Angeles, 1998	Associate Professor, Teaching and Learning, Policy and Leadership Associate Professor, Curriculum and Instruction
Rolston	Steven L.	Non-Member	Ph.D. SUNY, Stonybrook, 1986. Laser cooling of neutral atoms;ultra cold plasmas; Bose-Einstein condensation; quantum information.	Co-Director, Physics Professor, Physics Professor, Chemical Physics
Roman	Michael R.	Full Member	B.A., Lake Forest College, 1971; M.A., CUNY-City College of New York, 1973;Ph.D., University of New Hampshire-Durham, 1976.	Professor, Marine, Estuarine, and Environmental Sciences
Rose	Jonathan	Graduate Teaching	Ph.D., University of Iowa, 2001	Lecturer, Applied Economics
Rosemblatt	Karin A.	Full Member	PhD, University of Wisconsin-Madison, 1996	Professor, History Affiliate Professor, Women's Studies
Rosenberg	Jonathan M.	Full Member	A.B., Harvard University, 1972; Math. Tripos, Pt. III, University of Cambridge, 1973; Ph.D.,University of California-Berkeley, 1976.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematics
Rosenfelt	Deborah S.	Full Member	B.A., Goucher College, 1964; M.A., Columbia University, 1965; Ph.D., University of California-Los Angeles, 1972.	Professor Emerita, Women's Studies Affiliate Professor, American Studies

Rosenthal	Laura	Full Member	B.A., Johns Hopkins University, 1983; M.A. Northwestern University, 1985; Ph.D., 1990.	Professor, English Language and Literature Affiliate Professor, Women's Studies
Ross	David S.	Full Member	B.S., Pennsylvania State University-University Park, 1969; M.S., 1971; Ph.D., 1973.	Professor Emeritus, Environmental Science and Technology
Ross	Steven J.	Full Member	B.A. Whittier College 1974; M.A. University of New Mexico 1981; Ph.D. University of Hawai'i 1995.	Director, Second Language Acquisition Professor, Second Language Acquisition
Ross	Michael	Full Member	B.A., Skidmore College, 1986; J.D., Duke University School of Law, 1989; M.A., University of Massachusetts Amherst, 1992; PhD., University of North Carolina Chapel Hill, 1999.	Professor, History
Roth	Stephen M.	Full Member	B.S., University of Montana, 1996; M.A., University of Maryland, 1998; Ph.D., 2000.	Professor, Physical Activity Associate Professor, Kinesiology Associate Professor, Neurosciences and Cognitive Science
Rotman	Deb	Special Member	Ph.D. 2001 University of Massachusetts; M.A. 1995 Western Michigan University; B.A. 1993 Grand Valley State University	Associate Research Professor, Anthropology
Rouse	Stella M.	Full Member	B.A., Louisiana State University, 1996; M.A., Louisiana State University, 2007; Ph.D., Louisiana State University, 2008.	Associate Professor, Government and Politics
Roussopoulos	Nicholas	Full Member	B.A., University of Athens-Greece,1969; M.S., University of Toronto, 1973; Ph.D., 1977.	Professor, Computer Science
Rowe	Christopher L.	Full Member	B.S., Pennsylvania State University-University Park, 1989; Ph.D., 1994.	Associate Professor, Marine, Estuarine, and Environmental Sciences
Rowe	Meredith L.	Full Member	B.A., University of Rochester, 1993; M.S., 1995; Ed.M., Harvard University, 1999; Ed.D., 2003.	University Affiliate, Human Development
Rowland	Leslie S.	Full Member	B.A., Texas Christian University, 1968; M.A.,University of Rochester, 1970; Ph.D., 1991.	Associate Professor, History Affiliate Associate Professor, American Studies
Rowley	Michelle V.	Full Member	B.A., The University of the West Indies, 1992; M.Sc., The University of the West Indies, 1996; Ph.D., Clark University, 2003	Associate Professor, Women's Studies
Roy	Rajarshi	Full Member	B.S., University of Delhi, 1973; M.S., 1975; M.A., University of Rochester,1977; Ph.D., 1981.	Professor, Physics Professor, Chemical Physics

Roy	Kevin	Full Member	B.S.F.S., Georgetown University, 1988; M.A., Northwestern University, 1995; Ph.D., Northwestern University, 1999.	Associate Professor, Family Science Associate Professor, Maternal and Child Health
Roy	Sougata	Full Member	M.S., University of Calcutta, 1997; Ph.D., Indian Institute of Science-Bangalore, 2006	Associate Professor, Biological Sciences
Roy	Nirupam	Full Member	B.E., Bengal Engineering and Science University, 2008; M.S., University of South Carolina-Columbia, 2013; Ph.D., University of Illinois-Urbana/Champaign, 2018	Affiliate Assistant Professor, Electrical and Computer Engineering
Rozenblit	Marsha L.	Full Member	B.A.,Barnard College, 1971; M.A., Columbia University, 1974; Ph.D., 1980.	Professor, History Professor, Jewish Studies
Rubin	Kenneth H.	Full Member	B.A., McGill University-Montreal, 1968; M.S.,Pennsylvania State University-University Park, 1969; Ph.D., 1971.	Professor, Human Development Professor, Neurosciences and Cognitive Science
Rubinstein	Yanir A.	Full Member	B.A., Technion, 1999; Ph.D., Massachusetts Institute of Technology, 2008.	Professor, Mathematics
Rubloff	Gary W.	Full Member	B.A., Dartmouth College, 1966; M.S., University of Chicago, 1967; Ph.D., 1971.	Professor, Materials Science and Engineering Professor, Systems Engineering
Rubloff	Gary	Full Member	B.A., Dartmouth College, 1966; M.S., University of Chicago, 1967; Ph.D., University of Chicago, 1971	Affiliate Professor, Electrical and Computer Engineering
Rudinger	Rachel	Full Member	B.S., Yale University, 2013; M.S.E., Johns Hopkins University, 2016; Ph.D., Johns Hopkins University, 2019.	Assistant Professor, Computer Science
Rudy	Jason	Full Member	B.A., Princeton University, 1997; PhD., Rutgers University, 2004.	Professor, English Language and Literature
Ruggeri	Deni	Full Member	M.L.A., Cornell University, 2001; Ph.D., University of California-Berkeley, 2009	Associate Professor, Plant Science Assistant Professor, Landscape Architecture
Ruiz-Barradas	Alfredo	Adjunct Member	B.S., Universidad Veracruzana , Xalapa, Veracruz, MEXICO, 1987; M.S., Universidad Nacional Autonoma de Mexico, 1991; M.S., University of Maryland, 1998; Ph.D., University of Maryland, 2001.	Associate Research Scientist, Atmospheric and Oceanic Science
Rumbaugh	Thomas	Graduate Teaching	Ph.D., University of Maryland at College Park, 1991	Lecturer, Applied Economics
Ruppert	John	Full Member	B.A., Miami University-Ohio, 1974; M.F.A., Rochester Institute of Technology, 1977.	Associate Professor, Art Studio
Ruppin	Eytan	Full Member		Professor, Computer Science

Rust	Keith	Full Member	B.A.hons) Mathematical Sciences, Flinders University of South Australia 1976); M.S. Biostatistics, Michigan 1982); Ph.D. Biostatistics, Michigan 1984).	Research Professor, Survey Methodology
Ruth	Matthias	Special Member	M.A.,Ruprecht-Karls-Universitat, 1989;Ph.D., University of Illinois, 1992	Affiliate Professor, Civil and Environmental Engineering
Ryabov	Eugene	Special Member	MSc, Moscow State University, Moscow, USSR, 1991; PhD, Institute of Agricultural Biotechnology, Moscow, Russia, 1994	Research Scientist, Entomology
Ryder	Thomas	Adjunct Member	Sc.B., Brown University., 1992; Ph.D., University of California-Berkeley, 1997	n/a, Biological Sciences
Ryzhov	Ilya	Full Member	B.S., Cornell University, 2004; M.Eng., Cornell University, 2005; M.S., Stanford University, 2006; Ph.D., Princeton University, 2011	Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Associate Professor, Systems Engineering
Sachs	Naomi	Full Member	B.A. Women Studies, Brown University, 1992; M.L.A., University of California, Berkeley, 1999; Ph.D., Texas A&M University, 2017	Assistant Professor, Landscape Architecture Assistant Professor, Plant Science
Saegerman	Claude	Special Member	DVM, 1986; MSc, 1992; PhD, 2004	Affiliate Professor, Entomology
Saegusa	Takumi	Full Member	LL.B., Univ. of Tokyo, 2002M.S., Cal. State Northridge, 2005Ph.D., Univ. of Washington, 2012	Assistant Professor, Mathematical Statistics Assistant Professor, Mathematics
Safar	Zoltan	Associate	B.S., Technical University of Budapest, 1996; Ph.D., University of Maryland, 2003	Director, Telecommunications
Sagdeev	Roald Z.	Full Member	B.S., University of Moscow, 1955;Ph.D., Institute of Physical Problems-Moscow, 1960; D.S.,U.S.S.R. Academy of Sciences-Siberia, 1962.	Distinguished University Professor, Physics
Saggese	Jordana Moore	Full Member	B.A., Vanderbilt University, 2001; M.A. University of Illinois at Urbana-Champaign, 2003; Ph.D., University of Illinois at Urbana-Champaign, 2008	Associate Chair, Art History and Archaeology
Sahajpal	Ritvik	Graduate Teaching	B.E., Punjab Engineering College, 2003; M.A., University of Maryland; Ph.D., University of Maryland, 2014	Associate Research Professor, Geospatial Information Sciences
Sahasrabudhe	Vikas	Adjunct Member	PhD., Computer Science, University of California at Berkeley.	Lecturer, Information Studies

Sahyoun	Nadine	Full Member	B.A.,University of Massachusetts,1974; M.S.,University of Iowa,1979;Ph.D.,Tufts University School of Nutrition,1995	Professor, Nutrition and Food Science
Salamanca-Riba	Lourdes G.	Full Member	Ph.D, Massachusetts Instutite of Technology.	Associate Chair, Materials Science and Engineering Professor, Materials Science and Engineering Professor, Chemical Physics
Salawitch	Ross J.	Full Member	B.S., Cornell University, 1981 Ph.D., Harvard University, 1987.	Professor, Atmospheric and Oceanic Science Professor, Chemistry
Salem	Mohamed	Full Member	M.S., Zagazig University, 1995; Ph.D., West Virginia University, 2004	Associate Professor, Animal Sciences
Salit	Marc	Adjunct Member	Sc.B., Brown University., 1992; Ph.D., University of California-Berkeley, 1997	n/a, Biological Sciences
Salness	David	Full Member	Diploma, Curtis Institute of Music, 1985.	Professor, Ethnomusicology Professor, Music Professor, Music Education
Samet	Hanan	Full Member	B.S., University of California-Los Angeles, 1970; M.S., Stanford University, 1975; Ph.D., 1975.	Professor, Computer Science
Sanchez	Delida	Full Member	B.A., Binghamton University, 1994; M.Ed., Harvard University, 1995; Ph.D., Columbia University, 2002.	Associate Professor, Counseling Psychology
Sand	Lesley	Adjunct Member		Postdoctoral Research Associate, Human Development
Sandborn	Peter A.	Full Member	B.S., University of Colorado-Boulder, 1982; M.S., University of Michigan-Ann Arbor,1983; Ph.D., 1987.	Professor, Mechanical Engineering Professor, Reliability Engineering
Sanford	Lawrence P.	Full Member	Sc.B., Brown University, 1978; Ph.D.,Massachusetts Institute of Technology-Woods Hole, 1984.	Professor, Marine, Estuarine, and Environmental Sciences
Sangaramoorthy	Thurka	Full Member	B.A. Barnard College, Columbia University, 1998; M.P.H. Columbia University, 2002; Ph.D. University of California, San Francisco & Berkeley, 2008	Associate Professor, Anthropology Affiliate Associate Professor, Women's Studies
Sanner	Robert	Full Member	B.S.,Massachusetts Institute of Technology, 1985; M.S., 1988; Sc.D., 1993.	Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Associate Professor, Aerospace Engineering
Santorio	Paolo	Full Member	Laurea (B.A.) University of Bologna 2005; Ph.D., MIT 2011	Associate Professor, Philosophy
Santoro	Wayne	Full Member	Ph.D., Ohio State University	Associate Professor, Sociology

Sapkota	Amy	Full Member		Associate Professor, Environmental Health Sciences
Sapkota	Amy Rebecca	Full Member	B.S., University of Maryland-College Park, 1997; M.P.H., Yale University, 1999; Ph.D., Johns Hopkins University, 2005	Professor, Environmental Health Sciences
Sapkota	Amir	Full Member	Ph.D., Johns Hopkins University, 2004	Professor, Environmental Health Sciences
Saracho	Olivia N.	Full Member	B.S., Texas Women's University, 1967; M.Ed., 1972; Ph.D., University of Illinois-Urbana/Champaign, 1978.	Professor, Teaching and Learning, Policy and Leadership Professor, Curriculum and Instruction
Sartorius	David	Full Member	B.A. Trinity University, 1995; M.A. University of North Carolina-Chapel Hill, 1997; Ph.D. University of North Carolina-Chapel Hill, 2003	Associate Professor, History Affiliate Associate Professor, Women's Studies
Sau	Jay Deep	Full Member	B.Tech., Indian Institute of Technology, Kanpur, 2002; Ph.D., University of California, Berkeley, 2008.	Assistant Professor, Physics
Sayer	Liana	Full Member	B.A., University of Texas M.A., University of Pennsylvania Ph.D., University of Maryland, 2001	Professor, Sociology
Scarcelli	Giuliano	Full Member		Assistant Professor, Biophysics
Schafer	James A.	Full Member	B.S., University of Rochester, 1961; M.S., University of Chicago, 1962; Ph.D., 1965.	Professor, Mathematics
Schiffmacher	Andrew	Full Member	B.S., Cornell University, 1998; Ph.D., University of Maryland-College Park, 2010	Assistant Professor, Animal Sciences
Schijf	Johan	Full Member	Ph.D., Universiteit Utrecht, 1992.	Assistant Professor, Marine, Estuarine, and Environmental Sciences
Schleicher	Lisa	Special Member	B.S., University of North Carolina at Asheville, 2007; M.S., University of Maryland, 2009; Ph.D., University of Maryland, 2013	n/a, Civil and Environmental Engineering
Schmerr	Nicholas	Full Member	B.S. Beloit College, 2001, Ph.D. Arizona State University, 2008.	Assistant Professor, Geology
Schmitz	Fredric H.	Adjunct Member	B.E.,Rensselaer Polytechnic Institute, 1964; M.S., Princeton University, 1966;Ph.D., 1969.	Professor, Aerospace Engineering
Schonebaum	Andrew	Full Member		Affiliate Associate Professor, Comparative Literature
Schonfeld	Paul M.	Full Member	B.S.,Massachusetts Institute of Technology, 1974; M.S., 1974; Ph.D.,University of California-Berkeley, 1978.	Professor, Civil and Environmental Engineering

Schott	Eric	Special Member	B.A., Reed College, 1985; Ph.D., Harvard Medical School, 1994.	Research Assistant Professor, Marine, Estuarine, and Environmental Sciences
Schreier	Harold J.	Special Member	B.S., California Polytech State University, 1978; Ph.D., Pennsylvania State University, 1983	Associate Professor, Marine, Estuarine, and Environmental Sciences
Schuler	Catherine A.	Full Member	B.A., Eckerd College, 1974; M.A., Emerson College, 1977; Ph.D., Florida State University, 1984.	Professor, Women's Studies
Schultheis	Lester	Non-Member	B.S., Johns Hopkins University, 1976; Ph.D., Johns Hopkins University, 1982; M.D., Johns Hopkins University, 1985	Research Professor, Bioengineering
Schultz	Ted	Non-Member	BA, University of California, Berkeley, 1988; PhD, Cornell University, 1995	Research Scientist, Entomology
Schwab	Robert M.	Full Member	B.A., Grinnell College, 1969; M.A.,University of North Carolina-Chapel Hill, 1971; Ph.D., Johns Hopkins University, 1980.	Professor Emeritus, Economics
Schwartz	Charles W.	Full Member	B.S.C.E.,Massachusetts Institute of Technology, 1974; M.S.C.E., 1977; Ph.D., 1979.	Chair, Civil and Environmental Engineering Associate Professor, Civil and Environmental Engineering
Scott	Elizabeth	Special Member	Ph.D. 1991 University of Minnesota; M.A. 1984 University of Florida; A.B. 1980 University of Georgia; A.A. 1978 Young Harris College	Associate Research Professor, Anthropology
Scribner	Campbell	Full Member	PhD, University of Wisconsin	Associate Professor, Teaching and Learning, Policy and Leadership
Scullen	Mary Ellen	Full Member	M.A., Indiana University-Bloomington, 1990; Ph.D., 1993.	Associate Professor, French Modern Studies Associate Professor, French Studies Affiliate Associate Professor, Second Language Acquisition
Seate	Anita	Full Member	B.A., Georgia State University, 2004; M.A., Georgia State University, 2009; Ph.D., University of Arizona, 2012	Associate Professor, Communication
Secor	David H.	Full Member	B.S., Macalester College, 1983; M.S., University of South Carolina, 1985;Ph.D., 1990.	Professor, Marine, Estuarine, and Environmental Sciences
Sedwick	Raymond	Full Member	B.S., Penn State University; S.M., Massachusetts Institute of Technology; Ph.D., Massachusetts Institute of Technology	Associate Professor, Aerospace Engineering

Segal	David R.	Full Member	B.A., Harpur College, 1962; M.A., University of Chicago, 1964; Ph.D., 1967; D.H.L.,Towson University, 1991.	Professor Emeritus, Sociology
Sehgal	Neil Jay	Full Member	B.A., University of California-Los Angeles, 2002; M.P.H., University of California-Med Los Angeles, 2005; Ph.D., University of California-Berkeley, 2015	Assistant Professor, Health Administration Assistant Professor, Health Equity Assistant Professor, Health Policy Analysis and Evaluation Assistant Professor, Health Services
Selden	Steven	Full Member	B.S., State University of New York-College at Oswego, 1963; M.S.,City University of New York-Brooklyn College, 1967; M.A., Columbia University, 1970; Ed.D., 1971.	Professor Emeritus, Policy Studies Professor Emeritus, Teaching and Learning, Policy and Leadership Affiliate Professor, Teaching and Learning, Policy and Leadership
Sellner	Kevin G.	Special Member	B.A., Clark University, 1971; M.S., University of South Carolina-Columbia, 1973; Ph.D., Dalhousie University-Halifax, 1978	University Affiliate, Environmental Science and Technology
Sellner	Kevin	Special Member	B.A., Clark University, 1971; M.S., University of South Carolina, 1973; Ph.D., Dalhousie University, 1978	Research Associate, Marine, Estuarine, and Environmental Sciences
Semerjian	Hratch G.	Non-Member	M.Sc., Brown University, 1968; Ph.D., Brown University, 1972.	Visiting Professor, Mechanical Engineering
Sengers	Jan V.	Full Member	B.S., University of Amsterdam, 1952; M.S., 1955; Ph.D., 1962; Ph.D., Delft University of Technology, 1992.	Distinguished University Professor Emeritus, Mechanical Engineering Research Professor, Chemical Physics
Seo	Eun-Suk	Full Member	B.S., Korea University-Seoul, 1984; M.S., 1986; Ph.D., Louisiana State University-Baton Rouge, 1991.	Professor, Physics Professor, Chemical Physics
Shabman	Reed	Adjunct Member	Sc.B., Brown University., 1992; Ph.D., University of California-Berkeley, 1997	n/a, Biological Sciences
Shackel	Paul A.	Full Member	Ph.D. 1987 M.A. 1984 and B.A. 1981 State University of New York - Buffalo	Professor, Anthropology Affiliate Associate Professor, American Studies
Shackman	Alexander	Full Member	B.A., University of Wisconsin-Madison, 1997; Ph.D., University of Wisconsin-Madison, 2008	Associate Professor, Psychology Assistant Professor, Neurosciences and Cognitive Science
Shaffer	Laura Jean	Full Member	Ph.D. 2009 University of Georgia - Athens; M.S. 1999 University of Oregon - Eugene; B.S. 1994 Cornell University - Ithaca	Assistant Professor, Anthropology

Shah	Yasmeen	Full Member	B.S., All India Institute of Speech and Hearing, 1995; M.S., All India Institute of Speech and Hearing, 1997; Ph.D., Northwestern University, 2004.	Associate Professor, Hearing and Speech Sciences Associate Professor, Neurosciences and Cognitive Science
Shah	Sahil	Full Member	B.E.E., Manipal University, 2011; M.E.E., Arizona State University, 2014; Ph.D., Georgia Institute of Technology, 2018	Affiliate Professor, Electrical and Computer Engineering
Shahoveisi	Fereshteh	Full Member		Assistant Professor, Plant Science
Sham	Foon V.	Full Member	B.F.A., California College of Arts and Crafts, 1978; M.F.A., Virginia Commonwealth University, 1981.	Associate Professor, Art Studio
Shamma	Shihab	Full Member	B.S., Imperial College, 1976; M.S.,Stanford University, 1977; M.A., 1980; Ph.D., 1980.	Professor, Electrical and Computer Engineering Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Neurosciences and Cognitive Science Professor, Systems Engineering
Shankar	A.Udaya	Full Member	B.Tech, Indian Institute of Technology-Kanpur, 1976; M.S., Syracuse University, 1978;Ph.D., University of Texas-Austin, 1982.	Professor, Computer Science
Shannon	Joshua	Full Member	B.A., Columbia University, 1994; M.A., University of California, Berkeley, 1998; Ph.D., University of California, Berkeley, 2003.	Professor, Art History and Archaeology
Shapiro	Benjamin	Full Member	B.S., Georgia Institute of Technology, 1995; Ph.D., California Institute of Technology, 1999.	Professor, Applied Mathematics & Statistics, and Scientific Computation Associate Professor, Systems Engineering
Shapiro	Leo	Non-Member	BA, Sarah Lawrence College, Reed College, 1986; PhD, State University of New York - Stony Brook, 1996	Senior Lecturer, Entomology
Sharan	Mamidipudi Ramakrishna	Full Member	Ph.D., Harvard University, 2020; M.A., Delhi School of Economics, 2011; B.A., Delhi University, 2009	Assistant Professor, Agricultural and Resource Economics
Sharma	Manan	Special Member	B.S., University of Florida, 1996; M.S., University of Georgia, 2000; Ph.D., University of Georgia, 2004	University Affiliate, Environmental Science and Technology
Sharp	Katherine E.	Associate	B.S., University of Maryland, 1990; MPH, Emory University, 1996; Ph.D., Kent State University, 2005.	Graduate Director, Behavioral and Community Health Associate Clinical Professor, Behavioral and Community Health

Shawhan	Peter S.	Full Member	A.B., Washington University in St. Louis, 1990; M.S., University of Chicago, 1992; Ph.D., University of Chicago, 1999;	Associate Chair, Physics Associate Professor, Physics
Shayman	Mark A.	Full Member	B.A., Yale University, 1975; M.S., Harvard University, 1977; Ph.D., 1981.	Professor, Electrical and Computer Engineering Professor, Applied Mathematics & Statistics, and Scientific Computation
Shea	John	Full Member	B.A., Northwestern University, 1986; Ph.D.,Massachusetts Institute of Technology, 1990.	Associate Chair, Economics Associate Professor, Economics Graduate Director, Economics
Shelton	Cecilia	Full Member	B.A., Winston-Salem State University, 2005; M.A. North Carolina State University, 2007; Ph.D., East Carolina Univesity, 2019	Assistant Professor, English Language and Literature
Shenassa	Edmond D.	Full Member	B.A., University of California-Los Angeles, 1986; M.A., 1990; Sc.D., Harvard University, 2000.	Associate Professor, Family Science Associate Professor, Maternal and Child Health
Sherman	Lawrence W.	Full Member	B.A., Denison University, 1970; M.A., University of Chicago, 1970; Diploma in Criminology, Cambridge University, 1973; M.A., Yale University, 1974; Ph.D., 1976.	Distinguished University Professor Emeritus, Criminology and Criminal Justice
Shi	Meiqing	Full Member	D.V.M., Hunan Agricultural University, China, 1985; M.S., South China Agricultural University, 1988; Ph.D., Justus Liebig University of Giessen, Germany, 2000.	Associate Professor, Veterinary Medical Sciences
Shields	Christina	Non-Member	B.A., 2009, University of Maryland: AuD., 2013, University of Maryland at College Park	Assistant Clinical Professor, Clinical Audiology
Shilton	Katie	Full Member	B.A., Oberlin College, 2003; MLS, UCLA, 2007; PhD., UCLA, 2011	Director, Information Studies Associate Professor, History and Library & Information Science Associate Professor, Human-Computer Interaction Associate Professor, Information Management Associate Professor, Information Studies Associate Professor, Library and Information Science Associate Professor, Curation and Management of Digital Assets (online)

Shim	Jae Kun	Full Member	B.A., Kyunghee University-Seoul, 1999; M.S., Ball State University, 2002; Ph.D., Pennsylvania State University, 2005	Professor, Bioengineering Associate Professor, Kinesiology Associate Professor, Neurosciences and Cognitive Science
Shin	Eric	Adjunct Member	B.M., Cleveland Institute of Music	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Shin	Richard Quentin	Full Member	B.A., Western Washington University, 1995; M.A., West Chester University of Pennsylvania, 1998; Ph.D., Loyola University of Chicago, 2005	Associate Professor, School Counseling Associate Professor Associate Professor, Counseling Psychology Affiliate Associate Professor, Women's Studies
Shirmohammadi	Adel	Full Member	B.S., University of Rezaeiyeh-Iran, 1974; M.S., University of Nebraska-Lincoln, 1977 Ph.D., North Carolina State University, 1982.	Professor, Environmental Science and Technology
Shneiderman	Ben A.	Full Member	B.S.,City University of New York-City College, 1968; M.S.,State University of New York-Stony Brook, 1972; Ph.D., 1973; S.C.D., University of Guelph-Ontario, 1995.	Professor, Computer Science Affiliate Professor, American Studies
Shofner	Marcia	Non-Member	BS, Ouachita Baptist University, 1982; MS, Ouachita Baptist University, 1983; PhD, University of Maryland, 2000	Senior Lecturer, Entomology
Shooshtari	Amir H.	Non-Member	B.S., 1992, Tehran Polytecnic; M.S., 1995, Sharif University of Technology; M.S., 2003, University of Maryland; Ph.D., 2004, University of Maryland	Associate Research Scientist, Mechanical Engineering
Short	Kevin	Adjunct Member		Visiting Associate Professor, Ethnomusicology Visiting Associate Professor, Music Visiting Associate Professor, Music Education
Shrewsbury	Paula	Full Member	BS, University of Rhode Island, 1985; MS, University of California - Riverside, 1991; PhD, University of Maryland, 1996	Professor, Entomology
Shrivastava	Abhinav	Full Member	B.Tech, Jaypee Institute of Information Technology, 2010; M.S., Carnegie-Mellon University, 2011; Ph.D., Carnegie-Mellon University, 2017	Assistant Professor, Computer Science
Shroff	Hari	Associate	B.S.E., University of Washington; Ph.D., University of California, Berkeley	Adjunct Assistant Professor, Applied Mathematics & Statistics, and Scientific Computation

Shultz	Jeffrey	Full Member	B.S., Michigan State University, 1982; M.S., Ohio University, Athens, 1985; Ph.D., Ohio State University, Columbus, 1990.	Associate Professor, Entomology Associate Professor, Biological Sciences Graduate Director, Entomology
Sicilia	David B.	Full Member	B.A., Hofstra University, 1976; Ph.D., Brandeis University, 1991.	Associate Professor, History Affiliate Associate Professor, American Studies
Sies	Mary C.	Full Member	A.B., Michigan State University, 1974; A.M.,University of Michigan-Ann Arbor, 1977; Ph.D., 1987.	Associate Professor, American Studies Affiliate Associate Professor, Women's Studies
Silio	Charles B., Jr.	Full Member	B.S.E.E., University of Notre Dame, 1965; M.S., 1967; Ph.D., 1970.	Associate Professor Emeritus, Electrical and Computer Engineering
Silva	Julie	Full Member	B.A., UCLA, 1995; M.C.R.P., Rutgers, 2000; PhD, Rutgers, 2005.	Associate Professor, Geographical Sciences
Silverman	Rebecca	Full Member	B.A., George Washington University, 1998; Ed.M. Harvard University, 2001; Ed.D. Harvard University, 2005.	Affiliate Assistant Professor, Curriculum and Instruction
Simmons	Jeremy A.	Full Member	B.A., University of California-Berkley, 2013; M.A., Columbia University, 2015; Ph.D., Columbia University, 2020	Assistant Professor, History
Simon	Jonathan	Full Member	BA: Princeton University, 1985; MS: University of California, Santa Barbara, 1987; Ph.D.: University of California, Santa Barbara, 1990	Professor, Electrical and Computer Engineering Professor, Neurosciences and Cognitive Science Professor, Biological Sciences
Simon	Anne E.	Full Member	B.A.,University of California-San Diego, 1978; Ph.D., Indiana University-Bloomington, 1982.	Professor, Biological Sciences
Simon	Madlen G.	Full Member	A.B. Princeton University, 1974; M.Arch. Princeton University, 1977.	Professor, Architecture
Simon	David	Full Member	BA Brown University 2004, PhD University of California - Berkeley 2012	Associate Professor, English Language and Literature
Simon	Madlen	Full Member	A.B. Princeton University, 1974; M.Arch. Princeton University, 1977.	Professor, Urban and Regional Planning and Design
Simon-Rusinowitz	Lori	Full Member	B.S., University of Michigan-Ann Arbor, 1975; M.P.H., University of Michigan-Ann Arbor, 1978; M.A., Whitworth University, 1985; Ph.D., University of Illinois-Chicago, 1987	Associate Professor, Health Administration Associate Professor, Health Equity Associate Professor, Health Policy Analysis and Evaluation Associate Professor, Health Services

Simpson	Sally S.	Full Member	B.S., Oregon State University, 1976; M.A., Washington State University, 1978; Ph.D., University of Massachusetts-Amherst, 1985.	Distinguished University Professor, Criminology and Criminal Justice Professor, Risk, Compliance, and the Law Affiliate Associate Professor, American Studies
Singer	Joshua	Full Member	B.S., Brown University, 1993; Ph.D., University of Washington, 1998	Professor, Biological Sciences Assistant Professor, Neurosciences and Cognitive Science
Singpurwalla	Rachel	Full Member	B.A., George Washington University, 1993; Ph.D., University of Colorado at Boulder, 2002.	Associate Professor, Philosophy
Sinibaldi	Jennifer	Adjunct Member		Assistant Research Professor, Survey and Data Science (online)
Sisskin	Vivian	Non-Member	B.A., University of California-Los Angeles, 1974;M.A., Chapman University, 1979	Clinical Professor, Speech Language Pathology
Sita	Lawrence R.	Full Member	B.S., Carnegie-Mellon University, 1981; Ph.D., Massachusetts Institute of Technology, 1985.	Professor, Chemical Physics Professor, Chemistry Affiliate Professor, Materials Science and Engineering
Skakun	Sergii	Full Member	M.S., Kyiv Polytechnic Institute, 2004; Ph.D., National Academy of Science of Ukraine, 2005	Assistant Professor, Geographical Sciences
Skendall	Kristan Cilente	Graduate Teaching	B.A., College of William & Mary, 2001; M.A., University of Arizona, 2003; Ph.D., University of Maryland-College Park, 2012	n/a, Student Affairs
Skibniewski	Miroslaw J.	Full Member	M.Eng., Politechnika Warszawski, 1981; M.S. Carnegie-Mellon University, 1983; Ph.D. Carnegie-Mellon University, 1986.	Professor, Civil and Environmental Engineering
Skinker	Kathleen	Non-Member	B.S., University of Minnesota-Twin Cities, 1979M.A., University of Kansas, 1983;M.A., University of Wisconsin-Milwaukee, 1991	Lecturer, Speech Language Pathology
Skuja	Andris	Full Member	B.Sc., University of Toronto, 1966; Ph.D., University of California-Berkeley, 1972.	Professor, Physics
Slack	Craig	Non-Member		Lecturer
Slater	Wayne H.	Full Member	B.S., University of Minnesota-Duluth, 1967; M.A., 1972; Ph.D., University of Minnesota-Minneapolis, 1982.	Associate Professor, Teaching and Learning, Policy and Leadership Associate Professor, Curriculum and Instruction
Slavin	Margaret	Full Member	PhD, University of Maryland, College Park (2011); BS, University of Pittsburgh (2006)	Associate Professor, Nutrition and Food Science

Slawson	Kristin	Non-Member	B.A., Pennsylvania State University - All Campuses, 2001;M.A., University of Maryland-College Park, 2003	Assistant Clinical Professor, Speech Language Pathology
Slevc	Robert	Full Member	B.A., University of Colorado-Boulder, 1999; Ph.D., University of California-San Diego, 2008.	Associate Chair, Psychology Associate Professor, Psychology Assistant Professor, Neurosciences and Cognitive Science
Sloan	Rita	Full Member	B.S., Juilliard School of Music, 1969; M.Mus., 1971.	Professor, Ethnomusicology Professor, Music Professor, Music Education
Slopen	Natalie	Special Member	ScD, Harvard T. H. Chan School of Public Health, 2010; MA, University of Chicago, 2003; BSc, University of Toronto, 2002.	Assistant Research Professor, Anthropology
Slowik	Kenneth	Adjunct Member	B.M. Chicago Musical College, M.M. Roosevelt University, D.M.A. Peabody Conservatory	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Slud	Eric Victor	Full Member	B.A., Harvard University, 1972; Ph.D., Massachusetts Institute of Technology, 1976.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematical Statistics Professor, Mathematics
Smela	Elisabeth	Full Member	B.S., Massachusetts Institute of Technology, 1985; M.S. University of Pennsylvania, 1987; Ph.D., University of Pennsylvania, 1992	Professor, Mechanical Engineering Affiliate Professor, Electrical and Computer Engineering Affiliate Professor, Materials Science and Engineering
Smith	Paul J.	Full Member	B.S., Drexel, 1965; M.S., Case Western Reserve, 1967; Ph.D., Case Western Reserve U. 1969.	Associate Chair, Mathematics Director, Mathematical Statistics Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Associate Professor, Mathematical Statistics Associate Professor, Mathematics
Smith	Deborah K.	Associate	B.S., University of Wisconsin-Madison, 1972; B.A., San Francisco State University, 1981; PhD., University of California-San Diego, 1995	University Affiliate, Geology
Smith	Carson J.	Full Member	B.S., Arizona State University, 1993; Ph.D., University of Georgia, 2000	Associate Professor, Neurosciences and Cognitive Science
Smith	Jerome Carson	Full Member	B.S., Arizona State University, 1993; Ph.D., University of Georgia, 2000	Associate Professor, Kinesiology
Smith	Martha Nell	Full Member	B.A., Rutgers University, 1977; M.A., 1982; Ph.D., 1985	Affiliate Professor, Women's Studies

Smith	Cory	Full Member	B.S., MIT, 2011; Ph.D., MIT, 2020	Assistant Professor, Agricultural and Resource Economics
Soares	Daphne	Adjunct Member	Sc.B., Brown University., 1992; Ph.D., University of California-Berkeley, 1997	n/a, Biological Sciences
Sochol	Ryan	Full Member	B.S., Northwestern University, 2006; M.S. University of California - Berkeley, 2009; Ph.D., University of California - Berkeley, 2011	Assistant Professor, Mechanical Engineering Affiliate Assistant Professor, Bioengineering
Soergel	Dagobert	Full Member	B.S., University of Freiburg, 1960; M.S., 1964; Ph.D., 1967.	Professor Emeritus, Library and Information Science
Soergel	Philip	Full Member	Ph.D., University of Michigan, 1988.	Chair, History Professor, History
Sohns	Sara E.	Non-Member	B.A., University of Connecticut, 2007; Au.D., University of Pittsburgh, 2011	Assistant Clinical Professor, Clinical Audiology
Solomon	George	Adjunct Member	B.S., University of Florida	Professor of Practice, Journalism
Solomon	Glenn	Full Member	B.O., Duke University, 1980; M.O., 1983; M.O., Stanford University, 1995; Ph.D., 1997.	Adjunct Professor, Physics
Solomon	Maria Beliaeva	Full Member	M.A., Rutgers University (2013); Ph.D., New York University (2019)	Assistant Professor, French Modern Studies Assistant Professor, French Studies
Soltan	Karol E.	Full Member	A.B., Harvard University, 1972;M.A., University of Chicago, 1978; M.A., 1981; Ph.D., 1982.	Associate Professor, Government and Politics
Sommerfeldt	Erich	Full Member	B.F.A, Western Michigan University, 2003; M.A., Western Michigan University, 2007; Ph.D., University of Oklahoma, 2011	Associate Professor, Communication
Song	Wenxia	Full Member	M.S.,Academia Sinica-Institute of Biophysics, Beijing-China, 1986; Ph.D., Kansas State University, 1991.	Professor, Biological Sciences
Song	Jiuzhou	Full Member	B.A., Northwestern Agri.U, 1983; MSc.,Northwestern Agri.U, 1986; Ph.D., China Agri. University, 1996.	Professor, Animal Sciences Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Assistant Professor, Biological Sciences
Song	Hee-Jung	Full Member	B.S., Sookmyung Women's University, 1992; M.S., Korea University, 1994; Ph.D., Johns Hopkins University, 2008.	Associate Professor, Nutrition and Food Science
Sosnowski	Saul	Full Member	B.A., University of Scranton, 1967; M.A.,University of Virginia, 1968; Ph.D., 1970.	Professor, Spanish Language and Literature Affiliate Professor, Jewish Studies

Spangler	Robert	Adjunct Member		Lecturer, Information Management Lecturer, Information Studies
Speer	Colenso	Full Member	Ph.D., University of California, Davis, 2010	Assistant Professor, Biological Sciences Assistant Professor, Biophysics
Spielman	Ian	Full Member	B.S., University of Oklahoma, 1998; Ph.D., California Institute of Technology, 2004.	Adjunct Professor, Physics
Sprangle	Phillip	Full Member	B.E.E., Polytechnic Institute of Brooklyn, 1967; M.A., University of Puerto Rico; 1969; Ph.D., Cornell University, 1974.	Professor, Electrical and Computer Engineering Professor, Physics
Spring	Neil	Full Member	Ph.D., University of Washington, 2004	Professor, Computer Science
Sprinkle	John H.	Associate	M.A., Ph.D., College of William and Mary	Lecturer, Historic Preservation
Srebric	Jelena	Full Member	B.S., 1994, University of Belgrade; M.S., 1997, University of Belgrade; Ph.D., 2000, Massachusetts Institute of Technology	Professor, Mechanical Engineering
Srikantaiah	Taverekere	Adjunct Member	B.S., Mysore University, India; M.S, Karnatak University, India; M.I.S., M.P.A., University of Southern California; Ph.D., University of Southern California.	Visiting Professor, Information Management Visiting Professor, Information Studies Visiting Professor, Library and Information Science
Srinivasan	Aravind	Full Member	Ph.D, Cornell University, 1993	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Computer Science
Sriram	Ganesh	Full Member	B.Tech., Indian Institute of Technology, 1997; M. Tech., Indian Institute of Technology, 1999; Ph.D., Iowa State University, 2004.	Associate Professor, Chemical Engineering
Srivastava	Ankur	Full Member	B.Elect. E., IIT-Delhi, 1998; MS, Northwestern Univ. 2000; Ph.D., UCLA, 2002.	Professor, Electrical and Computer Engineering Associate Professor, Systems Engineering
St. Jean	Beth	Full Member	B.A., Smith College, 1988; M.S. University of Michigan, 2006; Ph.D., University of Michigan, 2012.	Assistant Professor, History and Library & Information Science Assistant Professor, Human-Computer Interaction Assistant Professor, Information Management Assistant Professor, Information Studies Assistant Professor, Library and Information Science
St. Leger	Raymond	Full Member	BS, Exeter University, UK, 1978; MS, University of London, UK, 1980; PhD, University of Bath, UK, 1985	Distinguished University Professor, Entomology

Stachura	Fred	Graduate Teaching	B.A., Boston College; M.A., Boston University; J.D., St. Louis University	Lecturer, Historic Preservation
Stahl	Chad	Full Member	M.S., Cornell University, 1998; Ph.D., Cornell University, 2001	Chair, Animal Sciences Professor, Animal Sciences
Stains	Joseph	Adjunct Member	Sc.B., Brown University., 1992; Ph.D., University of California-Berkeley, 1997	n/a, Biological Sciences
Stairs	Allen	Full Member	B.A., University of New Brunswick-Fredericton, 1973; M.A., University of Western Ontario-London, 1975; Ph.D., 1978.	Associate Chair, Philosophy Professor, Philosophy
Stapleton	Laura	Full Member	B.A., University of Michigan, 1988; M.Ed., George Mason University, 1992; Ph.D., University of Maryland - College Park, 2001.	Professor, Measurement, Statistics and Evaluation
Steele	Catherine	Full Member	B.A., University of Illinois-Urbana-Champaign, 2007; M.A., Depaul University, 2008; Ph.D., University of Illinois-Chicago	Assistant Professor, Communication
Stein	Daniel C.	Full Member	B.S.,University of Notre Dame, 1977; M.S., University of Rochester, 1981; Ph.D.,1981.	Professor, Biological Sciences
Steinberg	Julia	Full Member	B.A., University of Toledo, 2001; M.A., Arizona State University, 2004; Ph.D., Arizona State University, 2008.	Assistant Professor, Family Science Assistant Professor, Maternal and Child Health
Steiner	Linda	Full Member	B.A., University of Pennsylvania, 1972; Ph.D., University of Illinois, Urbana-Champaign, 1979.	Professor, Journalism Affiliate Professor, Women's Studies
Steiner	Peter	Full Member	M.Sc. Economics, University of Vienna; M.Sc. Statistics, University of Vienna; Ph.D. Statistics, University of Vienna	Associate Professor, Measurement, Statistics and Evaluation
Steinhilber	Patricia M.	Adjunct Member	B.A., State University of New York-Albany, 1969; M.S., New Mexico State University-Las Cruces, 1977; Ph.D., University of Georgia, 1981.	Extension Associate, Environmental Science and Technology
Stepp	Carl Sessions	Full Member	B.A., University of South Carolina-Columbia, 1970; M.A., 1972.	Professor, Journalism
Stern	James	Full Member	B.M., M.M., D.M.A., The Julliard School	Professor, Ethnomusicology Professor, Music Professor, Music Education
Sternberg	Yaron M.	Full Member	B.S.,University of Illinois-Urbana/Champaign, 1961; M.S., University of California-Davis, 1963; Ph.D., 1965.	Professor Emeritus, Civil and Environmental Engineering

Stevens	Lacramioara Luminita	Full Member	B.A., Dartmouth College, 2003; Ph.D., Columbia University, 2012.	Assistant Professor, Economics
Stewart	Gilbert W.	Full Member	A.B., University of Tennessee-Knoxville, 1962; Ph.D., 1968.	Distinguished University Professor Emeritus, Computer Science
Stewart	Kathleen	Full Member	M.S., University of British Columbia, 1984; Ph.D., University of Maine, 1999	Professor, Geographical Sciences
Stewart	Marissa	Associate	Ph.D. 2017, M.A. 2011 The Ohio State University; B.A. 2009 Davidson College	Assistant Research Professor, Anthropology
Stewart	Robert	Full Member	B.A., University of Minnesota, 2012; M.A., University of Minnesota, 2017; Ph.D., Sociology, University of Minnesota, 2020.	Assistant Professor, Criminology and Criminal Justice
Stoebenau	Kirsten	Associate	B.S., Emory University, 1995; Ph.D., Johns Hopkins University, 2006	n/a, Behavioral and Community Health
Stoecker	Diane B.	Full Member	B.S., University of New Hampshire-Durham, 1969; M.S., University of Hawaii,1970; Ph.D., SUNY-Stony Brook, 1979.	Professor, Marine, Estuarine, and Environmental Sciences
Stoliarov	Stanislav I.	Full Member	B.S./M.S., 1993, Mendeleev University of Chemical Technology; Ph.D., 2000, Catholic University of America	Affiliate Assistant Professor, Mechanical Engineering
Stoliarov	Stanislav I.	Full Member	B.S./M.S, Mendeleev Institute of Chemical Technology-Russia, 1993; Ph.D., Catholic University of America, 2000	Professor, Fire Protection Engineering
Stoltz	Angela	Associate	Ph.D., University of Maryland, 2019	Assistant Clinical Professor, Teaching and Learning, Policy and Leadership
Stoltzfus	Arlin	Adjunct Member	B.A., Grinnell College, 1985; Ph.D., University of Iowa, 1991.	Adjunct Professor, Biological Sciences
Stormont	Heather Anne	Graduate Teaching	B.S., University of Maryland-College Park, 2004; M.Ed., University of Maryland-College Park, 2007	Lecturer, Special Education
Storz	Gisela	Special Member	B.A. University of Colorado, Boulder; PhD University of California, Berkeley	n/a, Biological Sciences
Straney	David C.	Full Member	B.S., Brown University, 1982; M.S., Yale University, 1984;Ph.D., 1987.	Associate Professor, Biological Sciences
Straub	John	Graduate Teaching	Ph.D., University of Wisconsin-Madison, 2002	Director, Applied Economics Senior Lecturer, Applied Economics

Strauch	Gabriele L.	Full Member	B.A., Padagogische Hochschule des Saarlandes, 1969; M.A.,Southern Illinois University-Carbondale, 1975; Ph.D.,University of Wisconsin-Madison, 1984.	Associate Professor Emerita, German Literature and Language
Strein	William O.	Full Member	B.S.,Pennsylvania State University-University Park, 1970; M.S., 1973; D.Ed., 1979.	Professor Emeritus, School Psychology Professor Emeritus
Stroka	Kimberly	Full Member		Associate Professor, Bioengineering Assistant Professor, Biophysics
Strom	Justin	Full Member	B.F.A, Columbia College, 1998; M.F.A., The University of Wisconsin-Madison, 2003. Assistant Professor	Assistant Professor, Art Studio
Stromquist	Nelly	Full Member	B.A., Monterey Institute of Foreign Studies, 1966; M.A., Monterey Institute of Foreign Studies, 1968; Ph.D., Stanford University, 1975.	Professor Professor Emerita, International Education Policy
Struna	Nancy L.	Full Member	B.S., University of Wisconsin-Madison, 1972; M.A., University of Maryland-College Park, 1975; Ph.D., 1979.	Professor Emerita, American Studies
Stylinski	Cathlyn D.	Full Member	B.S., San Diego State University, 1987; M.S., San Diego State University, 1994; Ph.D., University of California, Davis, 2000.	Senior Agent, Marine, Estuarine, and Environmental Sciences
Suadin	I Ketut	Adjunct Member	B.A., Konservatory Karawitan, 1985	University Affiliate, Ethnomusicology University Affiliate, Music University Affiliate, Music Education
Subrahmanian	Venkatramana	Full Member	M.Sc.,Birla Institute of Technology & Science, 1985; M.S., Syracuse University, 1987 Ph.D., 1989.	Professor, Computer Science
Subramaniam	Mega M.	Full Member	Ph.D. Florida State	Associate Professor, History and Library & Information Science Associate Professor, Human-Computer Interaction Associate Professor, Information Management Associate Professor, Information Studies Associate Professor, Library and Information Science Associate Professor, School Librarianship Associate Professor, Youth Experience
Sukharev	Sergei I.	Full Member	M.S., Russia, 1980; Ph.D., M.V. Lomonosov Moscow State University, 1987.	Director, Biophysics Professor, Biological Sciences

Sullivan	Denis F.	Full Member	A.B., Tufts University, 1966; M.S., Catholic University of America, 1972; Ph.D., University of North Carolina-Chapel Hill, 1975.	Professor, Curriculum and Instruction
Sullivan	Joseph H.	Full Member	B.A., Erskine College, 1978; M.S., Western Carolina University, 1980; Ph.D., Clemson University, 1985.	Associate Dean, Plant Science Professor, Plant Science
Sullivan	John B. (Jack)	Full Member	B.F.A., Ohio State University-Columbus, 1975; M.L.A., University of Virginia, 1980.	Associate Professor, Landscape Architecture Affiliate Associate Professor, American Studies
Sullivan	Gregory W.	Full Member	B.S., Southern Illinois University-Carbondale, 1983; M.S., 1985; M.S., University of Illinois-Urbana/Champaign, 1986; Ph.D.,1990.	Professor, Physics
Sumida	Jon T.	Full Member	B.A., University of California-Santa Cruz, 1971; M.A., University of Chicago, 1974; Ph.D., 1982.	Professor Emeritus, History
Summers	Timothy	Full Member	PhD., Case Western Reserve University.	Lecturer, Information Studies
Sun	Laixiang	Full Member	B.S., Peking University, 1982; M.S., Peking University, 1985; Ph.D., Institute of Social Studies, Netherlands, 1997.	Professor, Geographical Sciences
Sun	Tingni	Full Member	B.S., Peking Univ., 2007Ph.D., Rutgers, 2012	Assistant Professor, Mathematics
Sun	Lu	Special Member	B.S., Southeast University, 1993; Ph.D., Southeast University, 1996; Ph.D., University of Texas at Austin, 2001	n/a, Civil and Environmental Engineering
Sunderland	Peter B.	Full Member	B.S.,Cornell University. 1983; M.S., University of Massachusetts, Amherst, 1986; M.S., University of Michigan, Ann Arbor, 1994; Ph.D., University of Michigan, Ann Arbor, 1995.	Professor, Fire Protection Engineering Affiliate Professor, Mechanical Engineering
Sundlof	Stephen F	Non-Member	D.V.M., University of Illinois, Ph.D. University of Illinois. Dr. Sundlof serves on the faculty of the Center for Public and Corporate Veterinary Medicine on VMRCVM's University of Maryland-College Park campus	Visiting Professor, Veterinary Medicine
Sundrum	Raman	Full Member	B.Sc., University of Sydney, 1984; Ph.D., Yale University, 1990.	Distinguished University Professor, Physics

Sunny	Nishanth	Full Member	B.V.Sc. & A.H. College of Veterinary and Animal Sciences, Kerala, India 2001. M.S. University of Maryland 2005. Ph.D. University of Maryland 2008.	Assistant Professor, Animal Sciences
Sunshine	Jessica M.	Full Member	B.S., Brown University, 1988; M.S., Brown University, 1989; Ph.D., Brown University, 1993.	Professor, Astronomy
Sussman	Alan	Full Member	Ph.D., Carnegie Mellon University, 1991	Professor, Computer Science
Sutherland	Donald M. G.	Full Member	B.A., Carleton University-Ottawa, 1965; M.A., University of Sussex, 1967; Ph.D., University of London, 1974.	Professor Emeritus, History
Suzuki	Yui	Special Member	B.A. Sophia University, Japan, 1989, M.A. Sophia University, Japan, 1994, Ph.D. University of California, L.A., Art History 2005	n/a, Art History and Archaeology
Swain	Bethany	Non-Member	B.A., Ithaca College	Lecturer, Journalism
Swan	Christopher	Special Member	BS, West Chester University, 1994; MS, University of Maryland, 1997; PhD, University of Maryland, 2003	Affiliate Professor, Entomology
Sweet	Tracy Morrison	Full Member	B.S. Biology, Bucknell University, May 2000; M.A. Mathematics, Morgan State University, December 2007; M.S. Statistics, Carnegie Mellon University, May 2008; Ph.D. Statistics, Carnegie Mellon University, July 2012.	Associate Professor, Measurement, Statistics and Evaluation
Sweeting	Andrew	Full Member	Position: Associate Professor CV: B.A., University of Oxford, 1995; M.Phil., University of Oxford, 1997; Ph.D., MIT, 2004.	Chair, Economics Professor, Economics
Swistak	Piotr T.	Full Member	M.S., University of Warsaw, 1978 M.A., 1979; M.A., University of Chicago, 1985; Ph.D., 1987.	Associate Professor, Government and Politics Associate Professor, Applied Mathematics & Statistics, and Scientific Computation
Sze	Heven	Full Member	B.S.,National Taiwan University, 1968; M.S., University of California-Davis, 1970;Ph.D., Purdue University, 1975.	Professor Emerita, Biological Sciences Affiliate Professor, Plant Science
Tablante	Nathaniel L.	Full Member	D.V.M., University of the Philippines, 1976; M.P.V.M., University of California Davis, 1985; M.S., University of Guelph, 1995.	Professor, Veterinary Medical Sciences

Taboada Barber	Ana	Full Member	B.A., Centro de Altos Estudios en Ciencias Exactas, 1991, Buenos Aires, Argentina; M.Ed., Temple University, 1998; Ph.D., University of Maryland-College Park, MD, 2003.	Associate Professor, Special Education
Taddeo	Julie Anne	Adjunct Member	PhD, University of Rochester, 1997	Research Professor, History
Tadmor	Eitan	Full Member	B.Sc., Tel-Aviv University, 1973; M.Sc., Tel-Aviv University, 1975; Ph.D., Tel-Aviv University, 1979.	Distinguished University Professor, Applied Mathematics & Statistics, and Scientific Computation Distinguished University Professor, Mathematics Professor, Mathematics
Tahamont	Sarah	Full Member	B.A., Vassar College, 2004; M.P.P., University of California-Berkeley, 2009; Ph.D., Public Policy, University of California-Berkeley, 2013.	Assistant Professor, Criminology and Criminal Justice
Takeuchi	Ichiro	Full Member	B.S.,California Institute of Technology, 1987; Ph.D., University of Maryland-College Park, 1996.	Professor, Materials Science and Engineering Affiliate Professor, Physics
Talin	Albert	Adjunct Member	B.S., University of California, San Diego, 1989; Ph.D., University of California, Los Angeles, 1995.	University Affiliate, Materials Science and Engineering
Tambe	Ashwini	Full Member	B.A., Bangalore University, 1991; M.S., Bangalore University, 1992; Ph.D., Ohio State University, 1995; Ph.D., American University, 2000.	Professor, Women's Studies
Tamburri	Mario	Full Member	B.A., University of California Santa Barbara, 1989; M.S., University of Alabama, 1991; Ph.D., University of South Carolina, 1996.	Research Associate Professor, Marine, Estuarine, and Environmental Sciences
Tamvakis	Harry	Full Member	B.A., University of Athens, 1990; S.M., University of Chicago, 1991; Ph.D., University of Chicago, 1997.	Professor, Mathematics
Taneyhill	Lisa	Full Member	B.A., Western Maryland College McDaniel College 1995; M.S., Princeton University, 1997; Ph.D., Princeton University, 2000.	Professor, Animal Sciences Assistant Professor, Neurosciences and Cognitive Science Assistant Professor, Biological Sciences
Tao	Yang	Full Member	B.S., Nanjing Institute of Technology, 1982; M.S., University of Nebraska-Lincoln, 1988; Ph.D., Pennsylvania State University-University Park, 1991.	Professor, Bioengineering

Tausczik	Yla	Full Member	PhD. Social and Personality Psychology, University of Texas at Austin.	Assistant Professor, History and Library & Information Science Assistant Professor, Human-Computer Interaction Assistant Professor, Information Management Assistant Professor, Information Studies Assistant Professor, Library and Information Science
Taylor	Deborah	Adjunct Member	MLS, University of Maryland.	Lecturer, School Librarianship
Taylor	Jacob	Full Member	B.A., Harvard University, 2000; Ph.D., 2006.	Adjunct Assistant Professor, Physics
Teglasi	Hedwig	Full Member	B.A.,Douglass College, 1969; M.A., Temple University, 1971; Ph.D.,Hofstra University, 1975.	Professor, School Psychology
Tejeda	Hugo	Special Member	B.S., University of Texas at El Paso, 2007; Ph.D., University of Maryland, Baltimore, 2013	Director, Biological Sciences
Telhami	Shibley	Full Member	B.A.,City University of New York-Queens College, 1974; M.A.,Graduate Theological Union, 1978; Ph.D., University of California-Berkeley,1986.	Professor, Government and Politics Affiliate Professor, Jewish Studies
Tello-Trillo	Cristina	Graduate Teaching	Ph.D., Yale University, 2015	Lecturer, Applied Economics
Telugu	Bhanu P.	Full Member	B.V.Sc. & A.H., S.V. Veterinary University, India; Ph.D., University of Missouri-Columbia	Affiliate Assistant Professor, Biological Sciences
Terrell-Shockley	Ebony	Associate	Ph.D. University of Maryland, 2012	Associate Clinical Professor, Teaching and Learning, Policy and Leadership
Thoma	Marie Elizabeth	Full	B.A.,University of Pennsylvania, 2000; M.H.S. Johns Hopkins, 2009;Ph.D., 2009	Assistant Professor, Family Science Assistant Professor, Maternal and Child Health
Thomann	Matthew	Full Member	Ph.D. 2014 American University; M.S. 2009 Pace University; B.A. 2007 DePaul University	Assistant Professor, Anthropology
Thomas	Amanda	Special Member	B.S., Georgia Institute of Technology, 2007; Ph.D., University of California-Berkeley, 2012	University Affiliate, Geology
Thomas	Stephen	Full Member	B.S., Ohio State University, 1980; M.S., Illinois State University, 1981; Ph.D., Southern Illinois University-Carbondale, 1985	Professor, Health Administration Professor, Health Equity Professor, Health Policy Analysis and Evaluation Professor, Health Services
Thompson	Katerina	Adjunct Member	B.S., Virginia Polytechnic Institute and State University; M.S., Virginia Polytechnic Institute and State University; Ph.D., University of Maryland, 1992	Assistant Dean, Biological Sciences

Thompson	Loren	Adjunct Member	Sc.B., Brown University., 1992; Ph.D., University of California-Berkeley, 1997	n/a, Biological Sciences
Thorne	Barbara	Non-Member	BS, Brown University, 1976; MS, Harvard University, 1978; PhD, Harvard University, 1983	Professor Emerita, Entomology
Tiesinga	Eite	Full Member	B.S./M.S., University of Groningen, 1988; Ph.D., Eindhoven University of Technology, 1993.	Adjunct Professor, Physics
Tikekar	Rohan	Full Member	Ph. D., 2010, Pennsylvania State University; MS, 2006, Rutgers-the State University of New Jersey; B. Tech., 2004, Institute of Chemical Technology	Associate Professor, Nutrition and Food Science
Tilghman	James	Full Member	B.A., University of Pennsylvania, 1982; M.Arch, Harvard University, 1986	Associate Clinical Professor, Architecture
Tilley	David R.	Full Member	B.S., North Carolina State University, 1992; M.E., University of Florida, 1996; Ph.D., University of Florida, 1999.	Associate Professor, Environmental Science and Technology
Tismaneanu	Vladimir	Full Member	B.A., University of Bucharest, 1974; Ph.D., 1980.	Distinguished Scholar-Teacher, Government and Politics Professor, Government and Politics
Tits	Andre L.	Full Member	B.S., University of Liege, 1974; M.S., University of California-Berkeley, 1979;Ph.D., 1980.	Professor, Electrical and Computer Engineering Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Systems Engineering Affiliate Professor, Computer Science
Titus	Marvin	Full Member	B.A. City University of New York, York College, 1979; M.A. University of Wisconsin at Milwaukee, 1982; Ph.D. University of Maryland, 2003	Associate Professor, Higher Education Associate Professor
Tiwari	Vijay	Full Member	B.S., Purvanchal University, 1998; M.S., 2003; Ph.D., Indian Institute of Technology, 2009.	Assistant Professor, Plant Science
Tiwary	Pratyush	Full Member		n/a, Applied Mathematics & Statistics, and Scientific Computation Assistant Professor, Biochemistry Assistant Professor, Biophysics Assistant Professor, Chemistry
Tjaden	Robert L.	Full Member	B.S. Univ. of Maine, 1978; M.F. Duke Univ. 1986; Ph.D., Univ.Maryland, 2002.	Principal Agent, Environmental Science and Technology

Tokekar	Pratap	Full Member	B.S., University of Pune, 2008; Ph.D., University of Minnesota, 2014	Affiliate Assistant Professor, Electrical and Computer Engineering
Torero	Jose	Full Member		Professor, Civil and Environmental Engineering
Torrents	Alba	Full Member	B.S.,University of Barcelona, 1985; M.A., Johns Hopkins University, 1988; Ph.D.,1992.	Professor, Civil and Environmental Engineering
Torres	Sergio	Special Member	B.S., National Pedagogic University, 1979; Ph.D., Virginia Tech, 1985	n/a, Civil and Environmental Engineering
Tosi	Simone	Special Member	MSc, University of Ferrara, Italy, 2011; PhD, University of Bologna, Italy, 2015	Research Scientist, Entomology
Toth	Elizabeth L.	Full Member	B.A., Northwestern University, 1966; M.A., Purdue University, 1969; Ph.D., 1975	Professor Emerita, Communication Affiliate Professor, Women's Studies
Toulan	Dina	Graduate Teaching	B.A., Gallaudet University, 2012; M.Ed., Gallaudet University	Lecturer, Special Education
Tretter	Steven A.	Full Member	B.S.,University of Maryland-College Park, 1962; M.A., Princeton University, 1964; Ph.D., 1966. GCEN Academic Advisor for Electrical and Computer Engineering	Professor Emeritus, Electrical and Computer Engineering
Trevitt	Jamie Lynne	Graduate Teaching	M.P.P., Georgetown University, 2006; Ph.D., Johns Hopkins University, 2010	Assistant Clinical Professor, Epidemiology
Trevitt	Jamie Lynn	Graduate Teaching	M.P.P., Georgetown University, 2006; Ph.D., Johns Hopkins University, 2010	Assistant Clinical Professor, Biostatistics
Tripp	Kerry	Non-Member	B.S., University of Pittsburgh, 1981; J.D., University of Notre Dame, 1985.	Senior Lecturer, Family Science
Trivisa	Konstantina	Full Member	B.A.,Univ of Patras, 1990; M.A., Brown Univ, 1992; Ph.D., Brown Univ, 1996	Director, Applied Mathematics & Statistics, and Scientific Computation Professor, Applied Mathematics & Statistics, and Scientific Computation
Trouve	Arnaud	Full Member	M.S., Ecole Centrale Paris-France, 1985; Ph.D., Ecole Centrale Paris-France, 1989.	Chair, Fire Protection Engineering Professor, Fire Protection Engineering Affiliate Professor, Mechanical Engineering Affiliate Professor, Aerospace Engineering Graduate Director, Fire Protection Engineering
Troy	Nancy	Special Member	B.A. Wesleyan University, 1974, M.A. Wesleyan University, 1976, Ph.D. Yale University, 1979	n/a, Art History and Archaeology
Trudell	Scott	Full Member	B.A., Tufts University, 2002; M.A., Rutgers University, 2009; Ph.D., 2012.	Associate Professor, English Language and Literature

Tsong	Mayron	Full Member	B.Mus. Piano University of Calgary, 1991; M.Mus. Piano University of Calgary, 1994; M.Mus. Music Theory Rice University, 2001; D.M.A. Piano Rice University, 2002	Associate Professor, Ethnomusicology Associate Professor, Music Associate Professor, Music Education
Tully	Katherine	Full Member	B.A. Kenyon College, 2004; M.S. Ecology, University of Virginia, 2007; Ph.D. Ecology, University of Virginia, 2001	Associate Professor, Plant Science
Tuo	Wenbin	Adjunct Member	Sc.B., Brown University., 1992; Ph.D., University of California-Berkeley, 1997	n/a, Biological Sciences
Turner	Jennifer	Full Member	B.A., University of Pennsylvania, Philadelphia, 1994; M.Ed., Temple University, 1995; Ph.D., Michigan State University, 2003	Associate Professor, Teaching and Learning, Policy and Leadership Associate Professor, Curriculum and Instruction
Turner	Robert Eugene	Special Member	B.S., Monmouth College, 1967; M.A., Drake University, 1969; Ph.D., University of Georgia, 1974	University Affiliate, Environmental Science and Technology
Turner	Paul C.	Full Member	B.S., University of Surrey, 1990; Ph.D., University of Edinburgh, 1995.	Associate Professor, Environmental Health Sciences
Turpin	Rodman	Associate	B.S., Howard University, 2008; M.S., Howard University, 2012; Ph.D., University of Maryland School of Public Health, 2018	Assistant Research Professor, Epidemiology Assistant Research Professor, Biostatistics
Tyrell	Fanita	Full Member	B.A., Northern Arizona University, 2006; M.A., Northern Arizona University, 2009; Ph.D., University of California- Riverside, 2017.	Assistant Professor, Psychology
Uccellini	Louis	Adjunct Member		Adjunct Professor, Atmospheric and Oceanic Science
Udahogora	Margaret	Associate		Lecturer, Nutrition and Food Science
Uler	Neslihan	Full Member	Ph.D. in Economics, New York University, 2007.M.A. in Economics, New York University, 2003.B.S. in Mathematics, Middle East Technical University, Summa Cum Laude, 2001	Assistant Professor, Agricultural and Resource Economics
Ulukus	Sennur	Full Member	B.S., Bilkent University, 1991; M.S., 1993; Ph.D., Rutgers University, 1998	Associate Chair, Electrical and Computer Engineering Professor, Electrical and Computer Engineering Associate Professor, Systems Engineering
Unger	Michael A.	Special Member	B.S., Michigan State University, 1981; M.S., College of William & Mary, 1982; Ph.D., College of William & Mary, 1988	University Affiliate, Environmental Science and Technology

Upadhyaya	Arpita	Full Member	B.E. & M.S., Birla Institute of Technology and Science, India, 1994; Ph.D., University of Notre Dame, 2000;	Associate Professor, Physics Assistant Professor, Biophysics Assistant Professor, Chemical Physics
Uriagereka	Juan	Full Member	M.A., University of Connecticut, 1986; Ph.D., University of Connecticut, 1988	Professor, Linguistics Professor, Neurosciences and Cognitive Science Professor, Spanish Language and Literature
Urzua	Sergio	Full Member	B.A., Universidad de Chile, 2001; Ph.D., University of Chicago, 2003.	Associate Professor, Economics
Uslaner	Eric M.	Full Member	B.A., Brandeis University, 1968; M.A., Indiana University-Bloomington, 1970; Ph.D., 1973.	Professor, Government and Politics
Vadala	Christopher J.	Full Member	B.Mus., University of Rochester, 1970; M.A., Connecticut College, 1973.	Professor, Ethnomusicology Professor, Music Professor, Music Education
Vadas	Peter	Special Member	B.S., Virginia Polytechnic Institute & State University, 1993; M.S., University of Delaware, 1996; Ph.D., University of Delaware, 2001	University Affiliate, Environmental Science and Technology
Valentino	Gianna	Full Member	B.S., Saint Joseph's University ,2014; M.S., Johns Hopkins University, 2016; Ph.D., Johns Hopkins University, 2019.	Assistant Professor, Materials Science and Engineering
Valiavitcharska	Vessela V.	Full Member	B.A., Sofia University, Bulgaria, 1995; M.A., Chicago University, 1997; Ph.D. University of Texas, 2007.	Associate Professor, English Language and Literature Associate Professor, Comparative Literature
Valli	Linda R.	Full Member	B.A., Mercy College of Detroit, 1970; M.A.,Johns Hopkins University, 1976; Ph.D., University of Wisconsin-Madison, 1983.	Professor, Curriculum and Instruction Professor Emerita, Teaching and Learning, Policy and Leadership
Valliant	Richard L.	Full Member	B.S., University of Arkansas, 1972; M.S., Cornell University, 1975; Ph.D., Johns Hopkins University, 1983.	Research Professor, Applied Mathematics & Statistics, and Scientific Computation Research Professor Emeritus, Survey and Data Science (online) Research Professor Emeritus, Survey Statistics
Van Horn	David	Full Member		Assistant Professor, Computer Science
Van Hyning	Victoria	Full Member	Ph.D., University of Sheffield	Assistant Professor, History and Library & Information Science
Vandergoot	Jana	Full Member	B ARCH, University of Notre Dame, 2001; M ARCH, University of Virginia, 2010; M Landscape Architecture, Harvard University, Graduate School of Design, 2013	Assistant Professor, Architecture Assistant Professor, Urban and Regional Planning and Design

Vanderheiden	Gregg	Full Member	PhD., University of Wisconsin-Madison	Professor, History and Library & Information Science Professor, Human-Computer Interaction Professor, Information Management Professor, Information Studies Professor, Library and Information Science
vanEngelsdorp	Dennis	Full Member	BS, University of Guelph, 1992; MS, University of Guelph, 1995; PhD, Pennsylvania State University, 2011	Associate Professor, Entomology
Vann	Robert L.	Full Member	B.S., University of Texas-Austin, 1968; Ph.D.Arch.Hist., Cornell University, 1976.	Professor Emeritus, Architecture
Vanneman	Reeve D.	Full Member	A.B., Cornell University, 1967; Ph.D., Harvard University, 1975.	Professor, Sociology
Varshney	Amitabh	Full Member	B.S., Indian Institute of Technology-Delhi, 1989; M.S.,University of North Carolina-Chapel Hill, 1991; Ph.D., 1994.	Professor, Computer Science
Vaughn-Cooke	Monifa	Full Member	B.S., The University of Southern California; M.S., The University of Southern California; Ph.D., The Pennsylvania State University	Assistant Professor, Mechanical Engineering Assistant Professor, Reliability Engineering
Vedernikov	Andrei	Full Member	B.S., State University of Kanzan, Russia, 1980; Ph.D., 1986; Doctorized, 1999.	Professor, Chemical Physics Professor, Chemistry
Veilleux	Sylvain	Full Member	B.S., University of Montreal, 1984; M.S.,University of California-Santa Cruz, 1986; Ph.D., 1989.	Professor, Astronomy
Verdaguer	Pierre M.	Full Member	M.A., Paris III, 1972; Agregation, University of Paris, 1974; Ph.D., University of Virginia, 1981.	Professor Emeritus, French Modern Studies Professor Emeritus, French Studies
Via	Sara	Full Member	BA, Duke University, 1974; MS, Australian National University, Canberra, 1976; PhD, Duke University, 1983	Distinguished Scholar-Teacher, Entomology Professor, Entomology Professor, Biological Sciences
Vidon	Phillipe	Special Member	B.S., Pierre & Marie Curie University, 1995; M.S., National Institute of Agronomy, 1997; Ph.D., York University, 2004.	University Affiliate, Geology
Villani	Stefano	Full Member	B.A., University of Pisa Italy 1991; M.A., 1993; Ph.D., Scuola Normale Superiore Pisa, Italy 1999.	Associate Professor, History

Vilán	Diego	Graduate Teaching	Ph.D., University of Southern California, 2015	Lecturer, Applied Economics
Vincent	Daniel R.	Full Member	B.A., University of Oxford, 1983; Ph.D., Princeton University, 1987; B.A., University of Toronto, 1990.	Professor, Economics
Vishkin	Uzi	Full Member	B.S., Hebrew University of Jerusalem, 1974; M.S., 1975; D.Sc.,Technion University-Israel, 1981.	Professor, Electrical and Computer Engineering Professor, Applied Mathematics & Statistics, and Scientific Computation Affiliate Professor, Computer Science
Vitak	Jessica	Full Member	Ph.D. Michigan State University, 2012.	Assistant Professor, History and Library & Information Science Assistant Professor, Human-Computer Interaction Assistant Professor, Information Management Assistant Professor, Information Studies Assistant Professor, Library and Information Science
Vlaicu	Razvan	Graduate Teaching	Ph.D., Northwestern University, 2006	Lecturer, Applied Economics
Vogel	Stuart N.	Full Member	B.A., Williams College, 1975; Ph.D., University of California-Berkeley, 1983.	Professor, Astronomy
Volchok	Mikhail	Adjunct Member	B.M., Moscow State Conservatory; M.M., Leningrad State Conservatory; Ph.D., Leningrad State Conservatory	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Volk	Alicia	Full Member	B.A., University of Virginia, 1994; MPhil, Yale University, 2001; Ph.D. 2005.	Associate Professor, Art History and Archaeology
Vollmer	Kurt	Full Member	B.S., Emory & Henry College, 2006; M.S., University of Florida, 2010; Ph.D., Virginia Polytechnic Institute & State University, 2014.	Agent, Extension Education
von Petersdorff	Tobias	Full Member	Dipl.Math.,Technical University of Darmstadt-Germany, 1987; Ph.D., 1989.	Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Associate Professor, Mathematics
Votta	Michael	Full Member	B.M., M.M. University of Michigan; D.M.A. Eastman School of Music	Professor, Ethnomusicology Professor, Music Professor, Music Education
Vélez	María B.	Full Member	B.A., St. Mary's University, San Antonio, Texas, 1992; M.A., The University of Texas at Austin, 1994; Ph.D., The Ohio State University, 2002.	Associate Professor, Criminology and Criminal Justice

Wachsman	Eric	Full Member	B.S., University of California, Berkeley, 1982; M.S., Stanford University, 1986; Ph.D. Stanford University, 1990.	Professor, Materials Science and Engineering Professor, Chemical Engineering
Wagner	Lara	Special Member	B.A., Columbia University, 1996; Ph.D., University of Arizona, 2005	University Affiliate, Geology
Wainger	Lisa	Full Member	B.S., University of California Santa Cruz, 1986; Ph.D., University of Maryland College Park, 1997.	Research Associate Professor, Marine, Estuarine, and Environmental Sciences
Waks	Leah	Full Member	B.A., Tel Aviv University, 1980; Ph.D.,University of Michigan, 1991.	Senior Lecturer, Communication
Waks	Edo	Full Member	B.S., 1995, Johns Hopkins University, M.S., 1996; Ph.D., Stanford University, 2003.	Professor, Electrical and Computer Engineering
Walker	Richard J.	Full Member	B.S., College of William & Mary, 1979; M.S., State University of New York-Stony Brook, 1981; Ph.D., 1984.	Professor, Geology
Walker	Margaret	Associate	Ed.D. Teachers College, Columbia University	Associate Clinical Professor, Teaching and Learning, Policy and Leadership
Walkoe	Janet	Full Member	B.A., The University of Chicago,1994; M.S., The University of Illinois at Chicago, 2008; Ph.D., Northwestern University, 2013.	Associate Professor, Teaching and Learning, Policy and Leadership Assistant Professor, Curriculum and Instruction
Wallace	James M.	Full Member	B.C.E.,Georgia Institute of Technology, 1962; M.S., 1964; D.Phil.,University of Oxford, 1969.	Professor, Mechanical Engineering
Wallis	John J.	Full Member	B.A., University of Washington, 1975; M.A., 1978; Ph.D., 1981.	Professor, Economics
Walsh	Christopher S.	Full Member	B.A., Middlebury College, 1969; M.S., Cornell University, 1977; Ph.D., 1980.	Professor Emeritus, Plant Science
Walston	Claude E.	Full Member	B.S., University of South Carolina-Columbia, 1946; M.S., University of Wisconsin-Madison, 1950; Ph.D., Ohio State University-Columbus,1953.	Professor Emeritus, Library and Information Science
Walsworth	Ronald	Full Member	B.S., Duke University, 1984; Ph.D., Harvard University, 1991	Professor, Electrical and Computer Engineering
Walsworth	Ronald	Full	B.S., Duke University, 1984; Ph.D., Harvard University, 1991	Professor, Physics
Walter	Christina	Full Member	CV: B.A. University of Kansas, 1997; M.A. University of Illinois at Urbana-Champaign, 2001; Ph.D., 2008.	Associate Professor, English Language and Literature

Walters	William B.	Full Member	B.S., Kansas State University, 1960;Ph.D., University of Illinois-Urbana/Champaign, 1964.	Professor, Chemistry
Walton	William	Special Member	Ph.D. 2003 University of Maryland; M.S. 1993 Rutgers University; B.S. 1991 Tufts University	Associate Research Professor, Anthropology
Wang	Orrin	Full Member	B.A., Reed College, 1979; M.A.,University of Chicago, 1984; Ph.D., 1989.	Professor, English Language and Literature Professor, Comparative Literature Affiliate Professor, Women's Studies Affiliate Associate Professor, American Studies
Wang	Ping	Full Member	Ph.D., University of California - Los Angeles UCLA 2005.	Associate Professor, History and Library & Information Science Associate Professor, Human-Computer Interaction Associate Professor, Information Management Associate Professor, Information Studies Associate Professor, Library and Information Science
Wang	Lai-Xi	Full Member	PhD, Shanghai Institute of Organic Chemistry, Chinese Academy of SciencesPostdoc Fellow, Johns Hopkins University and Massachusetts Institute of Technology	Professor, Biochemistry Professor, Chemistry
Wang	Min Qi	Full Member	Ed.D., Syracuse University; B.S., M.S., The City College of New York	Professor, Behavioral and Community Health
Wang	Sebastian	Adjunct Member	B.A. in Korean Traditional Performing Arts, Korea National University of Arts, Seoul, Korea	University Affiliate, Ethnomusicology University Affiliate, Music University Affiliate, Music Education
Wang	Min	Full Member	B.S., Hangzhou University, P.R. China, 1987; M.A., 1990; Ph.D., University of Toronto, 2000.	Professor, Human Development
Wang	Jian	Full Member	BS, Nanjing Agricultural University, 1984; MS, Nanjing Agricultural University, 1988; PhD, Shanghai Institute of Entomology, Chinese Academy of Sciences, 1998	Associate Professor, Entomology Associate Professor, Neurosciences and Cognitive Science Associate Professor, Biological Sciences
Wang	Chunsheng	Full Member	Ph.D., Zhejiang University, 1995	Professor, Chemical Engineering
Wang	Qin	Full Member	B.S., Nanjing University, 1992; M.S., Nanjing University, 1997; Ph.D., University of Illinois at Urbana-Champaign, 2004	Professor, Nutrition and Food Science

Wang	Yu-Huang	Full Member	Ph.D. Rice University, 2004	Assistant Professor, Chemical Physics Assistant Professor, Chemistry
Wang	Cixin	Full Member	B.S., Psychology & Statistics, Peking University, 2004; M.S., Child Development, University of Nebraska-Lincoln, 2006; M.A., Educational Psychology, University of Nebraska-Lincoln, 2008; Ph.D., Educational Psychology w/ School Psychology, University of Nebraska-Lincoln, 2011.	Assistant Professor, School Psychology
Wang	YuHuang	Full Member	B.S., Xiamen University, 1996; M.S., Emory University, 2000; Ph.D., Rice University, 2004	Professor, Materials Science and Engineering
Wang	Dongdong	Full Member	M.S., Peking University, 2005; Ph.D., University of Maryland - College Park, 2009	Associate Professor, Geographical Sciences
Wang	Nam Sun	Full Member		n/a, Chemical Engineering
Warfield	Patrick	Full Member	B.M. in Music Education, Lawrence University; M.A. in Musicology, Indiana University; Ph.D. in Musicology, Indiana University	Associate Director, Ethnomusicology Associate Director, Music Associate Director, Music Education Associate Professor, Ethnomusicology Associate Professor, Music Associate Professor, Music Education
Wasdin	Katherine	Full Member	B.A., Brown University, 2003; M.Phil., Yale University, 2007; Ph.D., Yale University, 2009	Assistant Professor, Classics
Washington	Lawrence C.	Full Member	B.A., Johns Hopkins University, 1971; M.A., 1971; Ph.D., Princeton University, 1974.	Distinguished Scholar-Teacher, Mathematics Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematics
Washington	Mary Helen	Full Member	B.A.,Notre Dame College, 1962; M.A., University of Detroit/Mercy, 1966; Ph.D.,1976.	Professor Emerita, English Language and Literature Affiliate Professor, American Studies
Weaver	Kathy	Full Member	PhD, University of Maryland, Baltimore.	Director, Information Management Lecturer, History and Library & Information Science Lecturer, Human-Computer Interaction Lecturer, Information Management Lecturer, Information Studies Lecturer, Library and Information Science

Weaver	Thomas	Special	B.S., Brigham Young University, 1996; M.S., Brigham Young University, 1997; Ph.D., University of California, San Diego, 2001	n/a, Civil and Environmental Engineering
Webster	Donald Warren	Special Member	M.S. 2002 University of Maryland Eastern Shore; B.S. 1974, A.S. 1973 University of Rhode Island	Research Associate, Anthropology
Wedel	Michel	Full Member	Atheneum B, Thorbecke Lyceum, The Hague, Netherlands, 1975; MS.C., Biomathematics, University of Leiden, Netherlands, 1981; M.A. Business Management, University of Delft, Netherlands, 1980; MS.C. Statistics, Netherlands Society for Statistics and Operations, 1986; Ph.D. Marketing, University of Wageningen, Netherlands, 1990.	Professor, Applied Mathematics & Statistics, and Scientific Computation
Weeks	John D.	Full Member	B.A., Harvard University, 1965; Ph.D., University of Chicago, 1969.	Distinguished University Professor, Biophysics Distinguished University Professor, Chemical Physics Distinguished University Professor, Chemistry Affiliate Professor, Physics
Weeks	Ann C.	Adjunct Member	B.S., Indiana State University, 1971; M.L.S., Indiana State University, 1973; Ph.D., University of Pittsburgh, 1982.	Professor of Practice, Human-Computer Interaction Professor of Practice, Information Management Professor of Practice, Information Studies Professor of Practice, Library and Information Science Professor of Practice, School Librarianship Professor of Practice, Youth Experience
Wei	Cheng-i	Full Member	B.S.,Tunghai University of Taiwan, 1970; M.S., National Taiwan University, 1972; Ph.D., University of California-Davis, 1979	Acting Chair, Nutrition and Food Science Professor, Nutrition and Food Science
Weil	Raymond R.	Full Member	B.S., Michigan State University, 1970; M.S., Purdue University, 1972; Ph.D., Virginia Polytechnic Institute & State University, 1977.	Professor, Environmental Science and Technology
Weinberg	Amy S.	Full Member	B.A., McGill University-Montreal, 1976; Ph.D., Massachusetts Institute of Technology, 1988.	Professor Emerita, Linguistics

Weiner	Joshua	Full Member	B.A., Northwestern University, 1985; M.A., University of California-Berkeley, 1988; Ph.D.,1998.	Professor, English Language and Literature Professor, Creative Writing
Weintrop	David	Full Member	Ph.D., Northwestern University	Associate Professor, Teaching and Learning, Policy and Leadership Assistant Professor, Information Management Assistant Professor, Information Studies Assistant Professor, Library and Information Science
Wellstood	Frederick C.	Full Member	A.B., University of California-Berkeley, 1979; Ph.D., 1988.	Professor, Physics
Welsh	Melissa	Full Member	B.S., Indiana University of Pennsylvania, 1999; M.Ed., Pennsylvania State University, 2009; Ph.D., Purdue University-West Lafeyette, 2014.	Director, Plant Science Director, Extension Education Assistant Clinical Professor, Plant Science Assistant Clinical Professor, Extension Education
Wenegrat	Jacob	Full Member	Ph.D., Oceanography 2015 School of Oceanography University of Washington, Seattle, WA. M.S., Applied Mathematics 2014 Department of Applied Mathematics University of Washington, Seattle, WA. M.S., Oceanography 2013 Department of Oceanography University of Washington, Seattle, WA. B.S., Symbolic Systems 2006	Assistant Professor, Applied Mathematics & Statistics, and Scientific Computation Assistant Professor, Atmospheric and Oceanic Science
Wentworth	Richard A.	Full Member	B.S. University of Wisconsin, 1985, Ph.D. Columbia University, 1990.	Professor, Mathematics
Wentzel	Kathryn R.	Full Member	B.A., University of Minnesota-Twin Cities, 1982; Ph.D., Stanford University, 1987.	Professor, Human Development
Wereley	Norman M.	Full Member	B.E., McGill University-Montreal,1983; M.S., Massachusetts Institute of Technology, 1987; Ph.D., 1990.	Chair, Aerospace Engineering
Wessel	Jennifer	Full Member	B.A., Rice University, 2006; M.A., Michigan State University, 2008; Ph.D., Michigan State University, 2012	Assistant Professor, Psychology
West	Brady	Full Member		Assistant Research Professor, Survey and Data Science (online) Assistant Research Professor, Survey Methodology

Wexler	Richard	Full Member	B.Mus., University of Michigan-Ann Arbor, 1963; M.A., New York University, 1969; Ph.D., 1974.	Professor Emeritus, Ethnomusicology Professor Emeritus, Music Professor Emeritus, Music Education
Wexler	Jade	Full Member	B.A., James Madison University, 1997; M.S., Johns Hopkins University, 2002; Ph.D., University of Texas-Austin, 2007	Associate Professor, Special Education
White	Marilyn D.	Full Member	B.A., Our Lady of the Lake College, 1962; M.S., University of Wisconsin-Madison, 1963; Ph.D., University of Illinois-Urbana/Champaign, 1971.	Associate Professor Emerita, Library and Information Science
White	Ian	Full Member	Ph.D., Stanford University 2002	Associate Chair, Bioengineering Associate Professor, Bioengineering Assistant Professor, Chemical Physics
White	Gary	Adjunct Member	Ph.D Higher Education, Pennsylvania State University	Lecturer, Library and Information Science
White	Benjamin	Special Member	PhD, Washington University - St. Louis	Research Scientist, Entomology
Wible	Scott	Full Member	B.A., Duquesne University, 2000; M.A., Pennsylvania State University, 2002; Ph.D., 2006.	Associate Professor, English Language and Literature
Widrig	Patrik	Full Member	BA, Education, Pädagogische Hochschule Rorschach, Switzerland 1981); Nikolais/Louis Dance Lab, New York City 1984-87); Alexander Technique/Somatic Training, Regina Wray, Ann Rodiger 1986-96)	Associate Professor, Dance
Wien	Peter	Full Member	DPhil, Universität Bonn, 2003	Professor, History Affiliate Associate Professor, Jewish Studies
Wigfield	Allan L.	Full Member	B.S., University of Illinois-Urbana/Champaign, 1974; M.A., 1977; Ph.D., 1982.	Professor, Human Development
Wilberg	Michael	Full Member	B.S., Michigan State University, 1997; M.S., University of Wisconsin - Stevens Point, 2000; Ph.D., Michigan State University, 2005.	Assistant Professor, Marine, Estuarine, and Environmental Sciences
Wilder	Sara	Full Member	B.A. University of California, Davis 2010, M.A. Ohio State University 2013, Ph.D. Ohio State University 2017	Assistant Professor, English Language and Literature
Wilkinson	Gerald S.	Full Member	B.S., University of California-Davis, 1977; Ph.D., University of California-San Diego, 1984.	Professor, Biological Sciences

Williams	Ellen D.	Full Member	B.S., Michigan State University, 1976;Ph.D., California Institute of Technology, 1981. Currently on leave)	Distinguished University Professor, Physics Distinguished University Professor, Chemical Physics
Williams	Daryle	Full Member	AB, Princeton University, 1989; MA, Stanford University, 1991; PhD, Stanford University, 1995	Associate Professor, History
Williams	Carl	Full Member	B.A., Rice University, 1981; Ph.D., University of Chicago, 1987.	Adjunct Professor, Physics University Affiliate, Chemical Physics
Williams	Alexander	Full Member	B.A. Princeton University, 1992; Ph.D. University of Pennsylvania, 2005	Associate Professor, Linguistics Associate Professor, Philosophy
Williams	Roberton III	Full Member	A.B., Harvard College, 1994; Ph.D., Stanford University, 1999	Professor, Agricultural and Resource Economics
Williams	James R.	Full Member	B.S., Santa Clara University, 2002; Ph.D., Harvard University, 2009	Assistant Professor, Physics
Williams	Joseph	Full Member	B.A., Bates College, 2009; MA, Courtauld Institute of Art, History of Art, 2010; PhD, Duke University, Art, Art History & Visual Studies, 2017	Assistant Professor, Architecture Assistant Professor, Urban and Regional Planning and Design
Williams	Michael	Special Member	BA, University of California, Santa Barbara, 1985; MS, University of Maryland, 1993; PhD, University of California, Santa Barbara, 1997	Assistant Research Professor, Entomology
Williams	Stacey C	Graduate Teaching	B.S., University of Delaware, 1993; M.Ed., Loyola University-Maryland, 1997	Senior Lecturer, Special Education
Williams-Forson	Psyche	Full Member	B.A., University of Virginia, 1987; M.A., University of Maryland, 1994; Ph. D., University of Maryland, 2002.	Chair, American Studies Affiliate Associate Professor, Women's Studies
Wilson	Mark E.	Full Member	B.A., University of California-Los Angeles, 1970; M.A., 1972; Ph.D., 1974.	Associate Professor, Ethnomusicology Associate Professor, Music Associate Professor, Music Education
Wilson	Gran	Full Member	B.M., Samford University; M.M., Indiana University–Bloomington	Associate Professor, Ethnomusicology Associate Professor, Music Associate Professor, Music Education
Wilson	Peggy	Associate	Ph.D. University of Maryland	Associate Clinical Professor, Teaching and Learning, Policy and Leadership
Wilson	Sacoby	Full Member	B.S., Alabama Agricultural University, 1998; M.S., University of North Carolina-Chapel Hill, 2000; Ph.D., University of North Carolina-Chapel Hill, 2005	Associate Professor, Environmental Health Sciences

Winkelmann	Allen E.	Full Member	B.S.,University of Minnesota-Twin Cities, 1965; M.S., 1967; Ph.D.,University of Maryland-College Park, 1976.	Associate Professor, Aerospace Engineering
Winter	Susan	Full Member	PhD, University of Arizona	Lecturer, History and Library & Information Science Lecturer, Human-Computer Interaction Lecturer, Information Management Lecturer, Information Studies Lecturer, Library and Information Science
Wiseman	Donna	Full Member	B.S., Oklahoma State University, 1968; M.Ed., Arkansas State University, 1976; Ph.D., University of Missouri-Columbia, 1979.	Professor, Teaching and Learning, Policy and Leadership Professor, Curriculum and Instruction
Wish	Eric D.	Full Member	B.S., University of Massachusetts-Amherst, 1968; Ph.D., Washington University, 1977.	Associate Professor, Criminology and Criminal Justice
Witzleben	J. Lawrence	Full Member	B.A. in Music Theory/History, UC-Santa Barbara; M.A. in Ethnomusicology, University of Hawaii; Certificate of Postgraduate Study in Chinese Music Theory, Shanghai Conservatory of Music; Ph.D. in Ethnomusicology, University of Pittsburgh	Professor, Ethnomusicology Professor, Music Professor, Music Education
Woehl	Taylor	Full Member		Associate Professor, Chemical Engineering
Woehlke	Stefan	Graduate Teaching	B.A., George Mason University, 2006; M.A.A., Ph.D., University of Maryland, 2013, 2021	Postdoctoral Research Associate, Historic Preservation
Wohlfarth	Patrick	Full Member	B.A., University of Maryland, Baltimore County, 2004; M.A., University of North Carolina at Chapel Hill, 2006; Ph.D., University of North Carolina at Chapel Hill, 2010.	Assistant Professor, Government and Politics
Wolfe	Peter	Full Member	B.S., St. Lawrence University, 1959; B.S.E.E., Rensselaer Polytechnic Institute, 1959; M.S., Northwestern University, 1961; Ph.D., New York University, 1965.	Professor Emeritus, Mathematics
Wolniak	Stephen M.	Full Member	B.A., State University of New York-Oswego, 1972; M.S., University of Illinois-Urbana/Champaign, 1974; Ph.D.,University of California-Berkeley, 1979.	Professor, Biological Sciences
Wolpert	Scott A.	Full Member	B.S., Johns Hopkins University,1972; M.S., Stanford University, 1974; Ph.D., 1976.	Chair, Mathematics Distinguished Scholar-Teacher, Mathematics Professor, Mathematics

Wolvin	Andrew D.	Full Member	B.S., University of Nebraska, 1962; M.A.,1963; Ph.D., Purdue University, 1968.	Professor, Communication
Wong	Edlie	Full Member	B.A. University of California, Berkley, 1995; Ph.D., Univeristy of California, 2003.	Professor, English Language and Literature
Wong	Janelle	Full Member	B.A., University of California, Los Angeles, 1995; M.A., Yale University, 1998; Ph.D., Yale University, 2001	Associate Professor, American Studies
Woodman	Taylor C	Special Member	B.A., Virginia Polytechnic Institute & State University, 2009; M.A., University of Maryland-College Park, 2012; Ph.D., University of Maryland-College Park, 2019	Assistant Clinical Professor, International Education Policy
Woods	Carly S.	Full Member	B.A., University of Mary Washington, 2004; M.A., University of Pittsburgh, 2006; Ph.D., University of Pittsburgh, 2010	Associate Professor, Communication Affiliate Associate Professor, Women's Studies
Woods	Colleen	Full Member	B.A., University of Michigan, Ann Arbor, 2003; M.A., CUNY Graduate Center, 2006; Ph.D., University of Michigan, Ann Arbor, 2012.	Associate Professor, History
Worthington	Colleen	Non-Member	B.A., University of Maryland-College Park, 1979;M.S., Loyola University of Maryland, 1980	Clinical Professor, Speech Language Pathology
Worthington	Roger L	Full Member	B.A., University of California-Irvine, 1990; M.A., University of Maryland-College Park, 1995; Ph.D., University of Maryland-College Park, 2000	Professor, Counseling Psychology
Wu	Louisa	Non-Member	PhD University of California - San Diego, 1995	Associate Professor, Biological Sciences Affiliate Associate Professor, Entomology
Wu	Min	Full Member	B.A., Tsinghua University/ Qinghua University, 1996; B. Elect. Eng., 1996; M.A., Princeton University, 1998; Ph.D., 2001	Professor, Electrical and Computer Engineering
Wu	Ling-Gang	Special Member	M.D., Second Military Medical College, 1985; M.S., Second Military Medical College, 1988; Ph.D., Baylor College of Medicine, 1994	n/a, Biological Sciences
Wuttig	Manfred R.	Full Member	B.S.,Technische Universitat Berlin, 1955; M.S., 1958; Ph.D., 1962.	Professor, Materials Science and Engineering
Wyatt	David M.	Full Member	B.A., Yale University, 1970 Ph.D., University of California-Berkeley, 1975.	Professor, English Language and Literature
Wylie	Ann G.	Full Member	B.A., Wellesley College, 1966; Ph.D., Columbia University, 1972.	Professor Emerita, Geology

Xiao	Shunyuan	Full Member	B.Sc., Huazhong Agricultural University, China, 1984; M.Sc., 1987; Ph.D., 1992.	Professor, Plant Science Affiliate Professor, Biological Sciences
Xiao	Zhengguo	Full Member	D.V.M., Nanjing Agricultural University, 1988; M.S., Nanjing Agricultural University, 1991.	Professor, Animal Sciences
Xie	Min	Full Member	B.A., Beijing University, China 1997; M. A., 2000; Ph.D., SUNY-Albany, 2007.	Professor, Criminology and Criminal Justice
Xie	Yiqun	Full Member	M.S., University of Minnesota-Twin Cities, 2018; Ph.D., University of Minnesota-Twin Cities, 2020	Assistant Professor, Geographical Sciences
Xu	Huan	Full Member	S.B., Harvard University, 2007; Ph.D., California Institute of Technology, 2013, M.S., 2008.	Assistant Professor, Aerospace Engineering
Yager	David D.	Full Member	B.A., Wesleyan University, 1972; Ph.D., Cornell University, 1989.	Associate Professor, Neurosciences and Cognitive Science Associate Professor, Psychology
Yakovenko	Victor M.	Full Member	M.S., Moscow Physical-Technical Institute, 1984; Ph.D., Landau Institute for Theoretical Physics, 1987.	Professor, Physics
Yakubova	Gulnoza	Full Member	B.A., Uzbekistan, 2006; M.S., Purdue University-West Lafayette, 2010; Ph.D, Purdue University, 2013	Assistant Professor, Special Education
Yang	Grace L.	Full Member	B.A., National Taiwan University, 1960; M.A.,University of California-Berkeley, 1963; Ph.D., 1966.	Professor Emerita, Applied Mathematics & Statistics, and Scientific Computation Professor Emerita, Mathematical Statistics Professor Emerita, Mathematics
Yang	Ji Seung	Full Member	B.A., Yonsei University, Seoul, Korea, 2005; M.A., Yonsei University, Seoul, Korea, 2007; Ph.D., University of California, Los Angeles,Department of Education, Graduate School of Education and Information Studies, 2012.	Associate Professor, Measurement, Statistics and Evaluation
Yang	Bao	Full Member	Ph.D. in Mechanical Engineering, University of California, 2003; Ph.D. in Physics, University of Science and Technology of China, 1998	Professor, Mechanical Engineering
Yang	Chenyu	Full Member	B.A., Gustavus Adolphus College, 2010; Ph.D., University of Rochester, 2016.	Assistant Professor, Economics

Yaros	Ron	Full Member	B.A., University of Wisconsin-Madison, 1980; M.A., Webster University, 1991; Ph.D., University of Wisconsin-Madison, 2005.	Associate Professor, Journalism
Yarwood	Stephanie A.	Full Member	B.A. Witman College, 2001 Ph.D. Oregon State Univ. 2007	Associate Professor, Environmental Science and Technology
Yeung	Donald	Full Member	B.S., Stanford University, 1990; M.S., Massachusetts Institute of Technology, 1993; Ph.D., 1997.	Professor, Electrical and Computer Engineering Affiliate Associate Professor, Computer Science
Yi	Moises	Graduate Teaching	Ph.D., University of California-Berkeley, 2016	Lecturer, Applied Economics
Yonkos	Lance	Full Member	B.S., Washington and Lee University. 1986; M.S., University of Maryland, 1999; Ph.D., University of Maryland, 2005.	Associate Professor, Environmental Science and Technology
Yorke	James A.	Full Member	A.B., Columbia University,1963; Ph.D., University of Maryland-College Park, 1966.	Distinguished University Professor, Applied Mathematics & Statistics, and Scientific Computation Distinguished University Professor Emeritus, Mathematics Distinguished University Professor Emeritus, Physics
Yovel	Yossi	Special	B.Sc., Tel-Aviv University, 2004; B.Sc., Tel-Aviv University, 2005; M.Sc., Tel-Aviv University, 2006; Ph.D., University of Tuebingen and Max Planck Institute for Biological Cybernetics, 2008	n/a, Biological Sciences
Yu	Miao	Full Member	Ph.D. Mechanical Engineering University of Maryland, 2002. B.S. & M.S. degrees Engineering Mechanics) Tsinghua University, Beijing, China.	Professor, Mechanical Engineering
Yu	Kenneth H.	Full Member	B.S.,University of California-Berkeley, 1985; M.S., 1988; Ph.D., 1989.	Associate Professor, Aerospace Engineering
Yu	Liangli	Full Member	B.S., China Pharmaceutical University, P.R.China, 1984; M.S., China Pharmaceutical University, P.R. China, 1989; Ph.D., Purdue University, 1999	Professor, Nutrition and Food Science
Yu	Yihua Bruce	Full Member	Ph.D., Johns Hopkins University, 1996.	Associate Professor, Chemical Physics
Yuan	Quan	Non-Member	PhD, University of Pennsylvania	Research Scientist, Entomology

Zachariah	Michael R.	Full Member	B.S., University of California, LA, 1979, M.S., University of California, LA, 1981, Ph.D., University of California, LA, 1986	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Chemistry Affiliate Professor, Materials Science and Engineering
Zakharia	Zeena	Full Member	B.A., Yale University, 1994; M.A., Harvard University, 1997; Ph.D., Columbia University, 2008	Assistant Professor, International Education Policy
Zaki	Mary	Full Member	B.A., University of Pennsylvania, 2003; B.S., University of Pennsylvania, 2003; M.A., Northwestern University, 2008; Ph.D., Northwestern University, 2014.	Assistant Professor, Agricultural and Resource Economics
Zakim	Eric S.	Full Member	B.A., Oberlin College, 1982; M.A. University of California-Berkeley, 1989; Ph.D., 1996.	Associate Professor, Jewish Studies Associate Professor, Comparative Literature
Zalewski	Chris	Non-Member	B.A., University of Maryland, M.A., University of Maryland, Ph.D., Gallaudet University	Lecturer, Clinical Audiology
Zambrana	Ruth Enid	Full Member	B.A., CUNY-Queens College, 1969; M.S.W., University of Pennsylvania, 1971; Ph.D., Boston University, 1977.	Professor, Women's Studies Affiliate Professor, Sociology
Zanotti	Laura	Special Member	Ph.D. 2008, M.A. 2004 University of Washington; B.A. 2001 Colgate University	Research Professor, Anthropology
Zelkowitz	Marvin V.	Full Member	B.S., Rensselaer Polytechnic Institute, 1967; M.S., Cornell University, 1969; Ph.D., 1971.	Professor Emerita, Computer Science
Zeller	Thomas G.	Full Member	M.A., University of Munich, 1995; Ph.D., 1999.	Associate Professor, History
Zeng	Ning	Full Member	B.S., University of Science and Technology-China, 1987: M.S., University of Arizona, 1991; Ph.D., University of Arizona, 1995.	Professor, Atmospheric and Oceanic Science Affiliate Associate Professor, Geology
Zer Boudet	Ilknur	Graduate Teaching	Ph.D., London School of Economics, 2013	Lecturer, Applied Economics
Zhang	Da-Lin	Full Member	B.S., University of Science & Technology-China, 1976; M.S., The Pennsylvania State University, 1981; Ph.D., 1985.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Atmospheric and Oceanic Science
Zhang	Guangming	Full Member	B.S., Tianjin University-P.R.C., 1966; M.S., 1981; M.S., University of Illinois-Urbana/Champaign, 1983; Ph.D., 1986.	Associate Professor, Mechanical Engineering Associate Professor, Systems Engineering
Zhang	Lei	Full Member	B.S., Tsinghua University, 2000; M.S., University of Minnesota, 2002, 2005; Ph.D., University of Minnesota, 2006.	Associate Professor, Civil and Environmental Engineering

Zhang	Yanjin	Full Member	D.V.M, Shandong Agricultural University, China, 1984; M.S., China Institute of Veterinary Drug Control,1989; Ph.D., Iowa State University, IA, 1998.	Director, Veterinary Medical Sciences Associate Professor, Veterinary Medical Sciences Affiliate Associate Professor, Biological Sciences
Zhang	Yunfeng	Full Member	B.S., Tongji University, 1993; M.S., Tsinghua University, 1996; Ph.D. California Institute of Technology, 2001.	Associate Professor, Civil and Environmental Engineering
Zhang	Ting	Full Member	B.A., Peking University, 2004; M.A. Peking University, 2007; Ph.D., Johns Hopkins University, 2014.	Associate Professor, History
Zhang	Li-Qun	Full Member	B.S., Tsinghua University, 1982; M.S., Vanderbilt University, 1988; Ph.D., Vanderbilt University, 1990	Professor, Bioengineering
Zhang	Jing	Full Member	B.S., China Agricultural University, 2009; M.S., University of Minnesota, 2011; Ph.D., University of Minnesota, 2014	Assistant Professor, Applied Mathematics & Statistics, and Scientific Computation
Zhang	Ye	Graduate Teaching	Ph.D., University of Maryland at College Park, 2007	Lecturer, Applied Economics
Zhang	Chen	Full Member		n/a, Chemical Engineering
Zhang	Kaiqing	Full Member	Ph.D. in 2021 from the Department of Electrical and Computer Engineering (ECE) at the University of Illinois at Urbana-Champaign. M.S. degrees in 2017, one in ECE and the other in Applied Math from the University of Illinois at Urbana-Champaign. B.E. with a second degree in Economics from Tsinghua University in China.	Assistant Professor, Electrical and Computer Engineering
Zhao	Ji-Cheng 'JC'	Full Member	B.S., Central South University, 1985; M.S., Central South University, 1988; Ph.D., Lehigh University, 1995.	Chair, Materials Science and Engineering Professor, Materials Science and Engineering
Zhou	Naijun	Full Member	Ph.D, GIScience, University of Wisconsin- Madison, 2005	Lecturer, Geospatial Information Science (with Nanjing Normal University) Lecturer, Geospatial Information Sciences Lecturer, Geospatial Information Sciences
Zhou	You	Full Member	B.S., Peking University, 2010; Ph.D., Harvard University, 2015.	Assistant Professor, Materials Science and Engineering

Zhu	Xiaoping	Full Member	D.V.M., Ningxia University, China, 1984; M.S., China Agricultural University, 1987; Ph.D., University of Wisconsin-Madison, 1997.	Associate Dean, Veterinary Medical Sciences Chair, Veterinary Medical Sciences Professor, Veterinary Medical Sciences Affiliate Professor, Biological Sciences
Zhu	Wenlu	Full Member	B.S., Peking University, 1986; M.S., 1989; Ph.D., SUNY-Stony Brook, 1996.	Professor, Geology Associate Professor, Applied Mathematics & Statistics, and Scientific Computation
Zhu	Jianhua	Full Member	B.S., Anhui Institute of Education, China, 1998; Ph.D., Purdue Univeristy, 2004.	Associate Professor, Plant Science
Zhu	Shanjiang	Special Member	B.S., Tsinghua University, 2003; M.S., Tsinghua University/Ecole Centrale de Nantes, 2005; M.S., University of Minnesota, 2012; Ph.D., University of Minnesota, 2010	Associate Professor, Civil and Environmental Engineering
Zickert	Christian	Full Member	Ph.D., Columbia University, 2008	Assistant Professor, Mathematics
Ziegler	Delores	Full Member	B.M., Maryville College, 1973; M.M. The University of Tennessee, 1978	Professor, Ethnomusicology Professor, Music Professor, Music Education
Ziegler	Susan	Special	B.S., University of Massachusetts at Amherst, 1993; Ph.D., University of Texas at Austin, 1998.	University Affiliate, Geology
Zierden	Hannah	Full Member		n/a, Chemical Engineering
Zilfi	Madeline C.	Full Member	B.A., Mount Holyoke College, 1964; M.A.,University of Chicago, 1971; Ph.D., 1976.	Professor, History Affiliate Professor, Jewish Studies Affiliate Professor, Women's Studies
Zimin	Alexey	Full Member	Ph.D., University of Maryland College Park, 2003.	Associate Research Professor, Applied Mathematics & Statistics, and Scientific Computation
Zimmer	Elizabeth	Adjunct Member	B.S., Cornell University, 1973; Ph.D., University of California-Berkeley, 1981.	Adjunct Professor, Biological Sciences
Zimmerman	Daniel J.	Adjunct Member	B.A., Yale University; M.A., Ph.D., University of Chicago	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Zimmerman	Paul	Graduate Teaching	Ph.D., Florida State University, 2000	Lecturer, Applied Economics
Zou	Haibo	Special Member	B.S., Nanjing Normal University, 1986; M.S., Nanjing Normal University, 1989; Ph.D., Florida State University, 1999	University Affiliate, Geology
Zou	Linda	Full Member	B.A., College of William & Mary, 2012; Ph.D., University of Washington, 2019.	Assistant Professor, Psychology

Zukowski	Andrea	Full Member	B.A., Wayne State University; Ph.D., Boston University, 2001.	Assistant Research Scientist, Linguistics
Zupan	Marcus	Special Member	B.E., University of Dayton, 1995; M.S., Johns Hopkins University, 1997; Ph.D., Johns Hopkins University, 2000.	Professor, Civil and Environmental Engineering
Zwicker	Matthias	Full Member	M.S., Switzerland, 1998; Ph.D., Switzerland, 2003	Professor, Computer Science
Šrámek	Ondřej	Special Member	B.S., Charles University in Prague, 2000; M.S., Charles University in Prague, 2002; M.Phil., Yale University, 2006; Ph.D., École Normale Supérieure de Lyon (France) & Charles University in Prague, 2007.	University Affiliate, Geology

COURSE LISTING

A

- AASP - African American Studies (p. 717)
- AAST - Asian American Studies (p. 718)
- AGNR - Agriculture and Natural Resources (p. 718)
- AMSC - Applied Mathematics & Scientific Computation (p. 719)
- AMST - American Studies (p. 721)
- ANSC - Animal Science (p. 723)
- ANTH - Anthropology (p. 725)
- AOSC - Atmospheric and Oceanic Science (p. 733)
- ARAB - Arabic (p. 737)
- ARCH - Architecture (p. 737)
- AREC - Agricultural and Resource Economics (p. 742)
- ARHU - Arts and Humanities (p. 745)
- ARMY - Army (p. 746)
- ARSC - Air Science (p. 746)
- ARTH - Art History & Archaeology (p. 746)
- ARTT - Art Studio (p. 748)
- ASTR - Astronomy (p. 750)

B

- BCHM - Biochemistry (p. 751)
- BEES - Behavior, Ecology, Evolution and Systematics (p. 752)
- BERC - Center for Study of Business, Ethics, Regulation, Crime (p. 753)
- BIOE - Bioengineering (p. 753)
- BIOL - Biology (p. 757)
- BIOM - Biometrics (p. 758)
- BIPH - Biophysics (p. 759)
- BISI - Biological Sciences (p. 759)
- BMGT - Business and Management (p. 760)
- BMSO - Online Business MS Programs (https://academiccatalog.umd.edu/graduate/courses/bmso/)
- BSCI - Biological Sciences Program (p. 767)
- BSOS - Behavioral and Social Sciences (p. 770)
- BSST - Terrorism Studies (p. 771)
- BUAC - Accounting and Information Assurance (https://academiccatalog.umd.edu/graduate/courses/buac/)
- BUDT - Decision and Information Technologies (p. 773)
- BUFN - Finance (p. 775)
- BULM - Logistics, Business, and Public Policy (p. 781)
- BUMK - Marketing (p. 783)
- BUMO - Management and Organization (p. 786)
- BUSI - Part-Time MBA Program (p. 788)
- BUSM - Full-Time MBA Program (p. 794)
- BUSO - Online MBA Programs (https://academiccatalog.umd.edu/graduate/courses/buso/)

C

- CBMG - Cell Biology & Molecular Genetics (p. 800)
- CCJS - Criminology and Criminal Justice (p. 800)
- CHBE - Chemical and Biomolecular Engineering (p. 803)
- CHEM - Chemistry (p. 810)
- CHIN - Chinese (p. 812)
- CHPH - Chemical Physics (p. 813)
- CLAS - Classics (p. 814)
- CLFS - Chemical and Life Sciences (p. 814)
- CMLT - Comparative Literature (p. 815)
- CMSC - Computer Science (p. 815)
- COMM - Communication (p. 823)
- CONS - Sustainable Development & Conservation Biology (p. 830)

D

- DANC - Dance (p. 831)
- DATA - Data (https://academiccatalog.umd.edu/graduate/courses/data/)

E

- ECON - Economics (p. 833)
- EDCI - Curriculum and Instruction (p. 843)
- EDCP - Education Counseling and Personnel Services (p. 845)
- EDHD - Education, Human Development (p. 849)
- EDHI - Education Leadership, Higher Ed and International Ed (p. 855)
- EDMS - Measurement, Statistics, and Evaluation (p. 858)
- EDPS - Education Policy Studies (p. 860)
- EDSP - Education, Special (p. 861)
- EDUC - Education (p. 868)
- EMBA - Executive MBA Program (p. 869)
- ENAE - Engineering, Aerospace (p. 872)
- ENCE - Engineering, Civil (p. 877)
- ENCH - Engineering, Chemical (p. 884)
- ENEE - Electrical & Computer Engineering (p. 884)
- ENES - Engineering Science (p. 892)
- ENFP - Engineering, Fire Protection (p. 896)
- ENGL - English (p. 900)
- ENMA - Engineering, Materials (p. 906)
- ENME - Engineering, Mechanical (p. 914)
- ENNU - Engineering, Nuclear (p. 923)
- ENPM - Engineering, Professional Masters (p. 924)
- ENPP - Engineering and Public Policy (p. 931)
- ENRE - Reliability Engineering (p. 931)
- ENSE - Systems Engineering (p. 933)
- ENSP - Environmental Science and Policy (p. 934)
- ENST - Environmental Science and Technology (p. 935)
- ENTM - Entomology (p. 940)
- ENTS - Telecommunications (p. 941)
- EPIB - Epidemiology and Biostatistics (p. 942)

F

- FILM - Film Studies (p. 946)
- FMSC - Family Science (p. 946)

- FOLA - Foreign Language (p. 950)
- FREN - French (p. 950)

G

- GEOG - Geographical Sciences (p. 952)
- GEOL - Geology (p. 960)
- GERM - Germanic Studies (p. 965)
- GREK - Greek (p. 966)
- GVPT - Government and Politics (p. 966)

H

- HACS - ACES-Cybersecurity (p. 972)
- HEBR - Hebrew (p. 973)
- HESI - Higher Ed, Student Affairs, and International Ed Policy (p. 973)
- HESP - Hearing and Speech Sciences (p. 974)
- HISP - Historic Preservation (p. 980)
- HIST - History (p. 982)
- HLHP - Health and Human Performance (p. 986)
- HLMN - Hillman Entrepreneurs Program (p. 987)
- HLSA - Health Services Administration (p. 987)
- HLTH - Health (p. 990)

I

- IMMR - Immigration Studies (p. 995)
- INFM - Information Management (p. 995)
- INST - Information Studies (p. 996)
- ISRL - Israel Studies (p. 1009)
- ITAL - Italian (p. 1010)

J

- JAPN - Japanese (p. 1011)

AASP - African American Studies

AASP400 Directed Readings in African American Studies (3 Credits)
The readings will be directed by the faculty of African American Studies. Topics to be covered will be chosen to meet the needs and interests of individual students.
Prerequisite: AASP202 or AASP100.

AASP401 Research Directions in African-American Studies (3 Credits)
Utilizing a pro seminar format, this course offers an overview of recent research on the experiences of African Americans and the African diaspora. The course will cover selective topics from research portfolios of department faculty related to the status of African Americans and the diaspora across a number of topics. Students will read recent original research studies and discuss with the authors both the theoretical underpinnings of the research, the methods and evaluate the interpretations. This course fulfills the capstone requirement for African American studies majors and certificate students by providing an opportunity to consolidate and integrate a range of ideas encountered in the curriculum.
Restriction: Must have earned a minimum of 90 credits; and must be major in African-American Studies.

AASP402 Classic Readings in African American Studies (3 Credits)
Classic readings of the social, economic and political status of blacks and other minorities in the United States and the Americas.
Prerequisite: AASP202 or AASP100.

AASP411 Black Resistance Movements (3 Credits)
A comparative study of the black resistance movements in Africa and America; analysis of their interrelationships as well as their impact on contemporary pan-Africanism.
Prerequisite: AASP100.

AASP413 Gentrification: Have You Met the New Neighbors?: Issues of Belonging and Displacement in Urban Areas (3 Credits)
Explores and considers current scholarship on the history, modes and implications of the process of gentrification in various areas within the United States. The course will engage with history, culture, and policy factors related to the redevelopment of urban areas. Course texts will be interdisciplinary in their methodology and genre, and will include themes of race, gender, and class. These texts, combined with student engagement, class discussion, and directed assignments will help to develop a theoretical framework for the understanding of gentrification as systematic, profound and in most if not all cases, irreversibly detrimental.

AASP441 Science, Technology, and the Black Community (3 Credits)
Scientific knowledge and skills in solving technological and social problems, particularly those faced by the black community. Examines the evolution and development of African and African American contributions to science. Surveys the impact of technological changes on minority communities.
Prerequisite: HIST255, AASP202, or AASP100; or permission of BSOS-African American Studies department.

AASP443 Blacks and the Law (3 Credits)
The relationship between black Americans and the law, particularly criminal law, criminal institutions and the criminal justice system. Examines historical changes in the legal status of blacks and changes in the causes of racial disparities in criminal involvement and punishments.
Prerequisite: HIST255, AASP202, or AASP100; or permission of BSOS-African American Studies department.

AASP468 Special Topics in Africa and the Americas (3 Credits)
Cultural, historical and artistic dimensions of the African experience in Africa and the Americas.
Repeatable to: 6 credits if content differs.

AASP478 Humanities Topics in African American Studies (3 Credits)
Advanced studies in the humanities, often requiring prerequisites, focusing on the literary, artistic and philosophical contributions of Africans and African Americans.
Repeatable to: 6 credits if content differs.

AASP479 Special Research in African-American Studies (1-9 Credits)
Supervised research activity within the African American Studies Department. This course is for both majors and non-majors who seek to work for a faculty member on their research project(s) and/or work in their research lab as a Research Assistant (RA). The purpose of this course is to expose undergraduate students to theories and methods used to understand the lives and experiences of Black people across the diaspora via hands-on/applied research experience. A faculty member must agree to supervise your research activity before students can enroll for course credit.
Recommended: AASP210.
Restriction: Permission of BSOS- African American Studies department; and sophomore standing or higher.
Repeatable to: 9 credits.

AASP493 Feminist and Nationalist Thought in Black Communities (3 Credits)
The historical and theoretical foundations of feminist and nationalist thought in Black Communities will be examined. Further, we will discover why feminist and nationalist thought has been routinely ignored or misrepresented as disparate, if not oppositional, themes in Black intellectual and political life.
Prerequisite: AASP101 or AASP100.
Credit Only Granted for: AASP493 or AASP499W.
Formerly: AASP499W.

AASP498 Special Topics in Black Culture (3 Credits)
Advanced study of the cultural and historical antecedents of contemporary African and African American society. Emphasis on the social, political, economic and behavioral factors affecting blacks and their communities. Topics vary.
Prerequisite: AASP202 or AASP100.
Repeatable to: 6 credits if content differs.

AASP499 Advanced Topics in Public Policy and the Black Community (3 Credits)
Examination of specific areas of policy development and evaluation in black and other communities. Application of advanced tools of policy analysis, especially quantitative, statistical and micro-economic analysis.
Prerequisite: AASP301; or permission of BSOS-African American Studies department.
Repeatable to: 6 credits if content differs.

AASP602 Interdisciplinary Research Methods in Afro-American Studies (3 Credits)
The purpose of this course is to familiarize graduate students with both the interdisciplinary and multidisciplinary approaches that academics employ when producing scholarship in the field of Afro-American Studies. This will examine the contours of the field with an emphasis on work in both the social sciences and the arts and humanities.
Restriction: Permission of BSOS-African American Studies department; or permission of EDUC-Education Policy and Leadership department.

AASP611 Classic Texts and Contemporary Issues (3 Credits)
Through a review and analysis of classic texts of Black intellectuals, artists, writers, and activists, students will examine the compelling themes in African American life and scholarship.
Restriction: Permission of BSOS-African American Studies department.

AASP621 Public Policy and Black Communities (3 Credits)
This course explores the role of race in social policy formation and emphasizes the importance of both political institutions and economic relations as determinants of the policy making process and context.
Restriction: Permission of BSOS-African American Studies department.

AAST - Asian American Studies

AAST420 Asian American Women: The Social Construction of Gender (3 Credits)
Examines the intersection of gender, race and class as it relates to Asian American women in the United States; how institutionalized cultural and social statuses of gender, race, ethnicity and social class produce and reproduce inequality with implications for Asian Americans and the broader society.
Restriction: Must not have completed WMST420. Cross-listed with: WGSS420.
Credit Only Granted for: AAST420, WMST420 or WGSS420.

AAST421 Asian American Public Policy (3 Credits)
Using Asian Pacific Americans as a case study, this course will analyze the development of public policy in America. Each week, topics such as community development, voting rights, and the movement to redress the wartime internment of Japanese Americans will serve as backdrops for discussion. We will explore the policy-making roles of legislators, judges, local and national political leaders, journalists, writers, unions, social movements, and community organizations.Cross-listed with: AMST418N.
Credit Only Granted for: AAST421, AAST498M or AMST418N.
Formerly: AAST498M.

AAST424 Sociology of Race Relations (3 Credits)
Analysis of race-related issues, with a primary focus on American society. The historical emergence, development, and institutionalization of racism; the impact of racism on its victims; and racially based conflict.
Prerequisite: 6 credits in SOCY courses; or permission of UGST-Undergraduate Studies. Cross-listed with: SOCY424.
Credit Only Granted for: AAST424 or SOCY424.

AAST440 South Asian American Literature and Culture (3 Credits)
Examines writing by South Asian American authors and authors writing about South Asian American issues. It explores major South Asian diaspora themes, considering how migration, war, the events of 9/11, global capitalism, and the changing socio-political and racial scene have affected South Asians in the United States. We will use a transnational approach to consider how writers and filmmakers explore gender, class, religious, caste, and other differences amongst South Asian Americans. We will also examine the place of South Asian Americans in relation to other Asian American populations. We will consider how South Asian American texts disrupt traditional literary classifications based on national identities by reflecting the complex global conditions, imperialistic and capitalistic expansion, and interconnectedness of peoples, nations, and cultures that have transformed American literature and conceptions of American identity.
Credit Only Granted for: AAST440 or AAST498W.
Formerly: AAST498W.

AAST443 Asian American Politics (3 Credits)
Students will gain a greater understanding of 1) the role of Asian Americans in US politics, 2) the political attitudes and behaviors of Asian Americans and 3) how to conduct research on Asian American politics. Though the class will concentrate on Asian Americans, issues related to Asian American politics will be examined within the larger context of America's multicultural political landscape.Cross-listed with: AMST498J, GVPT368C.
Credit Only Granted for: AAST498T, AAST443, GVPT368C or AMST 498J.
Formerly: AAST498T.

AAST498 Advanced Topics in Asian American Studies (3 Credits)
Advanced study of the cultural and historical antecedents of contemporary Asian American society. Emphasis on the social, political, economic, and behavioral factors affecting Asian Americans and their communities.
Repeatable to: 6 credits if content differs.

AAST499 Senior Thesis (3 Credits)
Under the supervision of faculty, research regarding a specific topic of the Asian American experience will be completed.
Prerequisite: AAST201 and AAST200.
Restriction: Permission of UGST-Undergraduate Studies; and must be in Asian American Studies program.
Repeatable to: 6 credits if content differs.

AGNR - Agriculture and Natural Resources

AGNR489 Field Experience (1-4 Credits)
Credit according to time scheduled and organization of the course. A lecture series organized to study in depth a selected phase of agriculture not normally associated with one of the existing programs.
Restriction: Permission of AGNR-College of Agriculture & Natural Resources.
Repeatable to: 4 credits if content differs.
Formerly: AGRI489.

AGNR499 Special Problems (1-3 Credits)
Formerly: AGRI499.

AGNR606 Program Planning and Evaluation in Agricultural Education (2-3 Credits)
Second semester. Analysis of community agricultural education needs, selection and organization of course content, criteria and procedures for evaluating programs.
Formerly: AGRI606.

AGNR630 Teaching-Learning in Adult and Continuing Education (3 Credits)
The teaching/learning process in adult continuing education. Instructional techniques and methodologies appropriate for adults. The curriculum development process. Issues and priorities in adult continuing education.
Formerly: AGRI630.

AGNR661 Rural Community Analysis (3 Credits)
Communities as social systems composed of organizations which interact in a system of cultural institutions, norms, and values. Functional and structural linkages between organizations within as well as outside the community; rural vs. urban similarities and differences; and the role of the social processes such as competition, cooperation and conflict in the context of community power and leadership structure.
Formerly: AGRI661.

AGNR699 Special Problems (1-3 Credits)
Formerly: AGRI699.

AGNR789 Special Topics (1-3 Credits)
Repeatable to: 9 credits if content differs.
Formerly: AGRI789.

AGNR798 Seminar in Rural Education (1-3 Credits)
Problems in the organization, administration, and supervision of the several agencies of rural and/or vocational education.
Repeatable to: 8 credits if content differs.
Formerly: AGRI798.

AGNR799 Master's Thesis Research (1-6 Credits)
Formerly: AGRI799.

AGNR888 Apprenticeship in Education (1-8 Credits)
Apprenticeships in the major area of study are available to selected students whose application for an apprenticeship has been approved by the education faculty. Each apprentice is assigned to work for at least a semester full-time or the equivalent with an appropriate agency. The sponsor of the apprentice maintains a close working relationship with the apprentice and the other persons involved.
Prerequisite: Must have completed 6 credits in Education at the University of Maryland.
Restriction: Must have experience and must have a master's degree.
Formerly: AGRI888.

AGNR889 Internship in Education (3-8 Credits)
Internships in the major area of study for experienced students who are assigned to an appropriate school system, educational institution, or agency in a situation different than that in which the student is regularly employed.
Formerly: AGRI889.

AGNR899 Doctoral Dissertation Research (1-8 Credits)
Formerly: AGRI899.

AMSC - Applied Mathematics & Scientific Computation

AMSC420 Mathematical Modeling (3 Credits)
The course will develop skills in data-driven mathematical modeling through individual and group projects. Emphasis will be placed on both analytical and computational methods, and on effective oral and written presentation of results.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH461, MATH341); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (MATH246, MATH341); and 1 course with a minimum grade of C- from (STAT400, STAT410); and 1 course with a minimum grade C- from (CMSC106, CMSC131). Cross-listed with: MATH420.
Credit Only Granted for: AMSC420 or MATH420.

AMSC452 Introduction to Dynamics and Chaos (3 Credits)
An introduction to mathematical dynamics and chaos. Orbits, bifurcations, Cantor sets and horseshoes, symbolic dynamics, fractal dimension, notions of stability, flows and chaos. Includes motivation and historical perspectives, as well as examples of fundamental maps studied in dynamics and applications of dynamics.
Prerequisite: MATH341; or MATH246 and one of (MATH240 or MATH461). Cross-listed with: MATH452.
Credit Only Granted for: AMSC452 or MATH452.

AMSC460 Computational Methods (3 Credits)
Basic computational methods for interpolation, least squares, approximation, numerical quadrature, numerical solution of polynomial and transcendental equations, systems of linear equations and initial value problems for ordinary differential equations. Emphasis on methods and their computational properties rather than their analytic aspects. Intended primarily for students in the physical and engineering sciences.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (CMSC106, CMSC131); and minimum grade of C- in MATH246. Cross-listed with: CMSC460.
Credit Only Granted for: AMSC460, AMSC466, CMSC460, or CMSC466.

AMSC466 Introduction to Numerical Analysis I (3 Credits)
Floating point computations, direct methods for linear systems, interpolation, solution of nonlinear equations.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (CMSC106, CMSC131); and minimum grade of C- in MATH410. Cross-listed with: CMSC466.
Credit Only Granted for: AMSC460, CMSC460, AMSC466, or CMSC466.

AMSC498 Selected Topics in Applied Mathematics (1-3 Credits)
Topics in applied mathematics of special interest to advanced undergraduate students.
Repeatable to: 6 credits if content differs.

AMSC660 Scientific Computing I (3 Credits)
Fundamental techniques in scientific computation with an introduction to theory and software for each topic. Computer numbers and sources of errors, numerical linear algebra, optimization, and Monte Carlo methods.
Prerequisite: Must have knowledge of Matlab or Python. Cross-listed with: CMSC660.
Credit Only Granted for: AMSC660 or CMSC660.

AMSC661 Scientific Computing II (3 Credits)
Numerical methods for solving ordinary and partial differential equations (elliptic, parabolic, hyperbolic, and dispersive): motivation, analysis, and implementation. Finite difference methods, finite element methods, Fourier and Chebyshev spectral methods, and meshless methods.
Prerequisite: Must have knowledge of Matlab or Python. Must have basic knowledge of ordinary and partial differential equations (MATH246 and MATH462 or equivalent, or permission of instructor). Cross-listed with: CMSC661.
Credit Only Granted for: AMSC661 or CMSC661.

AMSC662 Computer Organization and Programming for Scientific Computing (3 Credits)
This course presents fundamental issues of computer hardware, software parallel computing, and scientific data management for programming for scientific computation.
Prerequisite: Must have Knowledge of C or Fortran. Cross-listed with: CMSC662.
Credit Only Granted for: AMSC662 or CMSC662.

AMSC663 Advanced Scientific Computing I (3 Credits)
In the sequence Advanced Scientific Computing I & Advanced Scientific Computing II, (CMSC663/CMSC663 and AMSC664/CMSC664, respectively) students work on a year-long individual project to develop software for a scientific task in a high performance computing environment. Lectures will be given on available computational environments, code development, implementation of parallel algorithms.
Prerequisite: AMSC660 or CMSC660; and (AMSC661 or CMSC661).
Restriction: Permission of instructor. Cross-listed with: CMSC663.
Credit Only Granted for: AMSC663 or CMSC663.

AMSC664 Advanced Scientific Computing II (3 Credits)
In the sequence Advanced Scientific Computing I & Advanced Scientific Computing II, (AMSC663/CMSC663 and CMSC664/CMSC664, respectively) students work on a year-long individual project to develop software for a scientific task in a high performance computing environment. Lectures will be given on available computational environments, code development, implementation of parallel algorithms.
Prerequisite: AMSC663 or CMSC663.
Restriction: Permission of instructor. Cross-listed with: CMSC664.
Credit Only Granted for: AMSC664 or CMSC664.

AMSC666 Numerical Analysis I (3 Credits)
Approximation theory, numerical solution of initial-value problems, iterative methods for linear systems, optimization.
Prerequisite: CMSC466 or AMSC466; and MATH410. Cross-listed with: CMSC666.
Credit Only Granted for: AMSC666 or CMSC666.

AMSC670 Ordinary Differential Equations I (3 Credits)
Existence and uniqueness, linear systems usually with Floquet theory for periodic systems, linearization and stability, planar systems usually with Poincare-Bendixson theorem.
Prerequisite: MATH405. Cross-listed with: MATH670.
Credit Only Granted for: AMSC670 or MATH670.

AMSC671 Ordinary Differential Equations II (3 Credits)
The content of this course varies with the interests of the instructor and the class. Stability theory, control, time delay systems, Hamiltonian systems, bifurcation theory, and boundary value problems.
Prerequisite: MATH630. Cross-listed with: MATH671.
Credit Only Granted for: AMSC671 or MATH671.

AMSC673 Partial Differential Equations I (3 Credits)
Analysis of boundary value problems for Laplace's equation, initial value problems for the heat and wave equations. Fundamental solutions, maximum principles, energy methods. First order nonlinear PDE, conservation laws. Characteristics, shock formation, weak solutions. Distributions, Fourier transform.
Prerequisite: MATH411; or students who have taken courses with comparable content may contact the department. Cross-listed with: MATH673.
Credit Only Granted for: AMSC673 or MATH673.

AMSC674 Partial Differential Equations II (3 Credits)
Boundary value problems for elliptic partial differential equations via operator-theoretic methods. Hilbert spaces of functions. Duality, weak convergence. Sobolev spaces. Spectral theory of compact operators. Eigenfunction expansions.
Prerequisite: MATH673 or AMSC673; or permission of instructor. Cross-listed with: MATH674.
Credit Only Granted for: AMSC674 or MATH674.

AMSC689 Research Interactions in Applied Mathematics and Scientific Computation (1-3 Credits)
The students participate in a vertically integrated (undergraduate, graduate and/or postdoctoral, faculty) research group. Format varies, but includes regular meetings, readings and presentations of material. See graduate program's online syllabus or contact the graduate program director for more information.
Restriction: Permission of instructor.
Repeatable to: 6 credits if content differs.

AMSC698 Advanced Topics in Applied Mathematics (1-4 Credits)
Repeatable to: 99 credits if content differs.

AMSC699 Applied Mathematics Seminar (1-3 Credits)
Seminar to acquaint students with a variety of applications of mathematics and to develop skills in presentation techniques.
Repeatable to: 99 credits if content differs.

AMSC714 Numerical Methods For Stationary PDEs (3 Credits)
Topics include: Maximum principle, finite difference method, upwinding, error analysis; Variational formulation of elliptic problems, inf-sup theory; The finite element method and its implementation; Piecewise polynomial interpolation theory in Sobolev spaces; A priori and a posteriori error analyses, adaptivity; Fast solvers; Variational crimes; Mixed finite element methods.
Prerequisite: One graduate level course in partial differential equations or one graduate level course in numerical analysis or scientific computing; or permission of instructor.
Credit Only Granted for: AMSC 714 or AMSC 614.
Formerly: AMSC614.
Additional Information: This course is a complement to the graduate courses MATH 673 and MATH 674 in PDEs, AMSC 666 in numerical analysis, and AMSC 660 and AMSC 661 in scientific computing.

AMSC715 Numerical Methods for Evolution Partial Differential Equations (3 Credits)
Topics include: Heat and wave equations: maximum principle, energy methods and Sobolev spaces, finite difference and finite element methods, von Neumann analysis, stability and error estimates;Linear first order PDEs: upwinding and monotone schemes, finite difference, finite volume, and discontinuous Galerkin methods; Nonlinear conservation laws: weak solutions and entropy conditions,monotone methods.
Prerequisite: Permission of instructor; or one graduate level course in partial differential equations or one graduate level course in numerical analysis or scientific computing.
Credit Only Granted for: AMSC612 or AMSC715.
Formerly: AMSC612.
Additional Information: This course continues AMSC 714, but can be taken independently, and is a complement to the graduate courses MATH 673 and MATH 674 in PDEs, AMSC 666 in numerical analysis, and AMSC 660 and AMSC 661 in scientific computing.

AMSC760 Applied Statistics Practicum (3 Credits)
A semester long applied applied statistical project (a minimum 10 hours per week or 120 hours in total), in an internship of collaborative research-laboratory setting working on a substantive applied quantitative project with significant statistical content.
Prerequisite: Must have completed one year of graduate study in Applied Statistics.
Restriction: Must have project proposal approved by SAC coordinator.

AMSC761 Applied Statistics Seminar (1 Credit)
Seminar taught once yearly on a rotating basis by faculty engaged in the Applied Statistics area. Required of AMSC Applied Statistics area doctoral students within one year following the completion of their practicum project, AMSC760, and open only to Applied Statistics Area students. The seminar will include sessions on presentation skills, but will consist primarily of oral presentations of students' past Practicum project results. Students attend throughout the term, give one talk (at least 1/2 hour).
Recommended: STAT700 or STAT701; and (STAT740 or STAT741).

AMSC762 Data Analysis Project (1 Credit)
This course cannot be used to meet any of the Applied Statistics Area's seminar requirements. Offered yearly, required of and limited to MS non-thesis and doctoral students in Applied Statistics Area, for whom the resulting projects serve as a Qualifying Exam component. After 5-6 lectures or presentations on components of successful data analyses and write-ups, 3-4 sessions will discuss previous student project submissions. The culminating project, to be completed in a two week period between semesters, is an analysis and written report of one of three project choices made available each year to represent a spectrum of realistic applied statistical problems.
Restriction: Permission of CMNS-Applied Mathematics department; and permission of instructor.

AMSC763 Advanced Linear Numerical Analysis (3 Credits)
Advanced topics in numerical linear algebra, such as dense eigenvalue problems, sparse elimination, iterative methods, and other topics.
Prerequisite: AMSC666 or CMSC666; or permission of instructor. Cross-listed with: CMSC763.
Credit Only Granted for: AMSC600, AMSC763, CMSC760, or CMSC763.
Formerly: AMSC600 and CMSC760.

AMSC764 Advanced Numerical Optimization (3 Credits)
Modern numerical methods for solving unconstrained and constrained nonlinear optimization problems in finite dimensions. Design of computational algorithms and the analysis of their properties.
Prerequisite: MATH410; or permission of instructor. Cross-listed with C MSC764.
Credit Only Granted for: AMSC607, AMSC764 or CMSC764. F ormerly: AMSC607.

AMSC799 Master's Thesis Research (1-6 Credits)

AMSC808 Advanced Topics in Applied Mathematics (1-3 Credits)
Advanced topics of current interest.
Restriction: Permission of instructor.
Repeatable to: 18 credits.

AMSC819 Applied Mathematics Seminar (1-3 Credits)
Advanced topics of current interest.
Restriction: Permission of instructor.
Repeatable to: 18 credits.

AMSC898 Pre-Candidacy Research (1-8 Credits)

AMSC899 Doctoral Dissertation Research (1-8 Credits)

AMST - American Studies

AMST418 Cultural Themes in America (3 Credits)
Examination of structure and development of American culture through themes such as "growing up American," "culture and mental disorders," "race," "ethnicity," "regionalism," "landscape," and "humor."
Repeatable to: 6 credits if content differs.

AMST418N Asian American Public Policy (3 Credits)
Using Asian Pacific Americans as a case study, this course will analyze the development of public policy in America. Each week, topics such as community development, voting rights, and the movement to redress the wartime internment of Japanese Americans will serve as backdrops for discussion. We will explore the policy-making roles of legislators, judges, local and national political leaders, journalists, writers, unions, social movements, and community organizations.Cross-listed with: AAST421.
Credit Only Granted for: AAST421, AAST498M or AMST418N.
Formerly: AAST498M.

AMST428 American Cultural Eras (3 Credits)
Investigation of a decade, period, or generation as a case study in significant social change within an American context. Case studies include "Antebellum America, 1840-1860" and "American culture in the Great Depression."
Repeatable to: 6 credits if content differs.

AMST429 Perspectives on Popular Culture (3 Credits)
Topics in popular culture studies, including the examination of particular genres, themes, and issues.
Repeatable to: 6 credits if content differs.

AMST450 Seminar in American Studies (3 Credits)
Developments in theories and methods of American Studies scholarship, with emphasis upon interaction between the humanities and the social sciences in the process of cultural analysis and evaluation.
Prerequisite: AMST201 and AMST340; and 1 course in AMST.
Restriction: Senior standing; and must be in American Studies program.

AMST498 Special Topics in American Studies (3 Credits)
Topics of special interest.
Repeatable to: 9 credits if content differs.

AMST498J Asian American Politics (3 Credits)
Students will gain a greater understanding of 1) the role of Asian Americans in US politics, 2) the political attitudes and behaviors of Asian Americans and 3) how to conduct research on Asian American politics. Though the class will concentrate on Asian Americans, issues related to Asian American politics will be examined within the larger context of America's multicultural political landscape.Cross-listed with: AAST443, GVPT368C.
Credit Only Granted for: AAST498T, AAST443, GVPT368C or AMST 498J.
Formerly: AAST498T.

AMST499 Independent Studies (1-3 Credits)
Provides the student with the opportunity to pursue independent, interdisciplinary research and reading in specific areas of American culture studies.
Restriction: Permission of ARHU-American Studies department; and must be in American Studies program.
Repeatable to: 6 credits if content differs.

AMST601 Introductory Theories and History in American Studies (3 Credits)
Explores the formative literature, theories, research approaches, and history of American Studies.
Restriction: Must not be a Graduate Advanced Special Student.

AMST602 Interdisciplinary Research Methods and Bibliographic Instruction (3 Credits)
Advanced instruction interdisciplinary research strategies, bibliography, and the structure of systems of scholarly communication in the fields and subfields of American Studies.

AMST603 Current Approaches to American Studies (3 Credits)
Builds on AMST601 and explores contemporary literature, theory, and intellectual issues in American Studies.
Restriction: Must be in one of the following programs (American Studies (Master's); American Studies (Doctoral)) . Or permission of ARHU-American Studies department; and permission of instructor.

AMST628 Seminar in American Studies (3 Credits)

AMST629 Seminar in American Studies (3 Credits)

AMST638 Orientation Seminar: Material Aspects of American Civilization (3 Credits)
Class meets at the Smithsonian.

AMST639 Reading Course in Selected Aspects of American Civilization (3 Credits)
Class meets at the Smithsonian.

AMST650 Material Culture Studies Theory (3 Credits)
Readings and analysis of canonical and current scholarly approaches to the study of material culture. Covers a wide range of material culture genres and subfields, and focuses on artifacts and the built environment.

AMST655 Introduction to Museum Scholarship (3 Credits)
Provides students a basic understanding of museums as cultural and intellectual institutions. Topics include the historical development of museums, museums as resources for scholarly study, and the museum exhibition as medium for presentation of scholarship.Cross-listed with: ANTH655, HIST610, INST653.
Credit Only Granted for: AMST655, ANTH655, HIST610, INST728T or INST653.

AMST659 Special Topics: Collaborative Curation (3 Credits)
This seminar considers the history of curation and curators within the institutional setting of museums and offers participants the opportunity, and challenge, to engage in curatorial practice by planning an exhibition that focuses on a critical aspect of life at and around the University of Maryland over the years.
Prerequisite: AMST655, ANTH655 or HIST610.
Recommended: AMST856, ANTH856, or HIST810; and AMST857, ANTH857 or HIST811.
Restriction: Must have permission of the Museum Studies and Material Culture program.
Repeatable to: 6 credits if content differs. Cross-listed with: ANTH659, HIST688, INST788.
Additional Information: Students enrolled in the MSMC (Museum Studies and Material Culture) certificate program will be given priority for enrollment.

AMST698 Directed Readings in American Studies (3 Credits)
This course is designed to provide students with the opportunity to pursue independent, interdisciplinary research and reading in specific aspects of American culture under the supervision of a faculty member.
Repeatable to: 6 credits if content differs.

AMST789 Professional Development in Dance and Theatre (1 Credit)
This course will introduce graduate students to the academic job market, competitive fellowships, and ALT-AC (alternative academic) careers. Topics will include the interdisciplinary job market, cover letters, cv's, teaching and research statements, the teaching/artist portfolio, the diversity statement, interfolio, letters of recommendation, writing samples, websites, interviewing, and careers beyond academia.
Repeatable to: 4 credits. Cross-listed with: TDPS789.
Formerly: THET669K, DANC689F.

AMST798 Non-Thesis Research (1-3 Credits)

AMST799 Master's Thesis Research (1-6 Credits)

AMST851 Interpretation of Cultural Landscapes (3 Credits)
A research seminar that provides students an opportunity to survey the principal approaches to studying a cultural landscape, learn how to apply and adapt a field research method, and produce a primary research report on a cultural landscape of their choice.

AMST856 Museum Research Seminar (3 Credits)
A research seminar focusing on the practice and presentation of cultural and historical scholarship in museums and historical sites. Students will complete an original research project on the challenges and opportunities of public exhibition and interpretation of cultural and historical research.
Prerequisite: AMST655, ANTH655, or HIST610. Cross-listed with: ANTH856, HIST810, INST786.
Credit Only Granted for: AMST856, ANTH856, HIST810, INST728U or INST786.

AMST857 Museum Scholarship Practicum (3-6 Credits)
Students devise and carry out a research program using the collections at the Smithsonian Institution or some other cooperating museum, working under joint supervision of a museum professional and a university faculty member.
Prerequisite: AMST856, ANTH856, or HIST810.
Restriction: Permission of Museum Scholarship Program required. Cross-listed with: ANTH857, HIST811, INST787.
Credit Only Granted for: AMST857, ANTH857, HIST811, INST728I or INST787.

AMST878 American Studies Pedagogy Mentoring (1-3 Credits)
This course provides graduate teaching assistants with a structured approach to pedagogical content, techniques, and collaborative practices that they learn and then can use throughout their careers. It also commits a core faculty member to teaching pedagogy and makes it possible for the course to become a formal part of one's load.
Restriction: Must be an AMST graduate assistant.
Repeatable to: 12 credits.

AMST898 Pre-Candidacy Research (1-8 Credits)

AMST899 Doctoral Dissertation Research (1-8 Credits)

ANSC - Animal Science

ANSC410 The Gut Microbiome and its Roles in Health and Disease (3 Credits)
A comprehensive perspective of the role of gut microbiome/microflora in nutrition, metabolism, disease prevention and health issues including farm animal health and food value, and human gastrointestinal health and immunity.
Prerequisite: BSCI223, ANSC212, ANSC327, EPIB301, BSCI222, BSCI421, or NFSC430; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: ANSC489M or ANSC410.
Formerly: ANSC489M.

ANSC417 Regulatory Issues in Animal Care and Management (3 Credits)
A study of regulatory issues affecting animal care and management in the livestock industry. Guest speakers and classroom discussions will focus on key topics including animal welfare, feed and drug regulations, animal identification, CAFO management, processing and marketing of animal products.
Prerequisite: ANSC220, ANSC232, ANSC242, ANSC250, ANSC255, ANSC260, ANSC262, or ANSC282; or permission of instructor.
Additional Information: Field trips may be required for this course.

ANSC435 Experimental Embryology (3 Credits)
Experimental approaches to mammalian embryology with emphasis on domestic livestock systems as applied to research and production systems. Lab will include hands-on experiments and demos of in vitro embryo production, embryo splitting, cell injection and nuclear transfer.
Prerequisite: ANSC212.
Recommended: Completion of one course in reproductive physiology is recommended.
Credit Only Granted for: ANSC435 or ANSC489M.
Formerly: ANSC489M.

ANSC436 Animal Health Policy and Communication (3 Credits)
Intended for upper level students in Veterinary Medicine or Animal Science as well as other students who are interested in understanding how science and politics interact and influence animal health policy and how veterinarians and animal scientists can effectively communicate science to non-scientists such as legislators and policymakers.
Recommended: Completion of ANSC225 and ANSC340 recommend.
Restriction: Must be in a major within the AGNR-Animal & Avian Sciences department; or permission of AGNR-VA-MD Regional COL Veterinary Med.
Cross-listed with: VMSC436.
Credit Only Granted for: ANSC489A, ANSC436, or VMSC436.
Formerly: ANSC489A.

ANSC437 Animal Biotechnology (3 Credits)
Key concepts and current issues in animal biotechnology are covered. Current techniques and applications systems as well as social, ethical, and regulatory issues associated with biotechnology will be discussed.
Prerequisite: ANSC327; or students who have taken courses with comparable content may contact the department.

ANSC440 Zoonotic Diseases and Control (3 Credits)
Global perspective of foodborne diseases common to animals and man, specifically those caused by farm animal-originated human pathogens (zoonoses) and their control. A selection of important zoonoses and food safety issues will be specifically covered with an emphasis on the principles of zoonotic disease transmission and control, risk factors to humans, and surveillance methods.
Prerequisite: BSCI223, ANSC212, ANSC327, BSCI222, BSCI421, or NFSC430; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: ANSC440 or ANSC489R.
Formerly: ANSC489R.

ANSC443 Physiology of Lactation (3 Credits)
A comprehensive survey of lactation in laboratory and domestic animals. Other species are discussed where possible. Emphasis will be placed on physiological aspects of milk synthesis and secretion and on the cellular and molecular biology of mammary gland development.
Prerequisite: ANSC212; and CHEM231 or PLSC275.
Recommended: BCHM463.

ANSC444 Domestic Animal Endocrinology (3 Credits)
Current developments in endocrinology as it relates to animals used in the production of food and other products important to the well being of humans will be covered.
Prerequisite: ANSC212; or permission of instructor.
Restriction: Must not have completed ANSC644.
Credit Only Granted for: ANSC489I, ANSC444, or ANSC644.
Formerly: ANSC489I.

ANSC445 Comparative Digestive Physiology (3 Credits)
Comparative gastrointestinal physiology and the pathophysiology of diseases involved in animal-related research. A comparative approach will be presented for much of this material, using the human, canine, porcine, equine, bovine, and avian when information is available. The ultimate aim of the course is to provide a comprehensive knowledge of comparative gastrointestinal pathophysiology, and to give students an insight into the current field of human and veterinary gastroenterology. Students should feel more comfortable reading cutting edge literature by the end of the course, and should acquire a greater understanding of potential digestive disease areas for their future career such as graduate, medical, and veterinary students.
Prerequisite: ANSC212.

ANSC446 Physiology of Mammalian Reproduction (3 Credits)
Anatomy and physiology of reproductive processes in domesticated and wild mammals.
Prerequisite: ANSC212 or BSCI440.

ANSC447 Physiology of Mammalian Reproduction Laboratory (1 Credit)
Gross and micro-anatomy, artificial insemination, estrous cycle synchronization and invitro-fertilization procedures and analytical techniques useful in animal management and reproduction.
Prerequisite: Must have completed or be concurrently enrolled in ANSC446.

ANSC450 Animal Breeding Plans (3 Credits)
Design of animal breeding programs for the genetic improvement of livestock and companion animal species. Principles of population and quantitative genetics. Genetic evaluations of animals, selection strategies and crossbreeding systems. Incorporation of statistics and biotechnology into animal breeding plans.
Prerequisite: ANSC101; and 1 course with a minimum grade of C- from (MATH120, MATH130, MATH136, MATH140).
Restriction: Junior standing or higher.

ANSC452 Avian Physiology (3 Credits)
The digestive, excretory, respiratory, circulatory, immune, skeletal muscle, endocrine and nervous systems of avian species will be examined.
Prerequisite: ANSC212.
Restriction: Junior standing or higher.

ANSC453 Animal Welfare and Bioethics (3 Credits)
Ethical concerns related to the use of animals in modern society. Historical and philosophical overview of animal welfare and bioethics. Applied ethical discussions on human/animal interrelationships, physical and genetic manipulation, and other current issues associated with the treatment of animals used in food production, research, zoos, and as pets.
Prerequisite: ANSC101 and ANSC103; or BSCI106; or (BSCI160 and BSCI161); or permission of instructor.
Restriction: Junior standing or higher.

ANSC454 Nutritional Aspects of Metabolic Disease (3 Credits)
Biochemical and physiological fundamentals of nutrition. Discussion of protein, fat,carbohydrate, minerals and vitamins and their roles and interrelationships innutrition, metabolism and diseases in humans and animals. The course will use recommended texts for foundation material as well as research papers to provide in-depth coverage and illustrate emerging themes in metabolic aspects of nutrition and disease.
Prerequisite: CHEM131 and ANSC101, or BSCI170; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: ANSC4890 or ANSC454.
Formerly: ANSC489O.

ANSC455 Applied Animal Behavior (3 Credits)
Principles of animal behavior applied to production systems in animal agriculture.
Prerequisite: ANSC101 and ANSC103; or BSCI106; or (BSCI160 and BSCI161).

ANSC460 Comparative Vertebrate Immunology (3 Credits)
Basic concepts in immunology, and comparing immunity in different vertebrates, including organization of immune systems, innate and adaptive immune responses. Special attention will be paid to how cell-mediated and humoral immune responses are induced in natural infections, and what are the effector mechanisms in both of these processes. Immune response in representative disease models such as infections with viruses and bacteria, cancer, and autoimmune disease will be discussed. Lectures concerning cutting-edge research will also be given.
Prerequisite: ANSC212, BSCI201, or BSCI440.
Credit Only Granted for: ANSC460 or ANSC489I.
Formerly: ANSC489I.

ANSC489 Current Topics in Animal Science (1-3 Credits)
Examination of current developments in the animal sciences.
Repeatable to: 6 credits if content differs.

ANSC497 Animal Biotechnology Recombinant DNA Laboratory (3 Credits)
An advanced course offering hands-on experience in performing recombinant DNA experiments. Current molecular biology techniques used for cloning genes, analyzing the gene products, and modifying the genes of animals will be performed. Techniques include isolation of DNA, use of restriction enzymes; cloning procedures, PCR analysis, and Southern hybridizations. Lecture material focuses on interpretation of results generated in the laboratory.
Prerequisite: ANSC327; or students who have taken courses with comparable content may contact the department.
Recommended: ANSC437 and ANSC435.

ANSC617 Quantative Techniques in Physiology and Nutrition (3 Credits)
Development and evaluation of quantative techniques to explore mechanisims of physiological and nutritional regulation. Kinetic and dynamic models will be emphasized.
Prerequisite: MATH120; or permission of AGNR-Animal & Avian Sciences department.

ANSC624 Recent Advances in Animal and Avian Sciences (1 Credit)
Seminar course in advanced animal science research.
Restriction: Must be an Animal Sciences graduate student.
Credit Only Granted for: ANSC698C or ANSC624.
Formerly: ANSC698C.

ANSC625 Developing Presentation Skills (1 Credit)
Seminar designed to teach oral presentation skills for animal science students.
Restriction: Must be an Animal Sciences graduate student.
Credit Only Granted for: ANSC625 or ANSC698D.
Formerly: ANSC698D.

ANSC627 Molecular and Quantitative Genetics (3 Credits)
Classical, molecular, and population genetics with specific emphasis on animal systems will be covered. Also, disseminate information on molecular approaches for manipulating genetics at the whole animal level (transgenic and cloning). Other model organisms will be discussed to provide a conceptual framework.

ANSC644 Molecular and Cellular Endocrinology (3 Credits)
A comprehensive course covering the major endocrine systems in animals. Lecture topics include major endocrine axes, hormonal regulation of homeostasis, growth and reproduction, and endocrine mechanisms of action. Advanced concepts in the molecular and cell biology of hormone action and regulation addressed in weekly discussion sessions centered on current research publications in the field of molecular and cellular endocrinology.
Restriction: Must not have completed ANSC444.
Credit Only Granted for: ANSC444,ANSC489I, ANSC644, or ANSC688I.
Formerly: ANSC688I.

ANSC660 Poultry Literature (1-4 Credits)
Readings on individual topics are assigned. Written reports required. Methods of analysis and presentation of scientific material are discussed.

ANSC688 Special Topics (1-4 Credits)
Lectures, experimental courses, and other special subjects in the fields of animal sciences and veterinary medicine.
Repeatable to: 4 credits.

ANSC698 Seminar (1 Credit)
Students are required to prepare papers based upon current scientific publications relating to animal science, or upon their research work, for presentation before and discussion by the class; (1) recent advances; (2) nutrition; (3) physiology; (4) biochemistry.

ANSC699 Special Problems in Animal Science (1-2 Credits)
Work assigned in proportion to amount of credit. Prerequisite: approval of staff. Problems will be assigned which relate specifically to the character of work the student is pursuing.

ANSC799 Master's Thesis Research (1-6 Credits)

ANSC898 Pre-Candidacy Research (1-8 Credits)

ANSC899 Doctoral Dissertation Research (1-8 Credits)

ANTH - Anthropology

ANTH407 Anthropology and Development (3 Credits)
An examination of the intersection of Anthropology, international development and foreign policy. The course provides students with conceptual tools to engage with international development and other assistance projects in areas including conservation and climate change, governance and human security, gender, human rights, and political stability from a variety of viewpoints.Jointly offered with: ANTH607.
Credit Only Granted for: ANTH407 or ANTH607.

ANTH411 Global Migration and Health (3 Credits)
The United Nations estimates that some 230 million people around the world are migrants who live outside their country of birth. This course focuses on these migrant populations, considering the implications of movement across borders and settlement in new societies on their health and well-being. We will investigate the social, political, and economic structures that shape disease and illness and produce differential access to health care for migrants. Within that context, we will explore the health effects of migration itself and particular health conditions from which migrants suffer. We will also examine how migrants interface with differently configured health care systems as well as strategies they and their advocates use to promote health and well-being.Jointly offered with: ANTH611.
Credit Only Granted for: ANTH411 or ANTH611.

ANTH412 Hypermarginality and Urban Health (3 Credits)
Using perspectives from medical and urban anthropology, we examine the phenomenon of hypermarginality--the clustering of extreme poverty, chronic disease, addiction, violence and trauma in certain social and spatial contexts, often urban. We will explore both the broader social, political, and economic structures of exclusion that produce hypermarginality, as well as the illness experiences associated with these conditions. As we consider both social suffering and the related institutional responses, we will also discuss the role of anthropological approaches in national discussions about health inequities.
Credit Only Granted for: ANTH412 or ANTH612.

ANTH413 Health Disparities in the United States (3 Credits)
Powerful economic, political, social, and cultural forces shape who gets sick, what illnesses/diseases they get, how they are treated while seeking care, what treatment options they have, and what their ultimate health outcomes are. The goal of the course is to understand these processes through the lens of critical medical anthropology
Credit Only Granted for: ANTH468Q, ANTH688Q, ANTH413, or ANTH613.
Formerly: ANTH468Q.

ANTH415 Critical Global Health (3 Credits)
Extends understandings of diverse health conditions facing world populations today and the science being made around them. Critically examines key issues in global aid and public health, with an emphasis on the theories, concepts, and methods of anthropology.
Recommended: ANTH210, ANTH310, or ANTH265 or a similar course focused on global health or medical anthropology course. Jointly offered with: ANTH615.
Credit Only Granted for: ANTH415 or ANTH615.

ANTH416 Anthropology of Global Violence (3 Credits)
An examination of anthropological approaches to the study of violence, drawing from key texts to analyze how violence operates along a continuum: from routine, sometimes invisible forms of violence embedded in everyday life, to more overt and exceptional forms. Consideration of the role of ethnography in elucidating both the subjective experiences of violence and the ways in which violence is embedded in institutions, structures, and global political-economic processes. Analysis of the specific relationships between violence, health, mental health, and trauma in local and global contexts.Jointly offered with ANTH616.
Credit Only Granted for: ANTH468O, ANTH66 8O, ANTH416 or ANTH616.
Formerly: ANTH468O.

ANTH421 Nutritional Anthropology (3 Credits)
The study of nutrition from an anthropological perspective which includes both biological and cultural aspects of nutrition. We will explore how nutrition can affect culture how culture can affect nutrition. Nutritional anthropology includes the study of cross-cultural variation in diet, nutritional status and subsistence systems as well as variation in these factors over the evolutionary course of human existence, from prehistoric and historic to modem times. Students will be introduced to nutritional anthropology and provided with the basics for assessing reliability and feasibility of nutritional advice and policy encountered in everyday modern life in a global setting.
Credit Only Granted for: ANTH421, ANTH428N, or ANTH621.
Formerly: ANTH428N.

ANTH422 Human-Plant-(Human & Bioactive Plant) Interaction (3 Credits)
This seminar course will discuss the evolutionary, historical, cultural, and ecological aspects of coevolution with respect to humans and their interactions with specific bioactive plants. Case studies of human- plant-(pathogen) interactions will be discussed as well as an inclusive survey of anthropologically important phytochemicals. The seminar incorporates human-plant-(pathogen) interactions into models of human evolution and ecology.
Prerequisite: ANTH220 and ANTH320; or permission of BSOS-Anthropology department.
Credit Only Granted for: ANTH422.
Formerly: ANTH428I.

ANTH424 Human Skeletal Anatomy (3 Credits)
In addition to descriptive information about bone identification, the lectures will address the history of human anatomical studies, the development of analytical techniques, and the application of these techniques in paleoanthropology, comparative anatomy, functional anatomy (and related fields, such as physical therapy), and skeletal analysis in museum, historic cemetery, archaeological, and forensic settings. Emphasis will be on the development of the skeleton and recognition of normal variation in bones. The laboratory sessions will allow the students access to human bones for the purpose of identification, documentation of human variation, and application of techniques to obtain information about the living individual from the skeleton.

ANTH428 Special Topics in Bioanthropology (3 Credits)
Advanced research courses in biological anthropology on changing topics that correspond to new theoretical interests, faculty research interests, or the specialties of visiting scholars. Prerequisites or background knowledge vary with the topic. Check with the department for requirements.
Repeatable to: 6 credits if content differs.

ANTH429 Advanced Special Topics in Biological Anthropology (3 Credits)
Upper level biological anthropology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.
Repeatable to: 6 credits if content differs.

ANTH433 Archaeology of Slavery: Classical, Caribbean and North American Contexts (3 Credits)
Has slavery always existed? Does it come and go? North American plantation archaeology has become one of the foundations for understanding African American culture from the 1960s. Slavery in Antiquity existed in Greece and Rome on large scales and was essential to making commercial agriculture profitable work. Slavery in the Caribbean showed Europeans how to make a profit from African bodies. Trafficking in human persons today is recorded by the U.S. State Department annually and is regarded as modern slavery. These varying contexts of slavery will be compared in an attempt to understand slavery scientifically.Jointly offered with: ANTH633.
Credit Only Granted for: ANTH433 or ANTH633.

ANTH435 Archaeological Ethnography and Heritage Ethnography (3 Credits)
Archaeologists and other heritage experts are increasingly incorporating ethnographic approaches as part of their methodological toolkit. This course explores key methods and frameworks in archaeological ethnography and heritage ethnography, set within the broader contexts of the historical development of anthropological theory and the current rapid growth of heritage studies as an interdisciplinary field of research and practice.Jointly offered with: ANTH635.
Credit Only Granted for: ANTH435 or ANTH635.

ANTH438 Special Topics in Study Abroad IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ANTH440 Theory and Practice of Historical Archaeology (3 Credits)
Historical archaeology enhances cultural heritage by providing voice for groups who were often unable to record their own histories, such as women, laborers, working class families, and enslaved people. The course provides insight into issues related to race, gender, and ethnicity as they relate to multicultural histories.
Prerequisite: ANTH240. Jointly offered with ANTH640.
Credit Only Granted for: ANTH440 or ANTH640.

ANTH441 Archaeology of Diaspora (3 Credits)
"Diaspora" is defined, theorized, deconstructed, and employed throughout the social sciences. There are context specific relations that define who leaves, when, and how they are received in the new place of settlement. Over the course of the semester the class will actively and critically examine the relevance of historical archaeology and material culture studies in the understanding of the formation, experiences, and transformation of diasporic groups over time and space.
Prerequisite: ANTH240.
Credit Only Granted for: ANTH448A, ANTH688Z, or ANTH441.
Formerly: ANTH448A.

ANTH442 Public Archeology (3 Credits)
Explores the uses and environments for archaeological work through a discussion of museum, electronic media, heritage settings, outdoor history museums, including the legal environment that offers protection for archaeological remains. The course exposes students to the majority of cultural media within which archaeology is currently practiced. The interdisciplinary course is a survey of the progress made within and beyond anthropology in understanding the function of heritage, public memory, tourism, and the other popular uses of materials from the past, including the progress made in linguistics psychology and other cognitive disciplines in understanding the purpose of the past.
Credit Only Granted for: ANTH442, ANTH448V, or ANTH642.
Formerly: ANTH448V.

ANTH444 Theories of the Past (3 Credits)
The primary purpose is to highlight some of the key achievements made by archaeologists in informing questions of interest to society from 1850 on. Key achievements include how archaeologists understand elements of the past thought to be central to the development of modern socieity. A secondary purpose is to introduce students to the theories used to understand the place of the past in society and the function of answers to questions thought central to modern social life.
Prerequisite: ANTH240. Jointly offered with ANTH740.
Credit Only Granted for: ANTH448P, ANTH444, or ANTH740.
Formerly: ANTH448P.

ANTH445 Laboratory Methods in Archaeology (3 Credits)
The processing, curation, cataloging and analysis of data is an important part of any archaeology field project. Students will learn that basics of laboratory techniques necessary for the final analysis and interpretation of field data.
Prerequisite: ANTH496.
Recommended: ANTH240.

ANTH447 Material Culture Studies in Archaeology (3 Credits)
An in-depth introduction to the world of material culture studies with a focus on the methods and theories in historical archaeology. Students will look at archaeological data as historical documents, commodities and as symbols expressing ideas.
Prerequisite: ANTH240.
Credit Only Granted for: ANTH447, ANTH448C, ANTH647, or ANTH689C.
Formerly: ANTH448C.

ANTH448 Special Topics in Archaeology (3 Credits)
Advanced topics in archaeological research, corresponding to new theoretical developments, faculty research interests, or specialties of visiting scholars. Prerequisites may vary with course topic; check with the department for requirements.
Prerequisite: ANTH240.
Repeatable to: 6 credits if content differs.

ANTH449 Advanced Special Topics in Archaeology (3 Credits)
Upper level archaeology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.
Repeatable to: 6 credits if content differs.

ANTH450 Theory and Practice of Environmental Anthropology (3 Credits)
An overview of contemporary application of cultural theory and methods to environmental problems. Topics include the use of theories of culture, cognitive approaches, discourse analysis, and political ecology. Case studies from anthropology, other social sciences, humanities, conservation, and environmental history are used to demonstrate the applied value of a cultural-environmental approach.
Restriction: Junior standing or higher. Jointly offered with ANTH650.
Credit Only Granted for: ANTH450 or ANTH650.

ANTH451 Environmental Archaeology (3 Credits)
An overview of modern environmental archaeology as a tool for the interdisciplinary investigation of past and present global change and to engage the long term past with current issues of sustainability and rapid environmental change.
Credit Only Granted for: ANTH451, ANTH651, ANTH448F, ANTH668F.
Formerly: ANTH448F.

ANTH452 Anthropology and Climate Change (3 Credits)
Human activities now influence ongoing global climatic change, and the outcome remains uncertain for communities and cultures around the world. This interaction between humans and climate provides a rich area of study for anthropologists in an interdisciplinary context. Case studies of historic and contemporary evidence will be used to understand impacts of global climate change and assess opportunities and barriers to successful responses and adaptation.
Prerequisite: ANTH220, ANTH222, ANTH240, or ANTH260.
Credit Only Granted for: ANTH452 or ANTH652.

ANTH453 Archaeology of the Modern City (3 Credits)
An overview of how social scientists, in particular historical archaeologists, approach modern cities as being part of the materiality of the social structure and order.
Prerequisite: ANTH240; or permission of instructor.
Credit Only Granted for: ANTH448Q or ANTH453.
Formerly: ANTH448Q.

ANTH454 Political Ecology (3 Credits)
The use of the environment is contested and negotiated within historic and contemporary societies. Incorporating methods and perspectives from across the social sciences through specific case studies in the Americas, Europe, Asia and Africa, this course offers a survey to coupled human-environmental systems.Jointly offered with: ANTH654.
Credit Only Granted for: ANTH454 or ANTH654.

ANTH456 Conservation and Indigenous People in South America (3 Credits)
Considers indigenous peoples and their relation to the lands on which they live, issues of traditional indigenous knowledge and land management as well as new contributions by indigenous peoples to changing landscapes. Reviews legal mechanisms and instruments through which indigenous peoples have rights to the resources they occupy and utilize. Taking specific cases and examining them through the lens of political and social ecology, the role of indigenous peoples in local and worldwide conservation efforts is considered. Case studies will emphasize the indigenous peoples and conservation policies of Latin America.Jointly offered with: ANTH656.
Credit Only Granted for: ANTH468L, ANTH456, ANTH688L, or ANTH656.
Formerly: ANTH468L.

ANTH461 Language as Practice (3 Credits)
An introduction to linguistic variation and the construction of identity, relationship, and community membership through language use. The approach emphasizes language as community-based practice and examines the dynamic construction of social relations through linguistic interactions.Jointly offered with: ANTH661.
Credit Only Granted for: ANTH461, ANTH468I or ANTH661.
Formerly: ANTH468I.

ANTH462 Amazon Through Film (3 Credits)
An interdisciplinary course that utilizes film to consider the Amazon basin, its history, peoples, and landscapes through cinematic representations. The course places the films in the context of film history and critical theory. The course takes into consideration the Brazilian, North American, Mexican, European and Argentine creators of the films and their visions of Amazonia, as well as the audiences and markets to which the films are intended.
Credit Only Granted for: ANTH468D or ANTH462.
Formerly: ANTH468D.

ANTH463 Climate Cultures (3 Credits)
Climate change is an inherently global problem. To a significant degree, its causes and consequences are cultural in nature: Climate change impacts, mitigation and adaptation efforts are perceived and addressed in culture-specific ways. This course will be an overview of the holistic and anthropological approaches to the study of how culture frames what we know and how we respond to climate change. Readings, lectures, and discussions will focus on how culture is expressed through the interplay of processes and practices in specific economic, social and political contexts.

ANTH464 Anthropology of Cultural Heritage (3 Credits)
A global exploration of how the past is remade in the present. Covers the breadth of scope and specific interventions of heritage practice at the global scale, including the social, political, economic, and ethical dimensions of cultural heritage.
Prerequisite: ANTH260. Jointly offered with ANTH664. Credit only grant ed for: ANTH469T, ANTH689T, ANTH464, ANTH664.
Formerly: ANTH469T.

ANTH465 Ethnoecology: Nature, Knowledge and People (3 Credits)
Introduces theory and methodology from ethnoecology, the study of human relationships with and knowledge about the environment. Students will examine human relationships with both biotic (e.g. plants and animals) and abiotic (e.g. glaciers, weather) elements of ecological systems to better understand how knowledge frameworks and cultural practices shape human experiences of the natural world. The history of ethnoecology as a discipline will be covered, before moving to case studies where different ecological knowledge systems come into contact via conservation projects, bioprospecting, and other contemporary issues. Involves both discussion and project-based learning with GIS, cultural domain analysis, and ethnographic methods.
Credit Only Granted for: ANTH465 or ANTH688E.

ANTH466 Anthropology of Work (3 Credits)
Examines the concept and meaning of work, the different types of work, and how the development of time discipline became essential for the creation of capitalist labor. Explores the contemporary social justice movement and its impact on gender and racialized inequities. Includes an exploration of deindustrialized regions in the Rust Belt.Jointly offered with: ANTH666.
Credit Only Granted for: ANTH466 or ANTH666.

ANTH467 Researching Environment and Culture (3 Credits)
In this applied course, students use mixed methods to research a locally-based, environmental sustainability issue. Classroom time will be split between seminar discussions of theory, methods, and relevant case studies, and lab work focused on project development, data analysis, and report write up. Students are expected to spend additional time outside class on data collection, analysis, and writing
Recommended: ANTH322, ANTH360, ENSP101, or ENSP102.

ANTH468 Special Topics in Cultural Anthropology (3 Credits)
Advanced courses in varying specialty areas of cultural anthropology that respond to new theoretical developments, faculty research interests, or specialties of visiting scholars.
Repeatable to: 6 credits if content differs.

ANTH469 Advanced Special Topics in Cultural Anthropology (3 Credits)
Upper level cultural anthropology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.
Repeatable to: 6 credits if content differs.

ANTH473 Native American Languages and Cultures (3 Credits)
An introduction to Native American Languages and Cultures from a linguistic anthropological perspective. Topics to be explored include Native American identities, the stucture of Native languages, oral traditions, narrative story-telling, Native language and thought (Sapir/Whorf), language shift, linguistic revitalization, documentation of endangered languages, indigenous representation and appropriation, and racializing discourses.Jointly offered with: ANTH673.
Credit Only Granted for: ANTH473 or ANTH673.

ANTH474 Language Racism & Identity (3 Credits)
An exploration of the relationship between language, identity and racism in a variety of social contexts, in the U.S. and elsewhere.Jointly offered with: ANTH674.
Credit Only Granted for: ANTH474, ANTH469R, ANTH674, or ANTH689R.

ANTH476 Senior Research (3-4 Credits)
Capstone course in which students pursue independent research into a current problem in anthropology, selected with assistance of a committee of faculty. Research leads to the writing of a senior thesis in anthropology.
Restriction: Must be in Anthropology program.
Credit Only Granted for: ANTH476 or ANTH486.

ANTH477 Senior Thesis (3-4 Credits)
Capstone course in which students write a senior thesis on independent research into a current problem in anthropology. The thesis is defined before a committee of faculty.
Prerequisite: ANTH476.
Restriction: Permission of BSOS-Anthropology department; and must be in Anthropology program.
Credit Only Granted for: ANTH477 or ANTH487.

ANTH478 Special Topics in Linguistics (3 Credits)
Advanced courses in specialty areas that respond to new theoretical developments and faculty research interests in linguistics.
Recommended: LING200.
Repeatable to: 6 credits if content differs.

ANTH481 Environmental Ethnographies of Asia (3 Credits)
Examines social and ecological environments in Asia through the lens of classic and contemporary ethnographies from across the continent. Considers how cultural, political and economic dynamics interact with ecological systems in both recurring and unexpected ways. Ethnographies include case studies of global commodity chains, technoscientific management, borders and migration, conservation, and local knowledge as they intersect with changing environments.
Credit Only Granted for: ANTH481 or ANTH681.

ANTH485 Honors Research Preparation (3 Credits)
Honors Research Preparation is an independent study course during which the Honors candidate will work with their Honors Thesis Advisor to establish not only the structure of the thesis and timeline, but also the formation of Thesis Review Committee.
Restriction: Permission of BSOS-Anthropology department; and must be in Anthropology program; and must be admitted to University Honors Program or Anthropology Honors Program.

ANTH486 Honors Research (3-4 Credits)
Capstone course in which students pursue independent research into a current problem in anthropology, selected with assistance of a committee of faculty. Research leads to the writing of an honors thesis in anthropology.
Restriction: Permission of BSOS-Anthropology department; and must be in Anthropology program; and must be admitted to University Honors Program or Anthropology Honors Program.
Credit Only Granted for: ANTH486 or ANTH476.

ANTH487 Honors Thesis (3-4 Credits)
Capstone course in which students write a thesis on the results of independent research into a current problem in anthropology.
Prerequisite: ANTH486.
Restriction: Permission of BSOS-Anthropology department; and must be in Anthropology program; and must be admitted to University Honors Program or Anthropology Honors Program.
Credit Only Granted for: ANTH487 or ANTH477.

ANTH496 Field Methods in Archaeology (6 Credits)
Field training in the techniques of archaeological survey and excavation.

ANTH498 Advanced Field Training in Ethnography (1-8 Credits)
Experience in field research utilizing a variety of ethnographic methods of inquiry.
Repeatable to: 6 credits if content differs.
Credit Only Granted for: ANTH498 or ANTH698.

ANTH601 Applied Anthropology (3 Credits)
An overview of the history and current practices of applied anthropology. This includes relationships between applied anthropology and other major subfields of the profession; the interdisciplinary and public context of applied anthropology; and problems of significance, utility, and ethics associated with applied anthropology.

ANTH606 Qualitative Methods in Applied Anthropology (3 Credits)
An introduction to the use of ethnography and qualitative methods in applied and policy contexts. Qualitative methods discussed include informal and systematic approaches. Students undertake fieldwork in local settings to practice the qualitative methods and to develop analysis and report writing skills.

ANTH607 Anthropology and Development (3 Credits)
An examination of the intersection of Anthropology, international development and foreign policy. The course provides students with conceptual tools to engage with international development and other assistance projects in areas including conservation and climate change, governance and human security, gender, human rights, and political stability from a variety of viewpoints.Jointly offered with: ANTH407.
Credit Only Granted for: ANTH407 or ANTH607.

ANTH611 Global Migration and Health (3 Credits)
The United Nations estimates that some 230 million people around the world are migrants who live outside their country of birth. This course focuses on these migrant populations, considering the implications of movement across borders and settlement in new societies on their health and well-being. We will investigate the social, political, and economic structures that shape disease and illness and produce differential access to health care for migrants. Within that context, we will explore the health effects of migration itself and particular health conditions from which migrants suffer. We will also examine how migrants interface with differently configured health care systems as well as strategies they and their advocates use to promote health and well-being.Jointly offered with: ANTH411.
Credit Only Granted for: ANTH411 or ANTH611.

ANTH612 Hypermarginality and Urban Health (3 Credits)
Using perspectives from medical and urban anthropology, we examine the phenomenon of hypermarginality--the clustering of extreme poverty, chronic disease, addiction, violence and trauma in certain social and spatial contexts, often urban. We will explore both the broader social, political, and economic structures of exclusion that produce hypermarginality, as well as the illness experiences associated with these conditions. As we consider both social suffering and the related institutional responses, we will also discuss the role of anthropological approaches in national discussions about health inequities.Jointly offered with ANTH412.
Credit Only Granted for: ANTH412 or ANTH612.

ANTH613 Health Disparities in the United States (3 Credits)
Powerful economic, political, social, and cultural forces shape who gets sick, what illnesses/diseases they get, how they are treated while seeking care, what treatment options they have, and what their ultimate health outcomes are. The goal of the course is to understand these processes through the lens of critical medical anthropologyJointly offered with ANTH413.
Credit Only Granted for: ANTH413, ANTH469 Q, ANTH689Q, or ANTH613.
Formerly: ANTH689Q.

ANTH615 Critical Global Health (3 Credits)
Extends understandings of diverse health conditions facing world populations today and the science being made around them. Critically examines key issues in global aid and public health, with an emphasis on the theories, concepts, and methods of anthropology.Jointly offered with: ANTH415.
Credit Only Granted for: ANTH415 or ANTH615.

ANTH616 Anthropology of Global Violence (3 Credits)
An examination of anthropological approaches to the study of violence, drawing from key texts to analyze how violence operates along a continuum: from routine, sometimes invisible forms of violence embedded in everyday life, to more overt and exceptional forms. Consideration of the role of ethnography in elucidating both the subjective experiences of violence and the ways in which violence is embedded in institutions, structures, and global political-economic processes. Analysis of the specific relationships between violence, health, mental health, and trauma in local and global contexts.
Credit Only Granted for: ANTH416 or ANTH616.

ANTH620 Environment and Society (3 Credits)
Students will obtain foundational knowledge of core theories and methods that integrate cultural and socio-economic research into environmental science. Key topics include: coupled natural and human systems, cultural models of the environment, social networks, ecological economics, political ecology, environmental justice, and science communication.Cross-listed with: MEES620.
Credit Only Granted for: ANTH620 or MEES620.
Additional Information: Offered over the interactive video network.

ANTH629 Advanced Developments in Biological Anthropology (3 Credits)
Graduate biological anthropology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.
Restriction: Permission of BSOS-Anthropology department.
Credit Only Granted for: ANTH429 or ANTH629.

ANTH630 Quantification and Statistics in Applied Anthropology (3 Credits)
An intensive overview of key quantitative and statistical approaches used by social scientists in applied ad policy research. This includes nonparametric and parametric statistical approaches. Students utilize statistical software and analyze existing and student-created databases. Anthropological case studies are emphasized.
Restriction: Must be in one of the following programs (Anthropology (Doctoral); Anthropology (Master's)).

ANTH633 Archaeology of Slavery: Classical, Caribbean and North American Contexts (3 Credits)
Has slavery always existed? Does it come and go? North American plantation archaeology has become one of the foundations for understanding African American culture from the 1960s. Slavery in Antiquity existed in Greece and Rome on large scales and was essential to making commercial agriculture profitable work. Slavery in the Caribbean showed Europeans how to make a profit from African bodies. Trafficking in human persons today is recorded by the U.S. State Department annually and is regarded as modern slavery. These varying contexts of slavery will be compared in an attempt to understand slavery scientifically.Jointly offered with: ANTH433.
Credit Only Granted for: ANTH433 or ANTH633.

ANTH635 Archaeological Ethnography and Heritage Ethnography (3 Credits)
Archaeologists and other heritage experts are increasingly incorporating ethnographic approaches as part of their methodological toolkit. This course explores key methods and frameworks in archaeological ethnography and heritage ethnography, set within the broader contexts of the historical development of anthropological theory and the current rapid growth of heritage studies as an interdisciplinary field of research and practice.Jointly offered with: ANTH435.
Credit Only Granted for: ANTH435 or ANTH635.

ANTH640 Advanced Studies in Theory and Practice of Historical Archaeology (3 Credits)
Historical archaeology enhances cultural heritage by providing voice for groups who were often unable to record their own histories, such as women, laborers, working class families, and enslaved people. The course provides insight into issues related to race, gender, and ethnicity as they relate to multicultural histories.Jointly offered with ANTH440.
Credit Only Granted for: ANTH440 or ANTH6 40.

ANTH641 Introduction to Zooarchaeology (3 Credits)
Zooarchaeology is the study of animal remains, especially bones, from archaeological contexts. This course will address both methodology as well as many of the main issues in contemporary zooarchaeology. Zooarchaeology stands at the intersection of a number of social and biological sciences, such as Biology, Osteology, Ecology, History, Anthropology and Economics. We will discuss basic animal osteology and the concepts and practices behind the identification of animal remains from archaeological contexts. We will cover the nature of the data in zooarchaeology, especially issues around using proxy data.Jointly offered with ANTH341.
Credit Only Granted for: ANTH298D, ANTH34 1 or ANTH641.

ANTH643 Anthropological Approaches to Geographic Information Science (3 Credits)
A practical introduction to GIS program use, including the production of archaeological and other maps, profiles, and integrated presentations of plans, photographs, texts, an other digitally available materials, as well as research applications in applied biological and cultural anthropology.
Credit Only Granted for: ANTH448S, ANTH643, or ANTH689S.

ANTH647 Advanced Material Culture Studies in Archaeology (3 Credits)
An in-depth introduction to the world of material culture studies with a focus on the methods and theories in historical archaeology. Students will look at archaeological data as historical documents, commodities and as symbols expressing ideas.
Credit Only Granted for: ANTH447, ANTH448C, ANTH647, or ANTH689C.
Formerly: ANTH689C.

ANTH649 Advanced Developments in Archaeology (3 Credits)
Graduate Archaeology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.
Restriction: Permission of BSOS-Anthropology department.
Repeatable to: 6 credits if content differs.

ANTH650 Advanced Studies in Theory and Practice of Environmental Anthropology (3 Credits)
An overview of contemporary application of cultural theory and methods to environmental problems. Topics include the use of theories of culture, cognitive approaches, discourse analysis, and political ecology. Case studies from anthropology, other social sciences, humanities, conservation, and environmental history are used to demonstrate the applied value of a cultural-environmental approach.Jointly offered with ANTH450.
Credit Only Granted for: ANTH450 or ANTH6 50.

ANTH651 Environmental Archaeology (3 Credits)
An overview of modern environmental archaeology as a tool for the interdisciplinary investigation of past and present global change and to engage the long term past with current issues of sustainability and rapid environmental change.
Credit Only Granted for: ANTH448F, ANTH451, ANTH688F, or ANTH651.
Formerly: ANTH688F.

ANTH652 Anthropology and Climate Change (3 Credits)
Human activities now influence ongoing global climatic change, and the outcome remains uncertain for communities and cultures around the world. This interaction between humans and climate provides a rich area of study for anthropologists in an interdisciplinary context. Case studies of historic and contemporary evidence will be used to understand impacts of global climate change and assess opportunities and barriers to successful responses and adaptation.Jointly offered with ANTH452.
Credit Only Granted for: ANTH452 or ANTH6 52.

ANTH654 Political Ecology (3 Credits)
The use of the environment is contested and negotiated within historic and contemporary societies. Incorporating methods and perspectives from across the social sciences through specific case studies in the Americas, Europe, Asia and Africa, this course offers a survey to coupled human-environmental systems.Jointly offered with: ANTH454.
Credit Only Granted for: ANTH454 or ANTH654.

ANTH655 Introduction to Museum Scholarship (3 Credits)
Provides students a basic understanding of museums as cultural and intellectual institutions. Topics include the historical development of museums, museums as resources for scholarly study, and the museum exhibition as medium for presentation of scholarship.Cross-listed with: AMST655, HIST610, INST653.
Credit Only Granted for: AMST655, ANTH655, HIST610, INST728T or INST653.

ANTH659 Special Topics: Collaborative Curation (3 Credits)
This seminar considers the history of curation and curators within the institutional setting of museums and offers participants the opportunity, and challenge, to engage in curatorial practice by planning an exhibition that focuses on a critical aspect of life at and around the University of Maryland over the years.
Prerequisite: AMST655, ANTH655 or HIST610.
Recommended: AMST856, ANTH856, or HIST810; and AMST857, ANTH857 or HIST811.
Restriction: Must have permission of the Museum Studies and Material Culture program.
Repeatable to: 6 credits if content differs. Cross-listed with: AMST659, HIST688, INST788.
Additional Information: Students enrolled in the MSMC (Museum Studies and Material Culture) certificate program will be given priority for enrollment.

ANTH661 Language as Practice (3 Credits)
An introduction to linguistic variation and the construction of identity, relationship, and community membership through language use. The approach emphasizes language as community-based practice and examines the dynamic construction of social relations through linguistic interactions.Jointly offered with: ANTH461.
Credit Only Granted for: ANTH468I, ANTH461, or ANTH661.

ANTH664 Anthropology of Cultural Heritage (3 Credits)
A global exploration of how the past is remade in the present. Covers the breadth of scope and specific interventions of heritage practice at the global scale, including the social, political, economic, and ethical dimensions of cultural heritage.
Credit Only Granted for: ANTH469T, ANTH689T, ANTH464 or ANTH664.
Formerly: ANTH689T.

ANTH665 Method & Theory in Medical Anthropology and Global Health (3 Credits)
Provides a critical perspective to global health that encompasses key political, economic, and cultural factors associated with the nature and magnitude of global health issues such as HIV/AIDS, tuberculosis and malaria, paying particular attention to how poverty and inequalities within and between societies has accelerated current global health challenges. Introduces students to how medical anthropologists have contributed to the debates surrounding the globalization of health.
Credit Only Granted for: ANTH310, ANTH465 or ANTH665.

ANTH666 Anthropology of Work (3 Credits)
Examines the concept and meaning of work, the different types of work, and how the development of time discipline became essential for the creation of capitalist labor. Explores the contemporary social justice movement and its impact on gender and racialized inequities. Includes an exploration of deindustrialized regions in the Rust Belt.Jointly offered with: ANTH466.
Credit Only Granted for: ANTH466 or ANTH666.

ANTH669 Advanced Developments in Cultural Anthropology (3 Credits)
Graduate cultural anthropology courses on varying topics derived from new interests of the faculty or the specialties of visiting scholars.
Restriction: Permission of BSOS-Anthropology department.
Repeatable to: 6 credits if content differs.

ANTH672 Advanced Studies in Medical Anthropology (3 Credits)
An exploration of the cultural, social, economic and political dimensions of health, disease, and illness. These dimensions will be examined through both the health-seeker's and the care-provider's perspectives.
Credit Only Granted for: ANTH472, ANTH468L, ANTH672, or ANTH688L.
Formerly: ANTH688L.

ANTH673 Native American Languages and Cultures (3 Credits)
An introduction to Native American Languages and Cultures from a linguistic anthropological perspective. Topics to be explored include Native American identities, the stucture of Native languages, oral traditions, narrative story-telling, Native language and thought (Sapir/Whorf), language shift, linguistic revitalization, documentation of endangered languages, indigenous representation and appropriation, and racializing discourses.Jointly offered with: ANTH473.
Credit Only Granted for: ANTH673 or ANTH473.

ANTH674 Language Racism & Identity (3 Credits)
This course explores the relationship between language, identity and racism in a variety of social contexts, in the U.S. and elsewhere.Jointly offered with: ANTH474.
Credit Only Granted for: ANTH474, ANTH469R, ANTH674, or ANTH689R.

ANTH688 Current Developments in Anthropology (3 Credits)
Detailed investigation of a current problem or research technique, the topic to be chosen in accordance with faculty interests and student needs.
Repeatable to: 9 credits if content differs.

ANTH689 Special Problems in Anthropology (1-6 Credits)

ANTH692 Anthropology of the Immigrant Life Course (4 Credits)
Explores social issues affecting local immigrant populations through readings, research and service learning. Theorizing immigration as a social policy issue in the U.S. culture, students learn about the specific contributions that anthropology has made to the understanding of immigration: globalization on the one hand, and the context of daily life in local neighborhoods on the other.Jointly offered with ANTH492.
Credit Only Granted for: ANTH 492, ANTH69 2, ANTH498N, ANTH689N.
Formerly: ANTH689N.

ANTH696 Field Methods in Archaeology (6 Credits)
Field training in the techniques of archaeological survey and excavation.
Formerly: ANTH699.

ANTH698 Advanced Field Training in Ethnology (1-6 Credits)
Experience in field research utilizing a variety of enthnographic methods of inquiry.
Repeatable to: 6 credits if content differs.
Credit Only Granted for: ANTH498 or ANTH698.

ANTH701 Anthropology Internship Preparation (3 Credits)
Preparation for internship includes practicum training in development, presentation and evaluation of position papers, proposals and work plans; literature search and use of secondary data sources in decision making the effect cultural analysis and resource management; ethics and professional development for work in non-academic settings.

ANTH712 Anthropology Internship Analysis (3 Credits)
The preparation and presentation of internship results, and the development of skills in report writing and presentation. Includes the completion of a professional quality report or publishable paper based on the internship experience.
Prerequisite: ANTH789.

ANTH722 Ecological Anthropology (3 Credits)
An overview of important approaches to ecological anthropology. Population, systems, community, political, behavioral and evolutionary ecology will be examined as they have been applied to a range of anthropological questions. Complexity theory (nonlinear dynamics) and topics in game theory will also be addressed. Students will map the field of ecological anthropology and to assess the strengths and weaknesses of contemporary approaches, methods and theories.
Restriction: Must be in one of the following programs (Anthropology (Doctoral); Anthropology (Master's)).
Credit Only Granted for: ANTH720 or ANTH722.

ANTH740 Theories of the Past and Accomplishments of Archaeology (3 Credits)
The primary purpose is to highlight some of the key achievements made by archaeologists in informing questions of interest to society from 1850 on. Key achievements include how archaeologists understand elements of the past thought to be central to the development of modern socieity. A secondary purpose is to introduce students to the theories used to understand the place of the past in society and the function of answers to questions thought central to modern social life.
Credit Only Granted for: ANTH689P or ANTH740.
Formerly: ANTH689P.

ANTH741 Introduction to Cultural and Heritage Resource Management (3 Credits)
An introduction to the field of cultural and heritage resource management. Examines existing international, national, and local frameworks for the protection of cultural heritage. Provides an overview of employment opportunities and ethical responsibilities within the profession.
Restriction: Must be in the Cultural and Heritage Resource Management Master or Post-Baccalaureate Certificate of Professional Studies Programs; or by permission of the Anthropology department.

ANTH742 Advanced Methods in CRM (3 Credits)
An examination of the range of nondestructive technologies used to research and image cultural and heritage resources. Standard archaeological survey methods will be covered and will focus on remote sensing technologies and how an integrated approach to archaeological investigation can reveal vital information for resource planning, interpretation, and outreach.
Restriction: Must be in the Cultural and Heritage Resource Management Program (CHRM); or by permission of the Anthropology department.

ANTH743 Community Engagement and Consultation (3 Credits)
A grounding in cultural communication and sensitivity to community, cultural, and stakeholder needs within and beyond project specific confines. Using the broader context of practicing anthropology in the exploration of communication styles, learning styles, and cultural biases and taboos, students are exposed to underlying concepts concerning inter-cultural communication so that they may develop more collaborative approaches to research. The program also provides background in the development of public outreach programs in the context of cultural and heritage resource management.
Restriction: Must be in the Cultural and Heritage Resource Management Program (CHRM); or by permission of the Anthropology department.

ANTH744 Collections, Data Management and Cultural Materials Preservation (3 Credits)
An overview of the process of collecting cultural materials and samples with the goal of obtaining as much information during analysis as possible followed by content relating to archaeological curation and collections management. Provides information on the preservation of cultural materials from the time they leave the field until they are placed in a certified collections facility.
Restriction: Must be in the Cultural and Heritage Resource Management Program (CHRM); or by permission of the Anthropology department.

ANTH745 International Heritage Management (3 Credits)
An examination of international heritage management practices and global ethical and professional norms in order to contextualize domestic cultural resource management in the US. The survey will also explore the linkages and areas for growth between international and domestic heritage practice.
Restriction: Must be in the Cultural and Heritage Resource Management Program; or by permission of the Anthropology department.

ANTH746 Applied Archaeological Theory (3 Credits)
Does cultural and heritage resources management (CHRM) need theory? Can archeological theory help us understand CHRM conventions and configurations, and does CHRM have its own distinctive contribution to make to archaeological theory? This course explores these questions while surveying the key areas of theory that inform the work that CHRM practitioners do, and also the place of CHRM in cultural discourse.
Restriction: Must be in the Cultural and Heritage Resource Management Program; or by permission of the Anthropology department.

ANTH747 Business of CRM (3 Credits)
An overview of the skills necessary for success in managing a CRM program. Students will learn how CRM organizations market and manage clients, prepare and submit budgets and proposals, and coordinate technical staff to successfully complete projects. Topics will address the range of issues that owners and managers are confronted with in their oversight of projects, including the management of employees, ethics and professional responsibilities, ensuring health and safety, and meeting the many contractual obligations of CRM projects.
Restriction: Must be in the Cultural and Heritage Resource Management Masters Program (MPCH) or certificate (Z121) ; or by permission of the Anthropology department.

ANTH749 Cultural and Heritage Resource Management Internship (1-6 Credits)
An internship/practicum that would contribute to students' understanding of the overall process of CHRM. Students who are already working in CRM or a closely related field may use their employment as their practicum if the opportunity is available for them to learn beyond their current job duties.
Restriction: Must be in the Cultural and Heritage Resource Management Program (CHRM).
Repeatable to: 12 credits if content differs.

ANTH751 Project Management (3 Credits)
This capstone class for the MPS in CHRM provides students with a grounding in the critical thinking processes necessary during each stage of the CRM process. It provides students with insights into the processes used as research questions are translated into data and then into an evaluative report. Students review examples of appropriate and inappropriate technical reports and then analyze the reports to understand the thinking processes necessary for project management to provide the client with the documentation necessary for completing the compliance process.
Restriction: Must be in the Cultural and Heritage Resource Management Master's Program (MPCH) or certificate (Z121) ; or by permission of the Anthropology department.

ANTH760 Development of Social/Cultural Theory (3 Credits)
A broad perspective of the history of social cultural theory in anthropology and the critical skills needed for understanding the subdiscipline is provided. An overview of the history of theorizing about society and culture will help outline the past, present, and future of anthropology and its relations with other scientific and humanistic disciplines.

ANTH788 Internship Research (1-3 Credits)
This course augments ANTH 789 and is graded in conjunction with it.
Prerequisite: ANTH701.
Restriction: Permission of BSOS-Anthropology department; and must be in one of the following programs (Anthropology (Master's); Anthropology (Doctoral)).

ANTH789 Internship (3-6 Credits)
Individual instruction course supervised by a department faculty member.
Prerequisite: ANTH701.
Repeatable to: 6 credits if content differs.
Formerly: ANTH705.

ANTH799 Master's Thesis Research (1-6 Credits)

ANTH856 Museum Research Seminar (3 Credits)
A research seminar focusing on the practice and presentation of cultural and historical scholarship in museums and historical sites. Students will complete an original research project on the challenges and opportunities of public exhibition and interpretation of cultural and historical research.
Prerequisite: AMST655, ANTH655, or HIST610. Cross-listed with: AMST856, HIST810, INST786.
Credit Only Granted for: AMST856, ANTH856, HIST810, INST728U or INST786.

ANTH857 Museum Scholarship Practicum (3-6 Credits)
Students devise and carry out a research program using the collections at the Smithsonian Institution or some other cooperating museum, working under joint supervision of a museum professional and a university faculty member.
Prerequisite: AMST856, ANTH856, or HIST810.
Restriction: Permission of Museum Scholarship Program required. Cross-listed with: AMST857, HIST811, INST787.
Credit Only Granted for: AMST857, ANTH857, HIST811, INST728I or INST787.

ANTH898 Pre-Candidacy Research (1-8 Credits)

ANTH899 Doctoral Dissertation Research (1-6 Credits)

AOSC - Atmospheric and Oceanic Science

AOSC400 Physical Meteorology (3 Credits)
The application of basic classical physics, chemistry and mathematics to the study of the atmosphere. Composition of the atmosphere; energy sources and sinks (radiation in the atmosphere; radiative balance and radiative forcing of atmospheric processes); atmospheric thermodynamics; clouds and precipitation physics; atmospheric electricity and optics; mesoscale processes (e.g., orographic mesoscale phenomena and instabilities); air mass boundaries; severe weather, tropical cyclones; storms; global circulation.
Prerequisite: 1 course with a minimum grade of C- from (PHYS171, PHYS161, MATH141); or permission of CMNS-Atmospheric & Oceanic Science department.

AOSC401 Climate Dynamics and Earth System Science (3 Credits)
Introduction of the earth and global climate systems and their major components: atmosphere, land, ocean, biosphere and cryosphere. Key processes governing the function of the earth's climate: Global energy balance and water cycle, climate dynamics (general circulation of the atmosphere and ocean) and climate physics (aerosol, cloud and rain), as well as climate variability and climate changes. Phenomena resulting from this coupled system including El Nino-Southern Oscillation, monsoons, and the hydrological cycle will be discussed, with a focus on how the Earth System responds to global warming.
Prerequisite: AOSC400 or AOSC200; and MATH141; and (PHYS161 or PHYS171). Or permission of instructor.

AOSC420 Physical Oceanography (3 Credits)
Ocean observations. Water masses, sources of deep, intermediate, and surface water. Mass, heat, and salt transport, and the meridional overturning circulation. Geochemical tracers and cycles, including carbon. Western boundary currents, mixed layers, and processes maintaining the thermocline. Coastal and estuarine processes. Surface waves and tides. the ocean's role in climate.
Prerequisite: MATH141 and PHYS141.
Recommended: AOSC200. Also offered as: GEOL670, AOSC670.
Credit Only Granted for: AOSC420, AOSC670, or GEOL670.

AOSC424 Remote Sensing of the Atmosphere and Ocean (3 Credits)
Many of the properties of the atmosphere, ocean, and land surface are most easily observed from satellite remote sensing. This course will provide students with a hands-on introduction to a variety of passive and active sensing techniques and sensors observing our changing environment. Topics include: orbital dynamics and electromagnetic properties of the atmosphere and surface; atmospheric emission characteristics and scattering; chemical composition and spectroscopy; temperature retrievals; detection and retrieval of aerosol, cloud and rain; ocean surface properties; sea surface temperature and color; active sensing of wind stress, sea level, and internal waves; time-dependent gravity; properties of vegetation and ice.
Prerequisite: 1 course with a minimum grade of C- from (PHYS171, PHYS161, MATH141); or permission of instructor.

AOSC431 Atmospheric Thermodynamics (3 Credits)
Classical thermodynamics applied to both the dry and the moist atmosphere. Composition; phase changes of water; stability concepts; Properties of aerosols and clouds, cloud nucleation and precipitation processes, atmospheric electricity, cloud and precipitation chemistry.
Prerequisite: 1 course with a minimum grade of C- from (PHYS171, PHYS161, MATH141).
Recommended: MATH246.

AOSC432 Dynamics of the Atmosphere and Ocean (3 Credits)
Equations of motion and their approximation, scale analysis for the atmosphere and the ocean. Conservation properties. Fluid motion in the atmosphere and oceans. Geostrophic/balanced and ageostrphic/unbalanced motion. Circulation, vorticity, and potential vorticity. Introduction to the boundary layer.
Prerequisite: AOSC431.
Corequisite: MATH246.
Credit Only Granted for: AOSC432 or AOSC632.
Formerly: METO432.

AOSC434 Air Pollution and Environmental Justice (3 Credits)
Basic concepts in physics and chemistry of the atmosphere as applied to air pollution and environmental justice. Production, transformation, spatial scales, transport, and removal of air pollutants. The problems of photochemical smog, the greenhouse effect & climate change, stratospheric ozone, visibility. Numerical simulation of air pollution. Health and environmental effects of air pollution in the developed and developing world; why some communities suffer disproportionately
Prerequisite: CHEM131 and MATH241; or permission of instructor.

AOSC436 Principles of Biogeochemistry (3 Credits)
An introduction to the basic principles of biogeochemistry including aspects of organic geochemistry, biochemistry, microbiology, global geochemical cycles, the origin of life and paleoenvironmental evolution.
Prerequisite: MATH120 or MATH140; or must have completed MATH220. And (GEOL100 or GEOL120); and GEOL322. And CHEM131 and CHEM132; or (CHEM135 and CHEM136).
Restriction: Non-degree-seeking students require the permission of the instructor. Cross-listed with: GEOL436.
Credit Only Granted for: GEOL436 or AOSC436.

AOSC437 Global Climate Change: Past and Present (3 Credits)
Introduction to the processes by which climate varies, the paleoclimate record, and projections of climate change into the 21st century, including discussion of climate sensitivity to external radiative forcing.
Prerequisite: MATH115 or MATH140; and (GEOL100 or GEOL120); and (CHEM131 or CHEM135); and (CHEM132 or CHEM136). Cross-listed with: GEOL437.
Credit Only Granted for: AOSC437 or GEOL437.

AOSC447 Machine Learning in Earth Science (3 Credits)
A comprehensive introductory course designed to prepare undergraduate and graduate students for applying machine learning techniques to solve real-world problems in Earth science. It emphasizes practical solution implementation, providing students with essential hands-on experience using the most popular open-source analytics tools based on Python, a general-purpose programming language. The course works through all steps in machine learning, from problem specification, data analytics to analytical solution, and applies advanced statistical and analytical algorithms to uncover hidden data relationships and transform them into predictive understanding or decision support. The topics covered include: Python programming, SciPy and Scikit-learn utility, data engineering, visualization, classifiers, regression models, canonical correlation analysis, structural equation models, decision trees, random forests, boosting machines, support vector machines, clustering, dimensionality reduction, principal component analysis, and neural networks.
Prerequisite: Must have completed MATH140.

AOSC458 Advanced Topics in Atmospheric and Oceanic Science (1-4 Credits)
Special topics in atmospheric and oceanic science are given intensive study. The topic of concentration varies, from semester to semester and depends on student and faculty interests. Often, specialists from other institutions are invited to the campus on a visiting lectureship basis to conduct the course.
Repeatable to: 12 credits.

AOSC462 Ecohydrology (3 Credits)
Focuses on the study of hydrologically-controlled ecosystems, e.g. systems in which either excess and/or deficit of water and nutrients are determinants of its structure and function. Such systems have complex dynamic characteristics that depend on many interrelated links between climate, soil and vegetation.
Prerequisite: MATH240, MATH241 and MATH246; or permission of instructor. Jointly offered with: AOSC662.
Credit Only Granted for: AOSC462 or AOSC662.

AOSC463 Water and Climate Systems (3 Credits)
Focuses on exploring the relationships between water, climate, land, energy, and the economy (the so called "nexus") through an interwoven understanding of the physical, economic, and institutional relationships and constraints that influence management and decision-making process in water supply, energy generation and food production. The course emphasizes the use of integrated assessment (IA) modeling tools as a way to formalize these relationships and explore their implications. Lectures will be complemented with online discussion sessions and applied modeling exercises to get hands-on knowledge of practical solutions to nexus challenges.
Prerequisite: MATH240, MATH241 and MATH246; or permission of instructor. Jointly offered with: AOSC663.
Credit Only Granted for: AOSC463 or AOSC663.
Additional Information: This course is offered through a joint effort of the Earth System Science Interdisciplinary Center (ESSIC, part of UMDb Sciences) and the Joint Global Change Research Institute (a collaboration between UMD and the US Dept of Energyb Northwest National Laboratory).

AOSC470 Synoptic Meteorology (3 Credits)
Atmospheric properties and observations, meteorological analysis and charts, operational numerical forecasts. Application of quasigeostrophic theory, baroclinic instability, midlatitiude and mesoscale weather systems. Tropical meteorology. Weather forecasting using numerical and statistical models. Prediction of weather phenomena on the global, syoptic, meso, and local scales. Analysis of surface and upper air data; Norwegian cyclone model; introduction to weather forecasting.
Prerequisite: Minimum grade of C- in AOSC431 and AOSC432.
Credit Only Granted for: AOSC470, AOSC600, or METO600.

AOSC472 Mesoscale Meteorology (3 Credits)
Survey a broad range of mesoscale meteorological features with emphasis on convection and associated phenomena. Define the mesoscale and understand its underlying principles; Introduce non-convective circulations and their importance for weather forecasting; Understand the precursors and occurrence of deep moist convection.
Prerequisite: AOSC432, AOSC600, AOSC610, or AOSC470.
Restriction: Non-degree-seeking students require the permission of the instructor. Jointly offered with: AOSC602.
Credit Only Granted for: AOSC472 or AOSC602.

AOSC475 Carbon Cycle and Climate: Past, Present, and Future (3 Credits)
The fundamentals of the Earth's carbon cycle, a key biogeochemical cycl that controls Earth's climate and life. The changing characteristics of the carbon cycle on several timescales, ranging from geological, interannual, and the more recent anthropogenic influences on carbon cycle and climate. The carbon cycle in the atmosphere, land, ocean, and the biosphere. The underlying human activities such as fossil fuel burning and deforestation that are responsible for the increase in the atmosphere CO2 and our future options in dealing with the carbon problem such as alternative energy and carbon sequestration.Jointly offered with: AOSC675.
Credit Only Granted for: AOSC475 or AOSC6 75.

AOSC480 Introduction to Earth System Science (3 Credits)
Focuses on exploring the relationships between the atmosphere, the oceans, water, climate, land, vegetation, energy, and human systems through an interwoven understanding of the physical, biogeochemical and socioeconomic relationships and constraints that influence management and decision-making processes in societal issues such as water supply, power generation, food production, ecosystem services and others. The course introduces integrated assessment (IA) science as a framework to formalize these relationships and explore their implications.
Prerequisite: MATH240, MATH241 and MATH246; or permission of instructor. Jointly offered with: AOSC680.
Credit Only Granted for: AOSC480 or AOSC680.
Additional Information: This course is offered through a joint effort of the Department of Atmospheric and Oceanic Science (AOSC) and the Earth System Science Interdisciplinary Center (ESSIC).

AOSC484 Climate System Modeling (3 Credits)
Fundamentals in building computer models to simulate the components of the climate system: atmosphere, ocean ice, land-surface, terrestrial and marine ecosystems, and the biogeochemical cycles embedded in the physical climate system, in particular, the carbon cycle. Simple to state-of-the-art research models to tackle problems such as the Daisy World, El Nino and global warming.Jointly offered with: AOSC684.
Credit Only Granted for: AOSC484 or AOSC6 84.

AOSC493 Senior Research Project I (3 Credits)
Technical writing and oral presentation skills. Planning, writing, and presenting a plan for research in the geosciences.
Prerequisite: Permission of CMNS-Atmospheric & Oceanic Science department.
Restriction: Must be in Atmospheric and Oceanic Science program; or permission of instructor.

AOSC494 Atmospheric and Oceanic Science Seminar (1 Credit)
Exposure to a wide range of contemporary topics in atmospheric, oceanic, and climate sciences, to foster research interests and promote critical thinking through the weekly AOSC departmental seminar series.
Prerequisite: Minimum grade of C- in AOSC431 and AOSC432.
Restriction: Permission of the Atmospheric and Oceanic Science Department.

AOSC498 Senior Research Project II (3 Credits)
The project will be based on the research or development plan created in AOSC493. It may be completed with the approval of a faculty advisor in conjunction with an internship. Final written thesis and oral defense will be expected.
Prerequisite: AOSC493.

AOSC499 Special Problems in Atmospheric Science (1-3 Credits)
Research or special study in the field of meteorology and the atmospheric and oceanic sciences.
Prerequisite: Permission of CMNS-Atmospheric & Oceanic Science department.
Repeatable to: 6 credits.

AOSC600 Synoptic Meteorology I (3 Credits)
Atmospheric properties and observations, meteorological analysis and charts, operational numerical forecasts. Application of quasigeostrophic theory, baroclinic instability, midlatitude and mesoscale weather systems. Tropical meteorology.
Prerequisite: AOSC610.

AOSC602 Mesoscale Meteorology (3 Credits)
Survey a broad range of mesoscale meteorological features with emphasis on convection and associated phenomena. Define the mesoscale and understand its underlying principles; Introduce non-convective circulations and their importance for weather forecasting; Understand the precursors and occurrence of deep moist convection.

AOSC610 Dynamics of the Atmosphere and Ocean I (3 Credits)
Equations of motion and their approximation, scale analysis for the atmosphere and the ocean. Conservation properties. Fluid motion in the atmosphere and oceans. Circulation and vorticity, geostrophic motion and the gradient wind balance. Turbulence and Ekman Layers.
Prerequisite: Must have completed or be concurrently enrolled in MATH462; or students who have taken courses with comparable content may contact the department.

AOSC611 Dynamics of the Atmosphere and Oceans II (3 Credits)
Waves and instabilities in the atmosphere and the ocean. Gravity, Rossby, coastal and equatorial waves. Flow over topography. Dynamic instabilities including barotropic, baroclinic, inertial, and instabilities of the coupled ocean-atmosphere system. Stationary waves and multiple equilibria.

AOSC614 Atmospheric Modeling, Data Assimilation and Predictability (3 Credits)
Solid foundation for atmospheric and oceanic modeling and numerical weather prediction: numerical methods for partial differential equations, an introduction to physical parameterizations, modern data assimilation, and predictability.
Prerequisite: AOSC610; or permission of instructor.

AOSC615 Data Assimilation (3 Credits)
An overview of fundamental methods of data assimilation. Theory, techniques, potentials, and strategies of these methods, as well as their possible drawbacks. Hands-on experimentation through applications.

AOSC617 Atmospheric and Oceanic Climate (3 Credits)
The general circulation of the atmosphere and oceans, historical perspective, observations, and conceptual models; wind-driven and thermohaline circulation of the oceans. Seasonal cycle and monsoon circulations; interannual to interdecadal climate variability; climate change.
Prerequisite: AOSC610; or permission of instructor.

AOSC620 Physics and Chemistry of the Atmosphere I (3 Credits)
Air parcel thermodynamics and stability; constituent thermodynamics and chemical kinetics. Cloud and aerosol physics and precipitation processes.
Prerequisite: MATH461; or students who have taken courses with comparable content may contact the department.

AOSC621 Physics and Chemistry of the Atmosphere II (3 Credits)
Spectroscopy; basic concepts in radiative transfer and atmospheric chemistry; photolysis rates for atmospheric molecules.
Prerequisite: MATH462; or students who have taken courses with comparable content may contact the department.

AOSC624 Remote Sensing of Surface Climate (3 Credits)
The theory and principles of remote sensing as applicable to earth observing satellites. Discussed will be current methods to interpret satellite observations into useful climate parameters. Emphasis will be placed on parameters that provide information about the climate close to the earth surface, and that can be inferred on regional to global scales. Examples are: surface temperature and reflectivity, radiation budgets, soil moisture, and vegetation cover.
Prerequisite: MATH240 and MATH241.

AOSC625 Remote Inference of Atmospheric Properties by Satellite (3 Credits)
Fundamentals of radiative transfer concepts, theories and models pertinent to remote sensing. Satellite platforms, sensors and systems used for operation and research in atmospheric remote sensing. Concepts and technologies of passive and active remote sensing. Remote sensing methods and products of atmospheric constituents, aerosol, cloud, precipitation, temperature and water vapor profiles, precipitation in liquid and ice forms, radiation budget, and remote sensing application in data assimilation for numerical weather forecast (NWP); use of atmospheric remote sensing products for development of global climate model (GCM).

AOSC630 Statistical Methods in Meteorology and Oceanography (3 Credits)
Parametric and non-parametric tests; time series analysis and filtering; wavelets. Multiple regression and screening; neural networks. Empirical orthogonal functions and teleconnections. Statistical weather and climate prediction, including MOS, constructed analogs. Ensemble forecasting and verification.
Prerequisite: STAT400; or students who have taken courses with comparable content may contact the department.

AOSC632 Atmsopheric Dynamics (3 Credits)
The equations of motion of the atmosphere are developed, and then analyzed with a focus on developing students' intuition about the behavior of the large-scale atmospheric flow in the mid-latitudes. Topics covered: Kinematics; forces in the atmosphere; apparent forces arising from the rotation of the earth; vertical coordinate systems; spherical coordinate; natural coordinates; hydrostatic, cyclostrophic; geostrophic and gradient wind balances; diagnosis of vertical motion (the omega equation); prediction of surface pressure; dynamics of fronts; lifecycle of baroclinic distrubances; introduction to climate sensitivity and climate feedbacks.
Prerequisite: AOSC431.
Corequisite: MATH246.
Restriction: Must not have completed AOSC432.
Credit Only Granted for: AOSC432 or AOSC632.

AOSC633 Atmospheric Chemistry and Climate (3 Credits)
The effects of human activity on atmospheric composition, focused on global warming, the carbon cycle, air pollution, and the ozone layer. Fundamentals of atmosphereic chemistry (spectroscopy, kinetics, isotopic analysis, and biogeochemical cycles) are related to the modern understanding of climate change, air quality, and ozone depletion, based on resources such as satellite missions, field campaigns, and scientific assessments published by international agencies. We also examine how society's energy needs could be met, in the future, in a manner with less impact on atmospheric composition than the present heavy reliance on combusion of fossil fuels.
Prerequisite: CHEM131, CHEM135, or CHEM146. Cross-listed with: CHEM633.
Credit Only Granted for: AOSC433, AOSC633, CHEM433, or CHEM633.

AOSC634 Air Sampling and Analysis (3 Credits)
Theory and application of analytical techniques for the analysis of atmospheric gases and particles including priority pollutants. Combined chemical and meteorological considerations in designing field experiments.

AOSC647 Machine Learning in Earth Science (3 Credits)
A comprehensive introductory course designed to prepare undergraduate and graduate students for applying machine learning techniques to solve real-world problems in Earth science. It emphasizes practical solution implementation, providing students with essential hands-on experience using the most popular open-source analytics tools based on Python, a general-purpose programming language. The course works through all steps in machine learning, from problem specification, data analytics to analytical solution, and applies advanced statistical and analytical algorithms to uncover hidden data relationships and transform them into predictive understanding or decision support. The topics covered include: Python programming, SciPy and Scikit-learn utility, data engineering, visualization, classifiers, regression models, canonical correlation analysis, structural equation models, decision trees, random forests, boosting machines, support vector machines, clustering, dimensionality reduction, principal component analysis, and neural networks.
Prerequisite: MATH140. Jointly offered with: AOSC447.
Credit Only Granted for: AOSC447 or AOSC647.

AOSC652 Analysis Methods in Atmospheric and Oceanic Science (3 Credits)
A variety of the analysis methods used by atmospheric and oceanic scientists will be applied to observational data sets such as Vostok ice core record, temperature trends, and satellite measurements of ozone,sea ice, etc. in a hands-on, computer laboratory setting. Students will be exposed to Fortran and Python as well as modern file formats such as HDF and netCDF. No prior programming experience required.
Prerequisite: PHYS141 and MATH241; or students who have taken courses with comparable content may contact the department.
Recommended: AMSC460, CMSC660, AMSC660, or CMSC460.

AOSC658 Special Topics in Meteorology (1-4 Credits)
Various special topics in meteorology are given intensive study. The topic of concentration varies, from semester to semester and depends on student and faculty interests. Often, specialists from other institutions are invited to the campus on a visiting lectureship basis to conduct the course.
Restriction: Permission of instructor.
Repeatable to: 10 credits if content differs.

AOSC661 Sustainability Modeling (3 Credits)
Suitable for students who are concerned with sustainability issues, have little or no background in computational modeling, but would like to understand what modeling can do to help solve sustainability problems. By exploring a variety of contemporary societal issues (e.g., water scarcity, biodiversity loss, energy dependence), you will be introduced to modeling approaches for simulating and quantitatively understanding sustainability variables (inputs and outputs), and using modeling towards the design of policy measures that can be implemented as a response to such issues.

AOSC662 Ecohydrology (3 Credits)
The vulnerability and resilience of ecosystems are dependent on phenomena that link the cycling of water, nutrients and other biogeochemically active elements. Understanding the perturbations in these cycles that trigger impacts on ecosystem spatiotemporal characteristics is a challenge that generally transcends disciplinary and geographical boundaries, and is key to sustaining the diversity of life on Earth. This course on ecohydrology focuses on the study of hydrologically-controlled ecosystems, e.g. systems in which either excess and/or deficit of water and nutrients are determinants of its structure and function. Such systems have complex dynamic characteristics that depend on many interrelated links between climate, soil and vegetation.
Prerequisite: AOSC610; and undergraduate level hydrology and/or hydrogeology, familiarity with differential calculus and equations. Please consult with instructor for details.

AOSC663 Water and Climate Systems (3 Credits)
Focuses on exploring options for adaptation and building resilience to the possible impacts of climate change through an interwoven understanding of the physical, biological, social, cultural, economic and institutional constraints of water resources issues and consideration of climate-related risks in the management and decision-making process.
Prerequisite: AOSC610; and undergraduate level hydrology and/or hydrogeology, familiarity with differential calculus and equations. Please consult with instructor for details.

AOSC670 Physical Oceanography (3 Credits)
Ocean observations. Water masses, sources of deep water. Mass, heat, and salt transport, geochemical tracers. Western boundary currents, maintenance of the thermocline. Coastal and estuarine processes. Surface waves and tides. Ocean climate.
Prerequisite: Permission of CMNS-Atmospheric & Oceanic Science department; or permission of CMNS-Geology department. Cross-listed with: GEOL670.
Credit Only Granted for: GEOL670, AOSC670 or AOSC420.

AOSC675 Carbon Cycle and Climate: Past, Present, and Future (3 Credits)
The fundamentals of the Earth's carbon cycle, a key biogeochemical cycle that controls Earth's climate and life. The changing characteristics of the carbon cycle on several timescales, ranging from geological, interannual, and the more recent anthropogenic influences on carbon cycle and climate. The carbon cycle in the atmosphere, land, ocean, and the biosphere. The underlying human activities such as fossil fuel burning and deforestation that are responsible for the increase in the atmosphere CO2 and our future options in dealing with the carbon problem such as alternative energy and carbon sequestration.Jointly offered with AOSC475.
Credit Only Granted for: AOSC475 or AOSC6 75.

AOSC680 Introduction to Earth System Science (3 Credits)
An introduction to the study of the earth as a system: atmosphere, oceans, land, cryosphere, solid earth, and humans. Cycling of materials and energy in the earth system: the energy cycle, the hydrologic cycle, the carbon cycle, the nitrogen cycle. Climate processes and variability: land-atmosphere, ocean-atmosphere, biosphere-climate, and human interactions, short- and long-term variability in climate.

AOSC684 Climate System Modeling (3 Credits)
Fundamentals in building computer models to simulate the components of the climate system: atmosphere, ocean ice, land-surface, terrestrial and marine ecosystems, and the biogeochemical cycles embedded in the physical climate system, in particular, the carbon cycle. Simple to state-of-the-art research models to tackle problems such as the Daisy World, El Nino and global warming.Jointly offered with AOSC484.
Credit Only Granted for: AOSC484 or AOSC6 84.

AOSC798 Directed Graduate Research (1-3 Credits)
Directed graduate research in atmospheric and oceanic science.
Repeatable to: 15 credits.

AOSC818 Frontiers in Atmosphere, Ocean, Climate, and Synoptic Meteorology Research (1 Credit)
A broad range of topics in the contemporary sciences of atmosphere, ocean, climate and synoptic meteorology are covered.
Repeatable to: 18 credits if content differs.

AOSC898 Pre-Candidacy Research (1-8 Credits)

AOSC899 Doctoral Dissertation Research (1-8 Credits)

ARAB - Arabic

ARAB401 Readings in Arabic Literature (3 Credits)
A survey of Modern Arabic literature is given through a range of selected texts. Texts are studied as literature with constant reference to the social, cultural and political contexts in which they were written. Taught in Arabic.
Prerequisite: ARAB305; or permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Must not be a fluent/native speaker of Arabic.

ARAB410 Ideology of Stereotyping: American and Middle Eastern Film and Television (3 Credits)
Exploration of cultural stereotyping, using examples from American and Middle Eastern cinema and television. Students will examine ideological constructs of Otherness and its history, including Orientalism; propaganda techniques; and audiovisual aspects of stereotyping. While the focus is on American and Middle Eastern cultural production, the course will engage broader issues of stereotyping in contemporary society and media. Readings include theories of propaganda and cultural ideology.
Credit Only Granted for: ARAB410, ARAB499Q, FILM429Q.
Formerly: ARAB499Q.

ARAB489 Special Topics in Arabic Studies (3 Credits)
In-depth study of particular aspect of Arabic language and culture. Specific topics to be announced when course is offered. Taught in Arabic.
Prerequisite: ARAB305; or permission of ARHU-School of Languages, Literatures, and Cultures department.

ARAB499 Special Topics in Arabic Studies (3 Credits)
In-depth study of particular aspect of Arabic culture, literature and language. Specific topic to be announced when course is offered.
Repeatable to: 6 credits if content differs.

ARAB628 Special Topics in Arabic Studies (3 Credits)
In-depth study of a particular aspect of Arabic Studies. Topics to be announced when course if offered. Taught in Arabic.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 6 credits if content differs.

ARAB638 Special Topics in Middle Eastern Studies (3 Credits)
In-depth study of a particular aspect of Middle Eastern Studies. Topic to be announced when course is offered. Taught in Arabic.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 6 credits if content differs.

ARAB788 Internship in Arabic (3-6 Credits)
Field and/or professional experience in a public or private institution where Arabic is the language of work.
Restriction: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 6 credits if content differs.

ARAB789 Independent Study in Arabic (1-3 Credits)
Independent study in Arabic. Taught in Arabic.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 9 credits if content differs.

ARCH - Architecture

ARCH400 Architecture Design Studio I (6 Credits)
Introduction to architectural design with particular emphasis on conventions and principles of architecture, visual and verbal communication skills, formal analysis, design process, spatial composition, architectural promenade, basic program distribution, and elementary constructional and environmental responses.
Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.

ARCH401 Architecture Design Studio II (6 Credits)
Continuation of ARCH 400 with introduction to building typology, urban and contextual issues, design of the vertical surface, and architectural interiors.
Prerequisite: Minimum grade of C- in ARCH400.
Restriction: Must be in Architecture (B.S.) program.

ARCH402 Architecture Design Studio III (6 Credits)
Architectural design studio with emphasis on building and facade typologies, the development of architectural promenade and sequence, public and/or civic infill buildings dependent upon the architectural promenade, and urban housing types of varying densities. The architect's obligations to urban context are explored in many dimensions including historical, typological, and physical.
Prerequisite: Minimum grade of C- in ARCH401.
Restriction: Must be in Architecture (B.S.) program.

ARCH403 Architecture Design Studio IV (6 Credits)
Investigations into the relationship between the man-made and the natural world including introductory issues of assembly and material value. Design of the site and the building are combined into an integral process delimiting and probing the boundaries of each and exploring their reciprocal relationship. The architect's obligations to the natural and urban contexts are explored in many dimensions including historical, typological, environmental, and physical.
Prerequisite: Minimum grade of C- in ARCH402.
Restriction: Must be in Architecture (B.S.) program.

ARCH404 Graduate Architecture Design Studio I (6 Credits)
Introduction to architectural design with particular emphasis on conventions and principles of architecture , visual and verbal communication skills, formal analysis, design process, spatial composition, architectural promenade, basic program distribution, and elementary constructional and environmental responses. Offered fall only.
Recommended: For 3 1/2 year graduate students only.
Restriction: Must be in Architecture (Master's) program.

ARCH405 Graduate Architecture Design Studio II (6 Credits)
Architectural design studio with emphasis on building and facade typologies, the development of architectural promenade and sequence, public and/or civic infill buildings dependent upon the architectural promenade, and urban housing types of varying densities. The architect's obligations to urban context are explored in many dimensions including historical, typological, and physical. Offered spring only.
Prerequisite: Minimum grade of C- in ARCH404.
Restriction: Must be in Architecture (Master's) program.

ARCH406 Graduate Architecture Design Studio III (6 Credits)
Investigations into the relationship between the man-made and the natural world including introductory issues of assembly and material value. Design of the site and the building are combined into an integral process delimiting and probing the boundaries of each and exploring their reciprocal relationship. The architect's obligations to the natural and urban contexts are explored in many dimensions including historical, typological, environmental, and physical.
Prerequisite: Minimum grade of C- in ARCH405.
Restriction: Must be in Architecture (Master's) program.

ARCH407 Graduate Architecture Design IV (6 Credits)
Studio problems and theories concentrating on urbanism and urban design techniques. Issues and sites range from high-density urban in-fill to suburban and greenfield development in American and other contexts. Studio theories explore such topics as Contextualism, Neo-Traditional design, Transit Oriented Development, density, sustainable development, building typology, and street design.
Prerequisite: Minimum grade of C- in ARCH406.
Restriction: Must be in Architecture (Master's) program.

ARCH408 Special Topics Architecture Design Studio (6 Credits)
Design Studio course to examine topical problems in architecture and urban design.
Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.
Repeatable to: 12 credits if content differs.
Additional Information: May also be taken for repeat credit for ARCH400, ARCH401, ARCH402, or ARCH403 only by permission of Architecture Program Director.

ARCH418 Selected Topics in Architectural Technology (3 Credits)
Selected Topics in Architectural Technology
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH419 Independent Studies in Architectural Technology (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH420 History of American Architecture (3 Credits)
American architecture from the late 17th to the 21st century.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture program.

ARCH423 History of Roman Architecture (3 Credits)
Survey of Roman architecture from 500 B.C. To A.D. 325.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH425 History of Architecture I (3 Credits)
Pre-1500 World Architecture survey course - History of Architecture structured to develop critical thinking and visually literacy with regard to the worldwide legacy of design thinking and cultural production through architecture. Structured to nurture critical thinking and visually literacy with regard to the worldwide legacy of architecture. The work in the course will involve the evaluation of sources and arguments in reading architectural history. Architecture will be framed relative to ways of thinking, religious beliefs, cultural heritage, and cultural values.
Restriction: Permission of ARCH-Architecture Program.
Credit Only Granted for: ARCH225 or ARCH425.
Additional Information: Graduate architecture history course requires additional recitation section and additional coursework tied to survey lectures.

ARCH426 History of Architecture II (3 Credits)
Post-1500 - History of Architecture survey course - History of Architecture structured to develop critical thinking and visually literacy with regard to the worldwide legacy of design thinking and building innovation in architecture. Structured to nurture critical thinking and visually literacy with regard to the worldwide legacy of architecture. The work in the course will involve the evaluation of sources and arguments in reading architectural history. Architecture will be framed relative to ways of thinking, religious beliefs, cultural heritage, and cultural values.
Restriction: Permission of ARCH-Architecture Program.
Credit Only Granted for: ARCH226 or ARCH426.
Additional Information: Graduate architecture history course requires additional recitation section and additional coursework tied to survey lectures.

ARCH427 Theories of Architecture (3 Credits)
Survey of architectural theories - theories of architectural design, representation and urban design from antiquity to the present day.
Prerequisite: ARCH426; or permission of ARCH-Architecture Program.
Restriction: Must be in Architecture (B.S.) program.

ARCH428 Selected Topics in Architectural History (1-4 Credits)
Selected Topics in Architectural History
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH429 Independent Studies in Architectural History (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH430 Measuring Sustainability in Architecture (3 Credits)
Studies metrics of sustainability as included in rating standards, including LEED. All students will take the LEED GA test.
Credit Only Granted for: ARCH430 or ARCH418M.
Formerly: ARCH418M.

ARCH435 History of Contemporary Architecture (3 Credits)
Architectural history from World War II to the present.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH443 Visual Communication For Architects (3 Credits)
Investigation of the relationship between drawing from life and architectural drawing, the conventions of architectural drawing and the role of architectural drawing as a means to develop, communicate, and generate architectural ideas.
Corequisite: ARCH400.
Restriction: Must be in Architecture (Master's) program; and must be in the 3.5 year M. ARCH program.

ARCH445 Visual Analysis of Architecture (3 Credits)
Study of visual principles of architectural and urban precedents through graphic analysis. Exercises include on-site observation, documentation and analysis. Focuses on the development of an architect's sketchbook as a tool for life-long learning.
Prerequisite: ARCH400; or permission of ARCH-Architecture Program.
Restriction: Must be in Architecture (B.S.) program.

ARCH448 Selected Topics in Visual Studies in Architecture (3 Credits)
Selected Topics in Visual Studies in Architecture
Restriction: Permission of ARCH-Architecture Program; and must be in a major in ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH449 Independent Studies in Visual Studies in Architecture (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Restriction: Permission of ARCH-Architecture Program; and must be in a major in ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH456 Great Cities (3 Credits)
Case studies from a selection of the great cities of the world.
Prerequisite: Permission of ARCH-Architecture Program.

ARCH458 Selected Topics in Urban Design (3 Credits)
Selected Topics in Urban Design
Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH459 Independent Studies in Urban Design (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Restriction: Must be in a major in ARCH-Architecture Program; and permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH460 Site Analysis and Design (3 Credits)
Principles and methods of site analysis; the influence of natural and man-made site factors on site design and architectural form.
Restriction: Must be in the Master of Architecture program; or permission of the School of Architecture, Planning and Preservation.

ARCH461 Sustainability in Architecture (3 Credits)
Strategies of sustainability as related to the broader context of architectural problem solving.
Restriction: Permission of ARCH-Architecture Program.
Credit Only Granted for: ARCH418S or ARCH461.
Formerly: ARCH418S.

ARCH462 Methods & Materials of Building Construction (3 Credits)
Building Construction methods and materials are examined through case studies to explore the means and techniques applied to the material execution of buildings and BIM. Focus on an understanding of the organization of the design and construction process and awareness of building and zoning codes, material systems and types.
Prerequisite: PHYS121 or equivalent; and MATH120 or MATH140 or equivalent; or permission of the ARCH-Architecture Program.
Restriction: Must be in a major in undergraduate or graduate ARCH program or Construction Project Management Minor.
Credit Only Granted for: ARCH410 or ARCH462.

ARCH463 Sustainable Systems in Architecture (3 Credits)
Sustainable systems in architecture examines the nature of the global problem, environmental economics, understanding the local environment, bioclimatic design, solar control and shading, solar access zoning, residential scale energy design issues, commercial scale energy design issues, and urban scale energy design issues.
Prerequisite: ARCH462.
Restriction: Must be in a major in undergraduate or graduate ARCH program.

ARCH464 Architectural Structures I (3 Credits)
This course covers the basic principles of architectural structures, including the influence of geometric, sectional, and material properties related to flexure and shear in beam and framed systems; vector mechanics with application to analysis of trusses, catenaries, and arches; diagrammatic analysis of beams for bending moment, shear, and deflection as well as the study of structural framing systems for vertical and lateral loads.
Prerequisite: ARCH462, ARCH463, and PHYS121; and MATH120 or MATH140, or equivalent; or permission of the ARCH-Architecture Program.
Corequisite: ARCH401 or ARCH406.
Restriction: Must be in either BS in Architecture or M.Architecture Program.
Credit Only Granted for: ARCH411 or ARCH464.

ARCH465 Architectural Structures II (3 Credits)
The basic principles of elastic behavior for different materials such as wood, steel, concrete, and composite materials and compares the properties and applications of materials generally will be covered. It investigates cross sectional stress and strain behavior in flexure and in shear, and torsion as well as the stability of beams and columns. The qualitative behavior of combined stresses and fracture in materials is also covered.
Prerequisite: ARCH464 and PHYS121; and MATH120 or MATH140, or equivalent; or permission of the ARCH-Architecture Program.
Restriction: Must be in either BS in Architecture or M. Architecture Program.
Credit Only Granted for: ARCH412 or ARCH465.

ARCH466 Environmental Systems in Architecture (3 Credits)
Environmental systems in architecture presents the theory, quantification, and architectural design implications for heating ventilating and air conditioning, water and waste, fire protection, electricity, illumination, acoustics, and vertical transportation.
Prerequisite: ARCH462 and ARCH463.
Corequisite: ARCH403 or ARCH406.
Restriction: Must be in either BS in Architecture or M. Architecture Program.
Credit Only Granted for: ARCH413 or ARCH466.

ARCH467 Integrated Project Delivery (3 Credits)
Integrated Project Delivery is examined from design to implementation through an exploration of building construction, architectural design and construction management perspectives.
Restriction: Must be in a major in ARCH-Architecture Program; or must be in Construction Project Management Minor.

ARCH468 Selected Topics in Architecture (1-4 Credits)
Selected Topics in Architecture
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH470 Computer Applications in Architecture (3 Credits)
Introduction to computer utilization, with emphasis on architectural applications.
Prerequisite: ARCH400; or permission of ARCH-Architecture Program.
Restriction: Must be in Architecture (B.S.) program.

ARCH472 Building Information Modeling Communication and Collaboration (3 Credits)
Building Information Modeling is explored as pertains to collaboration and communication in the design and construction of buildings and building systems. Practical and empirical learning using BIM software and case studies of real world projects and construction scenarios.
Restriction: Must be in a major in ARCH-Architecture Program; or must be in the Construction Project Management Minor.
Credit Only Granted for: ARCH678I or ARCH472.
Formerly: ARCH678I.

ARCH478 Selected Topics in Architecture (1-4 Credits)
Selected Topics in Architecture
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH479 Independent Studies in Architecture (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH481 The Architect in Archaeology (3 Credits)
The role of the architect in field archaeology and the analysis of excavating, recording, and publishing selected archaeological expeditions.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH482 The Archaeology of Roman and Byzantine Palestine (3 Credits)
Archaeological sites in Palestine (Israel and Jordan) from the reign of Herod the Great to the Moslem conquest.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH483 Field Archaeology (3 Credits)
Participation in field archaeology with an excavation officially recognized by proper authorities of local government.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH488 Selected Topics in Architectural Preservation (1-4 Credits)
Selected Topics in Architectural Preservation.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH489 Independent Studies in Architectural Preservation (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH600 Integrated Design Studio V (6 Credits)
Integrated and comprehensive building and site design. Course content bridges the gap between design and technology, between practice and education, in a studio setting. Explorations include the integration of conceptual and technical aspects of architectural form and assembly, highlighting the ways in which multiple layers of a building design are developed, coordinated and resolved.
Corequisite: ARCH611.
Restriction: Permission of ARCH-Architecture Program.

ARCH601 Topical Design Studio VI (6 Credits)
Topical architectural design studio with concentration on advanced topical inquiry addressing but not limited to: architectural competitions, sustainable design, theoretica/conceptual issues, programmatic, contextual, and/or technical issues.
Restriction: Permission of ARCH-Architecture Program.

ARCH608 Advance Special Topics Design Studio (6 Credits)
Topical architectural design studio with concentration on advanced theoretical, conceptual, technological, cultural or professional issue.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 12 credits if content differs.
Additional Information: Elective Architecture Design Studio that may be taken for repeat or advanced credit in place of ARCH404, ARCH405, ARCH406, ARCH407, ARCH600, ARCH601, ARCH700 or an additional design studio.

ARCH611 Advanced Architecture Technology Seminar (3 Credits)
Technology in design of buildings. Application of technological issues in building design; integration of technology in architecture; technology as a form determinant in architecture; other conceptual and philosophical issues related to the application of technology in the design, construction, and use of buildings.
Corequisite: ARCH600.
Restriction: Permission of ARCH-Architecture Program.

ARCH628 Selected Topics in Architectural History (1-4 Credits)
Graduate Selected Topics in Architectural History
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH629 Graduate Independent Studies in Architectural History (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH635 Seminar in the History of Modern Architecture (3 Credits)
Advanced investigation of historical problems in modern architecture.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.

ARCH654 Urban Development and Design Theory (3 Credits)
Advanced investigation into the history, and practice of urban design, planning, and development.
Prerequisite: ARCH225 and ARCH226; or ARCH425 and ARCH426; or permission of the ARCH-Architecture Program.
Restriction: Permission of ARCH-Architecture Program.

ARCH655 Urban Design Seminar (3 Credits)
Advanced investigation into problems of analysis and evaluation of the design of urban areas, spaces, and complexes with emphasis on physical and social considerations; effects of public policies through case studies. Field observations.
Prerequisite: ARCH654; or permission of ARCH-Architecture Program.
Credit Only Granted for: ARCH451 or ARCH655.
Formerly: ARCH451.

ARCH668 Advanced Selected Topics in Architecture (1-4 Credits)
Graduate Selected Topics in Architecture.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH670 Advanced Computer Applications in Architecture (3 Credits)
Advanced use of computer technology in design. Use of digital design processes and conceptual methodologies to study design alternatives and realization. Methods and techniques of digital design representation, simulation, or fabrication to explore and test concepts and integration of digital technologies into the architectural design process.
Restriction: Permission of ARCH-Architecture Program.
Credit Only Granted for: ARCH678C or ARCH670.
Formerly: ARCH678C.

ARCH671 BIM Technology and Processes in Architecture (3 Credits)
Building Information Modeling is examined in depth relative to Integrated Project Delivery methods as pertains to collaboration and communication in the design and construction of buildings and building systems. Practical and empirical learning using BIM software and case studies of real world projects and construction scenarios.
Prerequisite: ARCH403; and ARCH470. Or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: ARCH678I or ARCH670.
Formerly: ARCH678I.

ARCH672 Type and Typology Seminar (3 Credits)
The idea of type and typology, its implications for theory, scholarship, and practice in achitecture and urban design.
Restriction: Permission of ARCH-Architecture Program.

ARCH673 Building Culture Seminar (3 Credits)
Comprehension of major themes in the development of architectural building techniques and culture value systems in architecture are developed through lecture, discussion and analysis of seminal readings and buildings.
Restriction: Permission of ARCH-Architecture Program.

ARCH674 Seminar in Regionalism (3 Credits)
Regional characterisitics of culture, climate, and landscape as determinants world architecture.
Restriction: Permission of ARCH-Architecture Program.

ARCH676 Field Research in Architecture (3 Credits)
Recording and analysis of significant architectural complexes in situ.
Restriction: Permission of ARCH-Architecture Program.

ARCH678 Advanced Selected Topics in Architecture (1-4 Credits)
Graduate Selected Topics in Architecture.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH679 Advanced Independent Studies in Architecture (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH688 Advanced Selected Topics in Architectural Technologies (1-4 Credits)
Graduate Selected Topics in Architectural Technologies.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH689 Advanced Independent Studies in Architectural Technologies (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH700 Urban Design Studio VII (6 Credits)
Studio problems and theories concentrating on urbanism and urban design techniques. Issues and sites range from high density urban in-fill to suburban and greenfield development in American and other contexts. Studio theories explore such topics as Contextualism, Neo-Traditional design, Transit-Oriented Development, density, sustainable development building typology, and street design.
Restriction: Permission of ARCH-Architecture Program.

ARCH770 Professional Practice of Architecture (3 Credits)
Project management, organizational, legal, economic and ethical aspects of architecture.
Restriction: Permission of ARCH-Architecture Program.

ARCH778 Graduate Selected Topics in Urban Design (1-4 Credits)
Graduate Selected Topics in Urban Design.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH779 Advanced Independent Studies in Urban Design (1-4 Credits)
Proposed work must have a faculty sponsor and receive approval of the Architecture Program Curriculum Committee.
Restriction: Permission of ARCH-Architecture Program.
Repeatable to: 6 credits if content differs.

ARCH797 Thesis Proseminar (3 Credits)
Directed research and preparation of thesis program.
Prerequisite: ARCH601.

ARCH798 Thesis in Architecture (3 Credits)
Complements the research of ARCH 799, with presentation of the design research to student's thesis committee.
Prerequisite: ARCH797.
Corequisite: ARCH799.
Restriction: Must be in Architecture (Master's) program; and permission of ARCH-Architecture Program; and minimum cumulative GPA of 3.0.

ARCH799 Master's Thesis Research (1-6 Credits)
Development of master's thesis.
Prerequisite: ARCH797.
Corequisite: ARCH798.
Restriction: Must be in Architecture (Master's) program; and permission of ARCH-Architecture Program; and minimum cumulative GPA of 3.0.
Repeatable to: 6 credits if content differs.

AREC - Agricultural and Resource Economics

AREC405 Economics of Production (3 Credits)
The use and application of production economics in analysis of firm and policy decisions. Production functions, cost functions, multiple product and joint production, and production processes through time.
Prerequisite: ECON326 or AREC326; or students who have taken courses with comparable content may contact the department.

AREC422 Econometric Analysis in Agricultural and Environmental Economics (3 Credits)
This course offers a hands-on introduction to econometrics. Students will explore the linear regression model from the ground up by analyzing real-world datasets and learning how to distinguish causation from correlation. They will gain practical experience using econometrics to address important questions in agricultural economics and environmental economics.
Prerequisite: 1 course from (AREC326 or ECON326); and 1 course from (ECON230, ECON321, or BMGT230).
Credit Only Granted for: ECON422, ECON424, or AREC422.

AREC426 Economic Methods and Food Consumption Policy (3 Credits)
An overview of major econometric tools used by policy makers, economists and social scientists to analyze the effects of food consumption policy. Major food assistance programs in the United States such as SNAP, the School Lunch Program and the School Breakfast Program will be discussed.
Prerequisite: AREC326; or ECON326.
Credit Only Granted for: AREC489O or AREC426.
Formerly: AREC489O.

AREC427 Commodity Pricing and Markets (3 Credits)
Economic theory as applied to the marketing of agricultural commodities. How commodity prices vary with current demand and production, and how prices are linked over time, across space, and across grades. The role played by contractual arrangements, cooperative marketing, vertical integration, and governmental policies in commodity marketing strategies.
Prerequisite: ECON326 or AREC326; or students who have taken courses with comparable content may contact the department.

AREC430 Introduction to Agricultural and Resource Law (3 Credits)
Survey of law with emphasis on problems and applications related to agricultural and natural resource economics. The course emphasizes strategies for managing legal risk arising from ownership, management, and use of agricultural resources. Students will get practical information to utilize in personal or professional settings. Contract law, constitutional law, tort law, property law, real estate transactions, business organization, estate planning, and debtor.
Prerequisite: ECON326 or AREC326.
Credit Only Granted for: AREC430 or AREC489K.
Formerly: AREC489K.

AREC431 Agricultural Water Quality: Policy and Legal Issues (3 Credits)
An overview of the American and Maryland legal systems and sources of legal information as it pertains to water quality and agriculture.
Prerequisite: AREC326; or ECON326; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: AREC489L or AREC431.
Formerly: AREC489L.

AREC433 Food and Agricultural Policy (3 Credits)
Economic and political context of governmental involvement in the farm and food sector. Historical programs and current policy issues. Analysis of economic effects of agricultural programs, their benefits and costs, and comparison of policy alternatives. Analyzes the interrelationship among international development, agricultural trade and general economic and domestic agricultural policies.
Prerequisite: ECON326 or AREC326; or students who have taken courses with comparable content may contact the department.

AREC435 Commodity Futures and Options (3 Credits)
The economics and institutional features of commodity futures and options markets. Students will develop a basic understanding of the underlying price relationships between cash and futures markets and will apply this information to business risk management decision making.
Prerequisite: AREC326; or ECON326; or students who have taken courses with comparable content may contact the department.

AREC445 Agricultural Development, Population Growth and the Environment (3 Credits)
Development theories, the role of agriculture in economic development, the agricultural policy environment, policies impacting on rural income and equity, environmental impacts of agricultural development.
Prerequisite: ECON326 or AREC326; or students who have taken courses with comparable content may contact the department.

AREC446 Sustainable Economic Development (3 Credits)
Examine why socially equitable and environmentally sustainable economic growth is difficult to achieve. It explores the interactive dynamics of environmental degradation, human capital, inequality and institutions. Emphasis is on the role of market imperfections and political failure in explaining the persistence of extractive economic institutions that hinder sustainable development.
Prerequisite: AREC326; or ECON326; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: AREC446 or AREC489G.
Formerly: AREC489G.

AREC447 The Economy of China (3 Credits)
An introductory survey course of economic development in China with emphasis on understanding the process of economic reform in mainland China since 1978.
Prerequisite: AREC326, ECON306, or ECON326.
Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness).

AREC453 Natural Resources and Public Policy (3 Credits)
Rational use and reuse of natural resources. Theory, methodology, and policies concerned with the allocation of natural resources among alternative uses. Optimum state of conservation, market failure, safe minimum standard, and cost-benefit analysis.
Prerequisite: AREC326, ECON306, or ECON326; and (BMGT230 or ECON230).
Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness; Agricultural and Resource Economics: Environmental and Resource Economics; Economics Bachelor of Arts; Environmental Science & Policy-Env Economics). Cross-listed with: ECON453.
Credit Only Granted for: AREC453 or ECON453.

AREC454 The Economics of Climate Change (3 Credits)
The role of economics in the formation of climate policy; basic concepts of environmental economics including efficiency, externalities, and policy instruments; economic models of intertemporal decisions and decision making in the face of uncertainty. Applied economic analysis of specific issues and current policy initiatives.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230). Cross-listed with: ECON484.
Credit Only Granted for: AREC454 or ECON484.

AREC455 Economics of Land Use (3 Credits)
Fundamentals of location theory. Microeconomics of land use decisions, including determination of rent and hedonic pricing models. Impacts of government decisions on land use, including regulation (e.g., zoning), incentives (transferable development rights), provision of public services, and infrastructure investments. Impacts of land use on environmental quality, including issues relating to sprawl, agricultural land preservation, and other topics of special interest.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230). Cross-listed with: ECON485.
Credit Only Granted for: AREC455 or ECON485.

AREC456 Energy and Environmental Economics (3 Credits)
Economic theory and empirical methods are used to study problems of energy, the environment, and the economy. It examines the extraction, production, and use of energy and market institutions and regulatory approaches used to correct market failures. Topics covered include: oil and natural gas markets, management and design of electricity markets, renewable energy, non-market valuation , climate change, and transportation policies.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230). Cross-listed with: ECON486.
Credit Only Granted for: AREC456 or ECON486.

AREC457 Energy, Climate Change, and Options for a Low-Carbon Economy (3 Credits)
Provides a primer in the physics and atmospheric chemistry of climate change, describes what the effects of climate change may be and explains how energy generation and use in various sectors of the economy contribute to greenhouse gas. It presents policy options meant to curb the use of fossil fuels (e.g., carbon taxes), improve energy efficiency (e.g., standards and incentives), and identifies possible drawbacks or unintended effects of such policies. Students will also study adaptation from the engineering, policy and anthropology points of view. The course further covers other aspects of climate change, as the potential effect of climate change on human health, cultural artifacts and the built environment, and sensitive ecological systems, and the legal implications of carbon storage options.
Recommended: ECON200. And AREC326; or ECON326.
Restriction: Junior standing or higher.

AREC481 Environmental Economics (3 Credits)
An exploration of the use of economic incentives for protection of the environment and the determination of appropriate (or efficient) level of environmental quality. Also covers the choice of policy instruments for the attainment of environmental standards.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).
Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness; Environmental Science & Policy-Env Economics; Agricultural and Resource Economics: Environmental and Resource Economics; Economics Bachelor of Arts program). Cross-listed with: ECON481.
Credit Only Granted for: ECON481 or AREC481.

AREC489 Special Topics in Agricultural and Resources Economics (3 Credits)
Repeatable to: 9 credits.

AREC610 Microeconomic Applications in Agricultural and Resource Markets (3 Credits)
Applications of graduate level microeconomic analysis to the problems of agricultural and natural resource production and distribution including demand for agricultural output, the nature of agricultural supply decisions, decision making under uncertainty, valuation of natural resources, and exploitation of natural resources.
Prerequisite: ECON603.

AREC620 Optimization in Agricultural and Resource Economics (3 Credits)
Mathematical theory of static and dynamic optimization as applied to the economics of agriculture, natural resources and the environment. Topics include necessary and sufficient conditions for constrained optimization, convexity and concavity, duality and the envelope theorem, comparative statics, fixed point theorems, optimal control theory and dynamic programming.
Prerequisite: Must have completed Multivariate calculus and matrix or linear algebra.

AREC623 Applied Econometrics I (4 Credits)
A modern introduction to empirical strategies in applied microeconomic research in public policy, development economics, labor economics, education, marketing and corporate finance. Emphasis on causal reasoning and design-driven identification in the social sciences. Concepts and applications will focus on addressing economically meaningful causal questions. Basic theoretical and mathematical aspects of probability and statistics will be developed to assess the significance of the relationship among economic variables. Topics include: the approximation of the conditional expectation function through a linear predictor (Ordinary Least Squares), the effects of omitted variables and the usefulness of variables that resemble the outcome of a randomized experiment (Instrumental Variables), as well as extensions to high-dimensional big-data counterparts. Fundamental concepts in sampling theory, statistical inference (with small and large samples) and hypothesis testing will be studied and applied to real data using Stata, a general-purpose statistical software.
Prerequisite: Introductory statistics or econometrics, linear algebra, and differential/calculus; or permission of instructor.
Additional Information: Intended for first-year Ph.D. students from AREC, BUFN, ECON, EDMS, EDUC, PLCY and URSP departments with a background in introductory statistics or econometrics.

AREC624 Applied Econometrics II (4 Credits)
Variations of the standard linear model, simultaneous equations estimation, nonlinear regression, nonlinear simultaneous equations estimation, static and dynamic panel data models, errors in variables, Hausman tests, discrete choice models such as conditional multinomial and mixed logit models, latent class models, semi-parametric estimation, varying parameter models, unobserved variables, time series models, and model selection procedures.
Prerequisite: AREC623.

AREC699 Special Problems in Agricultural and Resource Economics (1-2 Credits)
Intensive study and analysis of specific problems in the field of agricultural and resource economics, providing in-depth information in areas of special interest to the student.

AREC783 Environmental Taxation and Regulation (3 Credits)
The economics of policies to address environmental externalities. Specific topics include the theory of public goods and externalities, cost-benefit and cost-effectiveness analysis of environmental regulations, regulatory instrument choice under uncertainty, environmental policy in an economy with pre-existing tax distortions, monitoring and enforcement of environmental regulations, distributional effects of environmental policy, and regulation of intertemporal externalities.
Prerequisite: ECON603 and ECON604; and graduate-level econometrics.
Credit Only Granted for: AREC783 or AREC869W.
Formerly: AREC869W.

AREC784 Energy Economics, Empirical Industrial Organization, and Public Policy (3 Credits)
Energy markets and public policy, evaluating techniques for estimating market demand and supply and for evaluating policy intervention. Comparison of reduced-form and structural approaches. Applications may include but are not limited to electricity, oil and other liquid fuels, and household travel, with examples from the United States and other countries.
Prerequisite: ECON603, AREC623, and AREC624; or permission of instructor.

AREC785 Advanced Economics of Natural Resources (3 Credits)
The use of exhaustible and renewable natural resources from normative and positive points of view. Analysis of dynamic resource problems emphasizing energy, mineral, groundwater, forestry, and fishery resources; optimal, equilibrium, and intergenerational models of resource allocation.
Prerequisite: Permission of AGNR-Agricultural & Resource Economics department; or (ECON603 and AREC623). Cross-listed with: ECON785.
Credit Only Granted for: AREC785 or ECON785.

AREC799 Master's Thesis Research (1-6 Credits)

AREC815 Experimental and Behavioral Economics (3 Credits)
An overview of the design, implementation, and analysis of experiments motivated by behavioral economics, with a particular focus on experiments in field settings. Topics covered include social preferences, risk aversion, prospect theory, present bias, overconfidence, and limited attention.
Prerequisite: AREC623, AREC624, ECON603, and ECON604; or equivalent.
Credit Only Granted for: AREC815 or AREC869A.
Formerly: AREC869A.

AREC825 Advanced Economic Welfare Analysis (3 Credits)
Theory of economic welfare measurement, problems of path dependence in evaluating multiple price changes, welfare measurement under risk, general equilibrium welfare measurement with multiple distortions, and applications in evaluation of agricultural and resource policies.
Credit Only Granted for: AREC625 or AREC825.

AREC829 Policy Design and Causal Inference for Social Science (3 Credits)
A course in applied econometrics that examines empirical strategies in applied microeconomic research used to estimate the effects of a policy or program on the outcomes of interest in fields like public policy, development economics, labor economics, education, marketing and corporate finance, as well as in industry and international organizations. Methods in applied econometrics with a focus on the thought experiment, the hypothetical experiment that should be used to answer the causal question of interest. A taxonomy of departures from the experimental ideal is presented, as well as the assumptions required to mimic the conditions of the unfeasible experiment from observational data. Topics include regression and matching, instrumental variables and natural experiments, differences-in-differences, change-in-changes, synthetic control methods and regression discontinuity designs. Causal parameters defined from conditional moments, and quantiles and effects on conditional distributions (for inequality and poverty assessment) are considered. Stata, a general-purpose statistical software widely used by applied economists, is used to develop concepts and applications.
Prerequisite: AREC623; or permission of instructor.
Repeatable to: 9 credits if content differs.
Additional Information: The course is intended for second-year Ph.D. students from AREC, BUFN, ECON, EDMS, EDUC, PLCY and URSP who have a background in quantitative methods comparable to that offered in an introductory micro-econometrics class.

AREC832 Agricultural Policy Analysis (3 Credits)
The economics of agricultural policies. The impact of agricultural policies on both historic and modern growth, including discussion of optimal farm and ownership structure. Contemporary policy issues in both developed and developing countries. Additional topics in trade, environment, and commodity markets.
Credit Only Granted for: AREC632 or AREC832.

AREC844 Firm Growth in Developing Countries (3 Credits)
A study of the growth of firms face in developing countries and interventions/policies that can be used to remove barriers to growth, including issues related to management, credit constraints, political connections, misallocation and trade.
Prerequisite: A one-year PhD-level sequence in microeconomics and a PhD-level course in econometrics.

AREC845 Environment and Development Economics (3 Credits)
Considers neoclassical and endogenous growth models; international trade theory; the role of property right institutions and factor markets; the environmental impact of trade liberalization in developing countries and the environmental effects of increasing international capital mobility; empirical studies relating the environment to growth and globalization; and policy analyses.

AREC846 Development Microeconomics (3 Credits)
Development economics with focus on issues applicable to rural development and agriculture in developing countries. Content includes both theory and empirical application of theory. Subjects covered include economics of agricultural households, credit and insurance markets, technological progress and learning and institutional economics of developing countries.
Prerequisite: AREC624, ECON603, and AREC623; or equivalent.
Formerly: AREC869E.

AREC847 Networks, Social Learning and Technology Adoption (3 Credits)
This class will focus on networks, learning from others, and peer effects and the role ofeach in human capital accumulation, technology adoption and behavior. The material isfocused on applications of education, health agriculture and entrepreneurship in developingcountries, but will draw heavily from literatures on these effects in developed countries aswell. The class will cover the theory of networks and learning but its primary focus will beon the empirical difficulty of identifying these effects and establishing causality.
Prerequisite: AREC624, AREC623, and ECON603; and students who have taken courses with comparable content may contact the department.

AREC869 Advanced Topics in Agricultural and Resource Economics (1-3 Credits)
Frontiers of research in environmental and resource economics; agricultural policy, production, and trade; and development. Topics may include decision making under risk and related market institutions, principal agent analysis, optimal policy design, technology adoption, market structure, land and credit markets, information markets, and income distribution.
Repeatable to: 9 credits if content differs.

AREC891 Introduction to Prospectus Development (1 Credit)
Critical evaluation of research, prospectus topic exploration including literature review, data identification, model development, and related presentations. Required of all second-year Ph.D. students.
Prerequisite: Completion of the first year of graduate study in AREC.
Credit Only Granted for: AREC 869K or AREC 891.
Formerly: AREC869K.

AREC892 Dissertation Prospectus Development (3 Credits)
Presentations of proposed dissertation research including literature review, model development, data identification, and written prospectus development. Required of all third-year Ph.D. students.
Prerequisite: Completion of two years of the AREC Ph.D. program.
Credit Only Granted for: AREC 869P or AREC 892.
Formerly: AREC869P.

AREC898 Pre-Candidacy Research (1-8 Credits)

AREC899 Doctoral Dissertation Research (1-8 Credits)

ARHU - Arts and Humanities

ARHU439 Interdisciplinary Studies in Arts and Humanities (3 Credits)
An interdisciplinary exploration of chronological, geographical or thematic topics in Arts and Humanities.
Repeatable to: 6 credits if content differs.

ARHU440 Arts Leadership Seminar (3 Credits)
An advanced seminar in arts leadership exposing students to the foundations of arts leadership in not-for-profit organizations as it intersects with current trends in technology, demographics, government policy, and the economy. In case studies based on examples drawn from local arts organizations, students will learn about audience engagement as well as institutional development terminology and best practices.Cross-listed with: TDPS440.
Credit Only Granted for: TDPS4440 or ARHU440.

ARHU458 Graduate School Preparation (1 Credit)
Designed for Juniors and Seniors who are interested in applying to graduate school. Topics include skills needed for the graduate school search and application process, evaluation and reflection of application materials, preparation for GRE exam, and exploration into career options after graduate school. Focus on the Humanities fields.
Restriction: Must have earned a minimum of 60 credits.
Repeatable to: 3 credits if content differs.

ARHU468 Peer Mentoring Program (1 Credit)
A workshop for sophomore, junior or senior students who wish to serve as peer mentors helping first-year students to cope with the numerous issues which often arise in the transition to the university.
Restriction: Sophomore standing or higher; and permission of ARHU-College of Arts & Humanities.
Repeatable to: 3 credits if content differs.

ARHU486 Internship Practicum in Arts and Humanities (3-6 Credits)
An internship intended for students who have already completed an internship for credit. ARHU486 must be a different experience from the internship students have already taken for credit. Generally students intern with a different company, but they may continue working for the same company if the job is significantly different. See ARHU internship coordinator for details.
Prerequisite: Have completed previous internship at U of MD.
Restriction: Must be in a major in ARHU-College of Arts & Humanities; and permission of ARHU-College of Arts & Humanities; and minimum cumulative GPA of 2.5; and must have earned a minimum of 60 credits; and completed 12 credits at U of MD.

ARHU489 Advanced Internship Practicum in ARHU (3-6 Credits)
Designed for students who have already completed at least 2 upper level internship courses for academic credit. It is an advanced practicum to assist students in continuing to develop and hone their professional writing, presentation and analytical skills.
Prerequisite: ARHU486.
Restriction: Must be in a major in ARHU-College of Arts & Humanities; and minimum cumulative GPA of 2.5; and permission of instructor.
Repeatable to: 6 credits if content differs.
Additional Information: Course is designed to follow ARHU486.

ARHU498 Special Topics in Arts and Humanities (3 Credits)
Repeatable to: 6 credits if content differs.

ARHU786 Leadership and Professional Development Internship (1-6 Credits)
Professional development for graduate students interested in careers in non-academic organizations and in administrative positions in academic institutions. See department graduate program director for internship guidelines and applicability to graduate program requirements.
Prerequisite: Must have completed one semester of full-time graduate study; and permission of ARHU-College of Arts & Humanities.

ARHU788 Profession Development Seminar (1-3 Credits)
Professional development for academic and non-academic careers in the arts and humanities.
Repeatable to: 9 credits if content differs.

ARHU789 Professional Development Practicum (1-6 Credits)
Graduate students, in various disciplines within the college of Arts and Humanities, will learn the theory and principles of a specific issue or skill set related to academic or non-academic work. They will create original work in a hands-on practicum format.
Restriction: Must have completed at least the equivalent of one year of full-time graduate study; and permission of instructor.
Repeatable to: 6 credits if content differs.

ARMY - Army

ARMY401 Advanced Military Leadership III (3 Credits)
Introduces contracted students to the study of Army structure, practices and processes exercised by Army Commanders and Staff in completing personnel, logistics, training and combat operations. Includes a laboratory in applied leadership skills and two field exercises.

ARMY402 Advanced Military Leadership IV (3 Credits)
The military system and code of ethics in the military environment is studied. Topics include code of conduct during all forms of military operations, the Geneva Conventions and the ethical decision making process. Also includes a laboratory in applied leadership skills, fitness excellence and two field exercises.

ARSC - Air Science

ARSC400 National Security and Preparation for Active Duty I (3 Credits)
Study of American national security policy and processes to include information and implementation, impact of major national and international actors, and development of major policy issues. This course will satisfy credit towards a minor in military studies.
Prerequisite: Permission of UGST-AFROTC-Air Science; or (ARSC300 or ARSC301).
Corequisite: ARSC059; or permission of UGST-AFROTC-Air Science.
Restriction: Senior standing.

ARSC401 National Security and Preparation for Active Duty II (3 Credits)
This course examines various subjects including: military law/justice, preparation for active duty, and current issues affecting military professionalism. This course will satisfy credit towards a minor in military studies.
Prerequisite: ARSC300 or ARSC301; or permission of UGST-AFROTC-Air Science.
Corequisite: ARSC059; or permission of UGST-AFROTC-Air Science.
Restriction: Senior standing.

ARTH - Art History & Archaeology

ARTH418 Special Problems in Italian Renaissance Art (3 Credits)
Focus upon aspects of painting, sculpture, and architecture of Renaissance.
Repeatable to: 6 credits if content differs.

ARTH426 Renaissance and Baroque Sculpture in Northern Europe (3 Credits)
Sculpture in France, Germany, England, and the Low Countries from the fourteenth to the seventeenth century.

ARTH472 Ecuador: Andean Spaces-Traversing the Colonial City and the Natural World (3 Credits)
Introduces students to the history and cultures of Ecuador from the colonial period to the beginning of the 19th century. By studying the socio-spatial configuration of the colonial city as exemplified by Quito, students will be immersed in the art, architecture, and other rich cultural legacies of Ecuador. Quito, a World Heritage site, offers students visually stunning churches, monasteries, colonial squares, a famed tradition of Baroque painting and sculptures, and vibrant indigenous and mestizo communities. As a contrast, students will explore also travel narratives that represent the natural Andean world while visiting Quito's surrounding areas. This course will interrogate the European influence on urban design and representations of the landscape of the Americas. Understanding this colonial past enhances the understanding of the modern history of the Andean region and Latin America as a whole. The students will gain a full appreciation of the European and Indigenous living heritage that composes the region today. Taught in English.Cross-listed with: SPAN435.
Credit Only Granted for: SPAN435, SPAN448E, ARTH472 or ARTH369E.
Formerly: SPAN448E and ARTH369E.

ARTH484 Modern Chinese Film and Visual Culture (3 Credits)
Modern Chinese culture, society, and history studied through examples of art, film, and visual culture.Cross-listed with: CINE426.
Credit Only Granted for: ARTH484, CINE426 or FILM426.
Formerly: FILM426.

ARTH488 Colloquium in Art History (3 Credits)
Colloquium to investigate a specific topic in depth.
Prerequisite: Permission of ARHU-Art History & Archaeology department.
Repeatable to: 9 credits if content differs.

ARTH489 Special Topics in Art History (3 Credits)
Prerequisite: Permission of ARHU-Art History & Archaeology department.
Repeatable to: 9 credits if content differs.

ARTH496 Methods of Art History and Archaeology (3 Credits)
Methods of research and criticism applied to typical art-historical/archaeological problems, familiarizing the student with bibliography and other research tools. Introduction to the historiography of art history and archaeology, surveying the principal theories, encouraging methodological debates within the discipline. Course for majors who intend to go on to graduate school.
Prerequisite: Permission of ARHU-Art History & Archaeology department.
Restriction: Must be in Art History program.

ARTH498 Directed Studies in Art History I (2-3 Credits)
Prerequisite: Permission of ARHU-Art History & Archaeology department.
Restriction: Junior standing or higher.
Repeatable to: 99 credits if content differs.

ARTH499 Honors Thesis (1-6 Credits)
Prerequisite: Permission of ARHU-Art History & Archaeology department.
Repeatable to: 6 credits if content differs.

ARTH608 Studies in Ancient Art and Archaeology (3 Credits)
Repeatable to: 9 credits.

ARTH609 Studies in Late Roman, Early Christian, and Byzantine Art (3 Credits)
Repeatable to: 9 credits.

ARTH618 Studies in Medieval Art (3 Credits)
Repeatable to: 9 credits.

ARTH619 Studies in Italian Renaissance Art (3 Credits)
Repeatable to: 9 credits.

ARTH628 Studies in Fourteenth and Fifteenth Century Northern European Art (3 Credits)
Repeatable to: 9 credits.

ARTH629 Studies in Sixteenth-Century Northern European Art (3 Credits)
Repeatable to: 9 credits.

ARTH638 Studies in Seventeenth-Century Southern European Art (3 Credits)
Repeatable to: 9 credits.

ARTH639 Studies in Seventeenth-Century Northern European Art (3 Credits)
Repeatable to: 9 credits.

ARTH648 Studies in Eighteenth-Century European Art (3 Credits)
Repeatable to: 9 credits.

ARTH649 Studies in Nineteenth-Century European Art (3 Credits)
Repeatable to: 9 credits.

ARTH658 Studies in American Art (3 Credits)
Repeatable to: 9 credits.

ARTH659 Studies in Twentieth-Century Art (3 Credits)
Repeatable to: 9 credits.

ARTH668 Studies in Latin American Art and Archaeology (3 Credits)
Repeatable to: 9 credits.

ARTH669 Studies in African Art (3 Credits)
Repeatable to: 9 credits.

ARTH678 Studies in Chinese Art (3 Credits)
Repeatable to: 9 credits.

ARTH679 Studies in Japanese Art (3 Credits)
Repeatable to: 9 credits.

ARTH689 Selected Topics in Art History (1-3 Credits)
Repeatable to: 9 credits.

ARTH692 Methods of Art History (3 Credits)
Methods of research and criticism applied to typical art-historical problems; bibliography and other research tools.

ARTH698 Teaching Art History (1-3 Credits)
Allows students to explore pedagogical tools and methods in the history of art and archaeology, with a goal to becoming better instructors in the field. Starting with the basics of being a good TA (discussion of texts, teaching visual analysis, grading assignments), it moves on through questions of research and project-based teaching, lecturing, and the creation of an inclusive and equitable classroom. Students are asked to design a class they could teach, including a syllabus and assignment prompts. They will also learn how to deliver a lecture (in class, at a conference) and will explore the job market (academic and non-academic) for art historians and archaeologists. The class is recommended for students who have served once as a TA and taken the basic "TA Training" workshops.
Repeatable to: 3 credits.

ARTH699 Special Topics in Art History (3 Credits)
Prerequisite: consent of department head or instructor.
Restriction: Permission of instructor; or permission of ARHU-Art History & Archaeology department.

ARTH708 Seminar in Ancient Art and Archaeology (3 Credits)
Repeatable to: 9 credits.

ARTH709 Seminar in Late Roman, Early Christian, and Byzantine Art (3 Credits)
Repeatable to: 9 credits.

ARTH718 Seminar in Medieval Art (3 Credits)
Repeatable to: 9 credits.

ARTH719 Seminar in Italian Renaissance Art (3 Credits)
Repeatable to: 9 credits.

ARTH728 Seminar in Fourteenth and Fifteenth-Century Northern European Art (3 Credits)
Repeatable to: 9 credits.

ARTH729 Seminar in Sixteenth-Century Northern European Art (3 Credits)
Repeatable to: 9 credits.

ARTH738 Seminar in Seventeenth-Century Southern European Art (3 Credits)
Repeatable to: 9 credits.

ARTH739 Seminar in Seventeenth-Century Northern European Art (3 Credits)
Repeatable to: 9 credits.

ARTH748 Seminar in Eighteenth-Century European Art (3 Credits)
Repeatable to: 9 credits.

ARTH749 Seminar in Nineteenth-Century European Art (3 Credits)
Repeatable to: 9 credits.

ARTH758 Seminar in American Art (3 Credits)
Repeatable to: 9 credits.

ARTH759 Seminar in Twentieth-Century Art (3 Credits)
Repeatable to: 9 credits.

ARTH768 Seminar in Latin American Art and Archaeology (3 Credits)
Repeatable to: 9 credits.

ARTH769 Seminar in African Art (3 Credits)
Repeatable to: 9 credits.

ARTH778 Seminar in Chinese Art (3 Credits)
Repeatable to: 9 credits.

ARTH779 Seminar in Japanese Art (3 Credits)
Repeatable to: 9 credits.

ARTH789 Selected Topics in Art History (1-3 Credits)

ARTH798 Directed Graduate Studies in Art History (3 Credits)

ARTH799 Master's Thesis Research (1-6 Credits)

ARTH898 Pre-Candidacy Research (1-8 Credits)

ARTH899 Doctoral Dissertation Research (1-8 Credits)

ARTT - Art Studio

ARTT409 Study Abroad Special Topics IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ARTT418 Advanced Drawing Studio (3 Credits)
Multi-level drawing studio emphasizing advanced concepts and processes related to drawing; emphasis on contemporary art issues and individual directions.
Prerequisite: ARTT200, ARTT210, and ARTT150; and must have completed one 300-level studio course. Or permission of ARHU-Art department.
Repeatable to: 12 credits.

ARTT426 Advanced Painting: Painting on Site I (3 Credits)
Designed for Art and design, architecture, urban planning, and public engagement majors seeking to gain more experience in the public art process. Through public artworks, students will explore ethical methods of community engagement, mural design and production. This course will have 1-2 visiting artists give lectures and/or participate in a workshop.
Prerequisite: ARTT320; or permission of the Art Department.

ARTT427 Advanced Painting: Painting on Site II (3 Credits)
Designed for Art and design, architecture, urban planning, and public engagement majors and Creative Placemaking minors seeking to build and strengthen relationships through public place-based artwork . This course will teach ethical methods of public outreach through community engagement, the stages of mural design, and research to aid the mural design phase. This course will also examine the various materials used to create a public work of art and apply them throughout the semester effectively.
Prerequisite: ARTT320.
Restriction: Permission of the Art Department.

ARTT428 Advanced Painting Studio (3 Credits)
Multi-level painting studio emphasizing advanced concepts and processes related to oil and acrylic painting; emphasis on contemporary art issues and individual directions in chosen media.
Prerequisite: ARTT320.
Repeatable to: 12 credits.

ARTT438 Advanced Sculpture Studio (3 Credits)
Multi-level sculpture studio; continuation of media-specific sculpture courses with emphasis on contemporary art issues and individual directions in chosen media.
Prerequisite: Must have completed one 300-level sculpture course; or permission of ARHU-Art department.
Repeatable to: 12 credits.

ARTT448 Advanced Printmaking Studio (3 Credits)
Multi-level printmaking studio; continuation of media-specific printmaking courses with emphasis on contemporary art issues and individual directions in chosen media.
Prerequisite: Must have one 300-level printmaking course; or permission of ARHU-Art department.
Repeatable to: 12 credits.

ARTT449 Advanced Photography Studio (3 Credits)
Advanced photographic processes and theory. Emphasis on contemporary art issues and individual directions.
Prerequisite: ARTT353; or permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT454 Advanced Graphic Design Principles: Design in Society (3 Credits)
Focus on social responsibility and community activism. History and theory of propaganda and advocacy-based design. Students explore current design practices, work individually, and collaborate in teams with non-profits or other clients with community-based or socio-cultural agendas. Research and writing-intensive course.
Prerequisite: ARTT355 and ARTT356.

ARTT455 Three Dimensional Graphic Design (3 Credits)
Continued exploration of advanced graphic design practices with primary emphasis on 3-D object and packaging design. Includes research, course reading discussion, oral presentations, and specific project assignments which will require a proficient level of hand-skills (craft) and computer skills.
Prerequisite: ARTT355, ARTT356, and ARTT357.
Recommended: ARTT333.
Credit Only Granted for: ARTT352 or ARTT455.
Formerly: ARTT352.

ARTT456 Motion Design (3 Credits)
Explores computer graphics and visual communication principles in a time-based context. Examination of fundamental design principles through digital projects that involve photo manipulation, digital illustration, layout, animation, and web design.
Prerequisite: ARTT355, ARTT356, and ARTT357; or permission of ARHU-Art department.

ARTT457 Advanced Interactive Design (3 Credits)
Advanced concepts and techniques of interactive design and interactive software. Examination of corporate, client-based, and public service-based interactive graphic design. Emphasis on web-based interactive design structures.
Prerequisite: ARTT357.

ARTT458 Graphic Design Portfolio (3 Credits)
Creation of a comprehensive professional portfolio. Curriculum includes portfolio preparation and presentation, contracts, copyright issues, interviewing skills, resume and cover-letter writing, design briefs and proposals, and freelance business issues. Portfolio presentation includes basics of book arts.
Prerequisite: ARTT454.
Repeatable to: 9 credits if content differs.

ARTT459 Advanced Graphic Design Studio (3 Credits)
Student-run design firm working with non-profits and other organizations. Organizations act as clients; the students as a creative firm. Under guidance and supervision of faculty, students learn first-hand about working with clients, working within a budget, working with printers and press runs, and working under real deadlines.
Prerequisite: ARTT454; or permission of ARHU-Art department.
Repeatable to: 9 credits if content differs.

ARTT460 Seminar in Art Theory (3 Credits)
Exploration of relationship between content and processes of art in a contemporary multi-cultural context.
Restriction: Senior standing.

ARTT468 Seminar on the Interrelationship Between Art and Art Theory (3 Credits)
The relationship between a student's work and the theoretical context of contemporary art.
Restriction: Junior standing or higher; or permission of ARHU-Art department.
Repeatable to: 6 credits if content differs.

ARTT469 Professional Practice (3 Credits)
Business aspects of being an artist, with an emphasis on starting and maintaining a professional career.
Restriction: Senior standing; or permission of ARHU-Art department.
Repeatable to: 6 credits if content differs.
Formerly: ARTT462.

ARTT479 Advanced Digital Media Studio (3 Credits)
Variable multi-level studio emphasizing advanced concepts and processes related to time-based, projection, installation, interactive, and audio/visual integrated digital art. Emphasis on contemporary art issues and individual directions.
Prerequisite: ARTT370; or permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT481 Advanced Specialization Seminar (3 Credits)
Seminar combines contemporary art theory, criticism, professional practice and career preparation in relation to students works from all areas of specialization.
Prerequisite: Permission of ARHU-Art department.

ARTT487 Capstone for Citation in Interdisciplinary Multimedia and Technology (1 Credit)
Independent study: a paper or website synthesizing the various citation learning experiences.
Prerequisite: Permission of ARHU-Art department.

ARTT488 Advanced Special Topics in Graphic Design (1-3 Credits)
Variable topics in Graphic Design theory and practice.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 6 credits if content differs.

ARTT489 Advanced Special Topics in Art (1-3 Credits)
Advanced studio art and theory within the context of a special topic.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT498 Directed Studies in Studio Art (1-3 Credits)
Advanced independent work in Studio Art. Meeting with faculty and studio time arranged.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT499 Directed Studies in Graphic Design (1-3 Credits)
Advanced independent studies in Graphic Design. Meetings with faculty and studio time arranged.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT618 Drawing (3 Credits)
Independent studies in drawing for advanced special students.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT628 Painting (3 Credits)
Graduate painting for advanced special students.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT638 Sculpture (3 Credits)
Independent studies in sculpture for advanced special students.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT648 Printmaking (3 Credits)
Independent studies in printmaking for advanced special students.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT689 Special Problems in Studio Art (3 Credits)
Restriction: Permission of instructor.
Repeatable to: 6 credits.
Formerly: ARTS689.

ARTT698 Directed Graduate Studies in Studio Art (1-4 Credits)
Independent work. Meetings with faculty and studio time arranged.
Prerequisite: Permission of ARHU-Art department.
Restriction: Must be in Studio Art (Master's) program.
Repeatable to: 12 credits if content differs.
Formerly: ARTS698.

ARTT699 Directed Graduate Studies in Studio Art (1-4 Credits)
Independent graduate studies.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 12 credits.

ARTT718 Drawing (3 Credits)
Independent studies in drawing for advanced special students.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT728 Painting (3 Credits)
Independent studies in painting for advanced special students.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT738 Sculpture (3 Credits)
Independent studies in sculpture for advanced special students.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT748 Printmaking (3 Credits)
Independent studies in printmaking for advanced special students.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT768 Graduate Colloquium (2 Credits)
Examines various aspects of art, art theory and criticism in a contemporary and multi-cultural context. Relates student work to this context.
Prerequisite: Permission of ARHU-Art department.
Repeatable to: 12 credits if content differs.

ARTT798 Directed Graduate Studies in Studio Art (1-4 Credits)
Independent graduate studies.
Restriction: Must be in Studio Art (Master's) program.
Repeatable to: 12 credits if content differs.
Formerly: ARTS798.

ARTT799 Master's Thesis Research (1-6 Credits)
Formerly: ARTS799.

ASTR - Astronomy

ASTR406 Stellar Structure and Evolution (3 Credits)
Study of stellar internal structure, nuclear reactions, and energy transport. Study of stellar evolution of both low-mass and high-mass stars, including the stellar end states of white dwarfs, neutron stars, and black holes.
Prerequisite: ASTR320; or permission of CMNS-Astronomy department.
Credit Only Granted for: ASTR498N or ASTR406.
Formerly: ASTR498N.

ASTR410 Radio Astronomy (3 Credits)
Introduction to current observational techniques in radio astronomy. The radio sky, radiophysics, coordinates and catalogs, antenna theory, Fourier transforms, interferometry and arrays, aperture synthesis, and radio detectors.
Prerequisite: ASTR121; and (PHYS271 and PHYS270; or PHYS273). Or permission of CMNS-Astronomy department.

ASTR415 Computational Astrophysics (3 Credits)
Introduction to the most important computational techniques being used in research in astrophysics. Topics include modern high performance computer architectures, scientific visualization and data analysis, and detailed descriptions of numerical algorithms for the solution to a wide range of mathematical systems important in astrophysics.
Prerequisite: ASTR121; and (PHYS271 and PHYS270; or PHYS273). Or permission of CMNS-Astronomy department. Jointly offered with ASTR615.
Credit Only Granted for: ASTR415 or ASTR615.

ASTR421 Galaxies (3 Credits)
Introduction to structure, kinematics, and dynamics of normal and peculiar galaxies. Quantitative descriptions of normal spiral galaxies (like our Milky Way) and elliptical galaxies will be followed by more exotic considerations such as interacting and merging galaxies, and active galactic nuclei.
Prerequisite: ASTR121; and (PHYS271 and PHYS270; or PHYS273). Or permission of CMNS-Astronomy department.

ASTR422 Cosmology (3 Credits)
Introduction to modern cosmology. Topics include large scale structure of universe, the intergalactic medium, the nature of dark matter cosmological models and galaxy formation.
Prerequisite: Must have completed or be concurrently enrolled in ASTR320; or permission of CMNS-Astronomy department.

ASTR430 The Solar System (3 Credits)
Formation and evolution of the Solar System. Planetary surfaces, interiors, atmospheres, and magnetospheres. Asteroids, comets, planetary satellites, and ring systems. Emphasis on using basic physics to understand observed properties of the Solar System. Intended for students majoring in the physical sciences.
Prerequisite: ASTR121; and (PHYS271 and PHYS270; or PHYS273). Or permission of CMNS-Astronomy department.

ASTR435 Astrophysics of Exoplanets (3 Credits)
Introduction to exoplanets. Topics include historical development, advantages, and limitations of detection methods, the statistics of exoplanet characteristics, the bulk properties of known expolanets, and remote sensing for characterization of exoplanets.
Prerequisite: ASTR121; and (PHYS273; or (PHYS270 and PHYS271)). Or permission of CMNS-Astronomy department.
Credit Only Granted for: ASTR498X or ASTR435.
Formerly: ASTR498X.

ASTR450 Orbital Dynamics (3 Credits)
Vectorial mechanics, motion in a central force field, gravitational and non-gravitational forces, the two-body and three-body problems, orbital elements and orbital perturbation theory, resonances in the solar system, chaos. Intended for students majoring in any of the physical sciences.
Prerequisite: Must have completed or be concurrently enrolled in ASTR320; or permission of CMNS-Astronomy department.

ASTR480 High Energy Astrophysics (3 Credits)
The structure, formation, and astrophysics of compact objects, such as white dwarfs, neutron stars, and black holes, are examined. Phenomena such as supernovae and high-energy particles are also covered.
Prerequisite: Must have completed or be concurrently enrolled in ASTR320; or permission of CMNS-Astronomy department.

ASTR498 Special Problems in Astronomy (1-6 Credits)
Research or special study. Credit according to work done.
Restriction: Must be in one of the following programs (Physics; Astronomy) ; and permission of CMNS-Astronomy department.

ASTR601 Radiative Processes (3 Credits)
Emission, absorption, and scattering of radiation by matter, with astrophysical applications. Thermodynamics and statistical mechanics: LTE, Boltzmann, and Saha equations; radiative transfer; atomic and molecular radiation; plasma radiation and transfer: bremsstrahlung, synchrotron emission, Compton scattering.
Restriction: Permission of CMNS-Astronomy department.

ASTR606 Stellar Structure and Evolution (3 Credits)
Models of stellar atmospheres, methods of determinins properties of stars, physical principles governing stellar interior processes, observational data for determining stellar evolution, nuclear processes, stellar modeling.
Prerequisite: ASTR601; or permission of CMNS-Astronomy department.

ASTR610 Astronomical Instrumentation and Techniques (3 Credits)
Review of Maxwell's equations; designs of telescopes, spectrographs, modern detectors; basic concepts for radio detectors and telescopes; interferometry and data processing.
Restriction: Permission of CMNS-Astronomy department.

ASTR615 Computational Astrophysics (3 Credits)
Introduction to computational techniques used in astrophysical research. Topics include modern high performance computer architectures, scientific visualization and data analysis, and detailed descriptions of numerical algorithms for the solution to a wide range of mathematical systems important in astrophysics.
Restriction: Permission of CMNS-Astronomy department.
Credit Only Granted for: ASTR415 or ASTR615.

ASTR620 Galaxies (3 Credits)
Galaxy classifications; Milky way: basic data, distribution of stars, gas, dust and relativistic particles, large-scale structure and rotation; Spiral galaxies: stellar dynamics and stability, density waves, star bursts, galactic center; Elliptical galaxies: stellar dynamics, cannabalism; galaxy formation.
Restriction: Permission of CMNS-Astronomy department.

ASTR622 Cosmology (3 Credits)
Introduction to modern cosmology. Topics include the large scale structure of the universe, cosmological models, the Big Bang, the cosmic microwave background, the nature of dark matter, and galaxy formation.
Restriction: Permission of CMNS-Astronomy department.

ASTR630 Planetary Science (3 Credits)
The science of our planetary system with an emphasis on the aspects of it, that help us understand the origin of the system and thus the relevance to other planetary systems. Topics will include planetary atmospheres, surfaces, and interiors and the small bodies of the solar system (asteroids, comets, Kuiper-belt objects). We will consider the dynamics of these bodies and the physics and chemistry of these bodies.
Restriction: Permission of CMNS-Astronomy department.

ASTR635 Exoplanetary Astrophysics (3 Credits)
Introduces students to the current state of the exoplanetary field, at a graduate level. Topics covered will include exoplanet detection, exoplanet demographics, planet formation and evolution, planetary atmospheres and interiors, and habitability.
Restriction: Permission of CMNS-Astronomy department.
Credit Only Granted for: ASTR635 or ASTR688E.
Formerly: ASTR688E.

ASTR670 Interstellar Medium and Gas Dynamics (3 Credits)
Content of phases of the interstellar medium: physical processes in the ISM: ionization equilibrium, heating and cooling, interstellar dust; gas dynamics: fluid motions, instabilities, shock waves; magnetohydrodynamics.
Prerequisite: ASTR601; or permission of CMNS-Astronomy department.

ASTR680 High Energy Astrophysics (3 Credits)
The structure, formation, and astrophysics of compact objects, such as white dwarfs, neutron stars, and black holes, are examined.
Restriction: Permission of CMNS-Astronomy department.
Formerly: ASTR688M.

ASTR688 Special Topics in Modern Astronomy (1-3 Credits)
Special topics such as extragalactic radio sources, plasma astrophysics, the H.R. diagram, chemistry of the interstellar medium, radiophysics of the sun.
Restriction: Permission of instructor.

ASTR690 Reasearch Project I (3 Credits)

ASTR695 Introduction to Research (1 Credit)
Provides an introduction to research programs in the Department of Astronomy and a forum to explore possible research projects. Aimed at incoming graduate students.

ASTR699 Special Problems in Advanced Astronomy (1-6 Credits)

ASTR788 Selected Topics in Modern Astronomy (1-3 Credits)

ASTR799 Master's Thesis Research (1-6 Credits)

ASTR898 Pre-Candidacy Research (1-8 Credits)

ASTR899 Doctoral Dissertation Research (1-8 Credits)

BCHM - Biochemistry

BCHM461 Biochemistry I (3 Credits)
First semester of a comprehensive introduction to modern biochemistry. Structure, chemical properties, and function of proteins and enzymes, carbohydrates, lipids, and nucleic acids. Basic enzyme kinetics and catalytic mechanisms.
Prerequisite: Minimum grade of C- in CHEM271 and CHEM272; or minimum grade of C- in CHEM276 and CHEM277.
Credit Only Granted for: BCHM461 or BCHM463.

BCHM462 Biochemistry II (3 Credits)
A continuation of BCHM 461. Metabolic pathways and metabolic regulation, energy transduction in biological systems, enzyme catalytic mechanisms.
Prerequisite: Minimum grade of C- in BCHM461.
Credit Only Granted for: BCHM462 or BCHM463.

BCHM463 Biochemistry of Physiology (3 Credits)
A one-semester introduction to general biochemistry. A study of protein structure, enzyme catalysis, metabolism, and metabolic regulation with respect to their relationship to physiology.
Prerequisite: Minimum grade of C- in CHEM271 and CHEM272; or minimum grade of C- in CHEM276 and CHEM277.
Credit Only Granted for: BCHM461, BCHM462 or BCHM463.

BCHM464 Biochemistry Laboratory (3 Credits)
Biochemical and genetic methods for studying protein function. Site-directed mutagenesis and molecular cloning, protein purification, enzyme activity assays, computer modeling of protein structure.
Prerequisite: BCHM461 or BCHM463; and a grade of C- or better in the prerequisite is required for all College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.
Corequisite: BCHM465.
Restriction: BCHM, CHEM, and Nutritional Sciences majors have first priority, followed by other life science majors.

BCHM465 Biochemistry III (3 Credits)
CORE Capstone (CS) Course. An advanced course in biochemistry. Biochemical approach to cellular information processing. DNA and RNA structure. DNA replication, transcription, and repair. Translation of mRNA to make proteins.
Prerequisite: BCHM461 or BCHM463; and a grade of C- or better in the prerequisite is required for College of Computer, Mathematical, and Natural Sciences majors and recommended for all students.
Recommended: BCHM462.

BCHM477 Biomolecular Measurement and Data Analysis (3 Credits)
Covers a range of classic and modern biochemical assays and techniques as well as introducing data science approaches to "omics" data. Upon successful completion of this course, students should have the necessary preparation and experience to collaborate productively with research scientists in industrial, clinical or academic contexts.
Prerequisite: CHEM271 or CHEM276; and (CHEM277 or CHEM272).
Restriction: Must be in the Chemistry or Biochemistry major.

BCHM485 Physical Biochemistry (3 Credits)
Physical Chemistry with applications to biological systems. Principal topics: quantum chemistry, spectroscopy, structural methods for biological macromolecules, statistical thermodynamics, transport processes in liquid phase, chemical and biochemical kinetics, modeling and simulation, polymer dynamics.
Prerequisite: Minimum grade of C- in CHEM481.
Restriction: Must be in Biochemistry program; or permission of instructor.
Credit Only Granted for: CHEM482 or BCHM485.

BCHM661 Nucleic Acids I (2 Credits)
Topics covered: Chemistry and structure of DNA and RNA, from nucleotides to chromatin, chromosomes, and genomes, and some methods for studying, synthesizing, sequencing and manipulating nucleic acids. Rudimentary genomics and bioinformatics. DNA Biology: selected aspects of the biochemistry and regulation of DNA replication, repair, and recombination, and how these processes interact with each other.
Prerequisite: BSCI410 and BCHM465.

BCHM662 Nucleic Acids II (2 Credits)
Topics covered: Interactions between nucleic acids and ligands such as cations, drugs, and especially proteins. Sources of binding affinity and specificity. Selection-amplification methods. Description of several classes of protein-nucleic acids complexes. DNA/RNA catalysis, the origin of life, mobile genetic elements.
Prerequisite: BCHM661.

BCHM668 Special Problems in Biochemistry (2-4 Credits)
Prerequisite: BCHM464; or students who have taken courses with comparable content may contact the department.

BCHM669 Special Topics in Biochemistry (1-3 Credits)
Prerequisite: BCHM462; or students who have taken courses with comparable content may contact the department.

BCHM671 Protein Chemistry and Enzymic Catalysis (3 Credits)
Principles of protein structure, folding, and function, experimental characterization of structure, active sites, enzyme mechanisms and kinetics.
Prerequisite: BCHM461; or students who have taken courses with comparable content may contact the department.

BCHM675 Biophysical Chemistry (3 Credits)
Conformation, shape, structure, conformational changes, dynamics and interactions of biological macromolecules and complexes or arrays of macromolecules. Physical techniques for studying properties of biological macromolecules.
Prerequisite: CHEM481 and BCHM461; or students who have taken courses with comparable content may contact the department.

BCHM676 Biological Mass Spectrometry (3 Credits)
Fundamentals of modern mass spectrometry and use with biochemical techniques to provide unique analyses of drug metabolites, lipids, carbohydrates, nucleotides and proteins. The interface with bioinformatics will be examined, which provides the foundation of proteomics.
Prerequisite: BCHM461 or BCHM463.
Formerly: BCHM669B.

BCHM677 Computational Tools in Biochemistry (1 Credit)
A practical, hands-on introduction to the application of computational tools that support biochemistry research. Selected topics may include: efficient use of scientific literature databases and the preparation of professional bibliographies; proteomics and mass spectrometry; bioinformatics and genomics programs an database resources; molecular structure visualization and modeling; quatitative data fitting and error analysis; and laboratory research ethics.
Prerequisite: BCHM674 or BCHM671; or permission of instructor.
Restriction: Must be in one of the following programs (Biochemistry (Master's); Biochemistry (Doctoral)) ; or permission of instructor.

BCHM698 Literature Seminar in Biochemistry (2 Credits)
Students will prepare and present a departmental seminar based on a topic in the current biochemical research literature.
Repeatable to: 2 credits if content differs.

BCHM699 Special Problems in Biochemistry (1-6 Credits)
Laboratory experience in a research environment. Restricted to students in the non-thesis M.S. option.
Prerequisite: Must have completed one semester of graduate study in biochemistry; and must be in the Biochemistry Masters program non-thesis M.S. option.
Repeatable to: 6 credits if content differs.

BCHM799 Master's Thesis Research (1-6 Credits)

BCHM889 Seminar (1-3 Credits)

BCHM898 Pre-Candidacy Research (1-8 Credits)

BCHM899 Doctoral Dissertation Research (1-8 Credits)

BEES - Behavior, Ecology, Evolution and Systematics

BEES608 Seminar in Behavior, Ecology, Evolution and Systematics (1-4 Credits)
One seminar per week for each subject selected: Behavior; Ecology; Evolution; Systematics; Behavior, Ecology, Evoultion and Systematics.
Repeatable to: 15 credits if content differs.

BEES609 Special Topics in Behavior, Ecology, Evolution and Systematics (1-6 Credits)
Lectures, experimental courses and other special instructions in topics appropriate for Behavior, Ecology, Evolution and Systematics (BEES) students.
Repeatable to: 12 credits if content differs.

BEES708 Advanced Topics in Behavior, Ecology, Evolution, and Systematics (1-4 Credits)
Lectures, experimental courses, and other special instruction in various behavioral, ecology, evolution and systematics subjects.
Repeatable to: 12 credits if content differs.

BEES799 Master's Thesis Research (1-6 Credits)

BEES898 Pre-Candidacy Research (1-8 Credits)

BEES899 Doctoral Dissertation Research (1-8 Credits)

BERC - Center for Study of Business, Ethics, Regulation, Crime

BERC600 Legal and Regulatory Compliance (3 Credits)
Global anticorruption law (including the Foreign Corrupt Practices Act, the UK Bribery Act, the OECDs Convention on Combating Bribery of Foreign Public Officials in International Business Transactions, Canadas Corruption of Public Officials Act, and the Inter American Convention Against Corruption). Sarbanes Oxley compliance (including certification requirements, whistleblower protection, and audit committees). Financial integrity (including money laundering, insider trading, market manipulation, conflicts of interest, and privacy). Internal investigations or attorney client privilege. Compliance (antitrust, food and drug, environmental, occupational safety and health).

BERC601 White-Collar Crime and Victimization (3 Credits)
History, definitions, categories and trends of white collar crime, within the US and globally. The corporation as offender and the corporation as victim; Data sources and measurement; Theories of offending and victimization; Costs of crime, correlates of crime, and risks; Internal compliance systems; Enforcement strategies (deterrence/compliance); responsive regulation; enforcement pyramid; Policy assessment.

BERC602 Accounting and Its Uses in the Forensic Process (3 Credits)
An introduction to accounting for the uninitiated (an introduction to bookkeeping, key accounts, financial statements and their composition, and concepts in managerial accounting). Principles of forensic accounting and the use of financial statement analysis in the forensic process (common fraud schemes in the areas of fraudulent financial reporting, misappropriation of resources, corruption and illegal acts, how fraud schemes typically appear in the accounting records and financial statements of an enterprise or agency, the use of financial statement analysis and analytics to detect fraud, differences between a routine financial statement audit and a forensic audit, the limitations on financial statement audits in the discovery of fraud, how budgeting issues in managerial accounting can pressure managers to act unethically or illegally).

BERC603 Investigative tools and Data Analysis (3 Credits)
Techniques to electronically capture and integrate data from a variety of different sources aimed to assist managerial decision-making in such areas as fraud detection. Focus on large data sets for data mining/machine learning tools for classifications (such as decision trees, neural networks, techniques to recognize patterns in the data and regression modeling and statistics to aid prediction). Learning and utilizing appropriate software (e.g., XLMiner). Computer-aided analysis techniques for detecting and investigating white-collar offenses, issues related to the collective use of digital evidence and the collection of data from electronic devices. Extensive use of case studies as examples.

BIOE - Bioengineering

BIOE404 Biomechanics (3 Credits)
Introduction to the fundamentals of biomechanics including force analysis, mechanics of deformable bodies, stress and strain, multiaxial deformations, stress analysis, and viscoelasticity. Biomechanics of soft and hard tissues.
Prerequisite: MATH246, BIOE120, ENES102, BIOE121, and BIOE241; and must have completed or be concurrently enrolled in BIOE371.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE411 Tissue Engineering (3 Credits)
A review of the fundamental principles involved in the design of engineered tissues and organs. Both biological and engineering fundamentals will be considered.
Prerequisite: Must have completed at least one biology course; and (BIOE120, BIOE121, BIOE241, MATH246, and MATH241). Or permission of ENGR-Fischell Department of Bioengineering department.
Recommended: BSCI330 and BIOE340.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE411 or CHBE487.

BIOE413 Stem Cell Engineering (3 Credits)
Provides an introduction to the role of stem cells in tissue growth and development, the engineering of stem cells and their environments for regenerative medicine applications, and disease modeling. Topics covered will include basic stem cell biology and mechanobiology; experimental methods for growing, differentiating, studying, and characterizing stem cells; stem cell integration into engineered microenvironments (e.g., tissue scaffolds and biomaterials, organ-on-chip devices, 3D-printed biomaterials); stem cell engineering in clinical applications and disease models; and ethical, commercialization, and regulatory issues in the field of stem cell engineering.
Prerequisite: BIOE241, BIOE120, BIOE121, MATH246, and BIOE340.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department. Jointly offered with: BIOE613.
Credit Only Granted for: BIOE413, BIOE689J or BIOE613.

BIOE414 Macroscale Biomechanics (3 Credits)
An overview of current problems in movement biomechanics. After taking this course, students will be able to 1) Describe the engineering tools needed to study human movement 2) Recognize a variety of clinical research and practice, and 3) Use the framework provided by the course to pursue their own self-teaching and research on these topics. Topics covered include muscle mechanics, joint mechanics, EMG and EEG signal applications, ultrasonography and elastography, anthropometry, human movement 3-D kinematics, inverse dynamics, forward dynamics, work, power and energy. Biomechanics tools will be used to investigate clinical problems. Students will also do research projects on related topics.
Prerequisite: BIOE120, BIOE121, BIOE241, MATH246, and ENES102.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE414 or BIOE489Z.
Formerly: BIOE489Z.

BIOE416 Cardiovascular Engineering (3 Credits)
An overview of engineering applications in the cardiovascular system. Covers cardiovascular anatomy, physiology and pathophysiology in the context of cell and tissue mechanics, fluid mechanics, thermodynamics, biotransport, neurovascular coupling, and imaging. Includes design of cardiovascular devices, sensors, biomaterials, and tissue engineered constructs.
Prerequisite: BIOE331 and BIOE340.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE416 or BIOE489V.
Formerly: BIOE489V.

BIOE420 Bioimaging (3 Credits)
Examines the physical principles behind major biomedical imaging modalities and new ways of using images for bio-related applications.
Prerequisite: MATH246, BIOE120, BIOE121, and BIOE241.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE431 Fundamentals of Biosensor Techniques, Instrumentation, and Applications (3 Credits)
A thorough review of fundamental concepts of biosensing systems, principles of common detection methods, and modern applications of biosensors. Primarily literature driven. Students will obtain a detailed understanding of cutting-edge biosensing techniques, the instrumentation used, and the application space. Students also will develop skills in using current literature as a source of knowledge.
Prerequisite: CHEM135, PHYS260, PHYS261, BSCI330, BIOE120, BIOE121, BIOE241, and MATH246; or permission of ENGR-Fischell Department of Bioengineering department.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE433 Optical Microscopy (3 Credits)
Includes a large variety of techniques central in many fields of biological and engineering research as well as clinical medicine. This course will provide a comprehensive overview of the fundamentals of optical microscopy. At a fundamental level, the course will cover the interaction of light with tissue, cells and biomaterials, and the mathematical foundations that describe optical systems.
Prerequisite: BIOE120, BIOE121, BIOE241, BIOE371, and MATH246.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE489I or BIOE433.
Formerly: BIOE489I.

BIOE437 Computer-Aided Design in Bioengineering (3 Credits)
Introduction to Computer-Aided Design (CAD). Lecture topics will summarize design methodology, review best-practices in hardware development, and discuss engineering applications. The course will culminate in a student-selected project leveraging CAD.
Prerequisite: BIOE120, BIOE121, BIOE241, and MATH246; or permission of ENGR-Fischell Department of Bioengineering department.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE437, BIOE689V, ENME414, ENME272, or ENAE488D.
Formerly: BIOE689V.

BIOE442 Python: Introduction to Programming and Data Analysis (3 Credits)
Provides an introduction to structured programming, computational methods, and data analysis techniques with the goal of building a foundation allowing students to confidently address problems in research and industry. Fundamentals of programming, algorithms, and simulation are covered from a general computer science perspective, while the applied data analysis and visualization portion makes use of the Python SciPy stack.
Prerequisite: BIOE241, BIOE120, BIOE121, and MATH241; or permission of ENGR-Fischell Department of Bioengineering department.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE489A or BIOE442.
Formerly: BIOE489A.

BIOE447 Clinical Experiences in Bioengineering (3 Credits)
An immersion experience in the clinical settings in which biomedical engineering strategies, technologies, and practices are applied. An emphasis will be placed on both clinical problems and engineering solutions.
Prerequisite: BIOE221.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE489O or BIOE447.
Formerly: BIOE489O.

BIOE453 Biomaterials (3 Credits)
Examination of the structure and function of natural biomaterials, and cell-extracellular matrix interactions. Study physical properties of synthetic biomaterials for biomedical applications. Understanding molecular level interactions between biomolecules and biomaterials to design novel biomaterials with desirable characteristics. Application of biomaterials as implants, drug delivery systems, biosensors, engineered materials such as artificial skin and bone growth scaffolds will be covered.
Prerequisite: CHEM231, MATH246, CHEM232, BIOE120, BIOE121, and BIOE241.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE453, CHBE457, or ENMA425.

BIOE457 Biomedical Electronics & Instrumentation (4 Credits)
Students learn fundamental concepts of electronics, assembly of electronic components into functional circuits, and integration of functional electronic devices and circuits into a system. In the lab component, students will learn to assemble and evaluate circuits and systems.
Prerequisite: BIOE120, BIOE121, BIOE241, PHYS261, MATH246, and PHYS260.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE461 Synthetic Biology and Biological Engineering (3 Credits)
Students are introduce to the scientific foundation and concepts of synthetic biology and biological engineering. Current examples that apply synthetic biology to fundamental and practical challenges will be emphasized. The course will also address the societal issues of synthetic biology, and briefly examine interests to regulate research in this area.
Prerequisite: BIOE120, BIOE121, BIOE241, and MATH246; or permission of ENGR-Fischell Department of Bioengineering department.
Recommended: Completion of BSCI222 and/or BSCI330 recommended.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE462 Therapeutic Development and Delivery (3 Credits)
The ultimate purpose of the pharmaceutical and biotechnology industries is the development and delivery of therapeutics. This course covers fundamentals of engineering and the pharmaceutical sciences related to therapeutics, including basic pharmaceutics/drug delivery, pharmacokinetics, biomolecular kinetics, and regulatory issues. Specific focus is placed on biotherapeutics, including antibodies and protein engineering,RNA and DNA therapeutics (gene therapy and RNAi), extracellular vesicle biotechnology (exosomes), and cell-based therapies, including stem cells. The use of delivery technologies to enable therapeutics (e.g. nanomedicine) will also be discussed.
Prerequisite: BIOE120, BIOE121, BIOE241, MATH246, and BSCI330; and must have completed or be concurrently enrolled in BIOE340.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE489P or BIOE462.
Formerly: BIOE489P.

BIOE464 Introduction to Computational Molecular Bioengineering (3 Credits)
Designed to introduce students to the principles, methods, and software used for simulation and modeling of macromolecules of biological interest such as proteins, lipids, and polysaccharides. Along with experiment and theory, computational modeling provides new tools for analysis, explanation and prediction. The course is also useful for students who plan to use experimental techniques as their primary approach, but who will employ computational modeling as a tool to obtain integrative understanding of complex systems. Finally, the course should be valuable as an introductory overview for students planning to conduct their thesis research in computational modeling of biological systems. Class topics: Basic statistical thermodynamics, Force fields, Molecular dynamics/ monte carlo methods, Conformational analysis, Fluctuations & transport properties, Free-energy calculations, Multiscale modeling.
Prerequisite: BIOE120, BIOE241, MATH246, BIOE232, and BIOE372; or permission of ENGR-Fischell Department of Bioengineering department.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE489N or BIOE464.
Formerly: BIOE489N.

BIOE468 Selected Topics in Bioengineering (3 Credits)
Selected topics in Bioengineering will be covered and taught by a variety of department faculty.
Prerequisite: BIOE120 and BIOE121.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Repeatable to: 9 credits if content differs.

BIOE485 Capstone Design I: Entrepreneurship, Regulatory Issues, and Ethics (3 Credits)
This is the first part of a two-semester senior capstone design course which covers principles involved in engineering design, design approaches, economics of design, ethics in engineering, and patent regulations. It also helps students learn team work and write design project proposals under the mentorship of a faculty advisor.
Prerequisite: 21 credits in BIOE courses.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department; and senior standing; and must be in Engineering: Bioengineering program.
Credit Only Granted for: BIOE485 or ENBE485.
Formerly: ENBE485.

BIOE486 Capstone Design II (3 Credits)
This is the second part of the senior capstone design course. This part is independent instruction where faculty mentoring each project team works with students to order supplies, fabricate their proposed design under BIOE485, test the design, write the report and present it to their fellow seniors and board of faculty mentors. Students are taught to convert the blue print of a design to actual device and test it.
Prerequisite: Must have completed BIOE485 in the immediately preceding semester.
Restriction: Senior standing; and must be in Engineering: Bioengineering program; and permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE486 or ENBE486.
Formerly: ENBE486.

BIOE488 Research Methods in Bioengineering (1-3 Credits)
Exploring a variety of research methods in the field of Bioengineering.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Repeatable to: 9 credits if content differs.

BIOE489 Special Topics in Bioengineering (1-3 Credits)
Exploring a variety of topics with Bioengineering.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Repeatable to: 6 credits.

BIOE601 Biomolecular and Cellular Rate Processes (3 Credits)
Presentation of techniques for characterizing and manipulating non-linear biochemical reaction networks. Advanced topics to include mathematical modeling of the dynamics of biological systems; separation techniques for heat sensitive biologically active materials; and rate processes in cellular and biomolecular systems. Methods are applied to current biotechnological systems, some include: recombinant bacteria; plant insect and mammalian cells; and transformed cell lines.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE601 or ENCH859B.

BIOE602 Cellular and Tissue Biomechanics (3 Credits)
Introduction to the fundamentals of biomechanics including force analysis, mechanics of deformable bodies, stress and strain, multiaxial deformations, stress analysis, and viscoelasticity. Biomechanics of soft and hard tissues.

BIOE604 Cellular and Physiological Transport Phenomena (3 Credits)
A study of transport processes, including momentum, energy and mass transport, relevant to biosystems at various scales from physiological to cellular systems. Transport leads to sets of partial differential equations and the course revolves around approaches to solving these equations to arrive at fundamental understanding of the physics of transport in biosystems.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE605 BIOE Graduate Studies I (1 Credit)
Introduction to the bioengineering graduate program. Students gain exposure to departmental research through lab rotation and to current research in the field through seminar. Students will also gain preparation and guidance on other first-year academic requirements.
Restriction: Must be in ENGR: PhD Only-Bioengineering (Doctoral) program.

BIOE606 BIOE Graduate Studies II (1 Credit)
Second semester continued acclimation to the bioengineering graduate program. Students gain exposure to departmental research through lab rotation and to current research in the field through seminar.
Restriction: Must be in ENGR: PhD Only-Bioengineering (Doctoral) program.

BIOE608 Bioengineering Seminar Series (1 Credit)
A variety of topics related to Bioengineering will be presented in weekly seminars.
Restriction: Must be in one of the following programs (ENGR: PhD Only-Bioengineering (Master's); ENGR: PhD Only-Bioengineering (Doctoral)).
Repeatable to: 6 credits if content differs.

BIOE610 Mathematical Methods in Bioengineering (3 Credits)
From diffusion problems to light-matter interactions, students will learn basic skills needed to create mathematical models in bioengineering. Students will first be exposed to simplified problems in analytical form, and then more complex problems with the help of computer software programs.
Restriction: Permission of ENGR-Fischell Department of Bioengineering.

BIOE611 Advanced Tissue Engineering (3 Credits)
A review of the fundamental principles involved in the design of engineered tissues and organs. Both biological and engineering fundamentals will be considered.
Prerequisite: Must have completed at least one biology course; and MATH241. Or permission of ENGR-Fischell Department of Bioengineering department.
Recommended: BSCI330 and BIOE340.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE612 Physiological Evaluation of Bioengineering Designs (3 Credits)
Bioengineering designs of biomaterials, biomedical devices, imaging and drug delivery agents, tissue engineering, prosthesis (among others), offer the opportunity to improve health care. This course is aimed at providing knowledge to lead bioengineering designs on the basis of biocompatibility and to provide tools to assess their patho-physiological impact in biological systems.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.

BIOE613 Stem Cell Engineering (3 Credits)
Provides an introduction to the role of stem cells in tissue growth and development, the engineering of stem cells and their environments for regenerative medicine applications, and disease modeling. Topics covered will include basic stem cell biology and mechanobiology; experimental methods for growing, differentiating, studying, and characterizing stem cells; stem cell integration into engineered microenvironments (e.g., tissue scaffolds and biomaterials, organ-on-chip devices, 3D-printed biomaterials); stem cell engineering in clinical applications and disease models; and ethical, commercialization, and regulatory issues in the field of stem cell engineering.
Restriction: Permission of ENGR-Fischell Department of Bioengineering. Jointly offered with: BIOE413.
Credit Only Granted for: BIOE489J, BIOE413, BIOE689J or BIOE613.
Formerly: BIOE689J.

BIOE631 Biosensor Techniques, Instrumentation, and Applications (3 Credits)
A thorough review of fundamental concepts of biosensing systems, principles of common detection methods, and modern applications of biosensors. Primarily literature driven. Students will obtain a detailed understanding of cutting-edge biosensing techniques, the instrumentation used, and the application space. Students also will develop skills in using current literature as a source of knowledge.
Prerequisite: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE631, BIOE689Z, or CHPH718Z.
Formerly: BIOE689Z.

BIOE632 Biophotonic Imaging and Microscopy (3 Credits)
Principles and instrumentation of various biomedical optical techniques, including fluorescene and Raman spectroscopy, confocal and multi-photon microscopy, optical coherence tomography, and diffuse optical tomography. Biomedical aplications will also be discussed.
Recommended: BIOE420.
Restriction: Permission of ENGR-Fischell Department of Bioengineering department.
Credit Only Granted for: BIOE432, BIOE632, or BIOE689C.

BIOE640 Polymer Physics (3 Credits)
Graduate course covering theoretical aspects of the behavior of polymeric materials. It covers statistical properties and thermodynamics of single chain and multichain systems.
Prerequisite: ENMA471; or permission of instructor.
Credit Only Granted for: ENMA620 or BIOE640.

BIOE650 Quantitative Physiology of the Cell (3 Credits)
Introduction to quantitative aspects of neuronal, skeletal muscle, and cardiac physiological systems, with an emphasis on cellular function and plasticity. Complements BIOE603: Electrophysiology of the Cell.
Recommended: MATH246, MATH141, and MATH241.
Credit Only Granted for: BIOE689Q or BIOE650.
Formerly: BIOE689Q.

BIOE651 Applied Mathematics in Bioengineering (3 Credits)
Students will use and learn mathematical concepts that are directly relevant to their career as a bioengineer. They will apply these concepts to various bioengineering applications while also learning industry-relevant analytical software.
Restriction: Restricted to Master's of Engineering - Bioengineering students; or permission of Fischell Department of Bioengineering.
Credit Only Granted for: BIOE651 or BIOE658M.
Formerly: BIOE658M.

BIOE652 Regulatory Affairs in Medical Product Development (3 Credits)
An introductory course on regulations associated with the development and production of medical devices and pharmaceuticals.
Restriction: Restricted to Master's of Engineering - Bioengineering students; or permission of Fischell Department of Bioengineering.
Credit Only Granted for: BIOE652, ANTH627 or BIOE658R.
Formerly: BIOE658R.

BIOE654 Physiology for Bioengineers (3 Credits)
Bioengineering-based designs of biomaterials, biomedical devices, imaging and drug delivery agents, tissue engineering, and prosthesis (among others), offer the opportunity to improve health care. This course is aimed at providing biological knowledge to lead bioengineering designs on the basis of biocompatibility and to provide tools to assess their patho-physiological impact in biological systems.
Restriction: Restricted to Master's of Engineering - Bioengineering students; or permission of Fischell Department of Bioengineering.
Credit Only Granted for: BIOE654 or BIOE658P.
Formerly: BIOE658P.

BIOE658 Special Topics in Bioengineering (M.Eng.) (1-3 Credits)
Special topics in Bioengineering.
Restriction: Must be in the Master of Engineering program or Post-Baccalaureate Certificate of Engineering program; and permission of ENGR-Fischell Department of Bioengineering department.
Repeatable to: 99 credits if content differs.

BIOE664 Computational Molecular Bioengineering (3 Credits)
Designed to introduce students to the principles, methods, and software used for simulation and modeling of macromolecules of biological interest such as proteins, lipids, and polysaccharides. Along with experiment and theory, computational modeling provides new tools for analysis, explanation and prediction. The course is also useful for students who plan to use experimental techniques as their primary approach, but who will employ computational modeling as a tool to obtain integrative understanding of complex systems. Finally, the course should be valuable as an introductory overview for students planning to conduct their thesis research in computational modeling of biological systems. Class topics: Basic statistical thermodynamics, Force fields, Molecular dynamics/ monte carlo methods, Conformational analysis, Fluctuations & transport properties, Free-energy calculations, Multiscale modeling.
Restriction: Permission of ENGR-Fischell Department of Bioengineering.
Credit Only Granted for: BIOE489N, BIOE464, BIOE689U, or BIOE664.
Formerly: BIOE689U.

BIOE689 Special Topics in Bioengineering (1-3 Credits)
Research Oriented Individual Instruction course.
Repeatable to: 6 credits if content differs.

BIOE799 Master's Thesis Research (1-6 Credits)

BIOE898 Pre-Candidacy Research (1-8 Credits)

BIOE899 Doctoral Dissertation Research (1-8 Credits)

BIOL - Biology

BIOL600 Ethics in Scientific Research (2 Credits)
Issues of sceintific integrity with emphasis on investigators in the laboratory sciences, including mentoring, scientific record keeping, authorship and peer review, ownership of data, use of animals and humans in research, and conflict of interest.
Restriction: Must have completed at least one year of graduate study.
Credit Only Granted for: BIOL600 or ZOOL600.
Formerly: ZOOL600.

BIOL608 Biology Seminar (1-2 Credits)
Repeatable to: 8 credits if content differs.
Formerly: ZOOL608.

BIOL609 Special Problems in Biology (1-6 Credits)
One seminar per week for each subject selected: A-Cell Biology; B-Developmental Biology; C-Estuarine and Marine Biology; D-Genetics; E-Parasitology; F-Physiology; G-Systematics and Evolutionary Biology; I-Behavior; J-General; K-Endocrinology; L-Ecology.
Repeatable to: 6 credits if content differs.
Formerly: ZOOL609.

BIOL613 Recombinant DNA (3 Credits)
An advanced course presenting the tools and procedures of genetic engineering. Theory and practical applications of recombinant DNA techniques to understanding eukaryotic gene structure and expression.
Prerequisite: BSCI330 or BSCI230; and BSCI222. Or permission of instructor required.
Credit Only Granted for: BIOL613 or ZOOL652.
Formerly: ZOOL652.

BIOL615 Developmental Genetics (3 Credits)
Differential gene function and its regulation in developing systems. Genes and the analysis of developmental processes.
Prerequisite: Must have completed courses in molecular genetics and developmental or cell biology; or permission of instructor.
Credit Only Granted for: BIOL615 or ZOOL642.
Formerly: ZOOL642.

BIOL620 Cell Biology (3 Credits)
Offered with laboratory as BSCI 421. Molecular basis of cell structure and function in eukaryotes.

BIOL622 Membrane Transport Phenomena (3 Credits)
The fundamental phenomena related to solute movement in bulk solution and across interfaces. Examination of natural and artificial membrane transport systems, with emphasis placed on their mechanism of action.
Prerequisite: (MATH120; or must have completed MATH220); and (BSCI330 or BSCI230). Or permission of instructor.
Credit Only Granted for: BIOL622 or ZOOL622.
Formerly: ZOOL622.

BIOL625 Biological Ultrastructure (3 Credits)
The ultrastructure of cells and tissues, with emphasis on interpretation and correlation of ultrastructure and function.
Prerequisite: Must have completed a course in Cell Biology or Histology; or permission of instructor.
Credit Only Granted for: BIOL625 or ZOOL615.
Formerly: ZOOL615.

BIOL641 Comparative Physiology (4 Credits)
Cellular and biochemical processes used by animals to interact with both the external and cellular environment. Water balance, intermediary metabolism, nitrogen metabolism, anaerobic metabolism, thermal regulation, nerve and muscle physiology in cells from a broad variety of animal species are considered.
Prerequisite: One year of biology, one year of organic chemistry, and one semester of physiology.
Credit Only Granted for: BIOL641 or ZOOL621.
Formerly: ZOOL621.

BIOL646 Hearing (3 Credits)
Principles of hearing, covering the auditory periphery, the physiology and anatomy of the central auditory system and psychoacoustics.
Prerequisite: BSCI330 or BSCI230; or permission of instructor.

BIOL660 Theoretical Population and Community Ecology (3 Credits)
Application of simple dynamic systems and optimization models to understand the dynamics of populations and ecological communities; population growth, predator-prey interactions, competition, food webs, foraging theory, and evolution of life histories. Instruction and use of the program Mathematica.
Prerequisite: Must have completed one year of college calculus. And BSCI462; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: BIOL660 or ZOOL675.
Formerly: ZOOL675.

BIOL667 Mathematical Biology (4 Credits)
Mathematical methods of analyzing deterministic and stochastic biological processes from a variety of areas (including population and evolutionary biology, neurobiology, physiology, and morphogenesis). Qualitative aspects of dynamical systems which are usually given as difference or differential equations. The computer program Mathematica will be used to obtain the numerical solutions of these equations.
Credit Only Granted for: BIOL667 or ZOOL625.
Formerly: ZOOL625.

BIOL671 Molecular Evolution (3 Credits)
Basic foundations through advanced concepts in molecular evolution, including patterns and processes of DNA sequence variation, transposable element dynamics, gene duplication and loss, and genome organization. Relevant concepts from genetics, biochemistry, and phylogenetics also will be covered.
Credit Only Granted for: BIOL671 or ZOOL645.
Formerly: ZOOL645.

BIOL704 Cell Biology from a Biophysical Perspective (3 Credits)
An approach to cell biology by focusing on mechanisms and unifying paradigms. It will not assume a great deal of factual biological knowledge, but will expect a background that prepares students to think quantitatively and mechanistically.
Recommended: BSCI330, PHYS121, and PHYS122. Cross-listed with: BIPH704. Jointly offered with: BSCI404.
Credit Only Granted for: BSCI404, BIOL704, BIOL708O, or BIPH704.
Formerly: BIOL708O.

BIOL705 Statistics & Modeling for Biologists (3 Credits)
An overview of essential probability and statistics using R with a focus on biological problems. Topics include: parameter estimation (likelihood, Bayesian), confidence intervals and hypothesis testing, multiple testing, experimental design and power analysis, and resampling-based measures of uncertainty. Practical use of computers will be emphasized.
Restriction: Must be in the Biological Sciences Graduate program; or permission of Biology Department.
Credit Only Granted for: BIOL705 or BIOL709F.
Formerly: BIOL709F.

BIOL708 Advanced Topics in Biology (1-4 Credits)
Lectures, experimental courses and other special instructions in various zoological subjects.
Repeatable to: 8 credits if content differs.
Credit Only Granted for: BIOL708 or ZOOL708.
Formerly: ZOOL708.

BIOL709 Selected Advanced Topics in Biology (1-4 Credits)
Lectures, experimental courses and other special instructions in various biological subjects.
Repeatable to: 16 credits.

BIOL710 Plant Ecological Genetics (3 Credits)
Plant ecological genetics is focused on the processes responsible for evolution in plant populations. Covers the basic principle of population genetics, then quickly shifts towards understanding how allele frequencies can change in an ecological context. Emphasis is placed on the role of drift and selection in evolution, and particular attention is placed on plant mating system evolution.
Prerequisite: BSCI472 and BSCI222; or permission of instructor.
Credit Only Granted for: BIOL710 or PBIO745.
Formerly: PBIO745.

BIOL762 Physiological Plant Ecology (2 Credits)
Environmental effects on plant ecophysiology. Microclimatology, leaf energy balance, plant responses to temperature and radiation, physiological adaptations, water relations and plant gas exchange.
Prerequisite: BSCI460; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: BIOL762 or PBIO755.
Formerly: PBIO755.

BIOL765 Sociobiology (4 Credits)
Deals with the description and analysis of animal social organizations the adaptive nature of animal societies, the effects of early experience, and the role of communication in the integration of animal groups.
Prerequisite: Must have completed a course in behavior.
Restriction: Permission of instructor.
Credit Only Granted for: BIOL765 or ZOOL665.
Formerly: ZOOL665.

BIOL767 Behavioral Endocrinology (3 Credits)
The interactive effects of hormones and behavior. Emphasis on the reproductive and stress hormones as they affect the brain and behavior.
Prerequisite: BSCI342 or BSCI447.
Credit Only Granted for: BIOL767 or ZOOL627.
Formerly: ZOOL627.

BIOL799 Master's Thesis Research (1-6 Credits)
Formerly: ZOOL799.

BIOL898 Pre-Candidacy Research (1-8 Credits)

BIOL899 Doctoral Dissertation Research (1-8 Credits)
Formerly: ZOOL899.

BIOM - Biometrics

BIOM405 Computer Applications in Biometrics (1 Credit)
An introduction to computer applications for data analysis. This is equivalent to the computer lab of 601 and is required for students that have taken BIOM301 and BIOM402 and wish to go directly into BIOM602.

BIOM601 Biostatistics I (4 Credits)
Estimation and hypothesis testing, t tests, one and two way analysis of variance, regression, analysis of frequency data. Lecture will emphasize uses and limitations of these methods in biology, while the laboratory will emphasize the use of statistical analysis software for the analysis of biological data.
Prerequisite: BIOM301 or STAT464; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: BIOM401 or BIOM601.

BIOM602 Biostatistics II (4 Credits)
The principles of experimental design and analysis of variance and covariance.
Prerequisite: BIOM601 or BIOM405.

BIOM603 Biostatistics III (4 Credits)
Applications and implementation of linear model analysis to biological data, including multivariate regression model, mixed model, generalized linear mixed model, nonlinear logistic and Poisson regression models, power calculation and survival analysis.
Prerequisite: Must have completed a graduate-level statistical class; or students who have taken courses with comparable content may contact the department.

BIOM621 Applied Multivariate Statistics (3 Credits)
Brief review of matrix algebra, means, covariance matrices, multivariate normal, multivariate confidence ellipses, MANOVA, Discriminant Methods, Principal Component Analysis, Factor Analysis, Multidimensional Scaling, Cluster Analyses, and other topics, depending on student interest.
Prerequisite: BIOM602.
Recommended: BIOM603.

BIOM688 Topics in Biometrics (1-3 Credits)
Advanced topics of current interest in various areas of biometrics. Credit assigned will depend on lecture and/or laboratory time scheduled and organization of the course.
Restriction: Permission of AGNR-Animal & Avian Sciences department.
Repeatable to: 6 credits if content differs.

BIOM698 Special Problems in Biometrics (1-3 Credits)
Individual study of a particular topic in biostatistics or biomathematics.
Restriction: Permission of AGNR-Animal & Avian Sciences department; and permission of instructor.
Repeatable to: 6 credits if content differs.

BIOM699 Seminar in Biometrics (1 Credit)

BIPH - Biophysics

BIPH698 Biophysics Seminar (1 Credit)

BIPH699 Research in Biophysics (2 Credits)
Supervised research in biophysics laboratories. Rotations through several laboratories prior to a choice of laboratory for a research assistantship.
Restriction: Must be in one of the following programs (Biophysics (Master's); Biophysics (Doctoral)).
Repeatable to: 8 credits if content differs.

BIPH704 Cell Biology from a Biophysical Perspective (3 Credits)
An approach to cell biology by focusing on mechanisms and unifying paradigms. It will not assume a great deal of factual biological knowledge, but will expect a background that prepares students to think quantitatively and mechanistically.
Recommended: BSCI330, PHYS121, and PHYS122. Cross-listed with: BIOL704. Jointly offered with: BSCI404.
Credit Only Granted for: BSCI404, BIOL704, BIOL708O, or BIPH704.
Formerly: BIOL708O.

BIPH799 Master's Thesis Research (1-6 Credits)

BIPH898 Pre-Candidacy Research (1-8 Credits)

BIPH899 Doctoral Dissertation Research (1-8 Credits)

BISI - Biological Sciences

BISI610 Introduction to Behavior, Evolution, Ecology, & Systematics (2 Credits)
This literature-based course serves as an intellectual orientation for new (i.e. first- and second-year) doctoral students in the Behavior, Evolution, Ecology, and Systematics (BEES) concentration area of the Biological Sciences (BISI) Graduate Program.
Restriction: Must be in the Behavior, Evolution, Ecology, and Systematics (BEES) concentration area of the Biological Sciences program; or permission of the instructor.
Credit Only Granted for: BEES608A, BIOL608D or BISI610.
Formerly: BEES608A.

BISI620 Bioinformatics and Genomics (2 Credits)
Provides an overview of some major topics and research areas bioinformatics and genomics, and includes material from basic foundations through advanced concepts.
Credit Only Granted for: CBMG688Y or BISI620.
Formerly: CBMG688Y.

BISI632 Genetics I: Gene Expression (2 Credits)
Molecular mechanisms of gene expression, with an emphasis on gene regulation in both prokaryotic and eukaryotic systems. Approximately 2/3 of the classes will be comprised of didactic lectures. The remaining portion of the course will consist of student-led experimental design sessions and a student-led proposal review panel.
Restriction: Must be in the Biological Sciences Graduate Program (BISI); or permission of instructor.
Credit Only Granted for: BISI632 or CBMG688F.
Formerly: CBMG688F.

BISI699 Special Problems in Biological Sciences (1-6 Credits)
Independent study with a specific faculty instructor from the Biological Sciences Program (BISI). Often involves original research in a laboratory or computational setting.
Restriction: Must be in one of the concentration areas of the Biological Sciences Graduate Program (BISI).
Repeatable to: 8 credits.

BISI701 Teaching & Professional Development in Biology (1 Credit)
Provides graduate students in the biological sciences with the foundational knowledge to become better teaching assistants and gives them an introduction into the skills and tools that they need to develop as professional scientists and educators.Cross-listed with: ENTM701.
Credit Only Granted for: ENTM701, BISI688Z, CBMG688Z, or BIOL701.
Formerly: BISI688Z, CBMG688Z, BIOL701.

BISI708 Advanced Topics in Biological Sciences (1-3 Credits)
Lectures, experimental courses, and other special instructions in various areas of biological sciences.
Repeatable to: 8 credits if content differs.

BISI712 Responsible Conduct of Research for Biologists (1 Credit)
An exploration of the ethical dimensions associated with the responsible conduct of scientific research focusing on providing students with practical insights into the existing norms and expectations of working scientists.
Credit Only Granted for: BISI712, BISI688B, or CBMG688B.
Formerly: BISI688B and CBMG688B.

BISI799 Master's Thesis Research (1-6 Credits)
Repeatable to: 99 credits.

BISI898 Pre-Candidacy Research (1-8 Credits)
Restriction: Must be in Biological Sciences (Doctoral) program.

BISI899 Doctoral Dissertation Research (1-8 Credits)

BMGT - Business and Management

BMGT402 Database Systems (3 Credits)
The fundamentals of database management systems (DBMS), data models, query processing, and data warehouses, and their application in the development of business information systems will be covered. An important goal of this course is to understand the value of information resources and information management challenges within an organization.
Recommended: BMGT302.
Credit Only Granted for: INST327 or BMGT402.

BMGT403 Systems Analysis and Design (3 Credits)
Techniques and tools applicable to the analysis and design of computer-based information systems. System life cycle, requirements analysis, logical design of databases and performance evaluation. Emphasis on case studies. Project required that involves the design, analysis and implementation of an information system.
Prerequisite: BMGT301; or students who have taken courses with comparable content may contact the department.
Recommended: BMGT302.

BMGT404 Essential Data Skills for Business Analytics (3 Credits)
Building on prior programming knowledge, this course introduces principles of data science to collect, analyze, and visualize business data. Students will explore application of business analytics in areas such as finance, accounting, marketing, and operations. This course especially emphasizes learning by doing exercises using a modern, high-level programming language and industry standard software.
Prerequisite: BMGT302.
Credit Only Granted for: BMGT404 or CMSC320.
Additional Information: CMSC majors will not receive credit for this course towards their upper level concentration in their CMSC major.

BMGT406 Developing Applications for the Web and Social Media (3 Credits)
The design and development of Web applications and the underlying platforms and standards for Web application development will be covered. It will examine the phenomenon of social media, social networking and crowdsourcing and understand their use within organizations.
Prerequisite: BMGT402 and BMGT302.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.
Credit Only Granted for: INST377 or BMGT406.

BMGT407 Information Systems Projects (3 Credits)
Senior capstone course for the decision and information sciences major. Collected knowledge from the DIS courses and application to significant problems of size and complexity. State-of-the-art research ideas and current business and industrial practices in information systems.
Prerequisite: BMGT402 and BMGT403.
Restriction: Senior standing.

BMGT408 Emerging Topics in Information Systems (3 Credits)
Selected advanced topics covering emerging developments in the field of decision and information technologies.
Restriction: Permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 9 credits if content differs.

BMGT410 Government Accounting (3 Credits)
An introduction to the theory and practice of accounting and financial reporting as applied in both federal and state/local governments, with a focus on generally accepted accounting principles applicable in each. Topics include analyzing transactions; recognizing transactions in the accounting cycles; and preparing and analyzing financial statements and the overall financial reports at both the federal and state/local government levels.
Prerequisite: BMGT221.

BMGT411 Ethics and Professionalism in Accounting (3 Credits)
Analysis and discussion of issues relating to ethics and professionalism in accounting.
Prerequisite: BMGT311.
Restriction: Must be in Accounting program.

BMGT417 Taxation of Corporations, Partnerships and Estates (3 Credits)
Federal taxation of corporations using the life-cycle approach-formation, operation, assessment, merger, reorganization and liquidation. Overviews of pass-through entities - partnerships and s-corporations -using the life-cycle approach, and the tax consequences of wealth transfers by individuals - gift and estate taxation. Both tax planning and compliance issues are addressed.
Prerequisite: BMGT221.

BMGT422 Auditing Theory and Practice (3 Credits)
A study of the independent accountant's attest function, generally accepted auditing standards, compliance and substantive tests and report forms and opinions.
Prerequisite: BMGT310; and must have completed or be concurrently enrolled in BMGT311.

BMGT423 Fraud Examination (3 Credits)
Covers fraud prevention, detection and investigation techniques. The traditional accounting areas of fraud-fraudulent financial accounting and misappropriation of assets as well as recent and historical cases of fraud will also be examined. Current fraud topics will be discussed.
Prerequisite: BMGT310.

BMGT424 Advanced Accounting (3 Credits)
Advanced accounting theory applied to specialized topics and current problems. Emphasis on consolidated statements and partnership accounting.
Prerequisite: BMGT311.

BMGT428 Special Topics in Accounting (3 Credits)
Selected advanced topics in Accounting.
Prerequisite: BMGT310.
Restriction: Must be in Accounting program.
Repeatable to: 9 credits if content differs.

BMGT430 Data Modeling in Business (3 Credits)
Explores the role of statistical models in business analytics to drive managerial decision-making and improve performance through the use of relevant data-motivated examples. Topics include regression models (both simple and multiple regression, as well as logistic regression for binary data), model validation, variable transformation, variable selection, discriminant analysis, and forecasting. These topics are modeled using state-of-the-art data analytics software.
Prerequisite: BMGT231 or BMGT230; or permission of BMGT-Robert H. Smith School of Business.

BMGT431 Data Analytics (3 Credits)
An introduction to the tools and techniques that are central to the analysis of abundant data that is being collected in many forms including web traffic, social network data, and reviews and comments on websites.
Prerequisite: BMGT430.

BMGT434 Analytics Consulting: Cases and Projects (3 Credits)
This course assumes that students have already been introduced to the concepts and techniques of operations research/business analytics (OR/BA). Published papers, short cases, and projects in OR/BA will be analyzed and discussed in a thoughtful way, taking into account the soft (people-related) issues and the hard (mathematical/optimization) issues.
Prerequisite: BMGT332 and BMGT385.

BMGT435 Business Process Simulation (3 Credits)
Covers the methods for computer simulation modeling and analysis of complex systems. Students are assumed to have been introduced to the basic techniques and applications in the field of operations management and business analytics. Course emphasis is on modeling of real-world systems (for example, inventory or queueing systems), implementing simulations in special purpose software, and analyzing simulation results.
Prerequisite: BMGT332 and BMGT385.

BMGT438 Special Topics in Operations Management (1-3 Credits)
Selected advanced topics in operations management.
Repeatable to: 6 credits if content differs.

BMGT440 Advanced Financial Management (3 Credits)
Analysis and discussion of cases and readings relating to financial decisions of the firm. The application of finance concepts to the solution of financial problems is emphasized.
Prerequisite: BMGT340.

BMGT441 Fixed Income (3 Credits)
Describes important financial instruments which have market values that are sensitive to interest rate movements. Develops tools to analyze interest rate sensitivity and value fixed income securities. Defines and explains the vocabulary of the bond management business.
Prerequisite: BMGT340.
Credit Only Granted for: BMGT448A or BMGT441.
Formerly: BMGT448A.

BMGT442 Advanced Portfolio Management (3 Credits)
An in-depth coverage of statistical methods for choosing stocks is provided. Financial markets data is used in the class. Students are also expected to learn and use an industry-standard programming language during the class to implement the concepts of the class.
Prerequisite: BMGT343 and BMGT347.

BMGT443 Applied Equity Analysis and Portfolio Management (3 Credits)
Study and application of the concepts, methods, models, and empirical findings to the analysis, valuation and selection of securities, especially common stock.
Prerequisite: BMGT343.

BMGT444 Futures and Options Contracts (3 Credits)
The institutional features and economic rationale underlying markets in futures and options. Hedging, speculation, structure of futures prices, interest rate futures, efficiency in futures markets and stock and commodity options.
Prerequisite: BMGT343.
Credit Only Granted for: BMGT444 or MATH424.

BMGT445 Banking and Financial Institutions (3 Credits)
Analysis and discussion of cases and readings in commercial bank management. The loan function is emphasized; also the management of liquidity reserves, investments for income and source of funds. Bank objectives, functions, policies, organization, structure, services and regulation are considered.
Prerequisite: BMGT340.
Recommended: ECON330 or BMGT341.

BMGT446 International Finance (3 Credits)
Financial management from the perspective of the multinational corporation. Topics covered include the organization and functions of foreign exchange and international capital markets, international capital budgeting, financing foreign trade and designing a global financing strategy. Emphasis of the course is on how to manage exchange and political risks while maximizing benefits from global opportunity sets faced by the firm.
Prerequisite: BMGT340.

BMGT448 Special Topics in Finance (1-3 Credits)
Selected advanced topics in finance.
Repeatable to: 9 credits if content differs.

BMGT449 Investment Fund Management: Lemma Senbet Fund (3 Credits)
The Lemma Senbet Fund is a year-long, advanced finance course available to undergraduate finance majors in their senior year. Ten to twelve students will be selected in the spring of their junior year to participate on the fund, two as portfolio managers and eight to ten as equity analysts. The course provides students with the opportunity to apply what they have learned in finance classes to actual investment decisions, through researching real companies and managing a portfolio of real money.
Prerequisite: BMGT343.
Corequisite: BMGT443.
Restriction: Permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 6 credits if content differs.

BMGT450 Integrated Marketing Communications (3 Credits)
In-depth study of coordinated marketing activities including advertising, sales promotion, Internet marketing, direct marketing and personal selling. Emphasizes strategic planning to effectively use these promotional tools to communicate with customers and meet marketing goals. Blends theory and current practice to provide managerial orientation.
Prerequisite: BMGT350.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BMGT354 or BMGT450.
Formerly: BMGT354.

BMGT451 Consumer Analysis (3 Credits)
Identifying buyer behavior concepts relevant to a specific marketing problem so that appropriate marketing decisions can be made. Conceptual frameworks are drawn from psychology, sociology, economics, and other social sciences to aid in understanding the behavior of ultimate and industrial buyers.
Prerequisite: BMGT350.
Credit Only Granted for: BMGT354 or BMGT451.
Formerly: BMGT451.

BMGT452 Marketing Research Methods (3 Credits)
Focuses on aiding marketing decision-making through exploratory, descriptive and causal research. Develops student skills in designing market research studies, including selection of data collection method, development of data collection instrument, sample design, collection and statistical analysis of data and reporting the results, including data visualization.
Prerequisite: BMGT230; and must have completed or be concurrently enrolled in BMGT350.
Credit Only Granted for: BMGT351 or BMGT452.
Formerly: BMGT452.

BMGT453 Retail Management (3 Credits)
Planning and implementing retail marketing strategy. Application to store and non-store (catalog, internet) retailing. Evaluation of how environmental trends in the consumer market, competition, the economy and technology affect retail strategy in the U.S. and global market.
Prerequisite: BMGT220 and BMGT350.
Credit Only Granted for: BMGT353 or BMGT453.
Formerly: BMGT353.

BMGT454 Global Marketing (3 Credits)
Marketing functions from the global executive's viewpoint, including coverage of global marketing policies relating to product adaptation, data collection and analysis, channels of distribution, pricing, communications and cost analysis. Consideration is given to the cultural, legal, financial and organizational aspects of global marketing.
Prerequisite: BMGT350.

BMGT455 Sales Management (3 Credits)
The roles of the sales executive as a planner, manager of resources and marketing functions and recruiter, trainer, motivator and leader of field sales personnel. Techniques and sequence of problem analysis for selling and sales management decisions and to the practical framework in which these decisions take place. Teaching vehicles feature strong classroom interactions, cases, journal articles, research findings, guest sales managers, debates, and modern company practices.
Prerequisite: BMGT350.

BMGT456 Customer-Centric Innovation (3 Credits)
Addresses the management of new products and services with a focus on the innovation process, specifically the development and launching of new products or services: Opportunity Identification, Concept Generation, Design, Testing and Launch.
Prerequisite: BMGT350.
Credit Only Granted for: BMGT352, BMGT382 or BMGT456.
Formerly: BMGT352.

BMGT457 Marketing Policies and Strategies (3 Credits)
This capstone course ties together various marketing concepts using the fundamentals of strategic market planning as the framework. Application of these principles is accomplished by analyzing and discussing cases and by playing a marketing strategy computer simulation game. Analysis of current business articles to understand the link between theory and real-world problem solving.
Prerequisite: BMGT350.

BMGT458 Special Topics in Marketing (1-3 Credits)
Selected advanced topics in marketing.
Repeatable to: 6 credits if content differs.

BMGT461 Entrepreneurship (3 Credits)
Process of creating new ventures, including evaluating the entrepreneurial team, the opportunity and the financing requirements. Skills, concepts, mental attitudes and knowledge relevant for starting a new business.
Restriction: Must not have completed BMGT361.
Credit Only Granted for: BMGT261, BMGT361, BMGT461, ENES460, SMLP470 or HLMN470.

BMGT463 Cross-cultural Challenges in Business (3 Credits)
Examines in depth the nature of international cultural value-differences and their behavioral-related effects in the workplace. Topics include decision-making and leadership styles and reactions to various work assignments and reward structures.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT465 Business Plan For The New Venture (3 Credits)
Each student focuses on the production of a business plan that will be accepted for an annual business plan competition. Business plans of sufficient quality may be submitted to attract financing. Topics include a deep review of business construction and its derivative short forms.
Prerequisite: BMGT461 or BMGT361.

BMGT466 Global Business Strategy (3 Credits)
Focuses on the strategic challenges that directly result from and are associated with the globalization of industries and companies. Topics include drivers of industry globalization, difference between global and multi-domestic industry, global expansion strategies, sources of competitive advantage in a global context, and coordination of a company across a global network.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT467 Strategic Innovation and Entrepreneurship (3 Credits)
Provides an understanding of how innovation affects the competitive dynamics of markets, how firms can strategically manage innovation, and how firms can create and implement strategies to maximize their likelihood of success.
Credit Only Granted for: BMGT467, ENES463 or HLMN472.

BMGT468 Special Topics in Management and Organization (1-3 Credits)
Selected advanced topics in management and organization.
Repeatable to: 6 credits if content differs.

BMGT469 Management and Organization Short-term Study Abroad (3 Credits)
Selected short-term study abroad topics in management and organization.
Repeatable to: 9 credits if content differs.

BMGT471 Supply Chain Consulting Fellows I (3 Credits)
Prepares students for a career in Intermodal/Logistics/and Supply Chain Management. Designed to enhance student analytical skills in tackling issues of direct relevance to the operating efficiency and profitability of individual firms. Student will have direct exchanges with executive leaders in this field through participation in national conferences and in-class visits. Students will participate in a national student case competition that focuses on a critical issue facing the industry leaders. Under the direction of the instructor, students conduct academic research on key topics that represent real-world consulting engagements designed to address critical issues faced by the individual companies and result in research-based solutions to these current challenges.
Prerequisite: BMGT372.

BMGT472 Purchasing and Inbound Logistics (3 Credits)
Analysis of the resupply activities of logistics management, including purchasing policies, transportation planning, and inventory control. Attention is directed toward total cost minimization and the establishment of a sustainable competitive advantage based on procurement.
Prerequisite: BMGT372.

BMGT473 Supply Chain Consulting Fellows II (3 Credits)
This second course of the Supply Chain Consulting Fellows program is designed to build upon the skills and concepts learned in the initial course to produce polished, skilled consultants who can build a consulting project from its initial stages and carry it through to a set of actionable initiatives and conclusive results. The initial component of this course will be to enhance and complete the started projects in the previous semester's course so that each research project can be formally presented to the project sponsor, i.e., the Board of Advisors for the Intermodal Association of North America. Student teams will serve as project consultants and tackle a real-world problem presented by a designated firm. Students will also participate in a national conference devoted to Intermodal/Logistics/Supply Chain issues. The conference will involve individual academic sessions and reports by the students based on the content provided. The class will also include several Executive Leader sessions.
Prerequisite: BMGT370, BMGT372 and BMGT471.
Credit Only Granted for: BMGT478D or BMGT473.
Formerly: BMGT478D.

BMGT475 Supply Chain Strategy and Network Design (3 Credits)
Analysis of the strategic aspects of supply chain management. Emphasis on the creation of end-user value through supply chain cost reductions, service improvements or both. Attention is directed toward the enabling role of technology in support of strategy evaluation and implementation.
Prerequisite: BMGT372.

BMGT476 Technology Applications in Supply Chain Management (3 Credits)
An understanding of the role of technology in managing the supply chain. Provides students with hands-on experience in advanced software systems that build on top of enterprise resource planning systems. Major emphasis is placed on demonstrating that these systems result in supply chain cost reductions and service improvements.
Prerequisite: BMGT372.

BMGT477 International Supply Chain Management (3 Credits)
The study of the importance of the supply chain management within a global context. Topics covered include: the structure, service, pricing and competitive relationships among international carriers and transport intermediaries as well as documentation, location decisions, international sourcing/distribution and management of inventory throughout the international supply chain.

BMGT478 Special Topics in Supply Chain Management (3 Credits)
Selected advanced topics in supply chain management.
Repeatable to: 9 credits if content differs.
Additional Information: Course prerequisites will vary depending on the topic. A maximum of 3 credits of BMGT478 course work can fulfill Supply Chain Management major requirements.

BMGT484 Digital Marketing (3 Credits)
Examines the process of developing, implementing, and analyzing strategies for successfully marketing a variety of existing and potential products and services through digital means, including the web, social media, and mobile apps. Both the development and analysis of digital media for marketing will be discussed.
Prerequisite: BMGT350.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.

BMGT485 Project Management (3 Credits)
Modern project management techniques that are used by modern practicing professionals will be covered. Particular attention is given to the management of technology based systems and projects in a business enterprise. The topics covered include: defining project scope, alignment of projects with enterprise strategy, managing project cost, time and risks using tools such as CPM/PERT, and measuring project performance.
Prerequisite: BMGT231 or BMGT230; or students who have taken courses with comparable content may contact the department.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BMGT485, ENCE320, ENCE325, INST408O or INST453.

BMGT487 Six Sigma Innovation (3 Credits)
Enhances the overall understanding of Six Sigma Strategy, Tools and Methods to positively influence the performance of a business process, a product or service. Highlights the application of Define-Measure-Analyze-Improve-Control (DMAIC),Design For Six Sigma (DFSS), and the pursuit of Critical to Quality criteria (CTQ's) in a collaborative perspective, one that recognizes a balance between efficiency, and effectiveness and between statistical analysis and statistical thinking.
Prerequisite: STAT400, BMGT231, BMGT230, or ENME392.

BMGT488 Special Topics in Logistics, Business, and Public Policy (1-3 Credits)
Selected advanced topics in logistics, business and public policy.
Repeatable to: 6 credits if content differs.

BMGT490 QUEST Capstone Professional Practicum (4 Credits)
The capstone course for the QUEST Honors Program provides students with an opportunity to learn in multidisciplinary teams of business, engineering, and science students in a real-world setting. Companies engage teams of QUEST students with real organizational challenges and dedicate resources to help students address these problems. Student teams must enhance their skills in quality management, process improvement, and systems design and will apply these to add value to a client. In the process, students will improve their teamwork skills.
Prerequisite: ENES390 or BMGT390. Cross-listed with: ENES490.
Credit Only Granted for: BMGT490 or ENES490.

BMGT491 Scoping Experiential Learning Projects (3 Credits)
QUEST students cultivate relationships with new and current corporate partners and prepare project scopes for QUEST's introductory course, BMGT/ENES 190H, and capstone course, BMGT/ENES 490H. Requires independent work communicating with clients and class visits to a variety of potential project sites.
Prerequisite: BMGT190 or ENES190.
Restriction: Restricted to QUEST Program (TQMP) students. Cross-listed with: ENES491.
Credit Only Granted for: BMGT491 or ENES491.

BMGT493 Honors Study (3 Credits)
First semester of the senior year. The course is designed for honors students who have elected to conduct intensive study (independent or group). The student will work under the direct guidance of a faculty advisor and the Assistant Dean of Undergraduate Studies. They shall determine that the area of study is of a scope and intensity deserving of a candidate's attention. Formal written and/or oral reports on the study may be required by the faculty advisor.
Restriction: Permission of BMGT-Robert H. Smith School of Business.

BMGT494 Honors Study (3 Credits)
Second semester of the senior year. The student shall continue and complete the research initiated in BMGT 493, additional reports may be required at the discretion of the faculty advisor and Assistant Dean of Undergraduate Studies.
Prerequisite: BMGT493.
Restriction: Permission of BMGT-Robert H. Smith School of Business; and must be in the Smith School Honors Fellows program.

BMGT495 Strategic Management (3 Credits)
A case-based course where students learn to play the role of the "strategic manager" who defines the scope of its business operations and, within the chosen scope, how the firm will compete against rivals. This course focuses on how a firm can both formulate effective business-level and corporate-level strategies to achieve competitive advantage and earn above average profits.

BMGT496 Business Ethics and Society (3 Credits)
A study of the standards of business conduct, morals and values as well as the role of business in society with consideration of the sometimes conflicting interests of and claims on the firm and its objectives. Emphasizes a strategic approach by business to the management of its external environment.
Prerequisite: 1 course in BMGT; or permission of BMGT-Robert H. Smith School of Business.

BMGT498 Special Topics in Business and Management (3 Credits)
Special topics in business and management designed to meet the changing needs and interests of students and faculty.
Restriction: Permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 6 credits if content differs.

BMGT499 Advanced Business Topics (1 Credit)
Course will delve deeply into a specific business topic. Based on experience and knowledge from undergraduate core business classes, students will examine a particular subject from various angles.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.
Repeatable to: 3 credits if content differs.

BMGT600 Leadership and Teamwork (2 Credits)
Course examines concepts of team-building and leadership which are critical to managerial success. Topics include leadership, decision making, communication and conflict, work motivation, building effective teams, and organizational change and culture.
Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.
Credit Only Granted for: BMGT600, BUSI662 or BUSM600.

BMGT602 Introduction to Financial Accounting (2 Credits)
Overview of financial accounting, periodic financial statements and the financial reporting process. Importance of financial statements as information source for creditors and investors and as a means by which managers can communicate information about their firms.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI610, BUAC602, BUFN602, or BMGT602.

BMGT604 Managerial Economics and Public Policy (2 Credits)
Basic microeconomic principles used by firms, including supply and demand, elasticities, costs, productivity, pricing, market structure and competitive implications of alternative market structures. Market failures and government intervention. Public policy processes affecting business operations.
Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.
Credit Only Granted for: BUSI681 or BMGT604.

BMGT606 Data Driven Decision Making (2 Credits)
Analytical modeling of business decisions; uncertainty, risk and expected utility; regression modeling to infer relationships among variables.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI630 or BMGT606.

BMGT610 Financial Management (2 Credits)
Focuses on the valuation of the real assets of firms as well as the valuation of stocks and bonds, the primary financial assets in an economy. While details vary, the conceptual foundations of valuation boil down to three themes: time value of money, no-arbitrage, and systematic risk.
Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.
Credit Only Granted for: BUSI640, BUFN610, or BMGT610.

BMGT612 Marketing Management (2 Credits)
Analysis of marketing problems and evaluation of specific marketing efforts regarding the organization's products and services, pricing activities, channel selection, and promotion strategies in both domestic and international markets.
Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.
Credit Only Granted for: BUSI650 or BMGT612.

BMGT614 Strategic Management (2 Credits)
Analyze and identify profit opportunities and threats in different industry and competitive environments; Analyze and identify a firm's valuable assets, resources and capabilities and how they might be protected, leveraged, and extended in the market; Learn how to organize your company to be the best prepared to adapt its strategy over time as the market environment changes; and how to use organic growth as well as mergers, acquisitions, joint ventures, alliances, and divestitures to ensure that the firm maintians the proper scale and scope to compete effectively over time.
Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.
Credit Only Granted for: BUSI690 or BMGT614.

BMGT616 Managerial Accounting (2 Credits)
Use of accounting data in corporate planning and control. Cost-volume-profit analysis, budgeting, pricing decisions and cost data, transfer pricing, activity-based management, performance measures, and standard costing.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI611, BUSI616, or BMGT616.

BMGT620 Business Communication (2 Credits)
Develop the ability to communicate with and about data.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI758A or BMGT620.

BMGT624 Operations Management (2 Credits)
Operations management is concerned with efficient and effective design and operation of business processes for delivering products and/or services. Emphasis is given to process analysis and design, capacity management and bottlenecks, waiting lines and the impact of uncertainty in process performance, quality management, lean, six-sigma, and revenue management.
Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.
Credit Only Granted for: BUSI634 or BMGT624.

BMGT630 Data Models and Decisions (3 Credits)
To develop probabilistic and statistical concepts, methods and models through examples motivated by real-life data from business and to stress the role that statistics plays in the managerial decision making process.

BMGT640 Financial Management (3 Credits)
Analysis of major corporate financial decisions using a market-oriented framework. Introduction to value techniques, capital budgeting principles and problems, asset valuation, operation and efficiency of financial markets, financing decisions, dividend policy and international finance. Additional topics, such as mergers and acquisitions may be covered.

BMGT700 Competitive and Collaborative Negotiation (2 Credits)
Increase negotiating self-confidence and improve capacity to achieve win-win solutions to organizational problems. Improve effectiveness at finding creative solutions to conflict.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMO714 or BMGT700.

BMGT708 Special Topics in Cybersecurity (3 Credits)
Special Topics in Cybersecurity
Repeatable to: 9 credits if content differs.

BMGT710 Global Strategy (2 Credits)
Focuses on the "strategic" and "organizational" questions that a company must address as it globalizes its footprint. Among the questions that will be addressed are: What are the potential benefits, costs, and risks associated with going abroad? What differentiates a "global" from a "multidomestic" industry? What are the sources of competitive advantage in a global context?
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI674, BUMO754, or BMGT710.

BMGT720 Innovation & Product Development (2 Credits)
This course focuses on the development of innovations - new products or new services - from the perspective of a marketer. For an innovation to be successful in the market, it has to be customer-centric: hence, in this course, we study how to develop and bring to market elegant and efficient solutions to strong customer needs. This is a fundamental business challenge, faced while working in a startup or in an established company; when developing a new product or a new service; and when serving customers who are individuals or large corporations.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK758P or BMGT720.

BMGT730 Valuation in Corporate Finance (2 Credits)
An advanced topics course in Corporate Finance dealing with valuation. Main topics will be, building pro forma statements, cost of capital, using ratios and comparables to value projects and firms, dicounted cash flow valuations, WACC and APV methods of valuation and Real Option Valuations.
Prerequisite: BMGT600.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN630, BUFN714, BUFN750, BUFN753, or BMGT730.

BMGT740 Global Supply Chain Management (2 Credits)
Offers a practical blueprint for understanding, building, implementing, and sustaining supply chains in today's rapidly changing global supply chain environment. It will provide the student with a survey of the fast-moving Supply Chain Management discipline and practice, including the evolution of supply chain strategies, business models and technologies; current best practices in demand and supply management; and methodologies for conducting supply chain-wide diagnostic assessments and formulating process improvement plans.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI672 or BMGT740.

BMGT758 Special Topics in Business and Management (1-4 Credits)
Selected advanced topics in the various fields of graduate study in business.
Prerequisite: Permission of BMGT-Robert H. Smith School of Business.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 9 credits if content differs.

BMGT788 Mastery Topic for EMBA (2 Credits)
Selected mastery topics which will cover various aspects of executive education.
Restriction: Must be in Executive MBA program.
Repeatable to: 8 credits if content differs.

BMGT789 Action Learning Project (3-4 Credits)
Significant consulting project, team designed by individual EMBA student participants and faculty.
Restriction: Must be in Executive MBA program.
Repeatable to: 10 credits if content differs.

BMGT808 Special Topics in Information Systems (1-9 Credits)
Special topics specific to the Information Systems doctoral field of study.
Prerequisite: Permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 18 credits if content differs.

BMGT811 Seminar in Financial Accounting (3 Credits)
Seminar in selected classic and current theoretical and empirical research in financial accounting.

BMGT818 Special Topics in Accounting and Information Assurance (1-9 Credits)
Special topics specific to the Accounting and Information Assurance doctoral field of study.
Repeatable to: 18 credits if content differs.

BMGT821 Seminar in Management Accounting (3 Credits)
Design and use of accounting information systems for managerial planning and controllership.

BMGT828 Independent Study in Business and Management (1-9 Credits)

BMGT830 Operations Research: Linear Programming (3 Credits)
Concepts and applications of linear programming models, theoretical development of the simplex algorithm, and primal-dual problems and theory.
Prerequisite: MATH240; or students who have taken courses with comparable content may contact the department; or permission of BMGT-Robert H. Smith School of Business.

BMGT831 Operations Research: Extension of Linear Programming and Network Analysis (3 Credits)
Concepts and applications of network and graph theory in linear and combinatorial models with emphasis on computational algorithms.
Prerequisite: BMGT830; or students who have taken courses with comparable content may contact the department; or permission of BMGT-Robert H. Smith School of Business.

BMGT833 Operations Research: Integer Programming (3 Credits)
Theory, applications, and computational methods of integer optimization. Zero-one implicit enumeration, branch and bound methods, and cutting plane methods.
Prerequisite: BMGT830; and (MATH241; or students who have taken courses with comparable content may contact the department). Or permission of BMGT-Robert H. Smith School of Business.

BMGT834 Operations Research: Probabilistic Models (3 Credits)
Theoretical foundations for the construction, optimization, and applications of probabilistic models. Queueing theory, inventory theory, Markov processes, renewal theory, and stochastic linear programming.
Prerequisite: MATH241; and (STAT400; or students who have taken courses with comparable content may contact the department). Or permission of BMGT-Robert H. Smith School of Business.

BMGT835 Simulation of Discrete-Event Systems (3 Credits)
Simulation modeling and analysis of stochastic discrete-event systems such as manufacturing systems, inventory control systems, and computer/ communications networks.
Prerequisite: Knowledge of Fortran, Basic, C, or Pascal.

BMGT836 Applied Regression Models (3 Credits)
An introduction to regression models used in business research. Topics include: simple and multiple regression, diagnostics for checking model adequacy, transformations, polynomial models, indicator variables, multicollinearity, variable selection, times series data, generalized linear models, implementation using statistical software, and application to research questions.
Recommended: It is assumed that the student has taken a first course in statistics and is familiar with the content of such course including interval estimation and hypothesis testing.

BMGT837 Applied Multivariate Analysis (3 Credits)
Multivariate statistical methods and their use in empirical research. Topics include: summarization and visualization of multivariate data, the multivariate normal distribution, tests on mean vectors, multivariate paired comparisons, multivariate analysis of variance, repeated measures designs, test on covariance matrices, discriminant analysis and classification, canonical correlation, principal components, factor analysis and cluster analysis. Maximum likelihood estimation and the likelihood ratio method of test construction.
Recommended: BMGT836 or equivalent course. BMGT837 assumes working knowledge of matrices and elementary linear algebra and a sound understanding of univariate statistics, including random variables, statistical inference, ANOVA, and ordinary least squares regression.

BMGT838 Special Topics in Operations Management/Management Science (1-9 Credits)
Special topics specific to the Operations Management/Management Science doctoral field of study.
Repeatable to: 18 credits if content differs.

BMGT840 Seminar in Financial Theory (3 Credits)
Seminar in selected classic and current theoretical and empirical research in the foundations of finance.
Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

BMGT841 Seminar in Corporate Finance (3 Credits)
Seminar in selected classic and current theoretical and empirical research in corporate finance.
Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

BMGT843 Seminar in Portfolio Theory (3 Credits)
Seminar in selected classic and current theoretical and empirical research in portfolio theory.
Prerequisite: Permission of BMGT-Robert H. Smith School of Business.

BMGT848 Special Topics in Finance (1-9 Credits)
Special topics specific to the Finance doctoral field of study.
Repeatable to: 18 credits if content differs.

BMGT858 Special Topics in Marketing (1-9 Credits)
Special topics specific to the Marketing doctoral field of study.
Repeatable to: 18 credits if content differs.

BMGT868 Special Topics in Organizational Behavior/Human Resource Management (1-9 Credits)
Special topics specific to the Organizational Behavior/Human Resource Management doctoral field of study.
Repeatable to: 18 credits if content differs.

BMGT878 Special Topics in Strategic Management and Entrepreneurship (1-9 Credits)
Special topics specific to the Strategic Management and Entrepreneurship doctoral field of study.
Repeatable to: 18 credits if content differs.

BMGT887 Bayesian Inference and Decision Theory (3 Credits)
Bayesian Methodologies in statistical inference and decision theory. Includes discussion of subjective probability and coherence, elicitation of distributions conjugate distributions, estimation, testing, preposterior analysis and regression analysis. Applications are drawn from the functional business areas.

BMGT888 Special Topics in Supply Chain Management (1-9 Credits)
Special topics specific to the Supply Chain Management doctoral field of study.
Repeatable to: 18 credits if content differs.

BMGT898 Pre-Candidacy Research (1-8 Credits)

BMGT899 Doctoral Dissertation Research (1-8 Credits)

BSCI - Biological Sciences Program

BSCI401 Animal Communication (3 Credits)
Examining the mechanisms by which animal produce and receive signals in each sensory modality; and quantifying the type and amount of information conveyed in signals and how animals attend to such information.
Prerequisite: BSCI160 and BSCI161; or BSCI106. And must have completed one semester of physics; and must have completed one semester of organic chemistry.
Recommended: A course in animal behavior or biopsychology.
Credit Only Granted for: BSCI401, BSCI338W or BIOL708W.
Formerly: BSCI338W.

BSCI402 Genomics of Sensory Systems (3 Credits)
An advanced course covering topics on the molecular basis of senses and the application of genomic techniques to studies of sensory systems & sensory ecology.
Prerequisite: BSCI222; or permission of instructor.
Credit Only Granted for: BSCI338C or BSCI402.
Formerly: BSCI338C.

BSCI403 Biology of Vision (3 Credits)
An upper level undergraduate course on the physical, molecular, and neural basis of vision.
Prerequisite: BSCI207, NEUR306 or BSCI353.
Recommended: BSCI222.

BSCI404 Cell Biology from a Biophysical Perspective (3 Credits)
An approach to cell biology by focusing on mechanisms and unifying physical paradigms. It will not assume a great deal of factual biological knowledge, but will expect a background that prepares students to think mechanistically and quantitatively.
Prerequisite: BSCI330.
Recommended: PHYS121 and PHYS122; or completion of PHYS131 and PHYS132 recommended. Jointly offered with BIOL704, BIPH704.
Credit Only Granted for: BSCI338O, BSCI404, BIOL704, BIOL708O, or BIPH704.
Formerly: BSCI338O.

BSCI405 Population and Evolutionary Genetics (3 Credits)
Genetic variation within a population provides the basis for future evolution as well as a record of past evolution. The genomics revolution provides data on this variation that, together with mathematical models, allow us to read this record to reconstruct evolutionary trajectories. Examples will focus on hominin and pathogen evolution. In the lab, students will use models to explore how genetic variation (allele frequencies) changes over time and space.
Prerequisite: Minimum grade of C- in BSCI222; and 1 course with a minimum grade of C- from (MATH131, MATH136, MATH141). Jointly offered w ith BIOL709.
Credit Only Granted for: BSCI405, BSCI339J, or BIOL709C.
Formerly: BSCI339J.

BSCI406 Membranes and Biological Interfaces (3 Credits)
An interdisciplinary approach to membrane biology, starting with the physical chemistry of interfaces and model systems and continuing into transport, excitability, and signaling. The course is oriented toward students with broad backgrounds in biology and biophysics. Success in the course will come from a background that prepares students to think mechanistically and quantitatively rather than having substantial factual biological knowledge.
Prerequisite: Minimum grade of C- in BSCI330.
Recommended: PHYS122; or PHYS132; or (PHYS260 and PHYS261).
Credit Only Granted for: BSCI339R, BSCI406, or BIOL709R.
Formerly: BSCI339R.

BSCI407 Behavioral Genetics (3 Credits)
Behavior represents an organism's most dynamic phenotype and allows an animal to respond immediately to both internal and external cues. We will explore the genetic and epigenetic mechanisms that underlie behavioral variation and the associated neurological, hormonal, and developmental pathways. We will examine modern approaches used to study behavioral genetics in model and non-model systems, and in humans. Using case studies, we will explore a range of complex phenotypes including those related to mating, parental care, aggression, circadian rhythm, locomotion, learning, anxiety, and addiction.
Prerequisite: Minimum grade of C- in BSCI222.

BSCI410 Molecular Genetics (3 Credits)
An advanced genetics course emphasizing the molecular basis of gene structure and function in the context of modern approaches to the genetics of humans and model organisms.
Prerequisite: BSCI222. And must have completed CHEM233; or (CHEM231 and CHEM232).

BSCI411 Bioinformatics and Integrated Genomics (4 Credits)
Computational methods for the study of biological data. Pairwise and multiple sequence alignment, genome assembly and annotation, RNAseq analysis, and structural bioinformatics. Introduction to UNIX, Python, and R in the context of biological sequence data. Previous computational experience is not necessary.
Prerequisite: Minimum grade of C- in BSCI222.
Recommended: BSCI410.
Credit Only Granted for: BSCI380 or BSCI411.
Formerly: BSCI380.

BSCI412 Microbial Genetics (4 Credits)
A laboratory/lecture based course that covers the fundamentals of mutation, mobile genetic elements and transmission genetics of microbial organisms using both classical and molecular approaches.
Prerequisite: BSCI222; and (BSCI223 or BSCI283).

BSCI413 Recombinant DNA (3 Credits)
An advanced course presenting the tools and procedures of genetic engineering. Theory and practical applications of recombinant DNA techniques to understanding eukaryotic gene structure and expression.
Prerequisite: BSCI330, BSCI223, or BSCI230; and BSCI222.
Formerly: ZOOL452.

BSCI414 Recombinant DNA Laboratory (3 Credits)
An advanced course offering hands-on experience in performing recombinant DNA experiments. All current molecular biology techniques used for cloning prokaryotic genes, analyzing the gene products, and modifying the genes will be performed. Techniques include isolation of DNA, use of restriction enzymes; cloning procedures, PCR analysis, and Southern hybridizations. Lecture material focuses on interpretation of results generated in the laboratory.
Prerequisite: BSCI222.

BSCI415 Molecular Genetics Laboratory (3 Credits)
Problem solving laboratory organized around extended projects that employ different approaches toward linking gene and function.
Prerequisite: Must have completed or be concurrently enrolled in BSCI410.
Restriction: Junior standing or higher.
Credit Only Granted for: BSCI348G or BSCI415.
Formerly: BSCI348G.

BSCI416 Human Genetics (3 Credits)
Approaches to human genetics and applications to biology and medicine focusing on specific human genetic topics using primary research papers as the main resource.
Prerequisite: Minimum grade of C- in BSCI410.
Recommended: BSCI330.

BSCI417 Microbial Pathogenesis (3 Credits)
Current research in microbial pathogenesis and the molecular and cellular basis of bacterial disease. Comprehensive overview of the molecular basis of pathogenesis with a focus on model microbial systems to illustrate mechanisms of disease pathogenesis. Topics covered: how microorganisms attach to and enter cells; how host cells are damaged by microbial products; how the host responds to invasion; and host-pathogen evolution.
Prerequisite: BSCI222; and (BSCI223 or BSCI283).
Restriction: Junior standing or higher.

BSCI420 Cell Biology Lectures (3 Credits)
Molecular and biochemical bases of cellular organization and function in eukaryotes.
Prerequisite: BSCI330, BSCI222, CHEM231, and CHEM232.
Credit Only Granted for: BSCI420 or BSCI421.

BSCI422 Principles of Immunology (3 Credits)
The immune system in health and disease. Presentation and analysis of the cellular and molecular processes that comprise the immune system.
Prerequisite: BSCI222.
Recommended: BSCI330; and (BSCI223 or BSCI283).
Restriction: Junior standing or higher.

BSCI423 Immunology Laboratory (2 Credits)
Current techniques for assessment of immune status and evaluation of the immune response, including monoclonal antibody production, Western blotting, cytokine assays, ELISA and flow cytometry.
Prerequisite: BSCI222.
Corequisite: BSCI422.
Recommended: BSCI223 or BSCI283.
Restriction: Junior standing or higher.

BSCI424 Pathogenic Microbiology (4 Credits)
The role of bacteria and fungi in the diseases of humans with emphasis upon the differentiation and culture of microorganisms, types of disease, modes of disease transmission, prophylactic, therapeutic, and epidemiological aspects.
Prerequisite: BSCI223 or BSCI283.

BSCI425 Advanced Cell Biology Lab Practices (2 Credits)
Experimental techniques used to study the molecular, structural, and spatial organization of plant and animal cells. Using a combination of in vitro assays aimed at analyzing macromolecular and subcellular components and in vivo analyses designed to reveal the inner architecture of a typical eukaryotic cell, students will have an opportunity to: improve some of the basic technical and conceptual skills they acquired in an introductory cell biology course; develop a more sophisticated understanding of the nature of experimental cell manipulation; and tackle the ongoing challenge of articulating their findings in both written and oral communication.
Prerequisite: Must have completed BSCI330, BSCI222, CHEM231, and CHEM232; and must have completed or be concurrently enrolled in BSCI420.
Credit Only Granted for: BSCI421, BSCI425, or BSCI348C.

BSCI430 Developmental Biology (3 Credits)
Structural, functional and regulatory events and mechanisms that operate during development to produce an integrated, multicellular organism composed of a multitude of differentiated cell types.
Prerequisite: BSCI222 and BSCI330.

BSCI431 The Origin and Evolution of Nervous Systems (3 Credits)
Explore how brains change through evolution along the animal tree of life. By comparing the nervous system structure and development across the animal kingdom, this course aims to reveal common designs and mechanisms that generate behavior, and to inform our understanding of how biology builds minds. Topics include the origins of neurons, the universal molecular patterning of brain development across invertebrates and vertebrates, the evolution of neurotransmission, comparative mechanisms of learning and memory, and what in our brain makes us human.
Prerequisite: Minimum grade of C- in NEUR200, BSCI353 or NEUR306.

BSCI432 Systems View of Cell Biology (3 Credits)
An integrated understanding of cell biology based upon reading of literature, discussion of new findings, and quantitative simulations. Exploration of ten topics including Heredity, Curing Diseases, and Synthesizing Life.
Prerequisite: BSCI330.

BSCI433 Biology of Cancer (3 Credits)
Causes and consequences of neoplastic transformations at the biochemical and cellular levels.
Prerequisite: BSCI222 and BSCI330; or permission of CMNS-Biological Sciences UG Program.

BSCI437 General Virology (3 Credits)
Discussion of the physical and chemical nature of viruses, virus cultivation and assay methods, virus replication, viral diseases with emphasis on the oncogenic viruses, viral genetics, and characteristics of the major virus groups.
Prerequisite: BSCI222; or permission of CMNS-Biological Sciences UG Program.
Restriction: Junior standing or higher.

BSCI440 Mammalian Physiology (4 Credits)
A study of the cardiovascular, hemopoietic, gastrointestinal, renal and respiratory systems. Chemical and endocrine regulation of physiological functions in mammals. Course does not count as an upper level lab for BIOL majors (see BSCI441).
Prerequisite: BSCI330; and (CHEM231 and CHEM232; or must have completed CHEM233). Or permission of CMNS-Biological Sciences UG Program.

BSCI441 Mammalian Physiology Laboratory (2 Credits)
Laboratory exercises in experimental mammalian physiology.
Prerequisite: Must have completed or be concurrently enrolled in BSCI440.

BSCI442 Plant Physiology (4 Credits)
An in-depth examination of the unique molecular and physiological principles necessary to understand how plants grow and respond to the environment at the cellular and organismal levels. Plants evolved unique metabolism and survival strategies, so students should be prepared to enter a world that may be new to them.
Prerequisite: Minimum grade of C- in BSCI170 and BSCI171; or minimum grade of C- in PLSC201; and minimum grade of C- in CHEM231 and CHEM232; or minimum grade of C- in CHEM237. Cross-listed with: PLSC400.
Credit Only Granted for: BSCI442 or PLSC400.

BSCI443 Microbial Physiology (3 Credits)
Microbial cellular and population growth. Fermentation metabolism, physiology of anaerobiosis, and energy conservation and transformation in bacterial membranes. Efficiency of energy utilization for growth. Membrane structure and transport. Bacterial motility and chemotaxis. Regulation of bacterial chromosome replication, RNA and protein synthesis. Control of metabolic pathways. Bacterial stress responses. Antimicrobials.
Prerequisite: Minimum grade of C- in BSCI223 or BSCI283; and minimum grade of C- in BCHM461 or BCHM462.

BSCI446 Neural Systems (3 Credits)
Neural development, followed by sensory, motor and integrative system organization in the central nervous system.
Prerequisite: Minimum grade of C- in BSCI353 or NEUR306.

BSCI447 General Endocrinology (3 Credits)
Functions and dysfunctions of the endocrine system with special reference to mammals.
Prerequisite: BSCI330, CHEM241, and CHEM242.

BSCI450 Mammalian Systems Physiology (3 Credits)
A study of the cardiovascular, hemopoietic, gastrointestinal, renal, and respiratory systems. Chemical and endocrine regulation of physiological functions in mammals.
Prerequisite: Minimum grade of C- in BSCI330; and minimum grade of C- in CHEM233 or both CHEM231 and CHEM232.
Credit Only Granted for: BIOL708M, BSCI338L, BSCI440, or BSCI450.

BSCI451 Mammalian Systems Physiology Laboratory (2 Credits)
Laboratory exercises in experimental mammalian physiology.
Prerequisite: Must have completed with a minimum of C- or be concurrently enrolled in either BSCI440 or BSCI450.
Credit Only Granted for: BSCI441 or BSCI451.
Formerly: BSCI441.

BSCI452 Diseases of the Nervous System (3 Credits)
An advanced course covering the neuroanatomy, function, and organization of the nervous system and its implication for pathology and disease.
Prerequisite: Minimum grade of C- in BSCI330; and minimum grade of C- in BSCI353. Jointly offered with: NACS728, BIOL708.
Credit Only Granted for: BSCI452, BIOL708E, or NACS728N.

BSCI454 Neurobiology Laboratory (2 Credits)
Basic neuroanatomical techniques, intracellular and extracellular recordings of electrical potentials from nerve and muscle.
Prerequisite: Minimum grade of C- in BSCI330; must have completed or be concurrently enrolled in BSCI353; and must have completed or be concurrently enrolled in PHYS122, PHYS132, or PHYS142.
Credit Only Granted for: BSCI454, BSCI455, NEUR405, or PSYC401.

BSCI455 Neuroscience Laboratory (3 Credits)
Students will utilize neurophysiological techniques to examine fundamental principles of neurons and neural circuits. This course will reinforce content from prerequisite NEUR courses. Students will also strengthen skills in experimental design and scientific writing.
Prerequisite: NEUR306 or BSCI353; and PHYS132.
Recommended: NEUR305. Cross-listed with: NEUR405.
Credit Only Granted for: PSYC401, NEUR405, BSCI455 or BSCI454.

BSCI456 Advanced Cellular Neuroscience (3 Credits)
Readings and discussion in cellular and molecular mechanisms underlying synaptic structure/function relationships, synaptic potentiation/depression, dendritic integration, homeostatic plasticity, and nervous system development including neurogenesis, axon guidance, synaptogenesis, and activity-dependent development among other topics.
Prerequisite: Minimum grade of C- in BSCI353 or NEUR306.
Recommended: Minimum grade of C- in BSCI440 or another upper-level neuroscience course.
Restriction: Permission of CMNS-Biology department. Jointly offered with: NACS644.
Credit Only Granted for: BSCI339X, BSCI456, or NACS644.
Formerly: BSCI339X.

BSCI460 Plant Ecology (3 Credits)
The dynamics of populations as affected by environmental factors with special emphasis on the structure and composition of natural plant communities, both terrestrial and aquatic.
Prerequisite: Minimum grade of C- in BSCI361.

BSCI462 Population Ecology (3 Credits)
Theory of population growth and regulation, life tables, and theory of competition and predation, evolution in ecological settings, community structure and dynamics.
Prerequisite: MATH130, MATH136, or MATH140; and BSCI361.

BSCI464 Microbial Ecology (3 Credits)
Interaction of microorganisms with the environment, other microorganisms and with higher organisms. Roles of microorganisms in the biosphere. Microorganisms and current environmental problems.
Prerequisite: BSCI223 or BSCI283; and (CHEM271 or CHEM277); or permission of the instructor.

BSCI465 Behavioral Ecology (3 Credits)
How natural and social environments shape individual behavior. The influence of evolution on patterns of individual adaptation. Use of the evolutionary paradigm to investigate specific problems in animal and human behavior.
Prerequisite: BSCI160 and BSCI161; or BSCI106. And BSCI222.

BSCI467 Freshwater Biology (4 Credits)
Biology and ecology of freshwater invertebrates in lotic and lentic habitats, their adaptation to aquatic life, their function in aquatic ecosystems, and their relationship to environmental deterioration. Laboratory will include field trips, demonstrations, and identifications.
Prerequisite: BSCI160.

BSCI471 Molecular Evolution (3 Credits)
Patterns of DNA sequence variation within and between species, caused by nucleotide changes and the movement of transposable elements. Theories of molecular evolution, such as the neutral theory. Molecular clock hypothesis: its importance as a practical empirical tool in molecular genetics and systematics and its theoretical foundation.
Prerequisite: BSCI222; or permission of CMNS-Biology department.

BSCI473 Marine Ecology (3 Credits)
Courses in evolution and animal behavior are strongly recommended. A detailed analysis of the evolutionary ecology of marine invertebrates; emphasis on testing of theories and on current literature.
Prerequisite: BSCI207.

BSCI475 Sexual Selection in Nature (3 Credits)
Sexual selection drives some of the most spectacular, if not bizarre, traits in nature. We will explore how organisms select and compete for mates and fertilization success, and how this powerful and pervasive evolutionary force shapes sexual traits and regulates species boundaries. We will focus on the key theories in the field and discuss recent and classic research papers. This is a student-directed class: course topics and materials will be selected based on student interests and involvement. On occasion, experts in the field will be invited to class to discuss their research.
Prerequisite: Minimum grade of C- in BSCI207; or permission of instructor.
Recommended: BSCI360 or BSCI370. Jointly offered with BIOL708.
Credit Only Granted for: BSCI338X, BSCI475, or BIOL708X.
Formerly: BSCI338X.

BSCI477 Ecology and Evolution of Infectious Disease (3 Credits)
Parasites are a ubiquitous feature of ecological communities, and can strongly impact population growth, extinction risk, community structure and biodiversity, as well as pose serious risks to human health and food security. This course will cover basic principles of disease ecology, including; the diversity of parasitic organisms and transmission modes, host and pathogen traits for defense and infection, mathematical models of disease spread, the impacts of disease at different ecological scales, and host-parasite co-evolution. In the latter half of the course we will apply these basic concepts to current real-world problems in disease ecology including emerging infectious diseases in humans, wildlife and agriculture. We will use examples from plants, animals and humans to about an equal degree. This course will have a strong quantitative focus, and completion of the math series is recommended.
Prerequisite: C- or better in either BSCI370 or BSCI361 and either MATH136 or MATH140.
Credit Only Granted for: BSCI477 or BIOL708D.

BSCI480 Arthropod Form and Function (4 Credits)
Survey of the morphological, systematic and physiological diversity of the phylum Arthropoda.
Prerequisite: Permission of CMNS-Entomology (AGNR).

BSCI481 Insect Diversity and Classification (4 Credits)
A summary of the morphology, systematics and evolution of insects and techniques for their collection, preservation and identification. Emphasis is placed on the diversity of insects in North America, particularly Maryland and adjacent regions. An insect collection is required.
Prerequisite: BSCI337.

BSCI482 Insect Physiology and Molecular Biology (4 Credits)
Physiological and biochemical functions of insects. Insect endocrinology, neurobiology, sensory physiology, integument and molting, development and metamorphosis, immunity, metabolism and related topics.
Prerequisite: BSCI337.

BSCI483 Insects, Pathogens, and Public Health (3 Credits)
Mosquito- and tick-borne disease transmission poses significant challenges to human health and well-being globally, and is on the rise in North America. Arthropod parasites and the pathogens they transmit to humans and animals will be introduced, and the public health significance of these arthropods will be examined. The ecology and behavior of vectors in relation to disease transmission will be emphasized.
Prerequisite: BSCI207.

BSCI487 IPM: Science-Based Decision Making for Sustainable Pest Management (4 Credits)
Long-term global food security requires a sustainable increase in agricultural productivity to ensure the availability and accessibility of safe and nutritious food. Agricultural pests reduce global food production and threaten its sustainability. This course explores sustainable pest management in agroecosystems using the integrated pest management (IPM) paradigm. IPM is an ecosystem-based strategy that focuses on long-term prevention of pests or their damage through a combination of techniques such as biological control, habitat manipulation, modification of cultural practices, and use of resistant varieties. Pesticides are used only after monitoring indicates they are needed according to established guidelines, and treatments are made with the goal of removing only the target organism. Pest control materials are selected and applied in a manner that minimizes risks to human health, beneficial and non-target organisms, and the environment.
Prerequisite: BSCI160 and BSCI161.
Restriction: Must have earned a minimum of 90 credits.
Credit Only Granted for: BSCI487 or ENTM609.

BSCI488 Summer Biology Institutes (1-8 Credits)
Prerequisite: Permission of CMNS-Biological Sciences UG Program.
Repeatable to: 12 credits if content differs.

BSCI494 Animal-Plant Interactions (3 Credits)
Theoretical, conceptual and applied aspects of evolutionary and ecological interactions between plants and animals. This course gives an overview of major ideas, historical controversies, and current research on animal-plant relationships. We will explore the mechanisms and evolution of plant defenses and animal counter-adaptations, behavioral ecology and interactions across trophic levels, the role of microbial communities in mediating interactions, and how these interactions color human experience through food and medicine. The course will have a blended lecture/discussion format and will include field walks to collect herbivory data and observe animal-plant interactions.
Prerequisite: BSCI160 and BSCI161; or BSCI106.

BSCI497 Insect Pests of Ornamentals and Turf (4 Credits)
The recognition, biology and management of insects and mites injurious to ornamental shrubs, trees, greenhouse crops, and turf. Emphasis on Integrated Pest Management (IPM).
Prerequisite: BSCI160 or BSCI337; or (PLSC110 and PLSC111) or (PLSC112 and PLSC113).

BSOS - Behavioral and Social Sciences

BSOS438 Special Topics in Study Abroad IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

BSOS448 Teaching Assistant Practicum (1-6 Credits)
Supervised practicum for teaching assistants for BSOS/UNIV courses.
Repeatable to: 9 credits.

BSOS678 Special Topics in Justice Leadership (3 Credits)
Crime and Criminal Justice in Vietnam. Issues that will be focused on the present situation of crime in Vietnam; causes and conditions of criminal activities; include crime forecasting and crime prevention in Vietnam. Also, provides comprehensive overview on the Criminal Justice System in Vietnam and relations among authorities.
Repeatable to: 18 credits if content differs.

BSOS685 Big-Data Analysis on the BSOS HPC Cluster (2 Credits)
Social media are a primary source of information on social interaction and personal interests. High-performance computing (HPC) is employed to search for hidden pattern and unknown correlations using advanced machine-learning algorithms available in python and R packages. The main steps of Natural Language Processing and big-data analysis are being worked out, from examining random samples to analyzing large data sets via in-memory Monte-Carlo applications and neural networks.
Prerequisite: Students must have completed a least one college-level statistics course.
Recommended: A working knowledge of python or R is expected.
Restriction: Students must be enrolled in a BSOS graduate program; or permission of instructor.
Credit Only Granted for: BSOS385, BSOS685, or BSOS688B.
Formerly: BSOS688B.

BSST - Terrorism Studies

BSST458 Special Topics in Study Abroad IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

BSST630 Motivations and Intents of Terrorists and Terrorist Groups (3 Credits)
Examines motivations for terrorism from an interdisciplinary perspective, with emphasis on political and applied social psychological perspective. Topics may include: defining terrorism; preconditions; recruitment; domestic and international terrorism; and case studies and analysis of terrorist organizations.
Credit Only Granted for: BSOS630 or BSST630.
Formerly: BSOS630.

BSST631 Societal Impacts of and Responses to Terrorism (3 Credits)
Explores the manners in which a variety of different actors respond to both terrorist incidents and the threat of terrorism. Examines local responses to terrorist incidents; local impacts of terrorism including effects on individual and group attitudes and behaviors; policy decisions made in response to both terrorist attacks and the threat of terrorism; terrorism prevention, deterrence, interdiction, and mitigation efforts; and individual and community recovery from terrorist attacks.
Credit Only Granted for: BSOS631 or BSST631.
Formerly: BSOS631.

BSST632 Development of Counterterrorism Policies and Programs (3 Credits)
Addresses the formulation, adoption, effectiveness, impacts, and afterlives of counterterrorism policies and programs.
Restriction: Must be in the Terrorism Analysis Graduate Certificate Program; or permission of department.
Credit Only Granted for: BSOS632 or BSST632.
Formerly: BSOS632.

BSST633 Research Methods in Terrorism and Counterterrorism (3 Credits)
Provides students with the opportunity to conduct original research, while exposing them to analytical tools relevant to the study of terrorism. Students will work with a range of data sources on domestic and international terrorism, and will be tasked with using data to test hypotheses related to the causes, behaviors, and/ or impacts of terrorism.
Credit Only Granted for: BSOS633 or BSST633.
Formerly: BSOS633.

BSST634 Legal and Criminal Approaches to Counterterrorism (3 Credits)
The United States and many of her allies have challenged long-standing legal boundaries in their effort to combat terrorism. This course examines these responses, including: increased criminalization of terrorism related activities; aggressive criminal prosecutions; detention of suspected terrorists indefinitely in far-off prisons; implementation of enhanced interrogation techniques; launch of drones to kill alleged terrorists, even U.S. citizens; and deployment of a vast system of mass surveillance.

BSST635 Countering Violent Extremism: Policy and Practice (3 Credits)
In recent years, the understanding of how and why individuals engage in violent extremism and terrorism has evolved and become more nuanced, as have the tools to mitigate these threats. A field of policy and practice called Countering Violent Extremism (CVE) has emerged that focuses on countering the pull of terrorist recruitment and influence by building resilience among populations vulnerable to radicalization.

BSST636 Quantitative Research Methods in Terrorism Studies (3 Credits)
Introduction to probability, statistics and data analysis, particularly with respect to how they are used in the study of terrorism. Students will learn fundamental principles of probability and statistical inference, how to summarize data and make statistical inferences, and how to manipulate and analyze data in a statistical software package (Stata) that is widely used in the discipline. The course provides a foundation in quantitative analysis that will enable students to critically evaluate extant quantitative research and manipulate their own data. It will also prepare interested students for more advanced statistics training.

BSST637 Qualitative Research Methods in Terrorism Studies (3 Credits)
Explores research design and qualitative methods using a hands-on approach. The course considers general themes such as the logic of inquiry, the appropriateness of qualitative approaches, as well as more specific topics such as process tracing, archival research, and survey methodology. It also provides students with the opportunity to learn and apply different tools for social science research.

BSST638 Special Topics in Terrorism Studies (3 Credits)
A special topics course for students in the Global Terrorism Minor program. Topics that may be offered are Psychology of Terrorism; Development of Counterterrorism Policies and Programs; Terrorism and Popular Culture; Terrorism and the Media; International Perspective on Terrorism and Counterterrorism (Education Abroad); The Evolution of Hezbollah; Terrorism and Small Wars; Political Islam in the West.
Repeatable to: 9 credits if content differs.

BSST639 Applied Analysis for Security Studies (3 Credits)
Introduces students to novel approaches for applied research in security studies. Topics include simulations, wargaming exercises, red teaming, and horizon scanning. This course assumes no prior experience with these methods. Throughout the course, students will complete interactive strategy-based activities to understand the behavior of violent non-state actors and how to use applied methods to counter militant groups.

BSST640 Theories of Security and Terrorism Studies (3 Credits)
Security and Terrorism Studies is a broad field that includes relevant theoretical voices from across the social sciences, philosophy, and policy. This course will mainly pull from sociological, psychological, and political science (international relations) theory to help students understand the theoretical foundation for the field and for their research. Specific topics may include discussion of power dynamics, ideology, violence, conflict, realist perspectives, and critical perspectives.
Additional Information: Priority enrollment will be given to students in the MPS in Security and Terrorism Studies program.

BSST641 U.S. Security Infrastructure (3 Credits)
An overview of the federal departments and agencies whose core missions are to provide for security and prevent terrorism. The course will overview the Departments of Defense, State, Treasury, Homeland Security, and the U.S. Intelligence Community as well as state, local, and tribal assets, and think tanks and the media, to provide students with a better understanding of interagency successes and gaps.

BSST642 Analytic Methods (3 Credits)
Development and mastery of analytic methods is vital for those seeking careers as professional analysts in fields related to security and terrorism studies. For students focused on an academic research career path, these skills will help you better interface with government and private sector consumers of your work. The overall goals for this course are to provide students with hands-on experience using analytic techniques to solve advanced problems. Classes will cover historical and current uses of analytic techniques and students will develop an understanding of which tools to use under different circumstances of analysis.

BSST643 Great Powers & Near-Peer Competition (3 Credits)
Focused on the emerging threats posed by state actors termed as "near-peers," including topics germane to near-peer competitors, most notably China, Russia, and Iran, but will cover other state actors as necessary. The course also investigates the past, present, and future of the most powerful states in the international system, the great powers, and how they compete, and cooperate in international relations. By examining the various aspects of the great powers and near-peer competitors, students will learn how geography, politics, economics, technology, and ideology play a role in global competition.

BSST645 Non-state Actors Threats and Responses (3 Credits)
The Non-State Actor. Running the gamut from Freedom fighters to Corporatized extortionists, NSAs play a pivotal role in the modern fields of combat. Some maintain loose state-level ties with high deniability, others rage against their domestic governments and facilitate foreign influence, but all present a modern adversary that Western Allies and Governments need to anticipate, track, and overcome. This course will provide an overview of the types of non-state actors that influence state actions. The course will examine the economic, political, and social costs of the proliferation of non-state actors globally. While the course will discuss terrorist groups, the main focus of the course will be on actors such as militant groups, insurgent groups, drug cartels, and illicit financial actors.

BSST650 Foundations of Insider Risk Management & Mitigation (3 Credits)
The risks posed by trusted insiders to organizations in both the public and private sector are well documented. Past compromises of national security information have provided sensitive information to US adversaries; theft or compromise of proprietary data and intellectual property has impacted businesses large and small; and, incidents of workplace violence perpetrated by insiders are on the rise. This course provides context for the counter insider threat mission and explores multi-disciplinary insider risk management concepts. The course addresses matters of policy, political and socio-economic impacts, psychological factors, and gives special consideration to issues of cyber insider threat, privacy and civil liberties, kinetic violence, and related social and behavioral science research.

BSST651 The Psychology of Malicious Insiders (3 Credits)
Multidisciplinary perspectives on intentional, malicious behavior by insiders. Reviews theoretical foundations from social psychology, personality psychology, psychopathology, and criminology and encourages students to understand Insider Threat (InT) behaviors through case conceptualization/formulation. Emphasis shall be placed on understanding the "fit" between different strategies for interviewing, investigating, early warning, monitoring, and mitigation, as well as the dynamics of a given case.

BSST652 Managing Insider Threat Activities (3 Credits)
Introduces critical concepts in threat assessment, management, and mitigation. Specifically, the seminar will highlight key concepts, theories, best practices, and research in three major areas of focus: (1) threat assessment and risk management, (2) mitigating existing risk and preventing further escalation, and (3) oversight and accountability of threat assessment activities.

BSST653 Investigative Thinking, Analysis and Decision-making in Insider Risk Management & Mitigation (3 Credits)
The purpose of this course is to stimulate "knowledge opportunity" in the complex everyday subject of decision making in insider threat analysis. Through the discovery of investigative thinking and some of its core elements of critical thinking, data to knowledge process, communication, heuristic, bias, and thinking processes, it is hoped it will lead students towards a better understanding of "What they are looking for" and "What they are looking at," both key elements essential in sound investigative thinking.

BSST697 Capstone (3 Credits)
The capstone course allows MPS students the ability to take what they have learned throughout their coursework and apply theories, methods, analysis, and policy in the form of a final project. The project can originate from work experience or the student's interests. Projects will be developed in conjunction with a member of the graduate faculty who will oversee the student's progress. By the end of the semester, each student is expected to have completed their individual project. The project should further the student's intellectual and career goals and can take the form of practical analysis, policy, or a more academic approach. Students will present their capstone project in written form and will also be required to present their research via an online colloquium. Students are expected to meet with a capstone advisor at least once a week and will devote considerable time developing the project individually.
Restriction: Students must be currently enrolled in their final semester of the MPTS program and have completed a minimum of 27 program credits.

BSST698 Seminar in Terrorism Studies (1-3 Credits)
A special topics seminar course for graduate students interested in terrorism studies.
Repeatable to: 9 credits if content differs.

BSST699 Independent Study in Terrorism Studies (3 Credits)
An independent study course for students in the Global Terrorism Minor program.
Repeatable to: 9 credits if content differs.

BUDT - Decision and Information Technologies

BUDT700 Business Communication (1 Credit)
Consists of written and oral base-line assessments. Students will meet with Program administrators to receive feedback on these assessments and create an individualized development plan. Workshops and core course assignments, Smith-related activities and CMP assignments.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.
Credit Only Granted for: BUDT758A or BUDT700.
Formerly: BUDT758A.

BUDT702 Database Management Systems (2 Credits)
Introduction to the conceptual, logical and physical design of relational database systems and their use in business environments. Topics include information modeling and optimization via normalization; Structured Query Language (SQL); Data Warehousing.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUDT703 Database Management Systems (3 Credits)
Introduction to the conceptual, logical and physical design of relational database systems and their use in business environments. Topics include information modeling and optimization via normalization; Structured Query Language (SQL); Data Warehousing.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.
Credit Only Granted for: BUDT758Y OR BUDT703.
Formerly: BUDT758Y.

BUDT704 Data Processing and Analysis in Python (3 Credits)
An introduction to the Python programming language for the purpose of processing, analyzing, and visualizing data. In addition, students will be introduced to developing basic regression, optimization, and simulation models in Python, using highly popular packages. Course emphasis is on mastering basic Python functionality and developing intermediate to advanced skills in working with data, through instruction and active learning.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.
Credit Only Granted for: BUDT758X OR BUDT704.
Formerly: BUDT758X.

BUDT705 Data Visualization for Business (2 Credits)
An introduction to data visualization techniques. Data-driven decisions are increasingly embedded in business organizations, so professionals must be able to explore and communicate data with understandable and powerful visualizations.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.

BUDT706 Social Media and Unstructured Data Analytics (2 Credits)
Firms operate in a world that is rapidly changing. Traditional product and service strategies are not sufficient when firms and consumers operate in a highly networked environment. Adoption of digital technologies is changing consumer behaviors and firms' competitive landscapes. Businesses need to craft strategies that leverage the vast amounts of data provided by the digital footprints of their customers. Predictive analytics, particularly social media and unstructured data analytics can provide clear, insightful, and actionable initiatives leveraging existing company data and data gathered from online channels and platforms. The course on social media and unstructured data analytics provides the conceptual understanding and analytical skills needed for businesses to succeed in today's rapidly changing environment. We will review concepts related to platforms, social media, network analytics and text analytics, and examine issues associated with business use of these technologies.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUDT721 Digital Transformation in Business (2 Credits)
Introduces students to the strategic role of digital transformation within businesses, and provides an overview for how major information technologies may be used to inform and transform the firm's strategic, operational, and tactical decisions. Topics discussed in the course include the strategic use of digital technologies to generate sustainable competitive value; the contributions of new forms of technology infrastructure; the evaluation of new technology investments and the resulting ROI; acquiring, managing and governing technological capabilities within the firm; understanding the role of enterprise systems and social technologies within the firm; and the management of disruptive technologies within and outside the firm.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.
Credit Only Granted for: BUDT758E or BUDT721.
Formerly: BUDT758E.

BUDT722 Managing Digital Business Markets (2 Credits)
The objective is to understand the strategic and tactical issues involved in managing digital businesses and markets. Also, some of the characteristics of digital businesses and markets that make them unique and understand how companies can best manage them will be examined.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.
Credit Only Granted for: BUDT758G or BUDT722.
Formerly: BUDT758G.

BUDT723 Business Process Analysis for IS (2 Credits)
Helps students gain a solid foundation in the concepts, processes, tools, and techniques needed in analyzing business processes and conducting information systems projects.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.

BUDT724 Project Management in Dynamic Environments (2 Credits)
Addresses project management skills that are required by successful managers in increasingly competitive and faster-moving environments. Examines fundamental concepts of successful project management, and the technical and managerial issues, methods, and techniques.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.

BUDT730 Data Models and Decisions (3 Credits)
Analytical modeling of business decisions; uncertainty, risk and expected utility; regression modeling to infer relationships among variables.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.
Credit Only Granted for: BUSI758B, BUDT758Q or BUDT730.
Formerly: BUDT758Q.

BUDT731 Data, Models, and Decisions Using R (2 Credits)
Analytical modeling of business decisions; uncertainty, risk and expected utility; regression modeling to infer relationships among variables.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUDT732 Decision Analytics (3 Credits)
Analytical modeling for managerial decisions using a spreadsheet environment. Includes linear and nonlinear optimization models, decision making under uncertainty and simulation models.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.
Credit Only Granted for: BMGT732, BUDT758P or BUDT732.
Formerly: BMGT732 and BUDT758P.

BUDT733 Data Mining and Predictive Analytics (2 Credits)
With vast quantities of data being generated, including new types of data such as web traffic, social network data, and reviews and comments on websites, "big data" and "analytics" are important topics. Data, when used correctly, can create a competitive edge for firms. Advances in computing hardware and algorithms have improved the quality of predictions and effectiveness of predictive business applications. Expertise in working with data, and deep knowledge of data mining/machine learning methods, is a sought-after skill. This course introduces key tools and techniques of data mining: classification, prediction, cluster analysis, and text mining. The methods covered are linear and logistic regression, k-nearest neighbors, naive Bayes, classification and regression trees, ensemble methods, neural networks, k-Means and hierarchical clustering, and association rules. The course will focus on business applications, with examples from Marketing, Finance, Healthcare, and Operations.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUDT738 Industry Seminar (0 Credits)
This experiential course will be offered in the Fall and Spring Semester of the first year to provide students exposure to career paths, real-world technology challenges faced by business and how these challenges are overcome. UMD Smith alumni will host weekly interactive learning discussions.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.
Repeatable to: 0 credit.

BUDT740 Management of Information Systems (3 Credits)
To work together effectively for an organization's success, both business managers and IS managers must understand how to both manage and utilize information systems. This course explores management issues and opportunities of the IS function within organizations. Topics include e-business, protection of intellectual property and personal information, software development, IS operations, systems availability and business continuity, IS for multinational organizations, shadow IS organizations, business partnerships and alliances, and mergers, acquisitions, and divestitures.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.
Credit Only Granted for: BUDT758J or BUDT740.
Formerly: BUDT758J.

BUDT741 Digital Health (2 Credits)
Healthcare is perhaps the latest industry to use technology to innovate and automate its business processes. The focus of the course is to provide a deep understanding to the current and emerging technologies in the healthcare industry. The course will also discuss the vagaries of healthcare data and the analytics techniques that are specific to the healthcare industry.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.
Credit Only Granted for: BUDT758M or BUDT741.
Formerly: BUDT758M.

BUDT742 Machine Learning & Blockchain for FinTech (2 Credits)
Machine Learning is rapidly changing the financial services industries and Blockchain is poised to make fundamental changes to how the financial sector is structured and organized. The focus of the course is to provide a deep understanding for the current machine learning and emerging Blockchain technologies in the financial services industry.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.
Credit Only Granted for: BUDT758I or BUDT742.
Formerly: BUDT758I.

BUDT748 Industry Practicum (3 Credits)
This capstone course will provide students an opportunity to work on a real-world project where they will work with a company to use technology to solve a business problem.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUDT751 Harnessing AI for Business (2 Credits)
Artificial Intelligence (AI) is penetrating our daily routines deeply and is revolutionizing almost every aspect of business. Firms are increasingly using technologies such as natural language processing, neural networks, and deep learning to generate deep insights. At the same time, AI algorithms are challenged by issues of bias, ethics, and transparency. This course aims to equip students with the essential knowledge of the current wave of AI. It uses a hands-on, learning-by-doing approach to understanding the concepts behind AI, the strategic drivers of these technologies and the value propositions that they provide to industries. The focus is on creating awareness of the technologies, allowing some level of familiarity with them through assignments, and enabling some strategic thinking around the use of these in business.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUDT753 Blockchain Technologies and Business Applications (2 Credits)
Creates a strong business and technical foundation for Blockchain, starting with an in-depth discussion of the business inefficiencies that the Blockchain technology has the potential to address. This is followed by reviewing the computer science fundamentals related to cryptology, distributed computing, and peer-to-peer architectures that Blockchain systems rely on. The course then provides a comprehensive understanding of Bitcoin including its limitations, and the work that has been done to date to address these limitations. Alternate Blockchain implementations such as Ethereum and Hyperledger are discussed with a focus on smart contracts. The course will also cover potential business applications in Finance, Healthcare, Supply Chain, and Arts/Media/Entertainment. Students will be exposed to current research problems and research efforts in progress.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUDT754 IoT Applications for Business (2 Credits)
The IoT is enabling the digitization and internet connectivity of most physical things. The focus of this course is to provide students an in-depth understanding of the technology components of the IoT architecture, infrastructure, data and analytics so that they are equipped to develop business applications using IoT that deliver business outcomes.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUDT756 Causal Inference & A/B Testing (2 Credits)
Organizations and policymakers in government constantly grapple with such causal questions. For example, firms want to know how does a price change affect the sales of a product, or how to design websites and platforms that increase consumer engagement and lead generation; political parties want to know what on social media sites can boost their political influence, and governments want to know whether allowing parents to pay for private schools using publicly funded vouchers make the education system more effective. In particular, platforms such as Netflix, Airbnb, eBay, Groupon, Booking.com, Uber, Amazon, etc. make extensive and continuous use of A/B tests and have a dedicated team of data scientists and IT-personnel to implement, monitor and analyze such tests. Banks and Insurance companies constitute another important sector where the use of A/B testing is ubiquitous.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUDT757 Cybersecurity (2 Credits)
Distributed technologies and the ability of business to capture increasing amounts of sensitive data have increases the stakes and risks for information security. The focus of this course will be to help students understand cybersecurity frameworks, analytic techniques and enterprise risk management.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUDT758 Special Topics in Decision, Operations and Information Technologies (1-4 Credits)
Selected advanced topics in the various fields of graduate study in decision, operations and information technologies.
Restriction: Permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 9 credits if content differs.
Formerly: BMGT798.

BUDT759 Independent Study in Decision and Information Technologies (1-6 Credits)
Independent study for masters students in decision and information technologies.
Repeatable to: 6 credits if content differs.
Formerly: BMGT708.

BUDT775 Pricing and Revenue Management (2 Credits)
Specialized course on pricing and revenue management (PRM) that provides students with tools and principles, drawn from several disciplines (Operations, Microeconomics, Decision Modeling, Statistics, Marketing, IS) to make effective pricing decisions. Topics covered include economics of pricing, strategy and tactics of PRM, pricing optimization, differentiated pricing, dynamic pricing, mark-down pricing, legal and ethical issues in models/methods used in making effective PRM decisions and managerial or organizational factors that hold the key to success in execution of PRM.
Prerequisite: BUSI630.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUDT758D or BUDT775.
Formerly: BUDT758D.

BUFN - Finance

BUFN400 Introduction to Financial Markets and Financial Datasets (3 Credits)
Provides an overview of financial concepts and markets and datasets. Company financial statements will be used to review concepts including earnings, cash flow, accruals, investment, dividends, etc. The course will introduce concepts related to portfolio theory and asset pricing. It will introduce the fundamentals of the stock market and market microstructure, including bid ask spreads and market liquidity. Advanced topics include event studies, high frequency trading, Over The Counter (OTC) bond markets, and more specialized institutional arrangements including repo markets and foreign currency exchange markets.
Prerequisite: STAT400, STAT401, STAT410, or STAT420.
Recommended: CMSC320, CMSC351, MATH240, and MATH241; and should have extensive familiarity with Python including Pandas, Numpy, Scipy, Matplotlib; and familiarity with probability and statistics, econometric modeling.
Restriction: By Permission Only.

BUFN401 Option Theory and Derivatives (3 Credits)
Will introduce Option Theory and the concept of a derivative financial contract whose value is based on some underlying asset, e.g., a stock or bond or commodity. Option theory based pricing models are a cornerstone of modern finance. Unlike the Capital Asset Pricing Model (CAPM) that determines an appropriate rate of return, option theory primarily relies on arbitrage arguments, and the probability that an option will be exercised during some time interval. Option theory has been very successful empirically. Common derivative types include stock and bond and index options, futures contracts, forward contract and swaps.
Prerequisite: BUFN400.

BUFN402 Portfolio Management (3 Credits)
The fundamentals of portfolio management, including asset allocation, investing strategies, and risk management. The class describes some of the main strategies used by hedge funds and provides methodologies to analyze them. The strategies are illustrated using real financial data, and students learn to apply tools for performance measurement, portfolio optimization (quadratic programming), factor models, predictive regression analysis, backtesting, and managing transaction costs.
Prerequisite: BUFN400.

BUFN403 Capstone Computational Finance Projects (3 Credits)
This is a semester-long capstone project to be completed by student groups. The projects will range from academic research projects (co-mentored by a finance or computer science faculty member) or an industry focused project (co-mentored by an industry coach). Each project must address an interesting real world challenge faced by a researcher, an analyst or a financial regulator. The project would ideally use a real dataset. Teams can create their own datasets or re-purpose existing datasets. There will be credit given to teams who create or curate their own datasets. The project should apply methodology based in machine learning, information / data management, including NLP and text analytics. The project must include a visual analytics component so that the results from the project can be presented and explained to the user.
Prerequisite: BUFN400 and CMSC320.

BUFN602 Introduction to Financial Accounting (2 Credits)
Overview of financial accounting, periodic financial statements and the financial reporting process. Importance of financial statements as information source for creditors and investors and as a means by which managers can communicate information about their firms.
Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.
Credit Only Granted for: BUSI610, BUAC602, BUFN602, or BMGT602.

BUFN610 Financial Management (2 Credits)
The fundamental concepts and techniques used to evaluate corporate decisions. Topics include the time value of money, valuation of common securities, investment decisions, capital budgeting, capital structure, and the weighted average cost of capital. The objectives are to develop the ability to make investment decisions, manage project finances, and analyze financial decisions.
Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.
Credit Only Granted for: BUSI640, BUFN610, or BMGT610.

BUFN620 Capital Markets (2 Credits)
Covers modern theories and techniques for analyzing investments in different securities. Introduces mathematical and statistical models to price securities and guide investment decisions. The main topics covered are portfolio theory, pricing models, market efficiency, fixed income investment, and options.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN740 or BUFN620.
Formerly: BUFN740.

BUFN630 Valuation in Corporate Finance (2 Credits)
An advanced corporate finance course focusing on valuation. The main objective is to apply the concepts covered in the introductory finance class through real-life applications (cases) and use valuation estimates to guide and communicate investment decisions. The topics include building Pro Forma statements and forecasting future cash flows, dynamic cash flow models, estimating the cost of capital, implementing the Weighted Average Cost of Capital (WACC) and Adjusted Present Value (APV) methods, and using real options techniques (binomial and Black and Scholes models as well as Monte Carlo simulations) to value companies and projects.
Prerequisite: BUFN610.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN630, BUFN714, BUFN750, BUFN753, or BMGT730.
Formerly: BUFN750.

BUFN640 Financial Data Analytics (2 Credits)
Introduces the skills and computing languages for analyzing financial data and testing financial models. Covers topics such as the ordinary least square regression (OLS) estimator, its properties and applications, statistical inference, and univariate and multivariate analysis. The focus is on working with data and applying econometric models to financial applications such as estimating asset pricing models, portfolio choice, and the efficient frontier. The course will use Python programming language, Google Colab environment, and matching learning packages.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN758N of BUFN640.
Formerly: BUFN758N.

BUFN650 Machine Learning in Finance (2 Credits)
A hands-on course on applications of cutting-edge machine learning methods to financial modeling. It builds on the Financial Analytics class to introduce students to a wide variety of machine learning techniques ranging from lasso regression to deep learning and TensorFlow. The course provides the basic ideas and intuition behind these methods, a more formal understanding of how and why they work, and opportunities to experiment with machine-learning algorithms and apply them to big data modeling in finance. It will use the Python programming language, Google Colab environment, and machine learning packages.
Prerequisite: BUFN640.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN758O or BUFN650.
Formerly: BUFN758O.

BUFN660 Derivative Securities (2 Credits)
Introduces standard derivative contracts, including forwards and futures, swaps, and options. Covers the mathematical foundation of valuing derivative contracts, the use of static and dynamic replication strategies, and the concept of no-arbitrage. Derivative securities on various underlying assets (equities, indices, commodities, foreign exchange, etc.) are analyzed using different application contexts.
Prerequisite: BUFN610.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN660, BUFN726, BUFN761 or BUFN773.
Formerly: BUFN761.

BUFN670 Financial Mathematics (2 Credits)
Introduction to the mathematical models used in finance and economics with emphasis on pricing derivative instruments. Topics include elements from basic probability theory, distributions of stock returns, elementary stochastic calculus, Ito's Lemma, arbitrage pricing theory, and continuous time portfolio theory. Particular focus is on the financial applications of these mathematical concepts.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUFN710 Financial Strategy for Corporations (2 Credits)
An advanced course in corporate finance, focusing on the issues that firms face when they plan to raise external capital from financial markets. The focus is on the financing problems faced by mid-market to large firms and on capital raised from public markets. The forms of external finance vary from simple debt or equity to more complex securities that bundle with an element of risk management.
Prerequisite: BUFN610; or permission of BMGT-Robert H. Smith School of Business.
Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.
Credit Only Granted for: BUFN751 or BUFN710.
Formerly: BUFN751.

BUFN712 Financial Restructuring (2 Credits)
Focuses on identifying ways to increase firm value through corporate restructuring. Specific topics include: mergers and tender offers, spin-offs, carve-outs, divestitures, takeover defense strategies, leveraged buy-outs, and international acquisitions. Additionally, the theory, practice and empirical evidence related to each of these topics will be covered. Emphasis will be placed on valuation analysis and strategic considerations.
Prerequisite: BUFN610.
Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.
Credit Only Granted for: BUFN712 or BUFN752.
Formerly: BUFN752.

BUFN714 Corporate Governance and Performance (2 Credits)
Deals with corporate governance and its impact on shareholder value. Divergence of interests between corporate insiders and providers of funds leads to agency problems which can impair corporate performance and shareholder value. Various instruments of corporate governance - internal as well as external mechanisms - that can help align managerial incentives with those of outside investors, and hence help restore shareholder value will be studied.
Prerequisite: BUFN610.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN630, BUFN714, BUFN750, BUFN753, or BMGT730.
Formerly: BUFN753.

BUFN716 Corporate Risk Management (2 Credits)
Surveys the theory and practice of financial risk identification, measurement, and mitigation at financial and non-financial firms. Topics will include hedging with options and futures, interest rate risk management, Value-at-Risk (VaR), Cashflow-at-Risk (CaR), Earnings-at-Risk (EaR), credit risk, equity risk, commodities risk, exchange rate risk, and lessons from risk management disasters.
Prerequisite: BUFN610.
Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.
Credit Only Granted for: BUFN716 or BUFN754.
Formerly: BUFN754.

BUFN717 Entrepreneurial Finance and Private Equity (2 Credits)
An advanced topics course in Corporate Finance. The major emphasis is how financiers help growing firms - and in particular young start-ups - using different types of securities at different points in the industry's and firm's life. Financing arrangements and securities studied will include private equity funds and private financings placements, Venture Capital (VC) and preferred equity, Investment Banks through Initial Public Offerings (IPOs), Private equity finds, debt and leveraged buyouts. Students will learn additional techniques that will help them understand how financiers value firms and how to understand, plan and value different financing strategies.
Prerequisite: BUFN610.
Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.
Credit Only Granted for: BUFN755 or BUFN717.
Formerly: BUFN755.

BUFN721 International Investment (2 Credits)
Addresses international stock markets, portfolio theory, international interest rates, exchange rates and exchange rate derivatives (options, forwards, and futures), exchange rate swaps and exchange rate exposure (operating, translation, and transaction), foreign investment strategy.
Prerequisite: BUFN610.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN721 or BUFN770.
Formerly: BUFN770.

BUFN722 Banking and Financial Institutions (3 Credits)
The role of financial management in banking and financial institutions. The economic role and regulation of banking and financial institutions, analysis of risks and returns on financial assets and liabilities, and the structure of assets, liabilities and capital.
Prerequisite: BUSI640.
Credit Only Granted for: BUFN722, BUFN724, or BUFN772.

BUFN723 International Corporate and Project Finance (2 Credits)
Continuation of BUFN721. Issues addressed will include captial budgeting, project financing, exhange rate exposure (operating, translation, and transaction), foreign investment strategy, and risk management.
Prerequisite: BUFN610 and BUFN721.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN723 or BUFN771.
Formerly: BUFN771.

BUFN724 Bank Management (2 Credits)
Analyze and discuss readings in bank management,with primary focus on the measurement and management of risk, including credit, market, and interest rate risk. Look at the management of liquid reserves. Examine the special nature of financial institutions, incorporating their functions, policies, services, and regulation. Study the evolving nature of the financial services inductry, by reading the financial press and by having outside practitioner speakers. Focus is on U.S. banks.
Prerequisite: BUFN610.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN724 or BUFN772.
Formerly: BUFN772.

BUFN726 Institutional Asset Management (2 Credits)
Examines how money is managed by organizations such as university endowments, pension funds, mutual funds, hedge funds, and private equity funds. Involves a mixture of finance and economics and emphasizes the incentives professional money managers face within the context of the organizational structure in which they operate. Particular attention is paid to compensation structures and monitoring mechanisms.
Prerequisite: BUFN610.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN660, BUFN726, BUFN761 or BUFN773.
Formerly: BUFN773.

BUFN730 Advanced Financial Modeling and Equity Analysis (2 Credits)
Provides in-depth analysis of public equities, with a focus on financial statement analysis, financial forecasting and ultimately valuation. Students will apply the primary valuation techniques used in industry to estimate market values for equities. Additionally, students learn how to stress test their financial models and interpret outcomes.
Prerequisite: BUFN610.
Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.
Credit Only Granted for: BUFN760 or BUFN730.
Formerly: BUFN760.

BUFN732 Fixed Income Analysis (2 Credits)
Describes important financial instruments which have market values that are sensitive to interest rate movements. Develops tools to analyze interest rate sensitivity and value fixed income securities. Defines and explains the vocabulary of the bond management business.
Prerequisite: BUFN610.
Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.
Credit Only Granted for: BUFN732 or BUFN762.
Formerly: BUFN762.

BUFN734 Portfolio Management (2 Credits)
Provides training that is important in understanding the investment process - the buy side of the financial world. Specifically, the objective is to provide graduate-level instruction in the following topics, both in theory and in using financial markets data to test the basic theory and practice of portfolio choice and equilibrium pricing models and their implications for efficient portfolios.
Prerequisite: BUFN610.
Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.
Credit Only Granted for: BUFN734 or BUFN763.
Formerly: BUFN763.

BUFN736 Quantitative Investment Strategies (2 Credits)
Provides an introduction to quantitative techniques of selecting equities, as used commonly among long-short equity hedge funds and other quantitative equity asset management companies. Statistical factor models are developed to locate stocks with higher expected returns, based on the observable characteristics of the stocks. Implementation issues, including statistical estimation, backtesting and portfolio construction, are covered, as is performance evaluation.
Prerequisite: BUFN610.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.
Credit Only Granted for: BUFN764 or BUFN736.
Formerly: BUFN764.

BUFN738 Investment Fund Management (3 Credits)
Provides second-year Master in Business Administration students with the opportunity to apply the skills learned in finance classes to actual investment decisions through management of an investment fund.
Prerequisite: BUSI640.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Repeatable to: 9 credits.

BUFN740 Capital Markets (2 Credits)
Designed to deepen the foundations necessary to finance focused students, especially those intending to specialize in the quantitative areas of finance including investments, fixed income, and financial engineering.
Prerequisite: BUSI640.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUFN740 or BUFN620.

BUFN741 Advanced Capital Markets (2 Credits)
This course covers modern theories and techniques for investments and asset pricing. The main topics covered are: portfolio theory, pricing models, market efficiency, fixed income investment, forwards and futures, and options.
Prerequisite: BUFN620; or permission of BMGT-Robert H. Smith School of Business.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN758P or BUFN741.
Formerly: BUFN758P.

BUFN742 Financial Engineering (2 Credits)
Introduces and applies various computational techniques useful in the management of equity and fixed income portfolios and the valuation of financial derivatives and fixed income securities. Techniques include Monte Carlo Simulation and binomial/lattice pricing models. Emphasis is on bridging theory with the design of algorithms and models that can be directly applied in practice.
Prerequisite: BUFN610.
Restriction: Permission of BMGT-Robert H.
Credit Only Granted for: BUFN742 or BUFN766.
Formerly: BUFN766.

BUFN744 Fixed Income Derivatives (2 Credits)
Surveys fixed income assets and related securities such as Exchange-traded bond options; bonds with embedded options; floating rate notes; caps, collars, and floors; floating rate notes with embedded options. Also surveys advanced tools for interest-rate and fixed-income portfolio management, including the use of derivative securities, and the application of binomial trees for analysis of options, and a sound understanding of stochastic yield curves.
Prerequisite: BUFN610; and BUFN732.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN765 or BUFN744.
Formerly: BUFN765.

BUFN745 Financial Programming (2 Credits)
This course introduces basic and innovative statistical modelling methods for financial markets, and equips students with analytical and programming tools for modelling and analyzing financial data. Examples of applications include portfolio management and risk management.
Prerequisite: BUFN650.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN758E or BUFN745.
Formerly: BUFN758E.

BUFN746 Enterprise and Credit Risk Management (2 Credits)
Surveys the theory and practice of credit risk identification, measurement and mitigation along with understanding the principles of enterprise risk governance and risk-adjusted returns. The course examines how to develop credit loss distributions via Monte Carlo simulation or copula methodologies for consumer assets such as mortgages, credit cards and auto loans, developing commercial loan scorecards for rating credit risk. Pricing and use of various credit structures such as credit default swaps, collateralized debt obligations and credit-linked notes is examined.
Prerequisite: BUSI640; and BUFN740.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUFN747 Asset-Liability and Nonfinancial Risk Management (2 Credits)
This course surveys risks and techniques associated with asset-liability and nonfinancial risks including market and interest rate risk, liquidity risk, operational risk and model risk, among others. Techniques such as portfolio value-at-risk (VaR) are used in realistic empirical examples to illustrate the methods. Key rate duration, principal components analysis and analytical and simulation-based VaR techniques are used to estimate interest rate risk exposure for financial firms. Hedging these risks using various financial derivative products such as options, swaps and futures contracts is explored. Operational risk is estimated leveraging Poisson loss distributions and model risk and validation techniques are reviewed.
Prerequisite: BUSI640; and BUFN740.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUFN750 Valuation in Corporate Finance (2 Credits)
An advanced topics course in Corporate Finance dealing with valuation. Main topics will be, building pro forma statements, cost of capital, using ratios and comparables to value projects and firms, dicounted cash flow valuations, WACC and APV methods of valuation and Real Option Valuations.
Prerequisite: BUSI640.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUFN630, BUFN714, BUFN750, BUFN753, or BMGT730.
Formerly: BUFN714.

BUFN751 Financial Strategy For Corporations (2 Credits)
An advanced course in corporate finance, focusing on the issues that firms face when they plan to raise external capital from financial markets. The focus is on the financing problems faced by mid-market to large firms and on capital raised from public markets. The forms of external finance vary from simple debt or equity to more complex securities that bundle with an element of risk management.
Prerequisite: BUSI640.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUFN751 or BUFN710.

BUFN752 Financial Restructuring (2 Credits)
Focuses on identifying ways to increase firm value through corporate restructuring. Specific topics include: mergers and tender offers, spin-offs, carve-outs, divestitures, takeover defense strategies, leveraged buy-outs, and international acquisitions. Additionally, the theory, practice and empirical evidence related to each of these topics will be covered. Emphasis will be placed on valuation analysis and strategic considerations.
Prerequisite: BUSI640.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUFN712 or BUFN752.
Formerly: BUFN712.

BUFN753 Corporate Governance and Performance (2 Credits)
Deals with corporate governance and its impact on shareholder value. Divergence of interests between corporate insiders and providers of funds leads to agency problems which can impair corporate performance and shareholder value. Various instruments of corporate governance - internal as well as external mechanisms - that can help align managerial incentives with those of outside investors, and hence help restore shareholder value will be studied.
Prerequisite: BUSI640.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUFN630, BUFN714, BUFN750, BUFN753, or BMGT730.

BUFN754 Corporate Risk Management (2 Credits)
Surveys the theory and practice of financial risk identification, measurement, and mitigation at financial and non-financial firms. Topics will include hedging with options and futures, interest rate risk management, Value-at-Risk (VaR), Cashflow-at-Risk (CaR), Earnings-at-Risk (EaR), credit risk, equity risk, commodities risk, exchange rate risk, and lessons from risk management disasters.
Prerequisite: BUSI640.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUFN716 or BUFN754.

BUFN755 Entrepreneurial Finance and Private Equity (2 Credits)
An advanced topics course in Corporate Finance. The major emphasis is how financiers help growing firms - and in particular young start-ups - using different types of securities at different points in the industry's and firm's life. Financing arrangements and securities studied will include private equity funds and private financings placements, Venture Capital (VC) and preferred equity, Investment Banks through Initial Public Offerings (IPOs), Private equity finds, debt and leveraged buyouts. Students will learn additional techniques that will help them understand how financiers value firms and how to understand, plan and value different financing strategies.
Prerequisite: BUSI640.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUFN755 or BUFN717.

BUFN758 Special Topics in Finance (1-4 Credits)
Selected advanced topics in the various fields of graduate study in finance.
Prerequisite: Permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 9 credits if content differs.
Formerly: BMGT798.

BUFN759 Independent Study in Finance (1-6 Credits)
Independent study for Masters students in finance.
Repeatable to: 6 credits if content differs.
Formerly: BMGT708.

BUFN760 Applied Equity Analysis (2 Credits)
Students will learn to analyze equity securities using the basic EIC (Economy/Industry/Company) framework used in the financial industry, paying special attention to financial statement analysis. Students also will learn the primary valuation techniques used to estimate market values for equity securities.
Prerequisite: BUSI640.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUFN730 or BUFN760.

BUFN761 Derivative Securities (2 Credits)
Standard types of derivatives contracts are presented, and illustrated as to how they are used in practice. The theory of pricing these contracts is then presented in detail. The use of static and dynamic replication strategies, and the concept of no-arbitrage strategies is illustrated in numerous ways. Standard valuation techniques are covered, and standard formulas are presented. The theory is then applied to develop specific pricing and hedging strategies for various types of derivatives on different underlying assets. The management of the exposure of various risks is covered in detail as well.
Prerequisite: BUFN740.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUFN660, BUFN726, BUFN761 or BUFN773.
Formerly: BUFN726.

BUFN762 Fixed Income Analysis (2 Credits)
Describes important financial instruments which have market values that are sensitive to interest rate movements. Develops tools to analyze interest rate sensitivity and value fixed income securities. Defines and explains the vocabulary of the bond management business.
Prerequisite: BUFN740.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUFN732 or BUFN762.

BUFN763 Portfolio Management (2 Credits)
Provides training that is important in understanding the investment process - the buy side of the financial world. Specifically, the objective is to provide graduate-level instruction in the following topics, both in theory and in using financial markets data to test the basic theory and practice of portfolio choice and equilibrium pricing models and their implications for efficient portfolios.
Prerequisite: BUFN740.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUFN734 or BUFN763.

BUFN764 Quantitative Investment Strategy (2 Credits)
Provides an introduction to quantitative techniques of selecting equities, as used commonly among long-short equity hedge funds and other quantitative equity asset management companies. Statistical factor models are developed to locate stocks with higher expected returns, based on the observable characteristics of the stocks. Implementation issues, including statistical estimation, backtesting and portfolio construction, are covered, as is performance evaluation.
Prerequisite: BUFN763.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN764 or BUFN736.

BUFN765 Fixed Income Derivatives (2 Credits)
Surveys fixed income assets and related securities such as Exchange-traded bond options; bonds with embedded options; floating rate notes; caps, collars, and floors; floating rate notes with embedded options. Also surveys advanced tools for interest-rate and fixed-income portfolio management, including the use of derivative securities, and the application of binomial trees for analysis of options, and a sound understanding of stochastic yield curves.
Prerequisite: BUFN762.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUFN765 or BUFN744.

BUFN766 Financial Engineering (2 Credits)
Develop Excel and Visual Basic (VBA) models to solve problems related to portfolio management, options valuation, fixed income securities, interest rate processes, and risk management. This course thus bridges theory with the design of algorithms and models that can be directly applied in practice.
Prerequisite: BUFN740.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUFN742 or BUFN766.

BUFN768 Special Topics in Finance (1-4 Credits)
Selected experiential learning opportunities in advanced topics in the various fields of graduate study in finance.
Prerequisite: Permission of BMGT-Robert H. Smith School of Business.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 9 credits if content differs.

BUFN770 International Investment (2 Credits)
Addresses international stock markets, portfolio theory, international interest rates, exchange rates and exchange rate derivatives (options, forwards, and futures), exchange rate swaps and exchange rate exposure (operating, translation, and transaction), foreign investment strategey.
Prerequisite: BUSI640.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUFN721 or BUFN770.

BUFN771 International Corporate and Project Finance (2 Credits)
Continuation of BUFN770. Issues addressed will include captial budgeting, project financing, exhange rate exposure (operating, translation, and transaction), foreign investment strategy, and risk management.
Prerequisite: BUFN770.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUFN724 or (BUFN770 and BUFN771).
Formerly: BUFN724.

BUFN772 Bank Management (2 Credits)
Analyze and discuss readings in bank management,with primary focus on the measurement and management of risk, including credit, market, and interest rate risk. Look at the management of liquid reserves. Examine the special nature of financial institutions, incorporating their functions, policies, services, and regulation. Study the evolving nature of the financial services inductry, by reading the financial press and by having outside practitioner speakers. Focus is on U.S. banks.
Prerequisite: BUSI640.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUFN722, BUFN724, or BUFN772.
Formerly: BUFN722.

BUFN773 Institutional Asset Management (2 Credits)
Examines how money is managed by organizations such as university endowments, pension funds, mutual funds, hedge funds, and private equity funds. Involves a mixture of finance and economics and emphasizes the incentives professional money managers face within the context of the organizational structure in which they operate. Particular attention is paid to compensation structures and monitoring mechanisms.
Prerequisite: BUSI640.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUFN660, BUFN726, BUFN761 or BUFN773.

BULM - Logistics, Business, and Public Policy

BULM700 Business Fundamentals for Supply Chain Managers I (2 Credits)
This course is part of a series of two courses Business Fundamentals for SCM part I and, part II. The series is intended to provide you with the knowledge and skills necessary to quantify the impact of supply chain management decisions on the bottom line. Students will gain a solid understanding of accounting, finance and the link between supply chain and overall financial performance. Students will analyze financial statements and explain the implications of supply chain management decisions on standard financial ratios and all components of the balance sheet and income statement. Through interactive supply chain finance models, students will demonstrate the sensitivity of outcome to multiple independent variables. Last but not least, students will also learn how to apply the net present value technique to evaluate the feasibility of investment projects in supply chain.
Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.
Credit Only Granted for: BULM758K or BULM700.
Formerly: BULM758K.

BULM701 Business Fundamentals for Supply Chain Managers II (2 Credits)
This is the second course of the series Business fundamentals for Supply Chain Managers. This course is intended to provide you with the knowledge and skills necessary to quantify the impact of supply chain management decisions on the bottom line. Students will gain a solid understanding of accounting, finance and the link between supply chain and overall financial performance. Students will analyze financial statements and explain the implications of supply chain management decisions on standard financial ratios and all components of the balance sheet and income statement. Through interactive supply chain finance models, students will demonstrate the sensitivity of outcome to multiple independent variables. Last but not least, students will also learn how to apply the net present value technique to evaluate the feasibility of investment projects in supply chain.
Prerequisite: BULM700; or permission of BMGT-Robert H. Smith School of Business.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BULM758Q or BULM701.
Formerly: BULM758Q.

BULM710 Data Driven Decision Making I (2 Credits)
Analytical modeling of business decisions; uncertainty, risk and expected utility; regression modeling to infer relationships among variables.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI630, BULM758X or BULM710.
Formerly: BULM758X.

BULM711 Data Driven Decision Making II (2 Credits)
Analytical modeling of business decisions; uncertainty, risk and expected utility; regression modeling to infer relationships among variables.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI630, BULM758Y or BULM711.
Formerly: BULM758Y.

BULM720 The Green Supply Chain (2 Credits)
In response to international regulation of carbon emissions and increasing corporate responsibility pressures, companies are seeking to develop greener supply chains. Companies such as WalMart have undergone a paradigm shift in how they manage their businesses to emphasize environmental stewardship and due diligence on product sustainability. Students are provided with key concepts and tools for designing and managing environmentally sustainable, low-impact supply chains.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BULM721 Global Supply Chain Management (2 Credits)
Offers a practical blueprint for understanding, building, implementing, and sustaining supply chains in today's rapidly changing global supply chain environment. It will provide the student with a survey of the fast-moving Supply Chain Management discipline and practice, including the evolution of supply chain strategies, business models and technologies; current best practices in demand and supply management; and methodologies for conducting supply chain-wide diagnostic assessments and formulating process improvement plans.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI672 or BULM721.

BULM724 Negotiations in Supply Chain Management (2 Credits)
This high experiential course will improve students' negotiation skills and capacity to acquire and effectively use power. By using a variety of assessment tools, feedback sources, skill-building exercises, and exercise debriefings, the class will increase students' negotiating self-confidence and improve their capacity to achieve win-win solutions to individual, team, and organizational problems. The course is designed to enhance students negotiating self confidence and improve students analytical skills, interpersonal skills, creativity (e.g., identifying creative solutions to conflict), and persuasive abilities.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BULM726 Purchasing Management (2 Credits)
Examines purchasing methods from both a tactical and straegic viewpoint. Special emphasis is placed on developing purchasing strategies from international suppliers and the trade-offs between outsourcing and insourcing.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BULM731 Technology Applications in Supply Chain Management (2 Credits)
In this course, we introduce the knowledge and skills necessary to quantify the impact of supply chain management decisions on the bottom line. Students will gain an understanding of accounting, finance, production cost, scheduling, and the link between supply chain and overall financial performance.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BULM732 Networks and Influence (2 Credits)
Focuses on networks, social capital, and influence as they relate to operating effectively in organizations. It draws heavily on emerging literature related to social capital and networks, but also integrates concepts from persuasion, communication, and motivation literatures to aid your efforts to build a successful track record for yourself and your organization.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMO725 or BULM732.

BULM733 Global Trade Logistics (2 Credits)
Acquaints students with managerial issues in international logistics and transportation, and provides students with an understanding of issues related to import/export management and the global marketplace.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BMGT773 or BULM733.
Formerly: BMGT773.

BULM734 Assessing and Managing Supply Chain Risks (3 Credits)
Supply chain managers are facing an increasingly volatile operating environment, with constant danger of trading community disruption from business, social and environmental risks. Students are provided with a working knowledge of both the core techniques of supply chain risk assessment and mitigation; as well as best practices in establishing formal corporate supply chain risk management programs. A semester-long X-Treme Supply Chain Simulation will enable students to gain hands-on experience in navigating a computer company through a complex and risky four quarters of global business operations.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BULM735 Project Management in Dynamic Environments (2 Credits)
Addresses project management skills that are required by successful managers in increasingly competitive and faster-moving environments. Examines fundamental concepts of successful project management, and the technical and managerial issues, methods, and techniques.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BULM736 Executives in Supply Chain Management (3 Credits)
Designed to provide students an opportunity to engage in intensive interaction with senior supply chain executives from a cross-section of industries. Executives share their insights on leading competitive supply chains in the global marketplace, while students research the competitive supply chain dynamics of each executive's industry.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BULM742 Global Supply Chain Resources Planning (2 Credits)
Provides students with an overall understanding of how firms use an advanced supply chain planning (ASCP) application as an integral part of their materials management process which includes such activities as production planning, materials requirements planning, and distribution requirements planning.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

BULM744 Global Supply Chain Risk Management (2 Credits)
Explores methods to build enterprise resillience from the perspectives of the supply chain planner and supply chain manager. Addresses concerns assessing strategic & operational risks, day to day uncertainties in demand & supply and ensuring business continuity after low probability but high impact events such as a terrorist attack or earthquake.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; and permission of BMGT-Robert H. Smith School of Business.

BULM750 Lean Sigma for Supply Chain I (2 Credits)
This course is part of a series of courses. This the second part of the Lean Six Sigma for SC Managers course series. We will be focusing on the Analyze, Improve and Control phases of the Lean Six Sigma methodology. Lean Six Sigma is a robust methodology for problem solving aiming to improve quality and reduce speed within a process. This course covers up to the Lean and Six Sigma Green Belt level body of knowledge. You will be expected to conduct a project on a case study of a business looking to improve their processes to meet customer requirements.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BULM758L or BULM750.
Formerly: BULM758L.

BULM751 Lean Sigma for the Supply Chain II (2 Credits)
This course is part of a series of courses. The first part will cover the Introduction, Define and Measure Phases of the Lean Six Sigma Methodology. Lean Six Sigma is a robust methodology for problem solving aiming to improve quality and reduce speed within a process. This course covers up to the Lean and Six Sigma Green Belt level body of knowledge. You will be expected to conduct a project on a case study of a business looking to improve their processes to meet customer requirements.
Prerequisite: BULM750.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BULM758V or BULM751.
Formerly: BULM758V.

BULM754 Global Transportation Management (2 Credits)
Introduces transportation as a field of managerial and governmental responsibility and presents the features that make the transportation arena unique and, thus,worthy of advanced study. Each of the five modes of transportation, along with other forms of carriage, will be considered. In addition, the importance of freight transportation within supply chain management will be examined. Issues related to passenger transportation will also be addressed. Throughout the course, particular attention will be paid to the significant impact that transportation has on economic development and growth.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BULM758T or BULM754.
Formerly: BULM758T.

BULM756 Supply Chain Strategy (2 Credits)
Examines supply chain management at the strategic level. Through class lectures, case discussions, and assignments, students first learn about the determinants of corporate strategy. Supply chain strategies are then discussed, along with the need to properly align supply chain strategy with corporate strategy. Finally, there is a discussion of how to implement supply chain strategy, given various environmental and market considerations.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BULM758B or BULM756.
Formerly: BULM758B.

BULM758 Special Topics in Logistics, Business and Public Policy (1-4 Credits)
Selected advanced topics in the various fields of graduate study in logistics, business and public policy.
Prerequisite: Permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 9 credits if content differs.
Formerly: BMGT798.

BULM759 Independent Study in Logistics Management (1-6 Credits)
Independent study for Masters students in Logistics Management.
Repeatable to: 6 credits if content differs.
Formerly: BMGT708.

BUMK - Marketing

BUMK701 Marketing Research Methods (2 Credits)
The process of acquiring, classifying and interpreting primary and secondary marketing data needed for intelligent, profitable marketing decisions. Evaluation of the appropriateness of alternative methodologies, such as the inductive, deductive, survey, observational, and experimental. Recent developments in the systematic recording and use of internal and external data needed for marketing decisions.
Prerequisite: BUSI650 and BUSI630.
Credit Only Granted for: BMGT752 or BUMK701.
Formerly: BMGT752.

BUMK706 Marketing Analysis (2 Credits)
Introduction to modeling tools used to support marketing analysis and decision making. Applications in strategic marketing, marketing segmentation, new product development, sales promotion analysis, pricing, design of marketing mix, sales force allocation, and direct marketing. Spreadsheet driven cases and illustrative readings.
Prerequisite: BUSI650.

BUMK715 Consumer Behavior (2 Credits)
Analysis of customer decision-making and how marketing strategy can be used to influence those decisions. The framework is a buyer behavior model, in which concepts from psychology, sociology, and economics are applied to individual and organizational purchase decisions. Marketing strategies of leading firms in consumer products, technology, and services (including internet services) are analyzed using a variety of case study formats. Focus is consumer behavior; however, principles can also be applied to the decision-making of business.
Prerequisite: BUSI650.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BMGT754 or BUMK715.
Formerly: BMGT754.

BUMK716 Brand Management (2 Credits)
Brand names are valuable assets for firms. Effective brand management is critical to maintaining the long-term profitability of products and services. Topics include understanding brands from the customer's perspective, building brand equity, measuring brand equity, leveraging brand equity, managing brand portfolios and managing brands over time.
Prerequisite: BUSI650.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

BUMK717 Integrated Marketing Communications (2 Credits)
Marketing communications are a complex but critical component of marketing strategy. Topics include communication tools: advertising, sales promotions, corporation communications, one-on-one or direct marketing, public relations, internet communications, sponsorship/events marketing, and marketing communcation plans: defining objectives, implementing the plan, and measuring communications effectiveness. Achieving integration in the content, look, and feel of all marketing communications is stressed.
Prerequisite: BUSI650.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

BUMK720 Marketing Strategy (3 Credits)
Introduces students to the fundamentals of marketing. This course combines lectures, readings, case analyses and a competitive simulation. A significant part of the course involves a competitive computer-based simulation in which student teams leverage marketing data and metrics to make marketing decisions for an organization that is competing in a market against other student teams in the class.
Restriction: Permission of BMGT-Robert H. Smith School of Business; or must be in Business and Management (Master's) program.
Credit Only Granted for: BUMK758B or BUMK720.
Formerly: BUMK758B.

BUMK722 Customer Equity Management (2 Credits)
Focuses on managing customers of a business, whether in B2B or B2C space, as a portfolio of equity; understanding the current and future value of customers to the business; selective acquisition, development, and retention of customers using latest developments in information technology.
Prerequisite: BUSI650.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUMK722 or BUMK750.

BUMK724 Customer Analysis (3 Credits)
Focuses on the analysis of customer decision-making and how marketing strategy can be used to influence those decisions. The framework used is the buyer behavior model, in which concepts from psychology, sociology, and economics are applied to individual and organizational purchase decisions. Marketing strategies of leading firms in consumer products, technology, and services (including internet services) are analyzed using a variety of case study formats.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK758D or BUMK724.
Formerly: BUMK758D.

BUMK726 Statistical Programming for Customer Analytics (3 Credits)
Provides students with a foundation in probability and statistics with a focus on business applications. It also gives students a foundation for thinking in both likelihood and Bayesian frameworks. The course teaches students the basics of SAS, as well as its use in statistical analysis and statistical programming. Also addressed are basic SAS language structure, data management, OLAP, enterprise miner, statistical analysis, writing procedures.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK758E or BUMK726.
Formerly: BUMK758E.

BUMK731 Business-to-Business Marketing (2 Credits)
Focus is large fraction of marketing activity directed at organizational customers (businesses, non-profits and government). Marketing strategies, tactics and analytical tools most relevant when marketing to organizational customers are covered. Readings, cases and term paper contribute to understanding how to build long term buyer/seller relationships. Course is appropriate for anyone interested in understanding relationships between organizations, including vertical strategic alliances.
Prerequisite: BUSI650.

BUMK736 Service Marketing and Management (2 Credits)
Examines special challenges service marketing poses for managers because of the intangible, heterogeneous nature of the product, and the critical role of customer contact employees in service delivery. Strategies for meeting these challanges are addressed. Topics include 1) customer relationship management, 2) the design and execution of the service delivery process, 3) the development and implementation of employee customer service skills, 4) the measurement and management of critical outcome variables, such as customer satisfaction, customer equity, and customer lifetime value, and 5) the role of emerging technology in customer service.

BUMK742 Marketing Analytics for Consulting (3 Credits)
The analysis of marketing data needed for profitable marketing decisions. Advanced methods of marketing analysis for marketing decisions, including choice and count data models, joint analysis of consumers choice, quantity and timing decisions, mixture and mixture regression models, and conjoint analysis, all using data-based cases and SAS software. Applications are in the areas of strategic marketing, marketing segmentation, eye tracking for advertising effectiveness, new product development, sales promotion analysis, pricing, design of marketing mix, and direct marketing.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK758K or BUMK742.
Formerly: BUMK758K.

BUMK744 Marketing Research and Analytics (3 Credits)
Provides a review of primary data collection methods for marketing data. Students will learn how to design and implement effective confirmatory research. Both direct methods such as surveys and indirect methods such as experiments will be covered. In this hands-on course, students will design and conduct research with target customers, analyze the data, and then present their results to decision makers.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK758L or BUMK744.
Formerly: BUMK758L.

BUMK746 Data Science for Customer Analytics (3 Credits)
An introduction to data science and thebasic concepts of database management. The course also provides an overview of the various sources of in house data that are available to many organizations. Students will learn how to work with click stream, scanner panel and social media data. Geo-demographic datasets will be discussed and explored, and techniques for data-fusion will receive ample attention.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK758W or BUMK746.
Formerly: BUMK758W.

BUMK747 CRM Analytics (2 Credits)
Customer Equity Management and Customer Relationship Marketing focuses on selective acquisition, development and retention of customers aided by developments in information technology and analytics - databases, online channels, social media, mobile technologies, and marketing analytics - with the objective of increasing a firm's customer equity (firm's value). This course will focus on the conceptual foundations of customer equity and relationship management, their strategic implications, and implementations in both B-2-B and B-2-C contexts, especially in the emerging era of big data. The course will provide insights into the role of measuring and managing customer equity and customer loyalty using online and offline media and channels. The objective of the course is to examine the strategic and analytical aspects in equal measure so that participants will have a deeper understanding of the power of customer equity and customer analytics, and how to put it to work effectively using data, big or small.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.
Credit Only Granted for: BUMK758R or BUMK747.
Formerly: BUMK758R.

BUMK750 Customer Equity Management (2 Credits)
Managing customers of a business, whether in B2B or B2C space, as a portfolio of equity. Understanding the current and future value of customers to the business. Topics include selective acquisition, development, and retention of customers using latest developments in information technology.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK722 or BUMK750.

BUMK757 Marketing Strategy (2 Credits)
A capstone marketing course. Marketing strategies designed to manage products in selected market segments. Topics covered include competitor analysis, buyer analysis, market segments, and product strengths and weaknesses; product related issues are identified and marketing strategies developed, assessed and implemented.
Prerequisite: BUSI650.
Credit Only Granted for: BMGT757 or BUMK757.
Formerly: BMGT757.

BUMK758 Special Topics in Marketing (1-4 Credits)
Selected advanced topics in the various fields of graduate study in marketing.
Restriction: Permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 9 credits.
Formerly: BMGT798.

BUMK759 Independent Study in Marketing (1-6 Credits)
Independent study for Masters students in Marketing.
Repeatable to: 6 credits if content differs.
Formerly: BMGT708.

BUMK760 Business Policies and Ethics (2 Credits)
The standards of business conduct, morals and values as well as the role of business in society. Students will consider the sometimes conflicting interests of and claims on the firm and its objectives.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK758F or BUMK760.
Formerly: BUMK758F.

BUMK762 Business Communication I (1 Credit)
A study of the standards of business conduct, morals and values as well as the role of business in society. Students will consider the sometimes conflicting interests of and claims on the firm and its objectives.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK758H or BUMK762.
Formerly: BUMK758H.

BUMK764 Business Communications II (1 Credit)
Teaches students how to communicate quantitative information effectively. Focuses on developing written, spoken and presentation skills.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK758G or BUMK764.
Formerly: BUMK758G.

BUMK766 Digital Analytics (2 Credits)
Examines the process of developing, implementing and analyzing strategies for successfully marketing a variety of existing and potential products and services on the Internet. Special attention is devoted to the tools and techniques unique to the electronic media.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK758N or BUMK766.
Formerly: BUMK758N.

BUMK770 Retail Analytics (2 Credits)
Planning and implementing retail marketing strategies often involve sophisticated analytics. This course will teach the analytical tools needed to develop retail strategies. Both store and non-store (catalog, Internet) retailing are discussed. Also, students will learn how to evaluate the impact of environmental trends in the consumer market, competition, the economy and technology on retail strategy in the U.S. and global market.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK758M or BUMK770.
Formerly: BUMK758M.

BUMK772 Innovation Analytics (2 Credits)
The economic success of many firms depends on their ability to accurately identify needs of their customers andefficiently innovate -- i.e., develop new products, new services, or new processes -- in order to meet those needs.Achieving this goal is a multi-disciplinary initiative. In this course, we focus on key analytics driven decisions faced bymanagers when approaching this important task of innovation from the customer centric perspective of a marketer.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK758Y or BUMK772.
Formerly: BUMK758Y.

BUMK773 Pricing Analytics and Strategies (2 Credits)
The economic and behavioral aspects of pricing and the evaluation of innovative pricing practices such as price matching, customized pricing, bundle pricing and product line pricing. The course will cover both B2B, B2C, online and offline markets. Instruction will be through a mix of case studies, pricing simulation games, hands-on exercises, practitioner guest lectures and discussions.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK758J or BUMK773.
Formerly: BUMK758J.

BUMK774 Market Forecasting (2 Credits)
Market forecasting methods for different contexts. Focus on quantitative modeling techniques based on established statistical methods. Non-statistical methods used when empirical data is scarce. This is a very hands-on class where students will apply the forecasting methods learned to real data.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK758A or BUMK774.
Formerly: BUMK758A.

BUMK776 Action Learning Project (2 Credits)
Students analyze marketing data, report their findings and provide appropriate recommendations.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK758Q or BUMK776.
Formerly: BUMK758Q.

BUMO - Management and Organization

BUMO702 Managerial Staffing (3 Credits)
Aimed at increasing an understanding of the legal, technical, and practical issues involved in organizational staff forecasting, and hiring and termination procedures.
Credit Only Granted for: BMGT783 or BUMO702.
Formerly: BMGT783.

BUMO704 Problems and Applications in Human Resource Management (3 Credits)
Applications in the design, implementation, and evaluation of human resource management programs. Experiential learning activities and simulations.
Prerequisite: BUSI663.
Credit Only Granted for: BMGT761 or BUMO704.
Formerly: BMGT761.

BUMO714 Competitive and Collaborative Negotiation (2 Credits)
Increase negotiating self-confidence and improve capacity to achieve win-win solutions to organizational problems. Improve effectiveness at finding creative solutions to conflict.
Corequisite: BUMO715.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUMO714 or BMGT700.

BUMO715 Advanced Negotiation Challenges (2 Credits)
Practice negotiations using multiple media (email, phone). Multiple party negotiations. Cross-cultural negotiations.
Corequisite: BUMO714.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BUMO720 Understanding Organizational Change (2 Credits)
Develops the fundamental change knowledge and skills of MBA students who plan to work with organizations as change agents, whether internally as managerial employees or externally as outside consultants. Draws on literatures from organizational behavior, human resource management and strategic management to identify models as prescriptions of change.
Prerequisite: BUSI664 or BUSI662.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BUMO722 Organizational Behavior: A Multicultural Perspective (3 Credits)
Study of organizational behavior from a multicultural perspective.
Credit Only Granted for: BMGT765 or BUMO722.
Formerly: BMGT765.

BUMO725 Networks and Influence (2 Credits)
Focuses on networks, social capital, and influence as they relate to operating effectively in organizations. It draws heavily on emerging literature related to social capital and networks, but also integrates concepts from persuasion, communication, and motivation literatures to aid your efforts to build a successful track record for yourself and your organization.
Restriction: Must be in Business and Management (Master's) program.
Credit Only Granted for: BUMO725 or BULM732.

BUMO727 The Entrepreneur and the Entrepreneurial Team (3 Credits)
The entrepreneur and the entrepreneurial team: the entrepreneur and the team as it relates to innovation, change, power, and risk-taking. Entrepreneurs and their teams from a variety of different firms present and discuss their views on leadership.
Prerequisite: Completion of MBA core requirements; and permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BMGT781 or BUMO727.
Formerly: BMGT781.

BUMO732 Entrepreneurship and New Ventures (2 Credits)
Provides an introduction to important tools and skills necessary to create and grow a successful new venture. Integrates research findings from a range of different practical and intellectual perspectives, including psychology, sociology, economics, strategic management, and history into practical, hands on lessons for an entrepreneur. Class projects provide the foundations for new, real businesses.
Credit Only Granted for: BUMO732 or BUSI660.
Formerly: BMGT780.

BUMO743 Technology Transfer Commercialization Strategies (3 Credits)
Viewing technology as a strategic resource of the firm, students develop an understanding of the processes, risks, and rewards of technology commercialization. Student teams are organized to review and select a technological innovation and then determine its commercial viability in the market place.
Restriction: Must be in Business and Management (Master's) program.
Credit Only Granted for: BMGT785 or BUMO743.
Formerly: BMGT785.

BUMO744 Creation of High Potential Ventures (3 Credits)
This course focuses on the real life experiences of high profile technology entrepreneurs. Guest entrepreneurs and book review reveal patterns of personal preparation, strategic decision-making, and action that have produced ventures with high value-added and significant regional and national impact.
Restriction: Must be in Business and Management (Master's) program.
Credit Only Granted for: BMGT787 or BUMO744.
Formerly: BMGT787.

BUMO748 Business Plan Review (3 Credits)
Evaluation of real business plans submitted to the Dingman Center for Entrepreneurship. Practicing venture capitalist and professors focus on business plan critique and writing skills, venture capitalist screening practices, and the structure of electronic commerce. Past business plan reviews are analyzed according to the business model, target market, competitive advantages/threats, stage of development, management team and financial status. Real investment decisions are made on the basis of student recommendations. Subject companies are contacted and evaluated.
Repeatable to: 6 credits.
Formerly: BMGT796.

BUMO751 Implementing Strategy: Organizing to Compete (2 Credits)
Organizational dynamics of competitive advantage. Impact of alternative organizational structures, planning and control systems, human resource management practices, and executive leadership styles on the implementation of archetypically different strategies.
Prerequisite: Must have completed or be concurrently enrolled in BUSI690. And must have completed MBA core requirements; or permission of BMGT-Robert H. Smith School of Business.

BUMO752 Strategic Growth for Emerging Companies (2 Credits)
Explores the key elements of mastering the move from being a successful small company to achieving industry significance. Supplemented by readings, video and guest speakers, the course highlights the application of practical lessons leading to strategic growth and subsequent emergence as a player.
Restriction: Must be in Business and Management (Master's) program.

BUMO753 Emerging Business Formation (2 Credits)
Business formation issues, legal obligations that affect entrepreneurial activities, the spectrum of financing methods available to emerging businesses, creating management and organization and a practical application of the tools through practical projects.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BUMO754 Global Strategy (2 Credits)
Focuses on the "strategic" and "organizational" questions that a company must address as it globalizes its footprint. Among the questions that will be addressed are: What are the potential benefits, costs, and risks associated with going abroad? What differentiates a "global" from a "multidomestic" industry? What are the sources of competitive advantage in a global context?
Credit Only Granted for: BUSI674, BUMO754, or BMGT710.

BUMO756 Industry Analysis (2 Credits)
Conceptual framework and analytical tools for understanding the dynamics of industry structure. Impacts of past and future attractiveness of the industry on profitability. Developing and applying frameworks to devise competitive strategies in uncertain industries.
Recommended: BUSI690.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BMGT792 or BUMO756.
Formerly: BMGT792.

BUMO757 Competitor Analysis (2 Credits)
Understanding of the dynamics of how competitors interact in the marketplace. Understanding economic and behavioral motivations of industry players to design more effective strategies.
Recommended: BUSI690.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BUMO758 Special Topics in Management and Organization (1-4 Credits)
Selected advanced topics in the various fields of graduate study in management and organization.
Restriction: Permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 9 credits if content differs.
Formerly: BMGT798.

BUMO759 Independent Study in Management and Organization (1-6 Credits)
Independent study for Masters students in management and organization.
Repeatable to: 6 credits if content differs.
Formerly: BMGT708.

BUMO761 Creativity for Business Leaders and Entrepreneurs (2 Credits)
Examines the concept of creativity as it applies in today's and tomorrow's complex business environment. An overview of the cognitive foundations of creativity, examines many of the preconceived notions about creativity in business and discusses multiple ways in which creativity can help business leaders and entrepreneurs to succeed. Topics include creativity techniques for groups and individuals, creativity as a foundation to recognize business opportunities and develop innovative products and services, selecting ideas and making them stick, mental and organizational obstacles to creativity as well as an overview of electronic tools to increase creative capability.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUSI661 or BUMO761.
Formerly: BUSI661.

BUMO767 Cross-Cultural Communication and Teamwork (2 Credits)
Provide managers a sound basis for developing such competencies. Specifically, we will develop an understanding of key cultural differences, and how these differences influence the management of individuals, groups, and organizations.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI667 or BUMO767.
Formerly: BUSI667.

BUMO794 Essentials of Negotiation (2 Credits)
This highly experiential course will improve students' negotiation skills and capacity to acquire and effectively use bargaining power. By using a variety of assessment tools, feedback sources, skill-building exercises, and exercise debriefings, the class will increase students' negotiating self-confidence and improve their capacity to claim value and achieve win-win solutions to individual, team, and organizational problems. The course is designed to enhance students' negotiating self-confidence and improve students' analytical and decision-making skills (e.g., understanding bargaining zones, knowing when an agreement can be made and when to walk away; learning how to prepare for negotiations), interpersonal skills, creativity (e.g., identifying creative solutions to conflict), and persuasive abilities.
Restriction: Must be in Business and Management (Master's) program.
Credit Only Granted for: BUMO794 or BUAC723.

BUMO796 Leadership and Human Resource Management for Accountants and Auditors (3 Credits)
Develops the concepts, frameworks, and skills that are important to be effective leaders and to successfully manage human resources. Topics for discussion include: Creating a motivating and empowering environment; leadership attributes, power and effective influence; building effective decision-making; strategic management of human resources; specification of the skills and competencies requisite for job success; recruiting and selecting employees to fit the job and the organization; measuring, appraising and improving performance. All of the topics selected for discussion are critical ones that every professional needs to know, regardless of functional area (not just HR professionals), and will help students become more effective consultants, managers and leaders.
Restriction: Must be in Business and Management (Master's) program.
Credit Only Granted for: BUMO796 or BUAC725.

BUSI - Part-Time MBA Program

BUSI600 Fundamentals of Business Decision Making (2 Credits)
Introduces students to the language of business. Topics covered include financial accounting, financial management, data models, strategy, leadership and teamwork, and a brief action learning project on innovation.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.
Additional Information: Pre-work includes the DISC assessment, and a requires a passing grade on a spreadsheet pre-work course.

BUSI604 Business Communication (2 Credits)
Develop the ability to communicate with and about data.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI608 ELM: Special Topics (0 Credits)
Selected advanced topics in the various fields of graduate study in business and management.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Formerly: BMGT608.

BUSI610 Introduction to Financial Accounting (2 Credits)
Overview of financial accounting, periodic financial statements and the financial reporting process. Importance of financial statements as information source for creditors and investors and as a means by which managers can communicate information about their firms.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUSI610, BUAC602, BUFN602, or BMGT602.

BUSI611 Managerial Accounting (2 Credits)
Use of accounting data in corporate planning and control. Cost-volume-profit analysis, budgeting, pricing decisions and cost data, transfer pricing, activity-based management, performance measures, and standard costing.
Prerequisite: BUSI610.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUSI611, BUAC616, or BMGT616.

BUSI621 Digital Transformation in Business (2 Credits)
Introduces students to the strategic role of digital transformation within businesses, and provides an overview for how major information technologies may be used to inform and transform the firm's strategic, operational, and tactical decisions. Topics discussed in the course include the strategic use of digital technologies to generate sustainable competitive value; the contributions of new forms of technology infrastructure; the evaluation of new technology investments and the resulting ROI; acquiring, managing and governing technological capabilities within the firm; understanding the role of enterprise systems and social technologies within the firm; and the management of disruptive technologies within and outside the firm.
Restriction: Must be in Business and Management (Master's); or permission of BMGT-Robert H Smith.
Credit Only Granted for: BUSI621 or BUSO620.

BUSI622 Managing Digital Business Markets (2 Credits)
The objective is to understand the strategic and tactical issues involved in managing digital businesses and markets. Also, some of the characteristics of digital businesses and markets that make them unique and understand how companies can best manage them will be examined.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

BUSI630 Data Driven Decision Making (2 Credits)
Analytical modeling of business decisions; uncertainty, risk and expected utility; regression modeling to infer relationships among variables.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BUSI631 Data Driven Decision Making II (2 Credits)
Analytical modeling of business decisions; uncertainty, risk and expected utility; regression modeling to infer relationships among variables.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI634 Operations Management (2 Credits)
Operations management is concerned with efficient and effective design and operation of business processes for delivering products and/or services. Emphasis is given to process analysis and design, capacity management and bottlenecks, waiting lines and the impact of uncertainty in process performance, quality management, lean, six-sigma, and revenue management.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI634 or BMGT624.

BUSI640 Corporate Finance (2 Credits)
Focuses on the valuation of the real assets of firms as well as the valuation of stocks and bonds, the primary financial assets in an economy. While details vary, the conceptual foundations of valuation boil down to three themes: time value of money, no-arbitrage, and systematic risk.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BUSI641 Corporate Finance II (2 Credits)
Builds on the concepts and analytic methods covered in Corporate Finance I. Students will learn about the structure of financial markets, the financing and payout choices of large and small corporations, and the role of risk management in the corporation. In particular, the following issues will be addressed: The drivers of shareholder value; Corporate financing alternatives and the design of a company's capital structure; Coordinating investment, financing and payout policies; Corporate Finance Issues for Start-up firms; Key issues in international corporate finance.
Prerequisite: BUSI640.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI650 Marketing Management (2 Credits)
Analysis of marketing problems and evaluation of specific marketing efforts regarding the organization's products and services, pricing activities, channel selection, and promotion strategies in both domestic and international markets.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUSI650 or BMGT612.

BUSI662 Leadership and Teamwork (2 Credits)
Course examines concepts of team-building and leadership which are critical to managerial success. Topics include leadership, decision making, communication and conflict, work motivation, building effective teams, and organizational change and culture.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BMGT600, BUSI662, or BUSM600.

BUSI672 Global Supply Chain Management (2 Credits)
Offers a practical blueprint for understanding, building, implementing, and sustaining supply chains in today's rapidly changing global supply chain environment. It will provide the student with a survey of the fast-moving Supply Chain Management discipline and practice, including the evolution of supply chain strategies, business models and technologies; current best practices in demand and supply management; and methodologies for conducting supply chain-wide diagnostic assessments and formulating process improvement plans.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUSI672 or BMGT740.

BUSI673 International Economics for Managers (2 Credits)
Focuses on understanding critical aspects of the global business environment that influence firm decisions and behavior. Globalization is present in market competition, capital markets, and managerial talent as evidenced by free trade areas and economic unions forming, the volatility in global financial markets, and the continued rise of transnational firms. With globalization, the challenge for firms is to acknowledge, understand and act when appropriate - to act by sourcing, lobbying, and relocating value chain activities internationally.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BUSI681 Managerial Economics and Public Policy (2 Credits)
Basic microeconomic principles used by firms, including supply and demand, elasticities, costs, productivity, pricing, market structure and competitive implications of alternative market structures. Market failures and government intervention. Public policy processes affecting business operations.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUSI681 or BMGT604.

BUSI683 The Global Economic Environment (2 Credits)
Relationship between national and international economic environments. Determinants of output, interest rates, prices and exchange rates. Analysis of effect of economic policies (fiscal, monetary, trade, tax) on the firm and the economy.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).

BUSI690 Strategic Management (2 Credits)
Analyze and identify profit opportunities and threats in different industry and competitive environments; Analyze and identify a firm's valuable assets, resources and capabilities and how they might be protected, leveraged, and extended in the market; Learn how to organize your company to be the best prepared to adapt its strategy over time as the market environment changes; and how to use organic growth as well as mergers, acquisitions, joint ventures, alliances, and divestitures to ensure that the firm maintians the proper scale and scope to compete effectively over time.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Credit Only Granted for: BUSI690 or BMGT614.

BUSI698 MBA Consulting Project (3-6 Credits)
Experiental research project in the identification of management problems, the evaluation of alternative solutions, and the recommendation for management.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)).
Repeatable to: 9 credits if content differs.
Formerly: BMGT698.

BUSI700 Financial Statement Analysis (2 Credits)
Provides students with the tools to conduct a financial statement analysis, which is part of an overall business analysis. This involves understanding and using the information that financial statements are communicating to users.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI702 Strategic Growth for Emerging Companies (2 Credits)
Explores the key elements of mastering the move from being a successful small company to achieving industry significance. Supplemented by readings, video and guest speakers, the course highlights the application of practical lessons leading to strategic growth and subsequent emergence as a player.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI710 Competitive and Collaborative Negotiation (2 Credits)
Increase negotiating self-confidence and improve capacity to achieve win-win solutions to organizational problems. Improve effectiveness at finding creative solutions to conflict.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI711 Industry Analysis (2 Credits)
Conceptual framework and analytical tools for understanding the dynamic of industry structure. Impacts of past and future attractiveness of the industry on profitability. Developing and applying frameworks to devise competitive strategies in uncertain industries.
Recommended: BUSI690.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI712 Entrepreneurship and New Ventures (2 Credits)
Provides an introduction to important tools and skills necessary to create and grow a successful new venture. Integrates research findings from a range of different practical and intellectual perspectives, including psychology, sociology, economics, strategic management, and history into practical, hands on lessons for an entrepreneur. Class projects provide the foundations for new, real businesses.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI713 Global Strategy (2 Credits)
Focuses on the "strategic" and "organizational" questions that a company must address as it globalizes its footprint. Among the questions that will be addressed are: What are the potential benefits, costs, and risks associated with going abroad? What differentiates a "global" from a "multidomestic" industry? What are the sources of competitive advantage in a global context?
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert , H. Smith School of Business.

BUSI714 Innovation Management (2 Credits)
Designed to give students a broad view on issues related to the management of innovations. Covers both external dynamics of innovations and internal management activities, with special emphasis on knowledge development and learning processes within organizations.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI718 Special Topics in Business (1-4 Credits)
Selected advanced topics in the various fields of graduate study in business.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 15 credits if content differs.

BUSI721 Creativity for Business Leaders and Entrepreneurs (2 Credits)
Examines the concept of creativity as it applies in today's and tomorrow's complex business environment. An overview of the cognitive foundations of creativity, examines many of the preconceived notions about creativity in business and discusses multiple ways in which creativity can help business leaders and entrepreneurs to succeed. Topics include creativity techniques for groups and individuals, creativity as a foundation to recognize business opportunities and develop innovative products and services, selecting ideas and making them stick, mental and organizational obstacles to creativity as well as an overview of electronic tools to increase creative capability.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI730 Marketing Research Methods (2 Credits)
The process of acquiring, classifying and interpreting primary and secondary marketing data needed for intelligent, profitable marketing decisions. Evaluation of the appropriateness of alternative methodologies, such as the inductive, deductive, survey, observational, and experimental. Recent developments in the systematic recording and use of internal and external data needed for marketing decisions.
Prerequisite: BUSI650 and BUSI630.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI731 Managing Brands and Products (2 Credits)
Brand names are valuable assets for firms. Effective brand management is critical to maintaining the long-term profitability of products and services. Topics include understanding brands from the customer's perspective, building brand equity, measuring brand equity, leveraging brand equity, managing brand portfolios and managing brands over time.
Prerequisite: BUSM612.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI732 Consumer Behavior (2 Credits)
Analysis of customer decision-making and how marketing strategy can be used to influence those decisions. The framework is a buyer behavior model, in which concepts from psychology, sociology, and economics are applied to individual and organizational purchase decisions. Marketing strategies of leading firms in consumer products, technology, and services (including internet services) are analyzed using a variety of case study formats. Focus is consumer behavior; however, principles can also be applied to the decision-making of business.
Prerequisite: BUSI650.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI734 Digital Marketing (2 Credits)
It has been a quarter century since the commercial use of the Internet and the World Wide Web began and during that time the business landscape has changed at a frenetic pace. Large multinational corporations such as Alphabet/Google, Facebook, Amazon, Alibaba and eBay, unheard of twenty years ago, have emerged as key players in our modern economy. In 2017 holiday season, online sales increased over 16 percent of overall spending online in 2016 with online retail spending in the U.S., the highest percentage since tracking began in 1999. Sales made through mobile devices have increased at a rapid rate to around 22 to 40 percent of all online sales. Corporations now highlight the importance of creating a digital relationship with customers. Moreover, digital technologies and devices such as smartphones, smart products, the Internet of Things, Artificial Intelligence, and deep learning all promise significant transformations of consumers lives in the near future. It is against this backdrop this course seeks to understand how the developments in digital technology are re-shaping the process and the strategy of marketing in the broad space we call digital marketing.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI735 Advanced Marketing Analytics (2 Credits)
Introduction to modeling tools used to support marketing analysis and decision making. Applications in strategic marketing, marketing segmentation, new product development, sales promotion analysis, pricing, design of marketing mix, sales force allocation, and direct marketing. Spreadsheet driven cases and illustrative readings.
Prerequisite: BUSI650.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI736 Pricing Strategies for Sustainable Competitive Advantage (2 Credits)
Pricing is one of the most important marketing decisions a firm faces. This course will help participants to develop pricing strategies using actual proven concepts, processes and techniques, to align pricing strategies with corporate goals and objectives, to determine the value customers assign to products and services using competitive pricing analysis, and to optimize pricing using customer segmenting strategies. The course will focus on both economic and behavioral aspects of pricing, and evaluation of innovative pricing practices such as price matching, customized pricing, bundle pricing and product line pricing, covering both B2B and B2C markets. Instruction will be through a mix of case studies, pricing simulation games, hands-on exercises and discussions. The course will provide participants with an in-depth understanding of state-of-the-art pricing strategies, practices and techniques for making profitable and sustainable pricing decisions.
Prerequisite: BUSI650.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI737 Innovation & Product Development (2 Credits)
Focuses on the development of innovations, new products or new services from the perspective of a marketer. For an innovation to be successful in the market, it has to be customer centric: hence, in this course, we study how to develop and bring to market elegant and efficient solutions to strong customer needs. This is a fundamental business challenge, faced while working in a startup or in an established company; when developing a new product or a new service; and when serving customers who are individuals or large corporations.
Prerequisite: BUSI650.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI740 Valuation in Corporate Finance (2 Credits)
An advanced topics course in Corporate Finance dealing with valuation. Main topics will be, building pro forma statements, cost of capital, using ratios and comparables to value projects and firms, discounted cash flow valuations, WACC and APV methods of valuation and Real Option Valuations.
Prerequisite: BUSI640.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI741 Financial Strategy for Corporations (2 Credits)
Advanced course in corporate finance, focusing on the issues that firms face when they plan to raise external capital from financial markets. The focus is on the financing problems faced by mid-market to large firms and on capital raised from public markets. The forms of external finance vary from simple debt or equity to more complex securities that bundle with an element of risk management.
Prerequisite: BUSI640.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI742 Entrepreneurial Finance and Private Equity (2 Credits)
Advanced course in Corporate Finance. The major emphasis is how financiers help growing firms - and in particular young start-ups - using different types of securities at different points in the industry's and firm's life. Financing arrangements and securities studied will include private equity funds and private financings placements, Venture Capital (VC) and preferred equity, Investment Banks through Initial Public Offerings (IPOs), Private equity finds, debt and leveraged buyouts. Students will learn additional techniques that will help them understand how financiers value firms and how to understand, plan and value different financing strategies.
Prerequisite: BUSI640.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI743 Applied Equity Analysis (2 Credits)
Students will learn to analyze equity securities using the basic EIC (Economy/Industry/Company) framework used in the financial industry, paying special attention to financial statement analysis. Students also will learn the primary valuation techniques used to estimate market values for equity securities.
Prerequisite: BUSI640.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI744 Derivative Securities (2 Credits)
Standard types of derivatives contracts are presented, and illustrated as to how they are used in practice. The theory of pricing these contracts is then presented in detail. The use of static and dynamic replication strategies, and the concept of no-arbitrage strategies is illustrated in numerous ways. Standard valuation techniques are covered, and standard formulas are presented. The theory is then applied to develop specific pricing and hedging strategies for various types of derivatives on different underlying assets. The management of the exposure of various risks is covered in detail as well.
Prerequisite: BUSI640.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI745 Fixed Income Analysis (2 Credits)
Describes important financial instruments which have market values that are sensitive to interest rate movements. Develops tools to analyze interest rate sensitivity and value fixed income securities. Defines and explains the vocabulary of the bond management business.
Prerequisite: BUSI640.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI746 International Investment (2 Credits)
Addresses international stock markets, portfolio theory, international interest rates, exchange rates and exchange rate derivatives (options, forwards, and futures), exchange rate swaps and exchange rate exposure (operating, translation, and transaction), foreign investment strategy.
Prerequisite: BUSI640.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI751 Decision Analytics (2 Credits)
Analytical modeling for managerial decisions using a spreadsheet environment. Includes linear and nonlinear optimization models, decision making under uncertainty and simulation models.
Prerequisite: BUSI630.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI752 Data Mining and Predictive Analytics (2 Credits)
Data mining techniques and their use in business decision making. A hands-on course that provides an understanding of the key methods of data visualization, exploration, classification, prediction, time series forecasting, and clustering.
Prerequisite: BUSI630.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI754 Social Media and Web Analytics (2 Credits)
Examines the process of developing, implementing, and analyzing strategies for successfully marketing a variety of existing and potential products and services using electronic media. Besides well-established Internet marketing tools such as e-mail, search engines and display advertising, a substantial part of the course is dedicated to understanding social media, analyzing successful social media strategies, and tracking their effectiveness. The course offers hands-on experience with many popular as well as emerging techniques unique to electronic media. Special attention is given to metrics appropriate for the new media.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI756 Managing Supply Chains: Models & Analysis (2 Credits)
Focuses on the strategic aspects of operations and supply chain management. Uses a framework for developing an operations strategy, and identify and analyze the key operations decisions which can have a major impact on a company's competitive position.
Prerequisite: BUSI630 and BUSI634.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI757 Pricing and Revenue Management (2 Credits)
Pricing is one of the most important and challenging business decisions with short-run and longrun implications. A specialized course on pricing and revenue management (PRM) is meant to provide you with the right bundle of tools and principles, drawn from several disciplines (Operations, Microeconomics, Decision Modeling, Statistics, Marketing, IS) to make effective pricing decisions. The topics covered in this course include economics of pricing, strategy and tactics of PRM, pricing optimization, differentiated pricing, dynamic pricing, using capacity controls in pricing, mark-down pricing, legal and ethical issues in pricing, B2B pricing, analysis of pricing processes, and applications of PRM in various industries. Emphasis is on both analytical models/methods used in making effective PRM decisions and managerial or organizational factors that hold the key to success in PRM.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI758 Special Topics in Business (1-4 Credits)
Selected advanced topics in the various fields of graduate study in business.
Prerequisite: Permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 9 credits if content differs.
Formerly: BMGT798.

BUSI759 Independent Study in Business (1-6 Credits)
Independent study for Masters students in Business.
Repeatable to: 6 credits if content differs.
Formerly: BMGT708.

BUSI761 The Environment of International Business (2 Credits)
The international business environment as it affects company policy and procedures. In-depth analysis and comprehensive case studies of the business functions undertaken in international operations.
Credit Only Granted for: BMGT794 or BUSI761.
Formerly: BMGT794.

BUSI764 Business Law for Managers (2 Credits)
Survey of United States legal institutions and processes as well as substantive areas of the law that affect business. Examination of tort and contract law, the legal forms of business organization and legal liability and major regulatory laws that affect business.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI764 or BUAC721.

BUSI771 New Venture Financing (2 Credits)
Development of skills for financing new ventures (both small and potentially large). Exploration of various funding sources. Criteria used in evaluation and decision process, including commercial banks, venture capital companies, small business investment companies, underwriters, private placement-financial consultants, mortgage bankers, and small business innovative research grants (U.S. Government).
Prerequisite: BUSI640; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BMGT740 or BUSI771.
Formerly: BMGT740.

BUSI781 Marketing Emergent Technology (1 Credit)
The many challenges and best practices of successfully marketing emergent technologies. The course will begin with a discussion of past successes and failures in marketing emergent technologies; followed by a study of the effective approaches and frameworks that help technology managers identify and understand customer needs. We will then focus on analyzing how the identified customer needs can guide design and development of emergent technologies. We will subsequently turn our attention to understanding how to translate customer needs and market conditions into effectively positioning our emergent technologies, with the intent of maximizing success when going to market.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith.

BUSI782 Science and Technology Project Valuation (2 Credits)
The application of financial management principles and techniques to science and technology investments and research and development projects. It will enable technology managers to estimate return on investment of R&D projects, value technology assets, quantify risk and make sound replacement and upgrade decisions for S&T projects. By the end of the course, students will be able to build financial models and make presentations to senior executives explaining the value creation potentially arising from investments in R&D, new product development, as well as infrastructure necessary to sustain the enterprise.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUSI784 Systems Design, Development, Test and Evaluation (2 Credits)
Systems engineering approaches to the definition, design, development, implementation, integration, verification, and validation of successful systems. Particular focus will be placed on the critical collaboration needed between business leaders and IT leaders in the early stages of program definition and how to effectively leverage and assess business-driven enterprise, product, and program development. The course will cover contemporary product lifecycle phases and the systems engineering technical processes associated with research and product development organizations in industry and government. It will explore currently popular development methodologies such as incremental, spiral, evolutionary, lean, and agile and how these are driven by concept and requirements development, systems analysis and modeling, and system architecting and are measured by technology prototyping, research validation, technology testing, and program/product evaluation. The intent is exposure to the systems engineering processes and product/program lifecycle is to help technology management professionals align developmental efforts to business/mission strategy; help them to oversee, collaborate with, and evaluate technology development efforts; and help them navigate challenges of technology development and adoption and advance technologies more efficiently from concept to operational use.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUSI785 Project Management in Dynamic Environments (2 Credits)
Addresses project management skills that are required by successful managers in increasingly competitive and faster-moving environments. Examines fundamental concepts of successful project management, and the technical and managerial issues, methods, and techniques.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

BUSI786 Technology Management Capstone Action Learning Project (2 Credits)
This course will function as an experiential practicum to apply the skills and learning outcomes accumulated throughout the Technology Management curriculum toward solving real-world problems and cases. Projects will be chosen and executed in teams, and when possible sponsored by student employers or school partners. Project selection and maturation will receive iterative faculty facilitation.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUSI787 Integrative Capstone (2 Credits)
Provide students with an integrative experience to utilize the functional tools amassed in the MBA program and acquire new knowledge in the areas of international business, business ethics and executive/leadership presence, provide students with the opportunity to work with multiple functional areas at a time to drive business growth and utilize cases to address domestic and international challenges, enabling you to sharpen your skills in utilizing several methods for adding economic value when expanding globally. Additionally, students will raise awareness of best practices in building executive/leadership presence, as functional knowledge and business expertise is not enough to ensure successful career progression.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSI788 Introduction to Global Business Experience (1-2 Credits)
Introduction to the economic climate of the country and region, history, political influences on business landscape, and specific opportunities and threats of doing business in the destination country. Course is a prerequisite to short-term study abroad classes.
Restriction: Must be in a major in BMGT-Robert H. Smith School of Business.
Repeatable to: 2 credits.

BUSI790 Healthcare Operations Management and Marketing (3 Credits)
Introduction to a variety of tools that have been used to minimize waste and create value in the healthcare sector. These tools can also be applied to organizations outside of the healthcare sector. This course will focus on two critical aspects marketing in the context of hospitals and other health delivery organizations: service quality and customer relationship management. This course provides insight into the critical strategic decisions that healthcare managers must make as they seek to improve the performance of their organizations and attract and retain customers.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSI791 Research and Development Strategy and Process (2 Credits)
This course will educate technology management professionals on contemporary strategy, management approaches, and best-practices for research and development. The course will focus on private sector methods to manage technology programs, identify and specify technical requirements, communicate technology use and value, and assess new technologies and architectures. It will include instruction on technology scouting and assessing Technology Readiness Levels (TRLs). Through engagement with experts in creating and managing technology, students will also be exposed to human and behavioral factors that can influence technology adoption in the commercial and public sector.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H Smith School of Business.

BUSI792 Health Informatics and Information Technologies (3 Credits)
Targeted at professionals, managers, and consultants in healthcare to develop their understanding of core health informatics knowledge, IT concepts and management skills. Students will learn about policies, standards and methods of information exchange, data quality, cloud computing, behavior and population management, personal data collection devices, and how these elements can come together as parts of systems.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSI794 Current Topics in Healthcare Transformation (3 Credits)
Covers a range of topics selected to enhance students understanding of the current healthcare environment, strategic landscape, critical policy changes, and how to lead transformation in their organizations.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSI796 Health Economics and Financing (3 Credits)
Designed to provide managers and professionals with a comprehensive overview of topics related to the economics and financial aspects of healthcare. Students will gain a perspective of how the healthcare ecosystem works from an economics perspective. The knowledge will be helpful for better economic analysis and business management in healthcare.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSI798 Global Business Experience (2-4 Credits)
Provides MBA students the opportunity to combine classroom learning and project research with seminars in a host country. The focus and locations visited will vary.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 6 credits if content differs.

BUSI799 Masters Thesis Research (1-6 Credits)

BUSM - Full-Time MBA Program

BUSM600 Leadership and Teamwork (2 Credits)
Course examines concepts of team-building and leadership which are critical to managerial success. Topics include leadership, decision making, communication and conflict, work motivation, building effective teams, and organizational change and culture.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BMGT600, BUSI662 or BUSM600.

BUSM602 Introduction to Financial Accounting (2 Credits)
Overview of financial accounting, periodic financial statements and the financial reporting process. Importance of financial statements as information source for creditors and investors and as a means by which managers can communicate information about their firms.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI610 or BUSM602.

BUSM604 Managerial Economics and Public Policy (2 Credits)
Basic microeconomic principles used by firms, including supply and demand, elasticities, costs, productivity, pricing, market structure and competitive implications of alternative market structures. Market failures and government intervention. Public policy processes affecting business operations.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI681 or BUSM604.

BUSM606 Data Driven Decision Making (2-3 Credits)
Analytical modeling of business decisions; uncertainty, risk and expected utility; regression modeling to infer relationships among variables.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI630 or BUSM606.

BUSM610 Financial Management (2-3 Credits)
Focuses on the valuation of the real assets of firms as well as the valuation of stocks and bonds, the primary financial assets in an economy. While details vary, the conceptual foundations of valuation boil down to three themes: time value of money, no-arbitrage, and systematic risk.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI640 or BUSM610.

BUSM612 Marketing Management (2 Credits)
Analysis of marketing problems and evaluation of specific marketing efforts regarding the organization's products and services, pricing activities, channel selection, and promotion strategies in both domestic and international markets.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI650 or BUSM612.

BUSM614 Strategic Management (2 Credits)
Analyze and identify profit opportunities and threats in different industry and competitive environments; Analyze and identify a firm's valuable assets, resources and capabilities and how they might be protected, leveraged, and extended in the market; Learn how to organize your company to be the best prepared to adapt its strategy over time as the market environment changes; and how to use organic growth as well as mergers, acquisitions, joint ventures, alliances, and divestitures to ensure that the firm maintians the proper scale and scope to compete effectively over time.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI690 or BUSM614.

BUSM616 Managerial Accounting (2 Credits)
Use of accounting data in corporate planning and control. Cost-volume-profit analysis, budgeting, pricing decisions and cost data, transfer pricing, activity-based management, performance measures, and standard costing.
Prerequisite: BUSI610.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI611 or BUSM616.

BUSM621 Digital Transformation in Business (2 Credits)
Introduces students to the strategic role of digital transformation within businesses, and provides an overview for how major information technologies may be used to inform and transform the firm's strategic, operational, and tactical decisions. Topics discussed in the course include the strategic use of digital technologies to generate sustainable competitive value; the contributions of new forms of technology infrastructure; the evaluation of new technology investments and the resulting ROI; acquiring, managing and governing technological capabilities within the firm; understanding the role of enterprise systems and social technologies within the firm; and the management of disruptive technologies within and outside the firm.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSM622 Managing Digital Business Markets (2 Credits)
The objective is to understand the strategic and tactical issues involved in managing digital businesses and markets. Also, some of the characteristics of digital businesses and markets that make them unique and understand how companies can best manage them will be examined.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI622 or BUSM622.

BUSM624 Operations Management (2 Credits)
Operations management is concerned with efficient and effective design and operation of business processes for delivering products and/or services. Emphasis is given to process analysis and design, capacity management and bottlenecks, waiting lines and the impact of uncertainty in process performance, quality management, lean, six-sigma, and revenue management.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI634 or BUSM624.

BUSM626 The Global Economic Environment (2 Credits)
Relationship between national and international economic environments. Determinants of output, interest rates, prices and exchange rates. Analysis of effect of economic policies (fiscal, monetary, trade, tax) on the firm and the economy.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI683 or BUSM626.

BUSM701 Marketing Research Methods (2 Credits)
The process of acquiring, classifying and interpreting primary and secondary marketing data needed for intelligent, profitable marketing decisions. Evaluation of the appropriateness of alternative methodologies, such as the inductive, deductive, survey, observational, and experimental. Recent developments in the systematic recording and use of internal and external data needed for marketing decisions.
Prerequisite: BUSM606; and BUSM612.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK701 or BUSM701.
Formerly: BUMK701.

BUSM702 Consumer Behavior (2 Credits)
Analysis of customer decision-making and how marketing strategy can be used to influence those decisions. The framework is a buyer behavior model, in which concepts from psychology, sociology, and economics are applied to individual and organizational purchase decisions. Marketing strategies of leading firms in consumer products, technology, and services (including internet services) are analyzed using a variety of case study formats. Focus is consumer behavior; however, principles can also be applied to the decision-making of business.
Prerequisite: BUSM612.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK715 or BUSM702.

BUSM703 Marketing Strategy (2 Credits)
A capstone marketing course. Marketing strategies designed to manage products in selected market segments. Topics covered include competitor analysis, buyer analysis, market segments, and product strengths and weaknesses; product related issues are identified and marketing strategies developed, assessed and implemented.
Prerequisite: BUSM612.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK757 or BUSM703.

BUSM704 New Product Development (2 Credits)
This course focuses on the development of innovations, new products or new services from the perspective of a marketer. For an innovation to be successful in the market, it has to be customer centric: hence, in this course, we study how to develop and bring to market elegant and efficient solutions to strong customer needs. This is a fundamental business challenge, faced while working in a startup or in an established company; when developing a new product or a new service; and when serving customers who are individuals or large corporations.
Prerequisite: BUSM612.
Restriction: Must be in one of the following programs (Business and Management (Master's); Business and Management (Master's)) ; or permission of BMGT-Robert H. Smith School of Business.

BUSM705 Brand Management (2 Credits)
Brand names are valuable assets for firms. Effective brand management is critical to maintaining the long-term profitability of products and services. Topics include understanding brands from the customer's perspective, building brand equity, measuring brand equity, leveraging brand equity, managing brand portfolios and managing brands over time.
Prerequisite: BUSM612.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK716 or BUSM705.

BUSM706 Innovation & Product Development (2 Credits)
Focuses on the development of innovations - new products or new services - from the perspective of a marketer. For an innovation to be successful in the market, it has to be customer-centric: hence, in this course, we study how to develop and bring to market elegant and efficient solutions to strong customer needs. This is a fundamental business challenge, faced while working in a startup or in an established company; when developing a new product or a new service; and when serving customers who are individuals or large corporations.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMO758P or BUSM706.

BUSM708 Independent Study in Business (1-6 Credits)
Independent study for Masters students in Business.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 6 credits if content differs.

BUSM710 Advanced Marketing Analytics Models (2 Credits)
Introduction to modeling tools used to support marketing analysis and decision making. Applications in strategic marketing, marketing segmentation, new product development, sales promotion analysis, pricing, design of marketing mix, sales force allocation, and direct marketing. Spreadsheet driven cases and illustrative readings.
Prerequisite: BUSM612.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK706 or BUSM705.

BUSM711 Pricing Strategies for Sustainable Competitive Advantage (2 Credits)
Pricing is one of the most important marketing decisions a firm faces. This course will help participants to develop pricing strategies using actual proven concepts, processes and techniques, to align pricing strategies with corporate goals and objectives, to determine the value customers assign to products and services using competitive pricing analysis, and to optimize pricing using customer segmenting strategies. The course will focus on both economic and behavioral aspects of pricing, and evaluation of innovative pricing practices such as price matching, customized pricing, bundle pricing and product line pricing, covering both B2B and B2C markets. Instruction will be through a mix of case studies, pricing simulation games, hands-on exercises and discussions. The course will provide participants with an in-depth understanding of state-of-the-art pricing strategies, practices and techniques for making profitable and sustainable pricing decisions.
Prerequisite: BUSM612.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSM713 Market Forecasting (2 Credits)
Students will learn a number of market forecasting methods, each appropriate for different contexts. The majority of this course focuses on quantitative modeling techniques based on established statistical methods. We also cover non-statistical methods that are often used when empirical data is scarce. This is a very hands-on class where students will apply the forecasting methods learned to real data.
Prerequisite: BUSM606 and BUSM612.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSM714 Integrated Marketing Communications (2 Credits)
Marketing communications are a complex but critical component of marketing strategy. Topics include communication tools: advertising, sales promotions, corporation communications, one-on-one or direct marketing, public relations, internet communications, sponsorship/events marketing, and marketing communcation plans: defining objectives, implementing the plan, and measuring communications effectiveness. Achieving integration in the content, look, and feel of all marketing communications is stressed.
Prerequisite: BUSM612.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMK717 or BUSM707.

BUSM715 Digital Marketing (2 Credits)
It has been a quarter century since the commercial use of the Internet and the World Wide Web began and during that time the business landscape has changed at a frenetic pace. Large multinational corporations such as Alphabet/Google, Facebook, Amazon, Alibaba and eBay, unheard of twenty years ago, have emerged as key players in our modern economy. In 2017 holiday season, online sales increased over 16 percent of overall spending online in 2016 with online retail spending in the U.S., the highest percentage since tracking began in 1999. Sales made through mobile devices have increased at a rapid rate to around 22 to 40 percent of all online sales. Corporations now highlight the importance of creating a digital relationship with customers. Moreover, digital technologies and devices such as smartphones, smart products, the Internet of Things, Artificial Intelligence, and deep learning all promise significant transformations of consumers lives in the near future. It is against this backdrop this course seeks to understand how the developments in digital technology are re-shaping the process and the strategy of marketing in the broad space we call digital marketing.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSM716 Social Media and Internet Marketing (2 Credits)
Examines the process of developing, implementing, and analyzing strategies for successfully marketing a variety of existing and potential products and services using electronic media. Besides well-established Internet marketing tools such as e-mail, search engines and display advertising, a substantial part of the course is dedicated to understanding social media, analyzing successful social media strategies, and tracking their effectiveness. The course offers hands-on experience with many popular as well as emerging techniques unique to electronic media. Special attention is given to metrics appropriate for the new media.
Prerequisite: BUSM612.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSM731 Capital Markets (2 Credits)
Designed to deepen the foundations necessary to finance focused students, especially those intending to specialize in the quantitative areas of finance including investments, fixed income, and financial engineering.
Prerequisite: BUSM610.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN740 or BUSM731.

BUSM733 Valuation in Corporate Finance (2 Credits)
An advanced topics course in Corporate Finance dealing with valuation. Main topics will be, building pro forma statements, cost of capital, using ratios and comparables to value projects and firms, dicounted cash flow valuations, WACC and APV methods of valuation and Real Option Valuations.
Prerequisite: BUSM610.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN750 or BUSM733.

BUSM735 Financial Strategy for Corporations (2 Credits)
An advanced course in corporate finance, focusing on the issues that firms face when they plan to raise external capital from financial markets. The focus is on the financing problems faced by mid-market to large firms and on capital raised from public markets. The forms of external finance vary from simple debt or equity to more complex securities that bundle with an element of risk management.
Prerequisite: BUSM610.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN751 or BUSM735.

BUSM736 Corporate Risk Management (2 Credits)
Surveys the theory and practice of financial risk identification, measurement, and mitigation at financial and non-financial firms. Topics will include hedging with options and futures, interest rate risk management, Value-at-Risk (VaR), Cashflow-at-Risk (CaR), Earnings-at-Risk (EaR), credit risk, equity risk, commodities risk, exchange rate risk, and lessons from risk management disasters.
Prerequisite: BUSM610.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN754 or BUSM736.

BUSM737 Applied Equity Analysis (2 Credits)
Students will learn to analyze equity securities using the basic EIC (Economy/Industry/Company) framework used in the financial industry, paying special attention to financial statement analysis. Students also will learn the primary valuation techniques used to estimate market values for equity securities.
Prerequisite: BUSM610.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN760 or BUSM737.

BUSM738 Investment Fund Management (1-4 Credits)
Provides second-year Master in Business Administration students with the opportunity to apply the skills learned in finance classes to actual investment decisions through management of an investment fund.
Prerequisite: BUSM610.
Restriction: Must be in Business and Management (Master's) program; and permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 12 credits.
Credit Only Granted for: BUFN738 or BUSM738.

BUSM741 Financial Restructuring (2 Credits)
Focuses on identifying ways to increase firm value through corporate restructuring. Specific topics include: mergers and tender offers, spin-offs, carve-outs, divestitures, takeover defense strategies, leveraged buy-outs, and international acquisitions. Additionally, the theory, practice and empirical evidence related to each of these topics will be covered. Emphasis will be placed on valuation analysis and strategic considerations.
Prerequisite: BUSM610.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN752 or BUSM741.

BUSM743 Entrepreneurial Finance and Private Equity (2 Credits)
An advanced topics course in Corporate Finance. The major emphasis is how financiers help growing firms - and in particular young start-ups - using different types of securities at different points in the industry's and firm's life. Financing arrangements and securities studied will include private equity funds and private financings placements, Venture Capital (VC) and preferred equity, Investment Banks through Initial Public Offerings (IPOs), Private equity finds, debt and leveraged buyouts. Students will learn additional techniques that will help them understand how financiers value firms and how to understand, plan and value different financing strategies.
Prerequisite: BUSM610.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN755 or BUSM743.

BUSM744 Portfolio Management (2 Credits)
Provides training that is important in understanding the investment process - the buy side of the financial world. Specifically, the objective is to provide graduate-level instruction in the following topics, both in theory and in using financial markets data to test the basic theory and practice of portfolio choice and equilibrium pricing models and their implications for efficient portfolios.
Prerequisite: BUSM610; and BUSM731.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUFN763 or BUSM744.

BUSM745 Derivative Securities (2 Credits)
Standard types of derivatives contracts are presented, and illustrated as to how they are used in practice. The theory of pricing these contracts is then presented in detail. The use of static and dynamic replication strategies, and the concept of no-arbitrage strategies is illustrated in numerous ways. Standard valuation techniques are covered, and standard formulas are presented. The theory is then applied to develop specific pricing and hedging strategies for various types of derivatives on different underlying assets. The management of the exposure of various risks is covered in detail as well.
Prerequisite: BUSM610.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSM747 Financial Reporting & Analysis (2 Credits)
Uses authoritative professional pronouncements to examine advanced financial reporting issues. Examines complex problems in accounting and reporting; examples include pensions, taxes, interest rate swaps, derivative securities, international transactions, and international financial reporting. Takes a user-oriented perspective, and examines the ways in which financial accounting information is used by investors, analysts, and creditors. Examples include if users adjust for alternative accounting methods or for information that is recognized versus disclosed.
Prerequisite: BUSM602.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSM750 Project Management in Dynamic Environments (2 Credits)
Addresses project management skills that are required by successful managers in increasingly competitive and faster-moving environments. Examines fundamental concepts of successful project management, and the technical and managerial issues, methods, and techniques.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI785 or BUSM750.

BUSM751 Managing Supply Chains: Models & Analysis (2 Credits)
Focuses on the strategic aspects of operations and supply chain management. Uses a framework for developing an operations strategy, and identify and analyze the key operations decisions which can have a major impact on a company's competitive position.
Prerequisite: BUSM606 and BUSM624.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSM752 Games of Strategy and Incentives (4 Credits)
Analysis of managerial decisions in strategic environments using tools from game theory; competition and cooperation in product markets; principal-agent model and the economics of incentives; analytical foundations of behavioral constructs such as reputation, commitment and credibility.
Prerequisite: Permission of BMGT-Robert H. Smith School of Business. Or BUSM610; and BUSM604; and BUSM614.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSM754 Competitive and Collaborative Negotiation (2 Credits)
Increase negotiating self-confidence and improve capacity to achieve win-win solutions to organizational problems. Improve effectiveness at finding creative solutions to conflict.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMO714 or BUSM754.

BUSM755 Organizational Change (2 Credits)
Develops the advanced knowledge and skills of MBA students who plan to work with organizations as change agents. Concrete and useful strategies, tools, and interventions for diagnosing organizational change situations, analyzing problems, and designing and implementing organizational change. Draws on literature from organizational behavior, human resource management and strategic management to identify models as prescriptions of change.
Prerequisite: BUSM600.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.

BUSM757 Implementing Strategy: Organizing to Compete (2 Credits)
Organizational dynamics of competitive advantage. Impact of alternative organizational structures, planning and control systems, human resource management practices, and executive leadership styles on the implementation of archetypically different strategies.
Prerequisite: BUSM614.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMO751 or BUSM757.

BUSM758 Special Topics in Business (1-4 Credits)
Selected advanced topics in the various fields of graduate study in business.
Prerequisite: Permission of BMGT-Robert H. Smith School of Business.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 9 credits if content differs.
Formerly: BMGT798.

BUSM761 Data Mining and Predictive Analytics (2 Credits)
Data mining techniques and their use in business decision making. A hands-on course that provides an understanding of the key methods of data visualization, exploration, classification, prediction, time series forecasting, and clustering.
Prerequisite: BUSM606.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUDT733 or BUSM761.
Formerly: BUDT733.

BUSM762 Decision Analytics (2 Credits)
Analytical modeling for managerial decisions using a spreadsheet environment. Includes linear and nonlinear optimization models, decision making under uncertainty and simulation models.
Prerequisite: BUSM606.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUDT732 or BUSM762.

BUSM764 Pricing and Revenue Management (2 Credits)
Specialized course on pricing and revenue management (PRM) that provide students with tools and principles, drawn from several disciplines (Operations, Microeconomics, Decision Modeling, Statistics, Marketing, IS) to make effective pricing decisions. Topics covered include economics of pricing, strategy and tactics of PRM, pricing optimization, differentiated pricing, dynamic pricing, mark-down pricing, legal and ethical issues in models/methods used in making effective PRM decisions and managerial or organizational factors that hold the key to success in execution of PRM.
Prerequisite: BUSM606; and BUSM624.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUDT775 or BUSM764.

BUSM765 Social Media and Web 2.0 (2 Credits)
Over the past years, social computing technologies such as online communities, blogs, wikis, and social networking systems have become important tools for individuals to seek information, socialize with others, get support, collaborate on work, and express themselves. Increasingly, businesses are trying to leverage web 2.0 by using social computing technologies to communicate with customers, employees, and other business partners or to build new business models. This course will review concepts and principles related to web 2.0 and examine issues and strategies associated with business use of social computing technologies.
Prerequisite: BUSM621; or BUSM622.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUDT706 or BUSM765.

BUSM767 Process Improvement (2 Credits)
Provide you with the necessary knowledge, tools and real-world examples to improve any organizational process and help students understand how a supply chain works from the perspective of processes improvement using Lean and, Six Sigma methods. Much of the focus will be on identifying where improvement opportunities reside, understanding and improving the flow of supply chain processes, and eliminating non-value activities using a wide arrange of tools.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSM771 Leading Strategically (2 Credits)
Focus on the aspects of the firm that facilitate reaching strategic objectives. The firm is comprised of formal structures or architecture, routines and practices, and culture and norms that all need to be well-aligned to support your strategy. In particular, organizational alignment facilitates the development of innovative ideas, achieving operational efficiency, sustaining organizational growth, adopting new business models, achieving strategic change, and building organizational competence. Students will use several tools to assist in analysis, such as congruence analysis, the 7S model, network analysis, and design thinking. Focus on thinking systematically and analytically about managing an organization and leading strategically.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSM773 Innovation & Entrepreneurship (2 Credits)
Provides an introduction to important tools and skills necessary to create and grow a successful new venture. Integrates research findings from a range of different practical and intellectual perspectives, including psychology, sociology, economics, strategic management, and history into practical, hands on lessons for an entrepreneur. Class projects provide the foundations for new, real businesses.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMO732 or BUSM773.

BUSM775 Global Strategy (2 Credits)
Focuses on the "strategic" and "organizational" questions that a company must address as it globalizes its footprint. Among the questions that will be addressed are: What are the potential benefits, costs, and risks associated with going abroad? What differentiates a "global" from a "multidomestic" industry? What are the sources of competitive advantage in a global context?
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUMO754 or BUSM775.

BUSM778 Introduction to Global Business Experience (1-4 Credits)
Introduction to the economic climate of the country and region, history political influences on business landscape, and specific opportunities and threats of doing business in the destination country. Course is a prerequisite to short-term study abroad classes.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 4 credits.
Credit Only Granted for: BUSI788 or BUSM778.

BUSM781 International Economics for Managers (2 Credits)
Focus on understanding critical aspects of international economics that influence firm decisions and behavior. While covering theoretic fundamentals of international trade and foreign direct investment, focus on the implications for managers from these international economic activities. Such forces of globalization create winners and losers, and consider how firms can take advantage of these asymmetries. The topical issues include: - international trade: trade theory, comparative advantage, production location, why and how government is involved in international trade, how government involvement affects trade - firms participating abroad: determinants of foreign direct investment, location choice, off-shoring, emerging multinationals, emerging markets.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSM783 Global Supply Chain Management (2 Credits)
Offers a practical blueprint for understanding, building, implementing, and sustaining supply chains in today's rapidly changing global supply chain environment. It will provide the student with a survey of the fast-moving Supply Chain Management discipline and practice, including the evolution of supply chain strategies, business models and technologies; current best practices in demand and supply management; and methodologies for conducting supply chain-wide diagnostic assessments and formulating process improvement plans.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BUSI672 or BUSM783.

BUSM784 Assessing and Managing Supply Chain Risks (2 Credits)
Supply chain managers are facing an increasingly volatile operating environment, with constant danger of trading community disruption from business, social and environmental risks. Students are provided with a working knowledge of both the core techniques of supply chain risk assessment and mitigation; as well as best practices in establishing formal corporate supply chain risk management programs. A semester-long X-Treme Supply Chain Simulation will enable students to gain hands-on experience in navigating a computer company through a complex and risky four quarters of global business operations.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BULM734 or BUSM784.

BUSM785 Global Supply Chain Resources Planning (2 Credits)
Provides students with an overall understanding of how firms use an advanced supply chain planning (ASCP) application as an integral part of their materials management process which includes such activities as production planning, materials requirements planning, and distribution requirements planning.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Credit Only Granted for: BULM742 or BUSM785.

BUSM786 Global Trade Logistics (2 Credits)
Acquaints students with managerial issues in international logistics and transportation, and provides students with an understanding of issues related to import/export management and the global marketplace.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSM787 Supply Chain Management Experience (2 Credits)
Gain a hands-on experience with logistics and supply chain operations. Various supply chain management activities, ranging from transportation to warehousing, will be witnessed directly through a series of site visits and facility tours and explored in depth through directed company projects. Other supply chain management activities, such as purchasing and planning, will also be introduced throughout the semester.
Restriction: Must be in Business and Management (Master's) program OR Permission of BMGT-Robert H. Smith School of Business.

BUSM788 Global Business Experience (1-6 Credits)
Provides MBA students the opportunity to combine classroom learning and project research with seminars in a host country. The focus and locations visited will vary.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 8 credits if content differs.

BUSM798 Business Consulting (1-4 Credits)
Selected advanced topics in the various fields of graduate study in business.
Restriction: Must be in Business and Management (Master's) program; or permission of BMGT-Robert H. Smith School of Business.
Repeatable to: 8 credits if content differs.
Credit Only Granted for: BUSM798 or BMGT798.

CBMG - Cell Biology & Molecular Genetics

CBMG626 Quantitative Modeling for Experimental Biologists (2 Credits)
A toolkit for understanding processes through the generation of useful models constrained by data. Topics explored include Simulations, Information Theory, Dynamical Systems, and Control Theory.
Prerequisite: BIOL705; or permission of the instructor .
Recommended: Some familiarity with programming (NetLogo, R and/or Python) is helpful.

CBMG688 Special Topics in Cell Biology and Molecular Genetics (1-4 Credits)
Presentation and discussion of fundamental problems and special subjects in the topics of Cell Biology and Molecular Genetics.
Formerly: MICB688.

CBMG699 Special Problems in Cell Biology and Molecular Genetics (1-3 Credits)
Emphasis is placed on research and discussion of current problems in the area of Cell Biology and Molecular Genetics.
Repeatable to: 10 credits if content differs.
Formerly: PBIO699.

CBMG789 Seminar in Cell Biology and Molecular Genetics (2 Credits)
Cell Biology and Molecular Genetics Department Seminar.
Repeatable to: 4 credits if content differs.
Formerly: MICB789.

CBMG799 Masters Thesis Research (1-6 Credits)
Master's Thesis Research in Cell Biology and Molecular Genetics.

CBMG898 Pre-Candidacy Research (1-8 Credits)
Pre-candidacy Research.

CBMG899 Doctoral Dissertation Research (1-8 Credits)
Doctoral Dissertation Research.

CCJS - Criminology and Criminal Justice

CCJS405 Gangs (3 Credits)
Provides students with a historical and contemporary examination of street and institutional gangs. We will address the nature and definition of gangs, types of gangs, and diversity of membership of gangs, theoretical explanations, and criminal and deviant behavior. In addition, we will analyze law enforcement responses, intervention and prevention strategies, and public policy issues.
Prerequisite: CCJS100 and CCJS105.
Credit Only Granted for: CCJS405 or CCJS498G.
Formerly: CCJS498G.

CCJS418 Seminar in Criminology and Criminal Justice (3 Credits)
Selected topics of interest in the field of Criminology and Criminal Justice will be covered.
Repeatable to: 18 credits if content differs.

CCJS428 Special Topics in Criminology and Criminal Justice (3 Credits)
Topics in various aspects of the field of criminology and criminal justice will be covered.
Repeatable to: 18 credits if content differs.

CCJS440 Security Administration (3 Credits)
Designed to introduce students to the complex issues of Security Administration and the critical terrorism issues facing the nation. Emphasis is placed on understanding the historical and contemporary issues effecting U.S. Counterterrorism Policy. It also explores the challenges facing today's security administrators including: ethics, classified information, intelligence, terrorist organizations and incidents, physical and personnel security, transportation and border security issues.
Prerequisite: CCJS100 and CCJS340.
Credit Only Granted for: CCJS440 or CCJS498Z.
Formerly: CCJS498Z.

CCJS444 Advanced Law Enforcement Administration (3 Credits)
The structuring of manpower, material, and systems to accomplish the major goals of social control. Personnel and systems management. Political controls and limitations on authority and jurisdiction.
Prerequisite: CCJS100 and CCJS340.

CCJS450 Advanced Juvenile Delinquency (3 Credits)
Examination of juvenile delinquency in the United States. Nature and extent of juvenile delinquency, historical approaches, sociological and criminological theories and research, social contexts including the institutions of families, schools, and peers, and social responses. Prevention, punishment, and treatment programs, both within and outside of the juvenile justice and criminal justice systems.
Prerequisite: CCJS105 and CCJS300.
Credit Only Granted for: CCJS350 or CCJS450.

CCJS451 Crime and Delinquency Prevention (3 Credits)
Methods and programs in prevention of crime and delinquency.
Prerequisite: CCJS105 and CCJS300.

CCJS452 Treatment of Criminals and Delinquents (3 Credits)
Processes and methods used to modify criminal and delinquent behavior.
Prerequisite: CCJS105 and CCJS300.
Credit Only Granted for: CCJS 342 or CCJS 452.

CCJS453 White Collar and Organized Crime (3 Credits)
Definition, detection, prosecution, sentencing and impact of white collar and organized crime. Special consideration given to the role of federal law and enforcement practices.
Prerequisite: CCJS300; and (CCJS350 or CCJS105).

CCJS454 Contemporary Criminological Theory (3 Credits)
Examination of the main theoretical accounts that explain the underlying causes of criminal behaviors. Explore how individual choices, socialization experiences, biological factors and social structure affect criminal behaviors.
Prerequisite: CCJS300 and CCJS105.

CCJS455 Dynamics of Planned Change in Criminal Justice I (3 Credits)
An examination of conceptual and practical issues related to planned change in criminal justice. Emphasis on the development of innovative ideas using a research and development approach to change.
Prerequisite: CCJS300.
Restriction: Permission of BSOS-Criminology & Criminal Justice department.

CCJS458 Special Topics in Study Abroad IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

CCJS461 Psychology of Criminal Behavior (3 Credits)
Biological, environmental, and personality factors which influence criminal behaviors. Biophysiology and crime, stress and crime, maladjustment patterns, psychoses, personality disorders, aggression and violent crime, sex-motivated crime and sexual deviations, alcohol and drug abuse, and criminal behavior.
Prerequisite: CCJS105 and CCJS300.

CCJS489 Honors Thesis Research (3 Credits)
Designed for students completing their honors thesis.
Prerequisite: CCJS100 and CCJS105.
Restriction: Limited to CCJS Departmental Honors students.
Repeatable to: 6 credits.

CCJS498 Selected Topics in Criminology and Criminal Justice (3 Credits)
Topics of special interest to advanced undergraduates in criminology and criminal justice. Offered in response to student request and faculty interest.
Repeatable to: 6 credits if content differs.

CCJS600 Criminal Justice (3 Credits)
Current concept of criminal justice in relationship to other concepts in the field. Historical perspective. Criminal justice and social control. Operational implications. Systemic aspects. Issues of evaluation.
Restriction: Must be in one of the following programs (Criminology and Criminal Justice (Master's); Criminology and Criminal Justice (Doctoral)) ; or permission of BSOS-Criminology & Criminal Justice department.
Formerly: CJUS600.

CCJS601 Policing (3 Credits)
An introduction to research, theory, and applications of the causes and consequences of police behavior. Community policing, problem-solving methods, police discretion, police misconduct, police crime prevention strategies, and restorative justice.

CCJS602 Courts and Sentencing (3 Credits)
Research and theory on prosecution, plea-bargaining, sentencing principles and guidelines, and sentencing policies in practice. Mandatory minimum sentencing, "three strikes" laws, race, gender and class disparities, general and specific deterrent effects of sentencing, restitution and restorative justice, diversion and sentencing to treatment.

CCJS604 Policy Analysis Project (3 Credits)
An application of statistical and conceptual tools to criminal justice data in the student's area of concentration, resulting in a paper reporting the conceptualization, analytic methods and results. The topic of the independent study will be chosen through individual consultation with the instructor.

CCJS605 Program Evaluation for Criminal Justice (3 Credits)
Designing, implementing and evaluating programs in criminal justice. Topics include diagnosing program needs, planning and tailoring evaluation programs, program monitoring, assessing program impact, program efficiency, and the social context of evaluation.
Credit Only Granted for: CCJS605 or CCJS609.
Formerly: CCJS609.

CCJS610 Research Methods in Criminal Justice and Criminology (3 Credits)
Examination of special research problems and techniques.
Formerly: CRIM610.

CCJS611 Statistical Tools for Criminal Justice (3 Credits)
An introduction to essential statistical concepts for analyzing crime and evaluating criminal justice policies. Interpreting crime trends and correlations, risk and conditional probability analysis for repeat offenders and hot spots of crime, time series analysis, experimental statistics, effect sizes, statistical power and significance.

CCJS613 Criminal Justice System in China (3 Credits)
The main contents of this course include: the overall characteristics of the Chinese judicial system, the horizontal comparison of the judicial system between China and the United States, the investigation system, the pre-trial detention system, the defense system, the prosecutorial system, the trial system, the sentencing system, the correction and community correction system, as well as the minor judicial system in the criminal justice system of China.
Restriction: Must be in the Criminology and Criminal Justice Professional Master's Program in Nanjing China.
Credit Only Granted for: CCJS678G or CCJS613.
Formerly: CCJS678G.

CCJS614 Criminal Law (3 Credits)
Chinese criminal law and its interpretation, principles, and methods.
Restriction: Students enrolled in the CCJS Masters Program in China.
Credit Only Granted for: CCJS614 or CCJS678F.
Formerly: CCJS678F.

CCJS615 Criminal Procedure Law (3 Credits)
This course is intended to introduce students to basic issues in China's criminal procedure law.
Credit Only Granted for: CCJS678E or CCJS615.
Formerly: CCJS678E.

CCJS616 International Law and Process (3 Credits)
International law in globalized world and its functions.
Restriction: Students in the CCJS Masters program in China.
Credit Only Granted for: CCJS616 or CCJS678D.
Formerly: CCJS678D.

CCJS620 Fundamentals of Criminological Research (3 Credits)
Designed to help criminology students understand and apply three important components of statistics: decriptive statistics (including probability theory), fundamentals of statistical inference, and regression analysis. Course assumes familiarity with basic descriptive statistics. The emphasis of the classes on descriptive statistics is the calculation and interpretation of summary statistical measures for describing raw data. Covers the basic rules of probability and different probabilistic processes that could describe criminal activity. The sessions on fundamentals of statistical inferences are designed to provide background for executing and interpreting hypothesis tests and confidence intervals. The latter portion of the course focuses on regession analysis. Uses the statistical software, Stata.
Credit Only Granted for: CCJS498D or CCJS620.
Formerly: CCJS498D.

CCJS621 General Linear Models in Criminal Justice Research (3 Credits)
An in-depth exploration of applied linear regression analysis. Covers characteristics of estimates, such as unbiasedness and efficiency. Encourages fluency with the theoretical issues involved in the basic linear regression using simple algebra, familiarity with the general model using matrix algebra, and fluency with the computer application of multivariate regressions and the probit/logit models.
Prerequisite: CCJS620.
Credit Only Granted for: CCJS498F or CCJS621.
Formerly: CCJS498F.

CCJS631 Ethics in Criminal Justice (3 Credits)
Provides students with an overview of the major ethical perspectives, which are typically used to inform and justify the workings of the criminal justice system. The course draws on a number of case studies in order to introduce students to a broad range of ethical dilemmas, and students develop and hone a decision-making process designed to resolve such dilemmas.
Restriction: Must be in one of the following programs: Criminology and Criminal Justice (Master's); Criminology and Criminal Justice (Doctoral); Sociology (Master's); Sociology (Doctoral); or permission from BSOS-Criminology & Criminal Justice department.

CCJS632 Making Sense of Criminal Justice Methods and Statistics (3 Credits)
Teaches students how to better understand research that relies on statistics and to then apply this understanding to common criminal justice problems. The course will introduce basic statistical concepts that are necessary for analyzing crime and evaluating criminal justice programs and policies. Students will learn to interpret and assess the quality of reports that present crime trends, descriptive statistics, correlations, data mining efforts, geo-spatial and social media analytics, risk analysis for repeat offenders, hot spots of crime, and experimental research. By the end of the semester, students will learn to assess critically the quality of published research and evaluate its implications for criminal justice policy.
Restriction: Must be in one of the following programs: Criminology and Criminal Justice (Master's); Criminology and Criminal Justice (Doctoral); Sociology (Master's); Sociology (Doctoral); Master of Professional Studies in Public Safety Leadership and Administration (MPLA); Graduate Certificate in Criminal Justice Administration (Z130); or permission from BSOS-Criminology & Criminal Justice department.

CCJS633 Translating Research into Practice (3 Credits)
Law enforcement policy and practice is increasingly "evidence based." This course will focus on understanding data sources and the fundamentals of research methodology, focusing on how data and methodological choices shape the conclusions that can be drawn. At the end of this course, students will be able to discern between research of good and poor quality and understand the crucial benefits of evaluation.
Prerequisite: CCJS632.
Restriction: Permission of BSOS-Criminology & Criminal Justice department.

CCJS635 Minorities and Criminal Justice (3 Credits)
Role minorities play in the criminal justice system: as victims, offenders and professionals. Also provides theoretical framework for examining these roles.
Prerequisite: CCJS600; or students who have taken courses with comparable content may contact the department.

CCJS651 Seminar in Criminology (3 Credits)
Analysis of significant recent issues in Criminology.
Formerly: CRIM651.

CCJS652 Seminar in Juvenile Delinquency (3 Credits)
Analysis of delinquency and its control.
Formerly: CRIM652.

CCJS653 Seminar in Corrections (3 Credits)
Development, operation and future of correctional systems.
Prerequisite: CCJS651; or students who have taken courses with comparable content may contact the department.
Formerly: CRIM653.

CCJS654 History of Criminological Thought (3 Credits)
A study of the development of criminological thought from antiquity to the present.
Prerequisite: CCJS454; or students who have taken courses with comparable content may contact the department.
Formerly: CRIM654.

CCJS660 Gender and Crime (3 Credits)
Assumptions, biases, and relative strengths and weaknesses of theories of crime as applied to women. Criminal justice sanctioning of crimes by and against women. The course will also explore occupational segregationby gender in criminal justice professions, particularly in the fields ofpolicing, courts (attorneys and judges), and corrections (correctionalofficers and treatment staff).

CCJS661 Crime and the Life Course (3 Credits)
Designed to provide an intensive examination of crime and the life course. Life course is examined as a theoretical orientation, a research methodology, and an empirical field of study with special reference to crime and deviance. Course includes development of criminal behavior and criminal careers; stability and change in criminal behavior across developmental stages; trajectories, transitions, and turning points through life; quantitative and qualitative approaches to studying crime and the life course; and social change and its link to individual lives.
Credit Only Granted for: CCJS699J or CCJS661.
Formerly: CCJS699J.

CCJS663 Issues in Corporate Crime (3 Credits)
Overview of what is known about corporate crime and criminals (e.g.: similarities to and differences from other offenders and crime types; characteristics of offenders and victims; what counts as corporate crime ; introduction to theoretical frameworks.) Readings and class materials will coalesce around specific issues about which there is much debate but scant empirical research. Discussions will center around what is known, what is not, what needs to be done and how.
Credit Only Granted for: CCJS699S or CCJS663.
Formerly: CCJS699S.

CCJS664 Regulating Vice and Regulating Organized Crime (3 Credits)
For this course, vice is defined as a habit with bad consequences that can generate large black markets if the market for supplying that habit is prohibited or heavily regulated. Vice if found in all modern societies, though in widely differing forms, depending on population characteristics, culture and law. Society's decision is how to regulate it, whether criminally or otherwise, and how then to assess whether the regulation is successful. This assessment has multiple components, including: choosing outcome measures; modeling counterfactuals for which the evidence is often very indirect and developing a framework for ensuring that comparisons reflect all relevant outcomes and values.
Credit Only Granted for: CCJS699V or CCJS664.
Formerly: CCJS699V.

CCJS667 Innovations in Policing: Programs, Policies and Research (3 Credits)
Examine the factors that have led to recent police innovations and recent innovations in the study of policing. Critically explores the effects of such policies on crime and disorder, on research practices, as well as unintended consequences on community, police abuse and police organization. Which policies have been found to be effective? What types of practices work most effectively for what type of crime and disorder problems? Has there been sufficient research for us to come to solid conclusions regarding these questions? Does present research fit the practices of the police?
Credit Only Granted for: CCJS667 or CCJS699W.
Formerly: CCJS699W.

CCJS670 Race, Crime, and Criminal Justice (3 Credits)
Provides an historical overview of the operation and evolution of the criminal justice system and the impact of race. How race affects definitions of crime and criminality, the workings of the criminal justice system, the development of criminological theory, and the role of criminal justice ethics in the study of race and crime will be considered.

CCJS671 Technology in Modern Policing (3 Credits)
Leaders in law enforcement must be able to effectively evaluate, deploy, and manage technology projects. This course covers state-of-the-art technologies used in everyday policing, as well as emerging and future technologies. Students evaluate technological solutions to public safety problems from a legal/policy and privacy/optics perspective, from a procurement and budgetary perspective, and from a technical perspective. Students learn the challenges and best practices associated with deploying major technology projects. This course covers the underlying technical aspects of these technologies at a high level, such that students are able to successfully make informed decisions.

CCJS678 Advanced Topics in Criminology and Criminal Justice (3 Credits)
An analysis of contemporary issues in criminology and criminal justice with special emphasis on research and theory developments.
Prerequisite: CCJS600.
Repeatable to: 12 credits if content differs.

CCJS680 Drugs and Crime (3 Credits)
The relationship between drug use and crime. Policy concerning drug control enforcement, prosecution and sentencing. impact of drug treatment in criminal justice Impact of drug treatment in criminal justice settings, drug courts, drug-testing strategies and surveillance of former drug abusers in the community.

CCJS699 Special Criminological Problems (1-3 Credits)
Supervised study of a selected problem in the field of criminal justice.
Restriction: Permission of BSOS-Criminology & Criminal Justice department.
Repeatable to: 6 credits.
Formerly: CJUS699.

CCJS700 Advanced Research Methods in Criminology and Criminal Justice (3 Credits)
An in-depth inventory of the methods of criminological research. It considers the philosophy of science and research ethics; discusses sampling, measurement and methods of data collection, including survey, experimental, evaluation, and qualitative research.
Prerequisite: CCJS610.

CCJS710 Advanced Statistics Methods - Limited Dependent Variables (3 Credits)
Application of advanced data analysis strategies to criminological and criminal justice problems, with specific focus on limited dependent variables.
Prerequisite: Must have completed an approved doctoral level statistics course.
Formerly: CRIM710.

CCJS711 Randomized Experiments in Criminology and Criminal Justice (3 Credits)
Constrast randomized designs with other approaches, examining both statistical, methodological, ethical and practical concerns. What are the statistical advantages of randomized experimental designs? Why do some researchers believe that randomized studies violate ethical standards in criminal justice? Why are experiments considered to have higher internal validity than non-randomized designs and how do different types of designs compare in terms of external validity? Focus on how experiments can be developed and how they are analyzed. What are the practical barriers to experimentation and how can they be overcome? What statistical methods are most appropriate for experimental analysis? How can block randomization or hierarchical modeling be used to develop more powerful or more practical research approaches?

CCJS712 Longitudinal Data Analysis with Latent Variables (3 Credits)
This course is designed for graduate students with an interest in the use of latent variables in longitudinal data analysis as it is conceptualized in the Mplus framework. This course explores more general features of latent variable analyses as they are related to longitudinal modeling. Topics to be covered include latent growth analysis with a combination of continuous and categorical latent variables as well as the inclusion of continuous and categorical variables as predictors and outcomes.
Credit Only Granted for: CCJS699F or CCJS712.
Formerly: CCJS699F.

CCJS720 Criminal Justice System Planning: Policy Analysis for Crime Control (3 Credits)
System theory and method; examination of planning methods and models based primarily on a systems approach to the operations of the criminal justice system.
Prerequisite: Must have completed 1 course in research methodology; and 1 course in CCJS.
Formerly: CJUS720.

CCJS799 Master's Thesis Research (1-6 Credits)
Formerly: CRIM799.

CCJS898 Pre-Candidacy Research (1-8 Credits)

CCJS899 Doctoral Dissertation Research (1-8 Credits)
Doctoral dissertation research in criminal justice and criminology.
Formerly: CRIM899.

CHBE - Chemical and Biomolecular Engineering

CHBE409 Undergraduate Honors Seminar (1 Credit)
Students will attend and write summaries of departmental seminars, along with professional development activities
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and Permission of ENGR-Chemical & Biomolecular Engineering department; and Must be in the Chemical Engineering Honors Program.
Repeatable to: 2 credits.

CHBE410 Statistics and Design of Experiments (3 Credits)
An introduction to probability, statistics, and design of experiments for chemical engineers.
Prerequisite: Minimum grade of C- in CHBE250, MATH241, and MATH246.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE410 or ENCH476.
Formerly: ENCH476.

CHBE422 Chemical and Biomolecular Engineering Transport Phenomena I (3 Credits)
Principals of fluid dynamics as applied to model development and process design. Mass, momentum and energy conservation. Statics and surface tension. Equation of Continuity and Navier-Stokes Equation with application to laminar flow. Dimensional analysis. Macroscopic balances, Bernoulli Equation and friction factors with application to turbulent flow.
Prerequisite: Minimum grade of C- in CHBE101, CHBE250, MATH241, and MATH246.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE422 or ENCH422.
Formerly: ENCH422.

CHBE424 Chemical and Biomolecular Engineering Transport Phenomena II (3 Credits)
Principles of mass and heat transfer as applied to model development and process design. Species continuity equation with application to diffusion, and convection in laminar flow. Macroscopic balances and mass transfer coefficients with application to turbulent flow. Microscopic equation of energy with application to heat conduction, and convection in laminar flow. Macroscopic energy balance and heat transfer coefficients with application to turbulent flow. Heat exchanger design.
Prerequisite: CHBE422.
Corequisite: CHBE302.
Restriction: Must be in Engineering: Chemical program; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE424 or ENCH424.
Formerly: ENCH424.

CHBE426 Chemical and Biomolecular Separation Processes (3 Credits)
Separation by stages operations. Rate dependent separation processes. Design application in distillation, gas absorption, liquid extraction, drying, adsorption and ion exhange.
Corequisite: CHBE302; and CHBE424.
Restriction: Must be in Engineering: Chemical program; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE426 or ENCH426.
Formerly: ENCH426.

CHBE437 Chemical and Biomolecular Engineering Laboratory (3 Credits)
Application of chemical engineering process and unit operation principals in small-scale semi-commercial equipment. Data from experimental observations are used to evaluate performance and efficiency of operations. Emphasis on correct presentation of results inreport form.
Prerequisite: CHBE424, CHBE426, and CHBE440.
Restriction: Must be in a major within ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE437 or ENCH437.
Formerly: ENCH437.

CHBE440 Chemical Kinetics and Reactor Design (3 Credits)
Fundamentals of chemical reaction kinetics and their application to the design and operation of chemical reactors. Reaction rate theory, homogeneous reactions and catalysis electrochemical reactions. Catalytic reactor design.
Prerequisite: Minimum grade of C- in CHBE301, MATH241, and MATH246.
Restriction: Must be in Engineering: Chemical program; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE440 or ENCH440.
Formerly: ENCH440.

CHBE442 Chemical and Biomolecular Systems Analysis (3 Credits)
Dynamic response applied to process systems. Goals and modes of control, Laplace transformations, analysis and synthesis of simple control systems, closed loop response, dynamic testing.
Prerequisite: CHBE424 and CHBE426.
Credit Only Granted for: CHBE442 or ENCH442.
Formerly: ENCH442.

CHBE444 Process Engineering Economics and Design I (3 Credits)
Principles of chemical engineering economics and process design. Equipment sizing and costing. Economic evaluation of projects. Flowsheet synthesis. Introduction to flowsheet simulators and concepts of flowsheet optimization. Synthesis of Heat Exchanger Networks and Distillation Sequences.
Prerequisite: CHBE424, CHBE426, and CHBE440.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE444 or ENCH444.
Formerly: ENCH444.

CHBE446 Process Engineering Economics and Design II (3 Credits)
Application of chemical engineering principles for the design of chemical processing equipment. Representative problems in the design of chemical plants will be the focus of this capstone design class. Comprehensive reports are required.
Prerequisite: CHBE442 and CHBE444.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE446 or ENCH446.
Formerly: ENCH446.

CHBE451 Photovoltaics: Solar Energy (3 Credits)
The emphasis of the class is on developing a conceptual understanding of the device physics and manufacturing processes of crystalline and thin-film photovoltaic cells, and to develop elementary computational skills necessary to quantify solar cell efficiency. The class material includes detailed, system-level energy balances necessary to understand how solar energy fits into the complete energy generation, conversion, and storage picture. Quantitative comparisons of PV technology to solar chemical conversion processes and biofuels are made.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE651.
Credit Only Granted for: ENCH468L, CHBE451 or CHBE651.
Formerly: ENCH468L.

CHBE452 Introduction of Machine Learning in Chemical Engineering (3 Credits)
Introduction of data science and machine learning approaches to modern problems in chemical engineering and materials science. This course develops data science approaches, including their foundational mathematical and statistical basis, and applies these methods to data sets of limited size and precision. Methods for regression and clustering will be developed and applied, with an emphasis on validation and error quantification. Techniques that will be developed include linear and nonlinear regression, clustering and logistic regression, dimensionality reduction, unsupervised learning, and artificial neural networks. These methods will be applied to a range of engineering problems, including conducting polymers, stretchable conductors, organic synthesis, and quality control in manufacturing.
Recommended: Basic knowledge of chemical engineering, materials science, ordinary differential equations, and Python is desirable.
Restriction: Permission of Department or Instructor. Jointly offered with: CHBE652.
Credit Only Granted for: CHBE452 or CHBE652.

CHBE453 Applied Mathematics and Distributive Parameter Systems (3 Credits)
Mathematical techniques applied to the analysis and solution of chemical engineering problems. Use of differentiation, integration, differential equations, partial differential equations and integral transforms. Application of infinite series, numerical and statistical methods.
Credit Only Granted for: CHBE453 or ENCH453.
Formerly: ENCH453.

CHBE454 Chemical Process Analysis and Optimization (3 Credits)
Application of mathematical models to the analysis and optimization of chemical processes. Models based on transport, chemical kinetics and other chemical engineering principles will be employed.
Credit Only Granted for: CHBE454 or ENCH454.
Formerly: ENCH454.

CHBE455 Model Predictive Control (3 Credits)
Empirical model identification from process data. Step and impulse response models. Linearization of nonlinear first principles models. Single variable Model Predictive Control. Robustness with respect to modeling error. MPC based tuning of PID controllers. Feedforward control. Multi-input multi-output processes. Multi-loop decentralized control. Centralized multivariable Model Predictive Control via on-line optimization.
Credit Only Granted for: CHBE455 or ENCH455.
Formerly: ENCH455.

CHBE457 Design and Processing of Polymers for Biomedical Devices (3 Credits)
An overview of the design and processing of polymers used in medical applications. Following a discussion of the physical and mechanical properties of polymers, important classes of polymeric biomaterials will be surveyed, discussing material synthesis, processing techniques and equipment, as well as properties and performance in biomedical applications. Topics will include silicone elastomers, hydrogels, ultra-high molecular weight polyethylene, polyurethanes, polyureas, polyesters, degradable and resorbable polymeric biomaterial designs used in surgery and drug delivery, polymers for ophthalmologic and orthopedic applications, and biopolymers such as silks and collagen. Finally, the design of major industrial polymer processing equipment will be covered, and the fundamentals of extrusion, calendering, coating, fiber spinning, film blowing, and injection molding processes will be presented.
Prerequisite: MATH246; and CHEM231; and (CHBE301, ENMA461, or BIOE232).
Recommended: Knowledge of basic fluid dynamics: CHBE422/BIOE331 or equivalent.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: BIOE453, CHBE457, or ENMA425.

CHBE468 Research (1-3 Credits)
Investigation of a research project under the direction of a faculty member. Comprehensive reports are required.
Restriction: Permission of Chemical and Biomolecular Engineering Department; and must be third or fourth year student; and must have minimum GPA of 3.0; and must have successfully completed all lower level engineering, science and mathematics courses for the major.
Repeatable to: 6 credits.
Formerly: ENCH468.

CHBE469 Special Projects (1-3 Credits)
Special project under the direction of a faculty member. Comprehensive reports are required.
Restriction: Permission of Chemical and Biomolecular Engineering Department; and must be third or fourth year student; and must have minimum GPA of 3.0; and must have successfully completed all lower level engineering, science and mathematics courses for the major.
Repeatable to: 6 credits if content differs.

CHBE470 Colloid and Interface Science (3 Credits)
Introduction to colloidal systems and interfacial science. Topics include preparation, stability and coagulation kinetics of colloidal suspensions. Introduction to DLVO theory, electrokinetic phenomena, colloidal aggregation, interfacial phenomena, double layer theory, surface chemistry. Discussion of interfacial thermodynamics and interfacial forces for solid-liquid interfaces. Applications to nanomaterial synthesis, nanomaterial and polymer self-assembly, protein-protein interactions, and protein aggregation will be discussed.
Prerequisite: CHBE424 and CHBE426.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE670.
Credit Only Granted for: ENCH648F, CHBE470 or CHBE670.

CHBE471 Particle Science and Technology (3 Credits)
Particles are everywhere. We breathe them, eat them, and use them to make many non-particulate materials. Knowledge of particle science and technology is important for manufacturing, for occupational health and safety, as well as environmental considerations. In this multidisciplinary course, the focus will be on the study of science and technology relevant to multiphase systems consisting of solid and/or liquid particles surrounded by a gas. These topics fall loosely under the headings of powder and aerosol technology. Team design projects will be an integral component.
Prerequisite: Knowledge of undergraduate engineering thermodynamics, and transport phenomena; knowledge of numerical methods for solving systems of ordinary differential equations.
Restriction: Must be in a major within ENGR-Chemical & Biomolecular Engineering department; or permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE471 or ENCH471.
Formerly: ENCH471.

CHBE472 Control of Air Pollution Sources (3 Credits)
Sources and effects of air pollutants, regulatory trends, atmospheric dispersion models, fundamentals of two-phase flow as applied to air pollution and air pollution control systems, design of systems for control of gases and particulate matter.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE672.
Credit Only Granted for: CHBE472, CHBE672 or ENCH672.

CHBE473 Electrochemical Energy Engineering (3 Credits)
The lecture will start from the basic electrochemical thermodynamics and kinetics, with emphasis on electrochemical techniques, fundamental principle and performance of batteries, and supercapacitors.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE673.
Credit Only Granted for: ENCH468K, CHBE473 or CHBE673.
Formerly: ENCH468K.

CHBE474 Biopharmaceutical Process Development and Manufacturing (3 Credits)
Covers the fundamental steps involved in process development and manufacturing of biopharmaceuticals. An overview of different classes of biopharmaceuticals as well as manufacturing requirements for clinical development and regulatory approval will be provided. In depth coverage of manufacturing steps including cell culture, purification and formulation as well as drug product manufacturing, analysis and stability will be covered. Scientific literature will be used to highlight current challenges and novel solutions in each step of the manufacturing process. Scale up considerations, GMP requirements and process economics will also be introduced.
Prerequisite: BIOE120; and permission of instructor.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE674.
Credit Only Granted for: CHBE474, BIOE489T, ENCH648D or CHBE674.

CHBE475 Ethics in Science and Engineering (3 Credits)
Ethical issues in science and engineering and their resolutions are examined. The main topics will be ethics and scientific truth (including issues of proper data analysis, proper data presentation, and record-keeping), ethics and other scientists and engineers (including issues of attribution, confidentiality, conflicts of interest, mentoring, and inclusion of under-represented groups), ethics and the practice of engineering (including responsibilities of engineers to clients, ecological issues, and conflicts of interest), and ethics and society (including funding priorities, moral issues, and human and animal subjects). Class meetings will be organized around discussions, case studies, and student reports. The course is aimed at postdoctoral students, graduate students and advanced undergraduate students who wish to ponder the important contemporary questions about the ethics of how science and engineering get done.
Credit Only Granted for: CHBE475 or ENCH475.
Formerly: ENCH475.

CHBE476 Molecular Modeling Methods (3 Credits)
Statistical mechanics will be introduced to give the fundamental background for atomic to mesoscale molecular modeling. Classical atomic-level simulations methods (Monte Carlo and Molecular Dynamics) and the procedures to develop intra- and intermolecular potentials will be covered. This course will also discuss the theory and application of coarse-grained molecular simulations, mesoscale simulations and other modern simulation techniques. A broad range of applications will be included throughout the semester, e.g., phase behavior of small molecules, kinetics, and biophysics.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE476.
Credit Only Granted for: ENCH648P, CHBE476 or CHBE676.
Formerly: ENCH468P.

CHBE477 Mesoscopic and Nanoscale Thermodynamics (3 Credits)
Interdisciplinary course primarily for graduate and senior undergraduate students from engineering or science departments. New emerging technologies deal with bio-membrane and gene engineering, microreactor chemistry and microcapsule drug delivery, micro-fluids and porous media, nanoparticles and nanostructures, supercritical fluid extraction and artifical organs. Engineers often design processes where classical thermodynamics may be insufficient, e.g., strongly fluctuating and nanoscale systems, or dissipative systems under conditions far away from equilibrium.
Prerequisite: A prior course in classical thermodynamics.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE477.
Credit Only Granted for: CHBE477, ENCH468Q or CHBE677.
Formerly: ENCH468Q.

CHBE480 Bionanotechnology: Physical Principles (3 Credits)
Physics at nano/micro scales. Biomolecular building blocks. Simplest biomolecular assembly: protein folding. Nanoscale intermolecular interactions important for biology. Protein-ligand binding. Protein higher-order assembly: filaments, networks. Protein filaments and motility. DNA, RNA and their assembly assisted by proteins. Viral capsid assembly. Lipid assembly into micelles, bilayers. Lipid-protein co-assembly in membranes. Lipid and polymer structures useful in medicine. Targeted delivery of drugs, genes by nano/micro structures. Cellular assembly in the eye, in insect wings. Cellular assembly at surfaces: gecko feet, duck feathers. Cellular assembly in the presence of crystals: biomineralization.
Prerequisite: BIOE120; or students who have taken courses with comparable content may contact the department.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE680.
Credit Only Granted for: ENCH648N, CHBE480 or CHBE680.

CHBE481 Transport Phenomena in Small and Biological Systems (3 Credits)
Interdisciplinary course primarily for senior undergraduate and graduate students from engineering or science departments. The course's main goal is to make the students familiar with the fundamental physics and modeling of transport phenomena in small and biological systems, and their current scientific and engineering utilization in microfluidics, nanofluidics and biological systems.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE681.
Credit Only Granted for: ENCH468W, CHBE481 or CHBE681.
Formerly: ENCH468W.
Additional Information: Adding graduate course to jointly offered and credit only granted for fields.

CHBE483 Bioseparations (3 Credits)
Engineering fundamentals of separations and purification of biological molecules. Case studies and examples illustrate principles and practice of centrifugation, precipitation, crystallization, filtration, membrane separations, chromatography, and affinity separation of recombinant proteins and other biomolecules. Process scale-up and economics of biotechnology products and processes.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: ENCH483 or CHBE483.
Formerly: ENCH483.

CHBE484 Metabolic Pathway Engineering (3 Credits)
The state-of-the-art in metabolic engineering, with a focus on the analysis and engineering of metabolic pathways through (chemical) engineering principles, will be covered. Topics covered include: (1) overview of biochemistry and metabolism; (2) metabolic flux analysis and isotope labeling illustrated with examples from the recent scientific literature; (3) technologies for engineering metabolic pathways; (4) metabolic control analysis and pathway regulation; (5) applications of metabolic engineering to synthesis of biofuels and therapeutics; (6) specialized and related subjects such as protein engineering and synthetic biology.
Prerequisite: CHBE101 and CHBE440.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE684.
Credit Only Granted for: ENCH468M, CHBE484 or CHBE684.
Formerly: ENCH468M.

CHBE485 Biochemical Engineering Laboratory (3 Credits)
Techniques of measuring pertinent parameters in fermentation reactors, quantification of production variables for primary and secondary metabolites such as enzymes and antibiotics, the insolubilization of enzymes for reactors, and the demonstration of separation techniques such as ultrafiltration and affinity chromatography.
Credit Only Granted for: CHBE485 or ENCH485.
Formerly: ENCH485.

CHBE486 Heterogeneous Catalysis for Energy Applications (3 Credits)
Introduction to heterogeneous catalytic science and technology for energy conversion and hydocarbon processing. Preparation and mechanistic characterization of catalyst systems, kinetics of catalyzed reactions, adsorption and diffusion influences in heterogenious reactions. An overview of heterogeneous catalysis in various energy-related applications, including petroleum refining, chemicals from biomass, valorization of shale gas, and CO2 utilization will be introduced.
Prerequisite: Minimum grade of C- in CHBE302, CHBE424, and CHBE440; and permission of instructor.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: CHBE486, CHBE686 or ENCH686.

CHBE487 Tissue Engineering (3 Credits)
A review of the fundamental principles involved in the design of engineered tissues and organs. Both biological and engineering fundamentals will be considered.
Prerequisite: Must have completed at least one biology course; and MATH241.
Recommended: BSCI330 and BIOE340.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; or permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: BIOE411, CHBE487, or ENCH468T.
Formerly: ENCH468T.

CHBE490 Polymer Science (3 Credits)
The elements of the polymer chemistry and industrial polymerization, polymer structures and physics, thermodynamics of polymer solutions, polymer processing methods, and engineering applications of polymers.
Credit Only Granted for: CHBE490, ENCH490, or ENMA495.
Formerly: ENCH490.

CHBE493 Chemical Processes in Beer Brewing (3 Credits)
Covers chemical engineering principles and chemical processes involved in the brewing and quality control of beer. Topics will include extraction and isomerization of bittering compounds from hops, enzymatic reactions involved in mashing beer, colloidal chemistry of haze formation, and microbiology of yeast and fermentation. Quantitative models will be applied to these processes based on fundamental chemical engineering principles from reaction kinetics, thermodynamics, transport phenomena, and colloid and interfacial science.
Prerequisite: Minimum grade of C- in CHBE424 and CHBE440; and permission of instructor.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR- & Biomolecular Engineering department.
Credit Only Granted for: CHBE493 or CHBE693.
Additional Information: Neither the students nor the instructor will be making or working with alcoholic beverages in the course.

CHBE494 Sustainable Separations and Carbon Capture (3 Credits)
Provides a comprehensive overview of sustainable separations and carbon dioxide capture using synthetic membranes and sorbents.
Prerequisite: Minimum grade of C- in CHBE424, CHBE426 and CHBE440; and permission of instructor.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and must have permission of ENGR- & Biomolecular Engineering department.
Credit Only Granted for: CHBE494 or CHBE694.

CHBE495 Nanoparticle Aerosol Dynamics and Particle Technology (3 Credits)
NanoParticles (NA) (< 100 nm), and their science and technology play an important role in nature and industry. From air quality standards, nuclear reactor safety, inhalation therapy, workplace exposure, global climate change, to counterterrorism, aerosols play a central role in our environment. On the industrial side, NA plays an integral part of reinforcing fillers, pigments and catalysts, and the new emerging field of nanotechnology, they are the building blocks to new materials, which encompass, electronic, photonic and magnetic devices, and bio and chemical sensors.
Restriction: Must be in a major within the ENGR-Chemical & Biomolecular Engineering department; and permission of ENGR-Chemical & Biomolecular Engineering department.

CHBE496 Polymeric Materials: Structure, Property, and Processing (3 Credits)
An intermediate level treatment of structures of polymers. An introduction to mechanical properties and processing of polymeric materials. Emphasis will be on how to establish the structure-property relationship and on how to achieve such understanding via different characterization methods.
Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department. Cross-listed with: ENMA496.
Credit Only Granted for: ENMA496 or CHBE496.

CHBE497 Protein Engineering (3 Credits)
This course will cover the fundamentals of protein engineering and its applications in medicine, chemical processes, and energy. Topics will include the structure and function of biological molecules, rational design and directed evolution, construction of protein and peptide libraries, protein screening platforms, methods for characterizing structure and function of biological molecules. Scientific literature will be used to highlight key discoveries and current work in protein engineering.
Prerequisite: BIOE120, CHBE302, and CHBE440; and permission of instructor. Jointly offered with: CHBE697.
Credit Only Granted for: CHBE497, BIOE489R, ENCH 648P or CHBE697.

CHBE608 Research in Chemical Engineering (1 Credit)
Students gain experience in research through lab rotations and experience presenting their findings.
Restriction: Must be in the Chemical Engineering Doctoral or Master of Science program.
Repeatable to: 8 credits.

CHBE609 Graduate Seminar (1 Credit)
Seminar in Chemical and Biomolecular Engineering
Repeatable to: 4 credits.

CHBE610 Chemical Engineering Thermodynamics (3 Credits)
Advanced application of the general thermodynamic methods to chemical engineering problems. First and second law consequences; estimation and correlation of thermodynamic properties; phase and chemical reaction equilibria.
Prerequisite: CHBE301; and CHBE302. Or students who have taken courses with comparable content may contact the department.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: ENCH610 or CHBE610.
Formerly: ENCH610.

CHBE620 Methods of Engineering Analysis (3 Credits)
Application of selected mathematical techniques to the analysis and solution of engineering problems; included are the applications of matrices, vectors, tensors, differential equations, integral transforms, and probability methods to such problems as unsteady heat transfer, transient phenomena in mass transfer operations, stagewise processes, chemical reactors, process control, and nuclear reactor physics.
Prerequisite: MATH246 and CHBE250; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: ENCH620 or CHBE620.
Formerly: ENCH620.

CHBE630 Transport Phenomena (3 Credits)
Heat, mass and momentum transfer theory from the viewpoint of the basic transport equations. Steady and unsteady state; laminar and turbulent flow; boundary layer theory, mechanics of turbulent transport; with specific application to complex chemical engineering situations.
Prerequisite: CHBE422; and ENCH424. Or students who have taken courses with comparable content may contact the department.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: ENCH630 or CHBE630.
Formerly: ENCH630.

CHBE640 Advanced Chemical Reaction Kinetics (3 Credits)
The theory and application of chemical reaction kinetics to reactor design. Reaction rate theory; homogeneous batch and flow reactors; fundamentals of catalysis; design of heterogeneous flow reactors.
Prerequisite: CHBE440; or students who have taken courses with comparable content may contact the department.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department.
Credit Only Granted for: ENCH640 or CHBE640.
Formerly: ENCH640.

CHBE648 Special Problems in Chemical Engineering (1-12 Credits)
Research project under the direction of a faculty member.
Repeatable to: 12 credits.
Formerly: ENCH648.

CHBE651 Photovoltaics: Solar Energy (3 Credits)
The emphasis of the class is on developing a conceptual understanding of the device physics and manufacturing processes of crystalline and thin-film photovoltaic cells, and to develop elementary computational skills necessary to quantify solar cell efficiency. The class material includes detailed, system-level energy balances necessary to understand how solar energy fits into the complete energy generation, conversion, and storage picture. Quantitative comparisons of PV technology to solar chemical conversion processes and biofuels are made.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE451.
Credit Only Granted for: CHBE451 or CHBE651.

CHBE652 Introduction of Machine Learning in Chemical Engineering (3 Credits)
Introduction of data science and machine learning approaches to modern problems in chemical engineering and materials science. This course develops data science approaches, including their foundational mathematical and statistical basis, and applies these methods to data sets of limited size and precision. Methods for regression and clustering will be developed and applied, with an emphasis on validation and error quantification. Techniques that will be developed include linear and nonlinear regression, clustering and logistic regression, dimensionality reduction, unsupervised learning, and artificial neural networks. These methods will be applied to a range of engineering problems, including conducting polymers, stretchable conductors, organic synthesis, and quality control in manufacturing.
Recommended: Basic knowledge of chemical engineering, materials science, ordinary differential equations, and Python is desirable.
Restriction: Permission of Department or Instructor. Jointly offered with: CHBE452.
Credit Only Granted for: CHBE452 or CHBE652.

CHBE670 Colloid and Interface Science (3 Credits)
Introduction to colloidal systems and interfacial science. Topics include preparation, stability and coagulation kinetics of colloidal suspensions. Introduction to DLVO theory, electrokinetic phenomena, colloidal aggregation, interfacial phenomena, double layer theory, surface chemistry. Discussion of interfacial thermodynamics and interfacial forces for solid-liquid interfaces. Applications to nanomaterial synthesis, nanomaterial and polymer self-assembly, protein-protein interactions, and protein aggregation will be discussed.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE470.
Credit Only Granted for: ENCH648F, CHBE470 or CHBE670.
Formerly: ENCH648F.

CHBE672 Control of Air Pollution Sources (3 Credits)
Sources and effects of air pollutants, regulatory trends, atmospheric dispersion models, fundamentals of two-phase flow as applied to air pollution and air pollution control systems, design of systems for control of gases and particulate matter.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE472.
Credit Only Granted for: CHBE472 or CHBE672.

CHBE673 Electrochemical Energy Engineering (3 Credits)
Basic electrochemical thermodynamics and kinetics, with emphasis on electrochemical techniques, fundamental principle and performance of batteries, and supercapacitors.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE473.
Credit Only Granted for: CHBE473 or CHBE673.

CHBE674 Biopharmaceutical Process Development and Manufacturing (3 Credits)
Covers the fundamental steps involved in process development and manufacturing of biopharmaceuticals. An overview of different classes of biopharmaceuticals as well as manufacturing requirements for clinical development and regulatory approval will be provided. In depth coverage of manufacturing steps including cell culture, purification and formulation as well as drug product manufacturing, analysis and stability will be covered. Scientific literature will be used to highlight current challenges and novel solutions in each step of the manufacturing process. Scale up considerations, GMP requirements and process economics will also be introduced.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE474.
Credit Only Granted for: CHBE474, BIOE489T, ENCH648D or CHBE674.
Formerly: ENCH648D.

CHBE676 Molecular Modeling Methods (3 Credits)
Statistical mechanics will be introduced to give the fundamental background for atomic to mesoscale molecular modeling. Classical atomic-level simulations methods (Monte Carlo and Molecular Dynamics) and the procedures to develop intra- and intermolecular potentials will be covered. This course will also discuss the theory and application of coarse-grained molecular simulations, mesoscale simulations and other modern simulation techniques. A broad range of applications will be included throughout the semester, e.g., phase behavior of small molecules, kinetics, and biophysics.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE476.
Credit Only Granted for: CHBE476 or CHBE676.

CHBE677 Mesoscopic and Nanoscale Thermodynamics (3 Credits)
New emerging technologies deal with bio-membrane and gene engineering, microreactor chemistry and microcapsule drug delivery, micro-fluids and porous media, nanoparticles and nanostructures, supercritical fluid extraction and artificial organs. Engineers often design processes where classical thermodynamics may be insufficient, e.g., strongly fluctuating and nanoscale systems, or dissipative systems under conditions far away from equilibrium.
Prerequisite: A prior course in classical thermodynamics.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE477.
Credit Only Granted for: CHBE477 or CHBE677.

CHBE680 Bionanotechnology: Physical Principles (3 Credits)
Physics at nano/micro scales. Biomolecular building blocks. Simplest biomolecular assembly: protein folding. Nanoscale intermolecular interactions important in biology. Protein-ligand binding. Protein higher-order assembly: filaments, networks. Protein filaments and motility. DNA, RNA and their assembly assisted by proteins. Viral capsid assembly. Lipid assembly into micelles, bilayers. Lipid-protein co-assembly in membranes. Lipid and polymer-based carriers useful in medicine. Antimicrobial therapies. Targeted cancer therapy. Ideal properties of nanocarriers in terms of size, charge, and surface chemistry.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE480.
Credit Only Granted for: ENCH648N, CHBE480 or CHBE680.
Formerly: ENCH648N.

CHBE681 Transport Phenomena in Small and Biological Systems (3 Credits)
Familiarize students with the fundamental physics and modeling of transport phenomena in small and biological systems, and their current scientific and engineering utilization in microfluidics, nanofluidics and biological systems.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE481.
Credit Only Granted for: CHBE481 or CHBE681.

CHBE684 Metabolic Pathway Engineering (3 Credits)
A focus on the analysis and engineering of metabolic pathways through (chemical) engineering principles, will be covered. Topics covered include: overview of biochemistry and metabolism; metabolic flux analysis and isotope labeling illustrated with examples from the recent scientific literature; technologies for engineering metabolic pathways; metabolic control analysis and pathway regulation; applications of metabolic engineering to synthesis of biofuels and therapeutics; specialized and related subjects such as protein engineering and synthetic biology.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE484.
Credit Only Granted for: CHBE484 or CHBE684.

CHBE686 Advanced Heterogeneous Catalysis for Energy Applications (3 Credits)
Introduction to heterogeneous catalytic science and technology for energy conversion and hydocarbon processing. Preparation and mechanistic characterization of catalyst systems, kinetics of catalyzed reactions, adsorption and diffusion influences in heterogenious reactions. An overview of heterogeneous catalysis in various energy-related applications, including petroleum refining, chemicals from biomass, valorization of shale gas, and CO2 utilization will be introduced.
Prerequisite: Minimum grade of C- in CHBE302, CHBE424, and CHBE440; and permission of instructor.
Restriction: Permission of instructor. Jointly offered with: CHBE486.
Credit Only Granted for: CHBE486, ENCH686 or CHBE686.
Formerly: ENCH686.

CHBE690 Polymer Reaction Engineering (3 Credits)
Advanced topics in polymerization kinetics, reactor design and analysis; addition and step-growth polymerization; homogeneous and heterogeneous polymerization; photopolymerization; reactor dynamics; optimal operation and control of industrial polymerization reactors.
Prerequisite: ENCH640; or permission of instructor.
Credit Only Granted for: ENCH781 or CHBE690.
Formerly: ENCH781.

CHBE697 Protein Engineering (3 Credits)
Covers the fundamentals of protein engineering and its applications in medicine, chemical processes, and energy. Topics will include the structure and function of biological molecules, rational design and directed evolution, construction of protein and peptide libraries, protein screening platforms, methods for characterizing structure and function of biological molecules. Scientific literature will be used to highlight key discoveries and current work in protein engineering.
Restriction: Permission of ENGR-Chemical & Biomolecular Engineering department. Jointly offered with: CHBE497.
Credit Only Granted for: CHBE497, BIOE489R, ENCH 648P or CHBE697.
Formerly: ENCH648P.

CHBE799 Master's Thesis Research (1-6 Credits)
Repeatable to: 18 credits.

CHBE898 Pre-Candidacy Research (1-8 Credits)
Repeatable to: 18 credits.

CHBE899 Doctoral Dissertation Research (1-8 Credits)
Repeatable to: 18 credits.

CHEM - Chemistry

CHEM401 Inorganic Chemistry (3 Credits)
An overview of basic concepts of the electronic structure of the elements, chemical bonding and reactivity, from simple diatomic molecules to coordination compounds. These are viewed from simple (Lewis) to the most comprehensive molecular orbital theory. Symmetry and group theory are used throughout the course.
Prerequisite: CHEM276 or CHEM271; and (CHEM247 or CHEM241).

CHEM403 Radiochemistry (3 Credits)
Radioactive decay; introduction to properties of atomic nuclei; nuclear processes in cosmology; chemical, biomedical and environmental applications of radioactivity; nuclear processes as chemical tools; interaction of radiation with matter.
Prerequisite: Must have completed one year of college chemistry and one year of college physics.

CHEM425 Instrumental Methods of Analysis (4 Credits)
Modern instrumentation in analytical chemistry. Electronics, spectroscopy, chromatography and electrochemistry.
Prerequisite: CHEM272 and CHEM271; or (CHEM276 and CHEM277).

CHEM441 Advanced Organic Chemistry (3 Credits)
An advanced study of the compounds of carbon, with special emphasis on molecular orbital theory and organic reaction mechanisms.
Prerequisite: Must have completed or be concurrently enrolled in CHEM481; and 1 course with a minimum grade of C- from (CHEM241, CHEM247). Jointly offered with CHEM641.

CHEM460 Structure Determination Using Spectroscopic Methods (3 Credits)
The use of infrared, ultraviolet-visible, proton and carbon-13 nuclear magnetic resonance and mass spectroscopy for structure determination in organic chemistry.
Prerequisite: Must have completed CHEM243; or CHEM247; or (CHEM241 and CHEM242).
Formerly: CHEM660.

CHEM471 Techniques in Pulse NMR (1 Credit)
NMR techniques to operate, adjust, and calibrate the spectrometers and acquire and process NMR data in one and two dimensional NMR applications.
Prerequisite: CHEM241 and CHEM242; or CHEM247.
Recommended: CHEM460.
Restriction: Senior standing or higher.
Additional Information: Persons with heart pacemakers and/or metal implants cannot take the course due to potential health hazards.

CHEM474 Environmental Chemistry (3 Credits)
The sources of various elements and chemical reactions between them in the atmosphere and hydrosphere are treated. Causes and biological effects of air and water pollution by certain elements are discussed.
Prerequisite: CHEM481.

CHEM480 Principles of Physical Chemistry (3 Credits)
Covers elementary thermodynamics, principles of kinetics and catalysis and selected topics in molecular quantum mechanics, spectroscopy and statistical mechanics. Topics will emphasize core subjects along with applications to biosciences, materials science, environmental science and related areas.
Prerequisite: (CHEM276 or CHEM271); and (CHEM277 or CHEM272); and (MATH141 or MATH136); and (PHYS260 and PHYS261) or PHYS132.

CHEM481 Physical Chemistry I (3 Credits)
Thermodynamics and kinetics of chemical and molecular systems. Topics may include internal energy, heat, work, enthalpy, entropy, free energy, and spontaneity as well as reaction order, differential rate laws, integrated rate laws, and rate laws for multi-step processes.
Prerequisite: Minimum grade of C- in CHEM135; or minimum grade of C- in CHEM271 and CHEM272; or minimum grade of C- in CHEM276 and CHEM277. And minimum grade of C- in MATH141. And minimum grade of C- in PHYS260 and PHYS261; or minimum grade of C- in PHYS141.

CHEM482 Physical Chemistry II (3 Credits)
Quantum mechanical nature of atoms and molecules. Topics may include model systems for electronic, vibrational, rotational and translational energies as well as connections to molecular spectroscopy and thermal distributions.
Prerequisite: Minimum grade of C- in CHEM135; or minimum grade of C- in CHEM271 and CHEM272; or minimum grade of C- in CHEM276 and CHEM277. And minimum grade of C- in MATH141. And minimum grade of C- in PHYS260 and PHYS261; or minimum grade of C- in PHYS141.
Credit Only Granted for: CHEM482 or BCHM485.

CHEM483 Physical Chemistry Laboratory I (2 Credits)
An introduction to the principles and application of quantitative techniques in physical chemical measurements. Experiments will be coordinated with topics in CHEM481.
Prerequisite: Must have completed or be concurrently enrolled in CHEM481.

CHEM484 Physical Chemistry Laboratory II (2 Credits)
A continuation of CHEM 483. Advanced quantitative techniques necessary in physical chemical measurements. Experiments will be coordinated with topics in CHEM 482.
Prerequisite: CHEM481 and CHEM483; and must have completed or be concurrently enrolled in CHEM482.

CHEM498 Special Topics in Chemistry (3 Credits)
Prerequisite: Prerequisite varies with the nature of the topic being considered.

CHEM601 Structure and Bonding of Molecules and Materials (3 Credits)
Development of the tools necessary to use the knowledge of structure and bonding of molecules and solids in the practice of synthetic inorganic and materials chemistry. Several bonding models are covered, from the simple valence bond and ligand field models to a quantitative group theoretical treatment of molecular orbital theory and band structure descriptions of solids. Concepts of electron counting and oxidation state and ligand characteristics are revisited in terms of the more sophisticated bonding models. Finally, these models are used to analyze the reactivity, magnetic and spectroscopic properties of inorganic coordination compounds. Prior advanced inorganic and/or advanced quantum chemistry courses are not prerequisites.

CHEM602 Advanced Inorganic Chemistry II (3 Credits)
A continuation of CHEM 601 with emphasis on the application of contemporary spectroscopic techniques to inorganic problems.
Prerequisite: CHEM601; or permission of instructor.

CHEM608 Selected Topics in Inorganic Chemistry (1-3 Credits)
Topics of special interest and current importance.
Prerequisite: CHEM602 and CHEM601; or students who have taken courses with comparable content may contact the department.
Repeatable to: 6 credits if content differs.

CHEM611 Professional Skills for New Graduate Students (1 Credit)
Covers a wide range of topics in professional development for new graduate students.
Restriction: Must be in one of the following programs (Chemistry (Master's); Biochemistry (Master's); Biochemistry (Doctoral); Chemistry (Doctoral)) ; and must be a new graduate student.

CHEM612 Scientific Presentations (1 Credit)
Workshops will cover all aspects of giving scientific presentations. Each student will give a presentation based oon the topic of his/her final paper in CHEM611. Presentations will be critiqued by peers and faculty members.
Prerequisite: CHEM611.

CHEM623 Optical Methods of Quantitative Analysis (3 Credits)
The quantitative applications of various methods of optical spectroscopy.
Prerequisite: CHEM482; or students who have taken courses with comparable content may contact the department.

CHEM624 Electrical Methods of Quantitative Analysis (3 Credits)
The use of conductivity, potentiometry, polarography, voltammetry, amperometry, coulometry, and chronopotentiometry in quantitative analysis.
Prerequisite: CHEM482; or students who have taken courses with comparable content may contact the department.

CHEM625 Separation Methods in Quantitative Analysis (3 Credits)
The theory and application for quantitative analysis of various forms of chromatography, ion exchange, solvent extraction, distillation, and mass spectroscopy.
Prerequisite: CHEM482; or students who have taken courses with comparable content may contact the department.

CHEM633 Atmospheric Chemistry and Climate (3 Credits)
The effects of human activity on atmospheric composition, focused on global warming, the carbon cycle, air pollution, and the ozone layer. Fundamentals of atmosphereic chemistry (spectroscopy, kinetics, isotopic analysis, and biogeochemical cycles) are related to the modern understanding of climate change, air quality, and ozone depletion, based on resources such as satellite missions, field campaigns, and scientific assessments published by international agencies. We also examine how society's energy needs could be met, in the future, in a manner with less impact on atmospheric composition than the present heavy reliance on combusion of fossil fuels.
Prerequisite: CHEM131, CHEM135, or CHEM146. Cross-listed with: AOSC633.
Credit Only Granted for: AOSC433, AOSC633, CHEM433, or CHEM633.

CHEM640 Problems in Organic Reaction Mechanisms (1 Credit)
A tutorial type course dealing with the basic description of the fundamentals of writing organic reaction mechanisms.

CHEM641 Organic Reaction Mechanisms (3 Credits)
Jointly offered with CHEM441.

CHEM647 Organic Synthesis (3 Credits)
The use of new reagents in organic reactions; multistep syntheses leading to natural products of biological interest; stereospecific and regiospecific reactions and their use in total synthesis.

CHEM648 Special Topics in Organic Chemistry (1-3 Credits)
Topics of special interest and current importance.
Repeatable to: 9 credits if content differs.

CHEM650 Problems in Organic Synthesis (1 Credit)
A tutorial type course dealing with mechanistic problems from the current literature of organic sysnthesis.

CHEM678 Special Topics in Environmental Chemistry (3 Credits)
In-depth treatment of environmental chemistry problem areas of current research interest. The topics will vary somewhat from year to year.
Prerequisite: CHEM474.
Repeatable to: 6 credits if content differs.

CHEM682 Chemical Kinetics and Dynamics (3 Credits)
The dynamics of atoms and molecules as they undergo chemical and physical change. Topics will be developed from a fundamental perspective and modern applications will be discussed. Topics include: chemical kinetics rate equations, atomic and molecular collisions; rate theories; atomic, molecular and chemical lasers; control of matter with light.
Prerequisite: CHEM482; or permission of instructor.
Restriction: Restricted to graduate students or advanced undergraduates with prerequisites.

CHEM684 Chemical Thermodynamics (3 Credits)
Prerequisite: CHEM482; or students who have taken courses with comparable content may contact the department.

CHEM687 Statistical Mechanics and Chemistry (3 Credits)
Prerequisite: CHEM684; or students who have taken courses with comparable content may contact the department.

CHEM688 Selected Topics in Physical Chemistry (2 Credits)
Repeatable to: 6 credits if content differs.

CHEM689 Special Topics in Physical Chemistry (3 Credits)
Repeatable to: 9 credits if content differs.

CHEM690 Quantum Chemistry I (3 Credits)

CHEM691 Quantum Chemistry II (3 Credits)
Prerequisite: CHEM690 or PHYS622.

CHEM698 Literature Seminar in Chemistry (1 Credit)
Students will prepare and present a departmental seminar baseed on a topic in the current research literature.
Restriction: Must be in a major within CMNS-Chemistry & Biochemistry department.

CHEM699 Special Problems in Chemistry (1-6 Credits)
Laboratory experience in a research environment.
Prerequisite: One semester of graduate study in chemistry.
Restriction: Restricted to students in the non-thesis M.S. option.
Repeatable to: 6 credits.

CHEM703 Introduction to Nonequilibrium Statistical Physics (3 Credits)
Analysis and microscopic modeling of systems away from thermal equilibrium. Linear response theory, ergodicity, Brownian motion, Monte Carlo modeling, thermal ratchets, far-from-equilibrium fluctuation relations. Introduction to the theoretical tools of nonequilibrium phenomena and their application to problems in physics, chemistry and biology.
Prerequisite: PHYS603 or CHEM687; or permission of instructor. Cross-listed with: CHPH703, PHYS703.
Credit Only Granted for: CHEM703, CHPH703, or PHYS703.

CHEM705 Nuclear Chemistry (3 Credits)
Nuclear structure models, radioactive decay processes, nuclear reactions in complex nuclei, fission, nucleosynthesis and nuclear particle accelerators.

CHEM729 Special Topics in Geochemistry (1-3 Credits)
A discussion of current research problems.
Repeatable to: 6 credits if content differs.

CHEM799 Master's Thesis Research (1-6 Credits)

CHEM889 Seminar (1 Credit)

CHEM898 Pre-Candidacy Research (1-8 Credits)

CHEM899 Doctoral Dissertation Research (1-8 Credits)

CHIN - Chinese

CHIN401 Readings in Modern Chinese I (3 Credits)
Readings in history, politics, economics, sociology, and literature. Emphasis on wide-ranging, rapid reading, reinforced by conversations and compositions.
Prerequisite: CHIN302; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN402 Readings in Modern Chinese II (3 Credits)
Continuation of CHIN401.
Prerequisite: CHIN401; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN403 Classical Chinese I (3 Credits)
Close readings and discussion of literary, philosophical and historical texts in the original language. The course situates texts in their historical context and also discusses differences between classical and modern Chinese.
Prerequisite: CHIN302 or CHIN306; or permission of instructor.
Additional Information: Texts in Chinese. Class discussion and course work mainly in English.

CHIN408 Selected Readings in Classical Chinese (3 Credits)
Selected readings in Classical Chinese, including important representative works of history, poetry, and parallel prose. Close attention is paid to matters of grammar and phonology in the readings. Content will differ each time this course is offered.
Prerequisite: CHIN321; and must have knowledge of Pinyin.
Repeatable to: 9 credits if content differs.

CHIN411 Business Chinese I (3 Credits)
Conversation, reading, and writing applicable to Chinese business transactions, social meetings, and meetings with government organizations, plus background material in English on professional business practices and social customs associated with business.
Prerequisite: CHIN402; or permission of ARHU-School of Languages, Literatures, and Cultures department. And must have taken a placement interview offered by the department for Non-majors.

CHIN415 Readings in Current Newspapers and Periodicals (3 Credits)
Reading of periodical literature on selected topics with discussions and essays in Chinese.
Prerequisite: CHIN402; or students who have taken courses with comparable content may contact the department. And must have taken a placement interview offered by the department for Non-majors.

CHIN418 Special Topics in Contemporary Chinese Fiction and Film (3 Credits)
Various approaches to the most recent textual productions of China and Taiwan. Taught in Chinese.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Repeatable to: 12 credits if content differs.

CHIN425 Ethnic and Cultural Diversity in China (3 Credits)
This course looks into ethnic and cultural diversity in China. It examines the evolution of the People's Republic of China's (PRC) ethnic policies in relation to nation-state building over the last six decades. Specifically, it studies how the PRC has categorized the Chinese people into 56 ethnic groups, how it has made affirmative action policies to accommodate ethnic diversity, and what problems its approaches have experienced and what solutions it has proposed in its accommodation of ethnicity and diversity in the 21st century. To examine the above issues, the course introduces and applies the concepts of ethnicity, nationality, ethnic nationalism, civic nationalism, identity, social Darwinism, the Soviet model of multinational state building, the Chinese model of inclusive Chinese nation state building, citizenship, individual rights, group rights, equality, and diversity.
Recommended: Any CHIN course or course on China.
Credit Only Granted for: CHIN425 or CHIN429G.
Formerly: CHIN429G.

CHIN428 Selected Topics in Chinese Linguistics (3 Credits)
Undergraduate seminar in Chinese linguistics. Topics may include the ancient writing system, historical phonology, dialectology, prosody and rhyming, grammar and the history of the language as a whole. This course may be repeated with different content, and satisfies the linguistics requirement for the Chinese major. Students are expected to be in at least Third Year Chinese. Taught in English.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.
Restriction: Sophomore standing or higher.
Repeatable to: 12 credits if content differs.

CHIN429 Selected Topics in Chinese Studies (3 Credits)
In-depth study of a particular aspect of Chinese cultural, linguistic, literary studies. Specific topic to be announced when course is offered. Taught in English.
Prerequisite: CHIN315.
Repeatable to: 6 credits if content differs.

CHIN441 Traditional Chinese Fiction (3 Credits)
Major works of fiction from the 4th century tales of the marvelous through the 19th century Qing novel. Readings are in classical Chinese and English. Designed for students with advanced language skills. Taught in English.
Prerequisite: Permission of ARHU-School of Languages, Literatures, and Cultures department.

CHIN443 Cultural Histories of Medicine in China (3 Credits)
Investigates medical knowledge through traditional Chinese approaches to the body and beliefs about healing, including acupuncture, herbal medicine, prayer, ritual and folk medicine. Taught in English.
Restriction: Permission of department, School of Languages, Literatures and Cultures.

CHIN499 Directed Study in Chinese (1-3 Credits)
Readings in Chinese under faculty supervision.
Prerequisite: Permission of instructor.
Repeatable to: 6 credits if content differs.

CHIN602 The Language of Contemporary Chinese Audio Media (3 Credits)
Oral Chinese non-fiction in the high diglossic register, with emphasis on contextually and culturally appropriate interpretation of lexicon, style, and idiom. Conducted entirely in Chinese, intended for non-native speakers of the language pursuing professional levels of competence.
Prerequisite: Must have taken a placement test offered by the department.

CHIN603 The Language of Contemporary Chinese Written Fiction (3 Credits)
Chinese fiction writing, with emphasis on contextually and culturally appropriate interpretation of lexicon, style, and idiom in various genres. Conducted entirely in Chinese; intended for non-native speakers of the language pursuing professional levels of competence.
Prerequisite: Must have taken a placement test offered by the department.

CHIN611 Structure of the Chinese Language (3 Credits)
An overview of the basic linguistic characteristics of modern standard (Mandarin) Chinese, including phonology, morphology and syntax. Emphasis on the analysis of functional linguistic models and the development of student skills in critically appraising existing interpretations of Chinese language structure.

CHIN621 Chinese Historical Linguistics (3 Credits)
An introduction to the origin and development of the Chinese language, and its relationship to other languages.

CHPH - Chemical Physics

CHPH618 Special Projects in Chemical Physics (1-3 Credits)
Independent reading and study covering chemical physics subject areas not available in other courses.
Restriction: Permission of instructor.
Repeatable to: 6 credits.

CHPH703 Introduction to Nonequilibrium Statistical Physics (3 Credits)
Analysis and microscopic modeling of systems away from thermal equilibrium. Linear response theory, ergodicity, Brownian motion, Monte Carlo modeling, thermal ratchets, far-from-equilibrium fluctuation relations. Introduction to the theoretical tools of nonequilibrium phenomena and their application to problems in physics, chemistry and biology.
Prerequisite: PHYS603 or CHEM687; or permission of instructor. Cross-listed with: CHEM703, PHYS703.
Credit Only Granted for: CHEM703, CHPH703, or PHYS703.

CHPH707 Advanced Laboratory - Photon Correlation Spectroscopy of Soft Matter (3-4 Credits)
The course is based at the Photon Correlation Spectroscopy facility, also known as Dynamic Light Scattering (DLS). The DLS has three state-of-the-art instruments for the characterization of nano-and meso-scale heterogeneities in soft-matter materials, such as nanoparticles, polymers, protein molecules in solution, gels, and microemulsions.

CHPH709 Seminar in Chemical Physics (1 Credit)
Current research and developments in chemical physics.

CHPH718 Special Topics in Chemical Physics (1-3 Credits)
A discussion of current research problems in chemical physics.
Repeatable to: 99 credits if content differs.

CHPH799 Master's Thesis Research (1-6 Credits)

CHPH898 Pre-Candidacy Research (1-8 Credits)

CHPH899 Doctoral Dissertation Research (1-8 Credits)

CLAS - Classics

CLAS409 Classics Capstone Seminar (3 Credits)
Comparative study of selected central aspects of both ancient Greek and Roman cultures as viewed from the standpoints of literary study, history, art history, and other fields as appropriate. Seminar format involving intensive student research.
Restriction: Permission of ARHU-Classics department.
Repeatable to: 6 credits if content differs.

CLAS419 The Classical Tradition (3 Credits)
Examination of the role of Greek and Roman civilization in shaping the arts and ideas of western culture.
Repeatable to: 9 credits if content differs.
Credit Only Granted for: CLAS419 or CLAS420.
Formerly: CLAS420.

CLAS470 Approaches to Greek Mythology (3 Credits)
Ancient and modern approaches to understanding Greek myth as expression of human experience, including interpretations drawn from psychology, anthropology, and comparative mythology.
Prerequisite: CLAS170; or permission of ARHU-Classics department.

CLAS488 Independent Study in Classical Civilization (3 Credits)
Prerequisite: Permission of ARHU-Classics department.
Repeatable to: 6 credits if content differs.

CLAS499 Independent Study in Classical Languages and Literatures (1-3 Credits)
Prerequisite: Permission of ARHU-Classics department.

CLAS621 The Classical Tradition (3 Credits)
The role the classics have played in western thought, with particular attention to literature.

CLAS688 Special Topics in Classical Civilization (3 Credits)
Repeatable to: 9 credits if content differs.

CLAS699 Independent Study in Classical Civilization (1-3 Credits)
Restriction: Permission of instructor.
Repeatable to: 6 credits if content differs.

CLAS799 Master's Thesis Research (1-6 Credits)

CLFS - Chemical and Life Sciences

CLFS608 Seminar in Current Topics in Chemical and Life Science (1-4 Credits)
Seminar in current topics in the Life Sciences. Contact Program Director or instructor before registering.
Restriction: Must be in Master of Chemical & Life Sciences (Master's) program; and permission of CMNS-Chemical & Life Sciences department.
Repeatable to: 6 credits if content differs.
Formerly: LFSC608.

CLFS609 Special Topics (1-3 Credits)
Individual instruction course. Contact Program Director or instructor before registering.
Prerequisite: Two years of teaching experience; and CLFS510.
Restriction: Must be in Master of Chemical & Life Sciences (Master's) program; and permission of CMNS-Chemical & Life Sciences department.
Repeatable to: 6 credits if content differs.
Formerly: LFSC609.

CLFS610 Natural Products Chemistry (3 Credits)
Foundations of natural products chemistry; how nature goes about making (biosynthesizing) these compounds and elements of enzymology and genomics relevant to production of these compounds; relevance of natural products chemistry as a driving force for drug discovery and innovation in biotechnology.
Restriction: Permission of CMNS-Chemical & Life Sciences department.
Credit Only Granted for: LFSC609D or LFSC610.
Formerly: LFSC609D.

CLFS619 Special Topics in Chemistry (1-3 Credits)
Topics of current interest and special importance.
Repeatable to: 9 credits if content differs.
Formerly: LFSC619.

CLFS620 Modern Molecular Genetics (3 Credits)
An overview of genetics including the genetic basis/components in prevalent diseases, genetically engineered organisms and foods, the importance of knowing the complete DNA sequence of organisms.

CLFS630 Principles of Transmission Genetics: A Historical and Modern Perspective (3 Credits)
Examines the origins of modern genetics, model genetic systems, and the role of chromosomes in vertical transmission of genetic information from parent to offspring. Classical gene mapping, population genetics and the various applications of modern genetics will also be studied.

CLFS640 Human Physiology (3 Credits)
Examination of the major organ system of the human body and of the neural and hormonal mechanisms responsible for their regulation and control.
Prerequisite: Two years of teaching experience; and CLFS510.
Restriction: Must be in Master of Chemical & Life Sciences (Master's) program; and permission of CMNS-Chemical & Life Sciences department.

CLFS655 The Chemistry and Applications of Electrochemical Cells (3 Credits)
Chemistry of electrochemical cells including the thermodynamic basis for the production of electrical energy by cells, the chemical reactions utilized by the most common cells, the manufacture of cells, and the application of cells in energy production.

CLFS660 Biodiversity and Conservation Biology (3 Credits)
Application of ecological and evolutionary principles to assess the impact of the human species on the environment and its inhabitants. Specific case studies are included to illustrate problems of bidiversityloss and actions required to reverse the trends.

CLFS665 Ecology and Global Change (3 Credits)
Ecological concepts across scales ranging from the individual, to populations, communities, ecosystems, and landscapes will be presented. Global change issues will encompass alteration of atmospheric trace gases, biogeochemistry cycles, land use changes, and introduction of non-native species to new habitats.
Credit Only Granted for: LFSC609C or LFSC665.
Formerly: LFSC609C.

CLFS680 Chemical Ecology (3 Credits)
An examination of the utilization of organic natural products by plants and animals for various life processes. Examples will include how materials are utilized for sexual selection, defense against predators, sexual attractants, and as natural herbicides and repellants.

CLFS690 Biochemistry (3 Credits)
An advanced overview of general biochemistry including a study of protein structure and their physical properties; how these properties relate to catalysis, regulation of catalysis and metabolic chemistry with respect to their relationship to physiological conditions.

CLFS710 Experimental Biology (6 Credits)
Participants develop skills in four areas of biological research while investigating a variety of biological systems. Those areas include: (1) iterative scientific methods, (2) basic laboratory techniques, (3) experimental design and analysis, and (4) critical evaluation of published research.
Formerly: LFSC710.

CLFS725 Experimental Design (2 Credits)
Experimental design and statistics for science teachers that emphasizes the underlying structure of data and how this affects the quality and reliability of experiments. Examines the nature of data, the methods for designing rigorous experiments, important experimental design formats, and the relationships between data structure and analysis. Course work focuses on the design and analysis of orginal experiments for a series of research problems.
Credit Only Granted for: LFSC710, LFSC719, or LFSC725.
Formerly: LFSC719.

500-level courses

CLFS510 Concepts of Modern Biology (3 Credits)
Discussion of recent advancements in the biological sciences. Includes in depth treatment of the background information responsible for the advancements. Not acceptable for credit towards a degree.
Prerequisite: Permission of CMNS-Chemical & Life Sciences department.

CLFS520 Concepts of Modern Chemistry (3 Credits)
Basic concepts and recent advances in the chemical sciences. It is designed to be a review of the first two years of college chemistry for the student persuing the Master of Life Science degree with a concentration in chemistry. Also includes material preparatory for LFSC courses such as LFSC 690 and LFSC 655. A basic text supplemented by on line text, problems and links. (Not acceptable for credit towards a degree).

CMLT - Comparative Literature

CMLT469 The Continental Novel (3 Credits)
The novel in translation from Stendhal through the existentialists, selected from literatures of France, Germany, Italy, Russia, and Spain.

CMLT479 Major Contemporary Authors (3 Credits)

CMLT488 Genres (3 Credits)
A study of a recognized literary form, such as tragedy, film, satire, literary criticism, comedy, tragicomedy, etc.
Repeatable to: 6 credits if content differs.

CMLT489 Major Writers (3 Credits)
Each semester two major writers from different cultures and languages will be studied. Authors will be chosen on the basis of significant relationships of cultural and aesthetic contexts, analogies between their respective works, and the importance of each writer to his literary tradition.

CMLT498 Selected Topics in Comparative Studies (3 Credits)

CMLT639 Studies in the Renaissance (3 Credits)
Repeatable to: 9 credits.

CMLT649 Studies in Eighteenth Century Literature (3 Credits)
Studies in eighteenth century literature: as announced.
Repeatable to: 9 credits.

CMLT658 Studies in Romanticism (3 Credits)
Studies in romanticism: as announced.
Repeatable to: 9 credits.

CMLT679 Topics in Comparative Studies (3 Credits)
Seminar in modern and contemporary literature: as announced.
Repeatable to: 9 credits.

CMLT699 Independent Study (1-6 Credits)
Research and writing on specific readings on a topic selected by the student which is approved and supervised by a faculty member.
Restriction: Permission of instructor.
Repeatable to: 9 credits if content differs.

CMLT702 Cultures of Theory (3 Credits)
An exploration of the socio-historic, material, and cultural contexts of various theoretical practices and traditions.
Prerequisite: Must have completed an introductory course in critical theory. Cross-listed with: ENGL702.
Credit Only Granted for: CMLT702 or ENGL702.

CMLT788 Practicum in Comparative Studies (1-6 Credits)
Practical professional training for individuals and groups of students in supervised settings.
Prerequisite: Permission of ARHU-English department.
Repeatable to: 20 credits if content differs.

CMLT799 Master's Thesis Research (1-6 Credits)

CMLT898 Pre-Candidacy Research (1-8 Credits)

CMLT899 Doctoral Dissertation Research (1-8 Credits)

CMSC - Computer Science

CMSC401 Algorithms for Geospatial Computing (3 Credits)
An introduction to fundamental geospatial objects and geometric algorithms for spatio-temporal data processing and analysis. Point data representation and analysis: spatial data models and data structures, algorithms for spatial queries, point clustering algorithms. Surface and scalar field modeling, such as terrains: raster and triangle-based models (TINs), algorithms for building and querying TINs. Algorithms for natural and urban terrain analysis: morphology computation and visibility analysis. Applications to processing and analysis of LiDAR (Light Detection And Ranging) data in the context of terrain reconstruction, urban modeling, forest management and bathymetry reconstruction for coastal data management. Road network computation and analysis: algorithms for route computation in road networks, and for road network reconstruction from GPS and satellite data.
Prerequisite: GEOG276; or a minimum grade of C- in CMSC330 and CMSC351; or permission of instructor. Cross-listed with: GEOG470. Jointly offered with: GEOG770.
Credit Only Granted for: CMSC498Q, CMSC401, CMSC788I, GEOG470, GEOG498I, GEOG770, or GEOG788I.
Formerly: GEOG498I.

CMSC411 Computer Systems Architecture (3 Credits)
Input/output processors and techniques. Intra-system communication, buses, caches. Addressing and memory hierarchies. Microprogramming, parallelism, and pipelining.
Prerequisite: Minimum grade of C- in CMSC330; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.
Restriction: Permission of CMNS-Computer Science department.
Credit Only Granted for: ENEE446 or CMSC411.

CMSC412 Operating Systems (4 Credits)
A hands-on introduction to operating systems, including topics in: multiprogramming, communication and synchronization, memory management, IO subsystems, and resource scheduling polices. The laboratory component consists of constructing a small kernel, including functions for device IO, multi-tasking, and memory management.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and 1 course with a minimum grade of C- from (CMSC414, CMSC417, CMSC420, CMSC430, CMSC433, CMSC435, ENEE440, ENEE457).
Restriction: Permission of CMNS-Computer Science department; or must be in one of the following programs (Computer Science (Master's); Computer Science (Doctoral)).
Credit Only Granted for: CMSC412 or ENEE447.

CMSC414 Computer and Network Security (3 Credits)
An introduction to the topic of security in the context of computer systems and networks. Identify, analyze, and solve network-related security problems in computer systems. Fundamentals of number theory, authentication, and encryption technologies, as well as the practical problems that have to be solved in order to make those technologies workable in a networked environment, particularly in the wide-area Internet environment.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.
Restriction: Permission of CMNS-Computer Science department.
Credit Only Granted for: CMSC414, ENEE459C, or ENEE457.

CMSC416 Introduction to Parallel Computing (3 Credits)
Introduction to parallel computing. Topics include programming for shared memory and distributed memory parallel architectures, and fundamental issues in design, development, and performance analysis of parallel programs.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; or permission of instructor.
Restriction: Permission of CMNS-Computer Science department.
Credit Only Granted for: CMSC416 or CMSC498X.
Formerly: CMSC498X.

CMSC417 Computer Networks (3 Credits)
Computer networks and architectures. The OSI model including discussion and examples of various network layers. A general introduction to existing network protocols. Communication protocol specification, analysis, and testing.
Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC420 Advanced Data Structures (3 Credits)
Description, properties, and storage allocation functions of data structures including balanced binary trees, B-Trees, hash tables, skiplists, tries, KD-Trees and Quadtrees. Algorithms for manipulating structures. Applications from areas such as String Processing, Computer Graphics, Information Retrieval, Computer Networks, Computer Vision, and Operating Systems.
Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC421 Introduction to Artificial Intelligence (3 Credits)
Introduces a range of ideas and methods in AI, varying semester to semester but chosen largely from: automated heuristic search, planning, games, knowledge representation, logical and statistical inference, learning, natural language processing, vision, robotics, cognitive modeling, and intelligent agents. Programming projects will help students obtain a hands-on feel for various topics.
Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC422 Introduction to Machine Learning (3 Credits)
Machine Learning studies representations and algorithms that allow machines to improve their performance on a task from experience. This is a broad overview of existing methods for machine learning and an introduction to adaptive systems in general. Emphasis is given to practical aspects of machine learning and data mining.
Prerequisite: Minimum grade of C- in CMSC320, CMSC330, and CMSC351; and 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and permission of CMNS-Computer Science department.

CMSC423 Bioinformatic Algorithms, Databases, and Tools (3 Credits)
An introduction to the main algorithms, databases, and tools used in bioinformatics. Topics may include assembly and analysis of genome sequences, reconstructing evolutionary histories, predicting protein structure, and clustering of biological data. Use of scripting languages to perform analysis tasks on biological data. No prior knowledge of biology is assumed.
Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC424 Database Design (3 Credits)
Students are introduced to database systems and motivates the database approach as a mechanism for modeling the real world. An in-depth coverage of the relational model, logical database design, query languages, and other database concepts including query optimization, concurrency control; transaction management, and log based crash recovery. Distributed and Web database architectures are also discussed.
Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC425 Game Programming (3 Credits)
An introduction to the principles and practice of computer game programming and design. This includes an introduction to game hardware and systems, the principles of game design, object and terrain modeling, game physics, artificial intelligence for games, networking for games, rendering and animation, and aural rendering. Course topics are reinforced through the design and implementation of a working computer game.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351.
Restriction: Permission of CMNS-Computer Science department.

CMSC426 Computer Vision (3 Credits)
An introduction to basic concepts and techniques in computervision. This includes low-level operations such as image filtering and edge detection, 3D reconstruction of scenes using stereo and structure from motion, and object detection, recognition and classification.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351 and 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program; or permission of the instructor.
Restriction: Permission of CMNS-Computer Science department.

CMSC427 Computer Graphics (3 Credits)
An introduction to 3D computer graphics, focusing on the underlying building blocks and algorithms for applications such as 3D computer games, and augmented and virtual reality (AR/VR). Covers the basics of 3D image generation and 3D modeling, with an emphasis on interactive applications. Discusses the representation of 3D geometry, 3D transformations, projections, rasterization, basics of color spaces, texturing and lighting models, as well as programming of modern Graphics Processing Units (GPUs). Includes programming projects where students build their own 3D rendering engine step-by-step.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461).
Restriction: Permission of CMNS-Computer Science department.

CMSC430 Introduction to Compilers (3 Credits)
Topics include lexical analysis, parsing, intermediate representations, program analysis, optimization, and code generation.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC433 Programming Language Technologies and Paradigms (3 Credits)
Programming language technologies (e.g., object-oriented programming), their implementations and use in software design and implementation.
Prerequisite: Minimum grade of C- in CMSC330; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.
Restriction: Permission of CMNS-Computer Science department.

CMSC434 Introduction to Human-Computer Interaction (3 Credits)
Assess usability by quantitative and qualitative methods. Conduct task analyses, usability tests, expert reviews, and continuing assessments of working products by interviews, surveys, and logging. Apply design processes and guidelines to develop professional quality user interfaces. Build low-fidelity paper mockups, and a high-fidelity prototype using contemporary tools such as graphic editors and a graphical programming environment (eg: Visual Basic, Java).
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC435 Software Engineering (3 Credits)
State-of-the-art techniques in software design and development. Laboratory experience in applying the techniques covered. Structured design, structured programming, top-down design and development, segmentation and modularization techniques, iterative enhancement, design and code inspection techniques, correctness, and chief-programmer teams. The development of a large software project.
Prerequisite: 1 course with a minimum grade of C- from (CMSC412, CMSC417, CMSC420, CMSC430, CMSC433, ENEE447); and permission of CMNS-Computer Science department.

CMSC436 Programming Handheld Systems (3 Credits)
Fundamental principles and concepts that underlie the programming of handheld systems, such as mobile phones, personal digital assistants, and tablet computers. Particular emphasis will be placed on concepts such as limited display size, power, memory and CPU speed; and new input modalities, where handheld systems differ substantially from non-handheld systems, and thus require special programming tools and approaches. Students will apply these concepts and principles in the context of an existing handset programming platform.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.
Restriction: Permission of CMNS-Computer Science department.

CMSC451 Design and Analysis of Computer Algorithms (3 Credits)
Fundamental techniques for designing efficient computer algorithms, proving their correctness, and analyzing their complexity. General topics include graph algorithms, basic algorithm design paradigms (such as greedy algorithms, divide-and-conquer, and dynamic programming), network flows, NP-completeness, and other selected topics in algorithms.
Prerequisite: Minimum grade of C- in CMSC351; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC452 Elementary Theory of Computation (3 Credits)
Techniques are developed to determine the difficulty of a problem relative to a model of computation. Topics include Finite Automata, P, NP, decidability, undecidability, and communication complexity.
Prerequisite: Minimum grade of C- in CMSC351; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.

CMSC454 Algorithms for Data Science (3 Credits)
Fundamental methods for processing a high volume of data. Methods include stream processing, locally sensitive hashing, web search methods, page rank computation, network and link analysis, dynamic graph algorithms as well as methods to handle high dimensional data/ dimensionality reduction.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351.
Restriction: Permission of CMSC-Computer Science department.

CMSC456 Cryptography (3 Credits)
The theory, application, and implementation of mathematical techniques used to secure modern communications. Topics include symmetric and public-key encryption, message integrity, hash functions, block-cipher design and analysis, number theory, and digital signatures.
Prerequisite: (CMSC106, CMSC131, or ENEE150; or equivalent programming experience); and (2 courses from (CMSC330, CMSC351, ENEE324, or ENEE380); or any one of these courses and a 400-level MATH course, or two 400-level MATH courses); and Permission of CMNS-Mathematics department or permission of instructor . Cross-listed with: MATH456, ENEE456.
Credit Only Granted for: MATH456, CMSC456 or ENEE456.

CMSC457 Introduction to Quantum Computing (3 Credits)
An introduction to the concept of a quantum computer, including algorithms that outperform classical computation and methods for performing quantum computation reliably in the presence of noise. As this is a multidisciplinary subject, the course will cover basic concepts in theoretical computer science and physics in addition to introducing core quantum computing topics.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461, PHYS274); and 1 course with a minimum grade of C- from (CMSC351, PHYS373).
Restriction: Permission of CMNS-Computer Science department.

CMSC460 Computational Methods (3 Credits)
Basic computational methods for interpolation, least squares, approximation, numerical quadrature, numerical solution of polynomial and transcendental equations, systems of linear equations and initial value problems for ordinary differential equations. Emphasis on methods and their computational properties rather than their analytic aspects. Intended primarily for students in the physical and engineering sciences.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (CMSC106, CMSC131); and minimum grade of C- in MATH246. Cross-listed with: AMSC460.
Credit Only Granted for: AMSC460, AMSC466, CMSC460, or CMSC466.

CMSC466 Introduction to Numerical Analysis I (3 Credits)
Floating point computations, direct methods for linear systems, interpolation, solution of nonlinear equations.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340); and 1 course with a minimum grade of C- from (CMSC106, CMSC131); and minimum grade of C- in MATH410. Cross-listed with: AMSC466.
Credit Only Granted for: AMSC460, CMSC460, AMSC466, or CMSC466.

CMSC470 Introduction to Natural Language Processing (3 Credits)
Introduction to fundamental techniques for automatically processing and generating natural language with computers. Machine learning techniques, models, and algorithms that enable computers to deal with the ambiguity and implicit structure of natural language. Application of these techniques in a series of assignments designed to address a core application such as question answering or machine translation.
Prerequisite: Minimum grade of C- in CMSC320, CMSC330, and CMSC351; and 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461).
Restriction: Permission of CMNS-Computer Science department.

CMSC471 Introduction to Data Visualization (3 Credits)
Datasets are becoming increasingly large and complex, requiring intuitive ways to explore and interpret them quickly and efficiently. In this case, a picture is worth a thousand words: visualizations enable us to transform data into images that are easier to understand and reason about, compared to raw numbers and raw text. Visualizations are critical tools in externalizing and organizing our knowledge and insights, whether to explore collected datasets to improve our understanding of the physical world, to assess and debug analysis/experimental workflows, or to present new and interesting results to diverse audiences. In this course we will study techniques and algorithms for creating effective visualizations based on principles from graphic design, perceptual psychology, and cognitive science. Students will learn how to design and build interactive visualizations for the web, using the D3.js (Data-Driven Documents) framework.
Prerequisite: Minimum grade of C- in CMSC330 and CMSC351; and permission of CMNS-Computer Science Department.
Restriction: Permission of the CMNS-Computer Science Department.
Credit Only Granted for: CMSC471 or CMSC498O.
Formerly: CMSC498O.

CMSC472 Introduction to Deep Learning (3 Credits)
An introduction to deep learning, a machine learning technique, as well as its applications to a variety of domains. Provides a broad overview of deep learning concepts including neural networks, convolutional neural networks, recurrent neural networks, generative models, and deep reinforcement learning, and an intuitive introduction to basics of machine learning such as simple models, learning paradigms, optimization, overfitting, importance of data, and training caveats.
Prerequisite: Minimum grade of C- or higher in CMSC330 and CMSC351; and 1 course with a minimum grade of C- or higher from (MATH240, MATH461).
Restriction: Permission of the CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's) program.
Credit Only Granted for: CMSC498L or CMSC472.
Formerly: CMSC498L.

CMSC473 Capstone in Machine Learning (3 Credits)
Semester-long project course in which each student will identify and carry out a project related to machine learning, with the goal of publishing a research paper or software tool.
Prerequisite: Minimum grade of C- or higher in CMSC421 or CMSC422.
Recommended: Background or exposure to machine learning topics is strongly encouraged.
Restriction: Permission of instructor and Permission of CMSC - Computer Science department.
Credit Only Granted for: CMSC498P or CMSC473.
Formerly: CMSC498P.
Additional Information: Students will be paired with project advisors from the UMD faculty or alternatively, an industry advisor. Students are encouraged to plan for projects results that can be published at academic conferences or will impact academic research.

CMSC474 Introduction to Computational Game Theory (3 Credits)
Game theory deals with interactions among agents (either human or computerized) whose objectives and preferences may differ from the objectives and preferences of the other agents. It will also provide a comprehensive introduction to game theory, concentrating on its computational aspects.
Prerequisite: Minimum grade of C- in CMSC351 and CMSC330; and permission of CMNS-Computer Science department. Or must be in the (Computer Science (Doctoral), Computer Science (Master's)) program.
Credit Only Granted for: CMSC474, ECON414, GVPT390 or GVPT399A.

CMSC475 Combinatorics and Graph Theory (3 Credits)
General enumeration methods, difference equations, generating functions. Elements of graph theory, matrix representations of graphs, applications of graph theory to transport networks, matching theory and graphical algorithms.
Prerequisite: 1 course with a minimum grade of C- from (MATH240, MATH341, MATH461); and 1 course with a minimum grade of C- from (MATH241, MATH340). And permission of CMNS-Computer Science department; or permission of CMNS-Mathematics department. Cross-listed with MATH475 .

CMSC477 Robotics Perception and Planning (3 Credits)
A hands-on introduction to perception and planning for robotics, including rigid body transformations and rotations, dynamics and control of mobile robots/drones, graph based and sampling based planning algorithms, Bayseian and Kalman filtering, camera models and calibration, projective geometry, visual features, optical flow, pose estimation, RANSAC and Hough transform, structure from motion, visual odometry, machine learning basics, visual recognition and learning.
Prerequisite: 1 course from (MATH240, MATH341, MATH461); and (ENEE467 or CMSC420).
Restriction: Must be in the Robotics and Autonomous Systems minor; and permission of Computer Science department.

CMSC488 Special Topics in Computer Science (1-3 Credits)
Seminar courses that allow students to pursue new and emerging areas of Computer Science.
Restriction: Permission of CMNS-Computer Science department.
Repeatable to: 6 credits if content differs.
Additional Information: Course may be used as electives for the undergraduate degree and minor.

CMSC498 Selected Topics in Computer Science (1-3 Credits)
An individualized course designed to allow a student or students to pursue a selected topic not taught as a part of the regular course offerings under the supervision of a Computer Science faculty member. In addition, courses dealing with topics of special interest and/or new emerging areas of computer science will be offered with this number. Selected topics courses will be structured very much like a regular course with homework, project and exams. Credit according to work completed
Restriction: Permission of CMNS-Computer Science department.

CMSC499 Independent Undergraduate Research (1-3 Credits)
Students are provided with an opportunity to participate in a computer science research project under the guidance of a faculty advisor. Format varies. Students and supervising faculty member will agree to a research plan which must be approved by the department. As part of each research plan, students should produce a final paper delineating their contribution to the field.
Restriction: Must be in one of the following programs (Computer Science; Engineering: Computer) ; and permission of CMNS-Computer Science department.

CMSC601 Computational and Mathematical Analysis of Biological Networks across Scales (3 Credits)
Describe, implement and analyze algorithms that solve fundamental problems in biological network analysis: descriptive summaries of network structure and properties, probabilistic and dynamical network models, statistical models for networked data and network visualization.
Prerequisite: CMSC423; or equivalent.
Credit Only Granted for: CMSC828O or CMSC601.
Formerly: CMSC828O.

CMSC614 Computer and Network Security (3 Credits)
Advanced topics in computer and network security, including: anonymity, privacy, memory safety, malware, denial of service attacks, trusted hardware, security design principles, and empirically measuring security "in the wild". This will be a largely paper-driven course (there is no textbook), preparing students for research in (or around) the broad area of security. Students will gain first-hand experience launching attacks in controlled environments. The bulk of the grade will be based on a final, semester-long group project.
Recommended: Knowledge of C programming.
Restriction: Must be in the Computer Science Master's or Doctoral programs.
Credit Only Granted for: CMSC818O or CMSC614.
Formerly: CMSC818O.

CMSC616 Foundations of Parallel Computing (3 Credits)
Covers the foundations of parallel computing. Topics include programming for shared memory and distributed memory parallel architectures, and fundamental issues in design, development and analysis of parallel programs.
Prerequisite: CMSC411 and CMSC412; or permission of instructor.
Restriction: Must be in the Computer Science or Applied Mathematics and Scientific Computation master's or doctoral programs.
Credit Only Granted for: CMSC616 or CMSC818X.
Formerly: CMSC818X.

CMSC630 Foundations of Software Verification (3 Credits)
Topics in program verification. Operational semantics of programs. Preconditions and postconditions. Axiomatic proof systems and predicate transformers. Temporal logic and model checking. Process algebra, semantic equivalences and algebraic reasoning.
Prerequisite: CMSC330; or students who have taken courses with comparable content may contact the department; or permission of instructor.

CMSC631 Program Analysis and Understanding (3 Credits)
Techniques for static analysis of source code and modern programming paradigms. Analysis techniques: data flow analysis, program dependence graphs, program slicing, abstract interpretation. The meaning of programs: denotational semantics, partial evaluation. Advanced treatment of abstraction mechanisms: polymorphic types, operation overloading, inheritance, object-oriented programming and ML-like programming languages.
Prerequisite: CMSC330; or students who have taken courses with comparable content may contact the department; or permission of instructor.

CMSC634 Empirical Research Methods for Computer Science (3 Credits)
A graduate-level introductory course on empirical reseach methods for computer scientists. Experimental techniques for evaluating software systems and processes, human performance using interfaces, programming environments, and software engineering methods. Introduction to constructs and methods of measurements, qualitative and quantitative design, quasi-experimental and non-experimental design, baseline design, and statistical analysis.
Recommended: An introductory statistics class.
Restriction: Must be in Computer Science (Master's) program; or must be in Computer Science (Doctoral) program; or permission of instructor.
Credit Only Granted for: CMSC838G (Fall2005) or CMSC634.

CMSC651 Analysis of Algorithms (3 Credits)
Efficiency of algorithms, orders of magnitude, recurrence relations, lower-bound techniques, time and space resources, NP-complete problems, polynomial hierarchies, and approximation algorithms. Sorting, searching, set manipulation, graph theory, matrix multiplication, fast Fourier transform, pattern matching, and integer and polynomial arithmetic.
Prerequisite: CMSC451.

CMSC652 Complexity Theory (3 Credits)
This course will define what it means for a problem to be hard (or easy) in a variety of ways. The emphasis will be on natural problems. Topics may include NP-completeness, Sparse Sets, Graph Isomoprhism (why it is thought to not be NP-complete), Counting problems, and approximation problems.
Prerequisite: CMSC451 or CMSC452; or permission of instructor.
Credit Only Granted for: CMSC652 or CMSC858G.
Formerly: CMSC858G.

CMSC656 Introduction to Cryptography (3 Credits)
Introduction to modern cryptography. Topics include symmetric-key encryption, hash functions, message-authentication codes, block-cipher design, theoretical foundations, number theory, public-key encryption, and digital signatures.
Prerequisite: CMSC451, CMSC452, or CMSC456.
Credit Only Granted for: CMSC656 or CMSC858K.
Formerly: CMSC858K.

CMSC657 Introduction to Quantum Information Processing (3 Credits)
An introduction to the field of quantum information processing. Students will be prepared to pursue further study in quantum computing, quantum information theory, and related areas.
Prerequisite: Familiarity with complex numbers and basic concepts in linear algebra (e.g., eigenvalues, eigenvectors, Hermitian and unitary matrices) is required.
Credit Only Granted for: CMSC657 or CMSC858K.
Formerly: CMSC858K.
Additional Information: Previous background in quantum mechanics or theory of computation is not required.

CMSC660 Scientific Computing I (3 Credits)
Fundamental techniques in scientific computation with an introduction to theory and software for each topic. Computer numbers and sources of errors, numerical linear algebra, optimization, and Monte Carlo methods.
Prerequisite: Must have knowledge of Matlab or Python. Cross-listed with: AMSC660.
Credit Only Granted for: AMSC660 or CMSC660.

CMSC661 Scientific Computing II (3 Credits)
Numerical methods for solving ordinary and partial differential equations (elliptic, parabolic, hyperbolic, and dispersive): motivation, analysis, and implementation. Finite difference methods, finite element methods, Fourier and Chebyshev spectral methods, and meshless methods.
Prerequisite: Must have knowledge of Matlab or Python. Must have basic knowledge of ordinary and partial differential equations (MATH246 and MATH462 or equivalent, or permission of instructor). Cross-listed with: AMSC661.
Credit Only Granted for: AMSC661 or CMSC661.

CMSC662 Computer Organization and Programming for Scientific Computing (3 Credits)
This course presents fundamental issues of computer hardware, software parallel computing, and scientific data management for programming for scientific computation.
Prerequisite: Must have Knowledge of C or Fortran. Cross-listed with: AMSC662.
Credit Only Granted for: AMSC662 or CMSC662.

CMSC663 Advanced Scientific Computing I (3 Credits)
In the sequence Advanced Scientific Computing I & Advanced Scientific Computing II, (CMSC663/CMSC663 and AMSC664/CMSC664, respectively) students work on a year-long individual project to develop software for a scientific task in a high performance computing environment. Lectures will be given on available computational environments, code development, implementation of parallel algorithms.
Prerequisite: AMSC660 or CMSC660; and (AMSC661 or CMSC661).
Restriction: Permission of instructor. Cross-listed with: AMSC663.
Credit Only Granted for: AMSC663 or CMSC663.

CMSC664 Advanced Scientific Computing II (3 Credits)
In the sequence Advanced Scientific Computing I & Advanced Scientific Computing II, (AMSC663/CMSC663 and CMSC664/CMSC664, respectively) students work on a year-long individual project to develop software for a scientific task in a high performance computing environment. Lectures will be given on available computational environments, code development, implementation of parallel algorithms.
Prerequisite: AMSC663 or CMSC663.
Restriction: Permission of instructor. Cross-listed with: AMSC664.
Credit Only Granted for: AMSC664 or CMSC664.

CMSC666 Numerical Analysis I (3 Credits)
Approximation theory, numerical solution of initial-value problems, iterative methods for linear systems, optimization.
Prerequisite: CMSC466 or AMSC466; and MATH410. Cross-listed with: AMSC666.
Credit Only Granted for: AMSC666 or CMSC666.

CMSC673 Capstone in Machine Learning (3 Credits)
Semester-long project course in which each student will identify and carry out a project related to machine learning, with the goal of publishing a research paper or software tool.
Prerequisite: Minimum grade of C-in CMSC421 or CMSC422. Jointly offered with: CMSC473.
Credit Only Granted for: CMSC673, CMSC798P, CMSC473, or CMSC498P.
Formerly: CMSC798P.

CMSC701 Computational Genomics (3 Credits)
An introduction to the algorithms and heuristics used in the analysis of biological sequences. Includes an introduction to string matching and alignment algorithms, phylogenetic analysis, string reconstruction (genome assembly), and sequence pattern recognition (gene and motif finding). A particular emphasis will be placed on the design of efficient algorithms and on techniques for analyzing the time and space complexity of these algorithms. Computational concepts will be presented in the context of current biological applications. No prior knowledge of biology necessary.

CMSC702 Computational Systems Biology (3 Credits)
An introduction to the fundamental concepts in the computational analysis of biological systems with applications to: functional genomics, population genetics, interaction networks, epigenetics. Computational concepts convered: network and graph algorithms, machine learning, large data/network visualization, statistical modeling and inference, probabilistic graphical models, sparse methods in data analysis, numerical optimization. No prior knowledge of biology required.

CMSC703 Network Analysis and Modeling of Biological Systems (3 Credits)
An introduction to the computational network analysis and modeling of biological systems focusing on transcriptional, protein, signaling and metabolic networks (with primary emphasis on integrating the former within the latter). Computational methods studied for this type of analysis include: network and graph algorithms, network-based machine learning approaches, modeling dynamical systems, numerical optimization (linear, integer and quadratic programming) and a variety of other methods used to solve constraint based problems (primarily in the context of studying metabolic networks). These methods are complementary to those studied in CMSC701 and CMSC702.
Restriction: Must be in one of the following programs (Computer Science (Doctoral); Computer Science (Master's); Applied Mathematics and Scientific Computation (Doctoral); Applied Mathematics and Scientific Computation (Master's)) ; or permission of instructor.

CMSC711 Computer Networks (3 Credits)
Priciples, design, and performance evaluation of computer networks. Network architectures including the ISO model and local area networks (LANs). Communication protocols and network topology.
Prerequisite: CMSC412; or students who have taken courses with comparable content may contact the department.

CMSC712 Distributed Algorithms and Verification (3 Credits)
Study of algorithms from the distributed and concurrent systems literature. Formal approach to specifying, verifying, and deriving such algorithms. Areas selected from mutual exclusion, resource allocation, quiescence detection, election, Byzantine agreements, routing, network protocols, and fault-tolerence. Formal approaches will handle system specification and verification of safety, liveness, and real-time properties.

CMSC715 Wireless and Mobile Systems for the IoT (3 Credits)
Research on the Internet of Things (IoT), from the perspective of wireless networking and mobile sensing. Various techniques, algorithms, and systems that leverage the sensors in smartphones, smartwatches, drones, and IoT devices, to deliver real-world applications
Prerequisite: CMSC417; or permission of instructor.
Recommended: STAT100, MATH141, MATH240, and CMSC106; or equivalent courses .
Credit Only Granted for: CMSC818W or CMSC715.
Formerly: CMSC818W.

CMSC722 Artificial Intelligence Planning (3 Credits)
Automated planning of actions to accomplish some desired goals. Basic algorithms, important systems, and new directions in the field of artificial intelligence planning systems.
Prerequisite: CMSC421; or students who have taken courses with comparable content may contact the department; or permission of CMNS-Computer Science department.

CMSC723 Natural Language Processing (3 Credits)
Introduce fundamental concepts, techniques, and algorithms for the computational handling of natural language. Statistical and machine learning techniques, models, and algorithms that enable computers to deal with the ambiguity and implicit structure of human language. Approaches that focus on uncovering linguistic structure, such as syntactic or semantic parsing, as well as those that focus on manipulating text in useful ways, such as question answering or machine translation.
Prerequisite: Minimum grade of C- in CMSC422; and permission of CMNS-Computer Science department. Cross-listed with: INST735, LING723.
Credit Only Granted for: CMSC723, LING723, or INST735.
Additional Information: CMSC students may only receive PhD Comp. credit for CMSC723 or CMSC823, not both.

CMSC724 Database Management Systems (3 Credits)
Theoretical and implementation issues in advanced database systems. Topics include distributed databases, parallel databases, database client-server architectures, multimedia access methods, advanced query optimization techniques, data semantics and models, object-oriented databases, and deductive and expert database systems.
Restriction: Must be in one of the following programs (Computer Science (Master's); Computer Science (Doctoral)) ; or permission of instructor; or permission of CMNS-Computer Science department.

CMSC725 Geographical Information Systems and Spatial Databases (3 Credits)
Topics in geographic information systems and spatial databases. Integrates related results from databases, cartography, geography, computer graphics, file access methods, computational geometry, image processing, data structures, and programming languages. Topics include: cartographic modeling, principles of cartography, methods from computational geometry, principles of spatial databases, access methods, and spatial data structures. The architecture of some existing spatial databases and geographic information systems will be examined in greater detail.
Prerequisite: CMSC424 and CMSC420; or permission of instructor.

CMSC726 Machine Learning (3 Credits)
An introduction to modern statistical data analysis using machine learning techniques. The course quickly surveys elementary statistical models (decision trees, nearest neighbors and linear regression) and moves on to more complex algorithms such as support vector machines, boosting, neural networks, structured prediction, apprenticeship learning, online learning, bandits, recommender systems and reinforcement learning. Throughout an emphasis is placed on mathematical rigor.
Prerequisite: CMSC421 or CMSC422; or students who have taken courses with comparable content may contact the department; or permission of instructor.

CMSC727 Neural Modeling (3 Credits)
Fundamental methods of neural modeling. Surveys historical development and recent research results from both the computational and dynamical systems perspective. Logical neurons, perceptrons, linear adaptive networks, attractor neural networks, competitive activation methods, error back-propagation, self-organizing maps, and related topics. Applications in artificial intelligence, cognitive science, and neuroscience.
Prerequisite: CMSC421; or students who have taken courses with comparable content may contact the department; or permission of instructor.

CMSC730 Interactive Technologies in Human-Computer Interaction (3 Credits)
Ubiquitous and mobile computing, wearables, virtual/augmented reality, natural user interfaces, tangible UIs, interactive fabrication.
Restriction: Must be in the Computer Science Master's or Doctoral program; or permission of instructor.
Credit Only Granted for: CMSC838J or CMSC730.
Formerly: CMSC838J.

CMSC732 Human Factors in Security and Privacy (3 Credits)
Introducing a variety of important topics at the intersection of human factors and privacy and security, and developing skills in designing human-subjects studies to evaluate problems and solutions related to these topics.
Recommended: Previous coursework in human-computer interaction, security and privacy.
Credit Only Granted for: CMSC818D or CMSC732.
Formerly: CMSC818D.

CMSC733 Computer Processing of Pictorial Information (3 Credits)
Input, output, and storage of pictorial information. Pictures as information sources, efficient encoding, sampling, quantization, approximation. Position-invariant operations on pictures, digital and optical implementations, the pax language, applications to matched and spatial frequency filtering. Picture quality, image enhancement and image restoration. Picture properties and pictorial pattern recognition. Processing of complex pictures; figure extraction, properties of figures. Data structures for pictures description and manipulation; picture languages. Graphics systems for alphanumeric and other symbols, line drawings of two- and three-dimensional objects, cartoons and movies.
Prerequisite: CMSC420.

CMSC734 Information Visualization (3 Credits)
Information visualization defined in relation to graphics, scientific visualization, databases, data mining, and human-computer interaction. Visualizations for dimensional, temporal, hierarchical and network data. Examines design alternatives, algorithms and data structures, coordinated views, and human factors evaluations of efficacy.
Prerequisite: CMSC434; or students who have taken courses with comparable content may contact the department; or permission of instructor.

CMSC737 Fundamentals of Software Testing (3 Credits)
Examine fundamental software testing and related program analysis techniques. In particular, the important phases of testing will be reviewed, emphasizing th significance of each phase when testing different types of software. Concepts include: test generation, oracles, prioritization and coverage, regression and mutation testing, and program analysis.
Prerequisite: CMSC435; or students who have taken courses with comparable content may contact the department; or permission of instructor.
Formerly: CMSC838M.

CMSC740 Advanced Computer Graphics (3 Credits)
An introduction to the principles of computer graphics. Includes an introduction to graphics displays and systems, introduction to the mathematics of affine and projective transformations, perspective, curve and surface modeling, algorithms for hidden-surface removal, color models, methods for modeling illumination, shading, and reflection.
Prerequisite: MATH240 and CMSC420; or permission of instructor.

CMSC742 Algorithms in Machine Learning: Guarantees and Analyses (3 Credits)
Machine learning studies automatic methods for learning to make accurate predictions, to understand patterns in observed features and to make useful decisions based on past observations. This course introduces theoretical machine learning, including mathematical models of machine learning, and the design and rigorous analysis of learning algorithms. Topics include: (1) Learning theory (traditional and modern), including PAC learning basics, Boosting theory and PAC learning in neural nets. (2) Latent variable graphical models, including spectral methods for learning latent variable models. (3) Reinforcement learning theory, including algorithms, sample complexity and analyses.
Prerequisite: CMSC422 or equivalent; or permission of instructor.
Credit Only Granted for: CMSC828U or CMSC732.
Formerly: CMSC828U.

CMSC751 Parallel Algorithms (3 Credits)
A presentation of the theory of parallel computers and parallel processing. Models of parallel processing and the relationships between these models. Techniques for the design and analysis of efficient parallel algorithms including parallel prefix, searching, sorting, graph problems, and algebraic problems. Theoretical limits of parallelism.
Prerequisite: CMSC451; or ENEE641; or students who have taken courses with comparable content may contact the department. Cross-listed with: ENEE651.
Credit Only Granted for: ENEE459P, ENEE651, ENEE759K or CMSC751.
Formerly: ENEE759K.

CMSC752 Ramsey Theory and its Applications (3 Credits)
Theorems about when a coloring of a graph (or other objects) has to yield a nice monochromatic object. Applications will be to computer science theory and to mathematics.
Prerequisite: Any CMSC45X course or any 400-level math course.
Credit Only Granted for: CMSC858R or CMSC752.
Formerly: CMSC858R.

CMSC754 Computational Geometry (3 Credits)
Introduction to algorithms and data structures for computational problems in discrete geometry (for points, lines, and polygons) primarily in two and three dimensions. Topics include triangulations and planar subdivisions, geometric search and intersection, convex hulls, Voronoi diagrams, Delaunay triangulations, line arrangements, visibility, and motion planning.
Prerequisite: CMSC451 and CMSC420; or permission of instructor.

CMSC756 Robotics (3 Credits)
Overview on fundamental components of robotic systems, including the sensing and actuation, control and modeling of motion and perception, dynamics and kinematics, motion planning and manipulation of robots.
Prerequisite: CMSC420, CMSC106, CMSC466, and MATH240; or equivalent.
Restriction: Must be in the Computer Science Master's or Doctoral programs.
Credit Only Granted for: CMSC818N or CMSC756.
Formerly: CMSC818N.

CMSC763 Advanced Linear Numerical Analysis (3 Credits)
Advanced topics in numerical linear algebra, such as dense eigenvalue problems, sparse elimination, iterative methods, and other topics.
Prerequisite: AMSC666 or CMSC666; or permission of instructor. Cross-listed with: AMSC763.
Credit Only Granted for: AMSC600, AMSC763, CMSC760, or CMSC763.
Formerly: AMSC600 and CMSC760.

CMSC764 Advanced Numerical Optimization (3 Credits)
Modern numerical methods for solving unconstrained and constrained nonlinear optimization problems in finite dimensions. Design of computational algorithms and the analysis of their properties.
Prerequisite: MATH410; or permission of instructor. Cross-listed with: AMSC607.
Credit Only Granted for: AMSC607 or CMSC764.
Formerly: CMSC878O.

CMSC773 Computational Linguistics II (3 Credits)
Natural language processing with a focus on corpus-based statistical techniques. Topics inlcude: stochastic language modeling, smoothing, noisy channel models, probabilistic grammars and parsing; lexical acquisition, similarity-based methods, word sense disambiguation, statistical methods in NLP applications; system evaluation.
Prerequisite: CMSC723, INST735, or LING723; or permission of instructor. Cross-listed with LING773, INST736.
Credit Only Granted for: CMSC773, LING773, or INST736.
Additional Information: CMSC students may only receive PhD Comp. credit for CMSC723 or CMSC823, not both.

CMSC798 Master's Non-Thesis Research (1-3 Credits)
Restriction: Permission of CMNS-Computer Science department.
Repeatable to: 6 credits.

CMSC799 Master's Thesis Research (1-6 Credits)

CMSC800 How to Conduct Great Research (1 Credit)
Develop research skills so as to promote high quality and high impact.
Restriction: Must be in the Computer Science doctoral program.
Credit Only Granted for: CMSC798F or CMSC800.
Formerly: CMSC798F.

CMSC801 Department Internal Research Seminar (1 Credit)
Research overviews from faculty to help introduce departmental research to graduate students.
Credit Only Granted for: CMSC798E or CMSC801.
Formerly: CMSC798E.

CMSC818 Advanced Topics in Computer Systems (1-3 Credits)
Advanced topics selected by the faculty from the literature of computer systems to suit the interest and background of students.
Restriction: Permission of instructor.
Repeatable to: 99 credits.

CMSC828 Advanced Topics in Information Processing (1-3 Credits)
Advanced topics selected by the faculty from the literature of information processing to suit the interest and background of students.
Restriction: Permission of instructor.
Repeatable to: 99 credits.

CMSC829 Advanced Topics in Bioinformatics and Computational Biology (3 Credits)
Advanced topics selected by the faculty from the literature of bioinformatics to suit the interest and background of students.

CMSC838 Advanced Topics in Programming Languages (1-3 Credits)
Advanced topics selected by faculty from the literature of programming languages to suit the interest and background of students.
Restriction: Permission of instructor.
Repeatable to: 99 credits.

CMSC839 Advanced Topics in Human-Computer Interaction (1-3 Credits)
Advanced topics selected by the faculty from the literature of human-computer interaction to suit the interest and background of students.
Repeatable to: 15 credits.

CMSC848 Selected Topics in Information Processing (1-3 Credits)
Selected topics by the faculty from the literature of information processing to suit the interest and background of students.
Repeatable to: 99 credits if content differs.

CMSC858 Advanced Topics in Theory of Computing (1-3 Credits)
Advanced topics selected by the faculty from the literature of theory of computing to suit the interest and background of students.
Restriction: Permission of instructor.
Repeatable to: 99 credits.

CMSC878 Advanced Topics in Numerical Methods (1-3 Credits)
Advanced topics selected by the faculty from the literature of numerical methods to suit the interest and background of students.
Restriction: Permission of instructor.
Repeatable to: 99 credits.

CMSC898 Pre-Candidacy Research (1-8 Credits)
Advanced topics selected by the faculty from the literature of applications of computer science to suit the interest and background of students.
Restriction: Permission of instructor.

CMSC899 Doctoral Dissertation Research (1-8 Credits)

COMM - Communication

COMM400 Research Methods in Communication (3 Credits)
Philosophy of scientific method; role of theory; research ethics; empirical research methods (measurement, sampling, design, analysis).
Prerequisite: COMM250; and must have an introductory course in statistics.
Restriction: Must be in Communication program.
Credit Only Granted for: COMM400 or COMM307.

COMM401 Interpreting Strategic Discourse (3 Credits)
Principles and approaches for practical analysis of discourse designed to shape audience opinion.
Prerequisite: COMM250.
Restriction: Must be in Communication program.

COMM402 Communication Theory and Process (3 Credits)
Philosophical and conceptual analysis of communication theories.
Prerequisite: COMM250.
Restriction: Must be in Communication program.

COMM419 Special Topics in Health Communication (3 Credits)
Covers a variety of topics of health communication. Blends theoretical concepts and practical concerns that impact upon health communication processes. This course covers a specific topic of health communication in greater depth and applies scholarly discoveries to real-world examples.
Prerequisite: COMM304.
Restriction: Must be in the Communication Major.
Repeatable to: 6 credits if content differs.

COMM420 Theories of Group Discussion (3 Credits)
Current theory, research and techniques regarding small group process, group dynamics, leadership and decision-making.

COMM421 Communicating Leadership (3 Credits)
Examines the nature of leadership, theories of leadership from a communication perspective, relationships between leadership, authority, power, and ethics. Explores leadership responsibilities, commitments, and actions.

COMM422 Communication Management (3 Credits)
Communication policies, plans, channels, and practices in the management of the communication function in organizations.

COMM423 Communication Processes in Conferences (3 Credits)
Group participation in conferences, methods of problem solving, semantic aspects of language, and the function of conferences in business, industry and government settings.

COMM424 Communication in Complex Organizations (3 Credits)
Structure and function of communication within organizations: organizational climate and culture, information flow, networks and role relationships.

COMM425 Negotiation and Conflict Management (3 Credits)
Role of communication in shaping negotiation and conflict processes and outcomes.

COMM426 Conflict Management (3 Credits)
Role of communication in managing conflict processes.
Recommended: COMM425 and COMM250.

COMM427 Crisis Communication (3 Credits)
Explores theories and research related to communication before, during, and after a crisis. Students examine the fundamentals of organizational communication, crisis management, and strategic and crisis communication planning before examining case studies of a number of real-life crises: organizational crises, natural disasters, accidents, terrorism incidents, health crises, and major crises of credibility.

COMM428 Special Topics Seminar in Dialogues and Deliberation (3 Credits)
A study in public dialogue and deliberation theory and practice. This course will integrate recorded lectures, readings, videos, Public Dialogues, teamwork, and historical research.
Prerequisite: COMM250; and must have completed or be concurrently enrolled in COMM306.
Restriction: Must be in the Communication Major.
Repeatable to: 6 credits if content differs.

COMM435 Theories of Interpersonal Communication (3 Credits)
Major theoretical approaches and research trends in the study of interpersonal communication.
Prerequisite: COMM400; or permission of ARHU-Communication department.

COMM436 Interpersonal Arguing (3 Credits)
An examination of face to face arguing.
Prerequisite: COMM400 and COMM250.
Restriction: Must be in Communication program.
Credit Only Granted for: COMM436 or COMM498I.
Formerly: COMM498I.

COMM448 Special Topics in Public Relations (3 Credits)
Courses seek to examine historical and current communication management theories, literature and practices for the purposes of understanding the business environment in which public relations/communication management operates and applying the best of these theories and practices toward the management of the public relations/communications functions of an organization.
Prerequisite: COMM201.
Restriction: Must be in the Communication Major.
Repeatable to: 6 credits if content differs.

COMM449 Special Topics in Digital Communication (3 Credits)
Explores the topics that have arisen around computers, digital technologies, the internet, big data, surveillance capitalism, and network infrastructures.
Repeatable to: 6 credits if content differs.

COMM450 Ancient and Medieval Rhetorical Theory (3 Credits)
A survey of rhetorical theory in the ancient and medieval periods. Emphasis is placed on the theoretical problems that gave rise to its development within both periods. Authors include Isocrates, Plato, Aristotle, Cicero, Quintilian, Hermogenes, Martianus Capella, Aurelius Augustine, Alberic of Monte Cassino, Geoffrey of Vinsauf and Robert of Basevorn.
Prerequisite: COMM250.
Restriction: Must be in Communication program.
Credit Only Granted for: COMM450 or COMM650.

COMM454 Rhetoric of the 1960s (3 Credits)
Study of key rhetoric of the 1960s. Treats rhetoric of relevant Presidents and several protest movements including civil rights, anti-war, and women's liberation. Contrasts traditional modes of argument with alternative rhetorical forms.
Prerequisite: COMM301.

COMM455 Speechwriting (3 Credits)
The study of message strategies in order to research and develop effective speech texts appropriate to speakers and their audiences in various public contexts.

COMM456 Freedom of Speech & the First Amendment (3 Credits)
Examines the U.S. Supreme Court's rulings on freedom of speech cases as grounded in the First Amendment to the U.S. Constitution. It also considers the political and ideological role of "freedom of speech" as a rhetoric organizing and ordering U.S. political culture.
Credit Only Granted for: COMM498Y or COMM456.
Formerly: COMM498Y.

COMM458 Seminar in Political Communication (3 Credits)
The examination of special topics for and theories of political communication.
Prerequisite: COMM250.
Repeatable to: 6 credits if content differs.

COMM459 Special Topics in Science Communication (3 Credits)
This seminar course is designed to help students learn a variety of topics of science communication.
Repeatable to: 6 credits if content differs.

COMM460 Public Life in American Communities, 1634-1900 (3 Credits)
Ways that Americans have used their voice to create public life. Focus is on the diverse social communities that have characterized American life and the place and characteristics of oral discourse in each.

COMM461 Voices of Public Leadership in the Twentieth Century (3 Credits)
Study of the use of speaking in the power struggles of the twentieth century. Focus is on important speakers of the century, their social and policy influence, and the struggle to expand the diversity of voices with power in the public sphere.

COMM462 Visual Communication (3 Credits)
The study of visual communication should change the way one sees the world. Students will observe, analyze, and critique visual images. The ascendance of images in our contemporary world will be demonstrated, methods for critically comprehending how images do persuasive work will be identified, and students will develop a vocabulary for critiquing images, and assist students in creating compelling images.
Credit Only Granted for: COMM462 or COMM498V.
Formerly: COMM498V.

COMM468 Seminar in Mediated Communication (3 Credits)
The examination of special topics related to the study of mediated communication.
Restriction: Junior standing or higher.
Repeatable to: 6 credits if content differs.

COMM469 The Discourse of Social Movements (3 Credits)
Study of key social movements that have influenced American social and political life. In alternate years the Civil Rights Movement and the Rhetoric of Women's Suffrage and Abolitionism. Consideration of how groups excluded from or marginalized in American political life affect social change.
Recommended: COMM301.
Restriction: Junior standing or higher.
Repeatable to: 6 credits if content differs.

COMM470 Listening (3 Credits)
The principles of listening behavior.

COMM472 Nonverbal Communication (3 Credits)
Nonverbal communication in human interaction theory and research on proxemics, kinesics and paralanguage as expression of relationship, affect and orientation within and across cultures.

COMM475 Persuasion (3 Credits)
Bases of persuasion, with emphasis on recent experimental developments in persuasion.

COMM476 Language, Communication, and Action (3 Credits)
Communication as symbolic action through the study of communication ethics. Emerging ethical principles and decision-making in public discourse, interpersonal communication, organizational communication, public relations, health communication, and crisis communication.
Restriction: Must be in the Communication major.

COMM477 Discourse Analysis (3 Credits)
Concepts of textual and discourse analysis applied to speech situations.

COMM478 Communication Colloquium (1 Credit)
Current trends and issues in the field of communication, stressing recent research methods. Recommended for senior and graduate student majors and minors in communication.
Repeatable to: 4 credits if content differs.

COMM482 Intercultural Communication (3 Credits)
The major variables of communication in an intercultural context: cultural, racial and national differences; stereotypes; values; cultural assumptions; and verbal and nonverbal channels.

COMM483 Senior Seminar in Public Relations (3 Credits)
Integration of theory, techniques and research methods into the planning and execution of public relations campaigns for specific organizations. Analysis of research on the case studies of public relations.
Prerequisite: COMM351; and 1 course from (COMM305, COMM306, COMM307, or COMM400).
Additional Information: Students who enrolled after Fall 2020 should not take COMM400 as a prerequisite.

COMM488 Communication Portfolio Project (1 Credit)
Preparation of the professional communication portfolio.
Restriction: Senior standing; and must be in Communication program.
Repeatable to: 3 credits if content differs.

COMM489 Topical Research (1-3 Credits)
Individualized research projects conducted with a faculty sponsor.
Prerequisite: Permission of ARHU-Communication department.
Repeatable to: 6 credits if content differs.

COMM498 Seminar (3 Credits)
Present-day communication research.
Restriction: Permission of instructor; and senior standing.

COMM600 Empirical Research in Communication (3 Credits)
Formerly: SPCH600.

COMM601 Historical-Critical Research in Communication (3 Credits)
Intense study in critical and historical methodology as applicable to research in communication. Emphasis will be placed on the composition and the evaluation of historical-critical studies of significance in the field of rhetorical communication scholarship.
Formerly: SPCH601.

COMM602 Communication Theory (3 Credits)
Fundamental concepts, approaches, and problems in communication theory.
Restriction: Must be in one of the following programs (Communication (Master's); Communication (Doctoral)).

COMM604 Argumentation Theory (3 Credits)
Fundamental concepts, approaches, and problems in argumentation theory.

COMM606 Seminar in Communication Management (3 Credits)
Communication and public relations as a managed function of organizations are introduced. Students learn how managing communication contributes to organizational effectiveness. Using organizational theory, theories of Excellence in public relations and communication management, communication metrics and communication ethics, students build their communication strategic management skills beyond the programmatic level to the functional and organizational levels of decision-making.
Restriction: Restricted to GCPS (Z045) in Communication; or must be in Public Management-Executive Masters (Master's) program.

COMM607 Seminar in Communication Management Publics (3 Credits)
Research and analysis of publics and how the use of this information builds more effective relationships with strategic constituencies of organizations are emphasized. Students learn and apply to communication management problems the theories of audience segmentation, stakeholders, behavior of activist organizations, conflict resolution, environmental scanning, ethics of organization-public relationships and the situational theory of publics.
Restriction: Restricted to GCPS (Z045) in Communication; or must be in Public Management-Executive Masters (Master's) program.

COMM609 Fundamentals of Interpreting (1-6 Credits)
Develops a systematic, reflective approach to interpreting tasks in real-world settings and outlines the use of different modes of interpreting under professional working conditions. Provides an overview of interpreting skills with exercises to develop them, including focus on active listening and analysis, effective use of memory, and delivery of the target message. Interpreting strategies and techniques in both dialogue and formal consecutive settings are discussed and practiced in a range of interpreting domains. Includes sight translation.
Prerequisite: Students must complete an admissions test for first year courses; and permission of ARHU-Communication department.
Repeatable to: 8 credits.

COMM610 Introduction to Translation and Interpreting Studies (3 Credits)
Provides an overview of the interdisciplinary fields of Translation and Interpreting Studies and establishes relationships between scholarly study and professional practice. Examines how theories and concepts inform practice, guide to a higher level of competence, and address issues of interlingual, intercultural mediation in authentic, real-world settings both past and present. serves as a foundation course for reflective practice and portfolio work through action research methodology and process
Prerequisite: Students must complete an admissions test for first year courses; and permission of ARHU-Communication department.

COMM611 Semniar in Global Communcation Mangement (3 Credits)
Global Communication Management extends the theories of communication management developed in COMM606 and COMM607 to a global level. Students move beyond Western communication management assumptions to examine how practices of communication management differ in different national and/or cultural contexts. Students are challenged to build generic principles of communication management with specific applications that can be used and adapted in the differing countries and cultures of the world whether working in multinational corporations, national governments, or non-governmental organizations (NGO's).
Restriction: Restricted to GCPS (Z045) in Communication; or must be in Public Management-Executive Masters (Master's) program.

COMM618 Professional Communication: Rhetoric & Style (3 Credits)
Writing instruction in English for professional communicators with a focus on rhetoric, style, and grammar. Designed to teach English writing skills focused on message creation and organization, sentence structure, and language use, typologies of rhetorical genres, registers, and style, research skills, summary-writing skills, to editing skills, and vocabulary building in English writing.
Repeatable to: 6 credits.

COMM619 Consecutive Interpretation (1-6 Credits)
Builds upon the systematic, reflective approach to interpreting in real-world settings introduced in Fundamentals of Interpreting. Consecutive interpreting skills are consolidated through individual and group practice, and any remaining challenges related to consecutive interpreting sub-skills are identified and addressed. Stresses effective analysis, note-taking, and use of voice during exercises in sight translation, dialogue, and formal consecutive interpreting.
Prerequisite: COMM609; and must have completed an admissions test for first year courses; and permission of ARHU-Communication department.
Repeatable to: 8 credits.

COMM628 Organization Communication: Research and Intervention (3 Credits)
The role of the internal and external communication consultant as an organizational change-agent. Emphasis upon data gathered to facilitate the communication development of the organization.
Prerequisite: COMM424; or permission of instructor.
Repeatable to: 6 credits if content differs.
Formerly: SPCH628.

COMM629 Introduction to Simultaneous Interpretation (1 Credit)
Builds upon the overview of the simultaneous mode in Fundamentals of Interpreting by reviewing the relationship between consecutive and simultaneous skills and introducing work in the booth. Challenges of simultaneous interpreting, including split attention, ear-voice span, and voice and microphone technique are addressed. Participants become familiar with the booth and exercises required to build simultaneous skills. Role and use of portable equipment in professional settings are discussed. Recommended as preparation for the M.A. entrance examination.
Prerequisite: Admissions test for Graduate Certificate in Interpreting; and COMM609; and permission of ARHU-Communication department.
Recommended: COMM619.
Repeatable to: 3 credits if content differs.

COMM630 Seminar in Public Relations Management (3 Credits)
Relationship of public relations management to organizational structure and communication functions. Objectives, planning, staffing, budgeting, administering, and evaluation of public relations programs.
Credit Only Granted for: COMM630 or JOUR630.
Formerly: JOUR630.

COMM631 Seminar in Public Relations Publics (3 Credits)
Analysis of public relations programs aimed at organizational publics. Media, issue-related, community, employee, governmental, consumer, financial, and student/educator publics. Theories of the nature of publics, communication behavior of publics, and effects of public relations programs aimed at different publics.
Credit Only Granted for: COMM631 or JOUR631.
Formerly: JOUR631.

COMM633 Global Public Relations (3 Credits)
Application of principles of public relations to countries or regions with different cultures, political systems, economic systems, levels of development, media systems, and levels of activism.
Credit Only Granted for: COMM633 or JOUR633.
Formerly: JOUR633.

COMM637 Professional Practice Forum in Translation: Career Portfolio and Exams (1 Credit)
Serves as final preparation for entry into the profession through development of career portfolio to meet summative degree requirement and development of strategies for gaining work as a professional translator. Prepares participants for degree examinations and employer tests through the review of previous exam material and employer testing requirements. Serves as venue for degree examinations, career goal setting and planning for future employment. Participants present and defend career portfolio as summative requirement for MA in translation; MA in Trans. and Localization Project.
Prerequisite: Admissions test for second year courses; and (COMM659 and COMM679); and permission of ARHU-Communication department.

COMM638 Professional Communication: Rhetoric & Voice (3 Credits)
A skills-based course in speaking instruction in English for professional communicators with a focus on public speaking, voice, diction, and pronunciation. Focuses on developing public speaking, voice, diction, and pronunciation skills. Designed to teach message creation and organization, sentence structure, and language use, vocal qualities designed to enhance proper pronunciation, breathing, and articulation skills, register variation, listening skills, English vocabulary, audience adaptation skills with attention to cultural distinctions, presentational skills with visual aids, and interpretive skills.
Repeatable to: 6 credits.

COMM639 Fundamentals of Translation (1-6 Credits)
Develops a systematic, reflective approach to translation involving both the written and spoken word. Provides an overview of domains of translation, associated text categories and translation tasks. Develops strategies to identify, analyze and resolve translation challenges in specific, authentic,real-world contexts. Working with a series of current texts, explores general translation concepts and language-specific strategies. Includes sight translation exercises and introduction to translation resources and computer tools used in the translators workplace.
Prerequisite: Admissions test for first year courses; and permission of ARHU-Communication department.
Repeatable to: 8 credits if content differs.

COMM641 Introduction to Computer-Assisted Translation (1 Credit)
Introduces the use of computer-assisted translation tools to support large-scale translation projects and streamline translation processes. Focuses on industry software products that utilize translation memory and terminology management systems. Discusses the role of tools in the entire translation process from pre- to post-editing.
Prerequisite: Admissions test for first year courses; and COMM639; and permission of ARHU-Communication department.

COMM649 Translation for Specific Domains (1-6 Credits)
Builds upon the systematic, reflective approach introduced in Fundamentals of Translation by addressing the development of translation skills required for specialization in specific domains. In written and sight translation exercises include researching specialized subject material, developing and maintaining terminology, and consulting experts in the field. Includes authentic, real-world translation projects in translation teams. Overview of computer-assisted translation tools and continued work on sight translation enable higher levels of productivity under time constraints.
Prerequisite: Admissions test for first year courses; and COMM639; and permission of ARHU-Communication department.
Repeatable to: 8 credits if content differs.

COMM652 Contemporary Rhetorical Theory (3 Credits)
A study of twentieth century theories of rhetoric. Special attention will be devoted to Richard Weaver, Kenneth Burke, Lloyd Bitzer, Ernest Bormann, Walter Fisher, and the continental theorists of communication such as Chaim Perelman and Jurgen Habermas.
Formerly: SPCH652.

COMM655 Seminar in Speechwriting (3 Credits)
Theoretical and practical aspects of speechwriting at an advanced level.
Formerly: SPCH655.

COMM657 Professional Practice Forum in Interpreting: Career Portfolio and Exams (1 Credit)
Serves as final preparation for entry into the profession through development of strategies for gaining work as a professional translator. Prepares participants for degree examinations and employer tests through the review of previous exam material and employer testing requirements. Serves as venue for degree examinations, career goal setting and planning for future employment. Participants present and defend career portfolio and summative requirement for degree.
Prerequisite: COMM719, COMM769, and COMM729; and admissions test for second-year courses; and permission of ARHU-Communication department.

COMM659 Translation for Language-Specific Markets (1-3 Credits)
Builds translation skills to a highly professional level by developing autonomy in completing authentic, real-world translation projects based upon the reflective approach developed in the first-year curriculum. Develops one or more specializations. Completion of individual and group projects covering all aspects of professional translation from subject matter research, terminology work, and use of computer-assisted translation tools. Sight translation and timed exercises to increase production and meet deadlines.
Prerequisite: Admissions test for second year courses; and permission of ARHU-Communication department.
Repeatable to: 8 credits.

COMM661 Communication and Social Change (3 Credits)
Place of rhetoric as the union of the moral and historical in moments of social definition. Reviews theories of discourse in social change including political change, social movements, consciousness change, and more global change. Application to contemporary change.

COMM668 Risk Communication (3 Credits)
Principles and approaches to risk communication. Emphasis is placed on theoretical trends in risk communication and application to industry. Topics include how to be an effective source of risk communication, understanding audiences, handling the media and designing messages.
Prerequisite: Permission of ARHU-Communication department.
Repeatable to: 9 credits if content differs.

COMM669 Professional Practice Forum in Translation: Practicum (1-3 Credits)
Provides opportunities to complete real-world translation projects on campus and in the public service, legal, business, and political communities as translators, project managers and translators/reviewers working on group projects. Collaboration with participants in the interpreting practicum is also sought to prepare multilingual texts for practicum events and familiarize participants with conference translation. Complements Translation for Specific Markets, and practicum projects are included in course and career reflective practice portfolios. Requires independent study plan agreed with course instructor.
Prerequisite: Admissions test for second year courses; and permission of ARHU-Communication department.
Repeatable to: 9 credits if content differs.

COMM679 Professional Practice Forum in Translation: Workplace Processes and Procedures (1 Credit)
Provides in-depth exploration of processes and procedures in public service, legal, and political settings requiring translation services. Prepares for translation in real-world settings by discussing procedures across sectors and institutions, enabling informed career plans and choices. Discusses ethics, professional conduct and business practices. Reinforces identity as a professional translator, develops specializations, and pursues professional and career development opportunities through interaction with members of the profession, professional organizations, and institutions in the language industry.
Prerequisite: Admissions test for second year courses; and permission of ARHU-Communication department.
Repeatable to: 3 credits if content differs.

COMM680 Communication Programs in Education and Training (3 Credits)
An analysis of instructional development in communication. Instructional objectives, strategies and evaluation are applied to educational, corporate and industrial training programs.
Formerly: SPCH680.

COMM681 Communication Issues in Human Resource Development (3 Credits)
Research in and theory of contemporary communication issues in the human resource development of governmental, corporate, business organizations.
Formerly: SPCH681.

COMM683 Intercultural Communication Theory (3 Credits)
An in-depth coverage of the essential theories of intercultural communication is provided.

COMM686 Teaching Communication (1 Credit)
Principles of effective teaching--content and process--in the college communication classroom.
Formerly: SPCH686.

COMM687 Professional Development in the Communication Discipline (1 Credit)
Knowledge and skills required for advancement as an academic professional in the communication discipline. Topics include types of academic institutions and posts, elements of academic performance, documentation of professional qualifications, how academic posts are secured, processes associated with tenure and promotion, processes of academic publication and history of the discipline.

COMM688 Communication Field Experience (1-6 Credits)
Applications of communication principles and research in professional communication settings.
Restriction: Permission of instructor.
Formerly: SPCH688.

COMM698 Special Problems in Communication (1-3 Credits)
Formerly: SPCH698.

COMM700 Introduction to Graduate Study in Communication (3 Credits)
Basic skills in communication research.
Restriction: Must be in Communication (Doctoral) program.
Formerly: SPCH700.

COMM701 Quantitative Methods in Communication Research (3 Credits)
Logic and methods of quantitative data collection and statistical analysis as applied to communication studies. Research strategies for communications: experimentation, survey research, field research, and content analysis.
Prerequisite: COMM700.
Formerly: SPCH701.

COMM703 Advanced Quantitative Data Analysis in Communication Research: Structural Equation Models (3 Credits)
Model evaluation and theory construction in communication research. Causal systems in current communication research: recursive, nonrecursive, and unobserved variable models. Students must have a dissertation research project requiring quantitative methods.
Prerequisite: COMM702.
Restriction: Permission of instructor.
Formerly: SPCH703.

COMM708 Professional Communication: Rhetoric and Context (3 Credits)
A skills-based course in speaking and writing in English for professional communicators adapting to a diversity of contexts, including business, health, law, politics, and science. Focus on diversifying the different contexts in which speaking and writing take place. Designed to develop an ability to adapt messages to a diversity of professional communication contexts, address the role of culture in adapting messages to a diversity of professional communication contexts, hone English speaking and writing skills based on a diversity of language registers, gain experience working with technical vocabulary, enhance analytical skills, strengthen research skills, enhance critical thinking skills, develop software technology skills.
Repeatable to: 6 credits.

COMM710 Translation and Localization Project Management (3 Credits)
Introduces basic principles of project management in the translation industry based upon globalization and localization processes for software, websites, and other translation-driven products. Focuses on information technology and workflow in large-scale multilingual projects. Examines planning, execution, and evaluation processes grounded in best practices and standards of the translation and localization industry.
Prerequisite: Admissions test for second year courses; and permission of ARHU-Communication department.

COMM711 Historical/Critical Methods in Communication Research (3 Credits)
Methods for historical and critical research in communication. Formulation of significant research questions, systematic collection of bibliographic and phenomenal information, formulating substantial claims, organizing and writing research for disciplinary outlets.
Prerequisite: COMM700; or permission of instructor.
Formerly: SPCH711.

COMM712 Advanced Historical/Critical Methods in Communication Research (3 Credits)
Critical assessment of qualitative approaches to communication. Introduction to significant schools of historical and critical research. Advanced techniques for inquiry and manuscript preparation. Students must have dissertation research project requiring historical or critical method.
Restriction: Permission of instructor.

COMM713 Translation Technology (3 Credits)
Builds upon the principles outlined in Introduction to Computer-Assisted Translation to develop comprehensive knowledge of the current and future roles of technology in translation processes involving both the spoken and the written word, including use of widely available software tools and systems for terminology management, translation memory, and machine translation. Students carry out projects using translation technology, enabling them to apply newly acquired knowledge in applied contexts. Examination of case studies highlights how translation technology is leveraged across public and private sector organizations and the latest developments in the field.
Prerequisite: Admissions test for second year courses; and permission of ARHU-Communication department.

COMM714 Introduction to Qualitative Methods in Communication Research (3 Credits)
Methods for field research in communication including interiewing, ethnographic and participant intervention, focus groups, and content analysis. Formulation of significant research questions, systematic collection of field data, formulating substantial claims from the research, organizing and writing research from disciplinary outlets.
Restriction: Permission of instructor.

COMM715 Advanced Qualitative Methods in Communication Research (3 Credits)
Advanced data analysis of qualitative data in Communication research. In-field research and techniques for analysis of data from in-field work.

COMM718 Practicum in Research Proposal and Design (3 Credits)
Development of research proposal through research team interaction. In different semester the course focuses on different subdisciplines of communication.
Repeatable to: 6 credits.
Credit Only Granted for: COMM718 or JOUR632.
Formerly: JOUR632.

COMM719 Advanced Consecutive Interpretation (1-3 Credits)
Builds consecutive interpreting skills to a highly professional level by sharpening listening, processing, memory, note-taking, and delivery skills, enabling interpretation of highly complex material requiring particular attention to nuance, tone, and style. Includes dialogue and monologue interpreting exercises with specialized subject material. Participants emerge from the course as reflective practitioners with the simultaneous interpreting skills required to perform competently in real-world settings.
Prerequisite: Admissions test for second year courses; and permission of ARHU-Communication department.
Repeatable to: 8 credits if content differs.

COMM724 Seminar in Organizational Communication (3 Credits)
Theories and problems of human communication within, between, and/or among formal organizations will be emphasized.
Restriction: Permission of instructor.
Formerly: SPCH724.

COMM729 Simultaneous Interpretation (1-3 Credits)
Builds upon the discussion of the simultaneous mode and exercises in Introduction to Simultaneous Interpreting by reviewing the relationship between consecutive and simultaneous skills and introducing work in the booth in a series of progressive exercises. Addresses challenges such as coordination of split attention, ear-voice span, memory and delivery / presentation. Reinforces principles of collegial teamwork and good microphone technique in the booth. Enhances preparation skills required for interpretation of specialized subject matter.
Prerequisite: Admissions test for second year courses; and permission of ARHU-Communication department.
Repeatable to: 8 credits if content differs.

COMM730 Seminar in Health Communication (3 Credits)
Communication processes in health care and promotion.
Formerly: SPCH730.

COMM738 Seminar in Mediated Communication (3-12 Credits)
The examination of special topics related to the study of mediated communication.
Restriction: Permission of instructor.
Repeatable to: 12 credits if content differs.

COMM739 topics in Public Relations (3 Credits)
Seminar on specialized areas of scholarly research in public relations or on the practice of public relations in specialized organizational settings.
Repeatable to: 6 credits if content differs.
Formerly: JOUR739.

COMM748 The Rhetoric of the Presidency (3 Credits)
The study of the historical and contemporary rhetoric of the presidency in appropriate historical and political contexts. Scholarship related to public address studies and theories of the presidency will be featured.
Repeatable to: 9 credits if content differs.
Credit Only Granted for: COMM748 or COMM768.
Formerly: COMM768.

COMM749 Advanced Simultaneous Interpretation (1-3 Credits)
Builds simultaneous interpreting skills to a highly professional level, including highly complex material requiring particular attention to nuance, tone, and style. Resolves any remaining challenges of split attention, ear-voice span, memory and delivery / presentation. Introduces simultaneous interpretation with text, based upon sight translation techniques. Participants emerge from the course as reflective practitioners with the simultaneous interpreting skills required to perform competently in real-world settings.
Prerequisite: COMM729; and admissions test for second-year courses; and permission of ARHU-Communication department.
Repeatable to: 4 credits if content differs.

COMM758 Seminar in Rhetorical Theory (3 Credits)
Examination of selected theories of style drawn from the fields of rhetoric and literature, and analysis of model speeches.
Prerequisite: COMM460, COMM461, or COMM450.
Repeatable to: 12 credits if content differs.
Formerly: SPCH758.

COMM759 Professional Practice Forum in Interpreting: Practicum (1-3 Credits)
Provides opportunities to interpret consecutively and simultaneously in real-world settings on campus and in the public service, legal, business, and political communities. Develops team leader skills by organizing and convening an event or series of events (conference, debate, or negotiation), selecting topics and delegates, and preparing speeches and arguments to deliver and interpret. Collaboration with participants in M.A. translation courses is sought. Requires independent study plan agreed with course instructor.
Prerequisite: Admissions test for second-year courses; and permission of ARHU-Communication department.
Repeatable to: 9 credits if content differs.

COMM760 Seminar in Political Communication (3 Credits)
A blend of theory and practice to integrate rhetorical-critical theory and empirical methods with politics. Practitioners in political communication will be drawn in as resource persons. Students will map the communication strategy for candidates and analyze actual campaign strategies.
Formerly: SPCH760.

COMM762 The Rhetoric of Political Institutions (3 Credits)
The role of discourse in major political institutions is examined. The specific institutional focus may change from instructor to instructor. Examples include Congress, the courts, or the state legislatures.

COMM768 Seminar in Public Address (3 Credits)
An in-depth study of national and international speakers and issues throughout the history of the spoken word. Emphasis will be placed upon the application of rhetorical principles to the analysis of world speakers and their speeches.
Repeatable to: 12 credits if content differs.
Formerly: SPCH768.

COMM769 Professional Practice Forum in Interpreting: Workplace Processes and Procedures (1-2 Credits)
Provides in-depth exploration of processes and procedures in public service, legal, and political settings where interpreting services are commonplace. Enables students to make informed career plans and choices. Empowers participants by helping to establish and reinforce identity as a professional interpreter, develop specializations, and pursue professional and career development opportunities through interaction with members of the profession, professional organizations, and institutions in the language industry.
Prerequisite: Admissions test for second-year courses; and permission of ARHU-Communication department.
Repeatable to: 3 credits if content differs.

COMM775 Seminar in Persuasion and Attitude Change (3 Credits)
This seminar will concentrate on the problem of making message strategy decisions. Course content will consist of study of both theoretical and empirical research on attitude and attitude change in persuasive communication.
Prerequisite: Permission of ARHU-Communication department.
Formerly: SPCH775.

COMM776 Seminar in Interpersonal Communication (3 Credits)
Interpersonal communication theory, research, and practice.
Formerly: SPCH776.

COMM777 Persuasive Message Strategies (3 Credits)
Examines which persuasive messages are effective to change attitudes and behavior at what times and with what people.
Credit Only Granted for: COMM698P or COMM777.
Formerly: COMM698P.

COMM778 Special Topics in Health and Risk Communication (3 Credits)
This graduate seminar introduces students to special topics in health and risk communication such as media and public health, health message design, risk perception and communication, health and environmental communication, health literacy, etc. It blends theoretical concepts with practical concerns and covers a specific topic with breadth and depth appropriate for a high-level graduate seminar.
Restriction: Permission of instructor.
Repeatable to: 9 credits if content differs.

COMM779 Seminar: Special Topics in Persuasion and Attitude Change (3 Credits)
This seminar explores special topic areas with the study of persuasion and attitude change, such as social cognition, humor, message production,and cognitive oscillation.
Recommended: COMM775.
Repeatable to: 9 credits if content differs.

COMM789 Seminar: Special Topics in Intercultural Communication (3 Credits)
Explores special topic areas within the study of intercultural communication, such as culture and conflict, intercultural negotiation, cross-cultural relationships.
Recommended: COMM683.
Repeatable to: 9 credits if content differs.

COMM798 Independent Study (1-3 Credits)
An individual course designed for intensive study or research of problems in communication.
Restriction: Permission of instructor.
Formerly: SPCH798.

COMM799 Master's Thesis Research (1-6 Credits)
Formerly: SPCH799.

COMM879 Special Research Problems in Persuasion and Attitude Change (1-4 Credits)
Directed team and individual research projects.
Prerequisite: Permission of ARHU-Communication department.
Repeatable to: 9 credits if content differs.

COMM888 Doctoral Practicum in Communication (3-9 Credits)
Analysis of professional activity through personal observation. Evaluation of the purpose, process, effectiveness, and efficiency of professional activity. Recommendations for training and further research.
Repeatable to: 9 credits if content differs.
Formerly: SPCH888.

COMM889 Doctoral Tutorial in Communication (3-9 Credits)
Individual research in communication.
Repeatable to: 9 credits if content differs.
Formerly: SPCH889.

COMM898 Pre-Candidacy Research (1-8 Credits)

COMM899 Doctoral Dissertation Research (1-8 Credits)
Formerly: SPCH899.

CONS - Sustainable Development & Conservation Biology

CONS608 Seminar in Sustainable Development and Conservation Biology (1-4 Credits)
Special topics and current literature in conservation biology and sustainable development.
Repeatable to: 6 credits if content differs.

CONS609 Special Topics in Conservation Biology (1-3 Credits)
Lectures, experimental courses and other special instructions in various subjects in conservation biology.
Repeatable to: 6 credits if content differs.

CONS670 Conservation Biology (3 Credits)
Conservation in the Anthropocene means conserving biodiversity and ecosystem function in the midst of climate change, habitat loss, overexploitation, altered nutrient cycling, and invasive species with protected areas and reserve networks, ecosystem restoration, and other biodiversity conservation and management schemes.Cross-listed with MEES670.
Credit Only Granted for: CONS670 or MEES670.

CONS680 Problem Solving in Conservation/Development (4 Credits)
Students will be exposed to current problems in conservation and development through great lectures, field trips, interviews and appropriate literature. Working in teams, students will formulate recommendations based on a synthesis of biological, economic and policy considerations.

CONS798 Research Papers in Sustainable Development and Conservation Biology (1-4 Credits)
Work on the required scholarly paper.
Restriction: Must be in Sustainable Development & Conservation Biology (Master's) program.
Repeatable to: 4 credits if content differs.

DANC - Dance

DANC405 Dance Education II: Education & Policy (3 Credits)
Curricula in dance in K-12 settings, classroom management, assessment/grading, and best practices in dance education in public schools. Current research and policy issues are included. This course counts towards teacher certification in the State of Maryland.
Restriction: Permission of ARHU-Dance department.

DANC409 Contact Improvisation (2 Credits)
Discovery and cultivation of the principles and skills of Contact Improvisation dance technique.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 4 credits.
Credit Only Granted for: DANC489C or DANC409.

DANC410 Technical Theater Production for Dance (3 Credits)
A study of the theoretical principles of production and the practical application of those principles to the presentation of dance works.
Prerequisite: DANC210; or students who have taken courses with comparable content may contact the department; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC418 Contemporary Modern (2 Credits)
Physical practice that sources postmodern dance influences, endurance training, improvisation, and choreographic composition to present movement practices as a form of investigation.
Prerequisite: DANC218; or permission of instructor.
Repeatable to: 6 credits.
Credit Only Granted for: DANC418 or DANC489O.
Formerly: DANC489O.

DANC420 Partnering (2 Credits)
Elements of contemporary partnering including weight sharing, counter balancing, momentum/leverage, lifting and moving responsively.
Restriction: Permission of ARHU-Dance department.

DANC429 Advanced Ballet Technique II (1 Credit)
Intensive work in ballet technique for the professionally-oriented dancer.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 3 credits.

DANC448 Modern Dance V (3 Credits)
Complex phrases of modern dance movement with emphasis on articulation and expression.
Prerequisite: DANC349; and must audition.
Repeatable to: 6 credits.

DANC449 Modern Dance VI (3 Credits)
Continuation of DANC448.
Prerequisite: DANC448; and permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC466 Laban Movement Analysis (3 Credits)
Introduction to Rudolf Laban's system of qualitative movement analysis in relation to understanding personal movement style. Application to dance performance, teaching, composition and research.

DANC468 Dance Repertory (3 Credits)
Form, content, music, design and performance of modern dance works.
Prerequisite: DANC349; and permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits if content differs.

DANC469 Study Abroad Special Topics IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

DANC479 Advanced Practicum in Dance (1-3 Credits)
Advanced level performing experience for the student dancer who has developed an advanced professional level of competence.
Repeatable to: 6 credits.

DANC485 Seminar in Dance (3 Credits)
Individual research leading to a presentation with written documentation of the process, serving as a culmination of undergraduate study for dance majors.
Prerequisite: DANC483.
Restriction: Must be in Dance program; and senior standing.

DANC488 Project-Based Learning (3 Credits)
A specific project, is addressed, in dance from the perspectives of the investigator, the creator/choreographer, and the performer. Projects are cross-disciplinary and/or cross-cultural, and may involve both on- and off-campus experiences.
Restriction: Permission of ARHU-Dance department.
Repeatable to: 6 credits if content differs.

DANC489 Special Topics in Dance (1-3 Credits)
Theoretical, choreographic, pedagogic, or performance study.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits if content differs.

DANC499 Practicum in Choreography, Production and Performance IV (1-6 Credits)
Advanced workshop in dance presentation, including performing, production and planned field experiences.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC600 Graduate Dance Research (3 Credits)
Supervised writing of reports and articles on selected dance subjects. Study of library resources and interviewing techniques. Preparation for written documentation of thesis project.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC604 Graduate Studies in Dance Pedagogy (3 Credits)
Curriculum writing, lesson planning, class structure, assessment/grading, and practice in dance pedagogy. Includes preparation of syllabi and studio teaching practice. This course counts towards teaching ceritification in the State of Maryland.
Restriction: Must be admitted to MFA in Dance; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC606 Pedagogy Practicum (1 Credit)
An embodied laboratory where students deepen their teaching practices and develop new and innovative curricular formats and structures for their dance studio courses. Students will serve as an apprentice to faculty instructors of record teaching a course in order to deepen their understanding of course content delivery. The course culminates in the student developing their own syllabus for the course they have attended for the semester.
Restriction: Permission of department.

DANC608 Graduate Choreography I: Creative Process (3-6 Credits)
Developing and defining individual choreographic voice and vision in a shared studio setting.
Restriction: Must be admitted to MFA in Dance; or permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits if content differs.

DANC610 Workshop in the Direction of Dance Production (1 Credit)
A lecture/laboratory course dealing with the relationship of the director to all of the activities involved in the presentation of a dance concert.
Prerequisite: DANC410; or students who have taken courses with comparable content may contact the department.

DANC611 Dance Technology and Media (1 Credit)
Project-based development of media and technological support for dance performance, archiving, and portfolio design, development and implementation.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC628 Graduate Ballet (1 Credit)
Execution of the vocabulary of ballet movement with technical accuracy.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 4 credits.

DANC647 Dance and Movement Practice (2 Credits)
Experiential studio work that generates common movement vocabulary and innovations of same in a shared, faculty-led exploration of movement for the purpose of generating vocabulary for technique, choreography, and pedagogy.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC648 Advanced Modern Dance Technique I (1 Credit)
Professional level training in contemporary dance techniques.
Prerequisite: DANC449; or admitted to the MFA in Dance program, or students who have taken courses with comparable content may contact the department.
Repeatable to: 6 credits.

DANC649 Advanced Modern Dance Technique II (1 Credit)
A continuation of DANC 648.
Prerequisite: DANC648; or students who have taken courses with comparable content may contact the department.
Repeatable to: 6 credits.

DANC678 Individual Movement Practice (2 Credits)
Students in consultation with the adviser, propose a specific movement practice and can select the practice from the range of technique offerings in the program. Additional work in documenting and providing evidence of growth towards individual outcomes is required.
Prerequisite: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 10 credits.

DANC679 Graduate Dance Performance (1 Credit)
An advanced performance course focusing on the restagings from noted scores of the choreographic works of significant artists in the field.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC689 Special Topics in Dance (1-6 Credits)
Special Topics in dance theory, research or creative projects.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 12 credits if content differs.

DANC698 Independent Study in Dance (1-3 Credits)
Directed independent study in theoretical topics.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC699 Thesis Writing Lab (1 Credit)
The final writing project in MFA dance degree demonstrates students' ability to write critically about their creative work in relation to the dance field at large. A successful written thesis demonstrates a familiarity with concepts from dance history and critical theory as well as an ability to analyze movement and choreography. During the thesis writing lab, each student organizes ideas and establishes individual goals for the written project.
Repeatable to: 3 credits.
Formerly: DANC689W.

DANC705 Arts Education (3 Credits)
History of arts education in the U.S., recent policy changes and trends, current and recent research findings, proposed legislation at the state and federal level and the relationship of research designed to, in part, prepare students to be K-12 arts education and/or researchers and/or policy professionals.

DANC708 Graduate Choreography II: Collaboration (3-6 Credits)
Collaborative work across disciplines and genres.
Restriction: Must be admitted to MFA in Dance; or permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC719 Graduate Choreography III: Projects (3 Credits)
Research-based choreographic projects in preparation for the choreographed thesis project.
Restriction: Must be admitted to MFA in Dance; or permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC766 Graduate Movement Observation and Analysis (3 Credits)
Aspects of cultural and nonverbal analysis, developmental movement, kinesiological analysis, Laban Movement Analysis, with the goal of developing the student/teacher's ability to observe macro and micro levels of detail.
Restriction: Must be admitted to MFA in Dance; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC777 Internship in Dance (1-5 Credits)
Internship in dance advocacy, administration, education, community building, choreography, or performance with an agency off campus and with a national or international profile.
Restriction: Must be admitted to MFA in Dance; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC779 Master's Tutorial for Performance (1 Credit)
Supervised performance experience for advanced dancers.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC784 Dance in a Global Context (3 Credits)
Topics that illuminate dance in global context and provides an overview of methods, challenges and perspectives to the study of dance cross-culturally will be considered. Simultaneously, surveys select dance practices spanning many geographical areas, and offers insight into the diverse social, cultural, religious, and political environments from which dance extends.
Restriction: Must be admitted to MFA in Dance; or permission of ARHU-School of Theatre, Dance & Performance Studies department.

DANC788 Master's Tutorial for Choreography (1-3 Credits)
Supervised production and presentation of a significant choreographic project.
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.
Repeatable to: 6 credits.

DANC789 Directed Study in Dance Theory (2-6 Credits)
Advanced directed study in dance history, theory or criticism culminating in a paper for presentation or publication.
Repeatable to: 6 credits if content differs.

DANC799 Master's Thesis Project (1-6 Credits)
Restriction: Permission of ARHU-School of Theatre, Dance & Performance Studies department.

ECON - Economics

ECON401 Current Issues in American Economic Policy (3 Credits)
Analysis of current economic problems and public policies. Topics could include poverty, income inequality, social insurance, education, environmental sustainability, immigration, and innovation. Other issues may be substituted depending on current events.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON424, ECON422, ECON426).
Restriction: Permission of BSOS-Economics department; Must be in Economics Bachelor of Arts program.

ECON402 Macroeconomic Models and Forecasting (3 Credits)
Analysis of the fluctuations in economic activity and the formulation and use of forecasting models of the economy. Illustrations of computer macro models and forecasting problems.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.

ECON406 Advanced Microeconomics (3 Credits)
Expands on the assumptions of rational decision-making used in intermediate microeconomics and develops more complicated, more realistic models which address uncertainty, intertemporal choices, strategic interactions, social preferences and considerations of what is fair.
Prerequisite: Minimum grade of C- in ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT401).
Restriction: Must be in Economics Bachelor of Science program.

ECON407 Advanced Macroeconomics (3 Credits)
An in-depth analysis of current issues in macroeconomic theory and policy. Topics covered include: 1. alternative perspectives on macroeconomics including monetarism, new classical equilibrium models, rational expectations, and real business cycle models; 2. long term growth, the slowdown in productivity growth, and concerns about U.S. competitiveness; 3. the effectiveness of macroeconomic policy in an open economy; 4. the effects of finance on the real sector.
Prerequisite: Minimum grade of C- in ECON325; and 1 course with a minimum grade of C- from (ECON321, STAT401).
Restriction: Must be in Economics Bachelor of Science program.

ECON410 Comparative Economic Institutions (3 Credits)
Institutions are the sets of rules that constrain the decisions and interactions of economic agents. The course uses economic analysis to understand both formal institutions (e.g. laws) and informal institutions (e.g. cultural norms). Practical examples are drawn from economics, law, and politics, and reflect the experience of many different countries.
Prerequisite: Minimum grade of C- in ECON325 and ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT401).
Restriction: Must be in Economics Bachelor of Science program.

ECON412 Economic History and Modern Development (3 Credits)
Analysis of major economic, political, and social change in the developed world since 1800. This includes factors contributing to increases in economic performance, changes in the form of government, technological change (including industrialization), and integration and disintegration of the global economy. Emphasis is on institutional changes in how societies organize economic and political activities.
Prerequisite: Minimum grade of C- in ECON325 and ECON326.
Restriction: Must be in Economics Bachelor of Science program.

ECON414 Game Theory (3 Credits)
Studies the competitive and cooperative behavior that results when several parties find that their individual outcomes are jointly determined. Students will learn how to use game theory to analyze situations of potential conflict. Applications are drawn from economics, business, and political science.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT400).
Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science).
Credit Only Granted for: CMSC474, ECON414, GVPT399A or GVPT390.

ECON415 Market Design (3 Credits)
Focuses on recent developments in the design of markets to improve economic performance and to open new economic opportunities. It is divided into three main segments -- auction design, the design of matching mechanisms, and antitrust theory and policy.
Prerequisite: Minimum grade of C- in ECON414.
Restriction: Must be in Economics Bachelor of Science program.

ECON416 Analysis of Economic Development (3 Credits)
Analysis of the determinants and influences on economic development. Emphasis on both theoretical models and econometric methods of explaining why some countries are poor, along with examination of policies to promote development.
Prerequisite: Minimum grade of C- in ECON325, ECON326, and ECON422.
Restriction: Must be in Economics Bachelor of Science program.
Credit Only Granted for: ECON315 or ECON416.

ECON417 Estimating Policy and Program Impact (3 Credits)
Governments, businesses, non-profits, funders, and other organizations must allocate scarce resources between competing uses. Understanding the causal effect of policies, programs or investments on key outcomes can guide the choices of these decision-makers. Correlations between policies and outcomes or changes in outcomes after new policies are adopted are rarely sufficient for estimating the causal effect, however. This course focuses on econometric strategies for obtaining unbiased causal estimates, including experimental methods, instrumental variables, regression discontinuity, and differences-in-differences. There will be an emphasis on using Stata and on interpreting the results of econometric analysis
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326) and 1 course with a minimum grade of C- from (ECON424, ECON422).
Restriction: Permission of BSOS-Economics department; Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science).

ECON418 Economic Development of Selected Areas (3 Credits)
Economic and institutional characteristics of a specific geographic area are identified and discussed, and alternate strategies and policies for development are analyzed.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON306, ECON325, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.
Repeatable to: 6 credits if content differs.

ECON422 Econometrics (3 Credits)
Emphasizes the interaction between economic problems and the assumptions employed in statistical theory. Formulation, estimation, and testing of economic models, including single variable and multiple variable regression techniques, theory of identification, and issues relating to inference.
Prerequisite: 1 course with a minimum grade of C- from (ECON325, ECON326); and 1 course with a minimum grade of C- from (ECON321, STAT401).
Restriction: Must be in Economics Bachelor of Science program.
Credit Only Granted for: ECON422, ECON424, or AREC422.

ECON423 Advanced Topics in Econometrics (3 Credits)
Interaction between economic problems and specification and estimation of econometric models. Topics may include: autocorrelation, heteroscedasticity, functional form, simultaneous equation models, logit and probit models, instrumental variables, qualitative choice models, and other computational methods.
Prerequisite: Minimum grade of C- in ECON422.
Restriction: Must be in Economics Bachelor of Science program.

ECON424 Applied Econometrics (3 Credits)
Provide the knowledge and skills necessary to accomplish and utilize basic applied econometric analysis utilized by many business service providers, government agencies, and nonprofits engaged in policy analysis. Topics include simple and multiple regressions using cross section, time series, and panel data, issues of heteroskedasticity, serial correlation, and multicollinearity, models with binary dependent variable, and program evaluation. Course emphasizes application of knowledge using software packages but still covers essential theoretical background.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON306, ECON325, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.
Credit Only Granted for: ECON422, ECON424 or AREC422.

ECON425 Mathematical Economics (3 Credits)
Covers mathematical tools and skills utilized in upper undergraduate and master's level coursework in Economics and Public Policy. Reviews calculus and math of finance and growth. Introduces techniques of optimization, linear algebra, and differential equations and connects them to micro and macro theory and applications. Topics will also include coverage of probability theory to explore how economists model uncertainty, as well as economic applications of integration.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326).
Restriction: Must be in Economics Bachelor of Arts program.

ECON426 Economics of Cost-Benefit Analysis (3 Credits)
Study of how to use cost benefit analysis and other similar tools of applied microeconomics to conduct policy analyses. Cost-benefit analysis is an empirical method of identifying an optimal choice from a set of policy alternatives, where optimal is defined in terms of economic efficiency. Real world examples are addressed, so that students understand limitations of the methods and also interactions of economic analysis with political and administrative processes.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON306, ECON325, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.

ECON427 Experimental Economics (3 Credits)
An introduction to the methodology of experimental economics and its application to issues such as decision-making under uncertainty, auctions, and public goods. Also an introduction to behavioral economics as a relatively new area of economic research.
Prerequisite: Minimum grade of C- in ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT401).
Restriction: Must be in Economics Bachelor of Science program.

ECON433 Economics of Big Data (3 Credits)
The importance of big data in the global economy is rising. Students will explore the definition and characteristics of big data, the impact of big data on individuals, use of big data by firms, entrepreneurs and non-profits, as well as how big data reshapes various public policies.
Prerequisite: Minimum grade of C- in ECON326 and 1 course with a minimum grade of C- from (ECON321, STAT401).
Restriction: Must be in Economics Bachelor of Science program.

ECON434 The Economics of Information and Uncertainty (3 Credits)
How do rational agents make decisions when faced with uncertainty? How do markets and other institutions deal with risks? How do markets behave when some actors are better informed than others? What incentives influence whether economic decision-makers hide or reveal information? Topics include the value of information, the purchase of warranties, agency problems in management, adverse selection and moral hazard in insurance, and signaling in education.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT400).
Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science).
Credit Only Granted for: ECON498U or ECON434.
Formerly: ECON498U.

ECON435 Financial Markets and the Macroeconomy (3 Credits)
The different types of financial assets that exist, the markets that they trade in, and the determination of their prices and rates of return are examined. Specific topics that will be covered include the Markowitz portfolio selection model, the capital asset pricing model, the arbitrage pricing theory, the efficient markets hypothesis, the term structure of interest rates, and options. There will be almost no emphasis on issues in corporate finance.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program; and must not have completed BMGT343.
Credit Only Granted for: BMGT343 or ECON435.
Additional Information: Finance majors will not receive credit for ECON435.

ECON436 Financial Econometrics (3 Credits)
An introduction to financial econometrics, which is data science applied to understanding the financial system. Students will learn modern techniques in financial econometrics with an emphasis on the interaction between modeling (theory) and empirical analysis. Topics include relevant economic theory, optimization techniques, probability models, statistical analysis, and use of statistical software.
Prerequisite: Minimum grade of C- in ECON325 and ECON422.
Restriction: Must be in Economics Bachelor of Science program.

ECON441 Theory of International Economics (3 Credits)
Theoretical treatment of international trade and international finance. Includes Ricardian and Heckscher-Ohlin theories of comparative advantage, analysis of tariffs and other trade barriers, international factor mobility, balance of payments adjustments, exchange rate determination, and fiscal and monetary policy in an open economy.
Prerequisite: Minimum grade of C- in ECON326 and ECON325.
Restriction: Must be in a major within the BSOS-Economics department; and must not have completed ECON340, ECON442, or ECON443.
Credit Only Granted for: ECON340, ECON441, ECON442, or ECON443.

ECON442 Globalization and Capital Markets (3 Credits)
Uses models of open-economy macroeconomics to explain the causes and consequences of international capital flows. Analysis is made of private consumption, investment, the government sector, current accounts, the labor market, and the money and foreign exchange markets in small open economies. This framework is then used to study examples of how speculative attacks on currencies, sudden reversals of capital inflows, and the effects of the lack of credibility of economic policy affect economic development.
Prerequisite: Minimum grade of C- in ECON326 and ECON325; and 1 course with a minimum grade of C- from (ECON321, STAT401).
Restriction: Must be in Economics Bachelor of Science program; and must not have completed ECON441.
Credit Only Granted for: ECON441 or ECON442.

ECON443 International Trade and Trade Policy in the New Global Economy (3 Credits)
Examines the economics of international economic integration, including the theory of customs unions and free trade areas, the role of GATT and the WTO, changes in individual countries' foreign trade policies during the new era of globalization, the special role of multinational firms in world trade, and recent controversies about the benefits and costs of globalized trade.
Prerequisite: 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program; and must not have completed ECON441.
Credit Only Granted for: ECON441 or ECON443.

ECON444 Research in Globalization (3 Credits)
As globalization continues, individual countries must confront a variety of related issues including rising inequality, decline of domestic industries, climate change, and disputes over intellectual property rights. Various economic models and research methods will be covered to develop the analytic and empirical skills needed to perform independent research in globalization. Students will prepare literature reviews, conduct preliminary empirical investigations using STATA, and produce well-designed research proposals.
Prerequisite: Minimum grade of C- in ECON326 and ECON422.
Restriction: Must be in Economics Bachelor of Science program.
Credit Only Granted for: ECON498G or ECON444.
Formerly: ECON498G.

ECON451 Public Choice (3 Credits)
Analysis of collective decision making, economic models of government, program budgeting, and policy implementation; emphasis on models of public choice and institutions which affect decision making.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.

ECON453 Natural Resources and Public Policy (3 Credits)
Rational use and reuse of natural resources. Theory, methodology, and policies concerned with the allocation of natural resources among alternative uses. Optimum state of conservation, market failure, safe minimum standard, and cost-benefit analysis.
Prerequisite: AREC326, ECON306, or ECON326; and (BMGT230 or ECON230).
Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness; Agricultural and Resource Economics: Environmental and Resource Economics; Economics Bachelor of Arts; Environmental Science & Policy-Env Economics). Cross-listed with: AREC453.
Credit Only Granted for: AREC453 or ECON453.

ECON454 Public Finance and Public Policy (3 Credits)
The role of the the public sector in a market economy constitutes the over-arching topic of this course. Emphasis lies on analyzing government expenditure programs and the microeconomics of tax policy.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, STAT400, ECON321).
Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science).

ECON455 Economics of Education Policy (3 Credits)
Examines the role that government plays in providing and financing education. Analyzes why people invest in education. Considers the effects of education on long-term social and economic outcomes, the behavior of institutions that produce education, and how to design and implement public policies affecting the level and distribution of educational resources. Uses microeconomic models and empirical findings to analyze current issues in education policy.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.
Credit Only Granted for: ECON468E or ECON455.
Formerly: ECON468E.

ECON456 Law and Economics (3 Credits)
Relationship of the exchange process to the system of institutions and rules that society develops to carry out economic transactions. Topics covered include: Property rights; torts, negligence, and liability; contracts and exchanges; criminal control and enforcement; equity and efficiency issues .
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.

ECON458 Special Topics in Study Abroad IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Prerequisite: At least one intermediate theory course and/or statistics.
Repeatable to: 15 credits if content differs.

ECON460 Industrial Organization (3 Credits)
Examines different theoretical models of firm behavior in markets with varying amounts of market power. Relates theory to specific industries and examines how market structure evolves over time.
Prerequisite: Minimum grade of C- in ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT401).
Restriction: Must be in Economics Bachelor of Science program.

ECON461 Economics of Regulation and Anti-trust (3 Credits)
Considers government intervention in economic activity of three types: antitrust policy, regulation of natural monopolies, and health safety regulation. Covers theoretical models, real-world policy applications, and empirical studies relevant to the impact of regulation.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321).
Restriction: Must be in Economics Bachelor of Arts program.

ECON462 Economics of Entrepreneurship (3 Credits)
Economic theory highlights the role of entrepreneurs in fueling economic growth and accomplishing reallocation of resources in response to changes in preferences, technology, demographics, and resource. This course uses empirical evidence to examine the extent to which these predictions are valid. To more fully understand the motivations and constraints relevant to entrepreneurs, student will write a business plan as if s/he were starting a new business.
Prerequisite: Minimum grade of C- in ECON422.
Restriction: Must be in Economics Bachelor of Science program.
Credit Only Granted for: ECON398O or ECON462.
Formerly: ECON398O.

ECON463 Economics of Sports (3 Credits)
The application of theoretical and empirical economic tools to the sports industry, including competition at professional,collegiate, and international levels. Microeconomic models from labor, industrial organization and public finance will be applied to the sports industry and combined with data from sports markets, providing students with opportunities to produce and interpret economic analysis. The topic of discrimination will also be explored in the context of this particular economic activity.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, ECON321, STAT400).
Restriction: Must be in Economics Bachelor of Arts program.

ECON465 Health Economics (3 Credits)
Analyze markets for health care and related products by understanding the incentives and constraints for various participants, including individuals, family units, doctors, pharmaceutical companies, hospitals, and insurance providers. Analysis will combine both theoretical models and empirical tools.
Prerequisite: Minimum grade of C- in ECON326; and 1 course with a minimum grade of C- from (ECON321, STAT401).
Restriction: Must be in Economics Bachelor of Science program.

ECON468 Special Topics in Applied Economics (3 Credits)
Selected topics in applied economics. Designed to meet the changing interests of students and staff.
Prerequisite: 1 course with a minimum grade of C- from (BMGT230, ECON230); and 1 course with a minimum grade of C- from (ECON305, ECON306).
Restriction: Must be in Economics Bachelor of Arts program.
Repeatable to: 15 credits if content differs.

ECON470 Labor Economics: Theory and Evidence (3 Credits)
Analysis of labor markets in theory and the real world. Topics include labor supply, labor demand, human capital, performance incentives, unemployment, discrimination, and immigration. Students will develop an understanding of how formal economic research is used to analyze U.S. labor markets and how research influences policy debates.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, BMGT230, STAT400, ECON321).
Restriction: Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science).
Credit Only Granted for: ECON470 or ECON471.

ECON471 Labor Market Policies and Research (3 Credits)
Economic analysis of labor based on modern theory and empirical analysis. Focus on public policy, studying the interactions between labor demand and labor supply in the labor market and how policies impact those interactions. Possible policies include welfare policy, minimum wage policy, immigration policy, and anti-discrimination policies. Uses statistical software to summarize and create visualizations of economic data.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON424, ECON422).
Restriction: Permission of BSOS-Economics department; Must be in one of the following programs (Economics Bachelor of Arts; Economics Bachelor of Science).
Credit Only Granted for: ECON470 or ECON471.

ECON472 Economics of Social Safety Nets (3 Credits)
Analysis of the economic issues associated with social safety nets. Topics to be covered include the cash transfer programs for breaking the cycle of poverty, labor market policies aimed at combating unemployment, childhood interventions to improve human capital development, and the challenges faced by pension systems over the world. The approach is based on a life-cycle perspective. Evidence and experiences from developed and developing countries will covered.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and minimum grade of C- in ECON424.
Restriction: Permission of BSOS-Economics department; Must be in Economics Bachelor of Arts program.

ECON481 Environmental Economics (3 Credits)
An exploration of the use of economic incentives for protection of the environment and the determination of appropriate (or efficient) level of environmental quality. Also covers the choice of policy instruments for the attainment of environmental standards.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230).
Restriction: Must be in one of the following programs (Agricultural and Resource Economics; Agricultural and Resource Economics: Agribusiness; Environmental Science & Policy-Env Economics; Agricultural and Resource Economics: Environmental and Resource Economics; Economics Bachelor of Arts program). Cross-listed with: AREC481.
Credit Only Granted for: ECON481 or AREC481.

ECON484 The Economics of Climate Change (3 Credits)
The role of economics in the formation of climate policy; basic concepts of environmental economics including efficiency, externalities, and policy instruments; economic models of intertemporal decisions and decision making in the face of uncertainty. Applied economic analysis of specific issues and current policy initiatives.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230). Cross-listed with: AREC454.
Credit Only Granted for: AREC454 or ECON484.

ECON485 Economics of Land Use (3 Credits)
Fundamentals of location theory. Microeconomics of land use decisions, including determination of rent and hedonic pricing models. Impacts of government decisions on land use, including regulation (e.g., zoning), incentives (transferable development rights), provision of public services, and infrastructure investments. Impacts of land use on environmental quality, including issues relating to sprawl, agricultural land preservation, and other topics of special interest.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230). Cross-listed with: AREC455.
Credit Only Granted for: AREC455 or ECON485.

ECON486 Energy and Environmental Economics (3 Credits)
Economic theory and empirical methods are used to study problems of energy, the environment, and the economy. It examines the extraction, production, and use of energy and market institutions and regulatory approaches used to correct market failures. Topics covered include: oil and natural gas markets, management and design of electricity markets, renewable energy, non-market valuation , climate change, and transportation policies.
Prerequisite: 1 course with a minimum grade of C- from (AREC326, ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230). Cross-listed with: AREC456.
Credit Only Granted for: AREC456 or ECON486.

ECON488 Applied Research Practicum (1-3 Credits)
Students gain experience applying economic knowledge and producing research valued by businesses, non-profits, and/or government agencies. Students engage in activities similar to what an intern or entry-level employee would perform. Students work in small groups to find different kinds of data and facts, analyze and interpret this information, and use research findings to develop and present recommendations for simulated clients.
Prerequisite: 1 course with a minimum grade of B- from (BMGT230, ECON321, ECON230); and 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326).
Recommended: ECON422, ECON402, or ECON424.
Restriction: Permission of BSOS-Economics department.
Repeatable to: 6 credits if content differs.

ECON489 Applied Economics Practicum (1-3 Credits)
Students gain experience explaining economic knowledge to people who have not studied economics. Students engage in activities preparing them for careers in banking, business consulting, financial education, wealth management, and related services.
Restriction: Permission of BSOS-Economics department.
Repeatable to: 6 credits if content differs.

ECON490 Urban & Regional Economics: Issues and Policies (3 Credits)
Exploration of urban and regional economics and policies, including economic forces leading to formation of city and regional networks. Conceptual and empirical analysis of policies affecting land use, housing, transportation and other aspects of sub-national economic development.
Prerequisite: 1 course with a minimum grade of C- from (ECON306, ECON326); and 1 course with a minimum grade of C- from (ECON321, BMGT230, ECON230).
Restriction: Must be in Economics Bachelor of Arts program.
Credit Only Granted for: ECON398I or ECON490.
Formerly: ECON398I.

ECON498 Special Topics in Economic Analysis (3 Credits)
Selected topics in economic analysis. Designed to meet the changing interests of students and staff.
Prerequisite: 1 course with a minimum grade of C- from (ECON321, STAT401); and 1 course with a minimum grade of C- from (ECON325, ECON326).
Restriction: Must be in Economics Bachelor of Science program.
Repeatable to: 15 credits if content differs.

ECON499 Independent Research in Economics (1-3 Credits)
Directed research under the supervision of a faculty member. Contact department for additional information.
Prerequisite: 1 course with a minimum grade of C- from (ECON230, ECON321, BMGT230, STAT400); and 1 course with a minimum grade of C- from (ECON305, ECON325); and 1 course with a minimum grade of C- from (ECON306, ECON326); and minimum of 3 credits from ECON400-499 course range.
Restriction: Permission of BSOS-Economics department.
Repeatable to: 6 credits if content differs.

ECON601 Macroeconomic Analysis I (3 Credits)
Introductory technical treatment of standard Keynesian, classical and new classical macroeconomic models. Expectations formation and microeconomic foundations of consumption, investment, money demand, and labor market behavior.
Restriction: Permission of BSOS-Economics department.

ECON602 Macroeconomic Analysis II (3 Credits)
Further issues regarding macroeconomic topics. First half emphasis will be placed on dynamic macroeconomic theory as pertaining to monetary issues, policy ineffectiveness and effectiveness. The second half of the course will focus on theories of investment and growth.
Prerequisite: ECON601; or permission of BSOS-Economics department.

ECON603 Microeconomic Analysis I (3 Credits)
A detailed treatment of the theory of the consumer and of the firm, particularly emphasizing the duality approach. Topics include the household production model, imperfect competition, monopolistic and oligopolistic markets.
Restriction: Permission of BSOS-Economics department.

ECON604 Microeconomic Analysis II (3 Credits)
Analysis of markets and market equilibria; the Arrow-Debreu model of general equilibrium, the two-sector model, welfare theorems, externalities, public goods, markets with incomplete and asymmetric information.
Prerequisite: ECON603.
Restriction: Permission of BSOS-Economics department.

ECON611 Seminar in American Economic Development (3 Credits)
Selected topics in the long-term movements of the American economy. Quantitative studies of the growth of output; applications of econometric methods and economic theory to topics in American economic history.
Restriction: Permission of BSOS-Economics department.

ECON613 Origins and Development of Capitalism (3 Credits)
Institutions and technology shaping pre-capitalist economies: Archaic, Greek and Roman, Feudal, and Mercantile. Rise of the market system, national economies, and capitalism. The nature of industrial society. Imperialism.

ECON615 Development Economics I (3 Credits)
Explore both the causes and consequences in development economics from a historical and scientific approach. Presents theoretical models and applied work that test alternative hypotheses. Explore models of economic growth and institutions, with emphasis on property rights and political regimes as causal factors affecting development. Discuss empirical methods widely used in the field and important related topics including poverty, inequality, education and health.
Prerequisite: ECON603; or permission of BSOS-Economics department.

ECON616 Economic Development II (3 Credits)
Survey of a variety of models explaining how market failures may lead to poverty and underdevelopment, with an emphasis on the empirical evaluation of constraints faced by individuals in developing countries and the programs that attempt to alleviate those constraints. Topics include: agricultural and land markets, labor markets, human capital in developing countries, credit markets, and consumption smoothing and risk coping.
Prerequisite: ECON615, ECON603, and ECON604; or permission of BSOS-Economics department.

ECON623 Econometrics I (3 Credits)
An overview is provided of modern microeconometric methods with a focus on reduced form causal inference. Tools discussed include linear regression and selection on observables, instrumental variables including LATE and the role of heterogeneity in causal inference, difference-in-difference, regression discontinuity, synthetic control, matching, propensity score methods, and inverse probability weighted estimation. In addition, inferential issues such as weak instruments and techniques for robust standard errors and clustering are discussed. The course places strong emphasis on relating statistical methods to substantive empirical applications. Each topic is introduced with an empirical paper that uses the technique. The discussion of technical material is at an intuitive level that focuses on applications and recommendations for empirical practice. The course offers an opportunity to work on a number of extended empirical exercises that are based on published papers and original data.
Prerequisite: Must have advanced knowledge of probability, statistics, and linear algebra.
Restriction: Permission of BSOS-Economics department.

ECON624 Econometrics II (3 Credits)
A continuation of ECON623. Topics include: Nonlinear models and nonlinear estimation methods (generalized method of moments and maximum likelihood estimation), panel data models, univariate dynamic models, multivariate dynamic models including simultaneous equation models, and non-parametric/semiparametric estimation methods. The course will also provide instructions on the use of a major statistical package such as Stata or TSP.
Prerequisite: ECON623; or permission of BSOS-Economics department.

ECON625 Computational Economics (3 Credits)
An examination of the specification, computation, estimation and interpretation of structural models that are widely used in Industrial Organization, and in a range of other applied microeconomic contexts (marketing and public, environmental, education and urban economics). The focus will be on the connections between these models and relevant economic theories, and on the details of their implementation in practice.
Prerequisite: ECON604 and ECON624.
Credit Only Granted for: ECON625 or ECON698R.
Formerly: ECON698R.

ECON626 Empirical Microeconomics (3 Credits)
An overview is provided of modern microeconometric methods with a focus on reduced form causal inference. Tools discussed include linear regression and selection on observables, instrumental variables including LATE and the role of heterogeneity in causal inference, difference-in-difference, regression discontinuity, synthetic control, matching, propensity score methods, and inverse probability weighted estimation. In addition, inferential issues such as weak instruments and techniques for robust standard errors, clustering, bootstrap and randomized inference are discussed, time permitting. The course places strong emphasis on relating statistical methods to substantive empirical applications. Each topic is introduced with an empirical paper that uses the technique. The discussion of technical material is at an intuitive level that focuses on applications and recommendations for empirical practice. The course offers an opportunity to work on a number of extended empirical exercises that are based on published papers and original data. Students practice working with data, implementing code in Stata and conducting their own empirical analysis. These exercises also offer practice in scientific writing relevant for empirical work.
Prerequisite: ECON624.
Restriction: Must be in Economics (Doctoral) program.

ECON630 Computational Methods in Macroeconomics (3 Credits)
Essential computational methods used in macroeconomics. There will be particular focus on approximating the solution to dynamic stochastic general equilibrium models. Methods for representative-agent and heterogeneous-agent models will be extensively studied. Econometric methods such as Generalized Method of Moments, Maximum Likelihood, Vector Autoregressions wil also be covered.
Prerequisite: ECON602 and ECON601.
Restriction: Must be in one of the following programs (Economics (Master's); Economics (Doctoral)) ; or permission of BSOS-Economics department.

ECON635 Experimental Economics (3 Credits)
An introduction to the methodology of laboratory and field experiments. The course concentrates on a series of experiments to show how experiments build on one another, allowing researchers with different theoretical dispositions to narrow the range of potential disagreement.
Restriction: Permission of instructor.

ECON636 Behavioral Economics (3 Credits)
An exploration of how people make decisions, questioning the concept of "perfect rationality" in the standard economic theory, providing improved models in line with the observed biases of decision makers. Focusing on decision making under risk and ambiguity, endowment effect, status quo bias, loss aversion, intertemporal choice, and selfish and pro-social preferences.
Prerequisite: ECON603 and ECON604; and permission of BSOS-Economics department.

ECON637 Decision Theory (3 Credits)
Decision making is a process in which we select a course of action among available options. This course will explore the various behavioral biases observed in decision making processes by adjusting our normative theories to capture these biases.
Prerequisite: ECON603 and ECON604.
Restriction: Must be in the Economics program; or must have completed ECON603 and ECON604 with a letter grade of B+ or better.
Credit Only Granted for: ECON698B or ECON637.
Formerly: ECON698B.

ECON641 Microeconomic Analysis (3 Credits)
Microeconomic analysis applied to public policy problems with an emphasis on practical examples and how they illustrate microeconomic theories. Policy issues such as pollution, welfare and income distribution, market design, industry regulation, price controls, tax policy and health insurance are practical examples used to illustrate the abstract principles of microeconomics.
Restriction: Must be in M.Prof.Studies: Applied Economics program; or permission of BSOS-Economics department.
Credit Only Granted for: ECON641 or ECON506.
Formerly: ECON506.

ECON642 Topics in Applied Macroeconomics (3 Credits)
Focus is on applied macroeconomic models used by federal agencies to explain and predict economic behavior. Course emphasizes macroeconomic data: NIPA accounts, GDP, construction and application of CPI, labor force data and economic indicators. Students will also study a selected set of current macroeconomic topics including models of economic growth, economic fluctuations, monetary policy, inflation and financial markets.
Restriction: Must be in M.Prof.Studies: Applied Economics program; or permission of BSOS-Economics department.

ECON643 Empirical Analysis I: Foundations of Empirical Research (3 Credits)
Fundamental aspects of data management and interpretation emphasizing sampling, descriptive statistics, index numbers and construction of aggregated variables. Students will learn probability theory, confidence intervals, hypothesis testing and regression analysis using the EXCEL spreadsheet program and STATA statistical software.
Credit Only Granted for: ECON643 or ECON521.
Formerly: ECON521.

ECON644 Empirical Analysis II: Introduction to Economic Models (3 Credits)
An introduction to econometric methods with applications to public policy analysis. Primary focus on application and interpretation of multiple regression analysis.
Prerequisite: ECON643.

ECON645 Empirical Analysis III: Econometric Modeling and Forecasting (3 Credits)
Study of empirical techniques that are particularly relevant to the analysis of microeconomic models. Emphasis is on advanced panel data methods, time series regressions, instrumental variables, limited dependent variables, and sample selection corrections.
Prerequisite: ECON644.
Credit Only Granted for: ECON645 or ECON523.
Formerly: ECON523.

ECON652 Public Economics I (3 Credits)
The characteristics and effects of government programs whose role is redistribution and social insurance are considered. Examples include cash welfare assistance, unemployment insurance, and Social Security. The focus is on U.S. programs, though other countries may be considered. Both theories of program design and empirical research on program effects will be covered. Topics in empirical methodology generally will also be stressed.
Prerequisite: ECON604 and ECON624.

ECON661 The Corporate Firm (3 Credits)
This course examines firms' strategic behavior in a variety of settings and considers theories of the firm and industrial structure. Topics may include product choice, quality, advertising, consumer search and switch costs, manufacturer-retailer relations, manufacturer-supplier relations, vertical integration, and alternative industrial structures.
Prerequisite: ECON604 and ECON603.

ECON662 Empirical Industrial Organization (3 Credits)
Dynamic models are important tools to understand intertemporal individual choices and industry evolution. The course discusses a number of issues estimating and solving dynamic models, complimenting and building on the methods and topics introduced in 625. The course also covers models of endogenous product choice, matching and market design. There will be two main sets of assignments, where students simulate data by solving models, estimate models based on simulated or real data and perform counterfactual analyses. The students will also be expected to submit a research proposal.
Prerequisite: ECON604 and ECON603.

ECON664 Empirical Studies in Industrial Organization (3 Credits)
Introduces students to the recent empirical literature of industrial organization. It consists of four themes: pricing and contracting; cartels, collusion and merger reviews; demand estimation; and information economics.
Prerequisite: ECON603, ECON604, and ECON624.
Credit Only Granted for: ECON664 or ECON698J.
Formerly: ECON698J.

ECON668 The Economics of Retail Systems (3 Credits)
This course is designed mainly but not exclusively for students in the third year of the economics Ph.D program and for students at a similar stage in a marketing program. Its main objective is to help the student generate their first professional research paper. In terms of interests it targets those in the area of microeconomics (advanced micro, industrial organization, or more generally applied microeconomics or micro aspects of any field). The course will be conducted as a seminar.
Repeatable to: 6 credits if content differs.

ECON670 Financial Economics (3 Credits)
The course applies microeconomic theory and applied econometric techniques to the study of financial institutions and markets for financial assets. Students will learn how economists model and estimate the value of financial assets. The economic and empirical models are of interest to public policy makers and private wealth managers. Specific topics can include financial intermediation, the regulation of financial institutions, risk management, portfolio theory, the capital asset pricing model and the efficient markets hypothesis.
Prerequisite: ECON641; and must have completed or be concurrently enrolled in ECON644.
Restriction: Must be in M.Prof.Studies: Applied Economics program.

ECON671 Economics of Health Care (3 Credits)
An examination of the structure, conduct and performance of the health care market, including a study of physician services, the pharmaceutical industry, the hospital market and health insurance. Extensive use of quantitative and analytic economic tools with special emphasis on regulatory response to market imperfections.
Prerequisite: ECON641; and must have completed or be concurrently enrolled in ECON645.
Credit Only Granted for: ECON671 or ECON565.
Formerly: ECON565.

ECON672 Program Analysis and Evaluation (3 Credits)
Students study the tools used to evaluate the effectiveness of public policies. All evaluations have weaknesses, and some have more weaknesses than others. You will learn how to distinguish high from low quality evaluations. We will discuss the basic economics and econometrics of program evaluation, focusing on the application of methods used for causal inference and cost-benefit analyses in public policy contexts. We will examine published evaluation research with the intent of showing how the research does or does not lead to clear conclusions regarding program performance.
Prerequisite: ECON641 and ECON645.

ECON673 Information, Game Theory and Market Design (3 Credits)
A study of the strategic decision-making and the theory and practice of market design. Focus is on the design of organized market and incentives created by market rules. Topics include online auction markets, government auctions procurement auctions and matching markets. The analysis includes documenting the rules of real-world markets, game theoretic analysis, empirical analysis, and experimental work.
Prerequisite: ECON641; and must have completed or be concurrently enrolled in ECON644.

ECON674 Economic Analysis of Law (3 Credits)
A study of the application of economics to law with a focus on game theory, strategic behavior and public policy.
Prerequisite: ECON641; and must have completed or be concurrently enrolled in ECON644.

ECON675 Environmental Economics (3 Credits)
A study of the nature of environmental regulation focusing on U.S. environmental policies and policy debates.
Prerequisite: ECON641; and must have completed or be concurrently enrolled in ECON645.

ECON676 Economic Development (3 Credits)
Analysis of economic development. The course will focus on the consequences of poverty and poor institutions for the behavior and welfare of individuals, households, firms and the aggregate economy in developing countries. Theoretical models and empirical evidence will be used to understand the intended and unintended consequences of policies designed to enhance economic development.
Prerequisite: ECON641; and ECON642; and must have completed or be concurrently enrolled in ECON644.
Restriction: Must be in M.Prof.Studies: Applied Economics program.

ECON677 International Trade and Applications (3 Credits)
A mix of theory and empirical work. Students will analyze the causes and consequences of international trade. The course will cover a set of conceptual tools that are useful for understanding "globalization" and the usage of these tools to address interesting and important questions about how countries, firms, and workers respond to international trade.
Prerequisite: ECON641 and ECON644.
Restriction: Must be in MS Applied Economics program; or with permission from the program director.

ECON681 Comparative Institutional Economics I (3 Credits)
Theory, empirics, and practice of economic institutions. Genesis, functions, and effects of institutions. Examinations of three major institutions, property, contract, and decentralization. Historical, cultural, political, and economic origins of institutions. Case studies from English history, comparative legal studies, China, history of world economic development, transition, and socialism. Perspectives from law and economics, contract theory, and information theory.

ECON683 International Macroeconomics and Finance (3 Credits)
Economic analysis of international macroeconomic issues and policy. Topics can include the study of exchange rates, balance of payments, international financial markets, international business cycles, contagion, and the roles played by international economic institutions.
Prerequisite: ECON641 and ECON642; and must have completed or be concurrently enrolled in ECON644.
Restriction: Must be in M.Prof.Studies: Applied Economics program.

ECON684 Applied Time Series Analysis and Forecasting (3 Credits)
This course builds on the brief introduction to time series econometrics offered in ECON 645. Students will learn the theory of stationary processes and how it applies to econometric techniques for estimation and forecasting based on time series data. The techniques will be applied in macroeconomic, financial and business applications.
Prerequisite: ECON642; and ECON645.
Restriction: Must be in M.Prof.Studies: Applied Economics program.

ECON687 Economics Applications of R Programming (3 Credits)
Builds on the data analysis and econometric skills learned in the Empirical analysis sequence of ECON 643, 644, and 645. The STATA skills acquired in that sequence, such as basic data manipulation and econometric estimation, will be extended to the R programming language. The fundamentals of more advanced scientific programming--objects, data structures, loops, functions, simulation, parallel computing--will be introduced with applications to economics and the social sciences. Additional emphasis is placed on good coding practices and tools for version control and collaboration such as Git and R Markdown.
Prerequisite: ECON645.
Restriction: Must be in Applied Economics Master of Science program; or permission of the program director.

ECON698 Selected Topics in Economics (3 Credits)

ECON699 Applied Economics Internship Experience (1-3 Credits)
Variable credit course for MS Applied Economics and Economic Analysis graduate certificate students participating in internships with well-established organizations and regular supervision from experienced professionals.
Restriction: Must be the Applied Economics Master's Program (ECAO or ECAM), or Economic Analysis Certificate Program (Z074 or Z098); and permission of program director.
Repeatable to: 6 credits.
Additional Information: Students may only earn credits during the term in which they are participating in the internship.

ECON701 Advanced Macroeconomics I (3 Credits)
Recent developments in macroeconomics with an emphasis on topics and techniques useful for conducting research in macroeconomics. Topics include advanced treatment of fiscal and monetary policy issues; the role of imperfect competition; real, sectoral and nominal business cycle models.
Prerequisite: ECON602 and ECON601.

ECON702 Advanced Macroeconomics II (3 Credits)
Recent advances in the fast-growing subfield of behavioral macroeconomics, with applications to business cycles and monetary economics. We will discuss surveys and controlled laboratory experiments that test the full information rational expectations (FIRE) hypothesis, and characterize deviations from FIRE in individual beliefs and actions, and we will study models that relax both the FI and the RE assumptions in general equilibrium settings, to bridge the gap between individual biases and constraints on the one hand and aggregate consequences and policy implications on the other.
Prerequisite: ECON602 and ECON601.

ECON703 Advanced Microeconomics I (3 Credits)
A formal treatment of game theory and its microeconomic applications is presented. Equilibrium concepts for static and dynamic games, and games with complete and incomplete information are studied. Topics also discussed: the relation between games in strategic form and games in extensive form, equilibrium refinement, Bayesian games, multi-dimensional mechanism design, dominant strategy and Bayesian implementation, Nash-in-Nash bargaining solutions.
Prerequisite: ECON604 and ECON603.

ECON704 Advanced Microeconomics II (3 Credits)
This is the second half of a two-semester sequence in Advanced Microeconomics, intended for second-year Ph.D. students. The course material varies from year-to-year, but currently it focuses on auction theory, matching theory, and the relationship between matching and auction theory. Other topics that are treated in some years include: sequential bargaining under incomplete information; and equilibrium refinements.
Prerequisite: ECON604 and ECON603.

ECON708 Advanced Topics in Applied and Theoretical Microeconomics (2 Credits)
Read, discuss, and analyze current topics in microeconomics, including public economics, environmental economics, labor economics, industrial economics, microeconomic theory, public choice and international trade. Specific topics covered will change from semester to semester depending on the students' and faculty's interests. Intended primarily for students beginning thesis research in economics.
Prerequisite: Must have completed a one-year graduate sequence in one of the microeconomic fields.
Repeatable to: 12 credits if content differs.

ECON709 Advanced Topics in Applied and Theoretical Macroeconomics (2 Credits)
Read, discuss, and analyze current topics in macroeconomics, including asset pricing models, models of economic growth, investment, and the labor market. Specific topics covered will change from semester to semester depending on the students' and faculty's interests. Intended primarily for students beginning thesis research in economics.
Prerequisite: Must have completed a one-year graduate sequence in one of the macroeconomic fields.
Repeatable to: 12 credits if content differs.

ECON721 Econometrics III (3 Credits)
Oriented towards macro-econometric methods. Topics covered will be selected from the following: Further discussion of topics covered in ECON624, non-stationary time series models (models with deterministic trends, unit roots, co-integration, error correction models, vector autoregressive models), econometric models of conditional heteroskedasticity (ARCH and GARCH models), Bayesian econometrics and methods for Bayesian computation, large-dimensional factor analysis, models of changes in regime, and methods for time series forecasting.
Prerequisite: ECON624; or permission of BSOS-Economics department.

ECON722 Econometrics IV (3 Credits)
Oriented towards micro-econometric methods. Topics covered will be selected from the following: Further discussion of topics covered in ECON624, binary and multinomial response models, censored and truncated regression models, sample selection models, count data models, duration models program evaluation and treatment effects methods, structural econometrics, the identification problem, stratified and clustered samples, spatial/cross sectional dependence models, dynamic panel data models, weak instruments, non-parametric estimation, boot strap and Jack Knife methods, pre-test estimators.
Prerequisite: ECON624; or permission of BSOS-Economics department.

ECON741 Advanced International Economics I (3 Credits)
International Business Cycles; Exchange Rate Determination; Imperfect Financial Markets; Deviations from Full Information Rational Expectations; Monetary and Exchange Rate Policy
Prerequisite: ECON601; or permission of BSOS-Economics department.

ECON742 Advanced International Economics II (3 Credits)
Comparative advantage, Heckscher-Ohlin theory, specific-factors model, empirical verification, economies of scale, imperfect competition, commercial policy, factor mobility.
Prerequisite: ECON603; or permission of BSOS-Economics department.

ECON743 Topics in International Finance (3 Credits)
Puzzles in international finance; portfolio balance, current account dynamics, exchange rate behavior; capital market imperfections; balance of payments crises.
Prerequisite: ECON602; or permission of BSOS-Economics department.
Recommended: ECON741.

ECON744 Advanced Topics in International Economics (3 Credits)
This is an advanced course in the intersection of international finance, trade, and macroeconomics. The goal is to integrate topics from the three fields and to understand the links between individual/micro and aggregate/macro outcomes in real and financial markets. Topics include firm sale and pricing behavior, consumer choice and aggregate responses---trade elasticities, real exchange rate fluctuations, risk sharing, portfolio choice, asset pricing anomalies, and information frictions.
Prerequisite: ECON601 and ECON602.
Credit Only Granted for: ECON698M or ECON744.
Formerly: ECON698M.

ECON745 Advanced Topics in International Trade (3 Credits)
Designed primarily for students planning to write dissertations on a topic related to international trade. Its focus is on recent research in this field including tests of trade theories; the effects of trade on growth and knowledge diffusion; the political economy of trade policy and the theory and practice of trade agreements.
Prerequisite: ECON604 and ECON624.
Credit Only Granted for: ECON698L or ECON745.
Formerly: ECON698L.

ECON747 The Macreconomics of Imperfect Capital Markets (3 Credits)
A field course designed for students who have completed introductory graduate course work in macroeconomics. The course is built around three main ideas. First, its objective is to understand the role of financial markets for fluctuations in the macroeconomy. More specifically, starting from a complete markets benchmark, we study canonical types of credit market frictions that give rise to macroeconomic effects. Second, the course aims to enhance the students' toolkit to carry out state-of-the-art research in macroeconomics in general. It provides plenty of practical exercise to take models (usually DSGE models with financial frictions) to the computer. Third, alongside the methodological content, we revisit empirical facts on the regularities of financial variables, the 2008-09 global financial crisis and the Covid-19 recession.
Prerequisite: ECON602 and ECON601; or (ECON604 and ECON603); or permission of BSOS-Economics department.
Restriction: Must be in one of the following programs (Economics (Master's); Economics (Doctoral)).
Credit Only Granted for: ECON698K or ECON747.
Formerly: ECON698K.

ECON752 Public Economics II (3 Credits)
Students will study a set of issues related to the government's role in the economy, focusing on government redistribution and social insurance. Major topics covered include the optimal design of government redistribution programs; theoretical and empirical analyses of major U.S. government transfer programs; the optimal design of social insurance programs; and theoretical and empirical analyses of major U.S. social insurance programs.
Prerequisite: ECON751.

ECON754 Theory of Political Economy (3 Credits)
Basic Electoral Models of Aggregating Preferences and Information. Political Participation and Voter Turnout. Pivotal and Ethical Voters. Opportunistic versus Policy-Motivated Candidates. Credibility of Policy. Political Agency and Accountability - Moral Hazard and Selection. Legislatures - Legislative Bargaining and Legislative Dynamics. Special Interest Politics. Campaign Financing. Political Polarization and Ambiguity. Behavioral Political Economy. Populism and Authoritarianism. Political Parties.
Prerequisite: ECON603 and ECON604; or permission of BSOS-Economics department.

ECON756 Empirical Political Economics (3 Credits)
An introduction to empirical political economy. Determinants of individual political behavior, the impact of political institutions on economic outcomes, and economic determinants of political institutions will all be analyzed. Modern applied econometric techniques will also be covered.

ECON757 Topics in Political Economy II (3 Credits)
A continuation of ECON754 Topics in Political Economy I. Topics will include: the informational role of special interest groups; campaign finance, including welfare analysis of campaign finance reform; advanced models of the political economy of redistribution, with emphasis on inefficient redistribution, intergenerational redistribution, and "pork barrel" politics; fairness and redistributive politics; the effects of alternative electoral systems; theoretical models of parliamentary democracies, government formation and political parties; accountability of government officials; and the political economy of federalism.
Prerequisite: ECON602 and ECON604; or permission of BSOS-Economics department.
Recommended: ECON754.

ECON771 Advanced Labor Economics: Theory and Evidence (3 Credits)
Provides students the theoretical background and econometric tools to engage and conduct research in labor economics. The course highlights the importance of a good balance between theory and solid empirical work. The topics include human capital, empirical earning functions, labor demand, incentive, discrimination, minimum wage, labor supply, tasks and skills, and inequality. In addition, it goes over essential topics in applied economics, including selection bias, instrumental variables, structural vs. reduced-form analysis, dynamic discrete choice models, and unobserved heterogeneity. During the term, students work with different data sets.
Prerequisite: ECON603 and ECON624; or permission of BSOS-Economics department.
Restriction: Must be in the Economics Doctoral program.

ECON772 Population Economics (3 Credits)
Covers the central ideas in population economics. These include theory and test of theories of mortality, fertility and immigration.
Prerequisite: ECON771; or permission of BSOS-Economics department.

ECON773 Topics in Applied Public and Labor Economics (3 Credits)
Explore topics in labor and public economics. Study the empirical evidence and the applied methodology used within labor and public economics. Discuss important topics in labor and public economics including immigration, education, discrimination, crime, and the role of family background. Provide instruction on how to perform empirical labor and public economic research by familiarizing students with available data sources, current research methodology, and practice with statistical packages such as Stata.
Prerequisite: ECON603, ECON604, and ECON623; and (ECON624 or ECON626).

ECON781 Valuing Environmental Benefits (3 Credits)
The theory and practice of valuing environmental benefits, including the health, recreation and aesthetic benefits associated with controlling air and water pollution, and the damages associated with climate change. Estimation of the benefits of energy efficiency improvements-including the benefits of fuel economy standards.
Prerequisite: ECON603; and ECON623. Or students who have taken courses with comparable content may contact the department.

ECON785 Advanced Economics of Natural Resources (3 Credits)
The use of exhaustible and renewable natural resources from normative and positive points of view. Analysis of dynamic resource problems emphasizing energy, mineral, groundwater, forestry, and fishery resources; optimal, equilibrium, and intergenerational models of resource allocation.
Prerequisite: Permission of AGNR-Agricultural & Resource Economics department; or (ECON603 and AREC623). Cross-listed with: AREC785.
Credit Only Granted for: AREC785 or ECON785.

ECON799 Master's Thesis Research (1-6 Credits)

ECON808 Workshop on Macroeconomics, International Macroeconomics and International Finance (2 Credits)
*
Restriction: Permission of BSOS-Economics department.
Repeatable to: 12 credits if content differs.

ECON818 Workshop in Microeconomic Theory (2 Credits)
Current research in microeconomic theory. Topics drawn from game theory, mathematical economics, and the economics of information and will include applications of the theory to diverse areas of economics. Specific topics: bargaining, auctions, mechanism design, signaling, general equilibrium, industrial organization theory, and financial markets theory.
Repeatable to: 12 credits if content differs.

ECON825 Advanced Economic Welfare Analysis (3 Credits)
Theory of economic welfare measurement, problems of path dependence in evaluating multiple price changes, welfare measurement under risk, general equilibrium welfare measurement with multiple distortions, and applications in evaluation of agricultural and resource policies.
Prerequisite: ECON604 and ECON603; or permission of BSOS-Economics department.
Credit Only Granted for: ECON825 or AREC825.

ECON828 Workshop in Econometrics (2 Credits)
Current research in econometrics. Topics drawn from theoretical and applied econometrics. Special topics include: maximum likelihood and generalized method of moments estimation of linear and non-linear models, analysis of stationary and non-stationary time series, cross section time series estimation, spatial estimation mehtods, Bayesian methods, semi-and non-parametic methods, rational expectations models, numerical methods, and various applications.
Repeatable to: 12 credits if content differs.

ECON848 Workshop in International Trade, Institutional Economics and Political Economy (2 Credits)
*
Restriction: Permission of BSOS-Economics department.
Repeatable to: 12 credits if content differs.

ECON858 Workshop in Public Economics (3 Credits)
Restriction: Permission of BSOS-Economics department.
Repeatable to: 6 credits if content differs.

ECON868 Workshop in Industrial Organization, Microeconomic Theory and Behavioral and Experimental Economics (2 Credits)
Workshops designed to provide a structured environment for our faculty and graduate students to meet regularly to discuss and present their research ideas.
Restriction: Permission of BSOS-Economics department.
Repeatable to: 12 credits if content differs.

ECON878 Workshop in Development, Labor and Public Economics (2 Credits)
*
Restriction: Permission of BSOS-Economics department.
Repeatable to: 12 credits if content differs.

ECON888 Workshop in Comparative Institutional Economics (2 Credits)
Current research in institutional economics and closely related fields such as economic transition, economic development, economic theory, law and economics, political economics, and economic history. Topics are drawn from both theoretical analysis of institutions and empirical studies of the effects and determinants of institutions.
Restriction: Permission of BSOS-Economics department.
Repeatable to: 12 credits if content differs.

ECON898 Pre-Candidacy Research (1-8 Credits)

ECON899 Doctoral Dissertation Research (1-8 Credits)

EDCI - Curriculum and Instruction

EDCI422 Student Teaching in Secondary Schools: Social Studies/ Geography (12 Credits)
Prerequisite: EDCI321.
Corequisite: EDCI420.

EDCI428 Field Experience in Secondary Social Studies Teaching (1 Credit)
Practical experience as an aide to a regular social studies teacher; assigned responsibilities and participation in a variety of teaching/learning activities. Students must reserve one full day per week for internship placement.
Corequisite: EDCI427.
Restriction: Must be in Secondary Educ: Social Studies program; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI438 Field Experience in Second Language Education (1 Credit)
Practical experience as an aide to a regular foreign language teacher; assigned responsibilities and participation in a variety of teaching/learning activities.
Corequisite: EDCI330.
Restriction: Permission of EDUC-Teaching, Learning, Policy and Leadership department; and must be in Secondary Educ: Foreign Languages program.
Repeatable to: 3 credits if content differs.

EDCI448 Student Teaching in Secondary Schools: Theatre/English (12 Credits)
Practical experience as an aide to a regular English, speech or drama teacher; assigned responsibilities and participation in a variety of teaching/learning activities.
Prerequisite: EDCI417.
Corequisite: EDCI440.
Restriction: Must be in Secondary Educ: English Language Arts program.

EDCI464 Assessment for Reading (3 Credits)
Examination of reading assessment theory, materials and procedures; Topics include validity and reliability in reading assessment, formal and informal assessment, reading instruction that is informed by ongoing assessment, and the effects of assessment on students and schooling in a diverse society.
Prerequisite: EDCI362.
Restriction: Senior standing. And must be in Elementary Education program; or must be in Early Childhood Education program.

EDCI474 Teaching Academically, Culturally, and Linguistically Diverse Students in Secondary Education (2 Credits)
Multi-disciplinary capstone course for Secondary Education majors. Discussion of pedagogical and content issues relevant for teaching academically, culturally, and linguistically diverse students with particular emphasis on students with special educational needs and English language learners. Students develop and use curriculum-based assessments and/or lessons with these groups of students.
Corequisite: Enrolled in internship/certification area.
Restriction: Must be in one of the following programs (Secondary Educ: Science; Secondary Educ: English Language Arts; Secondary Educ: Mathematics; Secondary Educ: Foreign Languages; Secondary Educ: Social Studies; Secondary Educ: Art) ; and minimum cumulative GPA of 2.75. Or permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI497 The Study of Teaching (3 Credits)
Identification and examination of learner and teacher outcome variables related to teaching systems, methods, and processes. Methods of conducting classroom research.
Prerequisite: EDCI481.
Corequisite: EDCI489.

EDCI498 Special Problems in Teacher Education (1-6 Credits)
Individual study of approved problems.
Restriction: Must be in a major within EDUC-Teaching, Learning, Policy and Leadership department; or must be in Curriculum and Instruction (Doctoral) program; or must be in Curriculum and Instruction (Master's) program; or permission of EDUC-Teaching, Learning, Policy and Leadership department.
Repeatable to: 6 credits.

EDCI499 Workshops, Clinics, and Institutes (1-6 Credits)
The following types of educational enterprise may be scheduled under this course heading: workshops conducted by the College of Education (or developed cooperatively with other colleges and universities) and not otherwise covered in the present course listing; clinical experiences in pupil testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals and supervisors.
Repeatable to: 6 credits.

EDCI618 Proseminar for Teaching Internship (1-3 Credits)
Supports and complements candidates' internship experiences. Extends skills in implementing less plans (lesson planning), culturally competent teaching, classroom management, issues of professionalism, and protfolio development.
Prerequisite: Admission to a masters certification program in EDCI.
Corequisite: Participation in an arranged school placement.
Formerly: EDCI688E.

EDCI619 Developing a Professional Portfolio (1-3 Credits)
Students will examine issues of performance assessment and develop professional portfolios following the guidelines established by the National Board for Professional Teaching Standards. Drawing on the research data collected throughout their program and relying on inquiry, reflections, and analysis, they will synthesize and present the body of their teaching experience.
Repeatable to: 3 credits.
Credit Only Granted for: EDCI614 or EDCI619.

EDCI637 Internship in World Language/TESOL Education (2-6 Credits)
Practical experience as a full-time intern with a fully licensed World Language/TESOL teacher in a diverse school setting; assigned professional responsibilities and participates in teaching/learning experiences.
Prerequisite: EDCI434 and EDCI634; or permission of EDUC-Teaching, Learning, Policy and Leadership department.
Additional Information: Internship lab fee applies. See current program description for details.

EDCI694 Transformative Pedagogy and School Subjects (3 Credits)
Examines the potential of various pedagogoies to be transformative in relation to school subject matters, school identities, and school contexts.

EDCI788 Selected Topics in Teacher Education (1-3 Credits)
Current topics and issues in teacher education.
Repeatable to: 6 credits if content differs.

EDCI790 Epistemological Bases of Education Research (3 Credits)
A course on research theory, method, and design issues for doctoral students. Focuses on conceptual and theoretical understanding of methodology, the broad rand of both qualitative and quantitative methodologies, and underlying epistemologies as they apply to the study of schools, curriculum, teaching, and teacher education.
Prerequisite: EDCI780.

EDCI798 Special Problems in Teacher Education (1-6 Credits)
Intended for Masters, AGS, or doctoral students in education who desire to pursue a research problem.
Restriction: Permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI799 Master's Thesis Research (1-6 Credits)

EDCI822 Seminar in Secondary Education (3 Credits)

EDCI888 Apprenticeship in Education (1-8 Credits)
Apprentice practice under professional supervision. Credit not to be granted for experience accrued prior to registration. Open only to degree- and certificate-seeking graduate students.
Restriction: Permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI889 Internship in Education (3-8 Credits)
Internship experiences with appropriate supervision. Credit not to be granted for experience accrued prior to registration. Open only to students advanced to candidacy for doctoral degree.
Restriction: Permission of EDUC-Teaching, Learning, Policy and Leadership department.

EDCI898 Pre-Candidacy Research (1-8 Credits)

EDCI899 Doctoral Dissertation Research (1-8 Credits)

EDCP - Education Counseling and Personnel Services

EDCP462 Disability in American Society (3 Credits)
Critical examination of the history of discrimination and analysis of current policies toward people with severe physical and mental disabilities.
Restriction: Must have earned a minimum of 30 credits; and sophomore standing or higher.

EDCP489 Field Experiences in Counseling and Personnel Services (1-4 Credits)
Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP498 Special Problems in Counseling and Personnel Services (1-3 Credits)
Available only to major students who have formal plans for individual study of approved problems.
Prerequisite: Available only to major students who have formal plans for individual study of approved problems.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP499 Workshops, Clinics, Institutes (1-6 Credits)
The following type of educational enterprise may be scheduled under this course heading: workshops conducted by the Department of Counseling and Personnel Services (or developed cooperatively with other departments, colleges and universities) and not otherwise covered in the present course listing; clinical experiences in counseling and testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups.
Repeatable to: 6 credits.

EDCP605 Developmental Issues in Counseling Adults (3 Credits)
Theoretical approaches to adult development. The scope and variety of settings (industry, education, government) in which programs of adult counseling and guidance take place, and the nature of such programs.

EDCP610 Professional Orientation (3 Credits)
Survey of knowledge base and practices in counseling and personnel services specializations, professional ethics, credentialling relevant legislation, current issues.

EDCP611 Career Development Theory and Programs (3 Credits)
Research and theory related to career and educational decisions; programs of related information and other activities in career decision.

EDCP612 Multicultural Issues in Counseling and Personnel Services (3 Credits)
Socio-psychological, philosophical, clinical, and research topics related to the provision of counseling and personnel services, academic support, and career development for minority students on predominantly white college and university campuses. Implications of race and/or national origin on opportunities for personal, social, academic, and career development in educational settings.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP614 Counseling Skills: Introduction to Practicum (3 Credits)
Development and utilization of counseling skills.
Corequisite: EDCP616.

EDCP615 Counseling I: Appraisal (3 Credits)
Collection and interpretation of appraisal data, synthesis of data through case study procedures. Development of interview skills.
Corequisite: EDCP618.
Restriction: Must be in a major within EDUC-Counseling, Higher Education and Special Education department.

EDCP616 Counseling II: Theory and Practice (3 Credits)
Counseling theories and the practices which stem from such theories.
Corequisite: EDCP614.

EDCP617 Group Counseling (3 Credits)
A survey of theory, research and practice of group counseling and psychotherapy, with an introduction to growth groups and the laboratory approach, therapeutic factors in groups, composition of therapeutic groups, problem clients, therapeutic techniques, research methods, theories, ethics and training of group counselors and therapists.
Prerequisite: EDCP616.

EDCP619 Practicum in Counseling (2-6 Credits)
Sequence of supervised counseling experiences of increasing complexity. Limited to eight applicants in advance. Two hours class plus laboratory.
Prerequisite: EDCP616.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP620 Introduction to Mental Disorders (3 Credits)
Understanding diagnosis and assessment of mental, addictive, and co-occurringmental/addictive disorders, using the diagnostic criteria of the most prevalent psychiatricdisorders as specified by the American Psychiatric Association Diagnostic and Statistical Manuals.
Credit Only Granted for: EDCP789W or EDCP620.
Formerly: EDCP789W.

EDCP621 Practicum in School Counseling (3-6 Credits)
Sequence of supervised counseling experiences of increasing complexity.
Prerequisite: EDCP616.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Credit Only Granted for: EDCP619D or EDCP621.
Formerly: EDCP619D.

EDCP622 Human Development in the Counseling Context (3 Credits)
An examination of the development of individuals over the lifespan. A focus on human development theories and the ways in which those theories are utilized within the counseling process to promote optimal development of individuals and families across the lifespan.
Credit Only Granted for: EDCP789X or EDCP622.
Formerly: EDCP789X.

EDCP625 Counseling the Chemically Dependent (3 Credits)
Chemical dependency and its effects on the individual's personal, social, and work functioning. Counseling procedures for persons with drug and alcohol problems.
Restriction: Must be in the School Counseling program; or permission of instructor.

EDCP627 Process Consultation (3 Credits)
Study of case consultation, systems consultation, mental health consultation and the professional's role in systems intervention strategies.
Prerequisite: Graduate course in group process.

EDCP630 School-Based Behavioral Interventions (3 Credits)
Behavior assessment and intervention techniques from behavioral, cognitive-behavioral, and ecological models. Planning, implementation, and evaluation of behavior change techniques.
Restriction: Permission of instructor; and must be in a major in EDUC-College of Education.

EDCP631 Serving Culturally and Linguistically Diverse Clients in the Schools (3 Credits)
Conceptual and empirical literature about racially, ethnically, culturally, and linguistically diverse clients. Examination and integration of cross-cultural literature.
Restriction: Must be in the School Psychology or Counselor Education programs.

EDCP632 Cognitive Assessment (3 Credits)
Assessment of cognitive functioning of children and adolescents in reference to school learning and behavior problems. Administering, scoring and interpreting cognitive assessment instruments commonly used in school systems.
Restriction: Must be in the School Psychology program; or permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP633 Diagnostic Appraisal of Children I (3 Credits)
Assessment of development, emotional and learning problems of children.
Prerequisite: EDCP632.

EDCP635 School Consultation I (3 Credits)
Theory and practice of consultation services in the school setting. Understanding of school culture. Introduction to problem solving model of case consultation for assessment and remediation of learning and behavior problems in the classroom. Practicum experience.
Restriction: Must be in the School Counseling program; or must be in the School Psychology program; or permission of instructor.

EDCP636 School Consultation II (3 Credits)
Didactic practicum in consultation services in the school setting. Case consultation and organizational consultation in the schools. Practicum experience.
Prerequisite: EDCP635.
Restriction: Must be in the School Psychology program; or permission of instructor.

EDCP640 School Psychology Seminar: Overview of the Specialty (1-2 Credits)
Overviews the specialty of school psychology, including history of the specialty, roles and functions of school psychologists, and current professional issues related to the specialty.
Restriction: Must be in the School Psychology program; or permission of instructor.

EDCP641 School Psychology Seminar: Professional Ethics (1-2 Credits)
Overviews ethical issues in the specialty of school psychology.
Restriction: Must be in the School Psychology program; or permission of instructor.

EDCP651 Group Counseling in Schools (3 Credits)
Issues and techniques of group counseling in schools.
Prerequisite: EDCP616; and for school counseling and school psychology students only.
Restriction: Permission of instructor.

EDCP652 Research in Counseling (3 Credits)
An exploration of basic and applied research, program evaluation, and associated measurement and evaluation skills crucial for professional school counselors.
Restriction: Must be in the School Counseling program.
Credit Only Granted for: EDCP652 or EDCP789Y.
Formerly: EDCP789Y.

EDCP654 History of Psychological Science (3 Credits)
This course, intended for doctoral students in psychology, explores the historical development of psychological science and practice. Students will examine and discuss the original writings of persons involved in the making of psychology and of historians and others who have described and interpreted historical developments in psychology-as well as historical developments that influenced the making of psychology. The focus will be on understanding how the social, cultural, political and legal context of the times; developments in psychology and other sciences; technological advances; the evolution of the educational and scientific infrastructure; funding; and the growth in numbers of persons involved in psychological science and mental health have influenced psychology and been influenced by psychology. In other words, we will examine how psychological ideas about human nature, mental life, and behavior influence social and political events and arrangements as well as how social and political contexts influence psychological thinking and research.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Credit Only Granted for: EDCP654 or EDCP789F.
Formerly: EDCP789F.

EDCP662 Psychosocial and Medical Aspects of Disability (3 Credits)
Appraisal and understanding of the psychosocial and medical aspects of disability and chronic illness, including their nature, causes, functional aspects and treatment; understanding of how psychological and social factors influence the adjustment processes in disability.
Prerequisite: EDCP610; or students who have taken courses with comparable content may contact the department.

EDCP663 Rehabilitation and Treatment of Mental and Emotional Disorders (3 Credits)
Purpose and principles of rehabilitation and treatment methods of adolescents and adults with significant mental health disorders and dual diagnoses. Focus is on the individual as well as the family. The course includes information regarding etiology, assessment, treatment interventions, program planning, and program evaluation.
Prerequisite: EDCP610; or permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP665 Family and Social Support Systems (3 Credits)
Principles and methods useful for understanding the role of family support systems in counseling. Specialized skills for counseling impaired adults and their families.
Recommended: EDCP610.

EDCP668 Special Topics in Rehabilitation (1-6 Credits)
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Repeatable to: 6 credits if content differs.

EDCP669 Professional Issues in Counseling Psychology (1 Credit)
Introduction to counseling psychology, including history and development of the field, and current professional and scientific issues. Exploration of career, research, and professional development opportunities.
Prerequisite: Must be in the Counseling Psychology program.
Repeatable to: 3 credits if content differs. Cross-listed with: PSYC669.
Formerly: EDCP695.

EDCP672 Social & Cognitive Foundations of Counseling & School Psychology (3 Credits)
In depth examination of theoretical approaches and issues of social and cognitive psychology.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Credit Only Granted for: EDCP672 or EDCP789E.
Formerly: EDCP789E.

EDCP680 Basic Didactic Practicum in Counseling Psychology (3 Credits)
In depth examination of counseling theories and techniques, and supervised experience in application of a range of counseling and therapy approaches.
Prerequisite: For Counseling Psychology majors only.
Formerly: PSYC776.

EDCP682 Counseling Psychology Didactic Practicum in Group Interventions (3 Credits)
In depth examination of theories and techniques of group interventions; supervised experience in group counseling.
Prerequisite: For Counseling Psychology majors only. Cross-listed with: PSYC682.
Formerly: EDCP718.

EDCP686 Counseling Psychology Didactic Practicum in Career Interventions (3 Credits)
In depth examination of theorectical approaches and issues in career interventions; supervised experience in career counseling and assessment.
Prerequisite: For Counseling Psychology majors only.
Formerly: EDCP777.

EDCP689 Seminar in Counseling Psychology (3 Credits)
Special topics in counseling psychology. Examples of topics include multicultural counseling, the counseling relationship, counseling and victimology, psychology treatment and health.
Prerequisite: For Counseling Psychology majors only.
Repeatable to: 12 credits if content differs. Cross-listed with: PSYC689.
Formerly: EDCP789.

EDCP690 Research in Counseling Psychology I (3 Credits)
Critical analysis of strategies, methodological, conceptual, and content trends.
Prerequisite: For Counseling Psychology majors only. Cross-listed with: PSYC690.
Formerly: EDCP778.

EDCP691 Research in Counseling Psychology II (3 Credits)
Critical analysis of trends and issues in counseling psychology science.
Prerequisite: For Counseling Psychology majors only. Cross-listed with PSYC691.
Formerly: EDCP717.

EDCP692 Assessment in Counseling Psychology I (3 Credits)
Broad introduction to the construction of psychological tests and measures, and experience in test interpretation, with consideration of historical, legal, ethical, and cultural issues surrounding the assessment process.
Prerequisite: For Counseling Psychology majors only. Cross-listed with PSYC692.
Formerly: EDCP789F.

EDCP693 Assessment in Counseling Psychology ii (3 Credits)
Supervised experience in administration, scoring, and interpreting major psychodiagnostic instruments used by counseling psychologists, as well as writing integrative assessment reports. Emphasis on hypothesis testing approach to assessment and on the counseling interview as an assessment tool.
Prerequisite: For Counseling Psychology majors only.
Formerly: EDCP789F.

EDCP694 Student Leadership Development (3 Credits)
Explores the development of leadership among college students including the study of leadership theory; a focus on how leadership is learned and developed; cultural dimensions of leadership; and exposure to the current national scene in leadership associations, programs, and resources.
Credit Only Granted for: EDCP694 or EDCP789D.
Formerly: EDCP789D.

EDCP695 Ethical and Professional Issues in Counseling Psychology (3 Credits)
Exploration of ethical and professional issues in Counseling Psychology.
Prerequisite: Must be in the Counseling Psychology program. Also offered as: PSYC695.
Credit Only Granted for: EDCP669, EDCP688, EDCP695, PSYC688, or PSYC695.
Formerly: EDCP669 and EDCP688.

EDCP697 Multicultural Issues in Counseling Psychology (3 Credits)
Exploration of knowledge, attitudes and skills for providing counseling and psychological services to culturally diverse populations.
Prerequisite: Only open to Counseling Psychology majors.
Credit Only Granted for: EDCP697, EDCP699, or PSYC697.
Formerly: EDCP699.

EDCP698 advanced Didactic Practicum in Counseling Psychology (3 Credits)
In depth examination of approaches to or theories abouth intervention, and supervised experience in the application of those approaches or theories. Each practicum focuses on a particular approach, e.g., psychodynamic, cognitive-behavioral, cross-cultural.
Prerequisite: For Counseling Psychology majors only.
Repeatable to: 12 credits if content differs. Cross-listed with: PSYC698.
Formerly: EDCP776.

EDCP700 Theories and Strategies of Counseling Psychology (3 Credits)
Introduction to the professional field, examination of pertinent scientific and philosophical backgrounds, and survey of the major theories, principles, and training models in counseling. Correlated laboratory analogue experiences in dydactic and group interrelationships.
Prerequisite: For Counseling Psychology majors only. Cross-listed with: PSYC700.
Formerly: EDCP789J.

EDCP701 Theories and Methods of Intervention (3 Credits)
An in-depth review of different theories and methods related to psychological interventions for children and adolescents.
Restriction: Must be in Counseling and Personnel Services (Doctoral) program; or permission of instructor.
Credit Only Granted for: EDCP789B or EDCP701.
Formerly: EDCP789B.

EDCP715 Appraisal Measures in Counseling (3 Credits)
Prerequisites: EDCP 615 and EDMS 646 or their equivalents. Interpretation and utilization in counseling of the career interest and personality measures.
Prerequisite: EDCP615 and EDMS646; or students who have taken courses with comparable content may contact the department.

EDCP716 Advanced Counseling Theory Seminar (3 Credits)
Systematic investigation of methods of theory analysis and their application to counseling theory.
Prerequisite: Master's degree in counseling; or permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP717 Evaluation of Research in Counseling (3 Credits)
Research on process and outcome in counseling. A review of research and appropriate research methodologies.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP718 Advanced Seminar in Group Processes (2-6 Credits)
Prerequisite: Must have completed EDCP626.
Repeatable to: 6 credits.

EDCP738 Practicum in Child Assessment (1-6 Credits)
Administration of complete test batteries to children; supervision of initial interviews; test administration and scoring; interpretation and synthesis of test battery and interview material; the psychological report; verbal interpretation of test results; and recommendations. Taken initially with EDCP 633; repeated with EDCP 634 in the subsequent semester.
Corequisite: EDCP633 and EDCP634.
Restriction: Must be in the School Psychology program; or permission of instructor.
Repeatable to: 6 credits.

EDCP741 Multicultural Practice in Student Affairs: Self, Education, and Society (3 Credits)
Develop knowledge and skills in the area of multicultural practice in student affairs through the examination of oppression, power, and privilege and how these dynamics impact individuals, educational institutions, and societies.
Prerequisite: EDCP771.
Credit Only Granted for: EDCP741 or EDCP789Z.
Formerly: EDCP789Z.

EDCP742 Examining College Environments and Outcomes (3 Credits)
Explores theory and research on the impact of the college environment on undergraduate student outcomes. Discusses environmental theory and assessment, college impact theory, outcomes assessment, and implications of the above for higher education and student affairs.
Prerequisite: EDMS651; or permission of instructor.
Credit Only Granted for: EDCP742 or EDCP789K.
Formerly: EDCP789K.

EDCP743 Developmental Psychopathology (3 Credits)
Explore psychopathology from a developmental perspective and with an emphasis on affective bases of behavior
Restriction: Must be in Counseling and Personnel Services (Doctoral) program; or permission of instructor.
Credit Only Granted for: EDCP789Q or EDCP743.
Formerly: EDCP789Q.

EDCP745 Supervision of Counseling (3 Credits)
Survey of knowledge base, research approaches, and applied skills in supervision of counseling.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department; and must be in a major within EDUC-Counseling, Higher Education and Special Education department.

EDCP746 Clinical Supervision of Pupil Personnel Services (3 Credits)
Supervision of role of psychologists and counselors in school settings; applied skills in supervision of services.
Prerequisite: Advanced Doctoral Students Only.
Restriction: Permission of instructor.

EDCP750 Therapeutic Approaches with Children (3 Credits)
Theoretical and empirical underpinnings of the therapeutic process with children.
Restriction: Must be in Counseling and Personnel Services (Doctoral) program; or permission of instructor.
Credit Only Granted for: EDCP789N or EDCP750.
Formerly: EDCP789N.

EDCP770 Service-Learning and College Student Development (3 Credits)
Historical roots, concepts, and principles of practice of service-learning in higher education; includes community service component.
Credit Only Granted for: EDCP770 or EDCP789Y.
Formerly: EDCP789Y.

EDCP772 Research in Student Affairs (3 Credits)
Research designs and approaches to research in student development and higher education. Development of research for research competency or dissertation proposal.
Prerequisite: EDCP656; or permission of instructor.
Restriction: Must be in the College Student Personnel program.

EDCP774 Advanced Seminar in Theories of College Student Development (3 Credits)
An opportunity for in-depth study, dialogue, and reflection about theoretical frameworks for understanding the development of college students. Specific attention is given to enhancing knowledge and understanding of the development of students when social identities and their intersections are considered.
Prerequisite: EDCP771; or students who have taken courses with comparable content may contact the department.

EDCP775 Facilitating Student Learning in Higher Education (3 Credits)
Application of selected models of college student development, learning styles, and related models of instruction to the assessment of characteristics and the design of learning environments.
Prerequisite: EDCP771; or permission of EDUC-Counseling, Higher Education and Special Education department.
Restriction: Must be in Counseling and Personnel Services (Doctoral) program.

EDCP776 Social Justice in Student Affairs and Higher Education (3 Credits)
An exploration of differences, biases, assumptions, limitations, and challenge with diversity in the context of higher education and student affairs. Focusing on issues of inequities with social identity group membership and the systems of power, privilege, and oppression in society.
Prerequisite: EDCP771 or EDCP741; or permission of instructor.
Restriction: Limited to college student personnel students only.

EDCP778 Research Proposal Seminar (3 Credits)
The development of thesis, dissertation or other research proposals.

EDCP788 Advanced Practicum (1-6 Credits)
Individual supervision in one of the following areas: (a) individual counseling, (b) group counseling, (c) consultation, or (d) administration.
Prerequisite: Previous practicum experience.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP789 Advanced Topics in Counseling and Personnel Services (1-6 Credits)
Repeatable to: 6 credits.

EDCP797 Capstone Course: Program Planning (3-6 Credits)
Restriction: Must be in the School Counseling program.
Credit Only Granted for: EDCP789T or EDCP797.
Formerly: EDCP789T.

EDCP798 Special Problems in Counseling and Personnel Services (1-6 Credits)
Master's AGS, or doctoral candidates who desire to pursue special research problems under the direction of their advisers may register for credit under this number.
Prerequisite: Master's AGS, or doctoral candidates who desire to pursue special research problems under the direction of their advisers may register for credit under this number.

EDCP799 Master's Thesis Research (1-6 Credits)
Registration required to the extent of six hours for Master's thesis.

EDCP870 Professional Issues Seminar (3 Credits)
Examination of issues that bear on professional issues such as ethics, inter-professional relationships and research.
Credit Only Granted for: EDCP656 or EDCP870.
Formerly: EDCP656.

EDCP871 Student Affairs Doctoral Capstone Seminar (3 Credits)
Broadening perspectives on issues in student affairs and higher education by exploring the multiple roles and responsibilities of campus administrators and faculty members.
Prerequisite: EDCP870; or permission of instructor.
Restriction: Must be in the College Student Personnel program.
Credit Only Granted for: EDCP789I or EDCP871.
Formerly: EDCP789I.

EDCP879 Internship in School Counseling (4-8 Credits)
Apprentice practice under professional supervision in an area of competence compatible with the student's professional goals. Credit not to be granted for experience accrued prior to registration. Open only to degree- and certificate-seeking graduate students.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Repeatable to: 9 credits.
Credit Only Granted for: EDCP888G or EDCP879.
Formerly: EDCP888G.

EDCP888 Apprenticeship in Counseling and Personnel Services (1-8 Credits)
Apprentice practice under professional supervision in an area of competence compatible with the student's professional goals. Credit not to be granted for experience accrued prior to registration. Open only to degree- and certificate-seeking graduate students.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDCP889 Internship in Counseling and Personnel Services (1-8 Credits)
Internship experiences at a professional level of competence in a particular role with appropriate supervision. Credit not to be granted for experience accrued prior to registration. Open only to students advanced to candidacy for doctoral degree.
Prerequisite: Open only to students advanced to candidacy for doctoral degree.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Repeatable to: 8 credits if content differs.

EDCP898 Pre-Candidacy Research (1-8 Credits)

EDCP899 Doctoral Dissertation Research (1-8 Credits)
Registration required to the extent of 12-18 hours for a Ph.D. Dissertation.

EDHD - Education, Human Development

EDHD400 Introduction to Gerontology (3 Credits)
Multidisciplinary survey of the processes of aging. Physiological changes, cultural forces, and self-processes that bear on quality of life in later years. Field study of programs, institutions for elderly, individual elders, their families and care providers.

EDHD401 Promoting Optimal Aging (3 Credits)
Theoretical, research, and applied issues related to optimal aging from psychological, biological, and societal perspectives. Group or individual projects involving direct field experiences.
Prerequisite: EDHD320; or EDHD400; or permission of EDUC-Human Development and Quantitative Methodology department.
Credit Only Granted for: EDHD401 or EDHD641.

EDHD402 Social Development (3 Credits)
Social Development. Critical concepts and ideas of the study of child and adolescent social development. Focus on changes in interpersonal relationships, emotions, achievement-related behavior and competence, and functioning within the broader social context.
Recommended: EDHD411.

EDHD405 Information Weaponization: Thinking Critically in a Changing World (3 Credits)
Contemporary challenges--such as climate change, food, energy and water security, and deadly virus transmission--demand that people think critically. While many societal challenges are seriously impacting local, regional and global communities, an increasing availability of information has contributed to what many call a "Post-Truth Era." We will consider the institutional use of post-truth a form of information weaponization. This course asks how information weaponization impacts the evaluation of valid lines of evidence and explanations. How do we evaluate and what is needed to improve individuals' evaluations of claims? This course will focus on mythological and unproductive thinking, increased digital literacy, enhanced reasoning, evaluation skills, and critical thinking.
Credit Only Granted for: HNUH238Y or EDHD405.
Formerly: HNUH238Y.

EDHD411 Child Growth and Development (3 Credits)
Theoretical approaches to and empirical studies of physical, psychological and social development from conception to puberty. Implications for home, school and community.

EDHD412 Infant Development (3 Credits)
Infant development across domains, including perceptual, motor, cognitive, language, social and emotional functioning from pre-natal through third year of life.

EDHD413 Adolescent Development (3 Credits)
Adolescent development, including special problems encountered in contemporary culture. Observational component and individual case study.

EDHD414 Development of the Scientific Mind Across the Lifespan (3 Credits)
Study of the educational, cognitive, social, and cultural factors that underlie the development of the scientific mind across the lifespan.
Recommended: EDHD320.

EDHD415 Promoting the Social-Emotional Competence of Young Children in Inclusive Classrooms (3 Credits)
Teachers must have knowledge and skill regarding how to appropriately manage the classroom so that all children, those with and without disabilities, will be able to learn from their school experiences. Classroom management extends beyond responding to student misbehavior to include a comprehensive approach to addressing the social/emotional competence of typically and atypically developing children. The goal of this course is to prepare early childhood teachers who are able to sensitively, responsively, and effectively manage a classroom of young students who are typically developing and those who have disabilities. Includes Field Experience.
Prerequisite: EDHD314 and EDHD425; and (EDHD419 or EDSP420).
Corequisite: EDSP423, EDSP424, and EDHD431.
Restriction: Must be in the Professional Early Childhood/Early Childhood Special Education program; and junior standing or higher; and minimum cumulative GPA of 2.75.

EDHD420 Cognitive Development and Learning (3 Credits)
Current developmental theories of cognitive processes such as language, memory, and intelligence and how differences in cognitive level (infancy through adolescence) mediate learning of educational subject matters.
Prerequisite: EDHD320, EDHD411, PSYC341, or PSYC355; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD421 Peer Relations (3 Credits)
Historical and theoretical underpinnings to contemporary research on peer interactions, relationships, and groups. Focus on (1) inter-dependencies of individual characteristics, social behaviors, social relationships; (2) relations between familial factors and extra-familial peer interactions and relationships; (3) normal and abnormal peer relationships; and (4) cross cultural universals and differences.
Recommended: EDHD411.

EDHD424 Culture, School & Community: Contexts for Learning (PreK-3rd) (3 Credits)
Explores the development of the young child (with and without disabilities, as well as those at environmental risk) in the context of the family and community, with emphasis on the impact of state, federal and school system policy on the child's world. Course will consider issues within the family, and the wider socio-cultural ecology that relate to the child's ability to develop and learn. In addition, students will develop strategies for respectful and culturally responses approaches to actively engage families in their children's development and learning. Includes Field Experience.
Prerequisite: EDHD425 and EDHD314; and (EDHD419 or EDSP420).
Corequisite: EDSP315, EDHD431, EDHD415, and EDSP423.
Restriction: Must be in the Professional Early Childhood/Early Childhood Special Education program; and junior standing or higher; and minimum cumulative GPA of 2.75.

EDHD425 Language Development and Reading Acquisition (3 Credits)
This course focuses on young children's language development and the relationship between language and reading acquisition. Students will learn: concepts central to language development; language achievements at different ages; concepts of emergent literacy; models of reading acquisition and skilled reading.

EDHD426 Cognitive and Motivational Literacy Content (3 Credits)
Students preparing for secondary teaching will learn about the cognitive and motivational aspects of literacy and learning from text for the content areas of literature, science, history and mathematics. Different evidenced-based literacy approaches appropriate for content learning are presented. Characteristics of learning environments that enable students to engage productively with diverse texts, disciplinary tasks, and technological resources in content areas are identified.

EDHD427 Constructing and Integrating the Early Childhood Curriculum (3 Credits)
Explores the world from the child's perspective and constructs curriculum based on cognition, learning, and children's experiences. The integrated curriculum is the overarching framework for this course. Includes field experience.
Prerequisite: EDHD314, EDHD313, EDHD424, and EDSP470.
Corequisite: EDHD323, EDHD322, EDHD315, EDHD321, and EDHD435.
Restriction: Must be in Early Childhood Education program; and senior standing.

EDHD431 Child Development and Learning, Three to Eight Years (3 Credits)
Provides a basic understanding of child development theory and research, as well as specific knowledge about the development of children during the early and middle childhood "stages," specifically from ages 3 years to 8 years. A major emphasis will be the application of theory and research from the field of educational psychology to an understanding of how young children learn and achieve academically. Because the course will address the developmental and academic functioning of children with and without disabilities, a particular focus will be on individualization.
Prerequisite: Minimum grade of C- in EDHD314 and EDHD425; and 1 course with a minimum grade of C- from (EDHD419, EDSP420).
Corequisite: EDSP423 and EDSP315; and TRACK I: Must be concurrently enrolled in EDSP430, EDSP433; or TRACK 2: Must be concurrently enrolled in EDHD415, EDHD424.

EDHD432 Internship in EC/ECSE (12 Credits)
Interns spend five days per week in the classroom/home-based setting (under the mentorship of a certified teacher) where they gradually assume full responsibility for the planning, delivery and assessment of instruction or an intervention. Track I students will have an Infant/Toddler placement with special educator, Track II students will be in a Pre-K/K or Grade 1,2,3 classroom with general or special educator (must be opposite grade level and mentor from Phase I/fall of the senior year).
Prerequisite: EDHD323, EDHD322, EDSP417, EDHD441, EDHD442, EDHD443, EDHD444, and EDSP321.
Corequisite: EDHD437.
Restriction: Must be in Early Childhood and Early Childhood Special Education program; and senior standing or higher.

EDHD434 Child Development, Birth to Three Years (3 Credits)
Designed to provide students with an understanding of child development theory and research, as well as knowledge about typical and atypical development of children from birth to three years of age. The course emphasizes learning for children with and without disabilities, and for children who are at risk due to poverty and other environmental factors. The course will introduce how children develop and the challenges they face within the domains of physical, cognitive, language, social, and emotional development, with particular attention paid to the impact of risk factors on development. Students will become familiar with delays and differences in development that may occur as the result of disability. Finally, students will learn the effects of cultural and linguistic differences on growth and development. Information about theory and research in child development for children with and without disabilities will be enhanced through a series of observational experiences, which will build upon concepts addressed during class. Includes field experiences.
Prerequisite: EDHD210, EDHD220, and EDSP211.
Corequisite: EDHD314 and EDHD425. Cross-listed with: EDSP420.
Credit Only Granted for: EDHD419A, EDSP420 or EDHD434.
Formerly: EDHD419A.

EDHD435 Effective Components of the Early Childhood Classroom (3 Credits)
Explores three topics integral to effective, child-centered early childhood classrooms: assessment, classroom management and parent involvement. Includes field experience.
Prerequisite: EDHD419, EDHD314, EDHD313, EDHD424, and EDSP470.
Corequisite: EDHD323, EDHD322, EDHD315, EDHD321, and EDHD427.
Restriction: Must be in Early Childhood Education program; and senior standing or higher.

EDHD436 Cognition and Motivation in Content Area Literacy for Middle-School Students (3 Credits)
Cognitive and motivational processes of literacy and learning from texts across subjects. Structured approaches to using reading, writing, and speaking for content learning based on approaches to knowledge, motivation, and strategies. Classroom contexts that enable middle-school students to engage with diverse texts and Internet resources are provided

EDHD437 EC/ECSE Teachers as Researchers and Reflective Practitioners (3 Credits)
Students use action research to improve instructional delivery or familial interactions in an effort to enhance the overall educational experiences/outcomes of children in classrooms or home-based contexts. Students will design and implement an action research project in an effort to meet a goal articulated in an applicable Individualized Education Plan (IEP) or Individualized Family Service Plan (IFSP) or School Improvement Plan (SIP) as the basis of their project.
Prerequisite: Minimum grade of C- in EDHD322, EDHD323, EDSP321, EDSP417, EDHD441, EDHD442, EDHD443, and EDHD444.
Corequisite: EDHD432.

EDHD440 Adult Development (3 Credits)
Major conceptual approaches to the study of adult development including physical, cognitive, social, emotional and self processes that take place within individuals as they progress from emerging adulthood through middle age.
Prerequisite: EDHD320; or permission of EDUC-Human Development and Quantitative Methodology department.
Recommended: EDHD413.

EDHD441 Data Driven Decision Making in EC/ECSE (1 Credit)
Students will be exposed to formative (e.g., classroom based, ongoing) and summative (e.g., standardized testing) assessments. Students will collect and analyze formative assessment data from their internship classrooms as the bases of planning and delivering instruction to meet the diverse needs of all learners. They will also analyze standardized assessment data to gain an understanding of measures used to determined cross-school and cross-teacher effectiveness. Includes Phase I field experience.
Prerequisite: Minimum grade of C- in EDSP423, EDHD431, and EDSP315; and TRACK I: Must have completed EDSP430 and EDSP433 or TRACK 2: Must have completed EDHD415 and EDHD424.
Corequisite: EDHD322, EDHD323, EDSP321, EDSP417, EDHD442, EDHD443, and EDHD444.

EDHD442 Interventions for Children with Behavioral Challenges (1 Credit)
Students will expand knowledge of and develop skills to address challenging behaviors in inclusive early childhood classrooms. Students examine the causes underlying challenging behaviors during the early childhood years, and identify appropriate resources and support services for working with families to develop a unified approach when responding to behavioral challenges. Includes Phase I field experience.
Prerequisite: Minimum grade of C- in EDSP423, EDHD431, and EDSP315; and TRACK I: Must have completed EDSP430 and EDSP 433; or TRACK 2: Must have completed EDHD415 and EDHD 424.
Corequisite: EDSP321, EDSP417, EDHD322, EDHD323, EDHD441, EDHD443, and EDHD444.

EDHD443 Interventions for Children with Social and Communication Challenges (1 Credit)
Students will learn about the characteristics of children with autism spectrum disorder, pervasive developmental disorder, social communication disorder, and other related challenges and will be equipped to meet the needs of this group of children in the early childhood classroom. The utilization of Universal Design for Learning (UDL), Response to Intervention (RTI) and other early childhood special education approaches, as they apply to this specific group of children, will be addressed. Interventions designed to improve the functioning of children with autism spectrum disorders and related disorders will be reviewed. Includes Phase I field experience.
Prerequisite: Minimum grade of C- in EDSP423, EDHD431, and EDSP315; and TRACK I: Must have completed EDSP430 and EDSP 433; or TRACK 2: Must have completed EDHD415 and EDHD 424.
Corequisite: EDHD322, EDSP321, EDSP417, EDHD323, EDHD441, EDHD442, and EDHD444.

EDHD444 Action Research in EC/ECSE (1 Credit)
Students will become familiar with the EC/ECSE research process, literature and how teachers use action research to improve pedagogy and the experiences of children in classrooms or home-based contexts. Students will utilize this knowledge, as well as either a goal in an Individualized Education Plan (IEP) or Individualized Family Service Plan (IFSP) or School Improvement Plan (SIP), to develop an action research study commenced during the following semester. Includes Phase I field experience.
Prerequisite: Minimum grade of C- in EDSP423, EDHD431, and EDSP315; and track 1: Must have completed EDSP430 and EDSP433; OR Track 2: Must have completed EDHD415 and EDHD424.
Corequisite: EDHD322, EDHD323, EDHD441, EDHD442, EDHD443, EDSP417, and EDSP321.

EDHD460 Educational Psychology (3 Credits)
Application of psychology to learning processes and theories. Individual differences, measurement, motivation, emotions, intelligence, attitudes, problem solving, thinking and communicating in educational settings.
Prerequisite: PSYC100; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD489 Field Experiences in Human Development (3-6 Credits)
Planned field experience (internship or research-based activities) related to Human Development. Credit not to be granted for experiences accrued prior to registration.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.
Repeatable to: 6 credits.

EDHD498 Special Research Problems in Human Development (1-4 Credits)
Exploration of current research problems in the study of human development. Available only to students who have definite plans for individual study of approved research problems. Credit according to extent of work.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.
Repeatable to: 6 credits.

EDHD499 Workshops, Clinics, and Institutes (1-6 Credits)
The following types of educational enterprise may be scheduled under this course heading: workshops conducted by the College of Education (or developed cooperatively with other colleges and universities) and not otherwise covered in the present course listing; clinical experiences in pupil-testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals and supervisors.
Repeatable to: 6 credits.

EDHD600 Introduction to Human Development and Child Study (3 Credits)
An overview of the multidisciplinary, scientific principles which describe human development and behavior and an application of these principles in an analysis of a behavioral record. Techniques of observation, recording, and analysis of human behavior. Emphasis on critiquing and applying research findings.

EDHD601 Biological Bases of Behavior (3 Credits)
Emphasizes that understanding of human life, growth and behavior depends on understanding physical processes. Application throughout is made to brain-behavior relationships and implications for understanding and working with people.
Prerequisite: Must have completed or be concurrently enrolled in EDHD600; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD602 Social Bases of Behavior (3 Credits)
The social forces and expectations that influence behavior from infancy through old age and death. The effects of ethnicity, social learning values, attitudes, historical events and mass media on perception and behavior in societal interactions.

EDHD605 Curriculum in Early Childhood Education (3 Credits)
Curriculum theory, research and practice in educational settings for infants and children to age eight.

EDHD611 Cultural and Contextual Influences on the Young Child (3 Credits)
Theory and research on social and cultural influences in early child development.

EDHD617 Achievement Motivation in Adolescence (3 Credits)
Study of different aspects of motivation and how they develop in the secondary school years. Focus on how different instructional practices influence motivation and design of various strategies for improving students motivation.
Credit Only Granted for: EDHD779W or EDHD617.
Formerly: EDHD779W.

EDHD619 Advanced Scientific Concepts in Human Development (3 Credits)
A critical examination of concepts and issues in contemporary culture as these relate to the development and learning of children and youth.
Repeatable to: 6 credits if content differs.

EDHD624 Cognitive and Motivational Bases of Literacy Instruction in the Content Areas (6 Credits)
Secondary and middle school teachers learn about and apply knowledge and skills related to the cognitive and motivational dimensions of literacy and learning from text for a variety of content areas. Characteristics of learning environments that enable students to engage productively with diverse texts, disciplinary tasks, and technological resources in content areas are identified.
Credit Only Granted for: EDHD624 or EDHD779G.
Formerly: EDHD779G.

EDHD629 Developmental Science Seminar and Colloquium (1 Credit)
A seminar and colloquia series featuring speakers from the department, the college, the university, and other universities and institutions from across the world that aims to cover issues pertaining to contemporary theory and research in human development, child development, and developmental science. The seminar format is a weekly colloquia series, along with discussion sessions related to a range of developmental science topics.
Recommended: For graduate students in the Human Development program.
Repeatable to: 8 credits if content differs.

EDHD635 Adolescents at Risk (3 Credits)
Study of current research on risky behaviors that impact adolescent student learning and achievement particular in underserved populations. General diversity issues and topics specific issues that put adolescents at risk for academic failure and other negative trajectories will be explored.
Recommended: EDHD600.
Credit Only Granted for: EDHD635 or EDHD779L.
Formerly: EDHD779L.

EDHD659 Direct Study of Individuals (3 Credits)
Observational techniques to record the behavior of an individual. Procedures to ensure objectivity in data collection. Methods used to analyze, categorize, quantify observational data in research.

EDHD662 Research Methods in Education Settings (3 Credits)
Research methods associated with studying the development, achievement, and school adjustment of children and adolescents in educational settings, with an emphasis on quantitative methodologies.

EDHD674 Self Processes in Adolescence: Implications for Academic Achievement and School Adjustment (3 Credits)
Study of the development of the self from infancy through adolescence, and examination of the literature on the self processes of special adolescent populations as they relate to achievement-related orientations and school adjustment in secondary settings.
Credit Only Granted for: EDHD619L or EDHD674.
Formerly: EDHD619L.

EDHD690 Theoretical Foundations of Human Development (3 Credits)
Theoretical foundations in the field of human development with a focus on connections between the major theoretical paradigms in the literature and current research in developmental science.

EDHD692 Cognitive Basis of Instruction (3 Credits)
Psychological and educational research literature on human cognition, especially as applied to learning and teaching in classroom settings.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

EDHD700 Infant Development (3 Credits)
An examination of recent research findings in physical, social, emotional and language development during infancy. A review of prenatal and perinatal factors in relation to their influence on later development.

EDHD703 Source Selection, Multimedia, & Misinformation: How Students Learn to Navigate Evidence in the 21st Century (3 Credits)
Explores how students come to understand how evidence is acquired, produced, and used to make inferences and draw conclusions about the world. Topics will include selective trust, source selection, navigating multiple mediums and modalities, epistemic cognition, scientific reasoning, motivated cognition, and confirmation bias. We will explore both basic research on these topics as well as ways in which this research can be used to foster critical thinking and scientific literacy in childhood and beyond, in both formal and informal educational settings.

EDHD711 Peer-Culture and Group Processes in Human Development (3 Credits)
The process of group formation, role-taking and status-winning, and the emergence of the peer-culture during childhood and the evolution of the child society at different maturity levels to adulthood. The developmental tasks and adjustment problems associated with winning, belonging, and playing roles in the peer group.
Prerequisite: Permission of EDUC-Human Development and Quantitative Methodology department.

EDHD718 Apprenticeship in College Teaching (1 Credit)
For graduate students teaching autonomously for the first, second, or third tiem at the University of Maryland, College Park; not intended for teaching assistants. This course provides graduate student teachers with a set of structured experiences that foster professional growth and development in the role of college instructor. Includes seminars on the scholarship of college teaching and principles of optimal college classroom environments, peer and faculty in-class observations of teaching, and guided reflective analysis of experience in the classroom.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

EDHD720 Social Development and Socialization Processes (3 Credits)
This course covers social development and socialization processes across the life-span. The course typically covers the following topics: parent-child relationships, peer relationships, moral development, social cognition, social competence, social motivation, self-regulation, and cultural influences on development. This is core doctoral course.

EDHD721 Cognitive Development and Learning: An Introduction (3 Credits)
Introductory survey into contemporary theory and research in cognitive development; applications to classroom learning.

EDHD722 Learning Theory and the Educative Process (3 Credits)
Advanced study of theories, issues and research in several categories of cognition and learning applied to education and the helping professions.
Prerequisite: EDHD721; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD750 Culture, Context, and Development (3 Credits)
This course will cover theory and research on cultural and contextual influences on social development.

EDHD751 Child Development and Poverty (3 Credits)
This course examines the theoretical, methodological, and empirical literature on the effects of poverty on children's development from a multidisciplinary perspective. It includes basic concepts in methodology, measurement design, and issues related to connecting basic research on poverty and children to policy and program interventions.
Prerequisite: EDHD720; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD760 Advanced Educational Psychology (3 Credits)
Appplication of psychology to learning processes and theories. Individual differences, measurement, motivation, and intelligence.
Prerequisite: Prior course in educational psychology, learning, or cognition; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD768 Laboratory Methods in Developmental Psychophysiology (3 Credits)
Covers basic electrophysiology and human electrophysiology. Topics include recording, processing, and analyzing EEG and ERP. Emphasis will be placed on the testing of infant and child populations.
Recommended: EDHD775.
Restriction: Permission of instructor.
Repeatable to: 6 credits if content differs.

EDHD775 Human Development and Neuroscience (3 Credits)
Course focuses on the biological bases of human behavior including physiological processes which have an impact on human development.
Prerequisite: EDHD601; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD779 Selected Topics in Human Development (1-6 Credits)
This course focuses on topics of current significance in human development research. Topics covered change each semester, and vary by instructor.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.
Repeatable to: 6 credits if content differs.

EDHD780 Research Methods in Human Development (3 Credits)
Research methodology for studying human development: research design, hypothesis formulation, instrument development, methodological and statistical approaches, survey of methodologies.
Prerequisite: EDMS651; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD789 Internship in Human Development (3-8 Credits)
Internship experience in one or more human service agencies in the community.
Prerequisite: 9 credits in EDHD courses.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.
Repeatable to: 9 credits.

EDHD798 Laboratory in Human Development (1-6 Credits)
Independent research supervised by an instructor in a research setting.
Repeatable to: 9 credits if content differs.

EDHD799 Master's Thesis Research (1-6 Credits)
Registration required to the extent of six hours for master's thesis.

EDHD800 Seminar in Early Childhood Education (3 Credits)
This seminar explores relevant current issues in early childhood development and education.

EDHD820 Advanced Topics in Social Development (3 Credits)
Advanced doctoral seminar on socialization and social development with consideration of selected topics. Identification of research problems and areas of application.
Prerequisite: EDHD720; or permission of EDUC-Human Development and Quantitative Methodology department.
Credit Only Granted for: EDHD820 or EDHD821.
Formerly: EDHD821.

EDHD835 The Development of Achievement Motivation (3 Credits)
Development of achievement motivation and how it relates to academic achievement during the elementary and secondary school years. Expectancy-value theory, attribution theory, self-efficacy theory, socialization of achievement motivation.
Prerequisite: EDHD830 or EDHD721; or permission of EDUC-Human Development and Quantitative Methodology department.

EDHD840 Language and Literacy Development (3 Credits)
Content of this course is current theoretical and empirical research on children's language developments and on the linguistic basis of beginning reading.

EDHD842 Learning in Context (3 Credits)
Educational and home context that influence development of motivation, cognitive strategies, and knowledge will be explored.
Prerequisite: EDHD721.

EDHD850 Social Cognition and Moral Reasoning (3 Credits)
Theory and research on social-cognition development and moral development, from infancy to adolescence will be covered.

EDHD872 Young Children at Environmental Risk: Developmental and Intervention Issues (3 Credits)
Examination of impact of poverty on young children, their families, and communities. Epidemiological, physiological, and sociological studies will be reviewed.

EDHD875 Advanced Human Development and Neuroscience (3 Credits)
Advanced doctoral seminar in the biological bases of behavior. Identification of research problems and areas of application.
Prerequisite: EDHD775; or permission of EDUC-Human Development and Quantitative Methodology department.
Credit Only Granted for: EDHD811 or EDHD875.
Formerly: EDHD811.

EDHD878 Applied Research and Strategies (3 Credits)
Examine current human development research literature, define a research problem and design and implement a research study or review in collaboration with faculty.
Prerequisite: EDMS651; or permission of EDUC-Human Development and Quantitative Methodology department.
Repeatable to: 6 credits if content differs.

EDHD888 Apprenticeship in Human Development Research (1-8 Credits)
Apprenticeship in Human Development research.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

EDHD889 Practicum in Human Development (3-9 Credits)
Field experience in applied human development at a professional level of competence in a particular role with appropriate supervision.
Prerequisite: Credit not to be granted for experience accrued prior to registration; and open only to degree and certificate-seeking graduate students.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.
Repeatable to: 9 credits if content differs.

EDHD898 Pre-Candidacy Research (1-8 Credits)

EDHD899 Doctoral Dissertation Research (1-8 Credits)
Registration required to 12-18 hours for a Ph.D. dissertation.

EDHI - Education Leadership, Higher Ed and International Ed

EDHI488 Special Topics in Education Policy and Administration (1-3 Credits)
Special and intensive treatment of current topics and issues in education policy and administration.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Repeatable to: 6 credits.
Formerly: EDPL488.

EDHI489 Field Experiences in Education (1-4 Credits)
Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Formerly: EDPL489.

EDHI498 Special Problems in Education (1-3 Credits)
Available only to students who have definite plans for individual study of approved problems.
Prerequisite: Available only to students who have definite plans for individual study of approved problems.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Formerly: EDPL498.

EDHI499 Workshops, Clinics, and Institutes (1-6 Credits)
The following type of educational enterprise may be scheduled under this course heading: Workshops conducted by the College of Education (or developed cooperatively with other colleges and universities) and not otherwise covered in the present course listing; clinical experiences in pupil-testing centers, reading clinics, speech therapy laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals, and supervisors.
Repeatable to: 6 credits.
Formerly: EDPA499.

EDHI600 Education and Society (3 Credits)
Education and Society is an introductory course to graduate studies in the Department of Education Policy and Leadership. Students consider how social institutions influence -- and in turn are influenced by -- education policies and practices.
Credit Only Granted for: EDHI600, EDPL600, or EDPS600.
Formerly: EDPL600.

EDHI605 Comparative Education (3 Credits)
Analyzes and compares leading issues in education in various countries of the world, particularly as they relate to crucial problems in American education.
Credit Only Granted for: EDHI605, EDPL605, or EDPS605.
Formerly: EDPL605.

EDHI606 Political Economy of Education in a Global Context (3 Credits)
Examination of alternative economics perspectives and their implications for education policy and practice internationally, from local to global levels. The connection of education to issues of development, inequality, poverty, gender, and race will be discussed.
Credit Only Granted for: EDHI606, EDPL606, or EDPS606.
Formerly: EDPL606.

EDHI607 Culture and Education in a Global Context (3 Credits)
Examines cultural theories and analyzes cultural influences in education. Course materials and discussion critically analyze cultural transmission and schooling practices. Also examined are politics of culture, multiculturalism, global cultural clashes, and educators as critical culture workers.
Credit Only Granted for: EDHI607, EDPL607, or EDPS607.
Formerly: EDPL607.

EDHI608 Gender and Education (3 Credits)
The course examines feminist theories on gender inequity, and analyzes social impacts on girls' and women's education. Also examined are women's ways of knowing, issues of race and class, gender and development, ecofeminism, and technology for women.
Credit Only Granted for: EDPL788B or EDPL608.
Formerly: EDPL608.

EDHI630 Analyzing Systemwide Education Policy (3 Credits)
Analysis of how assessments are made of systemwide education policy based on the approaches used in studies of national education policy by international agencies.
Credit Only Granted for: EDHI630, EDPL630, or EDPS630.
Formerly: EDPL630.

EDHI642 Management of Change in Educational Organizations (3 Credits)
Role of individual as a change agent; issues related to effecting change within organizational sub-systems and total systems are considered. Specific strategies for successful change in schools are addressed.
Credit Only Granted for: EDHI642, EDPL642, or EDPS642.
Formerly: EDPL642.

EDHI643 Management of Human Resources In Education (3 Credits)
Examination of knowledge and development of awareness and capabilities needed by educational leaders to promote student success by managing school system personnel needs. Emphasis on recruitment, selection and supervision as well as labor relations and collective bargaining.
Credit Only Granted for: EDHI643, EDPL643, or EDPS643.
Formerly: EDPL643.

EDHI650 Professional Seminar in Higher and Adult Education (3 Credits)
Introduction to higher and adult education as a field of study. Origins, current dimensions and problems, and emerging issues. Field trips to state and national capitols, and involvement in professional conferences.
Credit Only Granted for: EDHI650, EDPL650, or EDPS650.
Formerly: EDPL650.

EDHI652 Higher Education in American Society (3 Credits)
Examines the concepts of academic freedom, corporate autonomy and institutional accountability with emphasis on twentieth century relationships between higher education and government in the United States.
Credit Only Granted for: EDHI652, EDPL652, or EDPS652.
Formerly: EDPL652.

EDHI653 Organization and Administration of Higher Education (3 Credits)
Basic concepts and terminology related to organizational behavior and institutional governance structures. The governance and organization of higher education in the United States.
Credit Only Granted for: EDHI653, EDPL653, or EDPS653.
Formerly: EDPL653.

EDHI654 The Community and Junior College (3 Credits)
Historical development and philosophical foundations of community and junior colleges in America with emphasis on organizational and administrative structures in two year institutions and the clientele they serve.
Credit Only Granted for: EDHI654, EDPL654, or EDPS654.
Formerly: EDPL654.

EDHI657 History of Higher Education in the United States (3 Credits)
History of higher education in America from colonial times to the present with emphasis on expansion of higher education and the growing complexity of its structures, organization, and purposes.
Credit Only Granted for: EDHI657, EDPL657, or EDPS657.
Formerly: EDPL657.

EDHI660 Retention Theories and the Impact of College (3 Credits)
An introduction to retention theories an the college impact literature. The primary focus will be to examine the disciplinary and philosophical frameworks that have informed the development of leading theories and policies.
Credit Only Granted for: EDHI660, EDPL660, or EDPS660.
Formerly: EDPL660.

EDHI662 Research on Ethnic Minorities and Demographic Trends in Higher Education (3 Credits)
Current research on ethnic minority student populations including issues of access, campus climate, racial identity, achievement and motivation. In addition to student issues, course examines issues for faculty of color in higher education, curriculum and teaching, and leadership and governance. The application of broad demographic changes in the nation and their impact on higher education over time.
Credit Only Granted for: EDHI662, EDPL662, or EDPS662.
Formerly: EDPL662.

EDHI663 Philanthropy and Fundraising in Higher Education (3 Credits)
A critical look at how philanthropy and fundraising has affected American Higher Education. Topics will include: a history and overview of philanthropy, motivations of and traditions of giving in different populations, ethics, and critical issues within educational and advancement.
Credit Only Granted for: EDHI663 or EDHI788D.
Formerly: EDHI788D.

EDHI664 The College Experience (3 Credits)
Designed to provide students with an overview of the research and scholarship on two of the major stakeholders in higher education -- students and faculty. Examines the educational experiences of college students in and out of the classroom in higher education in the United States by focusing on what students learn and the different collegiate experiences that influence their learning.
Credit Only Granted for: EDHI664, EDPL664, or EDPS664.
Formerly: EDPL664.

EDHI665 College Access and Choice (3 Credits)
Examines the college-going process, how and why some students successfully navigate it, and what policies and programs can help students from disadvantaged or underrepresented backgrounds overcome barriers to college access and entry.
Credit Only Granted for: EDHI665 or EDHI788L.
Formerly: EDHI788L.

EDHI666 The Academic Profession (3 Credits)
Explores how faculty demographics, discipline, graduate socialization, and organizational context (institutional type, mission, and culture) matter to critical higher edcuation outcomes, such as student learning, community engagement, research, shared governance and access and equity.
Credit Only Granted for: EDHI666 or EDHI788P.
Formerly: EDHI788P.

EDHI667 Women in Higher Education (3 Credits)
A comprehensive overview of the history, present condition, and current research on women students, faculty, adminstrators, and staff in higher education. Explores why and how women and men experience higher educaton differently, by drawing on historical, cultural, and psychological contexts, feminist theoretical and research perspectrives and recent research in various disciplines.
Credit Only Granted for: EDHI667 or EDHI788A.
Formerly: EDHI788A.

EDHI672 Modes of Inquiry in Education Research (3 Credits)
Introduction to modes of inquiry appropriate to research on issues and problems in education. Examination of qualitative, quantitative and mixed research methods and designs with a focus on related standards of quality.
Credit Only Granted for: EDHI672, EDPL672, or EDPS672.
Formerly: EDPL672.

EDHI673 Economic Evaluation of Education (3 Credits)
Examination and application of economic approaches - cost, cost-effectiveness, and cost-benefit analysis - to the evaluation of education programs and policies.
Credit Only Granted for: EDHI673, EDPL673, or EDPS673.
Formerly: EDPL673.

EDHI674 Minority Serving Institutions (3 Credits)
Definitions and designations of Minority Serving Institutions vary; however they traditionally include Historically Black Colleges and Universities, Hispanic-Serving Institutions, and Tribal Colleges and Universities. Exploring these institutions as well as some non-traditional MSIs including, Deaf Serving Institutions and Asian American and Pacific Islander Serving Institutions.
Credit Only Granted for: EDHI674 or EDHI788Q.
Formerly: EDHI788Q.

EDHI677 Ranking System in Higher Education: How They Work and Why They Matter (3 Credits)
A critical examination of domestic and international university rankings systems from their historic origins to current day. Students explore the criteria used to identify quality, the methods used to collect data, and the impact of ranking systems on institutional decision-making.
Credit Only Granted for: EDHI677 or EDHI788W.
Formerly: EDHI788W.

EDHI679 Master's Seminar (3 Credits)
Directed study for master's degree students writing seminar papers.
Formerly: EDPL679.

EDHI680 Gender, Development, and Education (3 Credits)
Focusing on gender as an analytical frame and a discrete variable, a comprehensive view of the relationship between gender and education in the context of national development is presented. It identifies the conditions of men and women's education and policy efforts to promote equity and social transformation.
Credit Only Granted for: EDHI674, EDHI680 or EDHI788K.
Formerly: EDHI788K.

EDHI681 Education for Global Peace (3 Credits)
This course will examine how education can address the threats of violence and wars. It prepares students to teach about peace, nonviolence, and conflict resolution, and also to analyze and implement changes in school and society to contribute to peace and non-violence.
Credit Only Granted for: EDHI681, EDPL681, or EDPS681.
Formerly: EDPL681.

EDHI682 Ecological Ethics and Education (3 Credits)
An exploration of the paradigms, approaches, and ways of knowing offered through ecological ethics and environmental sustainability education.
Credit Only Granted for: EDHI682 or EDHI788E.
Formerly: EDHI788E.

EDHI683 World Religions and Their Implications for Education (3 Credits)
Students develop a basic understanding of world religions, looking at their orgins, development, teachings, and primary figures. Students explore the roles, meaning, purpose that education plays in the various religions and examine their implications for education in the 21st century.
Credit Only Granted for: EDHI683 or EDHI788C.
Formerly: EDHI788C.

EDHI684 Alternative Education, Alternative Development (3 Credits)
A critical examination of the political economy of education and international development policies and practices. Focus is on the implications of these critiques for alternative education and development policies and practices.
Recommended: EDHI606.
Credit Only Granted for: EDHI684 or EDHI788D.
Formerly: EDHI788D.

EDHI689 Practicum In Educational Administration and Supervision (1-3 Credits)
Promotes skill development in managerial, leadership and supervisory areas. Practicum is based on results of diagnostic instruments and an individual professional development plan.
Repeatable to: 3 credits if content differs.
Formerly: EDPL689.

EDHI700 Qualitative Research Methods in Education (3 Credits)
Qualitative methods in education research, emphasizing the paradigms of philosophy, history, sociology, anthropology, and comparative studies as they rely on narrative rather than quantitative ordering of data.
Credit Only Granted for: EDHI700, EDPL700, or EDPS700.
Formerly: EDPL700.

EDHI704 Issues and Institutions in International Educational Development (3 Credits)
Examines the role of educational institutions in international development and the issues involved in educational planning and policymaking at the local, national and international levels.
Credit Only Granted for: EDHI704, EDPL704, or EDPS704.
Formerly: EDPL704.

EDHI710 Globalization and Education (3 Credits)
Multiple education policies, practices, and innovations linked to economic, technological, and cultural dimensions of globalization are affecting education systems. The consequences of such forces on educational equality, equity, and quality, noting similarities and differences between industrialized and developing countries will be explored.
Recommended: EDHI605.
Credit Only Granted for: EDHI710 or EDHI788J.
Formerly: EDHI788J.

EDHI713 Non-Formal Education (3 Credits)
An examination of forms of education outside the formal education system--known generally as nonformal (NFE) education and including popular education--to identify how these forms can assist marginalized populations in both Third World and industrialized countries to improve their quality of life and undertake collective action for social advancement.
Recommended: EDHI605.
Credit Only Granted for: EDHI707, EDHI713 or EDHI788N.
Formerly: EDHI788N.

EDHI725 Education in East Asia (3 Credits)
The course traces the cultural and intellectual history of education in East Asia, and examine features and important issues in East Asian education systems. School reform and social changes are studied.
Credit Only Granted for: EDHI725, EDPL725, or EDPS725.
Formerly: EDPL725.

EDHI743 Leadership Theory (3 Credits)
Critical analysis of contemporary leadership theoretical constructs. Consideration of implications for organizational improvement.
Prerequisite: EDHI642.
Credit Only Granted for: EDHI743, EDPL743, or EDPS743.
Formerly: EDPL743.

EDHI744 Organizational Theory in Research and Practice (3 Credits)
This course provides an overview of the study of organizations for graduate students interested in education and social policy. Class lectures focus on contrasting theories and critiquing application of theories to social policy problems with an emphasis on education. Case materials focus on a variety of organizational areas including: schools, hospitals, non-profit community based organizations, the arts, elected bodies, higher education and private business.
Credit Only Granted for: EDHI744, EDPL744, or EDPS744.
Formerly: EDPL744.

EDHI750 International Higher Education (3 Credits)
Comparison of higher education systems in several countries, and of the problems and issues in higher education faced by these countries.
Credit Only Granted for: EDHI750, EDPL750, or EDPS750.
Formerly: EDPL750.

EDHI752 State Systems of Higher Education (3 Credits)
Creation, operation, alteration and evaluation of state systems of higher education. Campus autonomy versus public accountability. Analysis of topics such as state planning, budget and program review, and administration of student aid and federal programs.
Credit Only Granted for: EDHI752, EDPL752, or EDPS752.
Formerly: EDPL752.

EDHI754 Higher Education Finance (3 Credits)
Economic perspectives on higher education. Ways of financing higher education and current finance issues. Higher education budget concepts and processes.
Credit Only Granted for: EDHI754, EDPL754, or EDPS754.
Formerly: EDPL754.

EDHI755 Federal Policies in Post-Secondary Education (3 Credits)
Evolution of the federal role, its current scope and funding. Policy issues associated with federal student aid programs, research grants and social equity regulations.Cross-listed with: EDPS755.
Credit Only Granted for: EDHI755, EDPL755, or EDPS755.
Formerly: EDPL755.

EDHI759 Seminar in Adult and Continuing Education (3 Credits)
Current issues and problems in adult and continuing education and lifelong learning in America.
Formerly: EDPL759.

EDHI788 Special Topics in Education Policy and Administration (1-3 Credits)
Special and intensive treatment of current topics and issues in education policy and administration.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Repeatable to: 6 credits.

EDHI789 Doctoral Practicum in Administration and Supervision (1-3 Credits)
Experiential activities designed to enhance student skills. Based on Individual Professional Development Plan for each student.
Repeatable to: 3 credits if content differs.
Formerly: EDPL789.

EDHI798 Special Problems in Education (1-6 Credits)
Master's, AGS, or doctoral candidates who desire to pursue special research problems under the direction of their advisors may register for credit under this number.
Formerly: EDPL798.

EDHI799 Master's Thesis Research (1-6 Credits)
Formerly: EDPL799.

EDHI805 Seminar in Comparative Education (3 Credits)
Analysis of educational issues on a worldwide basis with opportunities to focus on a particular country on an individual basis. Analysis of qualitative research methods as used in cross-cultural and comparative education studies.
Credit Only Granted for: EDHI805, EDPL805, or EDPS805.
Formerly: EDPL805.

EDHI839 Seminar in Teacher Education (3-6 Credits)
A problem seminar in teacher education.
Repeatable to: 6 credits.
Formerly: EDPL839.

EDHI853 Leadership in Higher Education (3 Credits)
Theories of organizational leadership applied to institutions of higher education.
Prerequisite: EDHI653.
Credit Only Granted for: EDHI853, EDPL853, or EDPS853.
Formerly: EDPL853.

EDHI855 Lifelong Learning Policy (3 Credits)
Policies and programs for training and continued learning in business and industry, government agencies, unions, professional societies, and nonprofit organizations.
Credit Only Granted for: EDHI855, EDPL855, or EDPS855.
Formerly: EDPL855.

EDHI862 Seminar: Theoretical Basis of Administrative Behavior (3 Credits)
Study of administrative behavior in educational institutions. Development of a research design for the study of administrative behavior in one educational institution.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Credit Only Granted for: EDHI862, EDPL862, or EDPS862.
Formerly: EDPL862.

EDHI888 Apprenticeship in Education (1-8 Credits)
Apprentice practice under professional supervision in an area of competence compatible with the student's professional goals. Credit not to be granted for experience accrued prior to registration. Open only to degree- and certificate-seeking graduate students.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Formerly: EDPL888.

EDHI889 Internship in Education (3-8 Credits)
Internship experiences at a professional level of competence in a particular role with appropriate supervision. Credit not to be granted for experience accrued prior to registration. Open only to students advanced to candidacy for doctoral degree.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.
Formerly: EDPL889.

EDHI895 Research Critique Seminar (3 Credits)
Critiques of research designs in preparation for the doctoral dissertation.
Credit Only Granted for: EDHI895, EDPL895, or EDPS895.
Formerly: EDPL895.

EDHI898 Pre-Candidacy Research (1-8 Credits)
Formerly: EDPL898.

EDHI899 Doctoral Dissertation Research (1-8 Credits)
Registration required to the extent of 6-9 hours for an Ed.D. Project and 12-18 hours for a Ph.D. Dissertation.
Formerly: EDPL899.

EDMS - Measurement, Statistics, and Evaluation

EDMS410 Classroom Assessment (3 Credits)
Developing and using classroom assessments, including tests, performance assessments, rating scales, portfolios, observations and oral interactions; basic psychometric statistics; standard setting; grading; communicating assessment information; testing ethics; locating and evaluating measures; program evaluation and classroom research; assessments used for educational policy decisions.
Restriction: Junior standing or higher.

EDMS451 Introduction to Educational Statistics (3 Credits)
Introduction to statistical reasoning; location and dispersion measures; computer applications; regression and correlation; formation of hypotheses tests; t-test; one-way analysis of variance; analysis of contingency tables.
Restriction: Sophomore standing or higher.

EDMS489 Field Experiences in Measurement and Statistics (1-4 Credits)
Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.
Repeatable to: 4 credits.

EDMS498 Special Problems in Measurement and Statistics (1-3 Credits)
Available only to education majors who have formal plans for individual study of approved problems.
Prerequisite: Available only to education majors who have formal plans for individual study of approved problems.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.
Repeatable to: 6 credits.

EDMS610 Classroom Assessment and Evaluation (3 Credits)
Develop the understandings and skills needed to validly, reliably, and accurately assess student learning and to provide focused leadership in the area of classroom assessment.

EDMS622 Theory and Practice of Standardized Testing (3 Credits)
Principles of interpretation and evaluation of aptitude, achievement, and personal-social instruments; theory of reliability and validity; prediction and classification; norm- and criterion-referenced testing concepts.
Prerequisite: EDMS451; or EDMS645.

EDMS623 Applied Measurement: Issues and Practices (3 Credits)
Measurement theory and its application at an intermediate level; test development, validation and interpretation; issues and recent developments in measurement.
Prerequisite: EDMS410. And EDMS645; or students who have taken courses with comparable content may contact the department.

EDMS626 Instrumentation (3 Credits)
Theory, development, and applications of various affective, cognitive, or behavioral measurement instruments and procedures, including questionnaire and test items, observational protocols, and cutting-edge innovative game and scenario-based assessments.
Prerequisite: EDMS623.

EDMS645 Quantitative Research Methods I (3 Credits)
Research design and statistical applications in educational research: data representation; descriptive statistics; estimation and hypothesis testing. Application of statistical computer packages is emphasized.

EDMS646 General Linear Models I (3 Credits)
A first post-introductory inferential statistics course, with emphasis on analysis of variance procedures and designs from within the general linear modeling framework. Assignments include student analysis of education and related data; application of statistical software packages is emphasized.
Prerequisite: EDMS645; or an equivalent introductory statistics course.

EDMS647 Causal Inference and Evaluation Methods (3 Credits)
Counterfactual (potential outcomes) framework for causal inference, design/analysis strategies for confounder control, and specific best-practice applications to the evaluation of programs.
Prerequisite: Must have completed or be concurrently enrolled in EDMS651.

EDMS651 General Linear Models II (3 Credits)
Multiple regression and correlation analysis; trend analysis; hierarchical and stepwise procedures; logistic regression; software for regression analysis.
Prerequisite: EDMS646; or students who have taken courses with comparable content may contact the department.

EDMS655 Introduction to Multilevel Modeling (3 Credits)
Introduction to multilevel models and methodology as strategies for modeling change and organizational effects.
Prerequisite: EDMS651; or students who have taken courses with comparable content may contact the department.

EDMS657 Exploratory Latent and Composite Variable Methods (3 Credits)
Development of models for exploratory factor analysis and their practical applications. Additional topics will draw from latent class analysis, cluster analysis, mixture models, canonical correlation, multidimensional scaling, and configural frequency analysis.
Prerequisite: EDMS651.

EDMS665 Data Analysis and Statistical Consulting (3 Credits)
Advanced data analysis procedures applied to real-world clients' problems arising in a wide variety of substantive research settings within and beyond education.
Prerequisite: EDMS651; or students who have taken courses with comparable content may contact the department.

EDMS722 Structural Modeling (3 Credits)
Statistical theory and methods of estimation used in structural modeling; computer program applications; multisample models; mean structture models; structural models with multilevel data (e.g., sampling weights, growth models, multilevel latent variable models).
Prerequisite: EDMS657.

EDMS724 Modern Measurement Theory (3 Credits)
Theoretical formulations of measurement from a latent trait theory perspective.
Prerequisite: EDMS623 and EDMS651.

EDMS738 Seminar in Special Problems in Measurement (1-3 Credits)
An opportunity for students with special interests to focus in depth on contemporary topics in measurement. Topics to be announced, but will typically be related to applied and theoretical measurement.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.
Repeatable to: 3 credits.

EDMS747 Design of Program Evaluations (3 Credits)
Analysis of measurement and design problems in program evaluations.
Prerequisite: EDMS626, EDMS651, and EDMS647. Or permission of instructor; and permission of EDUC-Human Development and Quantitative Methodology department.

EDMS769 Special Topics in Applied Statistics in Education (1-4 Credits)
Designed primarily for students majoring or minoring in measurement, statistics or evaluation.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

EDMS771 Multivariate Data Analysis (3 Credits)
Principal components, canonical correlation, discriminant functions, multivariate analysis of variance/covariance and other multivariate techniques.
Prerequisite: EDMS651.

EDMS779 Seminar in Applied Statistics (1-3 Credits)
Enrollment restricted to students with a major or minor in measurement, statistics or evaluation. Seminar topics will be chosen by individual student interest.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department. And must be in Measurement, Statistics and Evaluation (Master's) program; or must be in Measurement, Statistics and Evaluation (Doctoral) program.
Repeatable to: 3 credits if content differs.

EDMS787 Bayesian Inference and Analysis (3 Credits)
Models and model fitting methods commonly used in Bayesian Inference, such as Markov Chain Monte Carlo methods (e.g., Gibbs, Metropolis Sampling), with applications within and beyond the social and behavioral sciences. Analytical and philosophical differences between Frequentist and Bayesian statistics will also be highlighted.
Prerequisite: EDMS779 or permission of the instructor.
Credit Only Granted for: EDMS769B or EDMS787.
Formerly: EDMS769B.

EDMS798 Special Problems in Education (1-6 Credits)
Master's, EDMS majors, or doctoral candidates who desire to pursue special research problems under the direction of their advisors may register for credit under this number.
Restriction: Must be in Measurement, Statistics and Evaluation (Master's) program; or must be in Measurement, Statistics and Evaluation (Doctoral) program.

EDMS799 Master's Thesis Research (1-6 Credits)
Registration required to the extent of 6 credits.
Restriction: Must be in a major within the EDUC-Human Development and Quantitative Methodology department.

EDMS879 Doctoral Seminar (1-3 Credits)
Seminar that supports analysis of doctoral projects and theses, and of other on-going research projects.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

EDMS889 Internship in Measurement and Statistics (3-12 Credits)
Provides internship experiences at a professional level of competence in a particular role with appropriate supervision. Credit not to be granted for experience accrued prior to registration. Open only to students advanced to candidacy for doctoral degree.
Prerequisite: Open only to students advanced to candidacy for doctoral degree.
Restriction: Permission of EDUC-Human Development and Quantitative Methodology department.

EDMS898 Pre-Candidacy Research (1-8 Credits)

EDMS899 Doctoral Dissertation Research (1-8 Credits)
Registration required to the extent of 12 credits.

EDPS - Education Policy Studies

EDPS401 Educational Policy, and Social Change (3 Credits)
An examination of education policy in relation to the social environment and change. Contemporary education and social issues are examined, including technology as a complex force which influences social change. This is a Social Foundations course.
Credit Only Granted for: EDPL401 or EDPS401.
Formerly: EDPL401.

EDPS610 History of Western Education (3 Credits)
Educational institutions through the ancient, medieval and early modern periods in western civilization, as seen against a background of socio-economic development.
Credit Only Granted for: EDHI610, EDPL610, or EDPS610.
Formerly: EDPL610.

EDPS623 Education Policy and Theories of Change (3 Credits)
The work of change theorists in history, economics, political science, philosophy, sociology and anthropology as it impinges upon education policy.
Credit Only Granted for: EDHI623, EDPL623, or EDPS623.
Formerly: EDPL623.

EDPS626 Educatin Policy and the Young (3 Credits)
The systematic exploration of education policy as it has organized, reflected and influenced the lives of children, youth, and families, with particular emphasis on American policies and systems.
Credit Only Granted for: EDHI626, EDPL626, or EDPS626.
Formerly: EDPL626.

EDPS636 Communication and the School Curriculum (3 Credits)
Curriculum development based on communication as the major vehicle for describing the learner's interactions with persons, knowledge, and materials in the classroom and school environment.
Credit Only Granted for: EDHI636, EDPL636, or EDPS636.
Formerly: EDPL636.

EDPS663 Policy Formulation in Education (3-6 Credits)
Various levels of school governance. Analysis of policy formation, administration and evaluation issues.
Restriction: Permission of EDUC-Teaching, Learning, Policy and Leadership department.
Credit Only Granted for: EDHI663, EDPL663, or EDPS663.
Formerly: EDPL663.

EDPS712 Analysis of Educational Concepts (3 Credits)
Analyses of selected concepts used in thinking about education.
Credit Only Granted for: EDHI712, EDPL712, or EDPS712.
Formerly: EDPL712.

EDPS811 Seminar in History of Education (3 Credits)
Examination of current developments and continuing controversies in the field of history of education. The analysis of the various ways in which history of education is approached methodologically and interpretatively.
Credit Only Granted for: EDHI811, EDPL811, or EDPS811.
Formerly: EDPL811.

EDPS812 Seminar in Philosophy of Education (3 Credits)
Examination of current developments and continuing controversies in the field of philosophy of education. The function of educational philosophy, methodological approaches, and current research trends.
Credit Only Granted for: EDHI812, EDPL812, or EDPS812.
Formerly: EDPL812.

EDPS813 Seminar in Educational Sociology (3 Credits)
Sociological analysis of educational processes and institutions; emphasis on the social effects of formal organizations.
Credit Only Granted for: EDHI813, EDPL813, or EDPS813.
Formerly: EDPL813.

EDSP - Education, Special

EDSP400 Instruction of Students with Severe Disabilities I (3 Credits)
Functional assessment procedures and instructional methods for students with severe disabilities.
Restriction: Must be in Special Education program. Jointly offered with EDSP602.
Credit Only Granted for: EDSP400 or EDSP602.

EDSP401 Teaching Students with Disabilities in Elementary Classrooms (3 Credits)
This course is designed for elementary education majors to prepare for teaching students with disabilities in elementary classrooms. The course examines the legal requirements for general education teachers in the public schools including best practices for participating in the Individual Education Program (IEP) team process, and understanding Response to Intervention (RTI) as a approach to the early identification and support of students with learning and behavior needs. Information is provided on the characteristics of students who have been identified as having high incidence disabilities (e.g., learning disabilities, attention deficit hyperactivity disorder, speech and language delays, emotional or behavioral disorders, and other health impairments). The course then provides information on universal design (UDL) principles for learning, instructional suggestions to include students with disabilities in the general classroom, co-teaching and methods for integrating technology and assistive technology to benefit all students.
Restriction: Permission of EDUC-Special Education department.
Credit Only Granted for: EDSP401 or EDSP499F.
Formerly: EDSP499F.

EDSP402 Field Placement: Severe Disabilities I (1 Credit)
Practicum experience in settings serving students with severe disabilities.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP403 Supporting Access for Students with Multiple Disabilities Across Settings (3 Credits)
Knowledge and practices in characteristics of multiple disabilities, assessment, individualized educational programming, universal design processes for instruction, assistive technology, environmental accessibility, and collaboration.
Prerequisite: EDSP400 or EDSP602. Jointly offered with: EDSP603.
Credit Only Granted for: EDSP403 or EDSP603.

EDSP404 Methods of Teaching Autistic Students (3 Credits)
Characteristics of children and youth diagnosed with an autism spectrum disorder (ASD), assessment, and evidence-based instructional methods in teaching autistic students who come from diverse ethnic, cultural, and socio-economic backgrounds.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department. Jointly offered with: EDSP604.
Credit Only Granted for: EDSP404 or EDSP604.

EDSP410 Instruction of Students with Severe Disabilities II (3 Credits)
Functional assessment, curriculum, and instruction related to academic and community functioning skills for students with severe disabilities.
Restriction: Must be in Special Education program. Jointly offered with EDSP614.
Credit Only Granted for: EDSP410 or EDSP614.

EDSP411 Foundations of Technology Integration for Curriculum Access (3 Credits)
Addresses ways to integrate technology and Assistive Technology (AT) into content area instruction, use Accessible Educational Materials (AEM), and the Universal Design for Learning (UDL) framework to evaluate, analyze, and develop responsive instruction.
Prerequisite: EDSP210 or EDSP470.
Restriction: Must be in Special Education program.

EDSP413 Principles and Practices in Positive Behavior Interventions and Classroom Supports (3 Credits)
Use of positive behavior supports to promote both classwide and individual student behavior skills through function-based behavior assessment, establishing classroom expectations, and examining common misbehaviors that often result in learning loss.
Restriction: Must be in Special Education program. Jointly offered with: EDSP613.
Credit Only Granted for: EDSP413 or EDSP613.

EDSP415 Assessment Techniques and Practices in Special Education (3 Credits)
Knowledge and skills for understanding assessment process and interpretation of assessment data. Emphasis on psychometric aspects of assessment related to screening, eligibility, and intervention planning within a Multi-Tiered System of Supports (MTSS).
Recommended: STAT100; or SOCY201.
Restriction: Must be in Special Education program. Jointly offered with: EDSP615.
Credit Only Granted for: EDSP415 or EDSP615.

EDSP416 Reading and Writing Instruction in Special Education I (3 Credits)
Assessment and instruction of reading and writing skills for students in special education.
Restriction: Must be in Special Education program. Jointly offered with EDSP616.
Credit Only Granted for: EDSP416 or EDSP616.

EDSP417 Reading Diagnosis and Assessment (3 Credits)
Reading Diagnosis and Assessment prepares teacher candidates to assess children in general and special early childhood educations settings in the areas of reading and writing in order to plan for instruction. The course will focus on diagnostic, screening, progress monitoring, and outcome assessments in early and beginning literacy. The course is designed to provide participants with the knowledge and skills necessary to collect and use a wide range of assessment data in general education and special education settings. Includes field experience.
Prerequisite: EDSP423, EDHD431, and EDSP315; and track 1: Must have completed EDSP430 and EDSP433; OR Track 2: Must have completed EDHD415 and EDHD424.
Corequisite: EDHD322, EDHD323, EDSP321, EDHD441, EDHD442, EDHD443, and EDHD444.

EDSP420 Child Development, Birth to Three Years (3 Credits)
Designed to provide students with an understanding of child development theory and research, as well as knowledge about typical and atypical development of children from birth to three years of age. The course emphasizes learning for children with and without disabilities, and for children who are at risk due to poverty and other environmental factors. The course will introduce how children develop and the challenges they face within the domains of physical, cognitive, language, social, and emotional development, with particular attention paid to the impact of risk factors on development. Students will become familiar with delays and differences in development that may occur as the result of disability. Finally, students will learn the effects of cultural and linguistic differences on growth and development. Information about theory and research in child development for children with and without disabilities will be enhanced through a series of observational experiences, which will build upon concepts addressed during class. Includes field experiences.
Prerequisite: EDHD210, EDHD220, and EDSP211.
Corequisite: EDHD314 and EDHD425. Cross-listed with: EDHD434.
Credit Only Granted for: EDHD419A, EDSP420 or EDHD434.
Formerly: EDHD419A.

EDSP422 Curriculum and Instruction: Early Childhood Special Education (3 Credits)
Curriculum and instruction for young children with mild and moderate disabilities, preschool through primary grades.
Restriction: Must be in Special Education program. Jointly offered with EDSP627.
Credit Only Granted for: EDSP422 or EDSP627.

EDSP423 Assessment in Early Childhood Special Education (3 Credits)
Assessment procedures for infants and young children with disabilities, birth through grade 3.
Restriction: Must be in Special Education program.
Credit Only Granted for: EDSP423 or EDSP624.

EDSP424 Field Placement in Special Education: Early Childhood II (2-4 Credits)
Field experience in early childhood special education.
Restriction: Must be in Special Education program.

EDSP425 Pre-Internship I (1 Credit)
This required EDSP field placement is a 3-hour per week seminar and field placement that meets across 15 weeks. Opportunities are provided to observe and participate in instructional experiences under the guidance of an assigned Host Teacher (HT) in a four-week experience in a high incidence placement AND a four-week experience in a low incidence (LI) placement. The purpose is to provide each special education teacher candidate (TC) with practical experience to complete field-based requirements and begin to meet the CEC Initial Preparation Standards (2012). Furthermore, since EDSP 425 is the first internship experience in the Special Education Program in the College of Education at University of Maryland, teacher candidates will become familiar with the Special Education Program, College of Education, Maryland State Department of Education (MSDE), Counsel for Accreditation of Educator Preparation (CAEP), and Council for Exceptional Children (CEC) expectations and requirements for graduation and teacher licensure.
Corequisite: EDSP451 and EDSP400.
Restriction: Must be in the Special Education major.

EDSP426 Pre-Internship II (1 Credit)
A 3-hour per week seminar and field placement that meets across 15 weeks. Teacher candidates will assess and provide instruction for first grade students at a local public elementary school. The field experience is also supported through content delivered in EDSP 415/615 (Assessment in Special Education) and EDSP 416/616 (Reading and Writing Instruction in Special Education). The tutoring program is meant to provide an opportunity for teacher candidates to practice the assessment and instructional skills they are learning, while also providing a needed service to the community. Teacher candidates will work one-on-one with select first graders whose teachers have determined to be in need of extra support in reading and writing.
Corequisite: EDSP415 and EDSP416.
Restriction: Must be in the Special Education major.

EDSP430 Early Intervention: Early Childhood Special Education (3 Credits)
Intervention with infants and young children with disabilities. Focus on moderate and severe disabilities.
Restriction: Must be in Special Education program.
Credit Only Granted for: EDSP430 or EDSP631.

EDSP433 Families and Culture in Early Intervention (Birth-5) (3 Credits)
Provides students with the skills and information they need to work effectively with families of young children (birth to age 5) who have or are at risk for disabilities in early childhood or early intervention programs. Students will review current local, state and federal policies establishing the rights of families of infants and young children with disabilities to participate in decision making for their child. We will discuss relevant theoretical and research literature as well as the cultural and contextual issues involved in working with families of very young children. Includes field experiences.
Prerequisite: EDHD314 and EDHD425; and (EDHD419 or EDSP420).
Corequisite: EDSP430, EDSP315, and EDHD431.

EDSP434 Field Placement in Special Education: Secondary Middle I (2-4 Credits)
Field experience in secondary middle special education.
Restriction: Must be in Special Education program.

EDSP435 Field Placement in Special Education: Secondary Middle II (2-4 Credits)
Field experience in secondary middle special education.
Restriction: Must be in Special Education program.

EDSP443 Language and Literacy Acquisition in Children with Disabilities (3 Credits)
Language and literacy acquisition and characteristics of typical and atypical language development in supporting students with reading and writing disabilities.
Restriction: Must be in Special Education program.
Additional Information: This course is the first of four reading courses required by the Maryland State Department of Education for teacher certification in Special Education.

EDSP451 Curriculum and Instruction: Elementary/Middle Special Education (3 Credits)
Methods for instruction of students with disabilities in the general education curriculum. Collaboration with other professionals is included.
Restriction: Must be in Special Education program. Jointly offered with EDSP652.
Credit Only Granted for: EDSP451 or EDSP652.

EDSP452 Internship I: Elementary/Middle Special Education (2-4 Credits)
Field experience in elementary/middle school special education.
Restriction: Must be in Special Education program. Jointly offered with EDSP692.
Credit Only Granted for: EDSP452 or EDSP692.

EDSP453 Methods and Models of Instruction: Elementary Special Education (3 Credits)
Focus on models and methods of instruction responsive to the cognitive, linguistic, and cultural characteristics of elementary students in special education.
Restriction: Must be in Special Education program.
Credit Only Granted for: EDSP453 or EDSP653.

EDSP454 Field Placement in Special Education: Elementary II (2-4 Credits)
Field experience in elementary special education.
Restriction: Must be in Special Education program.

EDSP455 Assessment in Elementary Special Education (3 Credits)
Focus on selection, administration, and interpretation of assessment tools and results for designing instruction and evaluating progress of elementary students in special education.
Restriction: Must be in Special Education program. Jointly offered with EDSP654.
Credit Only Granted for: EDSP455 or EDSP654.

EDSP466 Issues and Models of Instruction: Middle/Secondary Special Education (3 Credits)
Issues, legislation, and service models in middle/secondary special education. Emphasis on career and vocational education, self-determination, and transition.
Restriction: Must be in Special Education program. Jointly offered with EDSP664.
Credit Only Granted for: EDSP466 or EDSP664.

EDSP470 Introduction to Special Education (3 Credits)
Designed to give an understanding of the needs of all types of exceptional children.
Restriction: Must not have completed EDSP210.
Credit Only Granted for: EDSP210, EDSP211 or EDSP470.

EDSP476 Communicating with Sign Language (3 Credits)
Intermediate level receptive/expressive skills in American Sign Language. Aspects of the culture, history, and research perspectives of the deaf community.
Prerequisite: EDSP376.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP484 Reading and Writing Instruction in Special Education II (3 Credits)
Focus on the development of reading and writing programs for students in special education. Builds on foundations established in EDSP416.
Prerequisite: EDSP416.
Restriction: Must be in Special Education program. Jointly offered with EDSP684.
Credit Only Granted for: EDSP484 or EDSP684.

EDSP485 Assessment and Instruction in Mathematics in Special Education (3 Credits)
Instructional methods and assessment in mathematics in special education.
Restriction: Must be in Special Education program; or must be in one of the following programs (Special Education (Doctoral); Special Education (Master's)). Jointly offered with EDSP683.
Credit Only Granted for: EDSP485 or EDSP683.

EDSP486 Promoting Prosocial Behavior in Special Education (3 Credits)
Focus on social development among students with and without disabilities, the relationship between pedagogy and student behavior, and classroom, school, and community approaches for developing prosocial behavior.
Restriction: Must be in Special Education program.
Credit Only Granted for: EDSP486 or EDSP686.

EDSP487 Collaborative Partnerships in Special Education (3 Credits)
Strategies for positively collaborating with families, practitioners, and community stakeholders to implement Specially Designed Instruction (SDI) for students with disabilities.
Restriction: Must be in Special Education program. Jointly offered with: EDSP687.
Credit Only Granted for: EDSP487 or EDSP687.

EDSP488 Selected Topics in Teacher Education (1-3 Credits)
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department; or must be in a major in EDUC-College of Education.
Repeatable to: 6 credits if content differs.

EDSP489 Field Experiences in Special Education (1-4 Credits)
Planned field experience in education-related activities. Credit not to be granted for experiences accrued prior to registration.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP490 Teacher Candidate Research Seminar in Special Education (3 Credits)
Study of current issues and research concerning the education of students in special education.
Restriction: Must be in Special Education program.

EDSP495 Internship II: Elementary/Middle Special Education (6-12 Credits)
Internship II is a full-time 15 week field-placement experience in a local school system working with students with disabilities in an elementary or middle school environment. Internship II allows the intern to apply and integrate teaching competencies and responsibilities by systematically increasing independence in conducting all aspects of the special education mentor teacher's role. The intern will incrementally assume responsibility for planning, instruction, management, collaboration, and other essential tasks assigned in their internship placement. The intern will be responsible for the successful completion of edTPA, seminar assignments, and self-evaluation using Live Text for Foundational Competencies (FCs) and the Performance Based Assessment (PBA). Interns will be asked to recall and integrate course content from their prerequisite coursework during seminar and their field placement experience.
Corequisite: EDSP490.
Restriction: Must be in Special Education program; or must be in one of the following programs (Special Education (Doctoral); Special Education (Master's)). Jointly offered with: EDSP695.
Credit Only Granted for: EDSP495 or EDSP695.

EDSP498 Special Problems in Special Education (1-6 Credits)
Available only to education majors who have definite plans for individual study of approved problems. Credit according to extent of work.
Prerequisite: Available only to education majors who have definite plans for individual study of approved problems.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP499 Workshops, Clinics, and Institutes in Special Education (1-6 Credits)
The following type of educational enterprise may be scheduled under this course heading: workshops conducted by the special education department (or developed cooperatively with other departments, colleges and universities) and not otherwise covered in the present course listing. Laboratories, and special education centers; institutes developed around specific topics or problems and intended for designated groups such as school superintendents, principals and supervisors.
Repeatable to: 6 credits if content differs.

EDSP600 Issues and Trends in Educating Individuals with Disabilities (3 Credits)
Examines research and practice relevant to the education of individuals with disabilities.
Prerequisite: 9 credits in EDSP courses.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP601 Special Education for School Counselors (3 Credits)
Designed to give school counseling students an understanding of the needs of children with disabilities, and the school-based services that they received. The course focuses on the school counselor's role in identifying and supporting children who have disabilities.
Restriction: Must be in Counseling and Personnel Services (Master's) program.
Credit Only Granted for: EDSP470 or EDSP601.

EDSP602 Instruction of Students with Severe Disabilities I (3 Credits)
Functional assessment procedures and instructional methods for students with severe disabilities.
Restriction: Must be in Special Education (Master's) program.
Credit Only Granted for: EDSP400 or EDSP602.

EDSP603 Supporting Access for Students with Multiple Disabilities Across Settings (3 Credits)
Knowledge and practices in characteristics of multiple disabilities, assessment, individualized educational programming, universal design processes for instruction, assistive technology, environmental accessibility, and collaboration .
Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program. Jointly offered with: EDSP403.
Credit Only Granted for: EDSP403 or EDSP603.

EDSP604 Methods of Teaching Autistic Students (3 Credits)
Characteristics of children and youth diagnosed with an autism spectrum disorder (ASD), assessment, and evidence-based instructional methods in teaching autistic students who come from diverse ethnic, cultural, and socio-economic backgrounds.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department. Jointly offered with: EDSP404.
Credit Only Granted for: EDSP404 or EDSP604.

EDSP605 The Exceptional Child and Society (3 Credits)
Relationship of the role and adjustment of the child with an exceptionality to societal characteristics.
Prerequisite: EDSP600.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP606 Advanced Study in Inclusive Practices in The Schools (3 Credits)
Educational practices regarding inclusive education in the schools for students with and without disabilities.Jointly offered with EDSP450.
Credit Only Granted for: EDSP450, EDSP606 , or EDSP788P.
Formerly: EDSP788P.

EDSP607 School Violence and Disruption (3 Credits)
An examination of school violence and disruption from multiple perspectives. Societal, community, and individual factors are examined. Prevention strategies, interagency collaboration, and intervention techniques are addressed.

EDSP610 Neurodevelopment and Disability for Educators (4 Credits)
Designed for educators of students with disabilities interested in understanding cognition and learning from a neurodevelopmental perspective. Students will be introduced to the basics of neuro-anatomy as well as typical and atypical brain development as it relates to children from birth to age 21.
Restriction: Must be in the Supporting Children with Intensive Behavior Needs in a Public School Setting Post-Baccalaureate Certificate program.

EDSP611 Teaching Students with Disabilities in Elementary Classrooms (2 Credits)
This course is designed for elementary education majors to prepare for teaching students with disabilities in elementary classrooms. The course examines the legal requirements for general education teachers in the public schools including best practices for participating in the Individual Education Program (IEP) team process, and understanding Response to Intervention (RTI) as a approach to the early identification and support of students with learning and behavior needs. Information is provided on the characteristics of students who have been identified as having high incidence disabilities (e.g., learning disabilities, attention deficit hyperactivity disorder, speech and language delays, emotional or behavioral disorders, and other health impairments). The course then provides information on Universal Design for Learning (UDL) principles, instructional suggestions to include students with disabilities in the general classroom, co-teaching and methods for integrating technology and assistive technology to benefit all students.
Restriction: Permission of EDUC-Special Education department.
Credit Only Granted for: EDSP608, EDSP611, EDSP401 or EDSP499F.

EDSP612 Transition Methods and Disability Systems (3 Credits)
Philosophical and historical foundatins of transition service delivery and current methods that comprise transition services for students with disabilities.
Restriction: Permission of instructor.

EDSP613 Principles and Practices in Positive Behavior interventions and Classroom Supports (3 Credits)
Use of positive behavior supports to promote both classwide and individual student behavior skills through function-based behavior assessment, establishing classroom expectations, and examining common misbehaviors that often result in learning loss.
Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program; or permission of instructor. Jointly offered with: EDSP413.
Credit Only Granted for: EDSP413 or EDSP613.

EDSP614 Instruction of Students with Severe Disabilities II (3 Credits)
Functional assessment, curriculum, and instruction related to academic and community functioning skills for students with severe disabilities.
Restriction: Must be in Special Education (Master's) program.
Credit Only Granted for: EDSP410 or EDSP614.

EDSP615 Assessment Techniques and Practices in Special Education (1-3 Credits)
Knowledge and skills for understanding assessment process and interpretation of assessment data. Emphasis on psychometric aspects of assessment related to screening, eligibility, and intervention planning within a Multi-Tiered System of Supports (MTSS).
Prerequisite: EDSP600 and EDMS646; or permission of EDUC-Counseling, Higher Education and Special Education department. Jointly offered with: EDSP415.
Credit Only Granted for: EDSP415 or EDSP615.

EDSP616 Reading and Writing Instruction in Special Education I (3 Credits)
Assessment and instruction of reading and writing skills and strategies for students in special education.
Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program. Jointly offered with EDSP41 6.
Credit Only Granted for: EDSP416 or EDSP616.

EDSP617 Social-Communication Challenges and Strategies for Individuals with Autism Spectrum Disorder and Severe Disabilities (3 Credits)
Provides students with an in-depth analysis of social and communicative challenges typically observed in children with autism spectrum disorder (ASD) and severe disabilities. Theoretical perspectives of communication in individuals with ASD and severe disabilities will be discussed. The application of social-communication evidence-based practices will be emphasized.
Prerequisite: EDSP604; or permission of instructor.
Credit Only Granted for: EDSP617 or EDSP678G.
Formerly: EDSP678G.

EDSP621 Designing Intensive Interventions for Social and Academic Skill Development for Students with Persistent Needs (3 Credits)
Prerequisite: EDSP 600, EDSP 601 or consent of instructor. Strategies to teach social and academic skills to behaviorally disordered students.
Prerequisite: EDSP600 and EDSP601; or permission of instructor.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP622 History, Research and Context in Behavioral and Learning Di sorders (3 Credits)
Examination of theoretical, historical, and contextual influences affecting the study and treatment of persons with behavioral and learning disorders.
Prerequisite: EDSP470.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP623 Challenges and Issues in Behavioral and Learning Disorders (3 Credits)
Development and outcomes for students with behavioral and learning disorders for inclusive schools, discipline, professional development and ethics.
Prerequisite: EDSP470.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP624 Assessment in Early Childhood Special Education (3 Credits)
Assessment procedures for infants and young children with disabilities, birth through age eight.
Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program. Jointly offered with EDSP42 3.
Credit Only Granted for: EDSP423 or EDSP624.

EDSP625 Evidence Based Practices for Individuals with Significant Disabilities (3 Credits)
Examine and apply empirical research aligned to current trends and areas of investigation in the field of students with significant support needs.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP626 Characteristics of Infants and Young Children: Early Childhood Special Education (3 Credits)
Focus on developmental, behavioral, and learning characteristics of infants and young children with and without disabilities.Jointly offered with EDSP420.
Credit Only Granted for: EDSP420 or EDSP6 26.

EDSP627 Curriculum and Instruction: Early Childhood Special Education (3 Credits)
Curriculum and instructor for young children with mild and moderate disabilities, preschool through primary grades.Jointly offered with EDSP422.
Credit Only Granted for: EDSP422 or EDSP6 27.

EDSP631 Early Intervention: Early Childhood Special Education (3 Credits)
Intervention with infants and young children with disabilities. Focus on moderate and severe disabilities.
Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program. Jointly offered with EDSP43 0.
Credit Only Granted for: EDSP430 or EDSP631.

EDSP632 Embracing Diversity: Teaching Students with Disabilities and Gifted Learners in Secondary (3 Credits)
Designed for secondary education majors to prepare for teaching students with disabilities in secondary classrooms. Examines the legal requirements for general education teachers in the public schools including best practices for participating in the Individual Education Program (IEP) team process, and understanding Response to Intervention (RTI) as a approach to the early identification and support of students with learning and behavior needs. Information is provided on the characteristics of students who have been identified as having high incidence disabilities (e.g., learning disabilities, attention deficit hyperactivity disorder, speech and language delays, emotional or behavioral disorders, and other health impairments). Information is also provided on the characteristics of students who are considered gifted and/or talented, as well as instructional methods for differentiating instruction to meet their needs. Also provides information on universal design (UDL) principles for learning, instructional suggestions to include students with disabilities in the general classroom, co-teaching, and methods for integrating technology and assistive technology to benefit all students.
Prerequisite: Permission of instructor.
Restriction: Permission of EDUC-Special Education department.
Credit Only Granted for: EDSP609 or EDSP632.
Formerly: EDSP609.

EDSP652 Curriculum and Instruction: Elementary Special Education (3 Credits)
Methods for instruction of students with disabilities in the general education curriculum. Collaboration with other professionals is included.Jointly offered with EDSP451.
Credit Only Granted for: EDSP451 or EDSP6 52.

EDSP654 Assessment in Elementary Special Education (3 Credits)
Focus on selection, administration, and interpretation of assessment tools and results for designing instruction and evaluating progress of elementary students in special education.Jointly offered with EDSP455.
Credit Only Granted for: EDSP455 or EDSP6 54.

EDSP655 Seminar in Secondary and Transition Special Education (3 Credits)
Review of research pertaining to individuals with disabilities in secondary and post-secondary vocational and transitional settings.
Prerequisite: EDSP600.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP664 Issues and Models:Secondary/Middle Special Education (3 Credits)
Issues, legislation, and service models in secondary/middle special education. Emphasis on career and vocational education, self-determination, and transition.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department. Jointly offered with: EDSP466.
Credit Only Granted for: EDSP466 or EDSP664.

EDSP665 Families, Culture, and Disability (3 Credits)
Current research on service delivery and cultural factors that influence families of children and youth with disabilities.
Prerequisite: EDSP600.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP670 Single Case Research Designs in Education (3 Credits)
Design, application, procedures, and analysis of single case research designs in special education to effectively evaluate instructional decisions.
Prerequisite: EDSP600.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP671 Qualitative Methodologies in Special Education (3 Credits)
Design and evaluation of qualitative research in special education across disabilities and ages.
Prerequisite: EDSP600.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP673 Evaluating Evidence-Based Practices in Special Education (3 Credits)
Evaluating evidence-based practices in special education, by examining theoretical origins, use of causal designs, programmatic lines of research, and research syntheses to explore the development of what it means for an intervention to have the potential to significantly impact practice.
Prerequisite: EDMS645.
Recommended: EDSP670 and EDSP600.
Credit Only Granted for: EDSP673 or EDSP798E.
Formerly: EDSP798E.

EDSP674 Assessment in Middle/Secondary Special Education (3 Credits)
Cognitive, vocational, and social assessment for students with disabilities. Emphasis on interpretation of assessment results and case management practices.
Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program. Jointly offered with EDSP47 4.
Credit Only Granted for: EDSP474 or EDSP674.

EDSP675 Legal and Policy Foundations for Individuals with Disabilities (3 Credits)
Regulatory and statutory foundations for public policies addressing the education of children and youth with disabilities.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP677 Curriculum, Assessment, and Instruction: Middle/Secondary Special Education (3 Credits)
Methods and assessment practicies for effective instruction in middle and secondary content areas for students in special education.Jointly offered with EDSP477.
Credit Only Granted for: EDSP477 or EDSP6 77.

EDSP678 Seminar in Special Education (3 Credits)

EDSP681 Seminar in Cultural Diversity and Disability (3 Credits)
A study of diversity issues within special education, with attention to issues of race, culture, and disability as they pertain to teaching, learning, and social justice.
Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program. Jointly offered with EDSP48 1.
Credit Only Granted for: EDSP481 or EDSP681.

EDSP682 Advanced Literacy Approaches for At-Risk Adolescents (3 Credits)
Approaches to teaching reading in the content areas for secondary students with disabilities.Jointly offered with EDSP482.
Credit Only Granted for: EDSP482, EDSP488 R, EDSP682, or EDSP788R.
Formerly: EDSP788R.

EDSP683 Assessment and Instruction in Mathematics in Special Education (3 Credits)
Instructional methods and assessment in mathematics in special education.
Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program. Jointly offered with EDSP48 5.
Credit Only Granted for: EDSP485 or EDSP683.

EDSP684 Reading and Writing Instruction in Special Education II (3 Credits)
Development of effective reading and writing programs for students receiving special education services. Builds on the foundation established in EDSP 616.
Prerequisite: EDSP616.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department. Jointly offered with EDSP484.
Credit Only Granted for: EDSP484 or EDSP684.

EDSP687 Collaborative Partnerships in Special Education (3 Credits)
Strategies for positively collaborating with families, practitioners, and community stakeholders to implement Specially Designed Instruction (SDI) for students with disabilities.
Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program. Jointly offered with: EDSP487.
Credit Only Granted for: EDSP487 or EDSP687.

EDSP690 Teacher Candidate Research Seminar in Special Education (3 Credits)
Required seminar for master's certification teacher candidates in special education focusing on research methods and applications with students having disabilities.
Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program.

EDSP691 Graduate Internship in Special Education I: Early Childhood (2-4 Credits)
Internship I in early childhood special education.
Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program.
Credit Only Granted for: EDSP431 and EDSP691.
Formerly: EDSP431.

EDSP692 Graduate Internship I: Elementary/Middle Special Education (2-4 Credits)
Field experience in elementary/middle school special education.
Restriction: Must be in Special Education (Master's) program.
Credit Only Granted for: EDSP452 or EDSP692.

EDSP693 Graduate Internship in Special Education I: Secondary Middle (2-4 Credits)
Internship I in secondary middle special education.
Restriction: Must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program.
Credit Only Granted for: EDSP436 or EDSP693.
Formerly: EDSP436.

EDSP694 Graduate Internship in Special Education II: Early Childhood (6-11 Credits)
Student teaching, full-time for twelve weeks, with infants or preschool children with disabilities.
Corequisite: EDSP690.
Restriction: Must be in Special Education program; or must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program.
Credit Only Granted for: EDSP494, EDSP694, or EDSP889A.

EDSP695 Graduate Internship II: Elementary/Middle Special Education (6-11 Credits)
Internship II is a full-time 15 week eld-placement experience in a local school system working with students with disabilities in an elementary or middle school environment. Internship II allows the intern to apply and integrate teaching competencies and responsibilities by systematically increasing independence in conducting all aspects of the special education mentor teacher's role. The intern will incrementally assume responsibility for planning, instruction, management, collaboration, and other essential tasks assigned in their internship placement. The intern will be responsible for the successful completion of edTPA, seminar assignments, and self-evaluation using Live Text for Foundational Competencies (FCs) and the Performance Based Assessment (PBA). Interns will be asked to recall and integrate course content from their prerequisite coursework during seminar and their eld placement experience.
Corequisite: EDSP690.
Recommended: Must be in Special Education (Master's) program EDSPM Special Education.
Restriction: Must be in Special Education (Master's) program.
Credit Only Granted for: EDSP495, EDSP695 or EDSP888A.

EDSP696 Graduate Internship in Special Education II: Secondary Middle (6-11 Credits)
Student teaching, full-time for twelve weeks, with students with disabilities in secondary or middle school settings.
Corequisite: EDSP690.
Restriction: Must be in Special Education program; or must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program.
Credit Only Granted for: EDSP496, EDSP696, or EDSP889A.

EDSP788 Selected Topics in Special Education (1-3 Credits)
Current topics and issues in teacher education.
Repeatable to: 6 credits if content differs.

EDSP798 Special Problems in Special Education (1-6 Credits)
Intended for Master's, AGS, or doctoral students in education who desire to pursue a research problem.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP799 Master's Thesis Research (1-6 Credits)
Registration required to the extent of six hours for Master's thesis.

EDSP860 Doctoral Research Seminar (3 Credits)
Issues and procedures relevant to conducting and analyzing research in special education.

EDSP872 Theory and Empirical Design in Educational Research (3 Credits)
Design and evaluation of quantitative research in special education across disabilities and ages.
Prerequisite: EDMS645 and EDMS646; or permission of EDUC-Counseling, Higher Education and Special Education department.
Restriction: Must be in Special Education (Doctoral) program.
Credit Only Granted for: EDSP672 or EDSP872.
Formerly: EDSP672.

EDSP875 Policy Issues Affecting Individuals with Disabilities (3 Credits)
An analysis of current educational and disability issues and policies pertaining to children, youth, and adults with disabilities.
Restriction: Permission of instructor; or must be in Special Education (Doctoral) program; or must be in Special Education (Master's) program.

EDSP888 Apprenticeship in Special Education (1-8 Credits)
Apprentice practice under professional supervision in an area of competence compatible with the student's professional goals. Credit not to be granted for experience accrued prior to registration. Open only to degree- and certificate- seeking graduate students.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP889 Internship in Special Education (3-8 Credits)
Internship experiences at a professional level of competence in a particular role with appropriate supervision. Credit not to be granted for experience accrued prior to registration. Open only to students advanced to candidacy for doctoral degree.
Restriction: Permission of EDUC-Counseling, Higher Education and Special Education department.

EDSP898 Pre-Candidacy Research (1-8 Credits)

EDSP899 Doctoral Dissertation Research (1-8 Credits)
Registration required to the extent of 6-9 hours for an Ed.D. Project and 12-18 hours for a Ph.D. dissertation.

EDUC - Education

EDUC478 Using Information Technology in Schools (1-3 Credits)
Strategies, resources, tools and organizational concepts for using technology to facilitate classroom learning and school administrative functions.
Restriction: Permission of EDUC-College of Education; and junior standing or higher.
Repeatable to: 6 credits if content differs.

EDUC498 Selected Topics in Education (1-3 Credits)
Current topics and issues in education.
Restriction: Permission of EDUC-College of Education.
Repeatable to: 9 credits if content differs.

EDUC499 Honors Thesis (1-6 Credits)
Individual thesis work under supervision of faculty advisors; includes periodic seminar meetings with other honors students engaged in thesis work.
Prerequisite: Admission to College Honors Program.
Restriction: Permission of EDUC-College of Education.

EDUC640 Introduction to Educational Leadership (3 Credits)
The focus of this course is the analysis of the role of education administrators/leaders in the social, political, and legal contexts of schools. Also examines the role of leadership in school improvement.
Credit Only Granted for: EDHI640 or EDUC640.
Formerly: EDHI640.

EDUC645 Leading Instructional Improvement (3 Credits)
Development of knowledge and skills in the use of data bases, research findings and models of supervision, to improve instruction in schools.
Credit Only Granted for: EDHI645 or EDUC645.
Formerly: EDHI645.

EDUC646 Leading Instructional Excellence (3 Credits)
Leader's role in fostering high quality teaching and learning. Exploration of the relationship between curriculum instruction assessment and the organizational structure of K-12 public schooling. Development and assessment of frameworks for understanding instructional quality. Analysis of strategies for supporting teachers as they engage in curricular and professional development. Consideration of factors involved in creating and sustaining instructionally centered schools.
Prerequisite: EDUC645; or permission of instructor.
Credit Only Granted for: EDHI646 or EDUC646.
Formerly: EDHI646.

EDUC670 Learning Communities (3 Credits)
Reviews contemporary research on student and teacher learning and schools as learning organizations. It aims to build students understanding of opportunities and challanges to implementing learning environments in various educational organizations. Readings, cases and assignments emphasize students' understanding of learning theories and their application to various organizational settings.
Credit Only Granted for: EDHI670 or EDUC670.
Formerly: EDHI670.

EDUC671 Education Law, Finance and Policy (3 Credits)
An examination of the way judicial interpretation of common, statutory, and constitutional law shapes and constrains educational policy making. In addition, this course is designed to introduce students to issues related to the financing and resource management of public elementary and secondary schools and school systems in the United States.
All discussions include dimensions of both theory and practice and specifically address reform in terms of alternatives to current practice.

EDUC689 Practicum In Educational Administration and Supervision (1-3 Credits)
Promotes skill development in managerial, leadership and supervisory areas. Practicum is based on results of diagnostic instruments and an individual professional development plan.
Repeatable to: 3 credits if content differs.

EDUC698 Advanced Topics in Education (1-3 Credits)
Arranged study on specific topics in education.
Restriction: Permission of EDUC-College of Education.
Repeatable to: 6 credits if content differs.

EDUC701 Applied Research and Data Based Decision Making for School Leaders (3 Credits)
This course focuses on understanding school system data including student assessments, teacher and administrator evaluations and other program data. Ed.D. students will learn to evaluate the technical characteristics and implications for use of such data as well as how to design instruments to collect needed data.
Restriction: Permission of EDUC-College of Education.
Credit Only Granted for: EDUC701 or EDHI701.
Formerly: EDHI701.

EDUC702 Applied Research Design for Education Leaders (3 Credits)
Emphasizes quantitative and qualitative methodologies to investigate a range of educational problems. Designed for EdD doctoral students.
Restriction: Permission of EDUC-College of Education.
Credit Only Granted for: EDUC702 or EDHI702.
Formerly: EDHI 702.

EDUC703 Conducting Library Research for Capstones (2 Credits)
Course is designed to provide students in the Ed.D. doctoral program in School System Leadership with the skills necessary to conduct library research in preparation for developing the literature review for the Capstone.
Restriction: Permission of EDUC-College of Education; and must be enrolled in EdD in School System Leadership.

EDUC704 Introduction to Writing for Education Leaders (2 Credits)
This course is designed to provide students in the Ed.D. program with specific strategies and skills needed to complete their Dissertation of Practice. Skills include constructing a problem statement and developing a cohesive argument for a proposed solution.
Restriction: Permission of EDUC-College of Education and Must be in EdD School System Leadership program.

EDUC705 Education Policy Making and the School Leader (4 Credits)
Course analyzes educational K-12 policies and their impacts on school systems and the leadership of those systems
Restriction: Permission of EDUC-College of Education.
Credit Only Granted for: EDUC705 or EDPL663.
Formerly: EDPL663.

EDUC740 Managing Educational Organizations in a Diverse Society (4 Credits)
Contemporary social and cultural influences that impact on the management of schools and school systems in a diverse society. The effects on schools and school systems of changes in the economy, family structure, demographics and technology will be examined.
Restriction: Permission of EDUC-College of Education.
Credit Only Granted for: EDUC740 or EDHI740.
Formerly: EDHI740.

EDUC747 Advanced Seminar on Instructional Improvement for School Leaders (4 Credits)
Course addresses current issues, research, trends, and problems in the areas of instructional improvement and the responsibilities of school-based administrators in improving student learning.
Restriction: Permission of EDUC-College of Education.
Credit Only Granted for: EDUC747 or EDHI747.
Formerly: EDHI747.

EDUC760 The Human Dimension in Administration (4 Credits)
Course focuses on theory, research findings, and current practices in managing human resources in educational organizations. Issues related to performance evaluations, professional development, and legal and ethical standards are addressed.
Restriction: Permission of EDUC-College of Education.
Credit Only Granted for: EDUC760 or EDHI760.
Formerly: EDHI760.

EDUC767 Seminar on School District Leadership (4 Credits)
Examination of theory and research related to school district leadership with focus on improvement sciences. Course uses improvement science model to understand organizational, political, community, instructional problems of practice.
Restriction: Permission of EDUC-College of Education.
Credit Only Granted for: EDUC767 or EDHI767.
Formerly: EDHI767.

EDUC770 System Innovation and Transformation (4 Credits)
Course is designed to provide EdD students understanding how complex systems improve performance and connect educational and social objectives to goals of innovation and efficiency.
Restriction: Permission of EDUC-College of Education.
Credit Only Granted for: EDUC769, EDHI788M, or EDUC770.
Formerly: EDHI788M.

EDUC773 Seminar in School Finance and Resource Management (4 Credits)
Issues related to financing and resource management in US K-12 public education systems will be investigated including how various levels of government support public education, and the revenue-generating tools they use. A major theme throughout the course will be on how the values and concepts of educational equity drive the distribution of revenue to schools and how to use data to create . a school-level resourcing plan that provides access and opportunities to learning for every student.
Prerequisite: Permission of instructor.
Restriction: Must be in the Ed.D. School System Leadership program.

EDUC828 Mid-Program Evaluation Portfolio (2-6 Credits)
Students will examine issues of performance assessment and develop a professional portfolio that follow NELP standards and assessment criteria and will compile and synthesize research/inquiry and experiential learning and reflections that demonstrate mastery of the standards.
Restriction: Permission of instructor and Must be in Ed.D. in School Leadership program.
Repeatable to: 12 credits.

EDUC829 Doctoral Capstone (1-6 Credits)
The completion of a doctoral capstone is required for all professional practice doctoral students, allowing demonstration of excellence in professional practice in the field of education leadership. The topic, activities, and outcomes related to the doctoral capstone must be approved by the doctoral advisor and capstone committee and presented and defended by the student.
Prerequisite: EDUC828.
Restriction: Successful completion of mid-program evaluation.
Repeatable to: 12 credits.

EDUC888 Applied Apprenticeship in Education (1-3 Credits)
Apprentice practice under professional supervision in an area of competence compatible with the student's professional goals.
Restriction: Permission of EDUC-College of Education.
Repeatable to: 12 credits.

EDUC898 Pre-Candidacy Research (2-4 Credits)
Pre-Candidacy Research
Repeatable to: 12 credits.

EDUC899 Dissertation of Practice Research (1-6 Credits)
Registration required to the extent of 6-9 hours for an Ed.D. Dissertation.
Repeatable to: 9 credits.

EMBA - Executive MBA Program

EMBA610 Introduction to Financial Accounting (2 Credits)
Overview of financial accounting, periodic financial statements and the financial reporting process. Importance of financial statements as information source for creditors and investors and as a means by which managers can communicate information about their firms.
Restriction: Must be in Executive MBA program.

EMBA611 Managerial Accounting (2 Credits)
Use of accounting data in corporate planning and control. Cost-volume-profit analysis, budgeting, pricing decisions and cost data, transfer pricing, activity-based management, performance measures, and standard costing.
Restriction: Must be in Executive MBA program.

EMBA616 Accounting for Senior Management (3 Credits)
This course is designed to give senior managers an overview of basic financial and managerial accounting principles and tools with emphasis on those principles and tools they can use to support various managerial decision-making tasks.
Restriction: Must be in Executive MBA program.

EMBA617 Accounting for Decision Making (4 Credits)
An overview of financial accounting including the emphasis on periodic financial statements, the financial reporting process, the importance of financial statements as (i) an information source for creditors and investors and (ii) a means by which managers can communicate information about their firms. Overview of managerial accounting in corporate planning and control. Specific facets include cost-volume-profit analysis, budgeting, pricing decisions and cost data, transfer pricing, activity-based management, performance measures, and standard costing.
Restriction: Must be in Executive MBA program.

EMBA620 Strategic Information Systems (2 Credits)
Use of information technology to achieve competitive advantage, efficient operations, and effective decision making. Analysis of functions of information technology and its impact on competitive strategy and organizational operations.
Restriction: Must be in Executive MBA program.

EMBA621 Digital Transformation in Business (3 Credits)
Introduces students to the strategic role of digital transformation within businesses, and provides an overview for how major information technologies may be used to inform and transform the firm's strategic, operational, and tactical decisions. Topics discussed in the course include the strategic use of digital technologies to generate sustainable competitive value; the contributions of new forms of technology infrastructure; the evaluation of new technology investments and the resulting ROI; acquiring, managing and governing technological capabilities within the firm; understanding the role of enterprise systems and social technologies within the firm; and the management of disruptive technologies within and outside the firm.
Restriction: Must be in Executive MBA program.

EMBA630 Data Models and Decisions (3 Credits)
To develop probabilistic and statistical concepts, methods and models through examples motivated by real-life data from business and to stress the role that statistics play in the managerial decision making process.
Restriction: Must be in Executive MBA program.

EMBA637 Corporate Finance (4 Credits)
Presents key concepts in corporate finance as well as tools used in making corporate financial decisions. Topics include valuation of corporate securities, capital investment decision making, capital market theory, operation and efficiency of financial markets, corporate financing decisions, and risk management.
Restriction: Must be in Executive MBA program.

EMBA640 Financial Management (3 Credits)
Analysis of major corporate financial decisions using a market-oriented framework. Topics include capital budgeting, security portfolio theory, operation and efficiency of financial markets, options pricing, financing decisions, capital structure, payout policy and international finance.
Restriction: Must be in Executive MBA program.

EMBA647 Economics and Public Policy (4 Credits)
Introduction to the economic concepts essential to business decision-making. Concepts covered include supply, demand, cost pricing, competition, monopoly, non-competitive markets, game theory, vertical integration, regulation, national income accounting, fiscal policy, monetary policy, balance of payments accounting, exchange rates and international economics. Primary attention is given to cases.
Restriction: Must be in Executive MBA program.

EMBA650 Marketing Management (2 Credits)
Analysis of marketing problems and evaluation of specific marketing efforts regarding the organization's products and services, pricing activities, channel selection, and promotion strategies in both domestic and international markets.
Restriction: Must be in Executive MBA program.

EMBA654 Organizational Change (1-3 Credits)
This course is designed to assist you in developing the skills necessary to successfully manage change in a turbulent environment. As part of the course design, an overview of organizational change management strategies aimed at improving the organization's ability to cope with change will be covered. In addition, the course provides students with the models for understanding the dynamics of organizational change. Change management skills are among the most important skills that any professional can possess.
Restriction: Must be in Executive MBA program.

EMBA656 Leadership and Human Capital (3 Credits)
The overall objective of this course is to sensitize participants to the fact that managers face many dilemmas (such as the need to maintain control, yet be flexible enough to effectively change as the competitive environment requires); and therefore, managers need to have skills that will enable them to effectively manage and lead, and thus to become leader-managers. How managing versus leading-skills differ will be emphasized in this course. To raise participants' sensitivity to managerial dilemmas and the skills needed to effectively manage these, there will be extensive use of case discussions and video-clips about challenges faced by companies and their managers, and extensive opportunities for self-reflective and experiential exercises. The development of action-plans for implementing a desirable change in participants' current job-situation will also help participants to hone the skills needed to be effective change-agents, hence leaders, in their organization.
Restriction: Must be in Executive MBA program.

EMBA662 Leadership and Teamwork (2 Credits)
Course examines concepts of team-building and leadership which are critical to managerial success. Topics include leadership, decision-making, communication and conflict, work motivation, building effective teams, and organizational change and culture.
Restriction: Must be in Executive MBA program.

EMBA663 Managing Human Capital (2 Credits)
Course examines core human resource management principles and emphasizes skills for maximizing an organization's human capital. Topics include recruitment, selection, performance feedback and incentives, termination of poor performers, and managing organizational change through human resource systems and policies.
Restriction: Must be in Executive MBA program.

EMBA664 IT Transformation of Organizations, Industries and Markets (2 Credits)
Information technology enables the transformation of organizations, industries and markets. The purpose of this course is to understand the forces within organizations and industries that combine with the technology to create these transformations. The course focuses on general models of transformation as well as case studies of specific organizations and industries. Teams of students will select an industry and prepare a report on how technology is now or will transform it, and examine the implications for how businesses will function in the future.
Restriction: Must be in Executive MBA program.

EMBA674 Marketing Simulation (2 Credits)
This is a capstone marketing course that is taught primarily through the simulation MARKSTRAT. As we go through the simulation we will discuss marketing strategies designed to manage products in selected market segments. Topics covered include competitor analysis, buyer analysis, market segments, and product strengths and weaknesses; product related issues are identified and marketing strategies developed, assessed and implemented. The material is then complemented with the MARKSTRAT simulation. The prerequisite for this course is Marketing Management or Marketing Strategy.
Prerequisite: Must have completed Marketing Management or Marketing Strategy coursework.
Restriction: Must be in Executive MBA program.

EMBA678 Ethical Leadership (1-3 Credits)
This course will explore the following topics; Recognize the scope of managerial agency and the economic, legal and ethical responsibilities to various stakeholders, Conduct elementary ethical analyses of managerial situations using the principal schools of ethical reasoning, Identify the economic and ethical properties of a market mechanism, and the means for addressing the limitations of a market, and Recognize ethical leadership as the exercise of managerial agency in changing existing values and practices.
Restriction: Must be in Executive MBA program.
Repeatable to: 3 credits if content differs.

EMBA681 Managerial Economics and Public Policy (2 Credits)
Basic microeconomic principles used by firms, including supply and demand, elasticities, costs, productivity, pricing, marketing structure and competitive implications of alternative market structures. Market failures and government intervention. Public policy processes affecting business operations.
Restriction: Must be in Executive MBA program.

EMBA683 The Global Economic Environment (2 Credits)
Relationship between national and international economic environments. Determinants of output, interest rates, prices and exchange rates. Analysis of effect of economic policies (fiscal, monetary, trade, tax) on the firm and the economy.
Restriction: Must be in Executive MBA program.

EMBA688 Strategic Management (1 Credit)
This course aims to give you the tools, frameworks, and ideas necessary to develop business units and corporate strategies for your oraganizations that fit, both in the short run and long run. As noted above, this requires that we appreciate how best to analyze and identify profit opportunities and threats in different industies and competitive environments; how best to analyze and identify your organization's valuable assets, resources and capabilities and how they might be protected, leveraged, and extended inthe market; how to organize your firm to be best prepared to adapt its strategy over time as the market environment changes; how to use organic growth as well as mergers, acquisitions, joint ventures, alliances, and divestitures to ensure that your organization around its strategy to maximize the probability of successful strategy implementation.
Restriction: Must be in Executive MBA program.
Repeatable to: 3 credits if content differs.

EMBA690 Strategic Management (2 Credits)
Integrative strategic management focusing on strategy formulation and implementation in domestic and global settings. Industry and competitor analysis, industry and firm value chain, leadership, goal setting, organizational structure and culture. Case study approach to top management and organizational problems.
Restriction: Must be in Executive MBA program.

EMBA693 Supply Chain (2 Credits)
The age of the real-time supply chain has finally arrived. Companies can now connect instantaneously with suppliers, distributors, manufacturers, customers, and alliance partners around the world. On-line access to up-to-the minute information enables companies to improve communication and project management across the entire supply chain, promote collaboration across departments, and enhance customer service and financial operations. The results are stunning; for example, a recent survey reports dramatic increases in revenues and customer retention and decreases in operating costs and product cycle times. As competition heats up from every direction, the ability to design and manage your supply chain with precision and speed becomes a business imperative. This course offers a practical blueprint for building, implementing, and sustaining supply chains in today's rapidly changing environment.
Restriction: Must be in Executive MBA program.

EMBA694 Operations Management (2 Credits)
A firm has the opportunity to create competitive advantage through proficient management of its operations. To do so, the firm must first recognize and establish the strategic role of its operations within the organization. Then, at the more detailed operational level, the firm must execute effectively and efficiently. This course examines the strategic role that the operations function can play, and offers specific tools and techniques that the firm can use for strategy execution. We cover concepts of operations managment applied to both manufacturing and services, including operations strategy, analysis of process flows and bottlenecks, waiting line models, total quality management, six sigma, and revenue management.
Restriction: Must be in Executive MBA program.

EMBA711 Financial Planning and Control Systems (2 Credits)
The role accounting plays in planning and controlling issues within organizations. It takes a high-level view of planning and control and will encourage you to take a very broad view of the topic.
Restriction: Must be in Executive MBA program.

EMBA724 International Financial Management (3 Credits)
The role of financial management in the multinational firm. The financing and managing of foreign investments, assets, currencies, imports and exports. National and international financial institutions and markets.
Prerequisite: EMBA640.
Restriction: Must be in Executive MBA program.

EMBA757 Marketing Strategy (3 Credits)
A capstone marketing course. Marketing strategies designed to manage products in selected market segments. Topics covered include competitor analysis, buyer analysis, market segments, and product strengths and weaknesses; product related issues are identified and marketing strategies developed, assessed and implemented.
Restriction: Must be in Executive MBA program.

EMBA758 Special Topics (2-3 Credits)
Selected advanced topics in the various fields of graduate study in business.
Restriction: Must be in Executive MBA program.
Repeatable to: 12 credits if content differs.

EMBA759 Independent Study (1-6 Credits)
Independent study for Masters students in Business.
Restriction: Must be in Executive MBA program.
Repeatable to: 12 credits if content differs.

EMBA778 Special Topics (2-3 Credits)
Selected advanced topics in the various fields of graduate study in business.

EMBA788 Executive Skills Mastery (1-2 Credits)
This course is designed to focus on the development of the specific set of skills that executives need to successfully perform in today's organizational environment. Students complete assessments which help to target their specific skill level and in the aggregate give instructors clear ideas on the needs of the cohort. The assessments also augment executive coaching, when provided. This is typically registered as a one credit course except when a particular program's cirriculum allocates enough contact hours to all course topics to be covered at a more advanced level.
Repeatable to: 12 credits if content differs.
Formerly: BMGT788A.

EMBA789 Leadership Mastery (1-2 Credits)
This course addresses organizational challenges from the CEO or C-level perspective. At this level, the ability to engage ambiguity and chaos effectively is essential. Creating strategy while using a systems approach and understanding how each functional area interacts with the other (with both the short-term and long-term in mind) are of very high importance. The course covers topics that consume the days of senior level leaders in organizations. This is typically registered as a one credit course except when a particular program's cirriculum allocates enough contact hours to all course topics to be covered at a more advanced level.
Repeatable to: 12 credits if content differs.
Formerly: BMGT788B.

EMBA798 Action Learning Project (1-2 Credits)
This course is designed to give the student the opportunity to work on a real-time, salient business challenge or issue for the sponsoring organization. This is often the student's employer. Students are encouraged to design projects which extend beyond a single functional area and require them to examine the interaction of multiple functional areas from a systems perspective. Students work in teams for the projects. This allows them to learn from one another, as well as to learn how to work more effectively in teams - especially in a largely virtual environment. This is typically a two credit course when projects are initiated and completed entirely within a single term. It may be a one credit course when projects extend over more than one term.
Repeatable to: 9 credits if content differs.

ENAE - Engineering, Aerospace

ENAE403 Aircraft Flight Dynamics (3 Credits)
Study of motion of aircraft, equations of motion, aerodynamic force representation, longitudinal and lateral motions, response to controls and to atmospheric disturbances, handling qualities criteria and other figures of merit.
Prerequisite: ENAE414 and ENAE432.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE404 Space Flight Dynamics (3 Credits)
Three-dimensional motion under central fields. Solutions to orbital motion, orbital elements, time elements. Kepler's laws. Orbital maneuvering, rendezvous and station-keeping. Rigid-body attitude dynamics, spacecraft attitude dynamics.
Prerequisite: ENAE301.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE414 Incompressible Aerodynamics (3 Credits)
Aerodynamics of inviscid incompressible flows. Aerodynamic forces and moments. Fluid statics/buoyancy force. Vorticity, circulation, the stream function and the velocity potential. Bernoulli's and Laplace's equations. Flows in low speed wind tunnels and airspeed measurement. Potential flows involving sources and sinks, doublets, and vortices. Development of the theory of airfoils and wings.
Prerequisite: PHYS271, (MATH240 or MATH461), PHYS270, MATH246, ENAE283, ENES220, ENAE202, MATH241, and ENES232.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department; and junior standing or higher.

ENAE415 Helicopter Theory (3 Credits)
Elementary exposition on the theory and practice of aerodynamics applied to helicopters and other rotary wing aircraft.
Prerequisite: ENAE414.
Restriction: Must be in Engineering: Aerospace program.

ENAE420 Computational Structural Mechanics (3 Credits)
Introductory of finite element methods for aerospace engineering modeling and analysis; equips students with ability to understand manuals of commercial finite element analysis software.
Prerequisite: ENES220 and MATH241; and must have completed a course in linear algebra.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE423 Vibration and Aeroelasticity (3 Credits)
Dynamic response of single and multiple degrees of freedom systems, finite element modeling, wing divergence, aileron reversal, wing and panel flutter.
Prerequisite: ENAE324.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE425 Mechanics of Composite Structures (3 Credits)
Introduction to structures composed of composite materials and their applications in aerospace. In particular, filamentary composite materials are studied. Material types and fabrication techniques, material properties, micromechanics, anisotropic elasticity, introduction to failure concepts.
Prerequisite: MATH246, ENAE324, ENES220, and MATH241.

ENAE432 Control of Aerospace Systems (3 Credits)
An introduction to the feedback control of dynamic systems. Laplace transforms and transfer function techniques; frequency response and Bode diagrams. Stability analysis via root locus and Nyquist techniques. Performance specifications in time and frequency domains, and design of compensation strategies to meet performance goals.
Prerequisite: Minimum grade of C- in ENAE301 and ENAE283.
Restriction: Junior standing or higher; and must be in Engineering: Aerospace program.

ENAE441 Space Navigation and Guidance (3 Credits)
Principles of navigation. Celestial, radio, and inertial navigation schemes. Navigational and guidance requirements for orbital, planetary, and atmospheric entry missions. Fundamentals of communications and information theory. Link budgets, antennas and telemetry systems.
Prerequisite: ENAE404 and ENAE432.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE450 Robotics Programming (3 Credits)
Introduces students to the Robot Operating System (ROS) as well as to many of the available tools commonly used in robotics. Lectures focus on theory and structure, whereas laboratory sections will focus on applications and implementations. Students learn how to create software and simulations, interface to sensors and actuators, and integrate control algorithms. The course works through exercises involving a number of autonomous robots (i.e., ground and air vehicles) that students will eventually use in their subsequent RAS minor courses. Topics include: ROS architecture, console commands, ROS packages, simulation environments, visualizations, autonomous navigation, manipulation, and robot vision.
Prerequisite: ENME480 or ENAE380.
Restriction: Must be in the Robotics and Autonomous Systems (RAS) minor; or permission of department.
Additional Information: Students in the Robotics and Autonomous Systems minor should take ENME480 as a prerequisite; Aerospace Engineering students not in the minor should take ENAE380.

ENAE455 Aircraft Propulsion and Power (3 Credits)
Thermodynamic cycle analysis, aerothermochemistry of fuels and propellants, operating principles of piston, turbojet, fanjet, and other variations of airbreathing aircraft power units.
Prerequisite: ENES232, ENAE414, and ENAE311.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE457 Space Propulsion and Power (3 Credits)
Thermodynamic cycle analysis, aerothermochemistry of fuels and propellants, operating principles of rocket, ion, and other exoatmospheric power units.
Prerequisite: PHYS271, ENES232, PHYS270, and ENAE311.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department. And senior standing.

ENAE464 Aerospace Engineering Laboratory (3 Credits)
Application of fundamental measuring techniques to measurements in aerospace engineering. Includes experiments in aerodynamics, structures, propulsion, flight dynamics and astrodynamics. Correlation of theory with experimental results.
Prerequisite: ENAE324, ENAE362, ENAE311, and ENAE432.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE467 Advanced Space Propulsion and Power (3 Credits)
Charged particle motion, drift mechanisms, plasma sheaths, creation of plasmas. Representative electrothermal, electrostatic, and electromagnetic propulsion technologies. Power production and direct-drive thrust generation using fusion as time permits.
Prerequisite: ENAE457.
Restriction: Permission of Instructor. Jointly offered with: ENAE667.
Credit Only Granted for: ENAE488I, ENAE467, or ENAE667.
Formerly: ENAE488I.

ENAE471 Aircraft Flight Testing (3 Credits)
Provides basic instruction to aircraft flight testing and demonstrates need for systematic, well-proven technique to allow for accurate airplane performance. Concepts of aerodynamics, airplane performance, and stability and control. Emphasis on single-engine general aviation type aircraft.
Prerequisite: ENAE414.
Corequisite: ENAE403.
Restriction: Must be in Engineering: Aerospace program.

ENAE481 Principles of Aircraft Design (3 Credits)
Aircraft design principles blending both synthesis and analysis. The iterative nature of the design process. Applied aerodynamics. Elements of aircraft performance calculation and optimization. Design of aircraft including payload, crew and avionics provisions, propulsion selection and sizing, aerodynamic configuration optimization, mass properties, stability and control characteristics, and vehicle subsystems. Individual student projects in aircraft design.
Prerequisite: ENAE324, ENAE362, and ENAE432.
Corequisite: ENAE414.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE482 Aeronautical Systems Design (3 Credits)
Senior capstone design course in the aeronautics track. Introduction of computerized methods for sizing and performance analysis. More comprehensive methods to predict weight, aerodynamics and propulsion system characteristics. Consideration in design disciplines such as vulnerability, maintainability, produceability, etc. Groups of students will complete, brief and report on a major design study to specific requirements.
Prerequisite: ENAE455, ENAE423, ENAE403, and ENAE481.
Restriction: Must be in Engineering: Aerospace program; and senior standing or higher.

ENAE483 Principles of Space Systems Design (3 Credits)
Principles of space systems analysis and vehicle design. Launch vehicle performance analysis and optimization. Design of vehicle systems including avionics, power, propulsion, life support, human factors, structures, actuator and mechanisms, and thermal control. Design processes and design synthesis. Individual student projects in vehicle design.
Prerequisite: ENAE404, ENAE324, ENAE362, and ENAE432.
Restriction: Must be in Engineering: Aerospace program; or permission of ENGR-Aerospace Engineering department.

ENAE484 Space Systems Design (3 Credits)
Senior capstone design course in the space track. Group preliminary design of a space system, including system and subsystem design, configuration control, costing, risk analysis, and programmatic development. Course also emphasizes written and oral engineering communications.
Prerequisite: ENAE423, ENAE483, ENAE441, and ENAE457.
Restriction: Must be in Engineering: Aerospace program.

ENAE488 Topics in Aerospace Engineering (1-4 Credits)
Technical elective taken with the permission of the student's advisor and instructor. Lecture and conference courses designed to extend the student's understanding of aerospace engineering. Current topics are emphasized.
Prerequisite: Permission of student's advisor required.
Restriction: Permission of instructor.

ENAE499 Elective Research (3 Credits)
Undergraduate research project and paper conducted under the direction of an aerospace engineering faculty member to be presented at a conference or competition.
Prerequisite: Permission from student's advisor required.
Restriction: Senior standing or higher; and must be in Engineering: Aerospace program; and permission of instructor; and permission of ENGR-Aerospace Engineering department.
Repeatable to: 6 credits if content differs.

ENAE601 Astrodynamics (3 Credits)
Mathematics and applications of orbit theory, building upon the foundations developed in ENAE 404 and ENAE 441. Topics include two body orbits, solutions of Kepler's equation, the two-point boundary value problem, rendezvous techniques, and Encke's method.
Prerequisite: ENAE404; or permission of ENGR-Aerospace Engineering department.

ENAE602 Spacecraft Attitude Dynamics and Control (3 Credits)
Rigid body rotational dynamics of spacecraft; forced and unforced motion, torques produced by the orbital environment; orbit/attitude coupling; gas jet, momentum wheel, and magnetic torque actuators. Elementary feedback attitude regulators and algorithms for linear and nonlinear attitude tracking.
Prerequisite: ENAE404 and ENAE432.

ENAE603 Near-Earth Object Exploration (3 Credits)
An overview of the near-Earth objects (NEOs) of our solar system--the asteroids and comets whose orbits closely approach Earth's orbit--and what we know about them, what we're learning about them, and how to design spacecraft missions to interact with them.
Prerequisite: ENAE601.
Restriction: Must be in one of the following programs (ENGR: MS/PhD-Aerospace Engineering (Master's); ENGR: MS/PhD-Aerospace Engineering (Doctoral)).
Credit Only Granted for: ENAE788N or ENAE603.
Formerly: ENAE788N.

ENAE631 Helicopter Aerodynamics I (3 Credits)
A history of rotary-wing aircraft, introduction to hovering theory, hovering and axial flight performance, factors affecting hovering and vertical flight performance, autorotation in vertical descent, concepts of blade motion and control, aerodynamics of forward flight, forward flight performance, operational envelope, and introduction to rotor acoustics.
Prerequisite: ENAE414 and ENAE311. Or permission of ENGR-Aerospace Engineering department; and permission of instructor.

ENAE632 Helicopter Aerodynamics II (3 Credits)
Basic aerodynamic design issues associated with main rotors and tail rotors, discussion of detailed aerodynamic characteristics of rotor airfoils, modeling of rotor airfoil characteristics, review of classical methods of modeling unsteady aerodynamics, the problem of dynamic stall, review of methods of rotor analysis, physical description and modeling of rotor vortical wakes, discussion of aerodynamic interactional phenomena on rotorcraft, advanced rotor tip design, physics and modeling of rotor acoustics.
Prerequisite: ENAE631; and (ENAE414 and ENAE311; or students who have taken courses with comparable content may contact the department). Or permission of ENGR-Aerospace Engineering department.

ENAE633 Helicopter Dynamics (3 Credits)
Flap dynamics. Mathematical methods to solve rotor dynamics problems. Flap-lag-torsion dynamics and identify structural and inertial coupling terms. Overview on rotary wing unsteady aerodynamics. Basic theory of blade aeroelastic stability and ground and air resonance stability, vibration analyses and suppression.
Prerequisite: ENAE631. Or permission of ENGR-Aerospace Engineering department; and permission of instructor.

ENAE634 Helicopter Design (3 Credits)
Principles and practice of the preliminary design of helicopters and similar rotary wing aircrafts. Design trend studies, configuration selection and sizing methods, performance and handling qualities analyses, structural concepts, vibration reduction and noise. Required independent design project conforming to a standard helicopter request for proposal (RFP).
Prerequisite: ENAE631. Or permission of ENGR-Aerospace Engineering department; and permission of instructor.

ENAE635 Helicopter Stability and Control (3 Credits)
Advanced dynamics as required to model rotorcraft for flight dynamic studies. Development of helicopter simulation models and specifications of handling qualities. Methods for calculation of trim, poles, frequency response, and free flight response to pilot inputs.
Prerequisite: ENAE631.
Restriction: Permission of ENGR-Aerospace Engineering department.

ENAE636 Helicopter Dynamics II (3 Credits)
Aerodynamics, dynamics and aeromechanics of helicopters and tilt rotor aircraft. Experimental testing and mathematical modeling required for the design and analysis of such aircraft.
Credit Only Granted for: ENAE788R or ENAE636.
Formerly: ENAE788R.

ENAE641 Linear System Dynamics (3 Credits)
Linear systems; state space, multi-input, multi-output models; eigenstructure; controllability, observability, singular value analysis; multivariable Nyquist condition; observer design; introduction to Kalman filtering. Full state feedback techniques including pole placement and LQR/LQG techniques; introduction to loop shaping and robustness.
Prerequisite: ENAE432.

ENAE642 Atmospheric Flight Control (3 Credits)
Exposure to flight guidance and control. Draws heavily from vehicle dynamics as well as feedback theory, and careful treatment of the non-linear aspects of the problem is critical. Conventional sythesis techniques are stressed, although modern methods are not ignored. Multivariable system analysis is included, along with flight-control design objectives and hardware limitations. Emphasis on aircraft and missiles.
Prerequisite: ENAE403 and ENAE432; or students who have taken courses with comparable content may contact the department.

ENAE646 Advanced Dynamics of Aerospace Systems (3 Credits)
Introduces the principles and methods for formulating and analyzing mathematical models of aerospace systems using Newtonian, Lagrangian, and Hamiltonian formulations of particle and rigid body dynamics. Additional topics include applied dynamical systems, geometric mechanics, and symmetry and reduction.
Prerequisite: ENAE301.
Credit Only Granted for: ENAE788G or ENAE646.
Formerly: ENAE788G.

ENAE647 Flexible Multi-body Dynamics (3 Credits)
Review of particle dynamics, rigid body kinematics, analytical dynamics, constraint equations in multibody dynamics, methods for enforcing kinematic constraint, formulation of flexible bodies in multibody dynamics, finite element modeling, and numerical integration methods.
Prerequisite: ENAE646.
Restriction: Must be in one of the following programs (ENGR: MS/PhD-Aerospace Engineering (Doctoral); ENGR: MS/PhD-Aerospace Engineering (Master's)).
Credit Only Granted for: ENAE788Q or ENAE647.
Formerly: ENAE788Q.

ENAE651 Smart Structures (3 Credits)
Topics related to the analysis, design, and implementation of smart structures and systems: modeling of beams and plates with induced strain actuation; shape memory alloys; electro-rheological fluids; magnetostrictor and electrostricter actuators and fiber optic sensors.

ENAE652 Computational Structural Mechanics (3 Credits)
Fundamentals of structural mechanics and computational modeling. Finite element modeling of two- and three-dimensional solids, plates and shells. Geometrically nonlinear behavior. Structural stability such as buckling and postbuckling.
Restriction: Permission of instructor; and permission of ENGR-Aerospace Engineering department.
Credit Only Granted for: ENME 674, ENAE652, ENPM652 or ENPM808F.

ENAE653 Nonlinear Finite Element Analysis of Continua (3 Credits)
Finite element formulation of nonlinear and time dependent processes. Introduction to tensors, nonlinear elasticity, plasticity and creep. Application to nonlinear solids including aerospace structures, such as shells undergoing finite rotations.
Prerequisite: ENAE652; or students who have taken courses with comparable content may contact the department.

ENAE654 Mechanics of Composite Structures (3 Credits)
An introduction to structures composed of composite materials and their applications in aerospace. In particular, filamentary composite materials are studied. Material types and fabrication techniques, material properties, micromechanics, anisotropic elasticity, introduction to failure concepts.

ENAE655 Structural Dynamics (3 Credits)
Advanced principles of dynamics necessary for structural analysis; solutions of eigenvalue problems for discrete and continuous elastic systems, solutions to forced response boundary value problems by direct, modal, and transform methods.

ENAE656 Aeroelasticity (3 Credits)
Topics in aeroelasticity: wing divergence; aileron reversal; flexibility effects on aircraft stability derivatives; wing, empennage and aircraft flutter; panel flutter; aircraft gust response; and aeroservoelasticity of airplanes.
Prerequisite: ENAE655.
Restriction: Permission of ENGR-Aerospace Engineering department.

ENAE663 Introduction to Plasmas for Space Propulsion and Power (3 Credits)
Characteristics of plasmas, motion of charged particles in fields, collisional processes, kinetic theory, fluid desctiption of plasmas, transpot properties, equilibrium vs. non-equilibrium, generation of plasmas.
Recommended: PHYS270 or equivalent.

ENAE665 Advanced Airbreathing Propulsion (3 Credits)
Advanced treatment of airbreathing propulsion technologies, propulsion system analysis, and engine/airframe integration. Topics will vary, but may include novel engine cycles, advanced gas turbine systems, pulsed systems, and high-speed engines, including scramjets and combined cycle systems.
Prerequisite: ENAE455; or students who have taken courses with comparable content may contact the department.
Restriction: Permission of instructor.

ENAE667 Advanced Space Propulsion and Power (3 Credits)
Charged particle motion, drift mechanisms, plasma sheaths, creation of plasmas. Representative electrothermal, electrostatic, and electromagnetic propulsion technologies. Power production and direct-drive thrust generation using fusion as time permits.
Prerequisite: ENAE457 or equivalent.
Restriction: Permission of instructor. Jointly offered with: ENAE467.
Credit Only Granted for: ENAE488I, ENAE467, or ENAE667.

ENAE673 Aerodynamics of Incompressible Fluids (3 Credits)
Introduces the fundamental concepts of incompressible flows. Topics to be addressed include the conservation equations, potential flow, lift and drag, Navier-Stokes equations, boundary layers and similarity solutions, and solutions to classical problems.
Prerequisite: Undergraduate courses in differential equations, incompressible, and compressible flow (ENAE311; and one course from ENAE414; ENME331, OR ENME640, or equivalent).
Restriction: Must be in ENGR: MS/PhD-Aerospace Engineering (Master's) program.

ENAE674 Aerodynamics of Compressible Fluids (3 Credits)
One-dimensional flow of a perfect compressible fluid. Shock waves. Two-dimensional linearized theory of compressible flow. Two-dimensional transonic and hypersonic flows. Exact solutions of two-dimensional isotropic flow. Linearized theory of three-dimensional potential flow. Exact solution of axially symmetrical potential flow. One-dimensional flow with friction and heat addition.
Restriction: Permission of ENGR-Aerospace Engineering department.

ENAE675 Unsteady Aerodynamics (3 Credits)
Classical theories of incompressible unsteady aerodynamics with an introduction to modeling techniques. Topics include: unsteady Bernoulli's equation, added mass, the indicial response method, dynamic stall, and modern applications.
Prerequisite: ENAE414; and permission of instructor.
Credit Only Granted for: ENAE672 or ENAE675.
Formerly: ENAE672.

ENAE676 Turbulence (3 Credits)
Physical and statistical descriptions of turbulence; review of phenomenological theories for turbulent flows; scales of motion; correlations and spectra; homogeneous turbulent flows; inhomogeneous shear flows; turbulent flows in pipes and channels; turbulent boundary layers; theory of methods for turbulent flows (Reynolds stress equations, LES, DES, DNS); experimental methods for turbulence measurements.
Prerequisite: ENAE673.
Recommended: ENAE674.

ENAE681 Engineering Optimization (3 Credits)
Methods for unconstrained and constrained minimization of functions of several variables. Sensitivity analysis for systems of algebraic equations, eigenvalue problems, and systems of ordinary differential equations. Methods for transformation of an optimization problem into a sequence of approximate problems. Optimum design sensitivity analysis.

ENAE682 Hypersonic Aerodynamics (3 Credits)
Hypersonic shock and expansion waves, Newtonian theory, Mach methods, numerical solutions to hypersonic inviscid flows, hypersonic boundary layer theory, viscous interactions, numerical solutions to hypersonic viscous flows. Applications to hypersonic vehicles.
Restriction: Permission of ENGR-Aerospace Engineering department.

ENAE683 High Temperature Gas Dynamics (3 Credits)
Aspects of physical chemistry and statistical thermodynamics necessary for the analysis of high temperature flows, equilibrium and nonequilibrium chemically reacting flows, shock waves, nozzle flows, viscous chemically reacting flow, blunt body flows, chemically reacting boundary layers, elements of radiative gas dynamics and applications to hypersonic vehicles.
Restriction: Permission of ENGR-Aerospace Engineering department.

ENAE684 Computational Fluid Dynamics I (3 Credits)
Partial differential equations applied to flow modelling, fundamental numerical techniques for the solution of these equations, elliptic, parabolic, and hyperbolic equations, elements of finite difference solutions, explicit and implicit techniques. Applications to fundamental flow problems.
Restriction: Permission of ENGR-Aerospace Engineering department.

ENAE685 Computational Fluid Dynamics II (3 Credits)
Continuation of ENAE 684. Basic algorithms for the numerical solution of two and three dimensional inviscid and viscous flows. Applications to internal and external flow problems.
Prerequisite: ENAE684.
Restriction: Permission of ENGR-Aerospace Engineering department.

ENAE688 Seminar (1-3 Credits)

ENAE691 Satellite Design (3 Credits)
Systems design of Earth-orbiting satellites, including geostationary communications satellites and low Earth orbit constellations. Basics of orbital motion, communications, and instrument design. Spacecraft systems, structural design, thermal design, power generation, and attitude determination and control. Launch vehicle interfacing and mission operations.
Prerequisite: ENAE483.

ENAE692 Introduction to Space Robotics (3 Credits)
Introduction to the kinematics, dynamics, and control of robot manipulators. DH parameters, serial and parallel manipulators, kinematic redundancy, sensors, actuators, and mechanism design. Control concepts introduced ranging from independent joint control to impedance control. Examples drawn from space robotics, wearable robotics, and other areas.
Prerequisite: ENAE301 or ENES221.
Recommended: ENAE432.

ENAE694 Spacecraft Communications (3 Credits)
Brief overview of satellite orbits. Radio frequency communications, noise, and bandwidth limitations. Link budget analysis. Modulation and multiplexing approaches, multiple access systems. Satellite transponder and Earth station technology.

ENAE696 Spacecraft Thermal Design (3 Credits)
Thermal sources in space. Black-body radiation; absorptivity and emissivity; radiative thermal equilibrium. Mutually radiating plates, view angles, and interior conduction. Techniques of spacecraft thermal analysis; approaches to passive and active thermal control.

ENAE697 Space Human Factors and Life Support (3 Credits)
Engineering requirements supporting humans in space. Life support design: radiation effects and mitigation strategies; requirements for atmosphere; water, food, and temperature control. Accommodations for human productivity in space: physical and psychological requirements; work station design; and safety implication of system architectures. Design and operations for extra-vehicular activity.

ENAE741 Interplanetary Navigation and Guidance (3 Credits)
Interplanetary trajectory construction; patched and multiconic techniques. Methods of orbit and attitude determination; applied Kalman filtering. Guidance algorithms and B-plane targeting. Interplanetary navigation utilizing in situ and radio techniques.
Prerequisite: ENAE601 and ENAE432.

ENAE742 Robust Multivariable Control (3 Credits)
Limitations on achievable performance in multivariable feedback systems due to uncertainty. Singular values, matrix norms, multivariable Nyquist stability theory, uncertainty modeling in aerospace systems. Loop-shaping, generalization of Bode design principles. Characterizing the uncertainty, robustness and performance analysis, and synthesis, primarily in the frequency domain. Current research directions. Aerospace examples are used to complement the theory.
Prerequisite: ENAE641.

ENAE743 Applied Nonlinear Control of Aerospace Systems (3 Credits)
Mathematics and methods of nonlinear systems analysis and nonlinear control design, including nonlinear models and phenomena, Lyapunov stability, input-output stability, passivity and frequency domain analysis, nonlinear controllability and observability, feedback linearization, sliding mode control, and integrator backstepping.
Prerequisite: ENAE641.

ENAE757 Advanced Structural Dynamics (3 Credits)
Demonstrate the practical application of Smart Materials and Spatially Distributed Transducers to the design and control of advanced structures. The course will be focused toward the active control of continuum structures using advance Spatially Distributed Parameter System control techniques and concepts. Effective system parameterizations will be used to reduce distributed parameter system models to classical canonical state space form for the purpose of robust adaptive structure design. Application case studies, including morphing structures will be employed as necessary to enhance the students intuition and understanding of Distributed Parameter Systems.
Prerequisite: ENAE655; or students who have taken courses with comparable content may contact the department.

ENAE788 Selected Topics in Aerospace Engineering (1-3 Credits)

ENAE791 Launch and Entry Vehicle Design (3 Credits)
Design of aerospace vehicles for atmospheric transit to and from space. Generic formulation of atmospheric flight dynamics. Ballistic and lifting entry trajectories. Estimation of vehicle aerodynamic properties and aerothermodynamic heating. Entry thermal protection design. Trajectory analysis of sounding rockets and orbital launch vehicles. Serial, parallel, and hybrid multistaging schemes, optimal multistaging. Constrained trajectory optimization. Launch vehicle economic and reliability analysis, flight termination systems, sensors and actuators.
Prerequisite: ENAE601.

ENAE799 Master's Thesis Research (1-6 Credits)

ENAE898 Pre-Candidacy Research (1-8 Credits)

ENAE899 Doctoral Dissertation Research (1-8 Credits)

ENCE - Engineering, Civil

ENCE402 Simulation and Design of Experiments for Engineers (3 Credits)
Review of statistics and hypothesis testing, sample design and design of experiments, generation of discrete and continuous distributions and their applications. Introduction of simulation languages and simulation of discrete and continuous engineering systems. Output analysis, model validation and sensitivity and reliability analysis.
Prerequisite: ENCE302; and permission of ENGR-Civil & Environmental Engineering department.

ENCE411 Environmental Engineering Science (3 Credits)
Introduces the analytical techniques available to assess performance of engineering processes as they relate to water, soil, and air treatment and quality. The basic principles of environmental management, economics of waste treatment, by-product reutilization, and energy cycles are introduced and discussed. Alternative technologies are introduced and evaluated mostly by assessing their potential to reduce waste, minimize energy use, and promote sustainability. Students' activities include, a weekly lab to provide hands-on experience with environmental quality measurements and treatment techniques; on-site visits to regional industries that undertake sustainable practices; and a final research project where experimental design and laboratory techniques are used to assess interactions between technologies and natural systems and their potential for reducing environmental impacts.
Prerequisite: ENCE310; and permission of ENGR-Civil & Environmental Engineering department.

ENCE412 Environmental Engineering Unit Operations (3 Credits)
Examination of unit operations and processes encountered in environmental engineering field. Fundamental principles learned from previous classes will be applied into the design and operation of unit operations and processes, particularly in the area of water and wastewater treatment. Similar processes will be applied to air pollution control, solid waste disposal and hazardous waste treatment.
Prerequisite: ENCE305 and ENCE310; and permission of ENGR-Civil & Environmental Engineering department.

ENCE420 Selection and Utilization of Construction Equipment (3 Credits)
Learn to evaluate and select construction equipment with a focus on mechanized equipment for earthwork and building construction.Learn about the parties involved in procurement, operation and maintenance, and how to cost-effectively plan, select, and utilize equipment for earthmoving, paving, formwork, trenching, rock excavation, tunneling, site preparation, and steel and concrete construction. Explore trends in equipment design, construction automation, and robotics.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management minor.

ENCE421 Legal Aspects of Architectural and Engineering Practice (3 Credits)
Learn the basic structure of the US legal system and court procedures and legal principles relevant to architectural and engineering design and construction contracts including principles of ethical, legal and professional conduct of engineers and architects.Topics include: contracts for design and construction, sales and warranties, torts and product liability, business agency and government agencies, professional liability of architects and engineers, labor laws, expert testimony, mediation and arbitration, tangible property including real estate, intellectual property including trademarks, patents and copyrights, insurance and sureties.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management minor; or must be in the Project Management Minor. And permission of ENGR-Civil & Environmental Engineering department.

ENCE422 Project Cost Accounting and Economics (3 Credits)
Learn: the fundamentals of accounting; project cost accounting principles as they apply to project management; project cost accounting; and the fundamentals of engineering economics.Topics include: project feasibility analysis; reading and analyzing financial statements; cash management; cash flow analysis; depreciation and taxes; and impact on profitability; the principles of activity based costing; net present value analysis; the framework for project performance measurement, cost performance indices, and earned value analysis.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management Minor; or must be in the Project Management Minor.

ENCE423 Project Planning, Estimating & Scheduling (3 Credits)
Learn the fundamentals of project planning, estimating, and scheduling. Understand the concepts of planning; to reduce uncertainty, improve efficiency of the operation, to set and meet objectives, and to provide a basis for monitoring and controlling the work. Be introduced to: the concepts of resource definition, assignment and management, and; the basics of project estimating (pricing) methods including global pricing strategies, types of estimates, pricing processes, overhead and profit, and project financing.Learn the basics of project scheduling including; bar charts, network-based methodologies, and linear scheduling techniques. Emphasis is placed on Critical Path Method (CPM) scheduling, a network based methodology. Be exposed to the use of scheduling software and will actually develop a CPM schedule for an actual construction project as part of a semester project.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management Minor; or must be in the Project Management Minor. And permission of ENGR-Civil & Environmental Engineering department.

ENCE424 Communication for Project Managers (3 Credits)
Learn the fundamentals of communications for project managers. Emphasis is on interpersonal and group communications; through voice, electronic, and written messages; project cycle and reports and presentations during this cycle; and communications for employment.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management minor; or must be in the Project Management minor. Jointly offered with: ENCE614.
Credit Only Granted for: ENCE424 or ENCE614.

ENCE426 Construction Documentation and BIM Applications in Engineering and Construction (3 Credits)
Learn the basics of construction documentation methods, with particular emphasis on Building Information Modeling (BIM). Topics include: the fundamentals of assembly, coordination, and maintenance of construction documents and implementation of BIM techniques in the design and construction processes, and; a review of Autodesk, Revit, and Navisworks and other leading BIM software. Lectures from project management faculty supplemented by guest lecturers from the construction industry.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering; or must be in the Construction Project Management Minor; or must be in the Project Management Minor.

ENCE431 Hydrologic Engineering (3 Credits)
An introduction to basic principles of hydrologic science including the hydrologic cycle, rainfall, surface runoff and streamflow. Special emphasis is placed on hydrologic engineering design of stormwater management and flood control facilities. Design projects are used to illustrate design practices.
Prerequisite: ENCE305; and permission of ENGR-Civil & Environmental Engineering department.

ENCE432 Ground Water Hydrology (3 Credits)
Concepts related to the development of the ground water resources, hydrology, hydrodynamics of flow through porous media, hydraulics of wells and basin-wide ground water development. Fundamentals of ground water pollution are introduced.
Prerequisite: ENCE305; and permission of ENGR-Civil & Environmental Engineering department.

ENCE441 Foundation Design (3 Credits)
Critical review of classical lateral earth pressure theories, analysis of retaining walls and reinforced earth walls, subsurface explorations, bearing capacity and settlement of shallow foundations, design of deep foundations that includes both pile foundations and drilled shafts.
Prerequisite: ENCE340; and permission of ENGR-Civil & Environmental Engineering department.

ENCE444 Experimental Methods in Geotechnical Structural Engineering (3 Credits)
In the geotechnical engineering part of the course, major soils testing and their interpretation including classification, compaction, strength, and compressibility will be undertaken. The structural engineering part of this course covers test planning, loading apparatus, instrumentation, data acquisition and data analysis, as well as basic aspects of structural testing techniques and shake-table test.
Prerequisite: ENCE353 and ENCE340; and permission of ENGR-Civil & Environmental Engineering department.

ENCE447 Pavement Engineering (3 Credits)
Fundamental principles underlying the design, construction, maintenance and repair, and management of highway and airfield pavement systems. Pavement performance (functional/structural; evaluation); pavement mechanics (multi-layered elastic theory; slab theory); pavement materials (properties and characterization); environmental effects; current rigid and flexible design methods (new/rehabilitation); construction (new construction; maintenance/repair; rehabilitation); economic evaluation; pavement management.
Prerequisite: ENCE340; and permission of ENGR-Civil & Environmental Engineering department.

ENCE453 Computer-Aided Structural Analysis (3 Credits)
Computer-aided analysis of structural systems. Unified matrix formulation of stiffness and flexibility methods. Slope deflection method. Evaluation of truss, frame, and grid systems. Non-prismatic and curved elements. Error analysis and determination of ill-conditions. Introduction to finite element methods; formulation of simple two-dimensional elements. In laboratory, use and development of CAD software.
Prerequisite: ENCE353; and permission of ENGR-Civil & Environmental Engineering department.

ENCE454 Design of Concrete Structures (3 Credits)
Combined bending and compression, development and anchorage of reinforcement, deflections, design of slabs including one-way and two-way, design of footings, retaining walls, introduction to prestressed concrete, design of multi-story buildings.
Prerequisite: ENCE353; and permission of ENGR-Civil & Environmental Engineering department.
Formerly: ENCE451.

ENCE455 Design of Steel Structures (3 Credits)
Behavior and design of members subjected to fatigue, and combined bending and compression; plate girders, composite beams, open-web joists and connections. Methods of allowable stress design, and load and resistance factor design. Elements of plastic analysis and design. Framing systems and loads for industrial buildings and bridges.
Prerequisite: ENCE353; and permission of ENGR-Civil & Environmental Engineering department.

ENCE466 Design of Civil Engineering Systems (3 Credits)
A major civil engineering design experience that emphasizes development of student creativity, development and use of design methodologies, evaluation of alternate solutions, feasibility considerations, and detailed system descriptions. Realistic design constraints including economic factors, safety, aesthetics, and reliability will be imposed. Students will work in design project groups and be required to exercise oral and written communication skills.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Senior standing.
Additional Information: Must be taken in the semester in which the student graduates.

ENCE467 Civil and Environmental Engineering Design II (2 Credits)
This experiential course provides structured and unstructured time for groupwork as part of the senior capstone design course sequence. The course builds on skills acquired throughout a student's academic career extending a project defined and scoped in ENCE465. The objective of this course is to provide students with hand's on experience similar to the experience encountered by new engineers working in professional engineering and construction practice. The course offers students an opportunity to develop the leadership and groupwork skills needed to meet professional expectations.
Prerequisite: ENCE465 .
Restriction: Permission of the ENGR-Civil & Environmental Engineering Department.

ENCE470 Highway Engineering (3 Credits)
Highway location and design, highway engineering economics, traffic engineering, traffic measurement devices and technologies. Includes discussion of technological advances in traffic flow and capacity, such as signal systems, corridor control, automatic driver information, incident detection and autonomous vehicle operation.
Prerequisite: ENCE302 and ENCE370; and permission of ENGR-Civil & Environmental Engineering department.

ENCE472 Transportation Engineering (3 Credits)
Transportation engineering concepts including transportation systems analysis, airport systems, airline and airport operations, marine transportation and urban public transportation systems.
Prerequisite: ENCE302 and ENCE370; and permission of ENGR-Civil & Environmental Engineering department.

ENCE488 Senior Thesis (3 Credits)
Advanced study in civil engineering problems with special emphasis on mathematical modeling and experimental methods.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Senior standing.

ENCE489 Special Problems in Civil Engineering (1-4 Credits)
A course arranged to meet the needs of exceptionally well prepared students for study in a particular field of civil engineering.
Prerequisite: Permission of ENGR-Civil & Environmental Engineering department.
Restriction: Senior standing.
Repeatable to: 9 credits if content differs.

ENCE602 Project Procurement Management (3 Credits)
Fundamental concepts and techniques for project acquisition and procurement are presented. Students are introduced to the PMBOK Guide six-step procurement process and expected to develop an in-depth understanding of project evaluation, planning, financing, contracting, negotiation, and procurement execution. It will also cover emerging methods, principles, and practices in infrastructure project procurement, including Public-Private Partnerships, Carbon project procurement, and Clean Development Mechanism.

ENCE603 Bayesian Data Analytics for Engineering (3 Credits)
Introduction to identifying, analyzing, assessing, and managing data inherent to engineering projects. Includes: statistical principles, concepts, and models; decision science aspects of data systems; Bayesian methods; measurement theory; subjective aspects of statistics and data appraisal. Examples are drawn from software development, systems integration, and other large engineering projects. Covers statistical basics, subjective probability, Bayesian data analysis, introduction to decision theory, Monte Carlo simulation, value of information, and risk-based decision making from data.
Recommended: ENCE627.

ENCE604 Sustainabilty Fundamentals for Project Managers (3 Credits)
Addresses the fundamentals of sustainability for project managers including best practices of modern sustainable construction and project management. Commercial and residential buildings consume about 40 percent of the energy used in the United States. The course therefore emphasizes the application of the sustainable development goals to the built environment, including the practical operational aspects of sustainable facility project management and sustainable construction by contractors. The course also will cover the fundamental concepts of sustainable project development and the move towards economic prosperity, environmental protection, and social equity, taking all three dimensions into account to achieve sustainability. Project managers need to take responsibility for more sustainable development of organizations, facilities, and projects.

ENCE605 Evolving as a Project Leader (3 Credits)
Projects are now used by many organizations for the implementation of strategic initiatives. This means that project managers must be able to do more than manage, organize, and control. They must be able to lead the project team and its stakeholders through change. This course explores four themes 1) Leadership theory with an emphasis on servant and situational leadership; 2) Vital leadership skills; 3) Project leadership in traditional and agile projects; and, 4) Developing your leadership skills.

ENCE606 Graduate Introduction to Project Scheduling (3 Credits)
Students are taught the basics of project scheduling and the various scheduling approaches that are currently being used in the design and construction industry. Project planning techniques will be covered and basic scheduling methods will be taught including the use of bar charts. Critical Path Method (CPM), Program Evaluation and Review (PERT) and Linear Scheduling (Line of Balance) methods.

ENCE607 Mastering Agile Project Management (3 Credits)
Learn how and why Agile project management is the fastest growing and most successful project management philosophy today. Learn the mechanics of how to design and facilitate projects using pure Agile Scrum and Lean Kanban techniques; The tradeoffs of using hybrid techniques such as Lean Startup, Scaled Agile for the Enterprise, and Disciplined Agile Development. Then go beyond these frameworks to the science beneath with the essential principles to ensure you get the best benefits of Agile project management methods.

ENCE610 Fundamentals of Structural Analysis (3 Credits)
Cartesian tensor notation. Linear forms of the general equilibrium, compatability, and constitutive equations. The calculus of variations. The principles of virtual work and complementary virtual work. Self-adjoint problem formulations.

ENCE611 Finite Element Methods (3 Credits)
Basic principles and fundamental concepts of the finite element method. Consideration of geometric and material nonlinearities, convergence, mesh gradation and computational procedures in analysis. Applications to plane stress and plane strain, plates and shells, eigenvalue problems, axisymmetric stress analysis, and other problems in civil engineering.
Formerly: ENCE661.

ENCE613 Structural Dynamics (3 Credits)
Analysis of the dynamic response of structrues and structural components subjected to impact load, transient load, and ground excitations; study of single degree-of-freedom and multi degree-of-freedom systems in classical closed form solution and approximate numerical solution; solution in the frequency domain and the use of finite element method.
Formerly: ENCE653.

ENCE620 Risk Analysis in Engineering and Economics (3 Credits)
Covers quantitative risk analysis and management using probability theory and statistics starting with system definition, hazard and scenario identification, likelihood estimation and consequence assessment, and finishes with economic valuation and microeconomics for informing decision making. It covers the topics: uncertainty, risk, knowledge and ignorance related definitions; natural and anthropogenic hazards and fundamental risk methods; system abstraction and associated complexities; analytical and empirical reliability and resilience estimation for components and systems; consequence, severity and loss analysis and accumulation including property and life; economic valuation; risk-cost-benefit tradeoffs and analysis; microeconomics and socioeconomics in risk analysis for informing decisions; risk management, acceptance, tolerance and finance; data needs and sources; expert-opinion elicitation; applications in engineering, sciences and economics.
Prerequisite: ENCE302.
Credit Only Granted for: ENCE489L, ENCE620, ENRE648M, or ENSE698R.

ENCE621 Uncertainty Modeling and Analysis (3 Credits)
Definition of engineering systems, knowledge levels using information science concepts as applied to engineering systems, sources and types of knowledge and ignorance, uncertainty sources and types for engineering systems, probability models, statistical models, fuzziness, fuzzy sets, fuzzy logic, fuzzy arithmetic, imprecise probabilities, evidence methods, uncertainty measures, uncertainty management, uncertainty reduction, applications of these analytical methods to engineering systems and in decision making.
Prerequisite: ENCE302; or students who have taken courses with comparable content may contact the department.

ENCE622 Construction Automation & Robotics (3 Credits)
Covers advanced technologies leading to redesign and partial or full automation of selected construction processes utilizing industrial robotics. Lectures and presentations will cover topics such as basic robotic technology (robot kinematics and dynamics, industrial manipulators, mobility bases, end effectors, sensors, control systems, and robot task programming), design of automated construction processes, selection of means and methods for automated construction processes, robot ergonomics and safety, calculation of costs and benefits of construction robots in selected applications, engineering and economic feasibility of automation and robotics in the construction industry.

ENCE623 Introduction to Advanced Scheduling (3 Credits)
A Combination of lecture and hands-on use of software to develop advanced knowledge and skills necessary to master advanced scheduling techniques for project management and control will be used. No software purchase is necessary.
Prerequisite: ENCE423 or ENCE662.
Credit Only Granted for: ENCE623 or ENCE688S.

ENCE625 Project Administration (3 Credits)
Principles of project administration procedures from the viewpoint of a resident project manager or project engineer on a construction or engineering project. The course specifically addresses the project administration responsibilities of the project manager or project engineer in the engineering, design, or construction industries. Students with a background in the private sector or the government sector will benefit. The course takes a project team approach for improved job efficiency, outlining a project team operation in which the office project administrator delegates to the greatest possible extent all those project administrative functions that can be done more efficiently in the field. The class also addresses the responsibilities and risks that a project administrative manager is likely to encounter. The course is suitable for students, engineering and design professionals, project managers, experienced contract administrators, and owners interested in the special administrative problems of engineering or construction.

ENCE626 Information Technologies for Project Managers (3 Credits)
Introduction to various information technology (IT) and automation-based solutions for project managers in capital project industries, including IT and automation tools for major life-cycle stages of a project: planning, design, fabrication/construction, operation, maintenance, retrofit and demolition/recycling. Both established and experimental approaches and tools will be covered. Building/Product Information Modeling software, sensing devices, field data acquisition and processing for project controls, status reporting, materials and equipment management, environmental monitoring, work-site safety and facility operations and management will be presented and analyzed. Web-based project management software solutions and applications for mobile devices such as tablets and smart phones will be featured in classroom presentations and materials provided to the students. Real project case studies from project-based firms will be used to illustrate the feasibility and usability of the tools presented in class. Students will be expected to acquire hands-on knowledge and experience with selected tools of particular interest in support of their future career paths.
Prerequisite: ENCE662.

ENCE627 Project Risk Management (3 Credits)
Introduction to identifying, analyzing, assessing, and managing risks inherent to engineering projects. Includes: probability modeling, choice and value theory, schedule and cost risk, risk mitigation and transfer, and contract considerations of project risk. Examples are drawn from construction, software development, systems integration, and other large engineering projects; and cover probability basics, subjective probability, statistical data analysis, introduction to decision theory, Monte Carlo simulation, value of information, and risk-based decision making.
Restriction: Must not have completed ENCE627.

ENCE630 Environmental and Water Resource Systems I (3 Credits)
Application of statistical and systems engineering techniques in the analysis of information necessary for the design or characterization of environmental or hydrologic processes; emphasis on the fundamental considerations that control the design of information collection programs, data interpretation, and the evolution of simulation models used to support the decision-making process.

ENCE631 Hydrologic Analysis and Nonpoint Pollution Models (3 Credits)
A detailed analysis of the physical processes controlling the spatial distribution of runoff and constituent transport during rainfall and snowmelt events. Emphasis is on developing an understanding of the processes and translating this understanding into practical models that can be used for runoff simulation, stormwater management, and environmental impact assessment.

ENCE632 Introduction to Infrastructure and Resilience (3 Credits)
Develops system-level skills for the planning, design, maintenance, and operation of resilient infrastructure systems. Through this course, we will discuss a variety of infrastructure systems, both public and private, and their role in communities before and after disasters. The themes of the course will be grounded in the four phases of emergency management (mitigation, preparedness, response, and recovery) and the role that infrastructure plays in each. Through these applications areas, we will study a variety of conceptual, analytical, and computational models that support informed decision-making for these systems under uncertainty.
Prerequisite: ENCE302; and ENCE360. Or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: ENCE688U, ENCE632, ENCE489U or ENCE430.
Formerly: ENCE688U.

ENCE633 Assessment of Natural Hazards for Engineering Applications (3 Credits)
Ensuring the resilience of infrastructure and other engineered systems requires an assessment of the natural hazards to which the systems are exposed. Probabilistic natural hazard assessment evaluates how likely a location is to experience hazard events (e.g., hurricanes or earthquakes) and how likely those events are to cause various impacts (e.g., large surges, intense rainfall, high winds, or ground shaking). This course will review the basic science of natural hazards and provide the foundational concepts of probability and statistics required for developing models to assess the frequency and severity of natural hazards. This course will present methodologies for assessment of multiple types of natural hazards (e.g., seismic, precipitation, riverine, coastal, and wind hazards).
Prerequisite: ENCE302. Jointly offered with: ENCE433.
Credit Only Granted for: ENCE633 or ENCE433.

ENCE635 Geographic Information Systems for Watershed Analysis (3 Credits)
Emphasis is on the use of GIS to support the analysis and modeling tasks associated with watershed planning and management. This course familiarizes the student with fundamentals of GIS data models, projections, and coordinate systems. Students develop a set of GIS-based alogrithms solving common engineering problems in hydrology. Internet data sources and GPS technology are also covered.
Credit Only Granted for: ENCE524 or ENCE688Z.
Formerly: ENCE688Z.

ENCE637 Biological Principles of Environmental Engineering (3 Credits)
An examination of biological principles directly affecting man and his environment, with particular emphasis on microbiological interactions in environmental engineering related to air, water and land systems; microbiology and biochemistry of aerobic and anaerobic treatment processes for aqueous wastes.

ENCE640 Advanced Soil Mechanics (3 Credits)
Introduction to the use of elastic theory in stress and displacement solutions to geotechnical engineering (soil and rock mechanics). The effect of soil moisture (at rest) relative to effective stress principles, capillary and frost. Exact and numeric techniques for the analysis for soil seepage under isotropic and anisotropic conditions. Classical settlement (consolidation) and compressiblility theories, including finite difference solution for vertical and radial drainage.
Prerequisite: ENCE340; or students who have taken courses with comparable content may contact the department.

ENCE641 Advanced Foundations Systems (3 Credits)
Review of soil properties and subsurface exploration, evaluation and design of shallow foundations, including settlement and bearing capacity of spread footings and mats. Discussion of methods of soil improvement. Analysis and design of deep foundations including single pile, pile load testing, pile group actions, and drilled shaft foundations for both vertical and horizontal loads. Load and resistance factor design concepts will be presented.
Prerequisite: ENCE340; or students who have taken courses with comparable content may contact the department.

ENCE644 Advanced Pavement and Civil Engineering Materials (3 Credits)
Advanced course in Highway and Civil Engineering Materials. Dynamic Material Characterization. Elastic, Plastic and Viscoelastic Behavior. Energy Analysis. Physical and Mechanical Properties. NDT. Performance: Creep, Fatigue, Durability, other. Recent developments in Aggregate Evaluation, Portland Cement Concrete, High Performance Concrete, Conventional and Modified Asphalt Binders and Mixtures, Polymers & Composites, Geotextiles, Smart and Self Healing Materials, Recycled and Reclaimed Materials.
Prerequisite: ENCE300.
Credit Only Granted for: ENCE644 or ENCE688P.
Formerly: ENCE688P.

ENCE645 Geotechnics of Waste Disposal (3 Credits)
Fundamental aspects of geotechnical engineering that apply to problems of waste containment and remediation, basic principles of containment systems, compacted clay liners and clay mineralogy, hydraulic conductivity of compacted soils, methods of laboratory and field hydraulic conductivity measurements, design of waste containment systems, landfill stability and settlement, geosynthetic liners, waste compatibility, contaminant transport through liners, leachate collection systems, gas collection systems, covers and caps.
Credit Only Granted for: ENCE489X, ENCE645, or ENCE688X.
Formerly: ENCE688X.

ENCE647 Slope Stability and Seepage (3 Credits)
Theoretical and practical aspects of seepage effects, and groundwater flow, review of shear strength principles, flow through porous media, hydraulic conductivity, flow nets, determination of water pressure, seepage forces and quantity of seepage, laboratory and field tests for shear strength, infinite slopes, block analysis, method of slices, seismic analysis of slopes, effective and total stress analysis, computer program for slope stability analysis, slope stability problems in waste disposal, construction excavations, reinforced embankments, embankments on soft ground.
Prerequisite: ENCE340.
Credit Only Granted for: ENCE489A, ENCE647, or ENCE688A.
Formerly: ENCE688A.

ENCE650 Process Dynamics in Environmental Systems (3 Credits)
The fundamentals of heterogeneous equilibria, rates of environmental reactions, and flow and material transport or presented. Applications of these principles will be presented to small and large scale environmental problems involving liquid, gas, and solid phases. Both natural and engineered environmental systems will be examined.
Formerly: ENCE636.

ENCE651 Chemistry of Natural Waters (3 Credits)
Application of principles from chemical thermodynamics and kinetics to the study and interpretation of the chemical composition of natural waters is rationalized by considering metal ion solubility controls, pH, carbonate equilibria, adsorption reactions, redox reactions and the kinetics of oxygenation reactions which occur in natural water environments.
Credit Only Granted for: ENCE633 or ENCE651.
Formerly: ENCE633.

ENCE652 Microbiological Principles of Environmental Engineering (3 Credits)
An examination of microbiological principles directly affecting humans and the surrounding environment. Special emphasis is given to the understanding of microbial physiology and in environmental engineering related to water and land systems including aerobic and anaerobic treatment processes involved in nutrient/waste recycling as well as impact of xenobiotic compounds on processes water, soil and sediment.
Credit Only Granted for: ENCE637 or ENCE652.
Formerly: ENCE637.

ENCE655 Environmental Behavior of Organic Pollutants (3 Credits)
Introduction to the scientific data needed and methods currently available to assess the environmental risk of organic chemicals. Applications of principles from chemical thermodynamics will be used to study phase-transfer processes of organic pollutants in the environment (solid/water, solid/air, water/air). Physical-chemical properties of organic pollutants will be used to estimate partitioning.
Prerequisite: ENCE651.

ENCE660 Principles of Disaster Management (3 Credits)
Covers the complexities and unique requirements that arise in preparing for, responding to, recovering from and mitigating against natural disasters. It focuses on what the Manager should know to handle pre- and post-disaster projects. The course introduces underlying policies, programs and emergency management protocols related to managing natural disasters. It translates the lexicons of emergency management to align with project management tools and processes. The course also explores the challenges of executing and delivering projects and programs during each phase of the emergency management cycle. The student will learn to build disaster-resilient concepts and emergency management into project management processes and be better equipped to contribute to a more sustainable and disaster-resilience future.

ENCE661 Project Cost Accounting and Finance (3 Credits)
This course reviews the fundamentals of accounting; examines project cost accounting principles, applications, and impact on profitability; examines the principles of activity based costing; covers the elements involved in cash management; introduces the framework for how projects are financed and the potential impact financing has on the projects; and a framework for evaluating PC based systems and what resources are needed for an effective project cost system.

ENCE662 Introduction to Project Management (3 Credits)
Introduction to project management including: overview and concepts of project management (principles, body of knowledge, strategies); planning successful projects (defining, specifying, delivery options, scheduling, budgeting); implementing (organizing the team, work assignments, team building, effective leadership); executing (performance measurement, maintaining the schedule, adjustments/mid-course corrections, record keeping, status reporting, communications, managing conflict, time management); and closeout(performance measurement, maintaining the schedule, adjustments/mid-course corrections, record keeping, status reporting, communications, managing conflict, time management).

ENCE664 Legal Aspects of Engineering Design and Construction (3 Credits)
Examines ways in which the legal system affects the design and construction process. Focuses on contract types and the relationships between the parties in different delivery systems. Covers basics of procurement protocols along with negotiating techniques and strategies. Topics include contract law, the relationships between the parties, tort and negligence law, and the statutory principles affecting construction.

ENCE665 Management of Project Teams (3 Credits)
Experience has shown that really excellent project managers are not only technically competent but that they have above average skills in human relations and communications. The course will prepare project managers to optimize the utilization of their most important resource: people. Relying primarily on a wide range of research and experience in the Project Team, this course will help guide project managers in building the other skills needed to be truly successful in the competitive Project Team.

ENCE666 Cost Engineering and Control (3 Credits)
Analytical techniques to estimate and control project costs, including site investigation, quantity takeoff, work analysis, and bid preparation. Systematic cost control as related to job production and historical data. Includes the fundamentals of different types of cost estimating, the appropriate use of each, and examination of popular software. This course is designed to help students develop the ability to utilize techniques of cost estimating, cost and schedule control and project management as they apply to engineering and construction work. Students will understand why it is crucial to understand the various types of cost estimating and the appropriate use of each, activity-based costing, conceptual estimating and budgeting, unit cost estimating, parametric estimating, detailed estimating, learning curves and progress functions.

ENCE670 Highway Traffic Characteristics and Measurements (3 Credits)
The study of the fundamental traits and behavior patterns of road users and their vehicles in traffic. The basic characteristics of the pedestrian, the driver, the vehicle, traffic volume and speed, stream flow and intersection operation, parking, and accidents.

ENCE672 Regional Transportation Planning (3 Credits)
Factors involved and the components of the process for planning statewide and regional transportation systems, encompassing all modes. Transportation planning studies, statewide traffic models, investment models, programming and scheduling.

ENCE673 Urban Transportation (3 Credits)
The contempory methodology of urban transportation planning. The urban transportation planning process, interdependence between the urban transportation system and the activity system, urban travel demand models, evaluation of urban transportation alternatives and their implementation.

ENCE674 Urban Transit Planning and Rail Transportation Engineering (3 Credits)
Basic engineering components of conventional and high speed railroads and of air cushion and other high speed new technology. The study of urban rail and bus transit. The characteristics of the vehicle, the supporting way, and the terminal requirements will be evaluated with respect to system performance, capacity, cost, and level of service.

ENCE675 Airport Planning and Design (3 Credits)
The planning and design of airports including site selection, runway configuration, geometric and structural design of the landing area, and terminal facilities. Methods of financing airports, estimates of aeronautical demand, air traffic control, and airport lighting are also studied.

ENCE676 Highway Traffic Flow Theory (3 Credits)
An examination of physical and statistical laws that are used to represent traffic flow phenomena. Deterministic models including heat flow, fluid flow, and energy-momentum analogies, car following models, and acceleration noise. Stochastic approaches using independent and Markov processes, Queuing models, and probability distributions.

ENCE677 OR Models for Transportation Systems Analysis (3 Credits)
Fundamental skills and concepts of the quantitative techniques of operations research including: mathematical modeling, linear programming, integer programming, network optimization (shortest paths, minimum spanning trees, minimum cost network flows, maximum flows), heuristics, and basics of probabilistic modeling. Emphasis on the application of these techniques to problems arising in transportation.

ENCE681 Freight Transportation Analysis (3 Credits)
Application of operations research and system analysis methods to freight transportation systems. Cost and output analysis, terminal location, freight transportation demand models, freight transportation network equilibrium models and analytic models for analyzing the operations of rail, motor carrier, water carrier and air cargo systems.

ENCE688 Advanced Topics in Civil Engineering (1-3 Credits)
Advanced topics selected by the faculty from the current literature of civil engineering to suit the needs and background of students. May be taken for repeated credit when identified by topic title.

ENCE689 Seminar (1-16 Credits)

ENCE710 Steel Structures I (3 Credits)
Moment connections of beams and columns. Wind bracing connections. Plate girders. Floor systems for buildings. Strengthening of beams and trusses. Corrosion control. Fatigue and fracture.
Formerly: ENCE656.

ENCE713 Concrete Structures I (3 Credits)
The behavior and strength of reinforced concrete members under combined loadings, including the effects of creep, shrinkage and temperature. Mechanisms of shear resistance and design procedures for bond, shear and diagonal tension. Elastic and ultimate strength analysis and design of slabs. Columns in multistory frames. Applications to reinforced concrete structures.
Formerly: ENCE753.

ENCE715 Earthquake Engineering (3 Credits)
Review of SDOF and MDOF structural dynamics; characteristics of earthquakes; philosophies of seismic design; elastic and inelastic response spectra; design for ductility; principles of capacity design; design of structural systems requiring special performance criteria.
Restriction: Permission of instructor.
Formerly: ENCE755.

ENCE717 Bridge Structures (3 Credits)
The design and rating of bridge structures in accordance with the AASHTO WSD, LFD, ALFD, and LRFD specifications. Development of the basic strength and performance requirements as defined within AASHTO, area and various foreign codes. Projects requiring the design, rating and ultimate strength evaluations will be assigned for all of the predominate construction types including: simple and continuous span, straight and horizontally curved, non-composite and composite w and box section superstructure elements.
Formerly: ENCE751.

ENCE718 Advanced Structural Systems (3 Credits)
Review of classical determinate and indeterminate analysis technique; multistory buildings; space structures; suspension bridges and cables structures; arches; long span bridges.
Formerly: ENCE750.

ENCE721 Investment Theory for Project Engineers (3 Credits)
An introductory course covering investment theory and its application to project evaluation and selection. Selected topics include: basic theory of interest and fixed income securities; portfolio selection and modification; capital asset pricing; asset price dynamics; derivative securities; and project evaluation using real options.
Credit Only Granted for: ENCE652 or ENCE721.
Formerly: ENCE652.

ENCE722 Market, Spatial, and Traffic Equilibrium Models in Project Management (3 Credits)
Introduction to equilibrium models involving economics and engineering. Topics include: review of relevent optimization theory; the nonlinear complementary problem (NCP) and variational inequality problem formats to solve equilibrium problems; review of relevant game theory, equilibrium models, and algorithims.
Credit Only Granted for: ENCE654, ENCE688M, or ENCE722.
Formerly: ENCE654.

ENCE725 Probabilistic Optimization (3 Credits)
Provide an introduction to optimization under uncertainty. Chance-constrained programming, reliability programming, value of information, two stage problems with recourse, decomposition methods, nonlinear and linear programming theory, probability theory. The objectives of this course are to provide understanding for studying problems that involve optimization under uncertainty, learn about various stochastic programming formulations (chance constrained programs, two stage methods with recourse, etc.) relevant to engineering and economic settings, present theory for solutions to such problems, and present algorithms to solve these problems.Cross-listed with ENME725.
Credit Only Granted for: ENME725 or ENCE725.

ENCE730 Environmental and Water Resource Systems II (3 Credits)
Advanced topics in operational research. Applications to complex environmental and water resource systems. The use of systems simulation and probabalistic modeling.
Prerequisite: ENCE630; or permission of instructor.

ENCE741 Earth Retaining Structures (3 Credits)
Introduction to types and uses of earth retaining structures, and lateral earth pressure concepts and theories. Analysis and design of retaining walls and shoring structures and their bracing systems. These include conventional retaining walls, mechanically stabilized earth walls, cantilever and anchored sheet piling, cellular cofferdams, braced cuts, soil nailing, and the design of tiebacks and anchors. Load and resistance factor design concept will be presented.

ENCE743 Soil Dynamics and Earthquake Engineering (3 Credits)
Review of theory of vibration and wave propagation in elastic media. Field and laboratory methods for determining dynamic soil properties. Analysis and design of soil-foundation systems subjected to machinery generated vibrations and methods of foundation isolation. Earthquake causes, magnitude and intensity, seismic hazard evaluation, NEHRP site classification, site response analyses and ground motion amplification, liquefaction and response of earth structures.
Credit Only Granted for: ENCE642 or ENCE743.
Formerly: ENCE642.

ENCE744 QA/QC and Specification for Highway Materials (3 Credits)
Factorial Experiments and Analysis. Materials Variability Components: Inherent and Testing Variability. Quality Control/Quality Assurance: Analysis Methods, Assurance Plans and Components. Specifications for Asphalt and Concrete Materials: Method, End-Result, Performance Based. Life Cycle Analysis and Performance Modeling Techniques. Use of Advanced Statistical Analysis for Material Properties Monitoring and Performance Predictions: ANOVA, Time Series, Spatial Data Analysis. Advanced Highway Materials including Polymer Modified and High Performance Asphalt and Concrete.
Prerequisite: ENCE300.

ENCE751 Chemistry of Natural Waters II (3 Credits)
A continuation of ENCE651, introducing aquatic chemical kinetics and chemistry of the solid-water interface.
Prerequisite: ENCE650 and ENCE651.

ENCE799 Master's Thesis Research (1-6 Credits)

ENCE898 Pre-Candidacy Research (1-8 Credits)

ENCE899 Doctoral Dissertation Research (1-8 Credits)

ENCH - Engineering, Chemical

ENEE - Electrical & Computer Engineering

ENEE407 Design & Testing of RF and Microwave Devices (2 Credits)
An introduction to state of the art design, and testing techniques of RF and microwave devices. Designs, simulations and layout of different devices are performed using the software package ADS (Advanced Design System). The course highlights a wide range of engineering applications including terrestrial microwave links, satellite communications, broadcasting, mobile communications and radar.
Prerequisite: Minimum grade of C- in ENEE381; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical) ; and permission of ENGR-Electrical & Computer Engineering department.

ENEE408 Capstone Design Project (3 Credits)
Culmination of prior course work in electrical and computer engineering. Utilization of modern design tools and methodologies for the design of components or systems under realistic constraints, with particular emphasis on teamwork and oral/written communication. Areas in which projects are currently offered include: microprocessor-based systems, digital systems, VLSI design (both digital and mixed-signal), and optical systems.
Prerequisite: Must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Repeatable to: 6 credits if content differs.

ENEE411 Advanced Analog and Digital Electronics (3 Credits)
Examination of analog and digital device models for analysis, design, and simulation of transistor level electronic circuits, emphasizing Metal Oxide Silicon Field Effect Transistors (MOSFETs); fundamental single transistor configurations; frequency response, feedback, and stability of multi-transistor circuits, such as current mirrors, differential amplifiers, voltage references, operational amplifiers and data converters; complementary Metal Oxide Silicon (CMOS) implementations of static and clocked digital as well as mixed signal circuits.
Prerequisite: Minimum grade of C- in ENEE303.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer) ; and must have permission of the department.

ENEE413 Advanced Electronic Devices (3 Credits)
Advanced devices and their physical operation, providing a thorough description of those parts not usually covered in introductory electronics courses. These include Schottky and tunnel junctions, negative resistance devices used in wireless communication, homo-structure compound semiconductor transistors, hetero-structure (quantum effect) transistors, non-volatile memory devices, photonic devices such as LEDs and solid-state lasers, solar cells, photo-detectors and camera imagers, as well as bio-related components. Special consideration will be given to achieve an understanding of noise processes that limit electronic device performance. In all cases, system-level applications will be illustrated.
Prerequisite: Minimum grade of C- in ENEE303.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical) ; and permission of ENGR-Electrical & Computer Engineering department.

ENEE416 Integrated Circuit Fabrication Laboratory (3 Credits)
Characterization of wafers and fabrication steps. Oxide growth, lithography, dopant diffusion, and metal deposition and patterning will be discussed in the lectures and carried out in the lab in fabricating NMOS transistor circuits. The transistor characteristics will be measured and related to the fabrication parameters.
Prerequisite: Minimum grade of C- in ENEE303; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE417 Microelectronics Design Laboratory (2 Credits)
Students design and build fairly sophisticated circuits, mainly composed of discrete transistors and integrated circuits. Many of the projects are designed to require that students synthesize from what they have learned in many of the disciplines in electrical engineering. Students learn they can actually use their knowledge to build something very practical, which may include a high-fidelity amplifier, a radio, a memory cell, a transmitter, etc.
Prerequisite: Minimum grade of C- in ENEE303; and minimum grade of C- in ENEE307; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE419 Topics in Microelectronics (1-3 Credits)
Selected topics of current importance in microelectronics.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).
Repeatable to: 99 credits if content differs.

ENEE420 Communication Systems (3 Credits)
Fourier series, Fourier transforms and linear system analysis; random signals, autocorrelation functions and power spectral densities; analog communication systems: amplitude modulation, single-sideband modulation, frequency and phase modulation, sampling theorem and pulse-amplitude modulation; digital communication systems pulse-code modulation, phase-shift keying, differential phase shift keying, frequency shift keying; performance of analog and digital communication systems in the presence of noise.
Prerequisite: ENEE322, ENEE324; and completion of all lower-division technical courses in the EE curriculum.

ENEE425 Digital Signal Processing (3 Credits)
Sampling as a modulation process; aliasing; the sampling theorem; the Z-transform and discrete-time system analysis; direct and computer-aided design of recursive and nonrecursive digital filters; the Discrete Fourier Transform (DFT) and Fast Fourier Transform (FFT); digital filtering using the FFT; analog-to-digital and digital-to analog conversion; effects of quantization and finite-word-length arithmetic.
Prerequisite: ENEE322; and completion of all lower-division technical courses in the EE curriculum.

ENEE426 Communication Networks (3 Credits)
The main design issues associated with computer networks, satellite systems, radio nets, and general communication networks. Application of analytical tools of queuing theory to design problems in such networks. Review of proposed architectures and protocols.
Prerequisite: ENEE324 or STAT400; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in Engineering: Computer or Engineering: Electrical program.
Credit Only Granted for: CMSC417 or ENEE426.

ENEE428 Communications Design Laboratory (2 Credits)
EE capstone design course. Exploring the signal processing and communication systems theoretical concepts presented in ENEE 420 Communication Systems and ENEE 425 Digital Signal Processing by implementing them on actual DSP based hardware in real time.
Prerequisite: ENEE324 or STAT400; and completion of all lower-division technical courses in the EE curriculum.
Corequisite: ENEE425 or ENEE420.
Restriction: Must be in Engineering: Electrical or Engineering: Computer program.

ENEE429 Topics in Communications (1-3 Credits)
Selected topics of current importance in communications.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).
Repeatable to: 99 credits if content differs.

ENEE436 Foundations of Machine Learning (3 Credits)
A broad introduction to the foundations of Machine Learning (ML), as well as hands-on experience in applying ML algorithms to real-world data sets. Topics include various techniques in supervised and unsupervised learning, as well as applications to computer vision, data mining, and speech recognition.
Prerequisite: 1 course with a minimum grade of C- from (ENEE324, STAT400); and 1 course with a minimum grade of C- from (ENEE150, CMSC216); and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Permission of ENGR-Electrical & Computer Engineering department. And must be in one of the following programs (Engineering: Electrical; Engineering: Computer) ; or must be in the ECE Department's Machine Learning notation program.
Credit Only Granted for: ENEE436, ENEE439M, or CMSC422.
Formerly: ENEE439M.

ENEE439 Topics in Signal Processing (1-3 Credits)
Selected topics of current importance in signal processing.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Repeatable to: 99 credits if content differs.

ENEE440 Microprocessors (3 Credits)
Microprocessor architectures, instruction sets, and applications. Bus structures, memory, I/O interfacing. Assembly language programming, LSI device configuration, and the embedding of microprocessors in systems.
Prerequisite: ENEE350; and completion of all lower division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE445 Computer Laboratory (2 Credits)
This laboratory course focuses on the hardware/software interface in computer systems. Hands-on experiments are used to teach design, construction, analysis, and measurement of both hardware and software for embedded systems. Projects emphasize using microcontrollers for control, sensing, and communication through various I/O devices.
Prerequisite: Minimum grade of C- in ENEE205; or minimum grade of C- in ENEE206; and minimum grade of C- in ENEE350; and must have earned a minimum grade of C- in all 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE446 Digital Computer Design (3 Credits)
Hardware design of digital computers. Arithmetic and logic units, adders, multipliers and dividers. Floating-point arithmetic units. Bus and register structures. Control units, both hardwired and microprogrammed. Index registers, stacks, and other addressing schemes. Interrupts, DMA and interfacing.
Prerequisite: ENEE350; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Permission of ENGR-Electrical & Computer Engineering department.
Credit Only Granted for: ENEE446 or CMSC411.

ENEE447 Operating Systems (4 Credits)
The course will present the theory, design, implementation and analysis of computer operating systems. Through classroom lectures, homework, and projects, students learn the fundamentals of concurrency, process management, interprocess communication and synchronization, job scheduling algorithms, memory management, input-output devices, file systems, and protection and security in operating systems. Optional topics may include communications protocols, computer security, and real-time operating systems. The lectures will be complemented with a significant level of programming, bringing up a simple operating system from scratch, concurrently as the topics are discussed in lecture. A weekly recitation section will provide TA support and an informal laboratory atmosphere. Each student will have their own board, so development will be done largely outside the classroom at each student's pace.
Prerequisite: 1 course with a minimum grade of C- from (CMSC414, CMSC417, CMSC420, CMSC430, CMSC433, CMSC435, ENEE440, ENEE457); and permission of ENGR-Electrical & Computer Engineering department; and (ENEE350, CMSC330, and CMSC351).
Restriction: Must be in Engineering: Computer program; and permission of ENGR-Electrical & Computer Engineering department.
Credit Only Granted for: ENEE447 or CMSC412.

ENEE456 Cryptography (3 Credits)
The theory, application, and implementation of mathematical techniques used to secure modern communications. Topics include symmetric and public-key encryption, message integrity, hash functions, block-cipher design and analysis, number theory, and digital signatures.
Prerequisite: (CMSC106, CMSC131, or ENEE150; or equivalent programming experience); and (2 courses from (CMSC330, CMSC351, ENEE324, or ENEE380); or any one of these courses and a 400-level MATH course, or two 400-level MATH courses); and Permission of CMNS-Mathematics department or permission of instructor . Cross-listed with: MATH456, CMSC456.
Credit Only Granted for: MATH456, CMSC456 or ENEE456.

ENEE457 Computer Systems Security (3 Credits)
Theoretical and practical aspects of computer systems security. Topics covered include symmetric/asymmetric encryption, message authentication, digital signatures, access control, as well as network security, web security and cloud security. Students acquire tools necessary for designing secure computer systems and programs and for defending against malicious threats (e.g., viruses, worms, denial of service).
Prerequisite: Minimum grade of C- in ENEE350; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer) ; and permission of ENGR-Electrical & Computer Engineering department.
Credit Only Granted for: CMSC414 or ENEE457.

ENEE459 Topics in Computer Engineering (1-3 Credits)
Selected topics of current importance in computer engineering.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Repeatable to: 99 credits if content differs.

ENEE460 Control Systems (3 Credits)
Mathematical models for control system components. Transform and time domain methods for linear control systems. Introductory stability theory. Root locus, bode diagrams and Nyquist plots. Design specifications in the time and frequency domains. Compensation design in the time and frequency domain. Introduction to sampled data systems.
Prerequisite: ENEE322; and (ENEE290, MATH240, or MATH461); and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE461 Control Systems Laboratory (3 Credits)
Students will design, implement, and test controllers for a variety of systems. This will enhance their understanding of feedback control and familiarize them with the characteristics and limitations of real control devices. They will also complete a small project. This will entail writing a proposal, purchasing parts for their controller, building the system, testing it, and writing a final report describing what they have done.
Prerequisite: Minimum grade of C- in ENEE205; and minimum grade of C- in ENEE322; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Credit Only Granted for: ENEE461, ENME461, or ENME489N.

ENEE463 Digital Control Systems (3 Credits)
Introduction to techniques for the analysis and design of linear control systems and implementation of control systems using digital technology. Topics include linearization, solution of linear equations, z-transforms and Laplace transforms, design of linear controllers, optimal control, and digital implementation of control designs. Students will use MATLAB for the solution of problems and the design of control systems.
Prerequisite: ENEE322; and completion of lower-division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE467 Robotics Project Laboratory (3 Credits)
Teaches practical skills to build, control, and deploy robotic systems. Interdisciplinary groups of students develop real-world robotic systems, with emphasis on making a real robot do what one wants it to do.
Prerequisite: Minimum grade of C- in ENAE450 or (ENEE322 and a course which covers academic content similar to that of ENAE450 with approval from the Department of Electrical and Computer Engineering).
Restriction: Must be in the Robotics and Autonomous Systems minor; and permission of Department of Electrical and Computer Engineering.

ENEE469 Topics in Controls (1-3 Credits)
Selected topics of current importance in controls.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Repeatable to: 99 credits if content differs.

ENEE473 Electrical Machines Laboratory (2 Credits)
Experiments involving single and three phase transformers, induction machines, synchronous machines and D.C. machines.
Prerequisite: Minimum grade of C- in ENEE205; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Recommended: ENEE322.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE474 Power Systems (3 Credits)
Interconnected power systems, transmission lines, load flow studies, unit commitment and economic dispatch. Three phase networks, machine models. Symmetrical components, fault analysis and unbalanced operation. Power system transients, stability and numerical methods in power system analysis.
Prerequisite: ENEE322; and completion of all lower-division technical courses in the EE curriculum.

ENEE475 Power Electronics (3 Credits)
This course is suitable for undergraduate and graduate students who want to learn the basic principles of power electronics and its applications. Special emphasis is placed on the interdisciplinary nature of power electronics. Strong and intimate connections between power electronics and circuit theory, electronic circuits, semiconductor devices, electric power, magnetic, motor drives and control are stressed.
Prerequisite: Minimum grade of C- in ENEE303; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE476 Renewable Energy (3 Credits)
Solar Energy Conversion Systems: History of Photovoltaic (PV) Systems, PV Cell, Module and Array Models and Equivalent Circuits, Characteristic Resistance, Fill Factor, Effects of Parasitic Resistances, Mismatch Effects, Shading, Bypass Diodes, Sun Tracking Systems, Maximum Power Point Tracking (MPPT) Techniques, Isolated and Non-isolated Switch-mode DC/DC for PV Systems, Inverter Design and Control, Sizing the PV Panel and Battery Pack in PV Applications. Wind Energy Conversion Systems: Introduction to Wind Energy Harvesting, Horizontal and Vertical Wind Systems, Fundamentals of Wind Energy Harvesting Systems, Variable Speed and Fixed Speed Wind Energy Conversion Systems (WECS), Wind Turbines and Different Electrical Machines in Wind Applications, Induction Machine and Dynamic Model of Induction Machines, Synchronous Generators and Dynamic Model of SG, Control of Wind Energy Conversion Systems.
Prerequisite: Minimum grade of C- in ENEE303; and completion of all lower-divisions ENEE courses with a C- or better.
Restriction: Permission of ENGR-Electrical & Computer Engineering department; and must be in one of the following programs (Engineering: Electrical; Engineering: Computer).

ENEE486 Optoelectronics Lab (2 Credits)
Hands-on experience in performing measurements in optics and electro-optics. Basics of optics, light detectors, Fourier optics, gratings and spectrometers, pulsed dye lasers, fiber optics, electro-optics, and acousto-optics.
Prerequisite: Minimum grade of C- in ENEE205; or minimum grade of C- in ENEE206. And minimum grade of C- in PHYS271 and PHYS270; and must have earned a minimum grade of regular (letter) C- in all required 200-level ENEE courses; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE488 Independent Study in Electrical and Computer Engineering (1-3 Credits)
The purpose is to provide students with an opportunity for independent study projects on advanced electrical and computer engineering topics. These projects typically involve academic investigations of technical themes that are not addressed in the established elective and special topics courses taught by the department on a regular basis. Study plans are tailored to students educational goals but are approved and supervised by faculty.
Prerequisite: Must have completed and earned a minimum grade of regular (letter) C- in all lower-division EE or CP tech electives; and permission of ENGR-Electrical & Computer Engineering department.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Repeatable to: 9 credits if content differs.
Additional Information: A total of 5 credits combined of ENEE488 and ENEE499 can count towards a degree in electrical and computer engineering.

ENEE489 Topics in Electrophysics (1-3 Credits)
Selected topics of current importance in electrophysics.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).
Repeatable to: 99 credits if content differs.

ENEE490 Physical Principles of Wireless Communications (3 Credits)
This course is intended to give students an overall understanding of the physical phenomena involved in wireless communications and to allow them to make first-cut designs. Major topics covered include antennas, antenna arrays, radiowave scattering and propagation, noise sources in communications systems, cell phone systems and satcom.
Prerequisite: ENEE381.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE496 Lasers and Electro-optic Devices (3 Credits)
Modern physical optics: Gaussian beams, optical resonators, optical waveguides; theory of laser oscillation, rate equations; common laser systems. Selected modern optoelectronic devices like detectors and modulators. Role of lasers and optoelectronics in modern technology.
Prerequisite: ENEE381; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in one of the following programs (Engineering: Computer; Engineering: Electrical).

ENEE498 Topics in Electrical Engineering (1-3 Credits)
Selected topics of current importance in electrical engineering.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in Engineering: Electrical program.
Repeatable to: 12 credits if content differs.

ENEE499 Senior Projects in Electrical and Computer Engineering (1-5 Credits)
The purpose is to provide students with an opportunity to engage in independent research projects on advanced electrical and computer engineering topics. Projects are selected by students and supervised by faculty and other qualified mentors. While students may be required to acquire new skills or information in the course of completing a 499 project, the focus is to conduct an independent investigation of a technical theme by the student. The project may be used to satisfy the advanced lab requirement if it is approved as a primarily experimental research project. In that case, the student will enroll in ENEE499L.
Prerequisite: Permission of ENGR-Electrical & Computer Engineering department; and completion of all lower-division technical courses in the EE curriculum.
Restriction: Must be in Engineering: Electrical program.
Repeatable to: 9 credits if content differs.
Formerly: ENEE418.
Additional Information: A total of 5 credits combined of ENEE448 and ENEE499 can count toward a degree in electrical or computer engineering.

ENEE600 Solid State Electronics (3 Credits)
Properties of crystals; energy bands: electron transport theory; conductivity and hall effect; statistical distributions; fermi level: impurities; non-equilibrium carrier distributions; normal modes of lattice vibration and thermal properties of crystals; tunneling phenomena; surface properties.
Prerequisite: ENEE413; and must have background in elementary quantum mechanics.
Credit Only Granted for: ENEE600 or ENEE793.
Formerly: ENEE793.

ENEE601 Semiconductor Devices and Technology (3 Credits)
The principles, structures and characteristics of semiconductor devices. Technology and fabrication of semiconductor devices.
Recommended: ENEE413 and ENEE600.
Credit Only Granted for: ENEE601 or ENEE697.
Formerly: ENEE697.

ENEE605 Design and Fabrication of Micro-Electro-Mechanical Systems (MEMS) (3 Credits)
The goals are to explore the world of Micro-Electro-Mechanical Systems (MEMS) by understanding its design and fabrication aspects.
Credit Only Granted for: ENEE605 or ENEE719R.
Formerly: ENEE719R.

ENEE610 Electrical Network Theory (3 Credits)
Matrix algebra, network elements, ports, passivity and activity, geometrical and analytical descriptions of networks, state variable characterizations, scattering matrices, signal flow graphs, sensitivity.
Prerequisite: Must have completed undergraduate-level Circuit Theory; or permission of instructor.

ENEE611 Integrated Circuit Design and Analysis (3 Credits)
Active and passive elements used in semiconductor structures. Design application of linear and digital integrated circuits.
Recommended: ENEE610.
Credit Only Granted for: ENEE611 or ENEE696.
Formerly: ENEE696.

ENEE612 Advanced Power Electronics (3 Credits)
Advanced power electronic converters, techniques to model and control switching circuits, pulse width modulation, resonant switch converters, resonant DC-link converters, series and parallel loaded resonant (SLR, PLR) DC-DC converters, zero voltage switching clamped-voltage (ZVS-CV) converters, ZVS resonant-switch DC-DC converters are explained. In addition, this course deals with small-signal and large-signal modeling and control of switched mode power converters, sliding-mode operation, state space models, generalized state-space averaging, and feedback linearization techniques. Multiple-input converters and their operational principles are explained. Furthermore, practical design procedures for type II and type III compensators with voltage-mode error-amplifier for DC/DC converters are explained.
Prerequisite: ENEE303, ENEE475, or ENEE476; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: ENEE719B or ENEE612.
Formerly: ENEE719B.

ENEE614 Radio Frequency VLSI Circuit Design (3 Credits)
This course will give students the knowledge required to analyze, design and lay-out discrete and integrated circuits used in modern radio frequency communications. The course will focus on advanced amplifier concepts, frequency conversion, tuning, and low-noise techniques. Implementation of AM, FM and digital modulation techniques will be covered. Emphasis will be given to CMOS technology as applied to analog VLSI. Advanced applications of SPICE and VLSI design layout tools will be covered.
Recommended: ENEE611.

ENEE620 Random Processes in Communication and Control (3 Credits)
Introduction to random processes: characterization, classification, representation; Gaussian and other examples. Linear operations on random processes, stationary processes: covariance function and spectral density. Linear least square waveform estimating Wiener-Kolmogroff filtering, Kalman-Bucy recursive filtering: function space characterization, non-linear operations on random processes.
Prerequisite: ENEE324; or students who have taken courses with comparable content may contact the department.

ENEE621 Estimation and Detection Theory (3 Credits)
Estimation of unknown parameters, Cramer-Rao lower bound; optimum (map) demodulation; filtering, amplitude and angle modulation, comparison with conventional systems; statistical decision theory Bayes, minimax, Neyman/Pearson, Criteria-68 simple and composite hypotheses; application to coherent and incoherent signal detection; M-ary hypotheses; application to uncoded and coded digital communication systems.
Prerequisite: ENEE620; or students who have taken courses with comparable content may contact the department.

ENEE623 Digital Communications (3 Credits)
Review of sampling and quantization, functional characterization of digital signals and transmission facilities, band-limited signals and systems. Digital modulation/demodulation techniques, error probability, intersymbol interference and its effects, adaptive equalization. Signaling with coded waveforms, fading and satellite channels, multiple access problems and protocols. Introduction to spread-spectrum Communications.
Recommended: ENEE420.

ENEE625 Multi-user Communication (3 Credits)
Basic queueing models. Store-and forward communications networks; switching modes; delay-throughput measures; capacity assignment; routing; topological design; computational aspects; flow control; error control; protocols; specification and validation; local networks; satellite and packet radio systems; multiple access schemes; stability and performance; multi-user information theory; and large scale system theory.
Prerequisite: ENEE620.

ENEE626 Error Correcting Codes (3 Credits)
Introduction to linear codes; bounds on the error correction capabilities of codes; convolutional codes with threshold, sequential and viterbi decoding; cyclic random error correcting codes; P-N sequences; cyclic and convolutional burst error correcting codes.
Prerequisite: ENEE420; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: ENEE626 or ENEE722.
Formerly: ENEE722.

ENEE627 Information Theory (3 Credits)
Information measures and their properties; entropy, relative entropy and mutual information. Information source models. Lossless data compression: the Kraft inequality, Shannon-Fano and Huffman codes. Typical sequences, asymptotic equipartition property, lossy source coding. Discrete memoryless channels: capacity, channel coding theorem. The additive Gaussian channel. Source coding under a fidelity constraint: rate distortion function and rate distortion theorem.
Prerequisite: ENEE620.
Credit Only Granted for: ENEE627 or ENEE721.
Formerly: ENEE721.

ENEE630 Advanced Digital Signal Processing (3 Credits)
This is the first-year graduate course in signal processing. The objective is to establish fundamental concepts of signal processing on multirate processing, parametric modeling, linear prediction theory, modern spectral estimation, and high-resolution techniques.
Prerequisite: ENEE425.
Corequisite: ENEE620.
Credit Only Granted for: ENEE624 or ENEE630.
Formerly: ENEE624.

ENEE631 Digital Image and Video Processing (3 Credits)
Foundations of digital image and video processing. Topics covered: 2-D systems and transforms; image acquisition and perception; multi-dimensional sampling; quantization; linear and non-linear techniques for image enhancement and restoration; basics on image analysis; lossless and lossy image compression; motion estimation and compensation; still image and video coding standards; applications of image and video processing.
Prerequisite: ENEE620 and ENEE630; or students who have taken courses with comparable content may contact the department.

ENEE632 Speech and Audio Processing (3 Credits)
The objective is to apply digital signal processing techniques to speech and music signals. Topics covered include acoustic theory of speech production leading to the source-filter model; acoustic and digital vocal-tract models of speech production; speech analysis-synthesis based on the short-time Fourier transform, linear prediction, and homomorphic representations; extensions to other multiresolution analysis; time-domain models for speech processing; auditory perception and speech perception; waveform and model-based speech coding using scalar and vector quantization; time-scale modification; pitch and formant estimation; application of techniques to music analysis-synthesis.
Prerequisite: ENEE620 and ENEE630.
Credit Only Granted for: ENEE739A or ENEE632.
Formerly: ENEE739A.

ENEE633 Statistical Pattern Recognition (3 Credits)
The goal is to introduce mathematical pattern analysis and recognition. Emphasis is given to parametric and non-parametric statistical pattern recognition methods and clustering with applications to speech, image and video recognition.
Prerequisite: MATH461; or students who have taken courses with comparable content may contact the department; or permission of instructor.
Corequisite: ENEE620; or permission of instructor.
Credit Only Granted for: ENEE633 or ENEE739Q.
Formerly: ENEE739Q.

ENEE634 Learning and Statistical Signal Processing (3 Credits)
Adaptive learning and statistical signal processing, including: numerical analysis; principal component analysis and support vector machines; adaptive signal processing (supervised learning); blind equalization and identification (unsupervised learning); antenna array and MIMO signal processing; space-time and space-time-frequency coding; neural networks (nonlinear adaptive learning); advanced topics on machine learning, such as online and deep learning.
Prerequisite: ENEE620 and ENEE630.

ENEE640 Digital CMOS VLSI Design (3 Credits)
Review of MOS transistors: fabrication, layout, characterization; CMOS circuit and logic design: circuit and logic simulation, fully complementary CMOS logic, pseudo-nMOS logic, dynamic CMOS logic, pass-transistor logic, clocking strategies; sub system design: ALUs, multipliers, memories, PLAs; architecture design: datapath, floorplanning, iterative cellular arrays, systolic arrays; VLSI algorithms; chip design and test: full custom design of chips, possible chip fabrication by MOSIS and subsequent chip testing.
Prerequisite: ENEE303 and ENEE350; or students who have taken courses with comparable content may contact the department; or permission of instructor.

ENEE641 Mathematical Foundations for Computer Engineering (3 Credits)
Mathematical modeling, design, analysis and proof techniques related to computer engineering. Probability, logic, combinatorics, set theory, and graph theory, as they pertain to the design and performance of computer engineering systems. Techniques for the design and analysis of efficient computational methods from graph theory and networks. Understanding of the limits on the efficiency of such computational methods. Translation from mathematical theory to actual programming. The course emphasizes mathematical rigor.
Credit Only Granted for: ENEE641 or ENEE759F.
Formerly: ENEE759F.

ENEE644 Computer-Aided Design of Digital Systems (3 Credits)
Design methodologies for digital systems using a modern hardware description language. Algorithmic, architectural and implementation aspects of arithmetic processing elements. Design of Complex Instruction Set (CISC), Reduced Instruction Set (RISC), and floating point processors. Synthesis, simulation and testing of processors with computer-aided design tools. Students in some sections may, on permission, fabricate VLSI chips via MOSIS.

ENEE645 Compilers and Optimization (3 Credits)
The compilation, linking and loading process. Using lexical analyzers and parsers. Intermediate forms. Global, stack and heap objects, and their addressing modes. Stack implementation. Control flow analysis and optimization. Dataflow analysis and optimization including Static, single assignment. Alias analysis.
Prerequisite: ENEE350 or CMSC216; or students who have taken courses with comparable content may contact the department.
Credit Only Granted for: ENPM808T, ENEE645, or ENPM617.

ENEE646 Digital Computer Design (3 Credits)
Concepts and techniques for design of computer systems with improved performance. Advanced I/O systems, memory organization, pipeland and parallel processors, bus bandwidth, processor/memory interconnections, cache memory, virtual memory, multiprocessors, performance evaluation.
Prerequisite: ENEE446; or students who have taken courses with comparable content may contact the department.

ENEE648 Advanced Topics in Electrical Engineering (3 Credits)
Every semester courses intended for a high degree of specialization are offered by visiting or regular electrical engineering faculty members in two or more of the areas listed in 488. The student should check with the electrical engineering office of graduate studies for a list and the description of the topics offered currently.
Repeatable to: 99 credits if content differs.

ENEE651 Parallel Algorithms (3 Credits)
A presentation of the theory of parallel computers and parallel processing. Models of parallel processing and the relationships between these models. Techniques for the design and analysis of efficient parallel algorithms including parallel prefix, searching, sorting, graph problems, and algebraic problems. Theoretical limits of parallelism.
Prerequisite: CMSC451; or ENEE641; or students who have taken courses with comparable content may contact the department. Cross-listed with: CMSC751.
Credit Only Granted for: ENEE459P, ENEE651, ENEE759K or CMSC751.
Formerly: ENEE759K.

ENEE657 Computer Security (3 Credits)
An introduction to the principles of building secure systems. Topics include operating system (OS) security, secure network communications, software security, real-world attacks, applied cryptography, and hardware security. Within these topics, the course emphasizes the cross-cutting concerns of attacks, defenses and measurement.
Prerequisite: ENEE457 or CMSC414; or students who have taken courses with comparable content may contact the department.

ENEE660 System Theory (3 Credits)
General systems models. State variables and state space. Linearity and its implications. Controllability and observability. State space structure and representation. Realization theory and algorithmic solutions. Parameterizations of linear systems; canonical forms. Basic results from stability theory. Stabilizability. Fine structure of linear multivariable systems; minimal indices and polynomial matrices. Interplay between frequency domain and state space.
Prerequisite: ENEE460 and MATH463; or students who have taken courses with comparable content may contact the department.

ENEE661 Nonlinear Control Systems (3 Credits)
State space methods of stability analysis including second order systems and the phase plane, linearization and stability in the small, stability in the large and Lyapunov's second method. Frequency domain methods including the describing function. Popov's method and functional analytic methods. Introduction to Volterra series representations of nonlinear systems. Applications to conrol system design.
Prerequisite: ENEE660; and (MATH410 or MATH411; or students who have taken courses with comparable content may contact the department). Or permission of instructor.

ENEE662 Convex Optimization (3 Credits)
Focuses on recognizing, solving, and analyzing convex optimization problems. Convex sets, convex functions, convex and quasi-convex optimization problems. Duality theory and optimality conditions. Specific classes of problems including linear optimization (LP), semi-definite optimization (SDP), geometric programming. Algorithms for unconstrained and constrained optimization; interior-point methods. Applications in controls, communications, signal processing, statistics, and other areas.
Recommended: MATH410.
Credit Only Granted for: ENEE759F or ENEE662.

ENEE664 Optimal Control (3 Credits)
General optimization and control problems. Conditions of optimality for unconstrained and constrained optimization problems; sensitivity; duality. Introduction to linear and nonlinear programming methods. Dynamic optimization. Discrete time maximum principle and applications. Pontryagin maximum principle in continuous time. Dynamic programming. Feedback realization of optimal control.
Prerequisite: ENEE660 and MATH410; or students who have taken courses with comparable content may contact the department; or permission of instructor.
Corequisite: MATH411; or permission of instructor.

ENEE680 Fundamentals of Electromagnetics (3 Credits)
Theoretical analysis and engineering applications of Maxwell's equations: boundary value problems of electrostatics and magnetostatics, dielectric and magnetic properties of matter, energy and momentum content of fields, introduction to EM wave propagation.
Prerequisite: ENEE381; or students who have taken courses with comparable content may contact the department.

ENEE681 Electromagnetic Waves and Applications (3 Credits)
Review of Maxwell's equations: potentials, EM energy and momentum, EM plane waves. Properties of waves: dispersion, group velocity, diffraction, the ray optic limit. Waves in media: left-handed media, anisotropic media, wave guides, fibers, cavities. Radiation: antennas, Cherenkov radiation, radiation by accelerated charges, scattering. Additional topics: Wave chaos, Special Relativity.
Prerequisite: ENEE381; or students who have taken courses with comparable content may contact the department.

ENEE686 Charged Particle Dynamics, Electron and Ion Beams (3 Credits)
General principles of single-particle dynamics; mapping of the electric and magnetic fields; equation of motion and methods of solution; production and control of charge particle beams; electron optics; Liouville's theorem; space charge effects in high current beams; design principles of special electron and ion beam devices.

ENEE690 Introduction to Quantum Mechanics (3 Credits)
Introduction to the Schroedinger equation, matrix formulations of quantum mechanics, identical particles, entanglement, approximation methods, symmetries. Applications to solid-state, atomic, and quantum information science.
Prerequisite: ENEE381; or students who have taken courses with comparable content may contact the department.

ENEE691 Optical Communication Systems (3 Credits)
Optical components and systems. Measures of performance of optical communication systems. Topics include: single and multi-mode optical fibers, DFB and DBR lasers, transmitters and receivers, pin and APD detectors, noise analysis, receiver sensitivity modulation formats, system performance, bit-error-rate, power budget, TDM and WDM systems, network architecture.

ENEE692 Introduction to Photonics (3 Credits)
Introduction to photonic concepts and applications. In particular, high quality factor optical resonators, photonic crystals, microresonators, statistical and photon optics, spontaneous and stimulated emission, semiconductor lasers and detectors, modulators and optical switches are discussed. Finally, the concept of photons and the quantum states of light are presented.
Prerequisite: ENEE380 and ENEE381; or students who have taken courses with comparable content may contact the department.

ENEE698 Graduate Seminar (1-3 Credits)
Every semester regular seminars are held in electrical science and in the six areas of specialization offered by the electrical engineering department. They may be taken, by arrangement with the student's advisor, for repeated credit.
Restriction: Permission of instructor.

ENEE699 Independent Studies in Electrical Engineering (1-3 Credits)
Supervised individual study or project, or supervised group study or project, at an advanced level, in electrical engineering.
Repeatable to: 99 credits if content differs.
Formerly: ENEE609.

ENEE704 Physics and Simulation of Semiconductor Devices (3 Credits)
The physics of electron transport in semiconductor devices will be covered. Numerical methods for attaining solutions to transport equations will be explored. Students will also learn how to use CAD tools fro semiconductor device design. Nano-electronic devices will be introduced.
Recommended: ENEE601 and ENEE600; and exposure to quantum mechanics.
Credit Only Granted for: ENEE694 and ENEE704.
Formerly: ENEE694.

ENEE719 Advanced Topics in Microelectronics (3 Credits)
Repeatable to: 99 credits if content differs.
Formerly: ENEE718.

ENEE729 Advanced Topics in Communication (3 Credits)
Repeatable to: 99 credits if content differs.
Formerly: ENEE728.

ENEE731 Image Understanding (3 Credits)
An advanced graduate level course on image understanding. Mathematical and statistical approaches to solving image understanding problems will be discussed. Topics to be covered include: optimal edge and shape detection; image understanding using Markov random field models; Monte Carlo Markov Chain techniques for image understanding; shape from shading, stereo, texture and contour; structure from motion and object recognition. Existence, uniqueness and convergence issues for many of these problems will be discussed.
Prerequisite: ENEE631 and ENEE633.
Credit Only Granted for: ENEE739J or ENEE731.
Formerly: ENEE739J.

ENEE739 Advanced Topics in Signal Processing (3 Credits)
Repeatable to: 99 credits if content differs.
Formerly: ENEE738.

ENEE749 Advanced Digital Systems Design (3 Credits)
VLSI architecture and algorithms; design strategies; design methodologies; system-level design; area/delay/power trade-offs; high performance systems; multi-chip modules; low-power design; hardware/software co-design; design for testability, design for manufacturability; algorithm, architecture, and component design for adaptive computing systems; prototype system development and test, possible chip fabrication by MOSIS and subsequent chip testing.
Prerequisite: ENEE640 or ENEE644.
Restriction: Permission of instructor.
Repeatable to: 6 credits if content differs.

ENEE757 Security in Distributed Systems and Networks (3 Credits)
Threats and countermeasures in centralized and distributed systems; communication security techniques based on encryption; symmetric and asymmetric encryption; encryption modes, including stream and block encryption, and cipher block chaining; message origin and mutual authentication; third-party and inter-realm authentication, authentication of mobile users; data confidentiality and integrity protocols; formal analysis of authentication protocols and message integrity; access control in distributed systems and networks; firewall design; case studies of security mechanisms and policies.
Prerequisite: ENEE647; or permission of instructor.

ENEE759 Advanced Topics in Computer Engineering (3 Credits)
Topics, as announced every semester, from the field of computer engineering and its applications.
Repeatable to: 99 credits if content differs.

ENEE762 Stochastic Control (3 Credits)
Stochastic control systems, numerical methods for the Ricatti equation, the separation principle, control of linear systems with Gaussian signals and quadratic cost, non-linear stochastic control, stochastic stability, introduction to stochastic games.
Prerequisite: ENEE620 and ENEE660; or students who have taken courses with comparable content may contact the department.

ENEE763 Advanced Nonlinear Control Systems (3 Credits)
General introduction to the geometric theory of nonlinear control systems. Theory of decoupling, disturbance rejection, feedback linearization, stability, stabilization, etc.
Prerequisite: ENEE661; or permission of instructor.

ENEE765 Adaptive Control (3 Credits)
General principles of adaptive control. Self-tuning regulators and model reference adaptive systems. Theoretical issues: stability, convergence, and robustness. Practical issues: implementation, computation, auto-tuning, and other successful application. Alternatives to adaptive control.
Prerequisite: ENEE660 and ENEE664; or students who have taken courses with comparable content may contact the department.

ENEE769 Advanced Topics in Controls (3 Credits)
Topics selected, as announced every semester, from the field of controls and its applications.
Repeatable to: 99 credits if content differs.

ENEE789 Advanced Topics in Electrophysics (3 Credits)
Topics selected, as announced every semester, from the field of electrophysics and its applications.
Repeatable to: 99 credits if content differs.
Formerly: ENEE788.

ENEE790 Quantum Electronics I (3 Credits)
Spontaneous emission, interaction of radiation and matter, masers, optical resonators, the gas, solid and semi-conductor lasers, electro-optical effect, propagation in anisotropic media and light modulation.
Prerequisite: Must have knowledge of quantum mechanics; or permission of instructor.

ENEE791 Quantum Electronics II (3 Credits)
Nonlinear optical effects and devices, tunable coherent light sources: optical parametric oscillator; frequency conversion and dye laser. Ultrashort pulse generation and measurement, stimulated raman effect, and applications. Interaction of acoustic and optical waves, and holography.

ENEE798 Advanced Topics in Electrical Engineering (3 Credits)
Topics selected, as announced every semester.
Formerly: ENEE648.

ENEE799 Master's Thesis Research (1-6 Credits)

ENEE889 Teaching Workshop (1 Credit)
Provide training in education for senior PhD students who contemplate an academic career, and give them the opportunity to gain some teaching experience. Emphasis is on issues that are of special importance in electrical and computer engineering education.
Restriction: Must be in ENGR: MS/PhD-Electrical Engineering (Doctoral) program; and permission of ENGR-Electrical & Computer Engineering department.
Repeatable to: 4 credits if content differs.

ENEE898 Pre-Candidacy Research (1-8 Credits)
Provide training in education for senior PhD students who contemplate an academic career, and give them the opportunity to gain some teaching experience. Emphasis is on issues that are of special importance in electrical and computer engineering education.
Restriction: Must be in ENGR: MS/PhD-Electrical Engineering (Doctoral) program; and permission of ENGR-Electrical & Computer Engineering department.
Repeatable to: 4 credits if content differs.

ENEE899 Doctoral Dissertation Research (1-8 Credits)

ENES - Engineering Science

ENES401 Entrepreneurial Design Realization (3 Credits)
The vision for this course, and an aspect that makes it unique, is to expose students to the opportunities and challenges of bringing a product design to reality (entrepreneurship). The emphasis is on environmentally and socially sustainable projects. The end-product of this course will be full-scale implementations or complete design "packages" that can be taken to potential stakeholders.
Restriction: Must have senior standing and permission of instructor.
Cross-listed with: ENME401.
Credit Only Granted for: ENME401, ENME489B or ENES401.
Formerly: ENME489B.

ENES424 Engineering Leadership Capstone: Inclusive Leadership in Addressing Organizational & Societal Challenges (3 Credits)
The Minor in Global Engineering Leadership is designed to bring together one's understanding of leadership, organizations, culture, and global studies and apply this synthesized learning to a capstone project. The project will provide real-world application of global leadership principles to address an organizational or societal need. Students will utilize an inclusive leadership and global mindset to propose a big idea which brings about a positive organizational or societal change.
Prerequisite: ENES472 and ENES317.
Restriction: Must be in the Global Engineering Leadership minor (#EN09).

ENES428 Engineering Research for Exchange Students (3-12 Credits)
Directed research within the Clark School of Engineering for international exchange students.
Restriction: Available only to visiting exchange students taking part in an Engineering exchange program.
Repeatable to: 24 credits.

ENES440 Science, Technology, Ethics, and Policy: Minor Program Capstone (3 Credits)
Capstone research seminar for students in the Science, Technology, Ethics, and Policy Minor program.
Prerequisite: ENES240 and 2 courses from the STEP minor elective list.
Restriction: Must be in the Science, Technology, Ethics, and Policy minor.

ENES458 Topics in International Engineering (1-4 Credits)
A variety of topics related to engineering in a global context are discussed including cultural aspects, cross-cultural communication, international standards and law, and engineering and technology issues, business behavior, attitudes and values of selected countries and regions.
Prerequisite: ENES100.
Repeatable to: 12 credits if content differs.

ENES459 Study Abroad Special Topics in Engineering IV (1-6 Credits)
Special topics course in engineering science taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ENES460 Fundamentals of Technology Start-Up Ventures (3 Credits)
Fundamental aspects of creating, organizing, funding, managing, and growing a technology startup venture. This multidisciplinary course will draw on management, business, legal, financial, as well as technical, concepts. Students form teams and develop a business plan for a technology company, based on each team's own business idea and then present the plan to a panel of outside experts.
Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.
Credit Only Granted for: ENES460, BMGT461, SMLP470 or HLMN470.
Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES461 Advanced Entrepreneurial Opportunity Analysis in Technology Ventures (3 Credits)
Explores the factors that influence entrepreneurial opportunity analysis in technology-based ventures. Uses a cognitive theoretical framework to examine the integration of motivation, emotions and information processing modes to make complex entrepreneurial decisions in technology venture environments.
Credit Only Granted for: ENES210 or ENES461.

ENES462 Marketing High-Technology Products and Innovations (3 Credits)
Examines the opportunities and challenges of marketing high-technology products in turbulent environments requiring rapid decision making with incomplete information. Explores how innovations are introduced at frequent intervals, research-and-development spending is vital, and there are high mortality rates for both products and businesses.
Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.
Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES463 Strategies for Managing Innovation (3 Credits)
Emphasizes how the technology entrepreneur can use strategic management of innovation and technology to enhance firm performance. Examines the process of technological change, the ways that firms come up with innovations, the strategies that firms use to benefit from innovation, and the process of formulating technology strategy. Provides frameworks for analyzing key aspects of these industries and teaches students how to apply these frameworks.
Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.
Credit Only Granted for: ENES463, BMGT467, SMLP473 or HLMN472.
Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES464 International Entrepreneurship and Innovation (3 Credits)
Focuses on the need for every entrepreneur and innovator to understand the global market in today's hypercompetitive world, and to appreciate how to compete effectively in domestic markets by managing international competitors, suppliers, and influences. Explore how the distinction between foreign and domestic markets is becoming less pronounced. Develop skills to identify and manage opportunities on a global basis.
Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.
Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES466 Leading and Financing the Technology Venture (3 Credits)
Focuses on the challenges of leading and financing new technology ventures. Leadership topics include team selection and formation, aligning rewards with relative contributions of team members, and how early decisions can enable or prevent founders from achieving results that align with their individual motivations for becoming an entrepreneur. Essential tools and methods for building a strong financial foundation for a new technology venture are examined. Includes important accounting principles as well as methods for keeping financial control of the technology venture. Insights are shared on navigating the multitude of financial barriers that may block your entrepreneurial success, as well as how to grow the technology venture from concept through launch.
Restriction: Permission of ENGR-Maryland Technology Enterprise Institute.
Credit Only Granted for: ENES466, BMGT365, SMLP471 or HLMN471.
Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES467 Engineering for Social Change (3 Credits)
Critical analysis of issues at the intersection of engineering, philanthropy and social change. How engineering design, products and processes have created social change in the past and will do so in the future through both intended and unintended consequences. Topics covered include energy, sustainability and climate change, autonomy, the digital future, low cost engineering, manufacturing, philanthropy, ethics and the impact of electronics on society, among others. Faculty and external experts will engage with students on these topics. Students will broadly engage with organizations involved in using technology for positive social impact.
Restriction: Must not be in Engineering: Mechanical program; and junior standing or higher; and must be in a major in ENGR-A. James Clark School of Engineering. Cross-listed with: ENME467.
Credit Only Granted for: ENES467 or ENME467.

ENES471 Legal Aspects of Entrepreneurship (3 Credits)
Explores critical legal and business issues entrepreneurs face as they build and launch a new venture. Examines real world scenarios, and addresses the legal issues at all of the important junctures along the path to success. Significant attention placed on new venture formation, intellectual property management, and financing arrangements.
Additional Information: Course may not be used to fulfill any BMGT major or minor program requirement.

ENES472 Leading Global Teams and Engaging Across Cultures in Business, Engineering, and Technology (3 Credits)
Develop global leadership capacities and an understanding of the cultural aspects pertaining to industry and international business. In a globalized world, the ability to work, lead and communicate in culturally diverse settings has become a core component to leadership. Through real-world examples, research, and simulations, students will increase their self-awareness and understanding of culture and how culture influences attitudes, behaviors, and practices at the individual, organizational, or societal levels. Students will develop the skills necessary to navigate, negotiate, and lead cross-cultural engagements and teams. The course content is relevant and applicable to anyone interested in developing cross-cultural leadership competencies and cultivating a global mindset.
Restriction: Sophomore standing or higher; must be a minor in Global Engineering Leadership (#EN09), Global Poverty (#AG06), Global Terrorism Studies (#BS07), or International Development and Conflict Management (#BS02).
Credit Only Granted for: ENES472, SLLC471, or SLLC473.
Additional Information: Students not meeting restriction requirements should add themselves to the course holdfile. Restrictions DO NOT apply to winter and summer terms.

ENES474 Global Perspectives of Engineering (3 Credits)
Faculty supervised research on aspects of engineering in a foreign country including leading fields of research, key world markets, and the culture of the engineering workplace. Students will produce a comprehensive report exhibiting their expertise in their chosen country and the field of engineering within.
Prerequisite: ENES100; or permission of ENGR-A. James Clark School of Engineering.
Restriction: Must be in the International Engineering Minor.
Credit Only Granted for: ENES458M or ENES474.
Formerly: ENES458M.

ENES478 Topics in Engineering Education (1 Credit)
Topics related to teaching engineering courses, particularly project-based courses. Topics can include learning styles, student development theory, multicultural issues in teaching, facilitating team experiences, assessment, and academic integrity.
Restriction: Must be in the Engineering Teaching Fellow program.
Repeatable to: 3 credits if content differs.

ENES480 Engineering Honors Seminar I (1 Credit)
Introduction to engineering leadership, professionalism, and ethics. Discussions of leadership style, elements of success, professional communication, codes of ethics, handling of ethical dilemmas, and the characteristics of a professional.
Restriction: Must be in College of Engineering Honors; and junior standing or higher.

ENES481 Engineering Honors Seminar II (1 Credit)
Introduction to engineering creativity and innovation in engineering. Application of methods of creativity to topics in communication, conducting research, and leadership.
Restriction: Must be in College of Engineering Honors; and junior standing or higher.

ENES489 Special Topics in Engineering (3-6 Credits)
Special topics in engineering.
Prerequisite: Permission of ENGR-A. James Clark School of Engineering.
Repeatable to: 6 credits if content differs.

ENES490 QUEST Capstone Professional Practicum (4 Credits)
The capstone course for the QUEST Honors Program provides students with an opportunity to learn in multidisciplinary teams of business, engineering, and science students in a real-world setting. Companies engage teams of QUEST students with real organizational challenges and dedicate resources to help students address these problems. Student teams must enhance their skills in quality management, process improvement, and systems design and will apply these to add value to a client. In the process, students will improve their teamwork skills.
Prerequisite: ENES390 or BMGT390. Cross-listed with: BMGT490.
Credit Only Granted for: BMGT490 or ENES490.

ENES491 Scoping Experiential Learning Projects (3 Credits)
QUEST students cultivate relationships with new and current corporate partners and prepare project scopes for QUEST's introductory course, BMGT/ENES 190H, and capstone course, BMGT/ENES 490H. Requires independent work communicating with clients and class visits to a variety of potential project sites.
Prerequisite: BMGT190 or ENES190.
Restriction: Restricted to QUEST Program (TQMP) students. Cross-listed with: BMGT491.
Credit Only Granted for: BMGT491 or ENES491.

ENES498 Special Topics in Entrepreneurship (3 Credits)
This entrepreneurship seminar and case study-based course will explore technology entrepreneurship with a focus on leadership, marketing, team-building, and management of new technology ventures and assumes baseline knowledge of entrepreneurship. Students will learn skills needed to succeed as a technology entrepreneur and how to apply best practices for planning, launching, and growing new companies. This course is a requirement of the Hinman CEOs program.
Restriction: Must be in Hinman CEOs Program.
Repeatable to: 12 credits if content differs.

ENES499 Senior Projects in Engineering (3 Credits)
Students will work in large teams to solve a multidisciplinary research/design problem. The course will begin with students identifying opportunities, brainstorming project concepts to address these opportunities, applying lean startup and design thinking strategies, and then selecting/proposing a project for the semester. Acceptable projects will require the multidisciplinary design, construction and testing of a project within limited budget and time constraints.
Prerequisite: Permission of ENGR-A. James Clark School of Engineering; and completion of all 1XX and 2xx level (lower-division) technical courses in engineering major with a C- or better.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.
Repeatable to: 6 credits if content differs.

ENES601 Future Faculty Program Seminar I (1 Credit)
Introduction to and development of skills necessary to obtain and succeed in a university faculty position. Emphasis on technical writing and effective presentations. Discussion of research diversification, networking, ethics and professionalism.
Restriction: Must be in the Clark School Future Faculty Program.

ENES602 Future Faculty Program Seminar II (1 Credit)
Effective teaching techniques. Basic principles of education and learning. Developing a course; promoting active learning, problem solving and critical thinking; designing exam and assignments; and communicating effectively with students.
Restriction: Must be in the Clark School Future Faculty Program.

ENES603 Future Faculty Program Seminar III (1 Credit)
Developing a successful faculty research program. Establishing and maintaining a research group. Finding funding opportunities and writing grant proposals. Mentoring graduate students. Faculty position application process. Preparing research and teaching statements.
Restriction: Must be in the Clark School Future Faculty Program.

ENES604 Future Faculty Program Teaching Practicum (1 Credit)
Graduate students will co-teach a course under supervision of a faculty mentor. Graudate students will be involved in all aspects of the course including development of syllabus, presenting lectures, writing and grading examiniations, and evaluating the students in the course.
Prerequisite: ENES602.
Restriction: Must be a graduate student in the Clark School Future Faculty Program; and students for whom English is not the native language must pass the Maryland English Institute ITA Evaluation prior to enrolling in this course.

ENES658 Special Topics in Engineering in a Global Context (1-3 Credits)
Advanced topics in engineering in a global context.
Restriction: Graduate standing or permission of instructor.
Repeatable to: 12 credits if content differs.

ENES660 Fundamentals of Product Management (3 Credits)
Provides a comprehensive survey of product management and its growing role in producing technology-driven products that customers love. Guides students through the product lifecycle and market lifecycle, diving into the competencies needed at each stage. Topics include startup and corporate strategy, product strategy, vision setting and evangelism, development lifecycle approaches based on customer involvement and product stage, the various types of innovation at each stage of the lifecycle, and how the product manager leads the team through it all. Learn the basics of customer discovery, product discovery, product delivery, and the core-context model for managing products through maturity.
Restriction: Must be in the Product Management Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENES662 Innovative Ideas and Concept Development (3 Credits)
Enables aspiring entrepreneurs to understand the content, methods, and models for new venture opportunity assessment and analysis. Focuses on how to identify and analyze entrepreneurial opportunities for technology-based ventures by first understanding the personal self and decision-making factors. Explores how to evaluate new venture opportunities and challenges within industries and markets.
Restriction: Must be in the Technology Entrepreneurship and Corporate Innovation Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENES663 Strategies for Managing Innovation (3 Credits)
Emphasizes how innovative leaders can use strategic management of innovation and technology to enhance firm performance. It helps students to understand the process of technological change; the ways that firms come up with innovations; the strategies that firms use to benefit from innovation; and the process of formulating technology strategy. It provides frameworks for analyzing key aspects of these industries and teaches students how to apply these frameworks.
Restriction: Must be in the Product Management or the Technology Entrepreneurship and Corporate Innovation Master of Professional Studies programs; or permission of Maryland Technology Enterprise Institute.

ENES664 Business Modeling and Customer Validation (3 Credits)
Focuses on how to create and deliver value for customers and extract value for the new venture. Develop business models that encompass the product or service, customers, and the economic engine to meet the venture's financial and growth objectives. Introduces a structured way to think about, analyze, and develop a sound business model that is customer validated.
Restriction: Must be in the Product Management or the Technology Entrepreneurship and Corporate Innovation Master of Professional Studies programs; or permission of Maryland Technology Enterprise Institute.

ENES665 Innovative Thinking (3 Credits)
Introduces students to new and powerful tools to boost their creative problem solving skills. Participants re-discover their communication and teaming skills. Students unlock their creativity potential, and explore win-win approaches to define and solve problems of different kinds. Students are also introduced to topics related to intellectual property.
Restriction: Must be in the Product Management or the Technology Entrepreneurship and Corporate Innovation Master of Professional Studies programs; or permission of Maryland Technology Enterprise Institute.

ENES666 Creative Design, Prototyping, and Testing (3 Credits)
Transition from creative, innovative, design thinking methods to prototyping and concept testing of products and services. Learn how to translate ideas into marketable offerings to create real value for customers and the new venture. Emphasis is placed on an integrated and interdisciplinary approach to engineering design, concurrent engineering, design for manufacturing, industrial design, and the business of new product development. Topics include design methods, modeling and simulation, material and manufacturing process selection, platform and modular design, mass customization, planning and scheduling, and business issues, teamwork, group dynamics, creativity, and innovation.
Restriction: Must be in the Technology Entrepreneurship and Corporate Innovation Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENES667 Market Development and Commercialization (3 Credits)
Provides an orientation to key marketing concepts critical to marketing technology-based products and services. Learn to identify market opportunities, understand customer preferences, evaluate market acceptance, and devise the appropriate going to market strategies for the new venture.
Restriction: Must be in the Product Management or the Technology Entrepreneurship and Corporate Innovation Master of Professional Studies programs; or permission of Maryland Technology Enterprise Institute.

ENES668 Corporate Technology Entrepreneurship (3 Credits)
Focuses on the role of entrepreneurial individuals inside of existing technology organizations. Explores developing and leading innovation inside the firm. Discusses stages of innovation in the corporate entrepreneurship process and dynamics of organizational structure, politics, decisions, financing, and personal styles.
Credit Only Granted for: ENPM 808N or ENES 668.
Formerly: ENPM 808N.

ENES670 Financial Management and New Venture Financing (3 Credits)
Provides the essential tools and skills to build a strong financial foundation for a new technology venture. Examines accounting principles as well as methods for keeping firm financial control of the venture. Discusses navigating the multitude of financial barriers that may block entrepreneurial success, as well as how to raise the right amount of capital at the right time from the right source.
Restriction: Must be in the Technology Entrepreneurship and Corporate Innovation Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENES671 Legal Aspects of Entrepreneurship (3 Credits)
Explores critical legal and business issues entrepreneurs face as they build and launch a new venture. Examines real world scenarios, and addresses the legal issues at all of the important junctures along the path to success. Significant attention placed on new venture formation, intellectual property management, and financing arrangements.
Restriction: Must be in the Technology Entrepreneurship and Corporate Innovation Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENES672 Launching Technology Startup Ventures (6 Credits)
Explores the processes and skills needed to launch and manage technology startup ventures. Learn how to apply best practices for planning, launching, and leading new companies. Discusses a wide range of issues of importance and concern to entrepreneurs, to include how to navigate uncertainty.
Restriction: Must be in the Technology Entrepreneurship and Corporate Innovation Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENES673 Financing the Product Life Cycle (3 Credits)
Provides the essential tools and skills to build a strong financial foundation for designing, developing, and managing new products within established companies and organizations. Examines accounting principles as well as methods for managing the financials of the product. Discusses navigating the multitude of financial barriers that may block success, as well as how to raise the right amount of capital at the right time from the right source, with an emphasis on internal company financing.
Restriction: Must be in the Product Management Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENES674 Managing Product Development and Operations (3 Credits)
Explores the evolution of modern management methods for operations and product development. Evaluates production and operation methods from inception to factory-based models of productivity, through the quality and lean movements, to the explosion of productivity with modern approaches. Focuses on how to effectively run large-scale agile teams with agile engineering at its core.
Restriction: Must be in the Product Management Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENES676 Negotiation and Problem-Solving (3 Credits)
Explores key negotiation techniques, how to apply these techniques, and their application to real-world scenarios. Establishes an understanding of deal-making, and creates a foundation for exploring the concepts of agreements, contracts, conflicts, and how the resulting transactions formed the foundation for modern scaled economies. Examines reputation effects, customer lifetime value, the basics of civil and criminal law, and how these have formed to constrain our interactions in modern society.
Restriction: Must be in the Product Management Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENES677 Data Analysis and Decision Making (3 Credits)
Provides a comprehensive understanding of making decisions under uncertainty for products, portfolios, and programs across various industries and environments. Focuses on the use of Bayesian methods for informing decisions on products and programs when directing experiments. Examines the testing of product ideas throughout the lifecycle, from customer discover, to product discovery, to product design and optimization, to channel testing and marketing for growth.
Restriction: Must be in the Product Management Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENES680 Building and Leading Innovative Organizations (3 Credits)
Focuses on building a product enterprise through lean product portfolio management. Defines the conceptual groundwork that enables achieving the vision of a customer-centric value creation business model centered around lean principles. Explains the details of building a scaled product enterprise and explores alignment of organizational support functions with a product framework that lays the pathway for a sustainable value maximizing enterprise at scale.
Restriction: Must be in the Product Management Master of Professional Studies program; or permission of Maryland Technology Enterprise Institute.

ENFP - Engineering, Fire Protection

ENFP405 Structural Fire Protection (3 Credits)
Effects of elevated temperature on structural materials; steel, concrete, wood, gypsum, glass and reinforced plastics. Experimental evaluation of fire resistance of building assemblies. Analytical methods to evaluate fire resistance of structural members.
Prerequisite: ENES220.
Restriction: Must be in Engineering: Fire Protection program; and permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: ENFP405 or ENFP621.

ENFP410 Special Hazard Suppression Systems (3 Credits)
Analysis of application and theory of fire suppression systems. The key elements of fire suppression systems will be discussed along with how they interact for effective fire suppression design. Physical mechanisms for a variety of fire suppression approaches will be discussed including hose streams, sprinklers, water mist, foam, clean agents, and chemical agents.
Prerequisite: ENFP310 and ENFP312.
Restriction: Permission of ENGR-Fire Protection Engineering department. Jointly offered with: ENFP610.
Credit Only Granted for: ENFP410, ENFP610 or ENFP653.

ENFP411 Risk-Informed Performance Based Design (3 Credits)
Appraisal and measurement of fire safety. Application of systems analysis, probability theory, engineering economy and risk management in the identification and synthesis of components of fire protection engineering. Methods for the development of criteria for the design, evaluation and assessment of fire safety or component hazards.
Restriction: Senior standing; or permission of ENGR-Fire Protection Engineering department.

ENFP413 Human Response to Fire (3 Credits)
Fractional effective dose (FED) methods for predicting time to incapacitation and death of fires for use in fire safety calculations. Physiology and toxicology of the fire effluent components, decomposition chemistry of common materials, standard experimental approaches. Predictive models of material production rates. People movement characteristics related to building evacuation. Formulation and application of evacuation models. Human behavior factors affecting response of people to fire situations.
Prerequisite: ENFP250.
Restriction: Permission of ENGR-Fire Protection Engineering department. Jointly offered with ENFP613.
Credit Only Granted for: ENFP413 or ENFP613.

ENFP415 Fire Dynamics (3 Credits)
Designed to give students a quantitative understanding of fire behavior. The fundamentals of physics and chemistry of combustion are presented and used to derive key analytical relationships that describe fire growth. Application of these relationships to the analysis of common fire scenarios is emphasized.
Prerequisite: ENFP312.
Restriction: Permission of ENGR-Fire Protection Engineering department. Jointly offered with ENFP651.
Credit Only Granted for: ENFP415 or ENFP651.

ENFP420 Fire Assessment Methods and Laboratory (4 Credits)
Experimental evaluation of ignition, flame spread, rate of heat release and smoke production of flammable gases, liquids, solids, and interior finish materials. Analytical and computer methods for the design, performance, and analysis of fire experiments. Preparation of laboratory reports.
Prerequisite: Student must have senior standing; and minimum grade of C- in ENFP312.
Restriction: Must be in Engineering: Fire Protection program.
Credit Only Granted for: ENFP320 or ENFP420.
Formerly: ENFP320.

ENFP425 Enclosure Fire Modeling (3 Credits)
An introduction to enclosure fire dynamics through the development of fire modeling algorithms and the application of computer-based fire modeling techniques. The objectives of the course are: to provide a basic understanding of enclosure fire dynamics with an emphasis on a system-level viewpoint (i.e., a global description of the coupling between combustion dynamics, smoke filling, vent flows and heat transfer); and to provide an introduction to the zone modeling approach. Topics covered include a review of the mathematical formulation of zone models, a discussion of numerical integration of the zone modeling equations (using MATLAB), and an introduction to zone modeling software used by professional engineers (e.g., CFAST).
Prerequisite: ENES232, ENFP300, and ENFP312.
Restriction: Must be in Engineering: Fire Protection program; and senior standing; and permission of ENGR-Fire Protection Engineering department.

ENFP426 Computational Methods in Fire Protection (3 Credits)
Introduction to computer-based fire modeling: zone modeling and Computational Fluid Dynamics (CFD); documentation of input data, validation and verification tests.
Recommended: ENFP425.
Restriction: Permission of ENGR-Fire Protection Engineering department.

ENFP429 Independent Studies (1-3 Credits)
For students who have definite plans for individual study of approved problems, or study of an advanced topic selected in conjunction with the faculty.
Prerequisite: Permission of ENGR-Fire Protection Engineering department.
Restriction: Must be in Engineering: Fire Protection program.
Repeatable to: 6 credits if content differs.

ENFP440 Smoke Management and Fire Alarm Systems (3 Credits)
Analysis of hazard posed by smoke in buildings. Performance characteristics of smoke management systems. Review of analytical design aids. Functional analysis and design of fire detection and alerting systems. Examination and evaluation of code criteria, performance specifications and research.
Prerequisite: Must have completed with a C- or better or concurrently be enrolled in ENFP300.
Restriction: Permission of ENGR-Fire Protection Engineering department. Jointly offered with: ENFP627.
Credit Only Granted for: ENFP440 or ENFP627.

ENFP461 Think Tank (3 Credits)
Designed to have the student apply critical thinking in both engineering and business terms through a unique combination of student-driven, competition-based, long-term, targeted learning.
Recommended: Junior standing in fire protection engineering.

ENFP464 Industrial Fire Safety (3 Credits)
Designed to introduce students to the basics of process safety with a focus on the methods and techniques that may be utilized when evaluating the existing or proposed safety protection solutions in industrial facilities. An emphasis is placed on properly identifying the hazards that are present, the risk exposure, and how best to address the risk. The foundation is laid by presenting the necessary background information on industrial processes and integrating this information with applicable fire/explosion safety science.
Prerequisite: Students must be of senior standing.
Restriction: Permission of ENGR-Fire Protection Engineering department. Also offered as: ENFP664.
Credit Only Granted for: ENFP464, ENFP489I, ENFP629I OR ENFP664.
Formerly: ENFP489I.
Additional Information: The course will be taught as a dual senior-level undergraduate course and graduate course.

ENFP465 Fire and Explosion Investigations (3 Credits)
This course covers many aspects of fire and explosion investigation and reconstruction. Information on field techniques, applicable standards, and best practices are presented with an emphasis on how fire science and fire dynamics can be applied to forensic analysis. Experiments are performed and analyzed to demonstrate the concepts.
Prerequisite: Student should have senior standing.
Restriction: Permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: ENFP489N, ENFP629N OR ENFP665.
Formerly: ENFP489N.
Additional Information: The course will be taught as a shared senior-level undergraduate course and graduate course.

ENFP467 Wildland Fires: Science and Applications (3 Credits)
Introduction to the global problem of wildland fires with an overview of the social, political and environmental issues posed as well as detailed coverage of the science, technology and applications used to predict, prevent and suppress wildland fires.
Prerequisite: ENFP312.
Restriction: Must be in Engineering: Fire Protection program; and permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: ENFP489W, ENFP629W, or ENFP667.
Formerly: ENFP489W.

ENFP489 Special Topics (3 Credits)
Selected topics of current importance to fire protection.
Prerequisite: Permission of ENGR-Fire Protection Engineering department.
Repeatable to: 6 credits.

ENFP601 Introduction to Fire Protection Engineering (3 Credits)
The basic concepts of life safety, water-based fire protection systems, building construction, codes and standards along with tenability, fire behavior, and human behavior are introduced along with traditional and performance-based approaches for analyzing human response to fire. Students learn to analyze the egress systems and design basic water-based fire suppression systems.
Additional Information: Highly recommended to incoming graduate students to Fire Protection Engineering who have not earned a Bachelor's Degree in Fire Protection Engineering.

ENFP610 Advanced Special Hazard Suppression Systems (3 Credits)
Issues related to the suppression of fires and the design of fire suppression systems. Theoretical aspects of fire suppression and extinction are considered to provide the foundation for the practical design of different types of fire suppression systems. Focus on water-based and "clean agent" fire suppression systems, with emphasis on high challenge and special hazard applications. Systems using other agents are introduced, but are not addressed in detail.Jointly offered with: ENFP410.
Credit Only Granted for: ENFP410, ENFP610 or ENFP653.

ENFP611 Fire Induced Flows (3 Credits)
Theoretical basis is presented for fire induced bouyancy driven flows. Plumes, ceiling jets, vent flows, compartment flows. Dimensional analysis for correlations and scale model applications. Smoke movement and combustion products.
Prerequisite: ENFP415.

ENFP613 Advanced Life Safety Analysis (3 Credits)
Fractional effective dose (FED) methods for predicting time to incapacitation and death of fires for use in fire safety engineering calculations. Physiology and toxicology of fire effluent components, decomposition chemistry of common materials, standard experimental approaches. Predictive models of material production rates. People movement characteristics related to building evacuation. Formulation and application of evacuation models. Human behavior factors affecting response of people to fire situations.
Restriction: Permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: ENFP413 or ENFP613.

ENFP619 Graduate Seminar (1-3 Credits)
Prerequisite: Permission of ENGR-Fire Protection Engineering department.
Restriction: Must be in ENGR: MS Only-Fire Protection Engineering (Master's) program.
Repeatable to: 3 credits.

ENFP620 Fire Dynamics Laboratory (3 Credits)
Laboratory experiments are designed to illustrate fire phenomena and test theoretical models. Diffusion flames, ignition and flame spread on solids, liquid pool fires, wood crib fires, fire plumes, compartment fires.
Recommended: ENFP415.

ENFP621 Analytical Procedures of Structural Fire Protection (3 Credits)
Analysis procedures for structural components of wood, steel, concrete, composites. Structural capabilities, modifications under fire induced exposures. Calculations, computer models for predicting fire resistance ratings of structural components.
Prerequisite: ENFP312. Cross-listed with ENFP621.
Credit Only Granted for: ENFP405 or ENFP621.

ENFP625 Advanced Fire Modeling (3 Credits)
Validity, utility, reliability of current computer models. Applications of models in risk assessment, underwriting, loss prediction, hazard analysis. Development and validation of specific application models.
Prerequisite: Permission of ENGR-Fire Protection Engineering department.

ENFP626 Computational Fire Modeling (3 Credits)
Introduction to Computational Fluid Dynamics (CFD)-based fire modeling; governing equations of turbulent reacting flows; numerical approaches to the treatment of turbulence (DNS, LES, RANS); numerical methods for partial differential equations; physical modeling of enclosure fires (turbulence, combustion, thermal radiation, pyrolysis, suppression). Development of sample programs (Matlab) and use of current CFD-based fire models (FDS).
Prerequisite: ENFP300 and ENFP312.
Restriction: Permission of ENGR-Fire Protection Engineering department.

ENFP627 Smoke Detection and Management (3 Credits)
Analysis of hazard smoke. Response analysis of smoke detectors based on characteristics of detectors and properties of smoke. Performance characteristics and limitations of smoke management systems. Capabilities and limitations of analytical design aids.
Prerequisite: ENFP300. Jointly offered with: ENFP440.
Credit Only Granted for: ENFP627 or ENFP440.

ENFP629 Selected Topics (3-6 Credits)
Current research, studies in fire protection engineering. Future trends and significant changes in research, professional areas. The professional standards process.
Prerequisite: Permission of ENGR-Fire Protection Engineering department.
Restriction: Must be in ENGR: MS Only-Fire Protection Engineering (Master's) program.
Repeatable to: 6 credits.

ENFP630 Diffusion Flames and Burning Rate Theory (3 Credits)
Basic principles of diffusion flames for gaseous, liquid, and solid fuels. Droplet burning, B number, jet combustion, boundary layer combustion, generalized methods.
Prerequisite: ENFP312.

ENFP649 Special Problems (1-3 Credits)
Advanced topics selected by the faculty from the current literature to suit the special needs and background of students, or for individual students who have definite plans of individual study.
Restriction: Must be in ENGR: MS Only-Fire Protection Engineering (Master's) program; and permission of instructor; and permission of ENGR-Fire Protection Engineering department.
Repeatable to: 6 credits if content differs.

ENFP651 Advanced Fire Dynamics (3 Credits)
A review of the basic chemistry and physics necessary to understanding fire dynamics; and of the physics of heat transfer and turbulent fluid flow will be given. The nature and structure of premixed and diffusion flames will be presented.
Prerequisite: ENFP312. Jointly offered with: ENFP415.
Credit Only Granted for: ENFP629A, ENFP651 or ENFP415.
Formerly: ENFP629A.

ENFP652 Fire Assessment Methods (3 Credits)
This on-line course offers a comprehensive review of experimental techniques to assess fire performance characteristics of materials, products and assemblies.
Credit Only Granted for: ENFP629B or ENFP652.
Formerly: ENFP629B.

ENFP653 Advanced Fire Supression (3 Credits)
Issues related to the suppression of fires and the design of fire suppression systems. Theoretical aspects of fire suppression and extinction are considered to provide the foundation for the practical design of different types of fire suppression systems. Focus on water-based and "clean agent" fire suppression systems, with emphasis on high challenge and special hazard applications. Systems using other agents are introduced, but are not addressed in detail.
Restriction: Permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: ENFP410, ENFP610, or ENFP653.

ENFP654 Fire Suppression Sprays (3 Credits)
Fire suppression mechanisms and goals are presented as a basis for fire suppression spray and nozzle designs. Basic spray formation theory is presented describing how sprays are generated by fire suppression nozzles (e.g. sprinklers). Methods and techniques are introduced for measuring and analyzing sprays based on their stochastic characteristics. Basic equations for evaluating the dispersion and coverage performance of sprays are presented.
Recommended: ENFP300 and ENFP312.

ENFP655 Smoke Control (3 Credits)
Introduces the student to smoke control needs, design approaches and analytical methods. Students should develop an understanding of the performance characteristics and limitations of smoke control systems and the capabilities and limitations of analytical design aids. This course gives students an opportunity to integrate a broad range of information from previous courses with material from this course, such as fluid mechanics, heat transfer, and fire dynamics, and fire modeling. Students will review data from past experimental programs and apply computer model(s).
Restriction: Permission of Maryland Applied Graduate Engineering.

ENFP661 Forensic Fire Analysis (3 Credits)
This on-line course addresses the forensic analysis of structural fire incidents in terms of enclosure fire dynamics and the impact of fire safety subsystems used to prevent or mitigate the consequences of fire. These subsystems include: ignition prevention, material flammability and flame spread, fire detection and alarm, fire suppression, smoke movement and management, structural fire protection and egress systems. Failures in these subsystems are addressed in terms of differences between expected and observed performance.
Credit Only Granted for: ENFP629D or ENFP661.
Formerly: ENFP629D.

ENFP662 Performance Based Design (3 Credits)
This on-line course demonstrates how fire science can be used to solve fire protection problems in the built environment and will provide an understanding of their performance-based design process, deterministic and risk-based analysis techniques, development of design fire scenarios, trial design development and analysis, and building lifecycle management.
Credit Only Granted for: ENFP629E or ENFP662.
Formerly: ENFP629E.

ENFP663 Advanced Fire Risk Modeling (3 Credits)
This on-line course addresses the fundamentals of fire risk modeling from both theoretical and applied perspectives.
Credit Only Granted for: ENFP629R or ENFP663.
Formerly: ENFP629R.

ENFP664 Advanced Industrial Fire Safety (3 Credits)
This class is designed to introduce students to the basics of process safety with a focus on the methods and techniques that may be utilized when evaluating the existing or proposed safety protection solutions in industrial facilities. An emphasis is placed on properly identifying the hazards that are present, the risk exposure, and how best to address the risk. The foundation is laid by presenting the necessary background information on industrial processes and integrating this information with applicable fire/explosion safety science.Jointly offered with ENFP464.
Credit Only Granted for: ENFP489I, ENFP62 9I, ENFP464, or ENFP664.
Formerly: ENFP489I and ENFP629I.

ENFP665 Advanced Fire and Explosion Investigations (3 Credits)
This course covers many advanced aspects of fire and explosion investigation and reconstruction. Information on field techniques, applicable standards, and best practices are presented with an emphasis on how advanced fire science and fire dynamics can be applied to forensic analysis. Experiments are performed and analyzed to demonstrate the concepts.
Restriction: Permission of the Fire Protection Engineering department. Jointly offered with: ENFP465.
Credit Only Granted for: ENFP629N, ENFP489N OR ENFP465.
Formerly: ENFP629N.
Additional Information: The course will be taught as a shared senior-level undergraduate course and graduate course.

ENFP667 Advanced Wildland Fires: Science and Applications (3 Credits)
Introduction to the global problem of wildland fires with an overview of the social, political and environmental issues posed as well as detailed coverage of the science, technology and applications used to predict, prevent and suppress wildland fires.
Prerequisite: ENFP312.
Restriction: Permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: ENFP489W, ENFP629W, or ENFP467.
Formerly: ENFP629W.

ENFP671 Material Flammability (3 Credits)
Introduction to the science and technology of polymeric materials. Standard methods for assessment of fire hazards associated with these materials are reviewed. Fundamental mechanisms defining polymer combustion in various scenarios are elucidated.
Recommended: Completion of ENFP415 or ENFP651 and ENFP320 or ENFP420 recommended.
Restriction: Permission of ENGR-Fire Protection Engineering department.
Credit Only Granted for: ENFP629M or ENFP671.
Formerly: ENFP629M.

ENFP799 Master's Thesis Research (1-6 Credits)
Development and completion of Master's Thesis.
Prerequisite: Permission of ENGR-Fire Protection Engineering department.
Recommended: Completion of ENFP graduate requirements.
Repeatable to: 6 credits.

ENGL - English

ENGL402 Chaucer (3 Credits)
Works read in Middle English. Readings may include Canterbury Tales, Troilus and Criseyde, dream visions, lyrics.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL403 Shakespeare: The Early Works (3 Credits)
Close study of selected works from the first half of Shakespeare's career. Generic issues of early histories, comedies, tragedies. Language, theme, dramatic technique, sources, and early modern English social-historical context.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL404 Shakespeare: The Later Works (3 Credits)
Close study of selected plays from the second half of Shakespeare's career. Generic issues of later tragedies, later comedies, romances. Language, theme, dramatic technique, sources, and early modern English social-historical context.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL408 Literature by Women Before 1800 (3 Credits)
Selected writings by women in the medieval and early modern era.
Prerequisite: Must have completed two English courses in literature; or permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies.
Repeatable to: 9 credits if content differs. Cross-listed with: WGSS408.
Formerly: WMST408.

ENGL409 Study Abroad Special Topics IV (1-6 Credits)
Special topics course taken as part of an approved study abroad program.
Repeatable to: 15 credits if content differs.

ENGL410 Edmund Spenser (3 Credits)
Selected works of Edmund Spenser in their literary, social, and historical contexts. Special attention to The Faerie Queene; also sonnets and lyric poetry.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL412 Literature of the Seventeenth Century, 1600-1660 (3 Credits)
Works from early Stuart through Interregnum period. Major literary genres in historical contexts. Writers such as Donne, Jonson, Mary Wroth, Bacon, Browne, and Marvell.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL414 Milton (3 Credits)
Poetry and major prose in their social, political, and literary-historical contexts. Special attention to Paradise Lost. Other works may include Samson Agonistes and shorter poems.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL416 Literature of the Eighteenth Century, 1700-1750 (3 Credits)
British literary traditions, including the poetry of Pope, the prose of Swift, the correspondence of Montagu, the drama of Gay, and early novels by Defoe, Richardson, and Fielding.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL420 English Romantic Literature (3 Credits)
British poetry, drama, fiction, and criticism c.1790 to c.1830, a period of dramatic social change and revolution in literature, philosophy, the arts, industry, and politics. Authors include Austen, Wordsworth, Coleridge, Keats, Byron, Percy, and Mary Shelley.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL422 English Victorian Literature (3 Credits)
A survey of English literature of the Victorian period. Writers may include Arnold, Browning, Tennyson, Dickens, George Eliot, Carlyle, Ruskin, Newman, and Wilde.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL425 Modern British Literature (3 Credits)
Major Modernist writers in English prose and poetry since 1900. Such writers as Eliot, Larkin, Forster, Burgess, Durrell, Henry Green, Golding, Auden, Malcolm Lowry, Joyce, and Yeats.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL428 Seminar in Language and Literature (3 Credits)
Topics will vary each semester. The course will provide a seminar experience in material or methodologies not otherwise available to the major.
Restriction: Junior standing or higher; and must be in the English Honors program or gain permission from the department.
Repeatable to: 12 credits if content differs.

ENGL429 Independent Research in English (1-6 Credits)
An advanced independent research project for qualified students, supervised by an English faculty member, on a topic not ordinarily covered in available courses.
Prerequisite: ENGL301; and two English courses (excluding fundamental studies requirement); and permission of ARHU-English department.
Restriction: Sophomore standing or higher.
Repeatable to: 9 credits if content differs.

ENGL430 Literature of the Americas from First Contact to Revolution (3 Credits)
Examines the literature of the cultural encounters, colonialisms, empires, and independence movements in the early Americas from 1492 through the eighteenth century. Writers typically include Christopher Columbus, John Smith, Anne Bradstreet, Jonathan Edwards, William Byrd, Olaudah Equiano, Phillis Wheatley, and Benjamin Franklin.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL431 American Literature: Revolution to Civil War (3 Credits)
An examination of nationalism, sentimentalism, and romanticism, with writings focusing on such topics as slavery and democracy during the 1770s to 1860s. Authors typically include Ralph Waldo Emerson, Margaret Fuller, Emily Dickinson, Walt Whitman, Frederick Douglass, Harriet Beecher Stowe, Edgar Allan Poe, Nathaniel Hawthorne, and Herman Melville.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL432 American Literature: 1865 to 1914, Realism and Naturalism (3 Credits)
Reconstruction, Realism, Naturalism. Representative writers such as Dickinson, James, Dreiser.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL433 American Literature: 1914 to the Present, the Modern Period (3 Credits)
Modernism, Postmodernism. Writers such as Stevens, Stein, Ellison.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL435 American Poetry: Beginning to the Present (3 Credits)
Selections of American poetry, from Bradstreet to contemporary free verse. Authors such as Whitman, Dickinson, Bishop, Hughes, Rich, and Frost.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL437 Contemporary American Literature (3 Credits)
Prose, poetry, drama of living American writers. Current cultural and social issues.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL438 Selected Topics in Media Studies (3 Credits)
Advanced study of a topic pertinent to how the material production, technologies, and cultural practices of diverse types of media shape meaning.
Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English department.
Recommended: At least one prior course in Media Studies.
Repeatable to: 9 credits if content differs.

ENGL439 Spotlight on Major Writers (3 Credits)
An intensive study of a single writer, or a handful of writers, to understand the shifts in the writer's craft and cultural influence, both past and present.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL440 The Novel in America to 1914 (3 Credits)
Survey of the American novel to World War I. Cultural and philosophical contexts; technical developments in the genre. Authors such as Melville, Wells Brown, James, Sedgwick, Chopin.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL444 Feminist Critical Theory (3 Credits)
Issues in contemporary feminist thought that have particular relevance to textual studies, such as theories of language, literature, culture, interpretation, and identity.
Prerequisite: WMST200, WGSS200, WMST250, WGSS250, or ENGL250. Cross-listed with: WGSS444.
Credit Only Granted for: ENGL444, WMST444 or WGSS444.
Formerly: WMST444.

ENGL446 Post-Modern British and American Poetry (3 Credits)
British and American poets from the 1930s to the present. Such poets as Auden, Williams, Plath, Brooks, Lowell, Wolcott, Ted Hughes, Bishop, Larkin, Jarrell, and Berryman.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL448 Literature by Women of Color (3 Credits)
Literature by women of color in the United States, Britain, and in colonial and post-colonial countries.
Prerequisite: Must complete two English courses in literature; or permission of the Harriet Tubman Department of Women, Gender, and Sexuality Studies.
Repeatable to: 9 credits if content differs. Cross-listed with: WGSS448.
Formerly: WMST448.

ENGL449 Selected Topics in U.S. Latinx Literature (3 Credits)
Advanced study of selected works by U.S. Latinx writers.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL451 Renaissance Drama II (3 Credits)
Drama in early decades of the seventeenth century. Playwrights include Jonson, Middleton, Marston, Webster, Beaumont and Fletcher. Tragedy, city comedy, tragicomedy, satire, masque. Pre-Civil War theatrical, political, and religious contexts.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL452 English Drama From 1660 to 1800 (3 Credits)
Restoration and eighteenth-century drama, with special attention to theater history, cultural influences, concepts of tragedy, comedy, farce, parody, and burlesque, as well as dramatic and verbal wit.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL453 Critical Theory in English Studies (3 Credits)
Examines our assumptions about literature, language, media, and culture by exploring how people have theorized key concepts and relations like language, materiality, meaning, representation, identity, and power. We will focus both on learning the history, arguments, and vocabularies of these theories and on evaluating their usefulness for helping us to understand the many kinds of texts (visual, aural, etc.) we study in English. Theoretical thinking will aid us in analyzing the forms texts take; the ideas texts record, challenge, or reinvent; and how texts make us think or feel about ourselves, others, and the world in which we live.
Prerequisite: Two English courses (excluding Fundamental Studies requirement); or permission of ARHU-English Department.

ENGL454 Modern Drama (3 Credits)
The history of modern British drama, from its roots in Chekhov and Ibsen, through the modernisms of Samuel Beckett and Bertolt Brecht, through the Angry Young Men of the 1950s, and right up to the present. Most plays will be from the last 40 years, by writers such as David Hare, Tom Stoppard, Lucy Kirkwood, Caryl Churchill, Roy Williams, Lucy Prebble, Alan Bennett, Brian Friel, Terrence Rattigan, Kwame Kwei-Armah, Sarah Kane, and Alice Birch. We will also look at how class, money, immigration, and the end of the Empire changed British plays over time. And we will consider modern theater architecture and production design as well as the directing instincts of, for instance, Peter Brook, Katie Mitchell, Marianne Elliott, and Nicholas Hytner.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL455 The Eighteenth-Century English Novel (3 Credits)
The origins and development of the British novel, from the late seventeenth century until the beginning of the nineteenth. Questions about what novels were, who wrote them, and who read them. Authors such as Behn, Defoe, Richardson, Fielding, Sterne, Smollett, Burney, Radcliffe, and Austen.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL456 The Nineteenth-Century English Novel (3 Credits)
Surveys major novels of the period. Attention to narrative form and realism; representations of gender and class; social contexts for reading, writing and publishing. Authors such as Austen, Bronte, Dickens, George Eliot, Trollope.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL457 The Modern Novel (3 Credits)
Modernism in the novel of the twentieth century. Such writers as Joyce, Lawrence, Murdoch, James, Forster, Faulkner, Hemingway, Fitzgerald, Ellison, Welty, Nabokov and Malamud.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL458 Literature by Women After 1800 (3 Credits)
Selected writings by women after 1800.
Prerequisite: Must have completed two English courses in literature; or permission of Harriet Tubman Department of Women, Gender, and Sexuality Studies.
Repeatable to: 9 credits if content differs. Cross-listed with: WGSS458.
Formerly: WMST458.

ENGL459 Selected Topics in LGBTQ+ Literatures and Media (3 Credits)
Advanced study of a topic pertinent to literary and cultural expressions of LGBTQ+ identities, positionalities, and analytics through an exploration of literature, art, and/or media.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL460 Archival Research Methods in English Studies (3 Credits)
Introduces approaches for doing archival research in English studies, exploring how researchers develop their scope and practices of study and how they access and use archival materials electronically and on site to further their research questions. Investigates a historical period, genre, or theme through the lens of manuscripts, ephemera, and other artifacts. Case studies vary by semester.
Prerequisite: Two English courses beyond the Fundamental Studies courses; or permission of ARHU-English Department.

ENGL461 Researching Literacy and Language (3 Credits)
Gain practical research experience as you learn to do qualitative research in literacy, writing, and language studies. Study reading, writing, and composing in a variety of contexts (for example, social media and other digital spaces, classrooms, writing centers, churches, workplaces or other community sites). Learn to design and conduct ethical, responsible research studies. Learn to collect data through methods such as interview, observation, and survey and to analyze that data through a variety of methods. Finally, learn to present your research through genres such as reports, posters, and/or presentations.
Prerequisite: Students must have satisfied Fundamental Studies Academic Writing requirement.
Credit Only Granted for: ENGL488R or ENGL461.
Formerly: ENGL488R.

ENGL462 Folksong and Ballad (3 Credits)
A cross-section of American folk and popular songs in their cultural contexts; artists from Bill Monroe to Robert Johnson.

ENGL463 Narrative Analysis Methods in English Studies (3 Credits)
Approaches to literary narrative analysis. Explores narrative theory as a research method for studying the fundamental categories of literary narrative--such as the narrator, character, plot, closure, and frames, as well as the nature of fictionality and the role of the reader--and for interpreting their deployment in individual literary works. We will use this method to examine particularly unusual and even radical fiction, so we can understand the meaning-making work accomplished by narrative form.
Prerequisite: Two English courses beyond Fundamental Studies; or permission of ARHU-English department.

ENGL466 Arthurian Legend (3 Credits)
Development of Arthurian legend in English and continental literature from Middle Ages to twentieth century. All readings in modern English.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL467 Creative Approaches to Digital Textuality (3 Credits)
Examines electronic literature and other aspects of the literary world online with a focus on experimental writing with computers. Topics may include digital fiction and storytelling, bots, book hacking, flash fiction, narrative in games, and artificial-intelligence-generated fiction, poetry, and art. No programming experience required.
Prerequisite: One English course beyond Fundamental Studies; or permission of ARHU-English department.

ENGL468 Selected Topics in Film Studies (3-9 Credits)
Advanced studies in various periods and genres of film.
Prerequisite: ENGL245, FILM245, CINE245, FILM283, or SLLC283; or permission of ARHU-English department.
Recommended: ENGL329, CMLT280, and ENGL245.
Repeatable to: 9 credits if content differs.

ENGL469 The Craft of Literature: Creative Form and Theory (3 Credits)
Examines various forms of poetry and/or fiction, emphasizing the practice of making literary art and the aesthetic and theoretical approaches that define it. Students will practice the elements of literary craft, producing and experimenting with a wide range of forms and conventions in poetry and/or fiction. They will also produce critical work that articulates and contextualizes theoretical approaches to the making of literary art.
Prerequisite: 2 ENGL courses in literature or creative writing; and have completed a 200-level creative writing workshop in ENGL. Or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL470 African-American Literature: From Slavery to Freedom (3 Credits)
Examines African-American literature from its beginnings to the early twentieth century, including genres ranging from slave narratives, pamphlets, essays, and oratory, to poetry and fiction. Our emphasis is on the interaction between literature and literary forms, on the one hand, and historical and political developments in the push toward emancipation, on the other.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL471 African-American Literature: 1910-1945 (3 Credits)
Emergence of modernism in African-American writing including debates over the definition of unique African-American aesthetics, with emphasis on conditions surrounding the production of African-American literatures.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL472 African-American Literature: 1945 to Present (3 Credits)
Transformation of African-American literatures into modern and postmodern forms. Influenced by World War II and the Civil Rights and Black Power movements, this literature is characterized by conscious attempts to reconnect literary and folk forms, the emergence of women writers, and highly experimental fiction.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL475 Postmodern Literature (3 Credits)
The origins and ongoing development of postmodern literature. Aspects of the "postmodern condition," such as the collapse of identity, the erasure of cultural and aesthetic boundaries, and the dissolution of life into textuality. The novel and other genres and media.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.

ENGL477 BookLab (3 Credits)
Historical, imaginative, and experiential introduction to different elements of books and bookmaking, including letterpress printing with traditional lead and wood (movable) type, different techniques for bindings, 3D printing, zines, making altered and treated books, and so on. Class-time will be a mix of discussion and hands-on activity. The course will culminate in each student designing and creating their own book object, which might take the form of an artist's book, chapbook, zine, an altered or treated book, or something else entirely. Taught with the resources and facilities available in the English department's BookLab.
Prerequisite: Two English courses; or permission of ARHU-English department.
Credit Only Granted for: ENGL428M, ENGL438P, ENGL479P, or ENGL477.
Formerly: ENGL428M, ENGL438P, ENGL479P.

ENGL478 Selected Topics in Literature before 1800 (3 Credits)
Advanced study of key topics in literary works from earlier historical periods.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL479 Selected Topics in Literature after 1800 (3 Credits)
Advanced study of key topics in literary works from later historical periods.
Prerequisite: Two English courses in literature; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL482 History of the English Language (3 Credits)
Examines the origins and development of the English language.
Prerequisite: ENGL280, LING200, or HESP120; or permission of ARHU-English department.

ENGL483 American English(es) (3 Credits)
Examines the diversity of dialects, registers, and jargons of English found in the United States, as well as their origins, structures, and functions in society.
Prerequisite: LING200, ENGL280, or HESP120; or permission of ARHU-English department.

ENGL484 Style and Grammar in Written English (3 Credits)
The linguistic analysis of written texts. Examines grammatical and discursive constructions above the level of the sentence and their functions in literary and non-literary texts. We will study narrative structure, authorial voice, genre, register, stance, viewpoint, empathy, surprise, and humor in language.
Credit Only Granted for: ENGL484 or LING402.

ENGL487 Principles and Practices of Rhetoric (3 Credits)
A seminar examining foundational concepts and approaches in the theory and practice of rhetoric in civic, professional, academic, and interpersonal settings; focusing on key issues in persuasion, argumentation, and eloquence in historical and contemporary contexts.

ENGL488 Topics in Advanced Writing (3 Credits)
Different genres of technical and professional writing including proposal writing, computer documentation, technical report writing, instruction manuals, etc. Students will analyze models of a genre, produce their own versions, test, edit and revise them.
Repeatable to: 9 credits if content differs.

ENGL489 Special Topics in Language and Rhetoric (3 Credits)
Special topics in language and rhetoric, such as discourse analysis, semantics, or cognitive linguistics; comparative rhetoric and rhetorical theory, digital rhetorics, women's and minority rhetorics, or the history of rhetoric.
Repeatable to: 9 credits if content differs.

ENGL491 Digital Rhetoric (3 Credits)
Examines the social significance of the ways digital texts are composed and circulated. Explores why it matters how the web is written and who does the writing, understanding the Internet as rhetorical from its content and communities to the code, protocols, and policies that control digital distribution. Includes active experimentation with digital tools so students can expand their theoretical understanding through critical making.
Prerequisite: Students must have satisfied the Fundamental Studies Academic Writing requirement.
Credit Only Granted for: ENGL489J, or ENGL491.
Formerly: ENGL489J.

ENGL492 Graphic Design and Rhetoric (3 Credits)
An exploration of the visual dimensions of texts and the skills involved in designing them well. Considers graphic design theory and history from a rhetorical perspective, working to understand and practice the use of symbol systems to express, inform, and advocate. Includes direct experimentation with the principles and techniques of graphic design.
Prerequisite: Students must have satisfied Fundamental Studies Academic Writing requirement.

ENGL493 Writing Genres as Social Action (3 Credits)
A rhetorical genre studies approach to understanding the work that texts do in the world. Examines issues of identity, power, and medium as they relate to writing in various contexts. Students analyze the texts, context(s), and social significance of a public, professional, digital, and/or advanced academic genre and produce writing that meets, modifies, and subverts expectations.
Recommended: Satisfactory completion of the professional writing requirement (FSPW).
Restriction: Must have earned a minimum of 60 credits.

ENGL494 Editing and Document Design (3 Credits)
Principles of general editing for clarity, precision and correctness. Applications of the conventions of grammar, spelling, punctuation and usage, and organization for logic and accuracy. Working knowledge of the professional vocabulary of editing applied throughout the course.
Prerequisite: ENGL393 or ENGL391; or students who have taken courses with comparable content may contact the department.

ENGL495 Independent Study in Honors (1-3 Credits)
Completion and presentation of the senior honors project.
Prerequisite: ENGL373 and ENGL370.
Restriction: Must be in English Language and Literature program; and candidacy for honors in English.

ENGL497 English at Work (3 Credits)
Examines how English majors put their academic knowledge and skills to work in professional workplaces after graduation. Students learn strategies to research careers, and they shadow a person in a career of interest for a day. Students learn to compose different professional genres to write and speak about and for professional development and advancement, including inquiry letters, technical descriptions, professional portfolios, and elevator pitches. Students will critically examine the learning they have done in their undergraduate coursework and compose a vision for bringing that learning to life in their future work.
Prerequisite: ENGL301; and an ENGL course at the 300-level or higher.
Restriction: Must have earned a minimum of 60 credits.

ENGL498 Advanced Fiction Workshop (3 Credits)
An advanced class in the making of fiction. Intensive discussion of students' own fiction. Readings include both fiction and essays about fiction by practicing writers. Writing short critical papers, responding to works of fiction, and to colleagues' fiction, in-class writing exercises, intensive reading, and thinking about literature, in equal parts, and attendance at readings.
Prerequisite: ENGL352; or permission of ARHU-English department.
Repeatable to: 9 credits if content differs.
Formerly: ENGL496.

ENGL499 Advanced Poetry Workshop (3 Credits)
An advanced class in the making of poetry. Intensive discussion of students' own poems. Readings include both poetry and essays about poetry by practicing poets. Writing short critical prose pieces, responding critically to colleagues' poems, in-class and outside writing exercises, and attendance at poetry readings.
Prerequisite: ENGL353; or permission of ARHU-English department.
Repeatable to: 9 credits.
Formerly: ENGL497.

ENGL601 Introduction to Graduate Studies (3 Credits)
An introduction to different elements of graduate work and an exploration of what it means to get a doctoral degree in English. Considers different career trajectories, in and outside of academia, as well as the future of higher education.

ENGL602 Critical Theory and Literary Criticism (3 Credits)
An introduction to critical theory and literary criticism, with an overview of major movements (including formalism, structuralism and poststructuralism, Marxism, psychoanalysis, and feminism). Designed to help graduate students assess the various ways of approaching and writing about literature.

ENGL607 Readings in the History of Rhetorical Theory to 1900 (3 Credits)
Earlier theories of effective written discourse surveyed historically and as influenced by ethical, technical, and social change.

ENGL609 Technologies of Writing (3 Credits)
ENGL 609 - Technologies of Writing: Readings in the technologies of writing systems, print, and new media.
Restriction: Permission of ARHU-English department.
Repeatable to: 9 credits if content differs.
Additional Information: May fulfill a requirement for the MA in English with a Concentration in Rhetoric and Composition.

ENGL611 Approaches to College Composition (3 Credits)
A seminar emphasizing rhetorical and linguistic foundations for the handling of a course in freshman composition.
Prerequisite: Permission of ARHU-English department.
Additional Information: Required for graduate assistants (optional to other graduate students).

ENGL612 Approaches to Professional and Technical Writing (3 Credits)
A pedagogical approach to professional and technical writing, its history and methodolgy.

ENGL618 Writing for Professionals (3 Credits)
Writing proposals, reports, manuals, policy statements, correspondence, etc. for typical government and business settings. Principles of rhetorical and linguistic analysis and techniques for managing the review process in large organizations.
Repeatable to: 9 credits if content differs.

ENGL619 Readings in Linguistics (3 Credits)
A survey of theoretical and applied linguistics.
Restriction: Permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL620 Readings in Medieval English Literature (3 Credits)

ENGL621 Readings in Renaissance English Literature (3 Credits)

ENGL622 Readings in Seventeenth-Century English Literature (3 Credits)

ENGL623 Readings in Eighteenth-Century English Literature (3 Credits)

ENGL624 Readings in English Romantic Literature (3 Credits)

ENGL625 Readings in English Victorian Literature (3 Credits)

ENGL626 Readings in American Literature before 1865 (3 Credits)

ENGL628 Readings in African American Literature (3 Credits)

ENGL629 Readings in Folklore, Folklife, and Myth (3 Credits)
Readings pertaining to various genres of folklore and myth such as oral narrative, epic poetry, ballad, folksong, belief, custom and material culture, with special attention given to the history of the study of folklore including fieldwork, interpretation and the political application of these materials. Explores issues of ethnicity, geography, religion, race, gender, and class, as well as the ongoing relations between orality, literacy, print, and other media.
Restriction: Permission of ARHU-English department.
Repeatable to: 6.0 credits if content differs.

ENGL630 Readings in 20th Century English Literature (3 Credits)

ENGL631 Readings in 20th Century American Literature (3 Credits)

ENGL638 Readings in Film as Text and Cultural Form (3 Credits)
An inquiry into theoretical approaches to the cinematic text that include studies of form, culture, reception, ideological formations, historical contextualizations, and the problematics of representation.
Repeatable to: 6 credits if content differs.

ENGL648 Contemporary American Literature (3 Credits)
A survey of American literature in the 21st Century.
Restriction: Permission of ARHU-English department.
Repeatable to: 9 credits.

ENGL649 Readings in Rhetoric, Composition, and Literacy (3 Credits)
Readings in Rhetoric, Composition, and Literacy. Special Topics in the theory and research of rhetoric, composition, and literacy
Restriction: Permission of ARHU-English department.
Repeatable to: 9 credits if content differs.
Additional Information: May fulfill requirement for MA in English with a Concentration in Rhetoric and Composition.

ENGL658 Readings in Multi-Ethnic Literatures of the Americas (3 Credits)
Highlights the cultural diversity of American literatures from various periods, including Latino/a, Native American, Asian American, and African American literatures within and beyond the United States.
Restriction: Permission of English Department.
Repeatable to: 9 credits if content differs.

ENGL659 Readings in Postcolonial Literatures and Theory (3 Credits)
Readings in post-colonial, diasporic, and trans-national theory and literature.
Restriction: Permission of ARHU-English department.
Repeatable to: 6 credits if content differs.

ENGL668 Readings in Modern Literary Theory (3-6 Credits)
Formerly: ENGL666.

ENGL679 Professional and Career Mentoring for Master's Students (1-3 Credits)
Augments advising currently provided by the English Department Graduate Studies Office. Individual professional and career mentoring for MA and MFA students from a faculty member.
Repeatable to: 6 credits if content differs.

ENGL688 Poetry Workshop (3 Credits)
Poetry workshop.
Prerequisite: Permission of ARHU-English department.

ENGL689 Fiction Workshop (3 Credits)
Fiction workshop.
Prerequisite: Permission of ARHU-English department.

ENGL699 Independent Study (1-3 Credits)
Restriction: Permission of instructor; and departmental approval of research project.

ENGL701 Paradigms of Theory (3 Credits)
Exploration of the works of four or five major critical thinkers who underwrite the study of theory in the academy today, with special attention to the diversity within critical theory.

ENGL702 Cultures of Theory (3 Credits)
An exploration of the socio-historic, material, and cultural contexts of various theoretical practices and traditions.
Prerequisite: Must have completed an introductory course in critical theory. Cross-listed with: CMLT702.
Credit Only Granted for: CMLT702 or ENGL702.

ENGL708 Seminar in Rhetoric (3 Credits)
Topics in rhetoric: history of rhetorical theory, modern rhetorical theory, rhetorical interpretation, composition theory, rhetoric of social groups.
Repeatable to: 9 credits if content differs.

ENGL718 Seminar in Medieval Literature (3 Credits)

ENGL719 Seminar in Renaissance Literature (3 Credits)

ENGL728 Seminar in Seventeenth-Century Literature (3 Credits)

ENGL729 Seminar in Eighteenth-Century Literature (3 Credits)

ENGL738 Seminar in Nineteenth-Century Literature (3 Credits)

ENGL739 Seminar in Nineteenth-Century Literature (3 Credits)

ENGL748 Seminar in American Literature (3 Credits)

ENGL749 Studies in Twentieth-Century Literature (3 Credits)

ENGL758 Literary Criticism and Theory (3 Credits)

ENGL759 Seminar in Literature and the Other Arts (3 Credits)

ENGL768 Studies in Genre (3 Credits)
Restriction: Permission of ARHU-English department.
Repeatable to: 9 credits if content differs.

ENGL775 Seminar in Composition Theory (3 Credits)
Readings and research in recent theories of effective writing.

ENGL776 Seminar in Modern Rhetorical Theory (3 Credits)
Seminar in Modern Rhetorical Theory. Theories and trends in twentieth and twenty-first century rhetorical theory
Restriction: Permission of ARHU-English department.
Additional Information: May fulfill seminar requirements for MA in English with Concentration in Rhetoric and Composition.

ENGL778 Seminar in Folklore and Myth (3 Credits)
Restriction: Permission of ARHU-English department.
Repeatable to: 6.0 credits if content differs.

ENGL779 Seminar in Language Study (3 Credits)
Seminar in linguistic aspects of literature and composition.

ENGL788 Studies in Poetic Form (3 Credits)
Repeatable to: 9 credits.

ENGL789 Form and Theory in Fiction (3 Credits)
A variety of prose modes (mediations, psychological studies, reportage myths, collage, magic realism, satire, etc.). Some of the writers to be read include Kafka, Cather, Barth, Kundera, and Barthelme.
Prerequisite: Permission of ARHU-English department.

ENGL798 Critical Theory Colloquium (1 Credit)
An intensive advanced exploration of current problems and issues in critical theory.
Prerequisite: A course in critical theory.
Repeatable to: 10 credits if content differs.

ENGL799 Master's Thesis Research (1-6 Credits)

ENGL809 Academic Publishing Worksop (1-2 Credits)
A workshop for the preparation of articles of other critical writing for publication in academic journals or other professional venues.
Restriction: Must be in a major within ARHU-English department; and permission of instructor.
Repeatable to: 8 credits if content differs.
Additional Information: Preference will be given to doctoral students beyond coursework.

ENGL819 Seminar in Themes and Types in English Literature (3 Credits)

ENGL828 Seminar in Themes and Types in American Literature (3 Credits)

ENGL829 Seminar in Postcolonial Literatures (3 Credits)
Postcolonial, transnational, and diasporic literatures in the Anglophone world.
Restriction: Permission of ARHU-English department.
Repeatable to: 6 credits if content differs.

ENGL878 Pedagogical Mentoring for Doctoral Students (1-3 Credits)
Pedagogical mentoring by roster faculty members for graduate students teaching 200-level literature courses.
Repeatable to: 12 credits if content differs.

ENGL879 Professional Mentoring for Doctoral Students (1-3 Credits)
Augments advising currently provided by the English Department Graduate Studies Office. Individual professional and career mentoring for PhD students from a faculty member.
Repeatable to: 12 credits if content differs.

ENGL888 Practicum in English Studies (1 Credit)

ENGL898 Pre-Candidacy Research (1-8 Credits)
Pedagogical mentoring by roster faculty members for graduate students teaching 200-level literature courses.
Repeatable to: 12 credits if content differs.

ENGL899 Doctoral Dissertation Research (1-8 Credits)

ENMA - Engineering, Materials

ENMA400 Introduction to Atomistic Modeling in Materials (3 Credits)
This is an introductory course designed to study atomistic modeling and simulation techniques used in materials research. This course covers the theories, methods, and applications of atomistic-scale modeling techniques in simulating, understanding, and predicting the properties of materials. Specific topics include: molecular statics using empirical force fields; quantum mechanical methods including density functional theory; molecular dynamics simulations; and Monte Carlo and kinetic Monte Carlo modeling.
Prerequisite: ENMA300, MATH206, and ENMA460.
Recommended: Basic knowledge in quantum mechanics (preferred but not required); basic knowledge in statistical mechanics (preferred but not required). Also offered as: ENMA600.
Credit Only Granted for: ENMA489A, ENMA400, ENMA698A, or ENMA600.
Formerly: ENMA489A.

ENMA401 Continuum Modeling of Materials (3 Credits)
Introduces continuum modeling techniques in materials science and engineering. This course covers and emphasizes the applications of continuum modeling techniques using COMSOL software package in simulating a range of materials phenomena and properties. Specific topics of continuum modeling include: The construction and analyses of continuum models using COMSOL software package; Structural mechanics; Heat transfer; Electrical current; Chemical species transport; Fluid flow; Multi-physics models coupling above phenomena.
Prerequisite: ENMA362, PHYS270, PHYS271, and MATH246; or equivalent; and ENMA165 or MATH206.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA401 or ENMA489C.
Formerly: ENMA489C.

ENMA410 Materials for Energy I (3 Credits)
The goal is to demonstrate the role of materials in solving one of the most critical socio-economic issues of our time, affordable and sustainable energy. There will be a discussion of U.S. and global energy and related environmental issues. Topics covered include: fuel cells and batteries (electrochemical energy conversion and storage); catalysts and membrane separations (fossil fuel and biomass energy conversion); and nuclear fuels.
Prerequisite: Minimum grade of C- in ENMA300; and permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA410 or ENMA489H.
Formerly: ENMA489H.

ENMA411 Materials for Energy II (3 Credits)
Demonstrates the role of materials in solving one of the most critical socio-economic issues of our time, affordable and sustainable energy. Materials for Energy is a two-part course based on material functionality; however, they are independent and neither is a prerequisite for the other. Materials for Energy II will focus on electrical, optical, thermal, and mechanically functional materials for energy devices. Solar cells, solar fuel, solar thermal, energy efficient lighting, building energy, thermoelectric and wind energy will be covered.
Prerequisite: Minimum grade of C- in ENMA300; and permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA411 or ENMA489I.
Formerly: ENMA489I.

ENMA412 Fundamentals of Photovoltaics (3 Credits)
Overview of the fundamentals of photovoltaic devices, including principles of operation, with emphasis on the materials science aspects of the different technologies available.
Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.

ENMA414 Introduction to Solid State Ionics (3 Credits)
Solid State Ionics is the study of point defects in crystalline and non-crystalline solids; defect equilibria and transport; the influence of chemical and electric potentials, interfaces, and association; and the application of ionically conducting solids in solid-state electrochemical transducer systems and devices.
Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA414 or ENMA489W.
Formerly: ENMA489W.

ENMA421 Design of Composites (3 Credits)
Fundamentals of design, processing and selection composite materials for structural applications will be covered. The topics include a review of all classes of materials, an in-depth analysis of micro and macro mechanical behavior including interactions at the two-phase interfaces, modeling of composite morphologies for optimal microstructures, material aspects, cost considerations, processing methods including consideration of chemical reactions and stability of the interfaces, and materials selection considerations.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA421 or ENMA489A.
Formerly: ENMA489A.

ENMA422 Radiation Effects of Materials (3 Credits)
Ionizing radiation, radiation dosimetry and sensors, radiation processing, radiation effects on: polymers, metals, semiconductors, liquids, and gases. Radiation in advanced manufacturing, radiation-physical technology.
Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA422 or ENMA489E.
Formerly: ENMA489E.

ENMA425 Introduction to Biomaterials (3 Credits)
Examination of materials used in humans and other biological systems in terms of the relationships between structure, fundamental properties and functional behavior. Replacement materials such as implants, assistive devices such as insulin pumps and pacemakers, drug delivery systems, biosensors, engineered materials such as artificial skin and bone growth scaffolds, and biocompatibility will be covered.
Recommended: ENMA300.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: BIOE453, CHBE457, or ENMA425.

ENMA426 Reliability of Materials (3 Credits)
Students are taught the basic degradation mechanisms of materials, through the understanding of the physics, chemistry, mechanics of such mechanisms. Mechanical failure mechanisms concentrate on fatigue, and creep. Chemical failure mechanisms emphasize corrosion and oxidation. Physical mechanisms such as diffusion, electromigration, defects and defect migration, surface trapping mechanisms, charge creation and migration are also included.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA426 or ENMA489R.
Formerly: ENMA489R.

ENMA430 Quantum Size Effects in Nanomaterials (3 Credits)
Surveys materials systems whose properties are governed by quantum mechanical phenomena. The time-independent Schrodinger equation is employed to relate materials structure and size to their electrical, thermal and optical properties. Integrated throughout the course are (1) surveys of approaches for the synthesis of the nanoscale structures (nanoparticles, nanowires, nanotubes, etc.), (2) computer-based exercises, (3) review of influential articles from the scientific literature, and (4) in-depth analysis of devices and applications that utilize the quantum materials.
Prerequisite: PHYS431 or ENMA460; and (CHEM231 or CHEM481).

ENMA431 Nanomechanics of Biomaterials (3 Credits)
Focuses on the latest scientific developments and discoveries in the nanoscale structure and properties of biological materials. The course begins with introductory lectures on the various nanostructures of biomaterials, and their physiological roles under mechanical forces. General aspects of biopolymers, protein folding, and self-assembly are also covered. Next, a series of in-depth lectures are presented on the characterization methods of nanomechanical properties using single molecule techniques. Finally, current applications of nanobiomaterials in the area of molecular machines, molecular self-assembly, and nanoscaffold are discussed.
Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA431 or ENMA489B.
Formerly: ENMA489B.

ENMA435 Wide Bandgap Materials and Devices (3 Credits)
Presents the materials science of wide bandgap materials and analyzes the defects present in such materials from a device performance point of view.
Prerequisite: ENMA300 and ENMA465.
Corequisite: ENMA460.
Restriction: Permission of ENGR-Materials Science & Engineering department. Jointly offered with: ENMA635.
Credit Only Granted for: ENMA435 or ENMA635.

ENMA436 Introduction to Quantum Materials and Devices (3 Credits)
Quantum materials and devices are an emerging field in materials engineering and physics which offer new approaches to electronics and photonics. This course serves as an introduction to quantum materials and their applications in quantum technologies. It will teach concepts needed to understand the quantum mechanical properties of materials and connect their fundamental properties to quantum device applications. Topics will include low-dimensional materials, strongly correlated electron systems, topology in solids, and light-matter interactions
Prerequisite: ENMA460 and ENMA461 .
Restriction: Permission of ENGR-Materials Science & Engineering department. Jointly offered with: ENMA636.
Credit Only Granted for: ENMA436 or ENMA636.

ENMA437 Machine Learning for Materials Science (3 Credits)
Familiarizes students with basic as well as state of the art knowledge of machine learning and its applications to materials science and engineering. Covers the range of machine learning topics with applications including feature identification and extraction, determining predictive descriptors, uncertainty analysis, and identifying the most informative experiment to perform next. One focus of the class is to build the skills necessary for developing an autonomous materials research system, where machine learning controls experiment design, execution, and analysis in a closed-loop.
Prerequisite: MATH206, ENMA300, and MATH461.
Restriction: Permission of ENGR-Materials Science & Engineering department. Jointly offered with: ENMA637.
Credit Only Granted for: ENMA489L, ENMA437 or ENMA637.
Formerly: ENMA489L.

ENMA440 Nano Plasma Processing of Materials (3 Credits)
Sustaining mechanisms of plasmas are covered, especially low-pressure electrical gas discharges, fundamental plasma physics, sheath formation, electric and magnetic field effects, plasma-surface interactions in chemically reactive systems, plasma diagnostic techniques and selected industrial applications of low pressure plasmas.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA440, ENMA489P, ENMA640, or ENMA698P.
Formerly: ENMA489P.

ENMA441 Characterization of Materials (3 Credits)
Techniques to characterize the properties of materials whose characteristic dimensions range from nanometers to macroscopic. These include conventional crystalline and noncrystalline materials, with a special attention to materials of current technological interest. The course will include recent results from the scientific literature.
Prerequisite: ENMA300 and MATH206.
Restriction: Permission of ENGR-Materials Science & Engineering department; and senior standing.
Credit Only Granted for: ENMA489T or ENMA441.
Formerly: ENMA489T.

ENMA442 Nanomaterials (3 Credits)
An exploration of materials whose structure places them at the boundary between small objects and large molecules. Having characteristic dimensions in the range of 1-100 nanometers, these materials are difficult to synthesize and characterize but are nevertheless at the forefront of science and technology in many fields. Also, the methods for creating, manipulating and measuring these materials with an emphasis on the current scientific literature will be covered. The novel properties and potential applications will also be addressed.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA442 or ENMA489N.
Formerly: ENMA489N.

ENMA443 Phontonic Materials, Devices and Reliability (3 Credits)
The course focuses on the understanding of the basic optical processes in semiconductors, dielectrics and organic materials. The application of such materials in systems composed of waveguides, light emitting diodes and lasers, as well as modulators is developed.
Restriction: Permission of ENGR-Materials Science & Engineering department; and junior standing or higher.
Credit Only Granted for: ENMA443 or ENMA489Z.
Formerly: ENMA489Z.

ENMA445 Liquid Crystals and Structured Soft Materials (3 Credits)
Elective course on the properties and behavior of liquid crystals and related soft materials, and their relationship to biomaterials and to applications.
Prerequisite: MATH246, PHYS270, and PHYS271.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA445 or ENMA489L.
Formerly: ENMA489L.

ENMA460 Introduction to Solid State Physics (3 Credits)
Classes of materials; introduction to basic ideal and real materials' behavior including mechanical, electrical, thermal, magnetic and optical responses of materials; importance of microstructure in behavior. One application of each property will be discussed in detail.
Prerequisite: PHYS271, PHYS270, and MATH241.
Restriction: Junior standing or higher; and must be in the Engineering: Materials Science program or Physics program. Cross-listed with: PHYS431.
Credit Only Granted for: ENMA460 or PHYS431.
Additional Information: Materials Engineering students take ENMA460 and Physics students take PHYS431.

ENMA461 Thermodynamics of Materials (3 Credits)
Thermodynamic aspects of materials; basic concepts and their application in design and processing of materials and systems. Topics include: energy, entropy, adiabatic and isothermal processes, internal and free energy, heat capacity, phase equilibria and surfaces and interfaces.
Prerequisite: ENMA300.
Restriction: Junior standing or higher.

ENMA462 Smart Materials (3 Credits)
A fundamental understanding will be provided as it relates to the following topics: ferroic materials, ferromagnets, ferroelectric materials, shape memory alloys and multiferroic materials that are simultaneously ferromagnetic and ferroelectric. The ferroic properties will be discussed on an atomic, nano- and micro-scales so that actual and potential applications on those scales become clear. Examples of those applications will be presented.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA462 or ENMA489B.
Formerly: ENMA489B.

ENMA463 Macroprocessing of Materials (3 Credits)
Processing of modern, bulk engineering materials. Raw materials, forming, firing, finishing and joining. More emphasis on metals and ceramics than polymers.
Prerequisite: ENMA300.
Restriction: Junior standing or higher.

ENMA464 Environmental Effects on Engineering Materials (3 Credits)
Introduction to the phenomena associated with the resistance of materials to damage under severe environmental conditions. Oxidation, corrosion, stress corrosion, corrosion fatigue and radiation damage are examined from the point of view of mechanism and influence on the properties of materials. Methods of corrosion protection and criteria for selection of materials for use in radiation environments.
Prerequisite: ENMA300. Or permission of ENGR-Materials Science & Engineering department; and permission of instructor.

ENMA465 Microprocessing Materials (3 Credits)
Micro and nanoscale processing of materials. Emphasis on thin film processing for advanced technologies.
Prerequisite: ENMA300.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA363, ENMA489B, or ENMA465.
Formerly: ENMA363.

ENMA466 Advanced Materials Fabrication Laboratory (3 Credits)
This course allows students an opportunity to study advanced materials systems in depth through a combination of lectures and hands-on laboratory experiments. Students will be trained in materials processing and characterization techniques. Each student will fabricate materials and devices in our state-of-the-art nanofabrication clean room facility (Fablab), as well as evaluate them using a variety of characterization techniques.
Prerequisite: ENMA465; and permission of ENGR-Materials Science & Engineering department.

ENMA470 Materials Selection for Engineering Design (3 Credits)
Students will learn about materials classes, properties, limitations and applications and the methodology of materials selection in engineering design.
Prerequisite: Permission of ENGR-Materials Science & Engineering department.
Restriction: Junior standing or higher.
Credit Only Granted for: ENMA 470 or ENMA 489O.
Formerly: ENMA 489O.

ENMA471 Kinetics, Diffusion and Phase Transformations (3 Credits)
Fundamentals of diffusion, the kinetics of reactions including nucleation and growth and phase transformations in materials.
Prerequisite: Must have completed or be concurrently enrolled in ENMA461.
Restriction: Junior standing or higher; or permission of ENGR-Materials Science & Engineering department.

ENMA472 Additive Manufacturing of Materials (3 Credits)
Additive manufacturing approaches for metals, ceramics and polymers will be explored in terms of manufacturability and how processing parameters affect microstructure and properties. The course will include projects, including a Terrapin Works project to design and build a part, to develop an understanding of the current state of additive manufacturing, its future promise and its limitations.
Prerequisite: ENMA300.
Restriction: Must be in Engineering: Materials Science program.
Credit Only Granted for: ENMA472 or ENMA672.

ENMA473 Engineering Using High Strength Metals and Alloys (3 Credits)
This is a class focused on the materials engineering challenges of applying high strength metals and alloys to solutions. The extraordinary properties of these alloys derive from (1) highly metastable microstructures, (2) high strengths and melting points of the base metals, (3) complicated processing and fabrication procedures, and (4) their resulting complex behavior in extreme environments. This course will give you the knowledge base you need to select, apply and troubleshoot the performance of high strength metals and alloys in a variety of applications.
Prerequisite: ENMA300, ENMA362, and ENMA461; and permission of ENGR-Materials Science & Engineering department.

ENMA474 Introduction to Computational Materials Science (3 Credits)
This is an introductory course aiming for junior and senior undergraduate students to study atomistic modeling and simulation techniques that are used in materials science. This course covers the theories and applications of atomistic scale modeling techniques to simulate, understand, and predict the properties of materials. Topics include: molecular statics, quantum mechanical methods, molecular dynamics simulations and Monte Carlo simulations.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA474 or ENMA489A.
Formerly: ENMA489A.

ENMA475 Fundamentals of Diffraction Techniques in Materials Science (3 Credits)
This course looks at the advanced methods of x-ray scattering/diffraction available thanks to the more powerful sources available to us. The availability of these sources enables us to study liquid crystals, polymers, nanomaterials, quasiorganized materials (including nano) and disordered materials.
Prerequisite: MATH246, PHYS270, and PHYS271.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA475 or ENMA489M.
Formerly: ENMA489M.

ENMA476 NanoManufacturing: Materials Design and Systems Integration (3 Credits)
The fundamentals of nanomanufacturing based on state-of-the-art and future prospects in materials design and systems integration. The course examines functional nanomaterials design and synthesis, structural assembly from nanoscale to macroscale, and device fabrication. Distinct from the current curricular paradigm in many nanotechnology programs that focus on underlying science, this course emphasizes the immediate need for scale-up, process robustness, and system integration issues. Featuring case studies from industry, end of chapter problems, and study questions, the course is for upper-level undergraduate and graduate students, who are interested in the future of manufacturing innovation and technology.
Restriction: Must be in Engineering: Materials Science program.

ENMA481 Introduction to Electronic and Optical Materials (3 Credits)
Electronic, optical and magnetic properties of materials. Emphasis on materials for advanced optoelectronic and magnetic devices and the relationship between properties and the processing/fabrication conditions.
Prerequisite: ENMA300; or students who have taken courses with comparable content may contact the department.

ENMA482 Introduction to Electron Microscopy (3 Credits)
An introduction of the basic principles of operation for modern electron microscopes. Details will be given on the construction of microscopes, their basic operation, and the types of questions that can be addressed with an electron microscope. Emphasis will be placed on a conceptual understanding of the underlying theories. Where appropriate, mathematical descriptions will be utilized. Upon completion of this course, students will be excepted to have a basic understanding sufficient to give interpretations of microscopy images and to suggest the correct tool or approach for certain research studies.
Prerequisite: PHYS142, PHYS122, or PHYS260.
Credit Only Granted for: ENMA482 or ENMA489J.
Formerly: ENMA489J.

ENMA484 Fundamentals of Finite Element Modeling (3 Credits)
A brief review of mechanical behavior of materials, introduction to Finite Element Modeling (FEM), and procedures for predicting mechanical behavior of materials by FEM using computer software (at present ANSYS). The FEM procedures include, setting up the model, mesh generation, data input and interpretation of the results.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA484 or ENMA489F.
Formerly: ENMA489F.

ENMA486 Seminar in Materials Science and Engineering (1 Credit)
Current research in materials science and engineering and related fields. The lectures are presented by scientists and engineers from academia, national laboratory, US government, etc., in the format of seminars.
Restriction: Must be in Engineering: Materials Science program.

ENMA487 Capstone Preparation (1 Credit)
In preparation for the senior level design course, students will do background research and develop white papers from which teams will form around short listed design projects. The projects should focus on a society, industry, military or technological based problem in Materials Science and Engineering leading to a design and strategy to address the problem in the following course, ENMA 490. The course will include written and oral presentations of the white papers and team proposals.
Restriction: Must be in Engineering: Materials Science program; and senior standing; and permission of ENGR-Materials Science & Engineering department.

ENMA489 Selected Topics in Engineering Materials (3 Credits)
Selected topics of current importance in materials science and engineering.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Repeatable to: 12 credits if content differs.

ENMA490 Materials Design (3 Credits)
Capstone design course. Students work in teams on projects evaluating a society or industry based materials problem and then design and evaluate a strategy to minimize or eliminate the problem; includes written and oral presentations.
Prerequisite: Minimum grade of C- in ENMA487.
Restriction: Senior standing.

ENMA495 Polymeric Engineering Materials I (3 Credits)
Study of polymeric engineering materials and the relationship to structural type. Elasticity, viscoelasticity, anelasticity and plasticity of single and multiphase materials. Emphasis is on polymetric materials.
Prerequisite: ENMA300.
Restriction: Permission of ENGR-Materials Science & Engineering department.

ENMA496 Polymeric Materials: Structure, Property, and Processing (3 Credits)
An intermediate level treatment of structures of polymers. An introduction to mechanical properties and processing of polymeric materials. Emphasis will be on how to establish the structure-property relationship and on how to achieve such understanding via different characterization methods.
Prerequisite: ENMA300; and permission of ENGR-Materials Science & Engineering department. Cross-listed with: CHBE496.
Credit Only Granted for: ENMA496 or CHBE496.

ENMA499 Senior Laboratory Project (1-3 Credits)
Students work with a faculty member on an individual laboratory project in one or more of the areas of engineering materials. Students will design and carry out experiments, interpret data and prepare a comprehensive laboratory report.
Restriction: Senior standing.

ENMA600 Advanced Atomistic Modeling in Materials (3 Credits)
This is an advanced course designed to study atomistic modeling and simulation techniques used in materials research. This course covers the theories, methods, and applications of atomistic-scale modeling techniques in simulating, understanding, and predicting the properties of materials. Specific topics include: molecular statics using empirical force fields; quantum mechanical methods including density functional theory; molecular dynamics simulations; and Monte Carlo and kinetic Monte Carlo modeling.
Prerequisite: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA600, ENMA 698A, ENMA400 or ENMA489A.
Formerly: ENMA698A.

ENMA613 Materials Science of Quantum Computing (3 Credits)
Quantum computing is the emerging field that attempts to perform information processing on a quantum mechanical state (qubit). This graduate level course targets advanced undergraduate and beginning graduate students for an introduction to this field of applied physics and the related material structures needed for elementary quantum computing. This course focuses on targeted topics of quantum mechanics and solid state physics as applicable to ion trap qubits, electron spin qubits, and superconducting qubits with connections to actual material structures their design and means of fabrication.
Prerequisite: Permission of ENGR-Materials Science & Engineering department.
Recommended: Strongly recommended coursework in introduction to materials science, electronic materials, solid state physics, quantum mechanics and basic knowledge in computer programming or MATLAB.

ENMA614 Advanced Solid State Ionics (3 Credits)
Advanced solid state ionics is the higher level study of point defects in crystalline and non-crystalline solids; defect equilibria and transport; the influence of chemical and electric potentials, interfaces, and association; and the application of ionically conducting solids in solid-state electrochemical transducer systems and devices.
Prerequisite: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA 614 or ENMA 698W.
Formerly: ENMA 698W.

ENMA615 Advanced Archeology meets Technology (3 Credits)
Focus on the application of scientific methods of analysis to archaeological materials including bone, stone, pottery, and metal. Methods include absolute dating, remote sensing, optical and SEM microscopy, elemental and isotopic analysis. Laboratory sections provide hands-on experience with a variety of archaeological materials and analytical methods.
Prerequisite: Permission of ENGR-Materials Science & Engineering department.
Recommended: Some knowledge of archaeology and archaeological methods, geology or chemistry is useful, but not required.

ENMA620 Polymer Physics (3 Credits)
The thermodynamics, structure, morphology and properties of polymers. Developing an understanding of the relationships between theory and observed behavior in polymeric materials.
Prerequisite: ENMA471; or permission of instructor.
Restriction: Permission of ENGR-Materials Science & Engineering department.

ENMA621 Advanced Design Composite Materials (3 Credits)
Fundamentals of design, processing, and selection of composite materials for structural applications are covered. The topics include a review of all classes of engineering materials, an in-depth analysis of micro and macro mechanical behavior including interactions at the two-phase interfaces, modeling of composite morphologies for optimal microstructures, material aspects, cost considerations, processing methods- including consideration of chemical reactions, stability of the interfaces and material selection.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA621 or ENMA698A.
Formerly: ENMA698A.

ENMA624 Radiation Engineering (3 Credits)
Ionizing radiation, radiation dosimetry and sensors, radiation processing, radiation effects on ; polymers, metals, semiconductors, liquid, and gas, radiation in advance manufacturing, radiation-physical technology.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA624 or ENMA698E.
Formerly: ENMA698E.

ENMA625 Biomaterials (3 Credits)
Examination of materials used in humans and other biological systems in terms of the relationships between structure, fundamental properties and functional behavior. Replacement materials such as implants, assistive devices such as insulin pumps and pacemakers, drug delivery systems, biosensors, engineered materials such as artificial skin and bone growth scaffolds, and biocompatibility will be covered.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA425, ENMA698I, BIOE698I, or ENBE453.
Formerly: ENMA698I.

ENMA626 Fundamentals of Failure Mechanisms (3 Credits)
Advanced failure mechanisms in reliability engineering wiil be taught from a basic materials and defects point of view. The methods of predicting the physics of failure of devices, materials, components and systems are reviewed. The main emphasis will be given to basic degradation mechanisms through understanding the physics, chemistry, and mechanics of such mechanisms. Mechanical failures are introduced through understanding fatigue, creep and yielding in materials, devices and components. The principles of cumulative damage and mechanical yielding theory are taught. The concepts of reliability growth, accelerated life testing, environmental testing are introduced. Physical, chemical and thermal related failures are introduced through a basic understanding of degradation mechanisms such as diffusion, electromigration, defects and defect migration. The failure mechanisms in basic material types will be taught. Failure mechanisms observed in real electronic devices and electronic packaging will also be presented. Problems related to manufacturing, and microelectronics will be analyzed. Mechanical failures are emphasized from the point of view of complex fatigue theory.
Restriction: Permission of ENGR-Mechanical Engineering. Cross-listed with: ENRE600.
Credit Only Granted for: ENMA626, ENMA698M, ENMA698R, or ENRE600.

ENMA627 Nanotechnology Characterization (3 Credits)
Techniques to characterize the properties of materials whose characteristic dimensions are a few to a few hundred nanometers, including "conventional" nanocrystalline materials, but concentrating on "novel" nanomaterials: carbon nanotubes, quantum dots, quantum wires, and quantum wells will be covered. The emphasis is on recent results from the scientific literature concerning those properties that make nanostructures interesting: quantum effects, novel transport phenomena, enhanced mechanical properties associated with localization and with small crystalline size.
Credit Only Granted for: ENMA627 or ENME698T.
Formerly: ENMA698T.

ENMA630 Advanced Nanosized Materials: Synthesis and Utilization (3 Credits)
This course covers fundamental theory and fabrication-related aspects of nanoscale materials science. Topics: Quantization of energy level in solids and its effect on properties. Nucleation, growth and aging. Nano-epitaxy. Anisotropic crystal engineering. Electrical Transport. Nano-magnetism. Properties of carbon nanotubes. Applications in electronics, optics, data storage, energy and biomedicine.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA630 or ENMA6998G.
Formerly: ENMA698G.

ENMA631 Advanced Nanomechanics of Biomaterials (3 Credits)
Students will develop understanding of the latest scientific developments and discoveries in the nanoscale structure and properties of biological materials. Topics include nanostructures of biomaterials, physiological roles under mechanical forces, biopolymers, protein folding, and self-assembly. Also included are characterization methods of nanomechanical properties using single molecule techniques. Current applications of nanobiomaterials in the area of molecular machines, molecular self-assembly, and nanoscaffold are discussed.
Prerequisite: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA631 or ENMA698B.
Formerly: ENMA698B.

ENMA633 Advanced Characterization of Soft Matter Materials (3 Credits)
This course is focused on both the theories and experimental works of studying structure and dynamics of soft matter materials using scattering techniques (light, x-ray and neutron scattering). These scattering techniques can probe the structure from a few Angstrom to micrometer and the dynamics from picosecond to second, are thus widely used to reveal the structure-performance relationship of different materials. The course discusses the physics principles of these techniques and explains the details of general theories and commonly used models in characterizing soft matter materials such as polymer, protein, colloidal, thin film, and gel systems.
Restriction: Permission of ENGR-Materials Science & Engineering department.

ENMA635 Wide Bandgap Materials and Devices (3 Credits)
Presents the materials science of wide bandgap materials and analyzes the defects present in such materials from a device performance point of view.
Restriction: Permission of ENGR-Materials Science & Engineering department. Jointly offered with: ENMA435.
Credit Only Granted for: ENMA435 or ENMA635.

ENMA636 Introduction to Quantum Materials and Devices (3 Credits)
Quantum materials and devices are an emerging field in materials engineering and physics which offer new approaches to electronics and photonics. This course serves as an introduction to quantum materials and their applications in quantum technologies. It will teach concepts needed to understand the quantum mechanical properties of materials and connect their fundamental properties to quantum device applications. Topics will include low-dimensional materials, strongly correlated electron systems, topology in solids, and light-matter interactions.
Prerequisite: ENMA650 and ENMA660 .
Restriction: Permission of ENGR-Materials Science & Engineering department. Jointly offered with: ENMA436.
Credit Only Granted for: ENMA436 or ENMA636.

ENMA637 Machine Learning for Materials Science (3 Credits)
Familiarizes students with basic as well as state of the art knowledge of machine learning and its applications to materials science and engineering. Covers the range of machine learning topics with applications including feature identification and extraction, determining predictive descriptors, uncertainty analysis, and identifying the most informative experiment to perform next. One focus of the class is to build the skills necessary for developing an autonomous materials research system, where machine learning controls experiment design, execution, and analysis in a closed-loop.
Prerequisite: MATH461.
Recommended: Python knowledge.
Restriction: Permission of ENGR-Materials Science & Engineering department. Jointly offered with: ENMA437.
Credit Only Granted for: ENMA437, ENMA489L, or ENMA637.

ENMA640 Advanced Nano Processing of Materials with Plasma (3 Credits)
Plasmas are used to control the micro-and Nanoscale level structure of materials including patterning at the micro-and nanoscale level using plasma etching techniques. The course establishes the scientific understanding required for the efficient production of nano-structure using plasma techniques.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA440, ENMA489P, ENMA698P, or ENMA640.
Formerly: ENMA698P.

ENMA641 Nanotechnology Characterization (3 Credits)
Techniques to characterize the properties of materials whose characteristic dimensions are a few to a few hundred nanometers, including conventional nanocrystalline materials, but concentrating on novel nanomaterials: carbon nanotubes, quantum dots, quantum wires, and quantum wells are covered. The emphasis is on recent results from the scientific literature concerning those properties that make nanostructures interesting: quantum effects, novel transport phenomena, enhanced mechanical properties associated with localization and with small crystallite size.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA698T or ENMA641.
Formerly: ENMA698T.

ENMA642 Current Trends in Nanomaterials (3 Credits)
Presents a historical and contemporary perspective of the trends of development of nanomaterials. Having characteristic dimensions in the range of 1-100 nanometers, these materials are difficult to synthesize a nd characterize but are nevertheless at the forefront of science and tec hnology in many fields. Through detailed analysis of the current literat ure, all students will develop a sense for not only where the science an d technology has come but also where it is going.
Credit Only Granted for: ENMA642 or ENMA698N.
Formerly: ENMA698N.

ENMA643 Advanced Photonic Materials (3 Credits)
The understanding of the basic optical processes in photonic devices and systems compsed of waveguides, light emitting diodes and lasers, as well as modulators is developed. Lectures on basic degradation mechanisms of such systems will be presented. The area of organic based LED reliability will be covered from the point of view of the stability of the organic-inorganic interface.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA698Z, ENRE648Z, or ENMA643.
Formerly: ENMA698Z.

ENMA645 Advanced Liquid Crystals and Other Monomeric Soft Matter Materials (3 Credits)
Elective course on the properties and behavior of liquid crystal and related soft materials, and their relationship to biomaterials and applications.
Restriction: Permission of ENGR-Materials Science & Engineering department.

ENMA650 Nanometer Structure of Materials (3 Credits)
The basic concepts required for understanding nanostructured materials and their behavior will be covered. Topics covered include the structural aspects of crystalline and amorphous solids and relationships to bonding types, point and space groups. Summary of diffraction theory and practice. The reciprocal lattice. Relationships of the microscopically measured properties to crystal symmetry. Structural aspects of defects in crystalline solids.
Prerequisite: ENMA460; or students who have taken courses with comparable content may contact the department. And permission of ENGR-Materials Science & Engineering department.

ENMA659 Special Topics in Electronic Materials (3 Credits)
Topics of current interest in the design and manufacture of electronic materials.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Repeatable to: 6 credits if content differs.

ENMA660 Thermodynamics in Materials Science (3 Credits)
Thermodynamics of engineering solids. Thermal, diffusional and mechanical interactions in macroscopic systems. Systems in thermal contact, systems in thermal and diffusive contact, systems in thermal and mechanical contact.
Corequisite: ENMA650.
Restriction: Permission of ENGR-Materials Science & Engineering department.

ENMA661 Kinetics of Reactions in Materials (3 Credits)
The theory of thermally activated processes in solids as applied to diffusion, nucleation and interface motion. Cooperative and diffusionless transformations. Applications selected from processes such as allotropic transformations, precipitation, martensite formation, solidification, ordering, and corrosion.
Prerequisite: ENMA660.
Restriction: Permission of ENGR-Materials Science & Engineering department.

ENMA662 Advanced Smart Materials (3 Credits)
This course will cover the three ferroic materials, ferromagnetic, ferroelectric, and ferroelastic (also known as Shape Memory Alloy, SMA) as well as materials that are simultaneously ferromagnetic and ferroelectric etc. Their similarities and differences will be identified and their atomic level and crystal structure examined. Phase transformations are very important and will be treated in some detail. Applications, e.g. permanent magnets, electronic magnetic materials, digital storage elements, actuators and sensors as well as SMAs for vision glasses, self-adjusting valves and the like will be covered.
Restriction: Permission of ENGR-Materials Science & Engineering department.

ENMA664 Advanced Environmental Effects on Engineering Materials (3 Credits)
Introduction to the phenomena associated with the resistance of materials to damage under severe environmental conditions. Oxidation, corrosion, stress corrosion, corrosion fatigue and radiation damage are examined from the point of view of mechanism and influence on the properties of materials. Methods of corrosion protection and criteria for selection of materials for use in radiation related environments.
Credit Only Granted for: ENMA664 or ENMA698K.
Formerly: ENMA698K.

ENMA669 Special Topics in the Chemical Physics of Materials (3 Credits)
Restriction: Permission of ENGR-Materials Science & Engineering department; and permission of instructor.

ENMA671 Defects in Materials (3 Credits)
Fundamental aspects of point (electronic and atomic) defects, dislocations, and surfaces and interfaces in materials. Defect interactions, defect models, and effects of zero, one and two dimensional defects on material behavior.
Restriction: Permission of ENGR-Materials Science & Engineering department.

ENMA674 Advanced Computational Materials Science (3 Credits)
An introduction for beginning graduate students to study atomistic modeling and simulation techniques that are used in materials science. Theories and applications of atomistic scale modeling techniques to simulate, understand, and predict the properties of materials will be covered. Topics include: molecular statics, quantum mechanical methods, molecular dynamics simulations and Monte Carlo simulations.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA674 or ENMA 698A.
Formerly: ENMA698A.

ENMA679 Special Topics in the Mechanical Behavior of Materials (3 Credits)
Topics of current interest in the mechanical behavior of materials.
Restriction: Permission of ENGR-Materials Science & Engineering department.

ENMA680 Determination of Structure, Chemical Composition and Defects in Materials (3 Credits)
Basic principles of electron microscopy theory, electron diffraction, and imaging theory. The electron beam sample interaction that gives rise to different signals is related to the structural and compositional information that is obtained from a sample using a TEM. The most common TEM techniques for structural characterization of a sample, namely, electron diffraction, bright/dark field imaging, and high resolution lattice imaging are discussed. Compositional information obtained from x-ray fluorescence and electron energy loss as well as the resolution of these techniques is also covered. A description of techniques used to study magnetic materials is also presented.
Prerequisite: ENMA650.
Restriction: Permission of ENGR-Materials Science & Engineering department.

ENMA681 Diffraction Techniques in Materials Science (3 Credits)
Advanced methods of x-ray scattering/diffraction available thanks to the more powerful sources available to us. The availability of these sources enables us to study liquid crystals, polymers, nanomaterials, quasiorganized materials (including nano) and disordered materials. We will consider scattering/diffraction from the electronic level and build up to the molecular level.
Prerequisite: Permission of ENGR-Materials Science & Engineering department.

ENMA682 Electron Microscopy for Research (3 Credits)
An overview of the basic principles of operation for modern electron microscopes and how they are used in modern research. Details will be given on the construction of microscopes, their basic operation, and the types of questions that can be addressed with an electron microscope. Emphasis will be placed on a conceptual understanding of the underlying theories, and how to apply these to real-world research problems. Independent study into a specific area of electron microscopy will contribute to a term paper. Upon completion of this course, student will be expected to have a basic understanding sufficient to give interpretations of microscopy images and to suggest the correct tool or approach for certain research studies.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA682 or ENMA698J.
Formerly: ENMA698J.

ENMA683 Structural Determination Laboratory (1 Credit)
The operation of an electron microscope is covered. TEM techniques that are used to characterize the structure, defects and composition of a sample are presented and used to study a variety of materials. These techniques are: electron diffraction patterns, bright/dark field imaging, high resolution lattic imaging and energy dispersive x-ray spectroscopy. Also covers different sample preparation techniques for TEM. The goal is that the students become independent users of the TEM.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA698L or ENMA683.
Formerly: ENMA698L.

ENMA684 Advanced Finite Element Modeling (3 Credits)
A brief review of mechanical behavior of materials, introduction to Finite Element Modeling (FEM), and procedures for predicting mechanical behavior of materials by FEM using computer software (at present ANSYS). The FEM procedures include, setting up the model, mesh generation, data input and interpretation of the results.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Credit Only Granted for: ENMA684 or ENMA698I.
Formerly: ENMA698I.

ENMA685 Advanced Electrical and Optical Materials (3 Credits)
Students become familiar with basic and state of the art knowledge of some technologically relevent topics in materials engineering and applied physics, including dielectric/ferroelectric materials, magnetic materials, superconductors, multiferroic materials and optical materials with an underlying emphasis on the thin film and device fabrication technology. Fundamental physical properties and descriptions of different materials and their applications are included. Discussion will include new developments in the fields.
Credit Only Granted for: ENMA685 or ENMA698F.
Formerly: ENMA698F.

ENMA687 Nanoscale Photonics and Applications (3 Credits)
Advanced topics in photonics including optical ray propogation, LEDS and the interaction of light in nanostructured materials for optoelectronic applications will be covered.
Credit Only Granted for: ENMA687 or ENMA698Z.
Formerly: ENMA698Z.

ENMA688 Seminar in Materials Science and Engineering (1 Credit)
Current research in materials science and engineering and related fields.
Restriction: Must be in Engineering: Materials Science program.
Repeatable to: 4 credits if content differs.
Formerly: ENMA697.

ENMA689 Special Topics in Engineering Materials (3 Credits)
Restriction: Permission of instructor; and permission of ENGR-Materials Science & Engineering department.
Repeatable to: 6 credits if content differs.
Formerly: ENMA691.

ENMA698 Special Problems in Materials Science and Engineering (1-3 Credits)
Individual, supervised study in materials science and engineering.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Repeatable to: 6 credits if content differs.

ENMA797 Independent Study (3 Credits)
This course is designed to provide students with a directed independent study course in order to prepare the scholarly paper required for the master's degree without thesis degree option.

ENMA799 Master's Thesis Research (1-6 Credits)

ENMA808 Advanced Topics in Engineering Materials (3 Credits)
Restriction: Permission of ENGR-Materials Science & Engineering department.
Repeatable to: 6 credits if content differs.

ENMA898 Pre-Candidacy Research (1-8 Credits)

ENMA899 Doctoral Dissertation Research (1-8 Credits)

ENME - Engineering, Mechanical

ENME400 Machine Design (3 Credits)
Design of mechanical elements and planar machines. Failure theories. Design of pressure vessels, joints, rotating elements, and transmission elements. Kinematic structures, graphical, analytical, and numerical analysis and synthesis of linkages, gear trains, and flywheels are covered.
Prerequisite: Must have completed or be concurrently enrolled in ENME361.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME401 Entrepreneurial Design Realization (3 Credits)
The vision for this course, and an aspect that makes it unique, is to expose students to the opportunities and challenges of bringing a product design to reality (entrepreneurship). The emphasis is on environmentally and socially sustainable projects. The end-product of this course will be full-scale implementations or complete design "packages" that can be taken to potential stakeholders.
Restriction: Must have senior standing and permission of instructor. Cross-listed with: ENES401.
Credit Only Granted for: ENME401, ENME489B or ENES401.
Formerly: ENME489B.

ENME406 Roller Coaster Engineering (3 Credits)
Engineering of roller coasters including: specifications, concept creation, structural design, car design, and safety. Course covers biomechanics and rider kinematics as well as manufacturing aspects.
Prerequisite: ENES220, ENES221, and ENME272. And ENME202; or MATH206.
Corequisite: ENME400.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME407 Sustainability, Climate Change and Renewable Energy Systems (3 Credits)
Countries around the world are developing innovative and sustainable solutions that not only help to protect the environment from the threats of global climate change, but that also can improve human health and quality of life. In this course students will explore solutions to climate change, as well as geothermal and hydroelectric energy systems and their applications.
Prerequisite: PHYS260; or permission of ENGR-Mechanical Engineering department.
Restriction: Students must have completed a minimum of 60 credits by the time they will enroll in this course.

ENME408 Selected Topics in Engineering Design (3 Credits)
Creativity and innovation in design. Generalized performance analysis, reliability and optimization as applied to the design of components and engineering systems. Use of computers in design of multivariable systems.
Restriction: Must be in Engineering: Mechanical program; and senior standing. Or permission of ENGR-Mechanical Engineering department.
Repeatable to: 6 credits if content differs.

ENME410 Design Optimization (3 Credits)
Introduction to the formal process of design optimization, including analytical and computational methods. Step by step design optimization techniques. Design optimization concepts, necessary and sufficient optimality conditions and solution techniques. Solution evaluation and tradeoff exploration.
Prerequisite: ENME271; or MATH206.
Restriction: Permission of ENGR-Mechanical Engineering department; and junior or senior standing.

ENME413 Bio-Inspired Robotics (3 Credits)
Fundamentals and applications of biologically inspired robots, traditional robots, and design and fabrication of biologically inspired robots.
Prerequisite: Must have completed or be concurrently enrolled in ENME351.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME413 or ENME489L.
Formerly: ENME489L.

ENME416 Additive Manufacturing (3 Credits)
Develop a comprehensive understanding of fundamental additive manufacturing, 3D printing approaches, including: extrusion-based deposition, stereolithography, powder bed-based melting, and inkjet-based deposition. Cultivate a design for-additive manufacturing skillset for CAD and CAM methodologies to produce successful 3D prints. Fabricate 3D mechanical objects using a variety of 3D printing technologies on campus. Execute a design project that demonstrates how additive manufacturing technologies can overcome critical limitations of traditional manufacturing processes.
Prerequisite: ENME331. And ENME272; or ENME414.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME417 Numerical Methods in Engineering (3 Credits)
Covers the fundamental aspects of how to apply analytical mathematical concepts to discrete data. The course is aimed at graduate students and senior undergraduate students in any area of engineering, and treats the material in a general manner that is not specific to any application or field of specialization.
Recommended: Senior standing.
Restriction: Permission of ENGR-Mechanical Engineering department. Jointly offered with: ENME745.
Credit Only Granted for: ENME745, ENME808B, ENME417 or ENME489J.
Formerly: ENME489J.

ENME420 De-Carbonization of Building Systems through Energy Audit, Renewable Energy, and Electrification (3 Credits)
Provides students with fundamentals and applications of de-carbonization of building systems for energy sustainability through energy audit and efficiency measures, renewable energy, and electrification. Topics covered include societal and economic motivations for de-carbonization of buildings; building energy auditing and energy consumption analysis; lighting systems and controls; heating/cooling and ventilation systems; integrated building automation systems; fundamentals of renewable energy for building applications; fundamentals of building electrification and energy storage devices; emerging technologies for building energy sustainability.
Prerequisite: ENES232 .
Corequisite: ENME332.
Restriction: Permission of the department.
Credit Only Granted for: ENME420 or ENME489I.
Formerly: ENME489I.

ENME421 Engineering Design Ideation (3 Credits)
Engineering Design Methods is a technical elective for engineering students who wish to improve their ability to produce design ideas (i.e., the ideation process) for further development into conceptual ideas. Ideation is the creative, idea generation activity that happens at the beginning of the conceptual design process. Ideation methods are often built around creativity improving strategies and are often designed for individual use prior to presenting the results in a team setting.
Prerequisite: Must have completed or be concurrently enrolled in ENME371.
Restriction: Junior standing or higher.
Additional Information: Ideally, this course should be taken prior to capstone design.

ENME422 Indoor Environment and Mechanical Systems (3 Credits)
Fundamentals of indoor air quality and its measurements. Exploration of air cleaning technologies for gaseous, particulate and infectious agent contaminants. Simulations of air flow and contaminants with multi-zone models to allow testing of both contaminant dispersion in buildings and effectiveness of air cleaning technologies.
Prerequisite: ENES232 and ENME332. Jointly offered with: ENME753.
Credit Only Granted for: ENME422 or ENME753.

ENME423 Modern Climate Control and Building Energy Design/Analysis (3 Credits)
Fundamentals and design calculations of heat and moisture transfer in buildings; evaluation of cooling, heating and power requirements of buildings; building energy consumption simulations, use of alternative energy and energy conservation measures in buildings; fundamentals of fans/pumps and air/water distribution in buildings; introduction to refrigeration and energy systems for data centers and other mission-critical facilities.
Prerequisite: ENES232.
Corequisite: ENME332.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME424 Urban Microclimate and Energy (3 Credits)
Urban microclimate from the perspective of transient heat and mass transfer using building energy simulations for building clusters as well as LEED building certification criteria. The focus is on understanding building energy consumption and environmental impacts from the individual building scale to a neighborhood scale.
Prerequisite: Must have completed or be concurrently enrolled in ENME332.
Recommended: ENME423.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME424 or ENME808I.

ENME425 Energy Conversion Systems for Sustianability (3 Credits)
Focus on energy sustainability with view on changing global energy availability and use. Addresses the objective of greatly reducing our dependence on the finite amounts of fossil energy sources available for our quest to achieve environmentally benign sustainable energy for green environment. The emphasis will be on sustainability issues, discussion on supply, demand and storage, energy transmission, global warming and carbon management, biomass-resources, uses and production of biofuels, national energy policy discussion, carbon emission, energy security and economics to ensure future energy needs can be met without compromising the ability of future generation to meet their own needs with due considerations to increase in global temperatures.
Prerequisite: ENES232.
Restriction: Permission of the Mechanical Engineering Department.
Credit Only Granted for: ENME489X or ENME425.
Formerly: ENME489X.

ENME426 Production Management (3 Credits)
The basic concepts and models needed to understand and design manufacturing systems, including the history of manufacturing, performance measures, queuing systems, variability, production planning and scheduling, lean manufacturing, and pull production control.
Credit Only Granted for: BMGT385 or ENME426.

ENME427 CSI Mechanical: Finding Reasons for Compromised Structural Integity (3 Credits)
Understanding the causes of product failures including the political, societal, economic, environmental, and ethical impact of these failures, and the strategies to avoid, postpone, or mitigate them. Students will be encouraged to combine concepts from engineering, natural sciences, social sciences, and the humanities to address these complex issues. Basics of failure analysis, forensics, and reliability engineering and the scientific fundamentals underlying the most common types of failure. Issues of legal liability. Methods for monitoring the existing condition of a structure.
Prerequisite: ENES220 and ENME382.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME430 Fundamentals of Nuclear Reactor Engineering (3 Credits)
Fundamental aspects of nuclear physics and nuclear engineering, including nuclear interactions; various types of radiation and their effects on materials and humans; and basic reactor physics topics, including simplified theory of reactor critically.
Prerequisite: MATH246.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME431 Nuclear Reactor Systems and Safety (3 Credits)
Engineering, material and thermal aspects of light water reactors, fast reactors, high temperature gas reactors, heavy water moderated reactors, breeder reactors, advanced reactors including GEN IV designs. Evolution of light water reactor safety and regulation in the US that has culminated in the current body of regulations.
Prerequisite: MATH246.
Recommended: ENME430.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME432 Reactor and Radiation Measurements Laboratory (3 Credits)
Basics concepts of nuclear radiation and radiation detectors including types of radiation, radioactive decay, and interactions of radiation with matter.
Prerequisite: ENME430 and MATH246.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME433 Nuclear Reactor Design (3 Credits)
Principles of nuclear reactor engineering including nuclear reactor system design, materials, thermal-hydraulics, shielding, mechanical design, and safety analysis.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME433 or ENME489T.
Formerly: ENME489T.

ENME435 Remote Sensing Instrumentation (3 Credits)
Explores the fundamentals of remote sensing techniques including light detection and ranging (lidar), radar, and computer vision in the context of emerging technologies such as autonomous navigation, terrain modeling, and embedded smart devices.
Prerequisite: ENME351.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME435 or ENME489Y.
Formerly: ENME489Y.

ENME436 Renewable Energy (3 Credits)
Fundamentals, design/analysis tools, and state of the art renewable energy technologies. Energy resources and global perspectives of current and future energy demand/consumption trends, followed by prime renewable energy technologies, including wind, solar, hydro, geothermal, and ocean thermal energy conversion. Economics of renewable energy, energy conservation opportunities, CO2 capture and storage, and thermal energy storage.
Prerequisite: ENME331.
Restriction: Must be in a major within the ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME489K or ENME436.
Formerly: ENME489K.

ENME440 Applied Machine Learning for Engineering and Design (3 Credits)
Learn how to apply techniques from Artificial Intelligence and Machine Learning to solve engineering problems and design new products or systems. Design and build a personal or research project that demonstrates how computational learning algorithms can solve difficult tasks in areas you are interested in. Master how to interpret and transfer state-of-the-art techniques from computer science to practical engineering situations and make smart implementation decisions.
Prerequisite: ENME392; or permission of instructor.
Restriction: Permission of ENGR-Mechanical Engineering department. Jointly offered with: ENME743.
Credit Only Granted for: ENME440 or ENME743.

ENME441 Mechatronics and the Internet of Things (3 Credits)
Mechatronics and the Internet of Things combines sensors, actuators, computation, and communication to realize integrated objects capable of robust Internet-based interfacing. Students will gain experience with circuit development, mechatronic systems, MicroPython coding, and Internet communication protocols using the ESP32 microcontroller platform. The project-focused course combines lectures and hands-on labs to drive learning at the convergence of mechanics, electronics, and software domains for IoT smart object development.
Prerequisite: ENME351.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME489B or ENME441.
Formerly: ENME489B.

ENME442 Information Security (3 Credits)
The materials presented are divided into three major components: overview, detailed concepts and implementation techniques. The topics to be covered are: general security concerns and concepts from both a technical and management point of view, principles of security, architectures, access control and multi-level security, trojan horses, covert channels, trap doors, hardware security mechanism, security models, security kernels, formal specifications and verification, networks and distribution systems and risk analysis.
Restriction: Must have Senior standing in engineering; and permission of ENGR-Mechanical Engineering department. Jointly offered with ENRE684 .
Credit Only Granted for: ENRE648J, ENME442, ENRE684, or ENPM808E.

ENME444 Assistive Robotics (3 Credits)
Fundamentals of assistive robots used in a wide varietyof ways to help humans with disabilities. Three application areas will be covered: (1) Rehabilitation robotics to recover motor function from neurologic injuries such as stroke, (2) Prosthetics to enable mobility function in amputees, and (3) Social robotics for cognitive impairment and developmental disorders such as autism. Theory behind different control systems employed by assistive robotics, as well as the mechanical design, sensors & actuators, and user interfaces behind representative robots in the respective areas. Guidelines for designing assistive robots. Ethical and regulatory considerations in the design of assistive robots.
Prerequisite: ENME351; and must have completed or be concurrently enrolled in ENME462.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME445 Design for Reliability (3 Credits)
Failure prevention, accident prevention, design requirements analysis, designing right the first time, high system reliability, software reliability, manufacturing defect prevention, life cycle costs reduction, design reviews, managing the design for reliability, design trustworthiness, product durability, and writing good specifications are covered.
Restriction: Junior standing or higher.

ENME446 Medical Robotics (3 Credits)
The fundamentals of robot design, control and different areas of research regarding development are explored. Student will engage in a course project where they will learn to develop, build, and control a medical robot. Surgical robotics development and modeling of robotic systems, safety in medical robotics, haptics, ergonomics and surgery. Fundamentals of robot design and control. Kinematics. This proposal was approved through the Testudo Curriculum Management system.
Prerequisite: Must have completed or be concurrently enrolled in ENME361.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME489C, ENME808M or ENME446.
Formerly: ENME489C.

ENME454 Vehicle Dynamics (3 Credits)
The fundamentals of passenger vehicle and light truck design and vehicle dynamics are covered. The engineering principles associated with acceleration, braking, handling, ride quality, aerodynamics, and tire mechanics are discussed, as well as suspension and steering design.
Corequisite: ENME361.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME461 Control Systems Laboratory (3 Credits)
Students will design, implement, and test controllers for a variety of systems. This will enhance their understanding of feedback control familiarize them with the characteristics and limitations of real control devices. Students will also complete a small project. This will entail writing a proposal, purchasing parts for their controller, building the system, testing it, and writing a final report describing what they have done.
Prerequisite: ENME351 and ENME361.
Restriction: Permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENEE461 or ENME461.

ENME462 Vibrations, Controls, and Optimization II (3 Credits)
Continuation of ENME361. Fundamentals of vibration, controls, and optimization. Analysis and design in time, Laplace and frequency domains. Mathematical descriptions of system response, system stability, control and optimization. Optimal design of mechanical systems.
Prerequisite: ENME361.
Restriction: Permission of the Mechanical Engineering Department.

ENME464 Cost Analysis for Engineers (3 Credits)
An introduction to the financial and cost analysis aspects of product engineering. Introduces key elements of traditional engineering economics including interest, present worth, depreciation, taxes, inflation, financial statement analysis, and return on investment. Provides an introduction to cost modeling as it applies to product manufacturing and support. Cost modeling topics will include: manufacturing cost analysis, life-cycle cost modeling (reliability and warranty), and cost of ownership.
Prerequisite: ENME392; or students who have taken courses with comparable content may contact the department.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME465 Probability-Based Design (3 Credits)
Review of probabilistic distributions, introduction to pseudo-random number generation, and algorithms to produce probability distributions using Monte Carlo simulation via Matlab and other approaches to best design probabilistic engineering problems.
Prerequisite: MATH206 and ENME392.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME466 Lean Six Sigma (3 Credits)
This course intends to provide in-depth understanding of Lean Six Sigma and its Define - Mearsure - Analyze - Improve - Control (DMAIC) Breakthrough Improvement Strategy. The emphasis is placed on the DMAIC process which is reinforced via application of semester long corporate projects and case study analysis.
Corequisite: ENME392; or students who have taken courses with comparable content may contact the department.
Restriction: Permission of ENGR-Mechanical Engineering department.

ENME467 Engineering for Social Change (3 Credits)
Critical analysis of issues at the intersection of engineering, philanthropy and social change. How engineering design, products and processes have created social change in the past and will do so in the future through both intended and unintended consequences. Topics covered include energy, sustainability and climate change, autonomy, the digital future, low cost engineering, manufacturing, philanthropy, ethics and the impact of electronics on society, among others. Faculty and external experts will engage with students on these topics. Students will broadly engage with organizations involved in using technology for positive social impact.
Restriction: Must not be in Engineering: Mechanical program; and junior standing or higher; and must be in a major in ENGR-A. James Clark School of Engineering. Cross-listed with: ENES467.
Credit Only Granted for: ENES467 or ENME467.

ENME470 Finite Element Analysis (3 Credits)
Basic concepts of the theory of the finite element method. Applications in solid mechanics and heat transfer.
Restriction: Senior standing; and permission of ENGR-Mechanical Engineering department.

ENME472 Integrated Product and Process Development (3 Credits)
Integration of product development with the development process. Design strategies. Product architecture. Design for manufacturing. Selection of materials. Design for assembly.
Prerequisite: ENME331, ENME361, ENME351, and ENME371; and must have completed or be concurrently enrolled in ENME332.
Restriction: Permission of the Department of Mechanical Engineering.

ENME473 Mechanical Design of Electronic Systems (3 Credits)
Design considerations in the packaging of electronic systems. Production of circuit boards and design of electronic assemblies. Vibration, shock, fatigue and thermal considerations.

ENME476 Mircoelectromechanical Systems (MEMS) I (3 Credits)
Fundamentals of microelectromechanical systems (MEMS). Introduction to transducers and markets. MEMS fabrication processes and materials, including bulk micromachining, wet etching, dry etching, surface micromachining, sacrificial layers, film deposition, bonding, and non-traditional micromachining. Introduction to the relevant solid state physics, including crystal lattices, band structure, semiconductors, and doping. The laboratory covers safety, photolithography, profilometry, wet etching.
Restriction: Senior standing.
Credit Only Granted for: ENME476 or ENME489F.
Formerly: ENME489F.

ENME477 Microelectromechanical Systems (MEMS) II (3 Credits)
Fabrication of devices designed in MEMS I, including everything from mask printing through training on state-of-the-art fabrication equipment through device testing. In-depth understanding of MEMS devices and technologies, such as mechanical and electromagnetic transducers, microfluidics, and chemical sensors.
Prerequisite: ENME476.

ENME480 Introduction to Robotics (3 Credits)
An introductory course in robotics that will educate students in the elementary concepts of robotics. The course will encompass both theory and experiments.
Prerequisite: MATH246 or ENES221; and (CMSC131, ENME202, ENAE202 or ENEE150).
Restriction: Must be in the Robotics and Autonomous Systems minor; or Permission of ENGR-Mechanical Engineering department.

ENME483 Physics of Turbulent Flow (3 Credits)
Specific problems of turbulent flow including automobile and truck aerodynamics and canonical flows including pipes, jets and boundary layers that are measured and simulated to gain basic understanding of turbulence. A goal of the course is to impart the necessary background for students to be able to critically assess and most effectively employ the turbulent flow prediction codes (e.g. Fluent) that are a mainstay of how turbulence is analyzed in modern industries.
Prerequisite: ENME331.
Restriction: Permission of ENGR-Mechanical Engineering department. Jointly offered with ENME656. Credit only gran ted for: ENME483 or ENME656.

ENME484 Analysis of Turbulent Flow (3 Credits)
Relentless growth in the speed and size of supercomputers has encouraged the ever expanding use of numerical simulation in the practice of fluids engineering. For the flow past ground vehicles, in the urban grid, re-entering rockets, helicopters landing on ships at sea and countless other examples, the flow is turbulent, and simulation is becoming or will one day become the methodology of choice in analyzing and designing such technologies. The goal of this course is to give an introduction to the analysis of turbulent flow via simulation and the modeling that is used in its development. Among the questions to be considered: What can one hope to learn from flow simulation? What are the strengths of the approach and what obstacles inhibit its application? What kind of physical considerations are required in setting up simulations? How does one analyze the results of a simulation?
Prerequisite: ENME331.
Restriction: Permission of ENGR-Mechanical Engineering department. Jointly offered with: ENME657.
Credit Only Granted for: ENME484 or ENME657.

ENME486 Computational Modeling, Simulation, and Interactive Visualization (3 Credits)
Creation of interactive graphic displays from the numerical simulation of mechanical engineering models. Brief description of each model provided, along with varied parameters to explore models' characteristics. Conclusions drawn from use of each interactive graphic. Mathematica language introduced and interwoven with the numerical simulation of the models, which will include: robotics and mechanisms, static response of beams, control systems, measurement systems, fluid flow, vibrations, geometric modeling, finite element analysis, and nonlinear phenomena.
Restriction: Senior standing; and permission of ENGR-Mechanical Engineering department.

ENME488 Special Problems (3 Credits)
Advanced problems in mechanical engineering with special emphasis on mathematical and experimental methods.
Restriction: Permission of ENGR-Mechanical Engineering department.
Repeatable to: 6 credits if content differs.

ENME489 Special Topics in Mechanical Engineering (3 Credits)
Selected topics of current importance in mechanical engineering.
Restriction: Permission of ENGR-Mechanical Engineering department.
Repeatable to: 6 credits.

ENME600 Engineering Design Methods (3 Credits)
An introductory graduate level course in critical thinking about formal methods for design in Mechanical Engineering. Course participants gain background on these methods and the creative potential each offers to designers. Participants will formulate, present, and discuss their own opinions on the value and appropriate use of design materials for mechanical engineering.

ENME605 Advanced Systems Control (3 Credits)
Modern control theory for both continuous and discrete systems. State space representation is reviewed and the concepts of controllability and observability are discussed. Design methods of deterministic observers are presented and optimal control theory is formulated. Control techniques for modifying system characteristics are discussed.
Prerequisite: ENME462; or permission of instructor.

ENME607 Engineering Decision Making and Risk Management (3 Credits)
Individual decision-making, group decisionmaking, and organizations of decision-makers in the context of engineering design, project management, and other functions. Techniques for making better decisions, for understanding how decisions are related to each other, and for managing risk.Cross-listed with ENRE671.
Credit Only Granted for: ENME808X, ENRE671 or ENME607.
Formerly: ENME 808X.

ENME610 Engineering Optimization (3 Credits)
Overview of applied single- and multi- objective optimization and decision making concepts and techniques with applications in engineering design and/or manufacturing problems. Topics include formulation examples, concepts, optimality conditions, unconstrained/constrained methods, and post-optimality sensitivity analysis. Students are expected to work on a semester-long real-world multi-objective engineering project.

ENME611 Fiber Optics (3 Credits)
Introduces students to fiber optics, provides a background including fiber optic components and terminology, and equip students with ability to understand and evaluate various kinds of fiber optic sensors for a wide range of applications along with a detailed understanding of relevant signal processing and analysis techniques.
Credit Only Granted for: ENME611,ENME808 or ENME489R.
Formerly: ENME808R.

ENME625 Multidisciplinary Optimization (3 Credits)
Overview of single- and multi-level design optimization concepts and techniques with emphasis on multidisciplinary engineering design problems. Topics include single and multilevel optimality conditions, hierarchic and nonhierarchic modes and multilevel post optimality sensitivity analysis. Students are expected to work on a semester-long project.

ENME631 Advanced Conduction and Radiation Heat Transfer (3 Credits)
Theory of conduction and radiation. Diffused and directional, poly- and mono-chromatic sources. Quantitative optics. Radiation in enclosures. Participating media. Integrodifferential equations. Multidimensional, transient and steady-state conduction. Phase change. Coordinate system transformations.
Prerequisite: ENME332; or students who have taken courses with comparable content may contact the department; or permission of instructor.

ENME632 Advanced Convection Heat Transfer (3 Credits)
Statement of conservation of mass, momentum and energy. Laminar and turbulent heat transfer in ducts, separated flows, and natural convection. Heat and mass transfer in laminar boundary layers. Nucleate boiling, film boiling, Leidenfrost transition and critical heat flux. Interfacial phase change processes; evaporation, condensation, industrial applications such as cooling towers, condensers. Heat exchangers design.
Credit Only Granted for: ENNU615 or ENME632.

ENME633 Molecular Thermodynamics (3 Credits)
An examination of the interactions between molecules, which govern thermodynamics relevant to engineering, will be conducted. We will investigate both classical and statistical approaches to thermodynamics for understanding topics such as phase change, wetting of surfaces, chemical reactions, adsorption, and electrochemical processes. Statistical approaches and molecular simulation tools will be studied to understand how molecular analysis can be translated to macroscopic phenomena.

ENME635 Energy Systems Analysis for Sustainability and Decarbonization (3 Credits)
Methods for the analysis of conventional and novel energy systems are taught throughout the course. Additional topics are, using the US National Energy Flow Chart to understand sources of carbon emissions, discussion of energy efficiency improvement methods, discussion of decarbonization and carbon capture and sequestration approaches and their impact on efficiency and emissions.
Prerequisite: Undergraduate thermodynamics course or permission of the instructor.
Credit Only Granted for: ENPM635 or ENME635.

ENME640 Fundamentals of Fluid Mechanics (3 Credits)
Equations governing the conservation of mass, momentum, vorticity and energy in fluid flows. Low Reynolds number flows. Boundary layers. The equations are illustrated by analyzing a number of simple flows. Emphasis is placed on physical understanding to facilitate the study of advanced topics in fluid mechanics.
Prerequisite: Must have completed partial differential equations at the level of MATH 462; or permission of ENGR-Mechanical Engineering department.
Formerly: ENME651.

ENME641 Viscous Flow (3 Credits)
Fluid flows where viscous effects play a significant role. Examples of steady and unsteady flows with exact solutions to the Navier-Stokes equations. Boundary layer theory. Stability of laminar flows and their transition to turbulence.
Prerequisite: ENME640; or students who have taken courses with comparable content may contact the department; or permission of instructor.
Formerly: ENME652.

ENME642 Hydrodynamics I (3 Credits)
Exposition of classical and current methods used in analysis of inviscid, incompressible flows.
Prerequisite: ENME640; or students who have taken courses with comparable content may contact the department; or permission of instructor.
Formerly: ENME653.

ENME644 Fundamentals of Acoustics (3 Credits)
This course will cover the fundamental principles of acoustics allowing the students to go on to more advanced course in acoustics, sauch as Underwater Sound Propagation, Active Noise Control, or Radiation and Scattering from Elastic Structures.

ENME645 Fluid-Structure Interactions (3 Credits)
Fundamentals of fluid-structure interactions, fluid-elastic instabilities (buckling, flutter, galloping) and their engineering applications. Possible domains of applications are civil engineering, aerospace engineering, ocean engineering, biomechanics, and soft robotics. Examples include tall bridges, aircraft wing, parachutes, solid rocket motor, turbomachinery, offshore platform, subsea pipelines, paper printing, MEMS mircochannels, blood flow in arteries, and heart valves. The fish swimming mechanics with be studied to inspire novel efficient propulsion mechanisms for soft robotics applications.
Prerequisite: ENME331 and ENME361.
Restriction: Must be a student in the Clark School of Engineering.
Credit Only Granted for: ENME498U, ENME645 or ENME809C.
Formerly: ENME809C.

ENME646 Computational Fluid Dynamics (3 Credits)
Fundamentals of numerical analysis of engineers. Inversion of large, sparse matrices. Numerical solution of the incompressible Navier-Stokes equations in Cartesian and curvilinear grids. Application to turbulent flows and micro-fluidics.
Prerequisite: Must have completed graduate-level fluid mechanics; or permission of instructor.

ENME647 Multiphase Flow and Heat Transfer (3 Credits)
Boiling and condensation in stationary systems, phase change heat transfer phenomenology, analysis and correlations. Fundamentals of two-phase flow natural circulation in thermal hydraulic multi-loop systems with applications to nuclear reactors safety. Multiphase flow fundamentals. Critical flow rates. Convective boiling and condensation. Multiphase flow and heat transfer applications in power and process industries.

ENME656 Physics of Turbulent Flow (3 Credits)
Definition of turbulence and its physical manifestations. Statistical methods and the transport equations for turbulence quantities. Laboratory measurement and computer simulation methods. Isotropic turbulence. Physics of turbulent shear flows.
Prerequisite: ENME640; or students who have taken courses with comparable content may contact the department; or permission of instructor.

ENME657 Analysis of Turbulent Flow (3 Credits)
Mathematical representation of turbulent transport, production and dissipation. Closure schemes for predicting flows. Recent advances in direct and large eddy numerical simulation techniques.
Prerequisite: ENME640; and (ENME641; or students who have taken courses with comparable content may contact the department). Or permission of instructor.

ENME662 Linear Vibrations (3 Credits)
Development of equations governing small oscillations and spatially continuous systems. Newton's equations, Hamilton's principle, and Lagrange's equations. Free and forced vibrations of mechanical systems. Modal analysis. Finite element discretization and reductions of continuous systems. Numerical methods. Random vibrations.

ENME664 Dynamics (3 Credits)
Kinematics in plane and space; Dynamics of particle, system of particles, and rigid bodies. Holonomic and non-holonomic constraints. Newton's equations, D'Alembert's principle, Hamilton's principle, and equations of Lagrange. Impact and collisions. Stability of equilibria.
Prerequisite: ENES221; or students who have taken courses with comparable content may contact the department; or permission of instructor.

ENME665 Nonlinear Oscillations (3 Credits)
Nonlinear oscillations and dynamics of mechanical and structural systems. Classical methods, geometrical, computational and analytical methods. Birfurcations of equillibrium and periodic solutions; chaos.
Prerequisite: ENME662 and ENME 700; or equivalent.

ENME670 Continuum Mechanics (3 Credits)
Mechanics of deformable bodies, finite deformation and strain measures, kinematics of continua and global and local balance laws. Thermodynamics of continua, first and second laws. Introduction to constitutive theory for elastic solids, viscous fluids and memory dependent materials. Examples of exact solutions for linear and hyper elastic solids and Stokesian fluids.

ENME672 Composite Materials (3 Credits)
Micromechanics of advanced composites with passive and active reinforcements, mathematical models and engineering implications, effective properties and damage mechanics, recent advances in "adaptive" or "smart" composites.

ENME674 Finite Element Methods (3 Credits)
Theory and application of finite element methods for mechanical engineering problems such as stress analysis. Basic development of the method for solving the types of governing partial differential equations that are the foundations for many engineering and physical sciences. The emphasis is on balancing the theoretical/mathematical background with a computable implementation to reach applications. Some code writing and debugging will be involved. This class is suited for graduate students or high-achieving undergraduates in engineering, mathematics, or the physical sciences. A very basic knowledge of matrix-vector calculations and multivariable calculus are required. Some exposure to partial differential equations and experience with Matlab or a compiled language will be helpful but are not required.
Restriction: Must be in one of the following programs (ENGR: MS/PhDMechanical Engineering (Master's); ENGR: MS/PhDMechanical Engineering (Doctoral); ENGR: MS/PhDReliability Engineering (Master's); ENGR: MS/PhDReliability Engineering (Doctoral); or permission of ENGR-Mechanical Engineering department.
Credit Only Granted for: ENME 674, ENAE652, ENPM652 or ENPM808F.

ENME675 A Mathematical Introduction to Robotics (3 Credits)
Designed to provide graduate students with some of the concepts in robotics from a mathematical viewpoint, including introduction to group theory and basics of SO(3) and SE(3) group applied to robotics; rigid body motion; manipulator kinematics; introduction to holonomic & non-holonomic constraints; dynamics of robot manipulators.
Credit Only Granted for: ENME675 or ENME808V.
Formerly: ENME808V.

ENME678 Fracture Mechanics (3 Credits)
An advanced treatment of fracture mechanics covering in detail the analysis concepts for determining the stress intensity factors for various types of cracks. Advanced experimental methods for evaluation of materials or structures for fracture toughness. Analysis of moving cracks and the statistical analysis of fracture strength. Finally, illustrative fracture control plans are treated to show the engineering applications of fracture mechanics.

ENME680 Experimental Mechanics (3 Credits)
Advanced methods of measurement in solid and fluid mechanics. Scientific photography, moire, photoelasticity, strain gages, interferometry, holography, speckle, ndt techniques, shock and vibration, and laser anemometry.

ENME684 Modeling Material Behavior (3 Credits)
Constitutive equations for the response of solids to loads, heat, etc. based on the balance laws, frame invariance, and the application of thermodynamics to solids. Non-linear elasticity with heat conduction and dissipation. Linear and non-linear non-isothermal viscoelasticity with the elastic-viscoelastic correspondence principle. Classical plasticity and current viscoplasticity using internal state variables. Maxwell equal areas rule, phase change, and metastability and stability of equilibrium states. Boundary value problems. Introduction to current research areas.
Prerequisite: ENME670; or permission of instructor.

ENME690 Mechanical Fundamentals of Electronic Systems (3 Credits)
An understanding of the fundamental mechanical principles used in design of electronic devices and their integration into electronic systems will be provided. Focus will be placed on the effect of materials compatibility, thermal stress, mechanical stress, and environmental exposure on product performance, durability and cost. Both electronic devices and package assemblies will be considered. Analysis of package assemblies to understand thermal and mechanical stress effects will be emphasized through student projects.

ENME695 Design for Reliability (3 Credits)
Reliability is the ability of a product or system to perform as intended (i.e., without failure and within specified performance limits) for a specified time, in its life-cycle conditions. Knowledge of reliability concepts and principles, as well as risk assessment, mitigation and management strategies prepares engineers to contribute effectively to product development and life cycle management. This course teaches the fundamental knowledge and skills in reliability as it pertains to the design, manufacture, and use of electrical, mechanical, and electro-mechanical products. Topics cover the suitability of the supply chain members to contribute towards development, manufacturing, distribution and support of reliable products; efficient and cost-effective design and manufacture of reliable products; process capability and process control; derating, uprating, FMMEA, reliability prediction and reliability allocation; how to plan and implement product testing to assess reliability; how to analyze degradation, failure, and return data to estimate fundamental reliability parameters; root cause analysis; and reliability issues associated with warranties, regulatory requirements, and liabilities.Cross-listed with: ENRE695.
Credit Only Granted for: ENME695 or ENRE695.

ENME700 Advanced Mechanical Engineering Analysis I (3 Credits)
An advanced, unified approach to the solution of mechanical engineering problems, emphasis is on the formulation and solution of equilibrium, eigenvalue and propagation problems. Review and extension of undergraduate material in applied mathematics with emphasis on problems in heat transfer, vibrations, fluid flow and stress analysis which may be formulated and solved by classical procedures.

ENME701 Sustainable Energy Conversion and the Environment (3 Credits)
Discussion of the major sources and end-uses of energy in our society with particular emphasis on renewable energy production and utilization. The course introduces a range of innovative technologies and discusses them in the context of the current energy infrastructure. Renewable sources such as wind and solar, and renewable enabling technologies such as energy storage are discussed in detail. Particular attention is paid to the environmental impact of the various forms of energy. This course is designed to provide, when taken together with ENME635, a comprehensive overview of sustainable energy production and utilization including carbon capture and sequestration.
Prerequisite: Undergraduate thermodynamics course or permission of instructor.

ENME704 Active Vibration Control (3 Credits)
This course aims at introducing the basic principles of the finite element method and applying it to plain beams and beams treated with piezoelectric actuators & sensors. The basic concepts of structural parameter i dentification are presented with emphasis on Eigensystem Realization Algorithms (ERA) and Auto-regression models (AR). Different active control algorithms are then applied to beams/piezo-actuator systems. Among thes e algorithms are: direct velocity feedback, impedancematchingcontrol, modal control methods & sliding mode controllers. Particular focus is given to feedforward Leat Mean Square (LMS) algorithm & filtered-X LMS. O ptimal placement strategies of sensor & actuators are then introduced & applied to beam/piezo-actuator systems.
Prerequisite: ENME662 and ENME602; or students who have taken courses with comparable content may contact the department.
Recommended: Completion of coursework or background in Vibrations and Control recommended.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.

ENME707 Combustion and Reacting Flow (3 Credits)
This course covers thermochemistry and chemical kinetics of reacting flows in depth. In particular, we focus on the combustion of hydrocarbonf uels in both a phenomenological and mechanistic approach. The course co vers the specifics of premixed and nonpremixed flame systems, as wellasignition and extinction. Combustion modeling with equilibrium and chemical kinetic methods will be addressed. Environmental impact and emissi ons minimization will be covered in detail. Finally, the course will co ver available combustion diagnostic methods and their application in laboratory and real-world systems.
Prerequisite: ENME331 and ENME332; or students who have taken courses with comparable content may contact the department.

ENME710 Applied Finite Elements (3 Credits)
Application of finite element methods to the solution of engineering problems - such as stress analysis, thermal conductivity, fluid flow anlaysis, electro-magnetic field analysis and coupled boundary value problems. Emphasis is on the application of the techniques to the solution of pr oblems. Basic theory is covered at beginning of course.
Prerequisite: ENME331 and ENME332.
Restriction: Must be in one of the following programs (Engineering: Mechanical; Engineering: Aerospace; Engineering: Civil).

ENME711 Vibration Damping (3 Credits)
This course aims at introducing the different damping models that describe the behavior of viscoelastic materials. Emphasis will be placedon m odeling the dynamics of simple structures (beams, plates & shells) with Passive Constrained Layer Damping (PCLD). Considerations will also be g iven to other types of surface treatments such as Magnetic Constrained Layer Damping (MCLD), Shunted Network Constrained Layer Damping (SNCLD),Active Constrained Layer Damping (ACLD) and Electrorheological Constrained Layer Damping (ECLD). Energy dissipation characteristics of the damp ing treatments will be presented analytically & by using the modal strain energy approach as applied to finite element models of vibrating structures.
Prerequisite: ENME662; or students who have taken courses with comparable content may contact the department.
Recommended: Completion of coursework or background in Vibrations recommended.
Restriction: Must be in a major in ENGR-A. James Clark School of Engineering.

ENME712 Measurement, Instrumentation and Data Analysis for Thermo-Fluid Processes (3 Credits)
This course is designed to offer systemic coverage of the methodologies for measurement and data analysis of thermal and fluid processes at the graduate level. The course materials will cover three broad categories: (1) Fundamentals of thermal and fluid processes in single phase and multi phase flows as relates to this course; Measurement and Instrumentation techniques for measurement of basic quantities such as pressure, temperature, flow rate, heat flux, etc., and (3) Experimental Design and Planning, sources of errors in measurements, and uncertainty analysis.

ENME713 Nanoparticle Aerosol Dynamics (3 Credits)
Covers the basic science of nanoparticle formation, growth, and transport; the science and engineering of measurement; and the environmental impact and industrial use of nanoparticles.
Restriction: Permission of instructor.
Credit Only Granted for: ENME713 or ENME808M.
Formerly: ENME808M.

ENME722 Equilibrium Modeling in Engineering (3 Credits)
Provide motivation and introduction to equilibrium models involving economics and engineering. We will concentrate on models involving markets (Nash-Cournot, etc.), those wherein the activities are spatially diverse, those involving energy activities or traffic flow, as well as selected other examples in mechanical engineering. Areas that will be covered include:Review of relevant optimization theory, presentation of the mixed complementarity problem (MCP) and variational inequality problem (VIP) formats to solve equilibrium problems as well as introduction to existence and uniqueness results, review of relevant game theory notions, presentation of specific models for engineering-economic applications, presentations for algorithms to solve these equilibrium problems.
Credit Only Granted for: ENCE722 or ENME722.

ENME725 Probabilistic Optimization (3 Credits)
Provide an introduction to optimization under uncertainty. Chance-constrained programming, reliability programming, value of information, two stage problems with recourse, decomposition methods, nonlinear and linear programming theory, probability theory. The objectives of this course are to provide understanding for studying problems that involve optimization under uncertainty, learn about various stochastic programming formulations (chance constrained programs, two stage methods with recourse, etc.) relevant to engineering and economic settings, present theory for solutions to such problems, and present algorithms to solve these problems.
Prerequisite: An advanced undergraduate course in probability and a graduate course in optimization or permission of the instructor required. Cross-listed with ENCE725.
Credit Only Granted for: ENME725 or ENCE725.

ENME737 Application of AI in Reliability: Prognostics and Systems Health Management (PHM) (3 Credits)
Prognostics and health management (PHM) is an enabling discipline consisting of technologies and methods to assess the reliability of a product in its actual life cycle conditions to determine the advent of failure and mitigate system risk. PHM permits the reliability of a system to be evaluated and predicted in its actual application conditions. In recent years, prognostics and health management (PHM) has emerged as a key enabling technology to provide an early warning of failure; to forecast maintenance as needed; to reduce maintenance cycles; to assess the potential for life extensions; and to improve future designs and qualification methods. In the future, PHM will enable systems to assess their own real-time performance (self-cognizant health management and diagnostics) under actual usage conditions and adaptively enhance life cycle sustainment with risk-mitigation actions that will virtually eliminate unplanned failures.
Credit Only Granted for: ENME737 or ENME808A.
Formerly: ENME808A.

ENME740 Lab-on-a-Chip Microsystems (3 Credits)
Fundamentals and application of lab-on-a-chip and microfluidic technologies. A broad view of the field of microfluidics, knowledge of relevant fabrication methods and analysis techniques, and an understanding of the coupled multi-domain phenomena that dominate the physics in these systems.
Credit Only Granted for: ENME 481, ENME 808E, ENME 740.
Formerly: ENME 808E.

ENME741 Operations Research Models in Engineering (3 Credits)
A survey of the fundamentals of operations research models and methods in engineering including: optimization using linear programming, nonlinear programming, integer programming, as well as equilibrium/game theory via mixed complementarity problems. Examples of specialized course items include: specifics of optimizing power and gas networks, discussion of other network optimization problems, resource-constrained problems, two-level optimization as an example of mixed integer nonlinear programming (MINLP) programming problems as well as algorithms to solve the above types of problems."
Prerequisite: (ENCE302; or (ENME271 and ENME392)); and (MATH140 and MATH240). Or permission of instructor.
Credit Only Granted for: ENME738, ENME741, or ENCE603.
Formerly: ENME738.

ENME742 Urban Microclimate and Energy (3 Credits)
Examines urban microclimate from the perspective of transient heat and mass transfer using building energy simulations for building clusters. The focus is on understandingbuilding energy consumption and environmental impacts from the individual building scale (~100) to a neighborhood scale (~103). Emerging morphological properties of building clustersmodulate transient convective and radiative heat transfer resulting in different localmicroclimatic conditions. At the neighborhood scale, these conditions are analyzed using heatand mass transfer simulations in building clusters to provide boundary conditions for transient building energy simulations. At the individual building scale, besides the energy consumption,this course examines connection between indoor and outdoor environments.Jointly offered with ENME424.
Credit Only Granted for: ENME808I, ENME42 4 or ENME742.
Formerly: ENME808I.

ENME743 Applied Machine Learning for Engineering and Design (3 Credits)
Learn how to apply techniques from Artificial Intelligence and Machine Learning to solve engineering problems and design new products or systems. Design and build a personal or research project that demonstrates how computational learning algorithms can solve difficult tasks in areas you are interested in. Master how to interpret and transfer state-of-the-art techniques from computer science to practical engineering situations and make smart implementation decisions.
Prerequisite: Must have completed undergraduate level Statistics (ENME392 or equivalent), or permission of the instructor. Jointly offered with: ENME440.
Credit Only Granted for: ENME440 OR ENME743.

ENME744 Additive Manufacturing (3 Credits)
Develop a comprehensive understanding of fundamental additive manufacturing-alternatively, "three-dimensional (3D) printing-approaches, including extrusion-based deposition, stereolithography, powder bed-based melting, and inkjet-based deposition. Cultivate a "design-for-additive manufacturing" skill set for combining computer-aided design (CAD) and computer-aided manufacturing (CAM) methodologies to produce successful 3D prints. Fabricate 3D mechanical objects using a variety of 3D printing technologies on campus. Execute a design project that demonstrates how additive manufacturing technologies can overcome critical limitations of traditional manufacturing processes.
Prerequisite: ENME272 and ENME331; or students who have taken courses with comparable content may contact the department. Jointly offered wit h ENME416.
Credit Only Granted for: ENME 416 OR ENME 744.

ENME745 Numerical Methods in Engineering (3 Credits)
Fundamental aspects of how to apply analytical mathematical concepts to discrete data. The course is aimed at graduate students in any area of engineering, and treats the material in a general manner that is not specific to any application or field of specialization.Jointly offered with: ENME417.
Credit Only Granted for: ENME745, ENME808B, ENME417 or ENME489J.
Formerly: ENME808B.

ENME746 Medical Robotics (3 Credits)
The evolution of robotics in surgery is a new and exciting development. Surgical robotics brings together many disparate areas of research such as development and modeling of robotic systems, design, control, safety in medical robotics, haptics (sense of touch), ergonomics in minimally invasive procedures, and last but not the least, surgery. The primary goal of this course is to acquaint the students with the fundamentals of robot design and control and different areas of research that lead to the development of medical robotic systems. As a result, the course will cover basic robot kinematics such as forward and inverse kinematics as well as velocity and acceleration analysis. We will also cover additional topics specific to medical robotics such as medical image guidance. The course will include a project, where students will learn to develop, build, and control a medical robot.
Prerequisite: ENME361.
Credit Only Granted for: ENME808M, ENME489C or ENME746.
Formerly: ENME808M, ENME489C.

ENME750 Applied System Identification (3 Credits)
An introductory graduate level course on system identification, which concerns various methods and techniques for data-driven modeling and estimation of dynamical systems.
Credit Only Granted for: ENME808R or ENME750.
Formerly: ENME 808R.

ENME751 Applied Nonlinear Control (3 Credits)
An introductory graduate level course on nonlinear control design, which concerns various methods and techniques for the analysis and synthesis of nonlinear control systems.
Credit Only Granted for: ENME808B or ENME751.
Formerly: ENME808B.

ENME753 Indoor Environment and Mechanical Systems (3 Credits)
Fundamentals of indoor air quality and its measurements. Exploration of air cleaning technologies for gaseous, particulate and infectious agent contaminants. Simulations of air flow and contaminants with multi-zone models to allow testing of both contaminant dispersion in buildings and effectiveness of air cleaning technologies.Jointly offered with: ENME422.
Credit Only Granted for: ENME422, ENME753, or ENME808U.
Formerly: ENME808U.

ENME765 Thermal Issues in Electronic Systems (3 Credits)
This course addresses a range of thermal issues associated with electronic products life cycle. Computational modeling approaches for various levels of system hierarchy. Advanced thermal management concepts including: single phase and phase change liquid immersion, heat pipes, and thermoelectrics.
Prerequisite: ENME331 and ENME332.
Corequisite: ENME473; or students who have taken courses with comparable content may contact the department.

ENME770 System Sustainment: The Science and Policy of Sustaining Critical Systems (3 Credits)
Introduces the important attributes of system sustainment (system maintenance, support and upgrade) by integrating data analytics, cost analysis and public policy. Topics include: acquisition, reliability, maintenance, availability, inventory management, supply chain, life-cycle cost and contracting.
Credit Only Granted for: PLCY798J or ENME770.

ENME775 Manufacturing Technologies for Electronic Systems (3 Credits)
This highly multi-disciplinary course presents the mechanical fundamentals of manufacturing processes used in electronics assemblies. The emphasis is on quantitative modeling of the intrinsic impact that processing has on structure, properties, performance and durability. Students will learn how to quantitatively model many of the key manufacturing steps from mechanistic first principles, so that sensitivity studies and process optimization can be performed in a precise manner. Processes considered include: wafer-level processes such as polishing, lithography, etching and dicing; packaging operations such as die attachment, wirebonding, flip chip bonding, and plastic encapsulation; multilevel high-density substrate fabrication processes; assembly processes such as reflow and wave soldering of surface-mount components to electronic substrates.
Prerequisite: ENME690.

ENME780 Mechanical Design of High Temperature and High Power Electronics (3 Credits)
This course will discuss issues related to silicon power device selection (IGBT, MCT, GTO, etc.), the characteristics of silicon device operation at temperatures greater thatn 125C, and the advantages of devices based on SOI and SiC. It will also discuss passive components and packaging materials selection for distributing and controlling power, focusing on the critical limitations to use of many passive components and packaging materials at elevated temperatures. In addition it will cover packaging techniques and analysis to minimize the temperature elevation caused by power dissipation. Finally, models for failure mechanisms in high temperature and high power electronics will be presented together with a discussion of design options to mitigate their occurrence.
Prerequisite: ENME382, ENME473, or ENME690.

ENME788 Seminar (1-3 Credits)
First or second semester. Credit in accordance with work outlined by mechanical engineering staff.

ENME799 Master's Thesis Research (1-6 Credits)

ENME808 Advanced Topics in Mechanical Engineering (2-3 Credits)

ENME898 Pre-Candidacy Research (1-8 Credits)

ENME899 Doctoral Dissertation Research (1-8 Credits)

ENNU - Engineering, Nuclear

ENNU468 Research (2-3 Credits)
Investigation of a research project under the direction of one of the staff members. Comprehensive reports are required.
Restriction: Permission of instructor; and permission of ENGR-Materials Science & Engineering department.
Repeatable to: 6 credits.

ENNU489 Special Topics in Nuclear Engineering (3 Credits)
Selected topics of current importance in nuclear engineering.
Restriction: Permission of ENGR-Materials Science & Engineering department.
Repeatable to: 6 credits if content differs.

ENNU609 Seminar in Nuclear Engineering (1 Credit)

ENNU620 Mathematical Techniques of Reliability Engineering (3 Credits)
Basic probability and statistics. Application of selected mathematical techniques to the analysis and solution of reliability engineering problems. Applications of matrices, vectors, tensors, differential equations, integral transforms, and probability methods to a wide range of reliability related problems.Cross-listed with: ENRE620.

ENNU633 Convective Transport Phenomena in Single- and Multi-Phase Systems (3 Credits)
Single medium - single phase systems, two-phase systems; Two media - solid-fluid systems: continuous interface, large interfacial area, fluid-fluid systems; Three media - solid-solid-fluid systems, solid- liquid-gas systems.

ENNU643 Radiation Processing in Advanced Manufacturing (3 Credits)
Radiation processing facilities for industrial production - electron beam, gamma, x-ray; types of electron beam machines; radiation processing - yields, G-values, throughput, efficiency; readiation in advanced manufacturing; radiation sensors and dosimetry; sterilization of industrial products; radiation-physical technology.

ENNU648 Special Problems in Nuclear Engineering (1-16 Credits)

ENNU649 Selected Topics in Nuclear Engineering (1-3 Credits)
Topics of current interest in nuclear engineering.
Prerequisite: Permission of ENGR-Materials Science & Engineering department.
Repeatable to: 6 credits if content differs.

ENNU652 Principles of Reliability Analysis (3 Credits)
Principal methods of reliability analysis, including fault tree and reliability block diagrams; Failure Mode and Effects Analysis (FMEA); event tree construction and evaluation; reliability data collection and analysis; methods of modeling systems for reliability analysis. Focus on problems related to process industries, fossil-fueled power plant availability, and other systems of concern to engineers.Cross-listed with: ENRE602.
Credit Only Granted for: ENRE602 or ENNU652.

ENNU653 Mechanical reliability of Materials (3 Credits)
Introduction to engineering materials; atomic structure; diffusion; defects; phase equilibria; kinetics and microstructures; deformations; fracture; materials testing; fatigue and creep; thermal properties; failure mechanisms; fractography; failure modeling.
Prerequisite: ENNU651.

ENNU655 Radiation Engineering (3 Credits)
An analysis of such radiation applications as synthesizing chemicals, preserving foods, control of industrial processes, design of irradiation installations. E.G., Cobalt 60 gamma ray sources, electronuclear machine arrangement, and chemonuclear reactors.
